For example, the current legislative authority for the package of incentives for enlistment and reenlistment in the reserves expires on September 30, 1985. The committee approved an extension and enhancement of these programs while also making clear that the new GI bill approved last year is to be the primary recruiting tool for the guard and reserve. And the committee would like to commend the Army and the other services for moving ahead to implement the GI education bill for the Active Force on July 1.

H.R. 1872 proposes several improvements that will impact on the Nation's mobilization resource: the individual Ready Reserve. I have for many years been deeply troubled about the status of the individual Ready Reserve. Many questions remain unanswered. How up to date are the addresses? How many individuals would respond? What is their physical condition and the recency of their skill training? Some type of muster test or annual training requirement would go a long way toward providing answers to these questions, and H.R. 1872 contains several initiatives to start the ball rolling.

Another initiative of major importance is the new program to increase the number of health professionals in critical combat medical skills in the Guard and Reserve. Seventy percent of the health professionals required to provide combat casualty care under a full mobilization situation would come from the Reserve components. Yet, there are critical shortages of surgeons and operating room nurses. Defense health officials have estimated

that three-quarters of those wounded during the first few days of a major conflict would not receive life-saving surgical care. H.R. 1872 proposes a loan repayment program and limited utilization of the Armed Forces Health Professions Scholarship Program to attract health professionals in criteria combat medical skills to the reserves.

As a long-time advocate of increased utilization for the reserve components, I urge my colleagues to support the initiatives contained in H.R. 1872 designed to increase the effectiveness of the Reserves. My colleagues will remember that the Armed Services Committee has emphasized its belief for a number of years that Reserve personnel should be considered as a means of manning future force structure increases.

Today, there is no doubt that a well-equipped, well-trained and adequately manned Reserve or Guard unit can get the job done. Reserve forces currently perform critical mobilization missions as well as some day-to-day operational missions—for example, Air Force strategic refueling and strategic airlift.

I recently had the pleasure of traveling to Central America with Lieutenant General Walker, Chief National Guard Bureau, to observe firsthand National Guard participation in joint exercises with Panamanian and Honduran forces. I was uniformly impressed with the capabilities, dedication, and enthusiasm of the National Guardsmen with whom I met. The Reserves have certainly come a long way since the days of strength shortfalls, thanks to the Reserve recruiting and retention incentives approved by Congress.

I urge my colleagues to continue to work to improve the readiness and effectiveness of the Reserves in the future—and this bill is a step in the right direction.

□ 1430

Mr. STRATTON. Mr. Chairman, I yield such time as he may consume to the gentleman from Illinois [Mr. PRICE].

Mr. PRICE. I thank the gentleman for yielding time to me.

Mr. Chairman, it is my privilege to present title IX of H.R. 1827. This title contains the fiscal year 1986 authorization for seven Department of Energy defense programs that are under the jurisdiction of the Armed Services Committee. The vote to approve title IX by the subcommittee was 14 yeas to 3 nays. The subcommittee held hearings on H.R. 1987, which is now title IX, on February 20, 21, 22, 25, and 27. The full committee reported this title by voice vote.

The Department of Energy budget request for defense programs—approximately $8 billion—amounted to about 2½ percent of the total fiscal year budget request for national defense. We have reduced that to approximately $7.7 billion. In marking up the bill, the subcommittee was aware that substantial reductions would have to be made in order to meet the committee's authorization target of no growth beyond inflation. The committee has done this by reducing the authorization request by about $241 million.

In recommending reductions from the request, the committee has followed several principles:

First, we made allowances in some areas, but not all, for inflation.

Second, we allowed for the full authorization of almost all increases requested that are necessary for safeguards and security of facilities, weapons and weapons components, nuclear materials, and nuclear weapons information. The Department had budgeted an increase of $55 million above fiscal year 1984 for this purpose.

Third, it was necessary to authorize projects and activities that are necessary to comply with over 50 Federal laws such as the Clean Water Act, Clean Air Act, and Occupational Health and Safety [OSHA] regulations imposed by the EPA and other Federal and State agencies. The fiscal year 1986 DOE request contained $360 million for environmental, safety, and health programs. It was also necessary to provide for payment of recently imposed State sales and use taxes. These items require estimated increases of $75 million to $100 million over last year.

Fourth, there are some 44 ongoing construction projects requiring additional incremental funding in fiscal year 1985. Many of these projects are necessary to restore and replace facilities and equipment that have been operated for periods of 30 to 40 years.

We have also recognized the need for program growth in some areas that will be necessary to handle in increased workload. An example of this is the increase in demand for naval nuclear reactor fuels.

And finally, we found it necessary to recomment that certain research and development programs such as the Inertial Confinement Fusion [ICF] Program and the Plasma Separation Process Program be restored since they can make important economic and military contributions to national security in the future.

After the above mandatory items and the committee's recommendations have been added and subtracted, there is no real program growth in the Department of Energy area.

In summary, the budget request was for $7,958.7 million. The subcommittee is recommending authorizations that total to $7,718.1 million—a net reduction of $240.6 million. This allows an increase of $384 million, of which: $134 million—10 percent—of the increase is for waste management: $168 million—44 percent—is for materials production, and there are relatively small increases in weapons research and development, testing and production, averaging 4.9 percent.

I would point out that this bill supports seven programs that are vital to national security, such as: the Navy's nuclear propulsion capability; the technical basis for U.S. deterrent capabilities; and the only U.S. scientific and technical capability for verification and monitoring several arms control agreements, including nuclear testing and nuclear nonproliferation treaties. These programs also provide nuclear materials for defense and civilian uses, and the recycle of naval nuclear fuels for reuse. In addition, these DOE programs also provide for the continuing management and permanent disposal of radioactive wastes that have been generated for defense purposes since the 1940's. This same waste management technology is being applied to future solutions to civilian waste management and disposal.

The committee has recommended very few additions to the request. As I mentioned previously, we are recommending the restoration of $75 million for additional operating expenses and $10 million for additional equipment in order to fully utilize the capabilities of recently completed inertial confinement fusion research facilities during the next fiscal year. These facilities have been expensive to build and offer great promise only if the required experimental activites can be continued. This would not be possible at the budget level requested by the administration. Even with the additional amounts recommended, there will be a reduction of 10 percent or more in the Inertial Confinement Fusion Program during the next fiscal year. This increase has been more than offset by reductions in other areas.

In another area, the subcommittee is recommending the addition of $13.3 million in operating expenses to continue the development of a plasma separation process to purify, at a much lower cost, uranium and other special metal assets now in the inventory. This uranium cannot be utilized in its present form. Closely connected with this effort, the committee has added $8 million to begin design of a plant project for the refinement of plutonium through the special isotope separation process. These two processes will more than pay for themselves through the recovery of uranium and plutonium that cannot otherwise be used, or which could be made usable only at much greater expense.

Title IX, as reported, contains 14 general provisions. The first nine general provisions—sections 921 through 929—deal with housekeeping items such as reprogrammings, limitations

on the use of funds, transfer authority, and other matters that have been contained in similar authorization bills since 1977.

The five new general provisions—sections 931 through 935—adopted by the committee would:

First, section 931 imposes general reductions totaling $32.3 million on the total amounts that would be authorized;

Second, section 932 authorizes the Secretary of Energy to carry out a contract that would provide a final financial settlement with the city of Oak Ridge, and Roane and Anderson Counties, TN, under the Atomic Energy Assistance Act of 1955;

Third, section 933 authorizes the Secretary of Energy to obligate not more than $5 million of funds otherwise available to the Department to renovate a Department of Energy-owned building at the Oak Ridge Reservation, but only if this renovation is necessary to the requirements that Department of Energy may have in connection with the Strategic Defense Initiatives Program;

Fourth, section 934 prohibits the use of funds authorized for appropriation for propaganda, certain advertising, lobbying, and for other purposes that are not necessary for a Department of Energy contractor's operation in support of Department of Energy defense programs. Although most of these prohibitions have been included in annual Department of Defense appropriations language, those appropriations acts have not applied to Department of Energy contractors; and

Fifth, section 935 technically amends the fiscal year 1985 authorization act.

As the committee reports shows, the committee has recommended numerous monetary changes in order to arrive at the required overall reductions, while keeping DOE's defense programs in balance with those authorized for the Department of Defense. The sole purpose of DOE's defense programs are to support DOD's requirements. For example, DOE helps support some 144 operating Navy combatant ships and submarines, with 24 additional ships authorized and funded. DOE also supports the Trident submarine, Trident I and Trident II missile programs, the Pershing II and ground-launched cruise missile programs, and other programs long supported by the Congress. DOE's research and development laboratories also do important work on advanced conventional weapons and support the infrastructure for advanced energy research.

Title IX represents a balanced, no real growth budget for fiscal year 1986 and should be supported in connection with the remainder of H.R. 1872.

Mr. DICKINSON. Mr. Chairman, I yield 5 minutes to the gentleman from Washington [Mr. CHANDLER].

Mr. CHANDLER. I thank the gentleman for yielding me this time.

Mr. Chairman, I do not recall the year, but sometime in the 1950's, when President Eisenhower and the Nation were facing unprecedented deficits of something like $5 or $10 billion a year, and inflation rates somewhere in the range of 1.5 or 2 percent, he made the statement that we are more likely to succumb to an internal fiscal foe than we are to a foreign aggressor.

Well, if that was true in the 1950's, and a former general like President Eisenhower could make a statement like that, I certainly believe that that is the case today.

I will be offering an amendment to the Defense authorization bill along with my colleague, BRUCE MORRISON of Connecticut, that will freeze fiscal year 1986 defense funding at the fiscal year 1985 appropriations level. I believe this freeze is a necessary step if Congress is to responsibly address the deficit in a fair manner.

I have in the past supported the President's defense modernization program, and I commend the President for his efforts to build up our national security. My commitment to a strong national security system has not been diminished with my support of a freeze. I know that the President recognizes the importance of addressing our rising deficits. If Congress fails to bring the deficits under control, our economic stability will be threatened. But a strong defense is not possible without a strong economy.

Reducing the Federal budget is not an easy undertaking. Those of us in the 92 Group agonized over many of the specific cuts and freezes that had to be made to arrive at what we feel is an equitable budget. We concluded that any budget, if it is to win the support of the American people, needs to spread its savings across-the-board. Defense can be no exception, particularly when the public perception is one of a Pentagon spending out of control.

In freezing the Pentagon budget, national security would not be jeopardized. A substantial defense buildup has already taken place in the 1980's with more than $1 trillion spent on defense over the past 5 years. Defense spending has grown at an annual real rate of 8.3 percent over those 5 years, pushing military spending to higher levels, in constant dollars, than prevailed during the Vietnam war. If a freeze were implemented, the defense budget would be frozen at a very high level.

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. CHANDLER. I yield to the gentleman.

Mr. STRATTON. I thank the gentleman for yielding.

Did I understand the gentleman to say that his desire and his motion was to freeze at the 1985 level; is that correct?

Mr. CHANDLER. That is correct, sir.

Mr. STRATTON. That is precisely what the committee has done. It is a little strange, it seems to me, that a committee that ordinarily has been gung-ho for increasing the budget should come in with a freeze at the 1985 level and then we get attacked for it. We do not even get any credit for it.

Does the gentleman want to freeze the programs that are carried out in Connecticut or in his own State?

Mr. CHANDLER. The difference between the 92 budget that is proposed and this one is that yours recognizes inflation and ours does not; that is the difference between the two budgets.

Mr. STRATTON. Four little percent of inflation for the entire year. That is hardly considered inflation at all.

It seems to me that we somehow lose sight of exactly what the committee has done, and when we come in with the kind of a bill that we think the House wants, then we are criticized.

Mr. CHANDLER. Well, I think what we can do is put this amendment up and we will find out if this amendment or the committee's budget is what the House wants. This is a constructive alternative; it is not, my remarks were not meant nor are they an attack on the committee's work. I have been respectful to the gentleman and to all of the others. I am simply stating my opinion, which I have a perfect right to do.

Mr. HERTEL of Michigan. Mr. Chairman, will the gentleman yield?

Mr. CHANDLER. I yield to the gentleman.

Mr. HERTEL of Michigan. I thank the gentleman.

I think what we are talking about is the gentleman's proposal talks about an absolute freeze; the acting chairman was talking about 4 percent inflation.

We are talking about 12 billion real dollars here; difference at the very least.

Mr. CHANDLER. That is correct.

Mrs. BYRON. Mr. Chairman, will the gentleman yield?

Mr. CHANDLER. I yield to the gentlewoman.

Mrs. BYRON. I thank the gentleman for yielding.

Basically what you are really doing is cutting. Because I think in this day and age, when we look at our proposals, if you do not take the inflation factor in, then basically, from last year, you are offering a cut.

Mr. CHANDLER. What you would in effect end up with, I would say, is about a minus 4 in fiscal 1986, and

then our proposal would be a zero, zero on into the outyears.

The CHAIRMAN pro tempore. The time of the gentleman from Washington [Mr. CHANDLER] has expired.

Mr. STRATTON. Mr. Chairman, I yield 2 minutes to the gentleman from Washington [Mr. CHANDLER].

Mr. CHANDLER. I thank the gentleman for the additional time.

Mr. Chairman, I would just like to say that over a period of time, as I have been a member of the Military Reform Caucus, a group that tries to thoughtfully look at this, and made up of Members of both sides of the aisle, conservatives as well as liberals, one of the questions that has often been asked of the Pentagon is, "Would you prioritize for us what you want, and in light of facing budget reductions, what would be your lowest priority?" We have never really received an answer to that question. It is one that I think deserves to be answered. It is one that we are going to continue to ask.

In light of the lack of confidence that I sense among the American people for what is going on in the Defense Establishment, it is an answer that I think not only they deserve, but certainly the Members of Congress who have to make these decisions.

Mr. Chairman, our armed services can actually be made more effective by freezing the Pentagon budget at its already very high level and closely examining the way the military does business. Congress needs to look at reforms that will give us greater security for the tax dollars that are invested in defense.

We have learned over the past few years that money alone cannot provide us with the security we need. Increased defense budgets have brought high costs and overhead, contracting abuses and improprieties, and stories of $400 hammers and $600 toilet seats. I have found in my discussions with constituents that the strong consensus of a couple of years ago for increased defense budgets has been undermined by the highly publicized accounts of waste, mismanagement, and abuse. My constituents don't feel they are getting their money's worth, and they want to see a more accountable Department of Defense.

In many cases, we find that we are getting less bang for the buck out of Pentagon spending. One example I find especially incredible comes in the area of aircraft procurement. Taken together, the Air Force and Navy procurement budgets amount to about 36 percent of the total procurement budget between fiscal year 1982 and 1985. Even though the aircraft budget increased 75 percent in constant dollars from the fiscal year 1978–81 level, 11 fewer airplanes were purchased.

The Air Force is not alone. The Navy budget for new shipbuilding went up 47 percent during the same timeframe, but we got 17 percent fewer major combatants. Even in cases when procurement quantities increase, they increase at a much slower rate than procurement budgets. Clearly, quantity increases have not kept pace with budget increases.

Even with a freeze, congressional analysis shows that outlays would still go up by about $15 billion. With proper reforms, the defense budget would still be more than enough for deterrence and arms control leverage.

The Armed Services Committee would be charged with finding the ways to freeze the defense budget if the Morrison-Chandler amendment is passed. We need to implement concrete management improvements designed to reduce today's excessive costs, increase readiness and procure large quantities of effective, reasonably priced weapons.

Support for this freeze is not limited to Democrats and liberal Republicans. I consider myself a conservative on defense issues, and I would not support such a freeze if it undermined our national security. I am convinced, however, that this proposal is supported by the American people and that our national interests would best be served through a defense freeze that is part of a comprehensive effort to deal with rising deficits.

Mr. DICKINSON. Mr. Chairman, I yield 3 minutes to the gentleman from Wisconsin [Mr. ROTH].

□ 1440

Mr. ROTH. I thank the gentleman for yielding this time to me.

Mr. Chairman, I have had a chance to take a look at this legislation and I want to congratulate the committee in at least one instance for a really terrific job. The committee made the right decisions on the MCM, so I want to compliment the gentleman from Florida [Mr. BENNETT], and the best military mind in the House, the gentleman from New York [Mr. STRATTON], for their work in this area. I also commend my very good friend and the gentleman we all admire, the gentleman from Alabama [Mr. DICKINSON], for his work. Without the mine countermeasure ships we could not move our Navy.

No matter how many ships we build, if they are bottled up in the harbors they are not going to be of much avail to our country. So I compliment this committee for going along and authorizing all four MCM's, requested by the Navy.

I have had a chance to take a look at the construction of these ships. The job, in my opinion and that of others who are familiar with these ships, is being very well done. These 224-ft long, ships are meeting their scheduled delivery date, which is something that cannot be said for every project the Government is involved in.

These ships are being built on the Great Lakes, on Lake Michigan, by Peterson Builders and Marinette Marine, both respected shipbuilders which consistently deliver a quality product to the Navy. In addition some 25 other States are vendors and contributing to the MCM's. As I have said before, without the MCM's, we could not move our Navy. This is a very good investment for the American people, and that is why I commend this committee for the work that they have done in this area.

The production of the four ships in 1986 will have several distinct advantages for the taxpayer, for the Navy, and for the local economy. It will maintain the planned delivery schedule, thus holding down costs. There are no Government projects that I am aware of that are holding down the costs like the MCM Program, and it is going to be, I think, a real advantage for our Navy. It will maintain a steady shipyard workload. It will maintain a steady vendor production line. And it will provide good competition between the contractors.

So I commend the committee for their insight and for their intelligence in this matter, and it gives me a renewed sense of confidence, and I think the American people, too, when they see a subcommittee like this looking at how every dollar is spent; that we get a return for every dollar that is spent. I think that is what the American taxpayers are asking for and I think that is what this subcommittee is delivering, especially in this instance.

Mr. STRATTON. Mr. Chairman, I yield 7½ minutes to the gentlewoman from Maryland [Mrs. BYRON].

Mrs. BYRON. I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise today as a member of the Committee on Armed Services, and I wish to highlight some of the action that this committee has taken on this bill.

As has been already mentioned by several of my colleagues, the Armed Services Committee is recommending a bill that authorizes no real growth in the defense budget. Essentially, this means returning to the levels appropriated by the Congress for the fiscal year 1985 defense budget and allowing for inflation. As such, the committee recommends reducing by $19.6 billion the total defense budget request of $322 billion. Because the committee determined that it was necessary to ensure adequate growth in the readiness accounts, the largest reductions unfortunately were made in the investment accounts, and in particular, the procurement accounts of the military services.

H.R. 1872 provides a 2-percent negative real growth for fiscal year 1986 for the procurement programs under the purview of the Subcommittee on

Procurement and Military Nuclear Systems. This level of spending translates into a reduction of $7.1 billion, and means that we are recommending reductions in the amount of inflation provided for the procurement accounts. Our task was not easy—setting defense priorities while bringing the defense budget into line with our other national priorities. I believe that the committee has done a very responsible job in establishing a balanced, affordable set of national defense priorities.

To meet these fiscal constraints while providing for a credible U.S. defense posture, the committee established several policy guidelines. First, the committee decided to continue ongoing programs, at steady production rates before ambitious new programs were initiated. For example, the committee maintained the production rate of 840 M-1 tanks for fiscal year 1986. Because of contract savings and transfer of funds from foreign military sales of M-48-A5 tanks, the committee authorized the procurement of 840 M-1 tanks and reduced the budget request by almost $80 million. Reducing the procurement quantities of M-1 tanks would have been an easy way to provide savings in the overall defense budget but that approach would only delay the time required to complete the Army's modernization program for M-1 tanks.

Second, the committee decided to defer or terminate 30 costly procurement programs. This historic action resulted in savings of almost $2 billion in this budget and will provide additional savings in future years. In some cases, such as the E-6A Tacamo strategic communications aircraft, the committee decided that costly new starts were not affordable this year and recommended deferral. In other cases, such as the P-3C Orion submarine hunting aircraft, the committee deleted procurement funds because of concern regarding escalating unit costs.

The committee also examined closely the major acquisition programs in the defense budget, and undertook several management initiatives to reduce potential risks to the Government and the taxpayer. The Army's Sergeant York air defense Divad system is a good example where the committee exercised leadership and provided stringent limitations on the obligation of procurement funds.

The committee reduced the budget request for this system by almost $200 million. The committee also recommends language in the bill that fences the obligation of funds until and unless the Secretary of Defense certifies that testing has demonstrated conclusively that the system fulfills the performance specifications of the contract. The contractor must also provide a warranty to that effect. With these provisions, and this cutback the committee guarantees that the Army will purchase a weapon system that performs according to the original specifications—with no additional cost to the taxpayer.

One of the major priorities preserved by the committee was its continued commitment to the modernization of our Guard and Reserve Forces. The committee believes very strongly that providing modern equipment to the Guard and Reserve Forces is essential. Many of these units will be among the first to deploy in the event of a conflict. To continue these initiatives, the committee recommends authorization of almost $700 million to purchase equipment specifically for the Guard and Reserve. Some of the key initiatives include: Increased emphasis on air defense capabilities for the Army National Guard, additional airlift assets for the Air National Guard, and additional medium attack aircraft for the Naval Reserve.

Finally, I would like to highlight one of the major initiatives undertaken in H.R. 1872 that will strengthen the management of procurement programs. The committee recommends strengthening the selected acquisition reports [SAR]—the main vehicle for alerting Congress to potential problems in weapons systems. The SAR have been trimmed in recent years to the point where they have become useless documents for congressional oversight. H.R. 1872 also directs the Department to provide full life-cycle costs for each aquisition program included in the SAR after the first quarter of fiscal year 1985. This initiative will allow the Congress to judge new acquisition programs not only on the basis of investment, but also on the basis of ownership costs.

Mr. Chairman, I think some of these recommendations are long overdue. I also believe very strongly that we cannot cut our defense any further. I think this committee has acted rationally, with a great deal of thought and consideration, with a package that meets our national security requirements and also meets our fiscal restraints.

□ 1450

Mr. DICKINSON. Mr. Chairman, I yield 6 minutes to the very distinguished gentleman from Indiana [Mr. HILLIS].

Mr. HILLIS. Mr. Chairman, I thank the gentleman for yielding me this time.

I would like to begin by commending my colleague who just spoke on the remarks she has made about the bill. I think she was very, very accurate in stressing the fact that this is a very austere measure. It has had very close scrutiny by the committee and all the subcommittees, and every action that could be taken to save money and to get more defense for the dollar has been taken by the committee, there are cuts there of well over $18 billion from the proposals originally submitted, and, as the gentlewoman mentioned, 30-some procurement programs have been terminated.

This is a complicated bill. There are some 200 pages in the legislation, H.R. 1872, and in the committee report that accompanies it there are almost 500 pages. So there is a good day's reading for anybody who wants to sit down and go through this.

I again stress that this is a well-drafted bill. Each of the subcommittees of the full committee, I think, has done a good job. For many years I have been a member of the Personnel Subcommittee, and I would like to talk a few minutes about the action taken by that subcommittee as a part of the full bill.

Our chairman of the subcommittee is also the chairman of the full committee, the gentleman from Wisconsin [Mr. ASPIN], and as a rule, I find myself in substantial agreement with the distinguished chairman of the Subcommittee on Military Personnel and Compensation. On this occasion, however, I have very mixed emotions.

I am very troubled by the decision of the committee to reduce the authorization level for military personnel by $4 billion in order to force the Department of Defense to submit a proposal to restructure the military retirement system.

Although I am not opposed to consideration of alternatives to change the system and support a mandate to the Department of Defense to submit a proposal for prospective and cost-effective changes, I do not agree that a $4 billion reduction in the retirement accrual account should be made before the committee has received a proposal to consider.

There is simply too much uncertainty attached to this course of action. We are putting the cart before the horse.

I am pleased that the committee approved a number of long overdue personnel enhancements such as improvements in the level of reimbursement for out-of-pocket expenses incurred by military members when moving on Government orders.

It is ridiculous that military families must often go into debt in order to complete such moves. The improvements proposed by the committee still do not go nearly as far as the benefits currently provided to Federal civil service workers, but they are an important step in the right direction.

In addition to restructuring the mileage and per diem allowances payable on a Government-ordered move to parallel the reimbursements provided to Federal civilian employees, the committee also strongly recommended three permanent change of station ini-

tiatives included in the President's budget: Increasing the household goods weight allowances, funding a temporary lodging expense of up to 4 days, and reimbursing travel expenses for dependents of junior enlisted personnel within the continental United States.

One of the recurring themes that emerged from subcommittee hearings was the serious strain on the family budget—particularly for lower ranking enlisted personnel—of having to set up a household in very high cost areas like Fort Ord, for example. In such cases, young families may be forced to turn to charity for food and other necessities in order to have sufficient upfront cash to pay security deposits for housing.

H.R. 1872 contains two provisions to address this problem. First, it authorizes the payment in advance of both the basic allowance for quarters and variable housing allowance. Second, it doubles the current dislocation allowance, which may also be paid in advance. These two improvements should go a long way toward easing the cash flow problem many families face when they arrive at the new duty station.

All military families making a Government-ordered move will be better off as a result of the comprehensive package of improvements included in H.R. 1872. I am particularly pleased to note that those who will benefit most are those in the greatest need: junior enlisted personnel.

We must not overlook another vital element of military compensation: pay. The committee decided to defer the 3-percent pay raise—until January 1, 1986—in anticipation of similar action for Federal civilian workers.

We must be very careful about the pay issue in the future, however, to ensure that we do not have a reoccurrence of the recruitment and retention problems of the late 1970's.

The disparity between military pay and private sector wages is already precariously close to the pay disparity of those days. As the economy improves, pay levels will become an increasingly important factor in the career decisions for our Nation's men and women in uniform.

With the exception of the retirement proposal, H.R. 1872 takes a giant step forward in terms of personnel benefits and I urge my colleagues to consider the bill favorably.

Mr. STRATTON. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan [Mr. HERTEL].

Mr. HERTEL of Michigan. Mr. Chairman, I want to discuss the issue in this defense bill that I think is the No. 1 problem facing us in this House, and that is to make some firm decisions to stop the waste, fraud, and abuse that is going on in our Pentagon. Contractors are stealing taxpayers' money and ripping off this Nation to the detriment of the fighting men and women of this Nation.

In 1981, when I first came on the Armed Services Committee, my first speech was in regard to a massive supplemental that we were passing that day. I pointed out that we were increasing the defense budget much too quickly, and that, while we at that time had the American people behind us to have a stronger and a better defense and to spend more on defense, it was clear that if we accelerated the spending too fast, we could not keep control of it and the money would not be spent properly. Unfortunately, it was not all spent properly.

We have seen public opinion shift from 1981, when the vast majority of the people wanted an increase in defense spending, to today, 1985, when the vast majority of the people want a decrease in defense spending.

Why is that? Well, it is our responsibility to make sure that the money is spent right, and I have to commend my colleagues on the Committee on Armed Services, particularly the gentleman from Alabama [Mr. NICHOLS], the gentleman from Florida [Mr. BENNETT], who spoke earlier today, and also my colleague and brother, the gentleman from Michigan [Mr. DINGELL], because they have uncovered much of this waste, abuse, and fraud. In fact, the subcommittees of the Committee on Armed Services under the direction of Chairmen NICHOLS and BENNETT have turned up $1.07 billion in questionable expenses by seven defense contractors. In the audit they performed they found $1 in every $33 was illegal. Let us discuss what some of this money was wasted upon and stolen from, referring to the taxpayers' money in this defense spending, money that was improperly spent. They found that $10,710 in charges from one firm was put in to recover losses from an executive barber shop. They found that $12,333 was spent for two season tickets for the Los Angeles Forum for hockey and basketball games. They found $160 in taxes paid to a foreign government in connection with overseas sales of commercial products. They found $959 for golf fees for 1 single day. They found $1,099,000 in charges to recover the losses of an employee cafeteria. They found $62,000 for public relations costs after one firm's aircraft had crashed.

□ 1500

This is the tip of the iceberg. This is money that was spent wrongly. This is taxpayer money that did not go to defense, but went to these other projects that have nothing to do with defense.

The GAO has found that 11 top contractors routinely charged the Pentagon for public relations, personal travel, and promotional giveaways.

To make matters worse, Pentagon auditors generally questioned these costs, but less than one-half of the charges were disallowed by its negotiators; so even when they questioned them and found them, they still let half go on to be charged to the taxpayers, when they had nothing to do with our defense.

The Inspector General of the Department of Defense, is responsible for recommending penalties for defense procurement officials, but he has no authority to stop these payments. Inspector General Sherick has said in testimony before the Energy and Commerce Committee that if he had the power, he would suspend or debar the individuals who had committed these acts and stolen this money from the American people. He testified that his office is investigating dozens of major defense contractors, but that the Justice Department has been reluctant to prosecute many of these cases where he has discovered the evidence.

To stop these abuses, I have introduced H.R. 2262, which I will put in the form of an amendment to this bill, this authorization. That bill authorizes the inspector general to stop payments in the case of waste, fraud or abuse or excessive charges when the routine Pentagon audit procedures have failed to protect the interest or the security of the United States.

I brought this bill up last year on the floor. Unfortunately, there was not a great deal of interest. Now we have a lot of cosponsors, because the American people are sick of it and they are not going to take it anymore. That money should go to the defense of this Nation. If it is not needed there, it should go back in the taxpayers' pockets, because we are talking about billions of dollars. We are talking about eroding the confidence of the American people in how their money is being spent.

I cannot say enough as I conclude about the fact that I know the other members of this House Armed Services Committee share my concern about this. We have decided as a committee to bring these questions to the floor and decide those questions here before the full House because of their great importance.

Mr. DICKINSON. Mr. Chairman, I yield 4 minutes to the very distinguished gentleman from New York [Mr. CARNEY].

Mr. CARNEY. Mr. Chairman, as we discuss this budget, I would like to first start off by commending my colleagues who are indeed here on the floor. When we consider that this budget authorization will make up one-third of the entire Federal budget and look around and see how few people are here to listen to it, it makes you wonder.

What I am somewhat concerned about and I think it was very eloquently described by our colleague, the gentleman from Virginia [Mr. BATEMAN], is the fact that we were almost compelled as a committee to target a budget to what will be anticipated as the budget coming out of the Budget Committee. That made it rather difficult for us to present to our colleagues a budget that should be designed by examining the threat, examining the requirement to meet the threat, examining the requirement to meet the over 40 treaty obligations we have with our friends around the globe. That is to me somewhat disconcerting.

Back during the season between September and November of last year, the candidate for the Presidency, Mr. Mondale, called for a 3-percent real growth in the defense budget. Obviously, the President submitted a budget that has a 5.9-percent real growth factor in it and we, the committee, were compelled to come out with a budget that has zero percent real growth.

I would hope that the Members of the whole House recognize that the committee worked extremely hard to bring in a budget that would be acceptable to everyone.

I would hope that the attitude will not be that the Armed Services Committee historically bloats a budget with the knowledge that it will be pared back on the floor of the House, because that is not the case at all.

In fact, speaking for many of my colleagues, they are as frustrated as I am that we were constrained to come in with the budget at the level that it comes in at.

One of the issues in the budget that I would like to caution all my colleagues on is the issue of the retirement aspect. We removed $4 billion from the request for the retirement program and in doing so we did not present to our colleagues a change in the retirement system. Indeed, we asked the Defense Department to make proposals that we could scrutinize and accept that would meet that $4 billion reduction, but we do not have that in hand today.

I only point out to my colleagues that back in April 1983 we made changes to the Federal retirement system. We said, yes, we can cut back, change the Federal retirement system and at a later date we will rewrite the bill and we will be able to present a retirement system.

To date, Mr. Chairman, we do not have a Federal retirement system. We cannot offer a new employee coming into the Federal Government a retirement system. I am fearful that this will happen to those who will join the military after October 1 of this year, the beginning of the fiscal year 1986.

The CHAIRMAN pro tempore. The time of the gentleman from New York has expired.

Mr. DICKINSON. Mr. Chairman, I yield 1 additional minute to the gentleman from New York [Mr. CARNEY].

Mr. CARNEY. Mr. Chairman, I appreciate that.

I am fearful that this might have an adverse effect on new recruits coming in. They will not know what their retirement system will look like. Why would they join the military?

One of the incentives traditionally to bring people into the military was the retirement system.

Now, understand, I believe we have to correct the retirement system, but I believe very strongly we should make the correction before we make the financial deduction, because as I said, we have an established track record in this area and it is one that does not show well for this body.

So I would hope that the members of the full committee will look at that particular area of the budget and be careful when they cast their votes pertaining to it.

Mr. STRATTON. Mr. Chairman, I yield 6 minutes to the distinguished gentleman from Georgia [Mr RAY].

Mr. RAY. Mr. Chairman, I rise today in strong support of the DOD authorization bill reported out by the Armed Services Committee.

I particularly want to commend our colleague, the gentleman from New York [Mr. CARNEY] for his fine remarks that he just made and I concur with those.

I want to commend our committee chairman, the gentleman from Wisconsin, Mr. LES ASPIN, the subcommittee chairman and the members who worked so hard, the members of the committee and especially the committee staff for their diligent and effective work which went on into the night and on weekends at some point in time.

Although, Mr. Chairman, we waited patiently for a recommendation from our colleagues on the House Budget Committee, we did not receive one in time for our markup, which in effect to me indicates a serious need to rework, update and streamline the budgetary process; so we chose our own target of no real growth for defense, and we met it.

Our bill cuts $18.5 billion from the administration request, and actually terminates 30 procurement programs.

Mr. Chairman, overall, in addition to allowing no real growth, we have actually cut weapons system procurement by 2 percent.

Although I don't agree with every line of the committee bill, I think that we have not only cut to about the right level—I think we have cut the right things.

We resisted the temptation to place our cuts in the personnel and operations accounts—which have been the target of too many cuts in the past, because cutting those accounts results in instant savings in outlays—and that is good politics.

Instead, we protected those accounts and concentrated most of our cuts in the investment accounts—procurement and R&D.

I might add that seven of the nine weapons systems to which we added funds were earmarked for the National Guard and Reserve. Anyone who follows defense knows that the Pentagon always underfunds the Guard and Reserve because they know the Congress will bail them out.

There is a lot of talk on the floor, Mr. Chairman about the budget that will be recommended to us by our colleagues on the House Budget Committee, and much of it troubles me.

I hear, for example that they may recommend a nominal freeze for defense—which allows no growth for inflation—and that they will then ask for $8 billion in cuts below that.

They want to do this at the same time they are leaving social security COLA's, revenue sharing, UDAG grants, and many other domestic programs untouched.

Mr. Chairman I think the key to responsible cuts in spending is balance. We have to be fair. We cannot load all the cuts on those forces which are responsible for defending our freedom any more than we can ask the domestic programs to accept them all.

I have said on past occasions that I might be willing to accept a nominal freeze in defense. But I would only do this if that same nominal freeze was applied to every other spending program, and some program eliminations were added on top of that.

I recently had the high honor of being invited to speak before a group of internal defense auditors. These are knowledgeable people who serve on the front line in our war against the deficit.

In those remarks, I indicated that Americans are willing to pay for a strong defense if they believe there is a credible reason for doing so. I still believe that.

In order to maintain that credibility, Mr. Chairman, I think we are going to have to take a hard look at the way we are doing business in defense today. Recent headlines cry out for reforms in some of our procurement practices—and those reforms are needed. We are taking a look at this issue on the Armed Services Committee at the present time.

I think we are going to have to work hard to make sure that we are completely costing out all the programs that are being created. Whenever we start up a new weapons system, we are going to have to make sure that we realize how many troops will be needed

to support it, what the spare parts requirement will be and what we will need in the way of military construction.

If we don't we will be building a hidden overhead into these systems that may cause them not to be supported as they should be in the years to come.

Our budget problems are not going away, Mr. Chairman. The "good old days" are gone forever—in defense, as well as in every other area of Federal spending.

Those of us in this body are going to have to have the political courage to make sure that we pay for every bit of government that we are giving the people. If we can't afford it, we are going to have to be brave enough to say so. If we aren't our children will pay a high, high price for our failure to do our duty.

The House Armed Services Committee has reported out a good budget to you, ladies and gentlemen. I hope you will resist the temptation to play politics with it.

Mr. Chairman, I insert into the RECORD the complete text of the speech that I made before the internal auditors:

DEFENSE BALANCE SHEET—BLACK INK WANTED

(By Congressman Richard Ray)

I feel extremely fortunate to have this opportunity to speak to you.

Just about any time we converse or gather in these times, it doesn't take very long for us to begin discussing the problems of America.

I'm going to touch on one of my major concerns today, which is the cost of our Defense Program, but first, I want to comment on "what's right about America". Too often, we get so wrapped up in obstacles and problems and fears about the prospects for the future that we lose sight of what we really have.

I'm proud to be an American and we can be grateful for the heritage which our forefathers left us. The philosophy and achievements of those great leaders built our country, and thousands of Americans have died to guarantee that we can continue to live under those principles.

As Americans, we have the freedom to say what we think, to condemn the Government without fear of being hauled away in the middle of the night to prison as happens in many countries, to worship as we please, to enter into the free enterprise system and to succeed or to fail.

We can vote into or out of office representatives of Government without fear of reprisal, and we only have to watch the evening news to realize its not that way in many areas of the world.

My friends, there are many countries in this world who have lost these rights, and we have to remember that ours did not come to our forefathers without risk and must never be taken for granted.

One of the first things that I learned after being sworn into office was that the Congress is a deliberative body with highly diffused power. It's very difficult to get the 435 Members of the House of Representatives together on major issues, some which are critical to the well being of America.

Congress often times focuses too much on flash points or headlines and it gets overly preoccupied with reelection, particularly during election years. Sometimes, this preoccupation reaches the point that being reelected overshadows the reason for being elected.

We are enamored with our importance and I am reminded of former Congressman Charlie Crisp, from my district in Georgia. [Joke.]

I always try to keep in mind that we were elected to serve the constituency and to legislatively serve the best interests of the country.

Despite the problems that we all complain about, the checks and balances system which our Founding Fathers developed does work to our best interest.

As Winston Churchill said in 1947: ". . . democracy is the worst form of government except all those other forms that have been tried from time to time."

However, as great as our form of government is, I agree with the French writer, De Tocqueville who said:

"I sought for the greatness and genius of America in her commodious harbors and her ample rivers—and it was not there . . . in her fertile fields and boundless forests—and it was not there . . . in her rich mines and her vast world commerce—and it was not there . . . in her democratic Congress and her matchless Constitution—and it was not there. Not until I went into the churches of America and heard her pulpits flame with righteousness did I understand the secret of her genius and power. America is great because she is good, and if America ever ceases to be good, America will cease to be great."

As I mentioned earlier, we worry in America about a number of things, such as health care, the aged population, our agriculture, the unemployed, the deterioration of the moral fiber of America, the national debt and other quality of life issues.

These things are important to us all, but I would imagine that if you asked the people of Afghanistan, or Poland, or Hungary which was more important, these items or their independence and freedom, they would tell you that nothing is more precious than the freedom to govern themselves.

I will tell you today that we do have many concerns, but they are secondary to the threat that America—sometime in the future—might not have the ability to deter aggression. Without a strong defense, we might be intimidated or forced into a neutral posture where we would not be in a position to help the free world remain free, or to remain free ourselves.

Therefore it goes without question that America must have a strong, reasonable and affordable defense.

I want to discuss with you my views on the cost of such a defense.

At the outset, I want to make it clear that I am strongly pro defense, and am even considered to be hawkish to some degree.

Maintaining a strong defense does not mean matching the Russians gun for gun, bullet for bullet, or soldier for soldier. It does mean that we have to stay on the cutting edge of technology and we have to be better.

It also means that we must update, rework and reorganize our procurement and accounting procedures—as well as weeding out those programs which have outgrown their usefulness.

In my opinion, we are going to have to take a close look at the procedures and practices we use to purchase our weapons and equipment, and the investments that we are making in military construction. I am afraid that we may be confronting some serious problems in the capital accounts area of the Defense budget as well as the operating and maintenance account.

While I am no expert in this area, I do sit on the Procurement Subcommittee, and I recognize that the $292 billion Defense budget we had in fiscal year 1985 represented the largest single part of our overall budget for that year (26 percent). These expenditures mean that Defense carries an enormous inventory of goods and services.

All this means that even a small error in calculation or projection can turn into a billion dollar problem in the years ahead.

Later on in my remarks, I am going to deal with our huge national debt and what it means for all of us. But, for the moment, just let me say that all areas of government are going to have to learn to live within their means, and this includes Defense.

This means that we are going to have to start making affordable and common sense purchases, control our overhead, and utilize dependable accounting systems and procedures.

But I am afraid that as we begin to realize the overhead and costs that we are building into the next ten years and thereafter—a time when we are going to be trying to pay down our huge national debt—it is going to become clear that we are creating a dangerous situation for ourselves with overhead which is resembling more and more entitlement programs.

As accountants, you are all aware of the cost of debt servicing, and I know that you share my concern over the fact that interest on the national debt, alone, amounted to 104 billion dollars last year.

I believe that the principles of our monetary system which has worked well through the years, and which must fund the defense budget, is in jeopardy.

Presently we owe an enormous national debt:

A debt which from George Washington to Jimmy Carter accumulated to the staggering sum of $906 billion,

A debt which has almost doubled in the last four years.

A debt which carries an interest bill of 13 cents on each tax dollar for 1984 (104 billion dollars) and will go to 15 cents by 1986.

Our philosophy of spending more than our income, year after year, having paid our operating expenses no more than ten times since 1924, threatens to drown us in a sea of red ink.

This practice threatens our entire system and especially our Defense Program.

Our defense cost is 28 percent of our overall budget in fiscal year 1986, and 6.8 percent of our GNP. This represents a request by the administration for 322.2 billion dollars, but is not likely to be funded in that amount by the Congress.

Americans are willing to pay for defense when they believe that we have a credible reason for doing so. For example, at the peak of defense spending during World War II, we spent as much as 89.5 percent of our budget dollars on defense.

There are many people in this country who believe that to spend 28 percent of our overall budget on defense, while borrowing 23 percent, in order to fund the deficit, doesn't make sense, particularly when cuts may be made in programs that determine our quality of life such as health care, education and social security.

The storm of criticism which has surrounded our defense industry because of overpricing of spare parts and military equipment, purchasing practices and overhead padding, has not done much to generate support from the American people. They tend to think that where there is this much smoke, there is bound to be a little fire.

Another concern is defense planning. As we look at our world wide strategy for the future, the cost of future overhead simply boggles the mind.

Let me give you an example of just one of those commitments. For the past 40 years, we have made a substantial commitment to NATO, and that commitment has resulted in the freedom of Europe for that period of time.

But that commitment has not been a cheap one. At the present time, we have more than 320,000 troops stationed in Europe, and our NATO commitment costs us around $90 billion per year.

In addition to commitments like this, we are building in an overhead in the form of long term leases and military construction projects which will last well into the next century.

Defense "experts" are beginning to question our overall defense strategy, particularly in the areas of readiness, affordability, and the ability to make it work.

This strategy dictates that we procure the manpower, weapons and support capability necessary to wage simultaneous war along three fronts . . . NATO, Southeast Asia and Southwest Asia.

It is enormously expensive to create that capability. But when you think about the costs involved in sustaining it for years into the future, you are talking about some really frightening numbers.

For the past four years, we have been building toward that capability. In fact our procurement account has grown by 61 percent during that time frame.

Many observers of the defense scene are now questioning whether we have spent these dollars in a prudent way and gotten the maximum benefit out of them.

There are some who say that we purchased too many highly sophisticated systems too quickly. Then when it became apparent that we were not going to be able to generate the budget dollars that it would take to keep all these programs moving ahead at full throttle, DOD responded by stretching many of them out.

As all of you know, when DOD enters into a contract, they project the number of years that it will take to move through research and development to the end of the production cycle. Overhead and production costs are then estimated on the basis of those projections, and this leads us to a number which represents a unit cost for each of the weapons which will be produced.

The explosion of new programs which I mentioned earlier has forced DOD to stretch out 47 of their programs.

This practice has a serious effect on unit costs.

When a defense contractor builds fewer units than he had planned during a year, his unit costs have to go up, because his overhead costs are going to remain the same.

So it is safe to say that the closer a plant comes to operating at 100 percent capacity, the lower the unit costs are going to be.

I mentioned earlier that 47 programs have been stretched out. In those programs which belong to the Navy, the plants affected are currently operating at 38 percent of capacity; the plants which are producing the Air Force programs are at 58 percent, and the Army plants are at 72 percent.

This means that unit costs in all of these programs are going to be higher, and the total cost of each of these programs will therefore exceed those that were planned. In short, stretching out is false economy.

So we have to operate within sound business principles so as to avoid this type of situation.

This probably means that we are going to be faced with the unpleasant alternative of cancelling some programs.

Over the past few years, Congress has reacted to the criticism that has erupted over some of the DOD procurement practices by passing complicated laws which have resulted in huge stacks of regulations. This effort was well-intentioned, but I am convinced that in some cases it has made things worse rather than better. In fact, I am told that some of our procurement regulations are thicker and more complicated than those which are put out by IRS.

Complying with these regulations, of course, requires more manpower and hamstrings rapid and orderly procurement. It also takes the actual operation of these processes out of the hands of those who are supposed to be the experts.

Whether we like it or not, the harsh realities of America's deficit are going to have a permanent effect on defense spending. Those of us who support a strong defense are going to need to take the lead in arriving at responsible measures which are so desperately needed.

I don't pretend to have all the answers. But I do have some suggestions that I would like to share with you today.

First, I think we are going to have to do something which will be taken as a clear signal that we are resolved to do something about the situation . . . not only next year, but for the years to come.

I think we should give serious consideration to a spending blueprint which would cut out all real growth in defense for the next three fiscal years. Increases during that period would be limited to inflation, alone.

All of us know that defense spending has a long pipeline. This size of this year's outlays was determined by decisions which were made several years ago. So we have to undertake a steady and predictable policy which will have a meaningful effect on that pipeline.

Secondly, I think we are going to have to undertake a serious program that will take some meaningful looks at our procurement practices.

The House Armed Services Committee is already considering several such proposals. I think you will see some changes made in the expenses which have been allowed, in the past, to be charged off as costs, which is receiving so much criticism in the press and particularly in the Energy and Commerce hearings which Congressman Dingell is conducting.

The committee may take a look at the so-called, "revolving door" and enact some restrictions which make it harder for people who have played a meaningful part in the procurement process to move right out of Government service and get jobs with the private firms they were dealing with as Government employees.

The House Armed Services Committee is conducting random audits presently of the costs submitted by seven firms, and I expect that this will occur more frequently in the future.

I am not necessarily suggesting that these are the exact reforms we need. But I don't think the public has a lot of confidence in the way we procure our defense systems, and I think we are going to have to take the steps that are necessary to restore that confidence.

One of the things which encourages me is the practice which has recently developed in the Armed Services of paying incentive bonuses to employees who come up with innovative ideas to increase efficiency and save the taxpayers money. We should encourage and recognize that this is a helpful program and accelerate it.

At the same time, we must consider penalties to confront practices which lead to waste and mismanagement.

Finally, ladies and gentlemen, we need to realize that there is a substantial gap between our mission and our ability to meet that mission. In the past, we have drawn up missions which we knew would be difficult to accomplish, perhaps hoping that defining the mission will help generate the necessary funds.

Please don't misunderstand me. I believe the threat has to be the single force which determines the size of our commitment to defense. But once we have defined the threat, we should not lay out missions unless we have and are prepared to commit the resources to accomplish them.

In closing, let me say that it is always easier to indentify a problem than it is to suggest the solutions.

But in this case, it is crucial that all those who play an important part in the military, the Congress and the defense industry realize that the country simply cannot afford business as usual.

Many of you in this room are already playing a key role in this whole process. It is you who help to assure that programs in defense and other Government activities are effectively and efficiently executed. I commend you for your efforts.

I understand that the defense internal audit and review groups have submitted recommendations identifying $2.7 billion in savings during fiscal year 1984.

Notwithstanding these good efforts, many opportunities remain for auditors to help their parent organizations make more efficient use of the resources they have been provided.

There are no easy ways to go, but there is no doubt in my mind that we can do it. I am not in a senior leadership position on the committee, but I promise you that I am going to exert my total efforts toward devising and implementing a defense program that will keep us free without crushing us under a rapidly growing overhead that we cannot afford.

I will do this not because I am anti-defense, but because I am strongly pro-defense. If the friends of defense don't take the lead in this effort, it will only be a question of time before the effort will be undertaken and completed by others. And that would be a sad day for this country.

I want to thank you for the privilege of speaking before you. Those of you in this room have the expertise that we are going to have to rely on heavily during the coming years. But working together we can and must accomplish our goal.

□ 1510

Mr. STRATTON. Mr. Chairman, our next speaker is the distinguished gentleman from Arkansas [Mr. ROBINSON] who was the anchorman on the committee and is a very capable freshman Member. I yield the gentleman 6 minutes.

Mr. ROBINSON. I thank the acting chairman of our committee and the ranking minority member.

Before I start into my brief presentation with reference to the chemical warfare deterrent today, I would like to commend the gentleman from Illinois [Mr. PRICE] and all of my fine colleagues that serve on the Armed Services Committee. As the gentleman from New York [Mr. STRATTON] observed, I am only a freshman but I can stand here with pride today that we have provided the leadership that this House has long needed to start the process of reducing the enormous Federal deficit that we have in this Government.

It really does bother me that some are talking about they are going to amend our bill. I would like to remind them that we started out with the possibilities of a 5.6-percent real growth increase. We whittled that down to 3 percent and now we are down to a freeze. I think that we have done our part and now it is time for others to do their part.

I rise briefly today to address our authorization of $1.275 million for the Chemical Retaliatory Stockpile Modernization Program, better known to some of the liberals and some of the liberal editorial writers as the great nerve gas controversy, including what they call the Bigeye bomb which opens up their eyes very widely each time we present this.

But I am going to avoid demagoguing on this issue because I think we should address the basic facts. The facts are that out of his money 74 percent of these funds or $936 million will be used for protective measures. Yes, my colleagues, for protective measures. For the modernization of our chemical retaliatory capabilities we will use 16 percent or $207 million. And for the demilitarization of the stockpile of unitary weapons we will use 10 percent or $132 million.

The modernization program includes funding for binary munitions to complete facilities for the Bigeye bomb, to start procurement of both the M687GB2, 155 millimeter artillery projectile, and the Bigeye and continued research, development, test and evaluation of the XM135BC with multiple launch rocket system projectile.

I say all of that because most that argue against chemical warfare do not know what they are talking about. They read some of the more liberal editorials in this country, and if the editorial writers, who put out far more dangerous gas then what we are putting out, say that they ought to come down here and demagogue and vote against chemical warfare deterrent, then they should go down and do it, and I say that that is absolutely wrong. In fact, this administration maintains that the present chemical munitions stockpile is inadequate, and I happen to agree with that, and that binary munitions must be produced.

Testimony provided to the committee overwhelmingly supports this position.

Let me close by reminding my colleagues that history has demonstrated that nations whose military forces possessed the ability to function while under chemical attack and retaliate in kind are less likely to experience such an attack.

I would like to say, unlike my predecessor who was one of the leading opponents of chemical warfare, I intend to be one of the leading proponents and I have a stack of facts, not rhetoric. I am not demagoguing, but I stand here to let my colleagues know, and all you liberal editorial writers, including probably some in my own home town of Little Rock, AR, that you had better have your facts together when you come down here under the 5-minute rule.

I yield back the balance of my time.

Mr. STRATTON. Mr. Chairman, I yield my remaining 5 minutes to the gentlewoman from Maryland [Mrs. BYRON].

Mrs. BYRON. Mr. Chairman, I rise in closing for our side with a few areas that I think we have missed covering in the dialog we have had today. We have talked about reductions, we have talked about increases, we have talked about freeze, we have talked about real growth, and I think we also have to look at a commitment we have made to those in our military. And one of the accounts that has not been discussed too much is the $4 billion that has been cut out of the retirement account.

I think this is an area that the Personnel and Compensation Subcommittee debated long and hard and felt very strongly that there should be some cuts in that area because we were cutting in all other areas.

I also feel very strongly that the commitment that we made to our military several years ago when addressing the retention problem, and addressing the military pay problem, addressing the equipment problem and the spare parts problem, has turned around a situation that we found to be very, very difficult at that time in the security and our national defense.

□ 1520

Mrs. LLOYD. Mr. Chairman, will the gentlewoman yield to me?

Mrs. BYRON. I yield to the gentlewoman from Tennessee.

Mrs. LLOYD. Mr. Chairman, I rise in strong support of this legislation and compliment our chairman Mr. ASPIN on his leadership. However, we must recognize that the overall budget climate has constrained the level of funding for the DOD and DOE defense programs severely and the recent Senate budget action has further precluded the possibility for any real growth in defense spending for fiscal year 1986. The committee has done the best job it can to provide a bill that has good prospects of getting through the House. We must recognize that we are challenged by the required allocation of resources. The significant cut from the Reagan request should not be misinterpreted by friend or foe alike. We still intend to meet strategic and conventional threats to our national security, but the DOE planners must recognize that that period of significant real growth is over.

This budget cycle has provided the House Armed Services Committee a real opportunity to begin to rationally shape defense policy. I am particularly pleased at the committee report language on deterrence policy, including discussion of strategic modernization and the strategic defense initiative [SDI]. We have a pressing responsibility to catalyze the DOD to improve procurement practices drastically to avoid unwarranted contract charges and to improve quality assurance.

The RDT&E budget is clearly a key to ultimate control of the procurement process. While I do not support the extensive cuts in the RDT&E programs or the specific nature of certain cuts such as in SDI, I do support this principle. We must avoid premature introduction of weapons systems into the procurement cycle, when they have not undergone sufficient test and evaluation. I also believe that it is important to recognize the committee's concern about the Navy procurement getting out of phase with Navy requirements so that the projected naval aircraft mix simply does not make sense. I am sympathetic to the Air Force's critical needs to modernize its tactical aircraft wings as rapidly as possible, but the cost of the F-15 and F-16 appear to be too great to allow the type of real growth the Air Force needs to meet their rather ambitious timetable.

In the area of procurement, I could go so far as to say that I hope that the committee will consider a 3-year authorization of all programs, since DOD requires many multiyear procurements. This approach would free up the committee members and staff for extensive oversight activity rather than tying them down to an open-ended budget process, year in and year out.

I have been a strong supporter of the SDI Program since its inception and I still believe that it has the potential of serving to reduce the number of offensive weapons. I find some of the scientific community's technological pessimism to be rather surprising, but in many instances the underlying concern seems to be that the program itself raises questions about the merits of the United States staying wed to the MAD doctrine. I am very familiar with the space power requirements for SDI systems and I am very concerned about what a 30-percent cut would do to DOD efforts on multimegawatt systems. I hope that the SDI cuts can be adjusted in conference so that the authorization bill does not preclude the possibility of achievement of solid milestones in the next several years. I do not believe that we should get into splitting hairs of definitions such as the term "development" with respect to SDI. I am pleased that the committee has sustained the procurement of F-15E's and hope that the supporting funds for Lantirn testing are restored to a level that allows this promising system to stay on course. I have a particular concern about the Navy RDT&E program and believe that if the SSN-21 activity is in any way representative these programs require additional scrutiny. The absence of competitive procurement for the SSN-21 may be just the "tip of the iceberg" in terms of the policy thrust of Navy RDT&E.

The DOE National Security Program companion measure, H.R. 1873, has been incorporated in this defense programs bill as title IV. All seven programs under the DOE defense function will receive measureable growth, even though the overall request was reduced by $240 million. I have a keen Member interest in the community assistance provisions under weapons activities and was pleased that the subcommittee accepted my amendment to restore the funding for Oak Ridge assistance payments, which had been included in the DOE request as a one time, final liquidation of the Department's program. I have been most supportive of the unique DOE national laboratory role in SDI because they bring unparalleled R&D skills to this important strategic program. However, I do partly share my colleague's, Mr. FOGLIETTA, concern in that I do believe x ray laser systems should be a last resort tool for SDI. The "pop-up" aspects of these systems make their timely use a technological challenge and regardless of semantic arguments, these systems will be viewed as nuclear weapons drive, not simply nuclear powered. The SDI Program cannot afford the negative perception that will result from a thrust on developing nuclear weapons for space-based purposes, albeit defensive in nature.

I am pleased the committee has recognized the potential role which the Oak Ridge National Laboratory might play in the SDI Program through DOE because of its strong strength in basic science and energy storage systems, which in turn complements the DOE role in space nuclear power.

I am pleased that the DOE request for continued enhancement of environmental programs and safeguards activities at weapons facilities are being supported. I share the committee's concern which prompted the restoration of significant funding for the Inertial Confinement Fusion Program which still offers a unique route to weapons simulation data, as well as potential prospects for civilian power applications. The Special Isotope Separation Program, which is a companion to the civilian AVLIS Program authorized by my ERP Subcommittee, is also deserving of the recommended funding.

Under the pressing budget circumstances, the committee has done a very good job of reallocating resources. I will strongly support the committee to hold the line on the budget levels in this bill. The bill suggests some policy directions with which I am not in complete agreement. However, these are minor compared to the need to set priorities within a rational spending cap, something the administration has simply refused to do.

Mrs. BYRON. Mr. Chairman, it is never easy, when we are looking at a defense authorization bill and we are trying to put it into a proper prespective, to put it into proper guidelines that we get from the Committee on the Budget. This year we did not have the guidelines from the Committee on the Budget to work with. Yet we had a responsibility to make our cuts; 19.6 billion dollars' worth of cuts from the initial $322 billion request.

So what we have done in the retirement account by cutting that $4 billion, we have put the emphasis right back into the Department of Defense. It is going to be their responsibility to find out where those cuts are going to be made. It concerns me because I am worried about the retention issue which we have turned around; it concerns me because I am worried about the quality of our military which we have seen grow by leaps and bounds over the last few years.

I just want to say that I certainly hope in this day and age because of the constraints, financial constraints that we are not going to lose that edge that we have in moving forward for our national defense.

So as we close with a discussion and a dialog on the defense authorization bill today, we have had some hard choices to make. It has not always been our choice.

In the case of the Retirement Program we have put it back in the Department of Defense. Time and time again when the Pentagon comes over and testifies and you ask any of the individuals services: "If we have to cut a program, what program should we cut," I have never yet heard them say there is one program that needed to be cut.

Yet we found in cases this year 19.6 billion dollars' worth of cuts that we feel as a committee can be made without jeopardizing our national defense.

So I urge my colleagues when we come to the floor next week and on final passage of this bill to take into consideration the enormous amount of work that has gone into this bill, the enormous amount of work and consideration that the Committee on Armed Services has done in marking up this bill.

Mr. Chairman, I urge support of this bill.

Mr. DICKINSON. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I am pleased to appear today with our chairman before the House in support of H.R. 1872, the Department of Defense authorization bill for fiscal year 1986.

As many of my colleagues know, the administration submitted a request that would have supported almost 6 percent real growth in defense. However, they said on economic factors and the situation as it exists politically in this body, it was felt by the members of the committee that we were going to have to reduce this amount, which we did.

As has been pointed out by previous speakers, instead of a 6-percent real growth we felt that 3 percent real growth might be doable, at least the Senate did, and we went along with that concept. Then, in talking to our colleagues, particularly those on the Committee on the Budget, we realized that in today's political atmosphere and with the constraints we were faced with, probably zero percent plus inflation was a doable figure insofar as the House is concerned. Then we would have the opportunity of going into conference with the Senate with them at a higher figure and working some compromise between our low figure and their higher figure.

Then I was surprised, after we finished marking up our bill, the Senate announced they were going to undo their agreement and that the Committee on the Budget in the other body were going to mark to the same figure that the House had marked to, which is zero percent growth plus inflation. That hardly gives us any wiggle room in our conference with the Senate.

So these are some of the facts of life.

Now I understand that our Budget Committee is probably going to recom-

mend zero percent growth and zero percent inflation. So we are really between a rock and a hard place insofar as our recommendations of the committee to this House, and what we will be able to get from the Senate.

Mr. KASICH. Mr. Chairman, will the gentleman yield to me?

Mr. DICKINSON. I yield to the gentleman from Ohio.

Mr. KASICH. I appreciate the gentleman from Alabama yielding me some time, and I will be very brief and would look forward to further discussion as the bill moves through the Congress.

I want to say initially, Mr. Chairman, that I was one who went to Mr. DICKINSON and even Chairman ASPIN early on and said that I thought that we needed to reduce the defense budget. I've served for 2 years on the Armed Services Committee where we have, to the largest degree, met the requests and demands of the Pentagon. So I am excited, and I think the committee and the Congress ought to be excited because on the committee cut $18 billion from that Pentagon request with some true military reform. That included the elimination of TACAMO, which will save us probably several billion dollars, Mr. STRATTON'S amendment; the PC-3, the AMRAAM Program, we fenced in money on the controversial DIVAD Program, we fenced in money on the Aquila, we changed the Lantirn Program, we made changes in the research development and testing, which would otherwise have received a 100-percent increase. We reduced that dramatically. We addressed the retirement program.

There is a new era in the Committee on Armed Services. We addressed this budget as true military reformers, from that person who has been in Congress for 30 years all the way down to the new freshman.

We have brought in a budget that is lean, tight, and well-thought through. I have to give credit to the chairman, Mr. ASPIN, because he provided the direction, with Mr. DICKINSON, the ranking minority member. We did not take any guff from anybody. We did not accept all the numbers or all the figures from any of the so-called experts. We looked at them all and we made some hard, tough decisions that brought us $18 billion in deficit reductions. That's 3 percent less than what Walter Mondale said we needed and 6 percent less than what this President said we needed.

We have made a contribution. Remember, John Kennedy spent 50 percent of our national budget on defense, and this President is spending 26 percent. In GNP terms we are at about 6.6 percent of GNP as compared to nondefense areas of 15 percent.

For those people who want to go less than a zero percent increase, I tell them: "You come in and tell us where. Don't come in and give us some bland budget figure. You tell us where you are going to take the money." From 1977 to 1983 the Soviets built 15,000 tanks, we built 5,000; they built 5,000 fighter aircraft, we built 3,000. In the same period of 1977 to 1983 they built 1,500 ICBM's to our several hundred.

In bombers, they built 250 strategic bombers, we had none.

If you want to save money, tell us where you are going to save it, tell us the programs where we are going to go. We have addressed personnel, we have addressed the conventional systems, we have reformed them like military reformers want us to do. We have report language that makes procurement more competitive. We saved $18 billion, a responsible contribution to the budget deficit reduction program.

So I think we should be proud of what the Committee on Armed Services did because it is revolutionary, considering where we have been. We ought to feel good about it. I am excited about it, and I think my constituents are, Mr. DICKINSON. I thank the gentleman for yielding me the time.

Mr. DICKINSON. I thank the gentleman for his observations, Mr. Chairman. I think he makes a very good and telling point.

In conclusion, Mr. Chairman, let me say that I, too, am pleased with what our committee was willing to do, what we did. I do not think there was anybody on the committee that was satisfied that we had done as much as we should. I think in bowing to reality we recognized what we could do and within the parameters of the framework of what we could get funded on the floor we did a very prudent and responsible job.

The question is, Do we really need this much defense? What is our adversary doing, our potential adversary? Is there really a threat out there? Or are we just rattling sabers, hearing a drumbeat that really does not exist? Are we really just priming the pump for something for which there is no real genuine need?

Mr. Chairman, last year at this time during floor debate I stated that the Soviets had deployed 378 SS-20 missiles.

Now, an SS-20 is an intermediate range ballistic missile with three warheads with a range of 5,000 kilometers approximately.

□ 1530

At that time, I said they had deployed 378, keeping in mind that each one has one backup; they come in pairs.

Well, today instead of a freeze by the Soviet Union, today they have deloyed 414. It is amusing that a year or so ago I met with the other members of our Committee on Armed Services with our counterparts from the European community, the North Atlantic Assembly. We meet over there once a year; they come over and meet with us once a year, and they are parliamentarians from Great Britain; some from France, occasionally from the Netherlands, from Belgium, from Germany.

So we were sitting around the table talking and one of our colleagues said: "Well, why don't you negotiate with the Russians? Why don't we just have a freeze and negotiate?"

Peter Peterson, who is in the Bundestag of the Federal Republic of Germany said, "Congressman, we do negotiate. In 1978 we negotiated and debated with the Soviets, and they deployed. In 1979 we debated, and they deployed. In 1980 we debated, and they deployed. And we have not deployed one single nuclear system until this year"—talking about the Pershing and the GLCM—"and all the time we were debating they were deploying at the rate of one per week since 1977, to the point where today they have over 400 of them in place, and we are still debating."

The same is true with the MX. We have the Minuteman III; this is our last ICBM. Since then the Soviets have built and deployed two new systems, and we're still debating the MX. We start off asking for 200 MX, now we've cut it to 100, now in this budget cycle instead of the 48 requested, we have recommended 21. I think we will be doing well in the final analysis if we get half of the 100 that was already agreed to.

So whether we are talking about the B1—we started out to build 200 of those and now we say we will build 100; we say we were going to build 200 MX, now we are going to build perhaps 50. We are going to build—all the weapons systems that have started out to build, we keep building less and less and funding it less and less, and I think it is time that the American people recognize that we are not crying wolf; there is a potential adversary there that is very technically efficient, that is very well armed, and who means us no good will at all.

If he, the potential adversary, was sincere, he would be building defensive weapons, not offensive. If we look at the buildup he has of the intercontinental ballistic missiles, of the intermediate range ballistic missiles he is deploying on a regular basis; he is building newer and modern and more intercontinental bombers.

So the nuclear subs he is building, they outbuild us in numbers and in size and in capability and performance quite often. So I think we are deluding ourselves to think that we have some great big, benign, charitable, potential adversary out there that really means us no harm, and all we need to do is sit down and talk with him, because if we are friendly he will be friendly in

return, and we do not have to worry about him doing us any harm in the future.

I think that is shortsighted, I think it is foolish. I think it is what we have offered here in terms of this year's House defense authorization bill is the minimum we should do, and I would certainly urge my colleagues to support it, and I would hope that the next time we get back to the floor to finish the debate on this, we would have more than seven Members present, all of whom belong on this committee, and no other Members in the Chamber, when we are discussing a bill that is close to $300 billion, that has to do with the life and death of this country in the long run.

Mr. Chairman, I am pleased to appear today with our chairman of the committee to bring before the House H.R. 1872, the Department of Defense Authorization Act for fiscal year 1986.

As many of my colleagues know, the administration submitted a defense request that would have supported almost 6 percent real growth in the defense accounts.

However, based on the economic situation, the committee felt that such a growth rate was unsupportable. In a more normal economic environment, that is about the correct rate of growth given the unrelenting Soviet military buildup.

But we felt that the defense sector should contribute its fair share to deficit reduction. Consequently, we have marked up and reported a bill that represents no real dollar growth over last year.

To meet this level, the defense authorization request was cut by $14.3 billion. Further cuts in personnel, military construction, and defense programs in the Department of Energy resulted in total cuts of about $19.6 billion.

This bill is a milestone of sorts for the country and the Congress. For the first time in 6 years we are recommending no growth in the rate of improvement for our Nation's defense forces.

I think it's worth noting some representative improvements that we have seen over the past few years in our defense force structure.

Since 1980 we have made remarkable progress in modernizing our forces and improving their readiness. Recruitment and retention are up. First quarter 1985 reenlistments rates are up 11 percent since 1980.

In the areas of readiness, our pilots are getting 30 percent more flying time than they were in 1980 and aircraft ready rates have improved 7 percent in that time. Munitions inventories have increased by an average of 39 percent across all four services. We are fielding more and better items equipment to our forces.

However, we recognized the probability of a budget resolution that would also recommend reduction of the President's request. Subsequently, most committee members agreed that zero percent real growth would preserve most of the defense improvements the Congress has approved to date.

The committee set some ground rules to guide us in our surgery: The initiation of new weapons systems was slowed by large cutbacks in research and development because every dollar spent on R&D generates $3 to $5 later in procurement; and operations and maintenance accounts were protected to the extent possible within the overall zero percent real growth level.

I want to hasten to add that I don't believe the threat to our security has lessened one iota. On the contrary, the Soviet Union continues to field massive amounts of military hardware. Let me cite a few examples:

Last year at this time during floor debate I stated the Soviets had deployed 378 SS-20 intermediate range ballistic missiles. This year now—today—they have 414 deployed—an increase of 108 warheads as each missile carries 3 warheads capable of a 3,000-mile range.

Many of us are aware of the recent test firing of the new SS-X-24 and SS-X-25 fifth generation Soviet intercontinental ballistic missiles. Both systems are nearing deployment, with the SS-X-25 closest to operational capability.

Two ships of a new Delta IV class of ballistic missile submarines were launched.

Another Typhoon class ballistic missile submarine completed sea trials—making three of these subs now operational.

Blackjack strategic bombers were produced at a rate of 30 per year.

I could go on and on about Soviet deployments of large numbers of new weapons, but the point is I don't believe the threat has eased one bit.

To that end, we did fund many of the President's strategic programs at the levels he requested. Over $5.8 billion is recommended for R&D and procurement of the last 48 B-1 aircraft. This has been an exceptionally well run Air Force program. It is coming in on cost and on schedule.

We are funding the Trident II missile system [D-5] for the Trident sub at $2.6 billion.

The ground launched cruise missile [GLCM]—the system designed to deter the Soviets' massive force of SS-20's was funded at $545 million for 95 missiles.

The committee believes strongly that we must develop a chemical weapon deterrent force. If we don't, we may open our forces to chemical strikes in future conflicts.

We have not produced chemical weapons for over 15 years while we have listened to the Soviets' propaganda and stalling tactics at the talks in Geneva. We have proposed a chemical warfare treaty with the Soviets, and they have not responded in a meaningful way.

History has demonstrated that only those nations with a strong chemical deterrent are least likely to experience a chemical attack.

We must provide our men in uniform a chemical weapon deterrent. To that end, this bill contains funding for the Big Eye chemical bomb and the 155-millimeter chemical artillery shell.

Let me now turn to the research and development portion of the bill. I serve as ranking member of that subcommittee.

The reduction of $5 billion in research and development is the largest cut that our committee has ever recommended. I was not in total agreement with all of the specific reductions, but I do agree with the level that we have reduced. The committee recommendation of $34 billion represents a $3-billion increase over last year's level or a 4½-percent real growth in the account.

Congress has provided for major real increases in research and development every year since fiscal year 1980, primarily to make up for a 10-year period of no growth in this account. I believe we have reached the point where we cannot continue to make major increases in this area. We need to carefully examine the impact of the programs now in R&D on the future force structure. We clearly cannot afford to field them all. In the strategic area alone we have MX, Midgetman, Trident II [D-5], B-1, ATB, SRAM II, E-6A, advanced cruise missile, SDI and ASAT, all in R&D and all with a large price tag—over $10 billion in fiscal year 1986. In tactical air we are doing major R&D on the ATF, ATA, F-15E, F-16F, F-14D, A-6E, C-17, JVX, LHX, T-46, AV-8B and F/A-18—$2.8 billion in fiscal year 1986.

I'd like to say we have put a significant dent in this problem, but the reality is that most of these programs have a very firm political life. The committee has eliminated a number of programs in research and development and made efficiency reductions in others.

The major research and development reduction made by the committee was in the strategic defense initiatives program. The committee, although it strongly supports the SDI Program, was not prepared to recommend the full authorization of $3.7 billion requested by the Department of Defense for fiscal year 1986. Extensive debate occurred in the committee on the appropriate level of authorization for SDI.

The committee believes that major efficiency reductions can be made in the various program elements without seriously jeopardizing the overall SDI goals. The committee was not convinced that the 100- to 200-percent increases in many program elements could be efficiently accommodated. We believe that through better program definition and elimination of lower priority efforts, the $1.24 billion overall reduction would not severely affect the SDI Program.

The committee did make some tough decisions and terminated over 30 programs.

One program that was recommended for termination was the advanced medium range air-to-air missile [AMRAAM]. The committee has closely followed the development cycle of this missile through special staff reviews and increased oversight. This year we concluded that the projected unit cost of the missile had increased by a factor of 3, and the schedule has slipped by almost 2 years. We felt that the system had become unaffordable.

In summary then, the committee was faced with a very difficult task of reducing the administration's request of almost 6 percent real growth down to zero percent.

We structured these reductions—to the extent possible—to protect the areas of readiness and force sustainability that the Congress has approved in the past.

I urge my colleagues to resist further cuts and to support this bill. To cut further would reverse the improvements the Congress has made in force modernization and readiness.

Mr. STRATTON. Mr. Chairman, I believe we have remaining a minute and a half and yield myself the remaining time.

I would just like to join in seconding what Mr. DICKINSON has said. I think the committee has done an outstanding job in bringing this bill to the floor in this particular form.

At the beginning of the year, it was said that Defense would not contribute anything toward trying to eliminate the budget deficit. We have in fact in our committee initiated the effort, and we were the ones that brought down to the 1985 figures, and then the Senate, as Mr. DICKINSON has pointed out, came down to our figure.

As the gentleman from Alabama has pointed out, let us not forget that there is a threat, a serious threat; certainly the new leader of the Soviet Union has not indicated any particularly benign character, and I think we have got to keep our powder dry and we have got to continue to maintain a strong defense.

This is what we hope that the House, when we go back under the 5-minute rule, will support us on.

● Mr. SHUMWAY. Mr. Chairman, I rise today to support the general intent of H.R. 1872, The Department of Defense Authorization Act for fiscal year 1986. I continue to be firmly committed to the strengthening and modernization of our national defense capability—maintaining the security of our Nation is a primary responsibility that we, as Federal legislators, must fulfill. Over the past 4 years, I believe we have begun to make substantial progress toward overcoming deficiencies in our defense posture and redressing the strategic imbalance resulting from the long, and continuing, Soviet military buildup. This progress must not be jeopardized now; we must continue to provide the necessary resources for sustaining a strong and effective national defense.

Nevertheless, I recognize that one element of national security is a strong and stable economy—until we bring the Federal deficit firmly under control, we leave the Nation vulnerable to external pressures and weakened in its ability to respond to external threats. I therefore support many of the efforts made by the House Armed Services Committee to impose the same fiscal discipline on the defense budget as we must impose on all programs contained in the Federal budget. In my view, reduced defense expenditures as recommended in H.R. 1872 can serve as an important contribution to an overall deficit-reduction package encompassing all areas of Federal spending.

Still, as we attempt to trim waste, eliminate inefficiencies, and improve the cost effectiveness of the defense programs we pursue, it is vital, Mr. Chairman, that we not lose sight of the nature of the threat to which our Armed Forces must answer. The Soviet Union, in spite of a significant slowdown in economic growth in recent years, has consistently increased its spending for defense and now is reported to spend 15 to 17 percent of its GNP on the military sector. It has continued to modernize and expand its strategic forces, deploying new generations of nuclear missiles; it has developed an alarming chemical warfare capability and demonstrated it in Afghanistan; it is developing antisatellite weaponry and ballistic missile defense systems. These are the developments to which our defense budget must respond; if we are to preserve peace, we must maintain a credible deterrent.

In this respect, Mr. Chairman, I support provisions in H.R. 1872 to continue development of a small, mobile ICBM, to complete the procurement of 100 B-1 bombers, to acquire 23 new ships, including a Trident submarine, and to convert 5 others, and to provide funding for the procurement of binary chemical weapons which will replace the more dangerous and outdated stockpile we currently maintain. Furthermore, despite substantial reductions in the funding for space defense research, the legislation before us still provides for a 75 percent increase over last year in funding for the SDI. In my view, this represents an increase which is consistent with both our determination and our ability to explore further the feasibility of developing defensive systems.

Mr. Chairman, while I remain concerned about certain economies made in this bill, particularly the authorization of only 21 MX missiles instead of the 48 requested by the President, I commend the Committee on Armed Services for its inclusion of provisions to address waste and inefficiency in defense procurement. By recommending that the Air Force initiate a competitive procurement program for tactical fighter aircraft and by placing performance conditions on the release of funds for the troubled DIVAD Program, I believe that H.R. 1872 builds on the positive procurement reforms begun during the 98th Congress and moves us closer to a competitive, cost-effective approach to defense procurement.

Overall, the Defense Authorization Act for fiscal year 1986 provides a reasonable balance of concern for fiscal restraint and recognition of security requirements. Even though the staggering Federal deficit demands our attention and influences every one of our budgetary decisions, we cannot forget that without a strong national defense we leave our freedom and security at risk. Our first priority must be to ensure a sound, solid and complete defense of our Nation.●

● Mr. BROWN of California. Mr. Chairman, when the fiscal year 1986 Department of Defense authorization is considered on the House floor, Congressman COUGHLIN and I will offer an amendment to continue the limitation on antisatellite [ASAT] testing adopted by the House last year. The Brown-Coughlin amendment would again prohibit testing of the U.S. F-15-launched ASAT against an object in space as long as the Soviet Union does not conduct such a test. The amendment would not cut ASAT funding or prevent any tests other than tests against actual targets in space.

The arguments which persuaded the House to adopt the ASAT test ban last year by a substantial margin are as compelling today as they were then. The Soviet ASAT is crude and unreliable, and based on technology the United States abandoned many years ago. The Soviets have not tested their ASAT since 1982. The U.S. F-15 system, a generation beyond the Soviet ASAT, has been tested against points in space.

Testing of the U.S. ASAT against targets in space is now planned. The

Soviets are likely to respond to such tests by attempting to match our superior technology. Now is the time to negotiate an agreement to limit ASAT's before it is too late to avert a costly and destabilizing arms race in space.

Our most important military satellites are presently beyond Soviet ASAT range. Testing of this sophisticated weapon against space targets will lead to an unrestrained ASAT competition. Because the United States depends more heavily on satellites than the Soviet Union, our own national security interests would thus be best served by limiting the Soviet capability to destroy our satellites.

I urge the support of my colleagues for the Brown-Coughlin ASAT amendment.

Thank you Mr. Chairman.

The text of the amendment appears below:

AMENDMENT TO H.R. 1872, AS REPORTED OFFERED BY MR. BROWN OF CALIFORNIA

At the end of title II (page 29, after line 14) add the following new sentence:

SEC. 207. LIMITATION ON TESTING OF ANTISATELLITE WEAPONS.

The Secretary of Defense may not carry out a test of the Space Defense System (antisatellite weapon) against an object in space until the President certifies to Congress that the Soviet Union has conducted, after the date of the enactment of this Act, a test against an object in space of a dedicated antisatellite weapon. The prohibition in this section expires on October 1, 1986.●

● Mr. GREEN. Mr. Chairman, there may not be a more important authorization bill that we will be asked to consider in this Congress or indeed in any Congress. Not only must we authorize programs to build our national security, but we must also act immediately to halt wreckless defense spending or share the blame for the state of this country's economy.

Mr. Chairman, I am beginning to feel like a broken record. In January 1983 I wrote in the New York Times that "large increases in defense spending are dangerous to the economy. They make it impossible to reduce the Federal Government's excessive deficits predicted for fiscal 1984 and 1985."

In May 1984 I stood on the floor of this House and stressed that "we have a grave duty in this year of a potential $200 billion deficit to see that every dollar in the defense spending portion of the budget is spent wisely * * *. It is foolish to plunge ahead with unsustainable procurement programs, when we know that they are inevitably going to have to be stretched out, with higher per unit costs, so that ultimately we shall get fewer and fewer weapons at higher and higher costs."

But I am more optimistic this year; not optimistic that the Pentagon has seen the light but that my colleagues in this House have. I have heard many of you say, "Yes, this or that weapons system would be nice but we have to begin making choices." And I have heard many of you using the words "defense freeze."

The alternatives are really not acceptable. If we don't start cutting the big ticket items—saying no to 48 or even 21 more MX missiles and no to any increase in star wars funding—we will continue to pay both in terms of defense readiness and the national economy. What that will mean is a continual black eye for the U.S. defense capabilities—such as we earned in Iran, in Lebanon, even in Grenada—and a possible return to the 1979 high inflation, high interest rate economy that we all remember.

We don't owe the Pentagon a blank check, we owe our constituencies a prudent defense program. We have a chance to deliver it by cutting responsibly on this DOD authorization.●

Mr. STRATTON. Mr. Chairman, I yield back the balance of my time.

Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose and the Speaker pro tempore (Mr. GONZALEZ) having assumed the chair, Mr. OLIN, Chairman pro tempore of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 1872) to authorize appropriations for fiscal year 1986 for the Armed Forces for procurement, for research, development, test, and evaluation, for operation and maintenance, and for working capital funds, to prescribe personnel strengths for such fiscal year for the Armed Forces and for other purposes, had come to no resolution thereon.

GENERAL LEAVE

Mr. STRATTON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 1872, the bill just under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

GOOD ADVICE TO CONGRESS FROM ALABAMIANS

(Mr. ERDREICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. ERDREICH. Mr. Speaker, during the early part of the first session of this 99th Congress, I asked the people of the Sixth District of Alabama, as I did during both sessions of the 98th Congress, to respond to my annual congressional questionnaire and share their opinions on two major priorities facing our Nation: deficit reduction and tax reform.

Almost 14,000 people took the time to answer the questionnaire, and I would like to thank them for their valuable input and share their views with my colleagues in Congress.

If there was one overriding message in the questionnaire responses I received, it was a demand for action in Congress to bring Federal spending under control and reduce the budget deficit that threatens to reverse the economic gains we have made. A strong majority made it clear that they were willing to accept a budget freeze in order to reduce the deficit.

Two-thirds of those who responded favored an across-the-board freeze on all Federal spending. As well, two-thirds supported a combination of restraint on all Federal spending and new tax increases to reduce the deficits. In addition, an overwhelming 89 percent supported a "pay-as-you-go" budget proposal that would require the Federal Government to pay—not borrow—for any spending above last year's level.

Those responding to my 1985 Congressional Questionnaire also felt strongly that the Tax Code should be restructured to make it less complex and fairer. While only 19 percent of respondents favored eliminating all tax deductions, an overwhelming 91 percent believed that the Tax Code should be reformed. Seventy-four percent believed that deductions for charitable contributions should be retained, and 85 percent supported retaining the deduction for home mortgage interest.

When asked their views on overall spending policies, over 60 percent of those responding believed that the current level of domestic spending was too much, while 84 percent felt that the current level of defense spending was either about right or too much.

Again, I would like to thank the almost 14,000 Jefferson County residents who answered my third annual congressional questionnaire. The opinions of the people of the Sixth District of Alabama are a valuable guide to me and the entire Congress as we face the tough choices that lie ahead. These opinions will help me do a better job of representing Jefferson County thinking in Washington.

The total "yes" and "no" response percentages on some questions do not equal 100 percent because a small number of respondents did not answer all the questions.

The questions included in the questionnaire and response percentages follow:

CONGRESSMAN BEN ERDREICH'S CONGRESSIONAL QUESTIONNAIRE

Federal deficit spending has grown dramatically since 1980. The budget chart below outlines the policies which have been in place since 1980 and is converted into 1984 dollars to give a picture of where the growth in spending has occurred. While

some $50 billion has been cut from non-defense domestic programs, other areas grew. Further, the impact of the 1981 tax cut reduces federal revenues by $117 billion in 1985 alone.

The President has submitted a budget to Congress that has a $180 billion deficit. It reduces domestic spending by $40 billion over last year, excluding Social Security, and increases defense spending by $32 billion.

	Percentage	
	Yes	No
1. Do you agree with the Administration's proposal to reduce federal spending in all other areas except Social Security and Defense?	60	40
In order to further reduce the deficit, would you favor:		
2. A reduction in defense spending?	54	46
3. A freeze on Social Security?	49	51
4. Increasing costs to Medicare beneficiaries?	38	61
5. A combination of restraint on all Federal spending and new tax increases?	67	33
6. An across-the-board freeze on all Federal spending?	67	33
7. Would you favor an amendment to the U.S. Constitution requiring the Federal budget to be balanced except in times of national emergency?	84	16
8. Would you support a "pay-as-you-go" budget proposal that would require the Federal government to pay (not borrow) for any spending above last year's level?	89	11
The Department of the Treasury and a variety of national leaders have proposed a change in the way we pay our Federal income taxes. The Treasury plan would end many special tax preferences in order to reduce overall tax rates. An individual may lost a particular tax benefit under the plan, such as the deduction for state and local taxes, but that would be offset by a lower tax rate in most cases. Further, business taxes would be increased.		
9. Do you believe that the tax code should be reformed?	91	9
10. Do you believe that a new plan similar to the one proposed by the Treasury Department should be adopted?	64	33
11. If a new tax law were adopted, would you favor retaining the medical and dental tax deduction?	66	34
12. Do you believe that deductions for charitable contributions should be retained?	74	26
13. Would you favor retaining the deduction for home mortgage interest?	85	15
14. Should employer-provided benefits, such as health and life insurance and education benefits, be included as taxable income?	36	64
15. Should credit card and other interest deductions be retained?	51	49
16. Would you favor eliminating all tax deductions?	19	81
Take a moment to think about the Federal budget again and give me your thoughts on overall spending policies.		
17. Do you think the current level of domestic spending is: a. about right? 22%; b. too much? 62%; c. too little? 8%.		
18. Do you think the current level of defense spending is: a. about right? 42%; b. too much? 42%; c. too little? 8%.		

INJUSTICE TO INDIANA'S EIGHTH DISTRICT WILL NOT BE FORGOTTEN

(Mr. COBEY asked and was given permission to address the House for 1 minute and to include extraneous material.)

Mr. COBEY. Mr. Speaker, lest anybody in this body think that the American people are going to quickly forget the injustice that has been done to the people of the Eighth District of Indiana, I bring to the House two recent editorials from local papers in North Carolina. I am going to read the opening and the closing paragraph of each and include the rest of the editorials in the RECORD.

The first is from the Durham Morning Herald, entitled "Congress Crushes Good Will."

The U.S. House of Representatives committed the unpardonable sin last week. It blasphemed Indiana's right to representative government of, for, and by the people.

* * * * *

In this case, rather than seating the certified loser, the House should have called for another election.

From the Courier-Tribune in Asheboro, "What Good Did It Do?" is the title.

The Democrats have forced an illegal Representative down the throats of the people of Indiana's Eighth District.

* * * * *

The course for Republicans now is in the courts. They must demand a special election—it is the only proper thing to do.

Mr. Speaker, we are not going to forget about this injustice.

The full editorials follow:

[From the Durham (NC) Morning Herald, May 5, 1985]

CONGRESS CRUSHES GOOD WILL

The U.S. House of Representatives committed the unpardonable sin last week. It blasphemed Indiana's right to representative government of, for and by the people.

In denying Indiana's certified election winner, Republican Richard D. McIntyre, his rightful seat in the House from the 8th District of Indiana, the Democratic majority crushed the good will and bipartisanship that Congress desperately needs.

The action made little sense. The recommendation of a task force that investigated the Indiana election results was blatantly biased. To assure that the Democratic candidate would win in the task force's recount, the Democrats simply refused to count all the ballots.

The Indiana election results are, indeed, confusing. The Democrat, Frank McCloskey, held a slim lead election night. Mr. McIntyre got the lead in a recount—first by a 34-vote margin, later by 418 votes. But the House refused to seat him.

Then the House appointed a three-member committee to recount the ballots. The committee's 2-1 Democratic majority decided that Mr. McCloskey won by four votes—the margin by which Mr. McCloskey was ahead when the count stopped.

In defense of the Democrats, there were questions about the absentee ballots that were not counted. Although postmarked before the election, they had arrived a week later. But there were other absentee ballots that had been counted that might have been questioned for the same reason.

Furthermore, there were precincts with more ballots than voters who signed the rolls. So the Indiana election, the closest House race this century, is suspect from either side.

The Constitution gives the House the right to refuse to seat a member—even if properly elected. But it has never before turned back the certified winner because a race was close.

In this case, rather than seating the certified loser, the House should have called for another election.

[From the Courier-Tribune (Asheboro, NC), May 3, 1985]

WHAT GOOD DID IT DO?

What good did it do?

The Democrats have forced an illegal representative down the throats of the people of Indiana's 8th District.

The end of the long battle climaxed with a brief walkout by Republican members of the U.S. House.

The Democrats have deprived people of the Hoosier State of their rightful lawmaker and have driven a wedge between themselves and the Republican minority that may not be removed for a long time. All for one lawmaker.

The infamous vote was 236-190, with 10 brave Democrats voting justly with the GOP.

One sad Republican noted "The Democrat majority was willing to exercise ruthlessly whatever power it has in sheer numbers."

What has happened to bipartisanship? What has happended to sound reasoning?

There was a time when lawmakers served their people before their party; they were citizens of their state before members of their party.

Is there no more room for compromise in the halls of Congress? What happened to just and honorable men?

The facts of this sad case have been stated over and over. Everyone knows of votes, recounts and thefts of votes.

What good has it done?

We do not blame Democrat Frank McCloskey for following the course of his party.

We feel for Republican Richard McIntyre who deserved and did not get an honest shake from the Democrat Party.

The course for Republicans now is in the courts. They must demand a special election—it is the only proper thing to do.—J.G.S.

DASH TO MANAGUA

(Mr. RITTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RITTER. Mr. Speaker, in today's Washington Post, there is an article by Evans and Novak entitled "Dash To Managua."

We have heard a great deal about the Democratic Party seeking to move back into the mainstream of American politics, seeking to recapture that center that wins Presidential elections, seeking to reestablish its links with the moderate Democratic South, Southwest, and West.

"Dash to Managua" has our colleagues, Mr. MILLER of California and Mr. BONIOR of Michigan, essentially conducting foreign policy with the Marxist government of Nicaragua. It has two U.S. Congressmen, following on the heels of Ortega's trip to Moscow, going off to Managua to plead with the Sandinista government, essentially seeking a way out of their difficult political situation deriving from the vote in this House to give no assistance whatsoever to democratic forces in Nicaragua and the immediate departure of Mr. Ortega to Moscow to discuss a $200 million Soviet aid package.

□ 1050

It says, the Evans and Novak article had "the Congressmen warning that unless the Nicaraguan Government

took steps toward pluralism, congressional Democrats would switch and vote aid for the Contras. It was a second such source that quoted the Congressmen asking the Sandinistas to 'help them out of a difficult political situation.' "

Mr. Speaker, what in the world are U.S. Congressmen conducting personal foreign affairs with the Soviet-Cuban backed Marxist government of Nicaragua?

Mr. Speaker, I say, let us leave foreign policy to the Secretary of State.

The Evans and Novak editorial in today's Washington Post follows:

DASH TO MANAGUA

No sooner had President Daniel Ortega flown off to Moscow than two Democratic congressmen arrived in Managua for the weekend to plead, according to U.S. diplomatic cables, for help from the Marxist-Leninist regime in calming the congressional uproar over the Nicaraguan's telltale trip.

Reps. George Miller of California and David Bonior of Michigan say "no comment" on their "private conversations" with Sandinista leaders, from which U.S. Embassy officials were excluded. But cables reporting on their talks have surfaced on Capitol Hill, where we obtained them. They describe the congressmen as making the trip to "see what the [Nicaraguan] government could do to help them out of a difficult political situation in the House."

An unnamed member of the congressional delegation is quoted as advising Foreign Ministry officials that the regime should try and hold out for three more years because things back in Washington might radically change by then, meaning a new administration in power. Departing from his "no comment" rule, Miller told us that no such statements were made.

A House Democratic leader, who did not want his name used, said he was "uncomfortable" that their weekend in Managua brought Miller-Bonior "dangerously close to negotiations." But beyond the impropriety of congressmen playing diplomat is a grosser spectacle: a symbiotic relationship between American politicians and the Nicaraguan dictatorship.

Miller and Bonior dashed off to Managua as many Democratic colleagues fretted over Ortega's mission to Moscow immediately after the House vetoed any aid to anti-Sandinista guerrillas. Miller is one of the Nicaraguan regime's most energetic supporters in Congress. He was accompanied by a staffer, Cynthia Arnson, a prominent champion of the Sandinistas, formerly employed by the left-wing Institute for Policy Studies.

The two congressmen were accorded less than red-carpet treatment. They were not satisified by a session with Deputy Foreign Minister Victor Hugo Tinoco and failed to get an appointment with Interior Minister Tomas Borge. But they did meet Vice President Sergio Ramirez; Comandante Bayardo Arce, the regime's chief ideologist as coordinator of the Sandinista Political Committee, and Carlos Tunnermann, ambassador to the United States.

In a departure from tradition but true to the latest fashion of pro-Sandinista congressmen, U.S. Embassy officials were barred from the meetings. Miller informed the embassy he had told Ramirez the regime would have to ease censorship and allow what were termed democratic activities to keep the support of Democrats in Washington.

But reports from Nicaraguan sources, as reflected in cables being read on Capitol Hill, suggested the congressmen were less interested in liberalization for its own sake than in getting themselves off the political hook back home.

One well-placed source had the congressmen warning that unless the Nicaraguan government took steps toward pluralism, congressional Democrats would switch and vote aid for the contras. It was a second such source that quoted the congressmen asking the Sandinistas to "help them out of a difficult political situation."

The one meeting embassy officials attended was with Jaime Chamorro, editor of the anti-Sandinista La Prensa. Miller told the embattled newspaperman that he had urged on government officials the necessity of freedom of the press. Chamorro was not impressed. La Prensa would not accept a separate agreement with the government, he said, insisting that freedom of the press must be part of a national "dialogue."

The Miller-Bonior weekend in Managua follows a pattern. When Demorcatic Sens. John Kerry of Massachusetts and Tom Harkin of Iowa conferred with Ortega in Managua before the House vote, they not only barred U.S. diplomats but did not even report to them after the fact, as Miller and Bonior did. The Sandinista regime's offer to send 100 (out of 2,000) Cubans back home followed secret negotiations not with U.S. diplomats but with congressional staffers.

The pattern may be breaking, partly because free-lance congressional diplomacy is stirring bipartisan distaste. Bernard Aronson, a Democratic insider and campaign adviser to Geraldine Ferraro last fall, writes in the current New Republic that his party should promise military support for the armed democratic resistance if all other efforts fail. That advice is the antithesis of Democrats, pursuing cosmetic Sandinista "pluralism" while urging the comandantes to hang tough until the next American presidential election.

THE RURAL ELECTRIFICATION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia [Mr. DARDEN] is recognized for 5 minutes.

● Mr. DARDEN. Mr. Speaker, because the Armed Services Committee, on which I serve, was involved in a very important mark last week, I was unable to participate in the special orders held by the gentlemen from Texas [Mr. DE LA GARZA and Mr. PICKLE] to commemorate the 50th anniversary of the Rural Electrification Administration. Consequently, I would like to take this opportunity today to say a few words about this important program.

Last Saturday, May 11, marked the 50th anniversary of President Franklin Roosevelt's signing of the Excutive order creating the Rural Electrification Administration. That signing was celebrated at the Little White House in Warm Springs, GA, last Saturday. One year and ten days after the original order was signed, on May 21, 1936, the The Rural Electrification Act was signed into law, giving the REA full status as a Federal agency.

To many, this may have seemed like the creation of just another Federal agency, but it was actually much, much more. As a boy growing up on a dairy farm in rural Hancock County, GA, I saw first hand the benefits which electricity brought to rural America. My family was a member of the Washington Electric Membership Corp. and the electric power we received ran not only lights but water pumps, electric milkers, radios, and television. Quite literally, it afforded us the opportunity to be part of the 20th century.

Today, those who live in rural areas are able to enjoy the same benefits as those who live in cities because of the REA and electric membership corporations [EMC's], a primary user of REA financing. The Georgia EMC has more customers than any other State, and the two largest EMC's in Georgia—Cobb EMC with more than 65,000 customers and North Georgia EMC with almost 60,000 customers—are located in my district.

Mr. Speaker, I want to commend the two EMC's, their general managers—Paul Weatherby of Cobb EMC and Elvin Farrar of the North Georgia EMC—and all of their employees for the service which they perform for the people of the Seventh District. I also want to point out, especially at this time when Congress is reevaluating so many programs that are not working, that the REA is one program which has helped people help themselves as Atlanta Journal editorial page editor, Durwood McAlister, wrote in a column entitled "REA Was Different; A Partner, Not a Handout."

Mr. Speaker, I submit Mr. McAlister's column for insertion into the RECORD.

[From the Atlanta Journal, May 9, 1985]

REA WAS DIFFERENT; A PARTNERSHIP, NOT A HANDOUT

(By Durwood McAlister)

Electricity, like everything else but hard times, came late to the McAlip's Chapel community of McNairy County, Tenn. The house in which I grew up sat almost in the shadow of high-power TVA transmission lines less than 30 miles from one of TVA's power-generating dams; but when I left to join the Navy in World War II our home was still being lighted by kerosene lamps.

By the time I returned, a remarkable transformation had taken place. I had missed the magic moment when the power came on, the dramatic leap from one age to another, but the evidences of a new way of life were everywhere.

McAlip's Chapel had left its primitive past behind.

Farm women who had spent their lives over wood stoves and washboards delighted in new electric ranges and automatic washing machines. Along unpaved country roads, on the strengthened front porches of un-

painted houses, gleaming new refrigerators and washing machines were proudly displayed for passers-by to appreciate.

Electric pumps had taken over the laborious task of drawing water from deep wells, bringing the comfort and convenience of indoor plumbing and doing away with the health hazard of open outdoor privies.

And rural breadwinners found themselves, for the first time, contemplating the possibility of jobs in light industry made possible by the availability of power.

The same thing was happening all across the country. And most of it came about as a result of an executive order signed by President Franklin D. Roosevelt creating the Rural Electrification Administration.

The story of how that came about, being recalled this week as the REA celebrates its 50th anniversary, is worth remembering.

During the mid-1920s, Roosevelt divided his time between his huge mansion at Hyde Park, N.Y., and a small cottage in rural Warm Springs, Ga. He later said that he became increasingly resentful of the fact that his electricity bill at the Warm Springs cottage "was about four times what I paid at Hyde Park."

His pique over that electric bill, he said, eventually led to the executive order, signed on May 11, 1935. The order provided for loan funds to be used on an areawide basis to build power lines into rural areas.

It took more than presidential pique and an executive order, however, to bring power to the boondocks.

Existing power companies showed little interest in the REA plan and it got off to a shaky start. In the end, it was the farmers themselves who formed the non-profit cooperatives which applied for, and got, the loans which enabled them to get the power they wanted.

A lot of government programs, including many of those initiated by Roosevelt, have been properly condemned by succeeding generations saddled with the debts they created.

But the REA program was different. It became not a handout, but a true partnership which electrified rural America and it still stands as a remarkable achievement in cooperative economic democracy.

For those of us old enough to remember the dark days, electricity is, indeed, a miracle. So too was the program which brought it to the backwoods of America.●

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed a bill and concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 709. An act to amend the Public Buildings Act of 1959 and for other purposes; and

S. Con. Res. 48. Concurrent resolution relating to the death of President-elect Tancredo Neves of Brazil.

The message also announced that the Senate agrees to the amendments of the House to a joint resolution (S.J. Res. 61) of the Senate of the following title: "Joint resolution to designate the week of May 1, 1985, through May 7, 1985, as 'National Osteoporosis Awareness Week.'"

TRIBUTE TO SENATOR FRANK H. BASSETT, JR.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kentucky [Mr. HUBBARD] is recognized for 5 minutes.

Mr. HUBBARD. Mr. Speaker, I speak today in tribute to and in memory of a longtime friend and constituent of mine, Senator Frank H. Bassett, Jr., of Hopkinsville, KY, who died on April 19, 1985, at the age of 78 at Jennie Stuart Medical Center in Hopkinsville, KY.

A native of Pembroke, KY, Senator Bassett was the son of the late Mamie Thompson Bassett and Dr. Frank H. Bassett, former Christian County court clerk.

From 1944 to 1946, Frank H. Bassett, Jr., served in the Kentucky House of Representatives. While in the house, Representative Bassett served on the legislative research commission. From 1958 to 1960, Frank H. Bassett, Jr., served in the Kentucky State Senate.

Senator Bassett was an inspiration to me, even during the years prior to my entering politics on the State level as a State senator in 1967. Indeed, Senator Bassett was a supporter of mine when I decided to run for the U.S. House of Representatives in 1974. Senator Frank Bassett was a dear friend of mine, and he was active in affairs of the Democratic Party on both the local and State levels for a number of years.

Frank Bassett was actively involved in his community. He retired as coowner of Area Supply Co. in Hopkinsville and was also co-owner of the Blue Flame Coal Co. at White Plains, KY, in Hopkins County.

His interests were many in Hopkinsville. He was on the committee for the restoration and preservation of Riverside Chapel, a charter member of the Hopkinsville Community Concert Association, a former Kiwanian, and a member of the Chamber of Commerce and Elks Lodge.

Senator Bassett was a member of the First Baptist Church of Hopkinsville, where he was a deacon and a Sunday school teacher. A devoted son, he worked for his father as a deputy court clerk, and later served as a clerk in the State auditor's office during the administration of Kentucky Gov. Ruby Laffoon.

His career was also distinguished when he served for 5 years with the U.S. Department of Justice as a deputy U.S. marshal in the Panama Canal Zone. A loving husband and devoted father, Frank H. Bassett, Jr., is survived by his lovely wife Sara Belle McPherson Bassett; a son, Dr. Frank H. Bassett III of Durham, NC; a daughter, Betty June Bassett Clark of Hopkinsville; five grandchildren, and one great grandchild.

My wife Carol joins me in extending our sympathy to the survivors and friends of this outstanding Kentuckian who was truly an inspiration to those of us who knew and loved him.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House the gentleman from West Virginia [Mr. RAHALL] is recognized for 5 minutes.

● Mr. RAHALL. Mr. Speaker, due to official business, on May 14, 1985, I was unable to be present to cast my votes on rollcall Nos. 108, 109, 110, 111, 112, 113, and 114. In my capacity as chairman of the Mining and Natural Resources Subcommitee, I was touring the Bureau of Mines in Pittsburgh, PA, whose jurisdiction falls under my subcommittee.

Had I been present, I would have voted in the following manner: "yea" on roll No. 108, "present" on roll No. 109, "yea" on roll No. 110, "nay" on roll No. 111, "yea" on roll No. 112, "yea" on roll No. 113, and "yea" on roll No. 114.●

LEGISLATION INTRODUCED TO REGULATE TRANSFER OF FUNDS FOR HUMANITARIAN PURPOSES TO INDIVIDUALS LIVING IN SOCIALIST REPUBLIC OF VIETNAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. LUNGREN] is recognized for 60 minutes.

Mr. LUNGREN. Mr. Speaker, there is no doubt that the tradition of America to assist relatives, friends, and others in distress in other countries regardless of the state of relations between this country and that foreign country is longstanding. Senator BILL ARMSTRONG and I have introduced legislation to regulate the transfer of funds for humanitarian purposes to individuals residing in the Socialist Repulic of Vietnam.

The Office of Foreign Assets Control, through section 505,565 of the foreign assets control regulations, allows the transfer of not more than $300 in any consecutive 3 month period to any one payee in Vietnam or $12,000 per year. An additional one-time transfer of $750 is permitted for the purpose of enabling the payee to emigrate from Vietnam. Our Government gave this permission because we believed that most recipients had direct or indirect connections with the U.S. Government or the deposed Government of South Vietnam.

We are all well aware by now of the limitations placed on people with pro-American backgrounds by the present Vietnamese regime. They are making it extremely difficult for them to maintain even minimal standards under the current economic conditions in Vietnam.

Thus our intention has been to permit people to send money to their families in the Socialist Republic of Vietnam on humanitarian grounds. But even the greatest of intentions, as we all know, pave a well-traveled road often leading in directions we might otherwise take. There is currently strong evidence that suggests that Vietnamese refugees in this country are the victims of a systematic program of economic exploitation directed against them by that Socialist Republic of Vietnam. According to testimony delivered last year before the Senate Banking Committee's Subcommittee on Financial Institutions, coerced appeals for money from Vietnamese refugees living in the United States are not uncommon. Witnesses and experts revealed this little known but alarming story at the 1984 hearing:

In 1981, Socialist Republic of Vietnam [SRVN] Government authorities created an organized and efficient exploitation system "to exhaust the foreign exchange capabilities of overseas Vietnamese."

This exploitation system targets a list of all individuals in Vietnam who have relatives in the United States. Vietnamese cadremen periodically contact people living in Vietnam and encourage them to write to their relatives to request money.

To transfer the money, a network of underground currency collection centers have been established in the United States. In response to these orchestrated appeals, Vietnamese refugees have taken U.S. currency to the centers. The U.S. currency is consolidated at periodic intervals and then smuggled out of the United States to the State Bank of Vietnam. The intended recipients are given a very small amount of Vietnamese currency which is immediately subject to regressive taxation or outright confiscation.

In many American cities, there are sizeable Vietnamese communities which are vulnerable to these appeals. Some 13 collection centers from Los Angeles to New Orleans to Arlington, VA, reportedly are funneling an estimated $18 million per month to the hands of the SRVN.

When one considers the weakness of Vietnam's economy, the reasons for exploitation of overseas Vietnamese becomes increasingly clear. A terribly poor country with a per capita income lower than India's nonetheless, it has the fourth largest army in the world. With a population that has exploded from some 38 million in the early 1970's to more than 60 million today, Vietnam is often afflicted by severe shortages of food, raw materials, and spare parts. Its foreign currency reserves, according to an International Monetary Fund team that visited Vietnam in April 1983 are approximately $16 million.

We cannot permit millions of dollars to leave this country on an annual basis to uncertain destinations somewhere in Southeast Asia; money which is likely to be used to finance the military adventurism of this bellicose regime. Despite continuing international condemnation and a failing economy, Hanoi consistently refuses to negotiate a Cambodian settlement that might alter its own hegemony. Since the late 1970's, Hanoi has sought to impose on Cambodia a totalitarian regime in its own mold, and to serve Vietnamese needs. Moscow's estimated $1 billion a year in economic and military assistance to Vietnam subsidizes its occupation of Cambodia.

Mr. Speaker, I believe we need to guard against the building of a clandestine currency transfer network influenced by that government of which I speak which is unregulated, invites exploitation by criminal elements, and which presents our law enforcement agencies with a complicated web of deception and intrigue. A 1984 Department of Treasury study of Vietnamese involvement in clandestine international currency transfer invested approximately 2,000 man hours of active involvement in travel, informant handling, and street-level collection work, operating in Vietnamese communities in Los Angeles, San Francisco, San Jose, Houston, and in my own district the city of Westminister. The study, formally known as Project VICTOR, concluded that approximately $18,000,000 leaves the United States monthly for Vietnam. Of this $18,000,000, approximately $9,000,000 per month is tranferred by clandestine methods and the remainder by banks.

□ 1550

Project VICTOR has exposed that day after day, in cities all across this country where there are significant concentrations of Vietnamese refugees, they are given no alternative than to take their money to storefronts and backrooms. They must entrust their family's welfare to unregulated currency transfer operators who not only skim off a substantial percentage of the funds, at least that is the testimony. But may also may be acting in the interests of a hostile foreign power. Evidence suggests that just one minor operation can account for as much as a quarter million dollars per year. In U.S. cities with significantly larger Southeast Asian populations there are cases under investigation that may involve of as much as a quarter million dollars per month from Vietnamese refugees.

Mr. Speaker, I believe that Vietnamese people in the United States need to have some means of transferring a reasonable level of funds for humanitarian purposes to family members in Vietnam, without enriching a regime they dislike, and in fact despise. We need to protect them against insidiously involved shadowy underground practices designed soley to bolster the SRVN's insatiable need for hard, a substantially hard currency reserve.

Vietnamese refugees, like other immigrants who have come to the United States, feel a great responsiblity to those relatives still in their homeland. They send money home because of their deepest commitment to their families. This is a natural outgrowth of a 3,000-year-old veneration of the family as a divine principle. It is easy to see why it would be difficult to enjoy the comforts of their new country while the families they had to leave behind are often subject to repressive economic and political conditions.

It is tragic to hear a refugee lament that when he sends $100 to his wife, she will actually get very little of it. Yet he keeps sending the money because, even if she gets just $10, that is of some assistance. Or to hear a refugee's sad story that his 9-year-old daughter, gravely ill with rheumatic fever, receives a cable from his wife for money, but the little girl died 4 days later before the money arrived.

The 1984 Treasury study concluded that:

> The problems under examination are not simple problems and there are no simple answers to the many questions we have raised. Indeed, the only simplicity we can find is our simple, moral duty to protect the Vietnamese people in the United States from exploitation originating both from within their community and abroad.

Mr. Speaker, we in the United States should not allow cold, cynical manipulation of those Vietnamese refugees who have sought the protection that our democracy affords. Nor should we permit the continued operation of underground centers which exist for the sole purpose of abusing our new neighbors. Moreover, in light of the high welfare dependency rate among these newly arrived refugees, the Federal Government has additional interest in stopping this intolerable problem.

The legislation that Senator ARMSTRONG and I have introduced proposes that there be established in the Treasury of the United States the Vietnam Humanitarian Remittance Fund, consisting soley of money paid in by Vietnamese refugees who wish to send such sums to their relatives abroad.

Upon implementation the Secretary of the Treasury shall issue notes drawn on amounts held in the fund which are payable to designated individual recipients in Vietnam. No note thus issued may be redeemed out of the Treasury unless it is accompanied by a declaration signed by both the recipient and a responsible official of the State Bank of the Socialist Republic of Vietnam which attests to the amount of funds actually received by the designated recipient; that the re-

cipient has actual use of all the funds which were sent; that no duress was employed in soliciting the funds or in obtaining the recipient's signature, and the lack of any special taxation or denial of human rights imposed on the recipient in connection with the redemption of this note.

Our legislation proposes that clandestine money be unlawful and suggests that it be the sense of Congress that the President of the United States seek to negotiate with the Socialist Republic of Vietnam for random monitoring of our humanitarian remittance program by a U.S. or multilateral team of inspectors in Vietnam.

Our bill proposes that in the event inspection teams report a pattern or practice of abuse of the procedures thus established for the sending of humanitarian remittances to Vietnam, all such remittances will be curtailed.

Our proposal does not intend to usurp or upset our current foreign policy direction with respect to Vietnam. It merely suggests that we demonstrate a commitment to restoring the integrity of humanitarian assistance for people in this country who desire to send currency to their relatives in Vietnam. It would seem that principles of equity require nothing less. I urge all my colleagues to study the suggestions embodied in the bill, and hopefully to cosponsor this bill.

Mr. Speaker, some have suggested that maybe this would not work because it would require the active participation of the Government of the Socialist Republic of Vietnam, and I understand that. But the point is that we need to make a gesture; set up some sort of system, which, if we do get their cooperation, will work.

Right now, unfortunately, many of our Vietnamese members of the community throughout this country, those who are citizen and noncitizen alike who have fled tyranny in their home country, are being beset by requests for money. Money they know which can help their people and their relatives in their homeland, but they have to bring that money through a system which allows for fraud and abuse and is skimming both on this side of the ocean as well as the other.

Certainly we ought to take some steps in this country to establish that system. I would suggest that if the Vietnamese Government does need hard currency, and the currency that is sent over for the benefit of individuals who live in their country can only be redeemed in this manner, that there would be a tremendous incentive for them to cooperate with us.

I hold out no hopes for the humanitarian gesture, or the humanitarian nature of the response that we would get from the Socialist Republic of Vietnam's Government, but I would hold out hope that this would create an environment, an environment of incentives for them to work with us.

In any event, Mr. Speaker, it must be better than the present situation which besets so many of our Vietnamese friends and neighbors in communities across this Nation.

Mr. Speaker, I yield back the balance of my time.

DETERRENCE, MODERNIZATION, AND THE NUCLEAR FREEZE II—SOVIET ICBM'S VERSUS U.S. SILOS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon [Mr. AuCoin] is recognized for 60 minutes.

Mr. AuCoin. Mr. Speaker, The Defense authorization bill has been reported from the Armed Services Committee and will shortly be before the House for amendments. In this period of calm before the storm, we should pause to consider more than the expense of that bill, massive and mammoth as it may be.

We also need to consider the strategy, the fundamental rationale, behind our Nation's military program.

That's why I am today taking the second in what will be a series of special orders to examine the military danger into which the Republican administration's national security policy is taking our Nation.

I will contrast this perilous program with the emerging democratic concept for America's military security—a concept that is as superior to its Republican counterpart as the Trident submarine is superior to the Maginot Line.

Today I will discuss one specific threat: The growing ability of Soviet ICBM's to destroy U.S. ICBM silos in a first-strike surprise attack, a nuclear, Pearl Harbor. I will show how the weak Republican program will allow this Soviet threat to escalate without limit, while providing this country with no military countermeasures of any value. And I will show how the strong democratic plan—to freeze Soviet accuracy and to harden our silos—is the superior military solution the American people are looking for at this time.

Mr. Speaker, the controversy over the Bitburg Cemetery has shown us how this Republican administration can make an abominable, miserably wrong decision—and persist in the blunder, no matter what.

Is it possible that the administration could be as wrong on strategic policy as it has been wrong on SS graves? Is it possible that the Government of a great power can make such a monumental error in a matter affecting its very national survival?

Of course it's possible. Just because someone has reached high office doesn't mean he can't make mistakes—immense mistakes with terrible consequences.

The French made a mistake with the Maginot Line. Our own Government made one in the 1940's at Pearl Harbor. Every nation concerned made a grave mistake at the beginning of the First World War.

Today, the Republican administration is making a similar mistake.

□ 1600

The mistake we are on the verge of making and in the course of making today with this administration does not involve, as in the case of World War I, tanks and Gatling guns, it involves doomsday weapons, weapons which put at risk the whole human race. As I will demonstrate this afternoon, the administration's strategic nuclear programs—both weapons and arms control—are irrelevant to the threat that America faces today.

In a recent news conference, Ronald Reagan said it was "the most ridiculous thing he'd ever heard" to say we have military parity with the Soviet Union. As evidence, he said the Soviets have more conventional weapons and more nuclear megatonnage than we do.

Mr. Speaker, with all due respect to the gentleman in the Oval Office, he missed the point by a country mile. The danger isn't from Soviet megatons, which are actually declining as they follow in the course we have chosen—namely, moving toward smaller and higher quality warheads. And the greatest danger isn't in their numbers of conventional weapons. We have chosen quality above quantity, and the outcome of the various Mideast conflicts suggest we've chosen the right course.

The more serious danger we face is from Soviet strategic nuclear weapons that are becoming ever quicker and more accurate. The Republican policymakers seem completely blind to this fact. We should all be disturbed that Mr. Reagan, and the entire Republican Party, are sailing along blissfully unaware of the most serious military threat our Nation has ever faced.

Today I am going to look very closely at the oncoming increase in the speed and accuracy of Soviet strategic nuclear weapons, and their significance for America's national survival.

Two months ago the House voted to continue production of the MX Glassjaw missile. Members made this decision by the narrowest of margins—if only three of my colleagues had voted otherwise, the decision would have gone the other way and the MX Glassjaw would have been canceled.

Ironically, the House took this action largely for reasons of arms control. If it were not for the belief that the Glassjaw MX will somehow bring us closer to arms control at some time

in the distant future, this missile would have been soundly defeated—probably in the other body as well as on this floor.

I do not doubt the sincerity of those who oppose the MX Glassjaw on its merits, but who reluctantly supported it in sincere hope that it would lead to arms control.

But at the same time, there are questions I must put to my colleagues who took that position: My questions are these:

Do you know what the arms control proposals now being put forth by our negotiators in Geneva actually say? Do you?

Do you know the specific details of the plan in whose name you have voted to spend billions of dollars for a missile you know to be useless from a military standpoint?

Do you know if the Republican administration has any plan whatever to keep Soviet missiles from becoming more accurate? Are we working for that in Geneva? Do you know that?

Do you know if the Republican administration has any plan to keep Soviet missiles from becoming quicker and more dangerous in that respect, and more capable of surprise?

Do you know if the Republican administration has any plan to lower the number of quick accurate warheads the Soviets will have ready to attack each and every one of our silos?

And do you know the nature of the war plans under which the Glassjaw MX and our other nuclear weapons would be used? Do you know these things? Have you been briefed on the SIOP, the Single Integrated Operational Plan that governs the way this country would employ its strategic nuclear weapons?

In almost all conversations I have had with my colleagues, I have found the answer to be no. Almost without exception, the administration's support comes from those who say, and may even believe, they support arms control—but who would be unable to tell us exactly what it is they are supporting.

Recently I received a briefing, at my request, from the Arms Control and Disarmament Agency on the Reagan administration's position at Geneva. Since the details of that briefing are classified I will, of course, not discuss them on the floor of the House. Instead, I'll base the remainder of my remarks on those aspects of the administration's START position, which have been previously released.

But I recommend to each Member of this House, each Member who may be watching on the video monitors, and those who will read the CONGRESSIONAL RECORD tomorrow, that you receive this briefing yourselves. It is crucial that you do.

You need not worry about taking much time out of your busy schedules to do it. I say this because the Reagan administration's entire negotiating position can be laid out for you in approximately 30 seconds, or perhaps 40 seconds if the briefer talks slowly. And short as it is on detail, you will find it even shorter on substance.

Most of all, no one will find an arms control reason after seeing or hearing this briefing to support a vote for the MX Glassjaw. And no one will find a reason to give credence to our negotiators when they return to Washington as they always do, to once again peddle new nuclear weapons, as surely they will when the next Glassjaw vote approaches here in the Congress.

Before we go any further down this road, this Orwellian path on which arms race means arms control, I say we should take a very good look at where it will take us.

To take such a look: this is the purpose of this series of special orders which I began on March 20, and which I continue today.

When I began on March 20, I told the House that the Republican administration's national security policies—arms control and weapons combined—are, in strictly military terms, leading our Nation to disaster.

I pointed out how the Republican administration is worshipping at the altar of the false god of weapons "modernization." I pointed out how the Republican administration has failed to consider the other side of the coin; it has turned its eyes away from the unpleasant fact that there is no way we can modernize our nuclear and space weapons without allowing the Soviet Union to do precisely the same thing.

I pointed out how the end result of the next decade of bilateral weapons modernization on both sides will be a radical increase in the Soviet Union's ability to conduct a disarming first strike against us, and a corresponding decrease in our ability to deter such a strike. All this will happen because this administration refuses to give up, under any circumstances, the weapons it desires—even though these weapons will, in light of Soviet countermoves, leave us militarily weaker than we were at the outset.

I pointed out how there is a far better alternative: We can stop Soviet weapons from getting quicker and from getting more accurate. We can do this by shutting off their ballistic missile flight testing as part of a mutual, verifiable negotiated nuclear freeze.

And while I subjected the administration's national security policies to the condemnation they so richly deserve, at the same time I emphasized that none of my criticism was pointed at the hardy band of courageous Republicans who have voted for national security again and again, by casting their votes for the nuclear freeze and against the MX Glassjaw missile. I say it once more: These men and women have voted their consciences in the face of the most intense political pressure, and they have earned the Nation's thanks.

But Ronald Reagan and those who now make national security policy have not earned the Nation's thanks. On the contrary, they have set us on a road leading to ever weaker and weaker deterrence, and ever higher and higher risk of nuclear war.

I know these are serious charges. This afternoon, and in the days to follow, I will document them.

Today I'll begin with the problem of Soviet ICBM attack on our own ICBM silos. We need to understand this in order to judge not only the MX Glassjaw, but the general question of nuclear deterrence.

FREEZING ICBM'S

Our Nation has just over 1,000 ICBM silos scattered across the North Central States. Traditionally, these silos have achieved survivability by the combination of three assets: numbers, dispersion, and hardness.

When we originally built our ICBM silos in the 1960's, we made them so numerous and widely dispersed that the Soviet single-warhead missiles of that time would have had to exhaust themselves had they attempted to attack us. That is, the Soviets would have had to use up at least one of their ICBM's to destroy one of ours. This was clearly an unattractive proposition for the attacker, and contributed to deterrence by discouraging attack.

But we lost the protection of numbers in the mid-1970's, when the Soviets began to put several warheads on each missile. This is the multiple-warhead technology called MIRV. It allows them to threaten to take out several of our missiles while using up only one of theirs.

Under the Nixon administration, in SALT I, we had the chance to keep the Soviets from getting MIRV missiles. We could have prohibited MIRV flight tests, which the Soviets had not yet conducted successfully. But we blew the opportunity.

Acting on precisely the same shortsighted and foolish principles which motivate the Reagan administration today, the Nixon administration was then so determined to build its own MIRV's that it was willing to let the Soviets get theirs as well. As a result, our ICBM silos lost one of their key protections, and our ability to deter attack decreased accordingly.

Years later, Henry Kissinger would say to a congressional committee: "I wish I'd never heard of MIRV."

Mr. Kissinger's hindsight is nice, but foresight would have been better—and safer for America.

Of course, multiple warheads themselves aren't enough to destroy our

silos. These silos are hardened to perhaps 2,000 pounds per square inch, which means they can survive the shock of a nuclear blast unless the explosion is very close—that is, unless the attacking weapon is very accurate.

So America and the Soviet Union are now engaged in a race, pitting the hardness of our silos against the accuracy of their ICBM's.

We're losing this race.

As General Scowcroft, the father of the MX Glassjaw himself, said recently: "In a race between hardness and accuracy, accuracy will always win."

But America doesn't have to run this losing race.

The nuclear freeze the Democrats want can redefine the rules. The freeze produces real military security by locking Soviet first-strike accuracy in place and permitting American silo hardness to move ahead.

In short, the nuclear freeze can preserve and actually increase the survivability of our ICBM silos. And survivability is the very essence of deterrence.

This is how we can halt and even reverse the insecurity through modernization the Reagan administration is imposing on America.

What can we do? Here's our opportunity:

It is a fact that further improvement in Soviet ICBM accuracy will require either new missiles or major improvements to existing models. A Soviet program to develop a new ICBM would require between 20 and 30 flight tests before a war planner would have enough confidence in it to use it in a surprise attack first strike.

But it's also a fact that new missiles cannot be developed without flight testing.

We Democrats seek to prevent that flight testing. We want to do it through a bilateral, verifiable, negotiated nuclear freeze.

And unlike the fantastic trillion-dollar concoction called star wars, the nuclear freeze is free.

Verifying Soviet compliance with a flight-test ban under a freeze would be easy. ICBM flight tests need large, visible preparations; they are easily detected by various types of satellite, aircraft, shipboard, and land-based monitors.

Under the freeze, there would be no way new Soviet ICBM's could be developed to the point at which they could be deployed.

Of course, it is unlikely that no flight tests will mean no change in missile performance forever. A completely static freeze isn't realistic. But neither is it necessary.

Small improvements in the accuracy of existing ICBM's are possible without flight testing. For example, the uncertainty regarding the position of both target and launch point can be decreased by more accurate satellite measurements. And irregularities in the Earth's gravitational field can be further measured and compensated for.

But militarily significant accuracy improvements will require major upgrades in such things as guidance hardware and software, in multiple warhead separation techniques, and in reentry vehicle design. These cannot be deployed untested without the risk of catastrophic failure. Thus, radical Soviet guidance changes that would lead to very high accuracy will be out of the question under the freeze.

Missiles are complex devices, pushing the state of technology to the limit—and sometimes beyond. Without full-system flight testing it's impossible to know with confidence how one component will interact with another. Computer analysis and captive testing are marvelous techniques, but they cannot fully simulate the acceleration, the vibration, the temperature changes, and the component interaction of real flight.

This has been demonstrated by the five new large ballistic missiles which have seen their first test in this decade: the Soviet SS-X-24, SS-X-25, and SS-N-20, and the U.S. MX Pershing 2. Four of these five missiles failed their first flight test.

It's true that some missile components could be secretly tested in military or civilian space vehicles.

But this wouldn't be of much use, since there are differences between such things as the trajectories, the reentry phenomena, and so forth of a space flight on the one hand and a ballistic missile on the other hand.

Moreover, there is the key problem of what weapons designers call the interfaces. That is, experience shows that two component parts of a missile may work fine by themselves, but when you put them together you may find they interact in a way that creates a problem nobody could have predicted. This is why it is impossible to have confidence in the reliability of components which have never been tested together. A guidance system might work fine in a space probe, but fail completely when put into a ballistic missile. This is why both we and the Soviets do so many tests—and why so many early tests fail.

Soviet war planners fully understand that installing a new guidance upgrade and having it fail in the midst of an actual strategic nuclear first strike surprise attack would spoil their whole day. It would leave them vulnerable to devastating U.S. retaliation.

Under the freeze, a Soviet missile designer would have to choose either proven reliability or theoretical accuracy; he could not have both. He could stick with his present force, which is adequate for deterrence and retaliation but not accurate enough for a comprehensive first strike. Alternatively, he could install new, theoretically better but untested components—and risk catastrophic failure.

Neither course leads to a high-confidence first strike. This is precisely the predicament in which Democrats seek to place the Soviets. The freeze will do it.

I repeat: The freeze will make a Soviet surprise attack first strike against our silos far more difficult than any other course we can choose. This is the essence of the national security case for the freeze.

By preventing new Soviet ICBM's and drastically limiting accuracy improvements on present Soviet ICBM's, the freeze will soon stop the decline in the survivability of American ICBM warheads. Even better, the freeze can enable us to harden our targets against frozen Soviet accuracy. In this way, we can dramatically increase the number of American ICBM warheads that would survive a Soviet surprise attack.

That, and only that, is deterrence.

That, and only that, will reduce the danger of nuclear war.

The better our weapons are able to survive attack, the less the chance that they will ever need to do so. The better Mr. Gorbachev knows our weapons can survive, the less the chance that he will be tempted to attack.

At this point, I'm going to insert in the RECORD a table. Using standard calculation methods, this table contrasts U.S. silo-based ICBM warhead survivability under the Republican modernization with that under the freeze that we Democrats support. The table illustrates two modernization cases: with and without satellite guidance. It also shows two freeze cases: with and without the small accuracy improvement that might be possible under a flight-test ban.

The table doesn't deal with cratering effects, because if the missile can crater the silo, as Soviet missiles will be able to do under the Republican modernization but not under the Democratic freeze, survivability will be so low it will be unmeasurable.

The table follows:

TABLE I.—U.S. RELIABLE ICBM WARHEADS SURVIVING WITH MODERNIZATION

[Mid-1990's]

U.S. silo hardness	MX-quality attack	Satellite-guided attack
2,000 psi (present U.S.)	10	<10
6,000 psi (present Soviet)	40	<10
10,000 psi	100	<10
20,000	260	<10

U.S. RELIABLE ICBM WARHEADS SURVIVING WITH A FREEZE

[Mid-1990's]

U.S. silo hardness	Worst case (10 pct Soviet accuracy gain)	Static freeze (no change from 1984)	Rusting missiles (1 pct annual accuracy and reliability loss for 20 years)
2,000 psi (present U.S.)	330	440	660
6,000 psi (present Soviet)	780	910	1,020
10,000 psi	940	1,130	1,160
20,000 psi	1,210	1,370	1,310

Mr. AuCOIN. The table shows that even the theoretical worst case under the freeze will leave us better off than the best we could expect under this thing the Republicans call modernization. And at any given level of silo hardness, the freeze will give us many times more surviving silo-based warheads than we could get from modernization.

Moreover, while this is difficult to quantify, it appears certain that the accuracy and reliability of both sides will decline without flight testing.

Because testing existing ballistic missiles as well as new types will be prohibited, problems in component aging and design will inevitably arise. Some component aging problems can be detected and the components replaced. But high-confidence fixes, especially of design problems, will be impossible without flight testing. And because of the ever-present possibility of defects which will be undetectable and unknown if there is no testing, confidence in accuracy and reliability will decline even more than real capability. General Vessey, the Chairman of the Joint Chiefs of Staff and a Reagan appointee, made this point in testimony before the Defense Appropriations Subcommittee earlier this year.

While loss of confidence in untested weapons will affect both us and the Soviets, it won't affect us equally. For both technical and psychological reasons, loss of confidence in existing weapons will help deterrence and further discourage a Soviet surprise first strike.

Let's look at the technical reasons first.

The fine edge of state-of-the-art accuracy and reliability is essential for a first strike against hard ICBM silos. but this is not what America needs, because we are not a first-strike nation. What we need is a deterrent that can survive, retaliate, and devastate any aggressor, no matter what the aggressor does to stop us. This mission needs weapons that can survive anything the other side can throw at them. It does not need superhigh reliability and accuracy.

The best way to shift the nuclear balance away from first-strike and toward deterrence is to force both sides to let their weapons sit untested.

Whenever I suggest this, I am always asked how we can keep our missiles reliable if we don't test them. This is a good question, but it's only half the question we need to ask.

The other half is this: How can the Soviets keep their missiles reliable if they don't test them?

The answer is, of course, that they can't. If neither side can flight test its missiles, over the years the reliability of these missiles will go down.

At first glance, this might seem to be a bad thing. After all, if we are going to reduce our numbers of nuclear weapons, isn't it essential that those which remain be highly reliable devices in which we have the highest confidence?

Again, this is only half of the essential question. The other half is this: Do we want the Soviet missiles to be highly reliable devices in which they have the highest confidence? Or do we want Soviet missiles to sit and rust?

Putting the two halves of the question together, we must ask ourselves this: Do we want to have reliable weapons so badly that we are willing to let the other side have them too? Or can we gain so much from Soviet weapons unreliability that it's worth letting our own missiles lose reliability as well?

The more you look at these questions, the more clear it becomes that missile unreliability is stabilizing, provided it occurs on both sides.

Here's why:

A first-strike surprise attack is an extremely difficult mission. Everything has to work just right for the aggressor. His targets are difficult to hit, and there are a lot of them. If only a small proportion of the aggressor's weapons fail, he will receive devastating retaliation from the other side's surviving weapons.

In contrast, deterrence by threat of retaliation is an easy mission. The major targets are relatively few, and they're not well protected. We can easily send many warheads against every major economic target in the Soviet Union. If one warhead fails, the target will be destroyed by the second, or the third.

So if we drive reliability down on both sides, if we force both sides to make do with rusty missiles, surprise attack first strike will become more difficult, and deterrence will become easier. This is precisely what we need to do.

Now let's look at the psychological implications of unreliable missiles.

Psychologists tell us that uncertainty has its greatest effect when a choice is available.

Suppose I am in a third-story room in a burning building. There are some bushes underneath my window but I'm not sure how thick they are and I'm not sure I can survive the jump. If the fire is two rooms away, rather than risk the uncertainly of the leap, I'll probably stay where I am. But if the fire is lapping at my feet, I'll have no choice and I'll take my chances with the jump.

The nuclear standoff is just like that.

It is the first striker who has the free choice of whether to use nuclear weapons or not to use them. So he will be deterred by lack of confidence in his untested weapons—and by the prospect of enemy weapons surviving to retaliate. But the victim finds himself with very little choice; he must retaliate, and will do it with whatever weapons he has, whether they have first-strike reliability or not.

General Vessey confirmed this when I asked him about it last year. He agreed that we couldn't have high confidence in our weapons if they hadn't been tested for years. But if the enemy attacks, this won't be a factor. As he put it, we'll just "go with what we have."

So the freeze will let us do what we need to do: we'll be able to deter by threat of retaliation. But it will stop the Russians from doing what we're afraid they might do, which is a Pearl Harbor type surprise attack first strike.

In order to do this, it is essential that the freeze prohibit testing and deployment of all ballistic missiles, not merely of new types. This is necessary both to lower confidence in existing weapons, and to prevent their upgrading.

I don't have much enthusiasm for a freeze that applies only to new types of weapons.

If, for example, testing of the present Soviet SS-18 and SS-19 ICBM's were permitted to continue, there would be little to be gained by shutting off tests of the new SS-24 and SS-25. Although the SS-18 and SS-19 are less reliable because of their liquid fuel, if we let them be tested without restriction, their guidance systems can be upgraded without limit. They can become nearly as effective first-strike devices as any new-type missile. The same applies to submarine-launched ballistic missiles.

This brings me to the next threat we need to look at: the threat of Soviet submarine-launched ballistic missiles attacking our silos. I will examine these in my next special order.

For now, the summary of the two positions on the threat of Soviet ICBM's is clear:

We Democrats have a workable plan to protect our ICBM's from Soviet ICBM's: By shutting off Soviet flight testing through a mutual, verifiable, negotiated freeze we will prevent Soviet ICBM's from becoming more accurate, and we will make them less reliable. Soviet first-strike capability will go down, and U.S. deterrence will

go up as we increase the hardness of our silos and our number of survivable ICBM warheads rises from the present 400 up to well above 1,000.

In contrast, the Republican plan is no plan at all. If the Republican National Security Program is carried out exactly as proposed by Mr. Reagan, America's survivable silo-based ICBM warheads, regardless of hardening, will drop to near zero.

And this is only the beginning. When we consider the threat from Soviet submarine-launched ballistic missiles, which can strike with less warning than can their ICBM's, the military inadequacy of the Republican defense posture is even more dramatic. It stands in stark contrast to the obnoxious chest pounding and nonsensical talk we hear from Republican slogan-writers about America standing tall.

I will examine this in detail during my next special order, which will be 2 weeks from today.

□ 1630

ADVICE TO THE PRIVILEGED ORDERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. GONZALEZ] is recognized for 60 minutes.

Mr. GONZALEZ. Mr. Speaker, once again I rise in pursuit of what I started several months ago here in this forum in my advice to the privileged orders, in this case of America.

I again for the record indicate a little bit of explanation, the historical initial beginning of this phrase, "the advice to privileged orders." As I have said before, it is based upon the exact track or essay that was written by the great revolutionary American, Revolutionary War hero at the time. He was also a chaplain for George Washington's Revolutionary Army. He was also an intellect, and literary figure, internationally established and a poet. He wrote very significant verse and prose which is as apt to us today as it was when it was written in the context of the world as it then existed.

□ 1640

His different appeal was based on his visit to the privileged orders of Europe for the need of revolutionary changes.

Being that at that point the French Revolution was in its beginning phases, because we must never forget that the French Revolution almost quite coincidental with the American Revolution, it was the American Revolution that gave birth to the most radical concept of all in terms of that world and the governments existing, and the form of governments that prevailed in the world at that time.

I think, as I have said before, that is very well reflected in the first five or seven words in the preamble of our U.S. Constitution. It had never been thought that a power, or what is called sovereignty in formal words, would ever be from anybody but a king or a potentate who, in turn, attributed his source of power to God, a divine right. And when the Americans evolved the concept which is still supposedly prevailing with us because our Constitution is supposed to be still in force, and that was that all power emanated from the people, the people of the United States who were forming the Constitution. And in the preamble it sets out the basic reasons for its enactment.

But that was a very revolutionary thought in that world.

Incidentally it was today. As a matter of fact, when the words are used, "We the people" today, we usually read them in the context of what we defined as socialistic or communistic endeavors or movements. But they in turn, even though they are doing so and appealing in the name of the people, usually are appealing so in the name of authoritarian terms, such as the working class, the dictatorship of the proletariat. Then the obverse of that medal, being the fascist corporate type of state which I have always felt would be the greatest source of danger to us in the United States than a communistic or socialistic type of endeavor. On that obverse side we see the actual source of power. And we must remember, and I say by way of parenthesis, Adolph Hitler was the ruling head or standard-bearer of the National Socialistic Party, and Benito Mussolini—now, of course, those names here I think the overwhelming majority, I would say at least 65 percent of the membership of my colleagues in the House, these words have only historical and intellectual significance—but to those of us still around who lived and breathed in the atmosphere and context of that world, very different images are conveyed to us. Whether it was Benito Mussolini, whom today seldom is referred to, and the beginning of what he called the Fascist state or the corporate state, the power, even though he arose on the backs of the laboring class. When Benito Mussolini got started, he got started as a labor union leader. He developed his power on the basis of the working-class element in Italy that catapulted him into power. What happened both in his case as well as in Hitler's, and, of course, in 1917 and 1918 with the advent of the Bolshevik sector of the Russian political parties in power and the evolvement of the Soviet Socialist representatives, in turn predicated on what the jargon or the dialecticians which have always been difficult for me to understand, have predicated on the rule of the working people, the dictatorship of the proletariat; all involved the very antithesis of the concept that the people themselves in the long run are the best judges as to what is best for them. To the extent that we have strayed from that in the United States, we have gotten into very difficult straits.

In my advice to the privileged orders, and as I have said before this includes primarily now my colleagues, because those of us calling ourselves Representatives are now, as a collective body in the Congress of the United States, a rather select, a privileged, if you please, group. Economically the rate of pay places us in that upper apex of the 7 to 10 percent in the United States. And I think this is very, very indicative of why certain things have been happening, why other things have been permitted to happen unquestioned, and why some things are happening now that the Congress should be considering, in my opinion, as matters of first priority, and are not.

I think it is significant to reflect on the fact that with the state of being, where better than one-third of the Members in the other body are calculated to be in the millionaire class, and now a very substantial number of those in the House are in the upper 5 percent stratum of our society as far as income is concerned, and with the corollary advent of the so-called political action PAC's which have invested in the last congressional races more than $130 million, that we now have, in my opinion, the impact of all of these three various current forces now impinging on our political and democratic processes reflected in the legislation and in the quality of legislation, but more importantly in the frustration to obtain action on what is unquestionably vital areas of consideration.

In my appeal to the privileged orders of America, I have said that the greatest and foremost need is for us to remember our revolutionary heritage. Instead we are frigntened at the word "revolution."

And this terrible misconception, as to what the real world is, in our immediate vicinity, to the south of us, particularly and forgetting about the far distances in the other sections of the globe, that it is such a fatal error that as I see the irreversible course of President Ronald Reagan in the judgment decisions made thus far that seem to indicate an irreversible course of action that I see leads us to catastrophe and in what will be a terrible loss, in my opinion an unnecessary loss, of treasury and blood flower of our youth.

□ 1650

More importantly, and I think the most ominous aspect as I see it, is that it will be pitting our children and grandchildren and great-grandchildren into eras of eternal enmity and hostility in this what we call new world.

We will have learned nothing from the experience of the older world, where we have these ancient and preterit hatreds and rivalries, carrying over even to this day and time in which we have, on several occasions, so blithely immersed ourselves, ignoring the history and ignoring the facts involved in that real world.

So that when I hear some of my colleagues express concern about the question of the basic predicate upon which we are now constructing not only our domestic budgetary edifice but our international and above all, our defense.

I have pointed out before to the same privileged orders, because now what Eisenhower called, President Eisenhower called the military-industrial complex is in total sway of these great corporate panjandrums that are interlocked now with all of our vast and powerful international, multinational now, banking and financial corporate structures that the power there now is so vast that as I have said before, and this is not idle talk, and I have always been very conscious in my selection of words, as to their meaning and the gravity of the significance of their use, and have never, never used a word unless very carefully preselected and with a very well-honed idea and thought as to the impact of the significance and the meaning of these words or phrases.

So that when I say that these forces now are in total control of the powers of decision that are basic to a nation's economic, that is, fiscal and monetary well-being, that we really should, here in the Congress, finally, somehow, even if it is perhaps later than we realize, rise and at least try to interpose some of the interests of the greatest number of our citizens in this country; the true and the greatest interests of the greatest number.

I have pointed out that, given this type of control by forces and individuals and collections of individuals who are not accountable to the people; they are not elected; they do not have to be: They control the processes, why should they bother?

As I have pointed out repeatedly, these factors, particularly the financial and banking, have now acquired the power that such men as Thomas Jeffereson and subsequent great Presidents; the one immediately after Thomas Jefferson expressing his great concern that these vested interests not be given the power of what they called the allocation of the nation's credit resources, have indeed now reached the point where for at least two decades, maybe a little bit more but at least two decades, they have been.

In every one of these steps leading to this total acquisition of power, the Congress has either wittingly or unwittingly aided and abetted.

I have pointed out that the biggest fear of such great leaders as Thomas Jefferson and Andrew Jackson and the next, Abraham Lincoln who, on the very week that he died, had this uppermost in his mind of the utmost concern, and said so explicitly in words that those classes of powerful entities surely do not want to recall and kind of shudder at anybody recalling much less uttering them.

Then next, after the 1907-08 depression and financial catastrophe, and the 1913 resulting enactment by the Congress of the Federal Reserve Act of 1913, President Woodrow Wilson, even before the entry of the United States into World War I, was quick to express his apprehension about how the intent had been even in the beginning distorted.

Now when we read the history of the enactment of the Federal Reserve Board Act of 1913, we have to read the history of the activities of what was known as the Pujo Committee, named after a Member of the House of Representatives, Chairman Pujo, who began the initial investigatory and oversight hearings after the fiscal-financial depression in 1908 in this country, the Panic of 1907 and the continuing crisis.

Precisely for the same reason of the panic of the 1860's, the panic of 1837, for example, basically the same reasons, but the difference being that during that period of growth the country had what one thinker called a safety valve, the frontier. We do not have that any longer.

This is why I always thought that President John Kennedy's adoption of his slogan of the day, "the new frontier" was so apt, because this is exactly the terms that we should be using in constructing our concepts of what has to be done in order to bring economic justice to the American people, which certainly nobody can say we really have.

Now at this moment we are being beset by some of the headlines in some cases, and some of the back page stories, with respect to the peculiar class of savings and loan institutions that have a rather disappointing and alarming remembrance of what some of us lived through during the depression era, as we were growing up but still recall vividly.

We are puzzled. Even members of the Committee on Banking—of which I have been a member for 24 years, since I first came up—and actually, I do not know whether to laugh or cry, because it reflects the very things that some of us have been talking out on since 1965. It was obvious then to anybody that studied carefully and just did not let his mind be influenced by special pleading of the special interests, that America was headed for serious trouble.

Also, it would require, not only a reading of but a remembrance of history. History is a seamless web. It is not a neatly compartmentalized series of events. The events today are only the results of things that have anteceded this present day and time.

So that it was obvious in the beginning of the decades of the sixties that the world had changed, that the Europe of the forties and the fifties was a vastly different world.

My first year in this body I had the privilege of sitting in on the first so-called debates on what turned out to be the Kennedy rounds and the adoption of the General Agreement on Tariffs and Trade.

As strong a supporter of President Kennedy, I did not vote for that one gem of legislative program that he presented to the Congress.

□ 1700

And the reason I did not was because of clauses that were incorporated into that agreement that reflected that American interests were going to be very vulnerable and that there would be no way that those manufacturing industrial complexes of our Nation would find themselves competitive, no way. No matter how much they modernized, no matter what innovations were inaugurated for production, and the like, it would be an impossible competitive world. But at that time there were no symptoms overtly, and when I asked the question as to why a certain clause was included in that bill, I received no answer.

My practice and principle ever since I have held a representative elective office—and I might remind my colleagues that that began 33 years ago in the City Council of the city of San Antonio, and then later 5 years in the State senate of the State of Texas, and now about 24 years here on this level—that my principle of behavior has been that if questions of a serious nature cannot be answered satisfactorily, that action that is sought of my vote will not be forthcoming, and either I will vote "no" or I will vote "present."

I might point out for the benefit of the Members here that have not been here this long that I was considered the originator of this concept of voting "present." That vote was unheard of when I came here to the House. But when I saw that bills were brought up from the Ways and Means Committee, tax bills, with a closed rule, that is, nobody could offer amendments, you could not do anything much other than either vote up or vote down, I did not feel that I could support a closed

rule, and I voted no. And then when the bill—at that time we had very few recorded votes—was brought up anyway and passed out on a voice vote, I could not find a way to register my voice as "no" and when they did have a recorded vote, not being able to answer a constituent who might have subsequently asked me, "Well, why did you vote yes?" or "Why did you vote no?" and I not being able to explain, I just voted "present." And for the first year and a half I was here they called me "Mr. Present."

Now, today that is taken for granted, and there are several votes on which we will see that orange light lit up during the yea and nay vote, just a Member recording his vote as "present." I vote that way when I cannot answer exactly why I would vote another way. And that has been a practice of mine, right or wrong.

In this case, I also reflected on the fact that in all of the 9 of 10 volumes of the collected speeches and addresses and writings of President Dwight Eisenhower there is not, and there was not then, one line reflecting the fact that Europe was emerging into what was known as the Common Market or the European Economic Community. And yet my interpretation of the GATT or the Kennedy round or the U.S. Congress' approval of the general agreement of trade and tariff was that it was there because of the realization that Europe was developing this competitive status.

So then, in the 1960's and certainly by the 1970's, the statistics showed me—on my request I obtained these statistics—that whereas the United States had been supplying for the world over 35 percent of food and fiber, Europe soon displaced the United States and the proportion of the European Community was approaching the reduced level of the world share of the United States. So that when I see the continued neglect of these most vital though sometimes they seem to be complex and esoteric, the reality is, my collegues, that they really are not. These are not things that only a selected handful of geniuses can understand. Yes, if you want to follow all of the gobbley-gook or what Shakespeare called hyperbole, 3-plied hyperbole, silken terms—imprecise, I would say, rather than precise—yes, if we want that, then, of course, you will be obfuscated because you will be reading obfuscation. But if you look at the plain meaning of simple words, you will find that these matters are not that complex and that each and every one of us should be responsible for a minimal functional ability to discern and therefore evaluate the issues as they are hitting us.

Now, one other thing is that if the Congress is not informed, then the people cannot be either, and the truth of the matter is that the American people are not informed, and of course we are the delegated agents of the people. Ignorance is no excuse for us and it should not be. But the fact is that if we want to make this a complex area it can become. Anything can.

I remember when I first went to school I did not know a word of English, so I had to stay a whole year in what they used to call the low first. But it was not long before I felt the challenge, mostly inspired by a great public school teacher in the third grade by the name of Miss Mason, and I decided to compete and do the best I could, and I ended up being the spelling champion and later the arithmetic champion. But I remember one teacher, later in high school, when I asked to be given the privilege of taking more than three math courses, and I wanted to take what they called then—I do not know what they call it now—solid geometry, the teacher said, "Well, you have to have a special mind. The trouble with all of these kids going into that class is that the only reasons they are taking it is because they have got to have something, and then after they are in there the teacher has to pass them mostly because of kindness but not because they have learned anything." And that phrase struck me, "You have to have a special kind of mind.'

Well, I developed into a pretty good mathematician. I ended up studying engineering and went through college. I first studied engineering and then studied law and went to law school. But in engineering, the reason I kind of got sucked into that was because of my facination with mathematics. And so I had the equivalent of 4 years of college mathematics at that time. Of course, since then we have had such an explosion in knowledge in mathematics and engineering that I would say every one of us would have to go back to school for at least another 4 years.

Nevertheless, the point I am trying to make is that it is not true anymore than in government we have to have a select chosen few to lead us because they know better. The eternal truth is that always mankind has had two general thoughts with respect to that. One holds that there is a saving remnant, in the words of the English writer Matthew Arnold, and then the other is predicated on what I feel is the basic American concept, and that is that the people themselves in the mass and generally are the best judges as to what is best for them. Yes, maybe a leader will emerge who temporarily may seem to be having the answers, but in the long run it has not worked that way. We in the 20th century should be the greatest witnesses to that, and especially now, but certainly after vast world conflagrations, which some of these so-called misbegotten leaders indulge their nations in, to their catastrophic end, as we are still witnessing, so that when I see that some of these events are not reported to the American people either fully or understandably, such as the recent visit and the address of the British Prime Minister, Mrs. Thatcher, to this joint body, but particularly her visit with our Chief Executive, President Ronald Reagan, to read our press we would have concluded that the only purpose of Mrs. Thatcher's visit was to pronounce her approval of what has been known as President Ronald Reagan's star wars proposition or the strategic defense instrumentality.

□ 1710

The truth is that that was not even a matter of serious discussion. The headlines were not accurate. Mrs. Thatcher had just prior to that made a visit to Moscow, in which she denounced the concept of the eventual use or deployment of such a thing as whatever it is, is meant by star wars.

What she did tell the President and the American public and us here was that she had nothing against studying the proposition. Research, not development. Research and study. But the most important, impelling reason for her visit was economics; international, and the fact that the United States had reached a point where its leaders in Government, whether the Secretary of the Treasury or the President under this current administration, it appears to be the President. But who in turn appears to be making his decision on the basis of a coterie of very close and intimate advisers, who, in turn, through the years have reflected a very definite philosophy of government that is not exactly democratic.

So that all of that was lost. Then came the trip to the so-called economic summit meeting in Bonn. This year, it was the turn for the West German Government to be the host, as it was in 1979, when President Jimmy Carter made the trip to Bonn for the same purpose. It was one of the first so-called economic summit meetings.

But what is the real purpose? National leaders from these other countries do not make those trips in order to exchange pleasantries; they do not make those trips in order to have the President have the opportunity to put on his boots and ride horseback in Buckingham Palace. They have very definite purposes. Because all the time these nations and their leaders have first and foremost the national interests of their constituencies first and foremost.

In our case, we do not even report to the American people any more than the secret meetings between the Chairman of the Federal Reserve Board and the President of the United States are communicated to the

people. Certainly not to the Congress; much less to the people. Yet, these are of vital significance.

For example, in 1979, as I have been saying here, and, incidentally, and I might say for the record, that the only voice that has even mentioned such things as the ECU, the European currency unit; or the EMS, the European monetary system, has been this voice, in the entire American Congress.

Now, I do not take pride in that; it disturbs me. I am concerned, as I have been very worried; and I have been very worried since 1965, and particularly 1966 and the credit crunch of that year in the summer of 1966. It was self-evident to me that unless our leaders, whether it was in the White House or in the Congress, took cognizance of what was plainly the handwriting on the wall that we were headed for very turbulent and very disastrous involvements.

Money, trade, exchange rates, most of us have a good idea or a fair idea of what money, trade, international trade, exchange rates, international exchange rates, may be a little bit more, what the professors call esoteric. That is, mysterious or not generally understood.

Interest rates. Most of us think we know what we are talking about when we say interest rates. But unless we have occasion to have real need for a line of credit in business, even a $1,000 or a $3,000 line of credit for say, a small, small businessman's inventory. Unless you do and realize that you are going to have to work awfully hard and you are going to have to be almost working for the bank that lends you that money, if you have to pay back back at a 16-percent, 17-percent, 15-percent, even an 11.5-percent rate. Always through history these were considered usurious, extortionate, illegal.

I am sure that many of my colleagues, and I know many of the citizens that I come into contact with over the years, whether in my own district or in the State or outside of the State, seem to think that there are laws on the books that protect them against usury. When I explain to them that there is no such thing, they cannot quite understand. They say, "When did this happen?"

Well, I have gone into that so many times I will not go into it now. I just want to make the point that money, interest rates, trade, exchange rates all are inseparable. They are like history: A seamless web of economic activity. Interest rates, I have defined. I have not seen an economist define it that way. So I will take full responsibility, as I say I always do, for my words. I believe that any man that is in an activity in which words are the indispensable tool, should be very responsible for every word uttered, and that, I have tried to be. In, as I have said, 33 years of elective office experience.

So that when I point out that these things are a seamless web, and I have pointed out some of the impact of what we call the external, that is, those things that are happening outside our shores, those forces, whether in Europe or in Japan or in Asia, or in the New World; North and South America. It makes no difference. We now are impacted to such a point that no matter what we do domestically, we can talk all we want to about balancing the budget. We can talk all we want to and we can, through jiggery-pokery say, well, here is a balanced budget or here is a budget resolution that will reduce the deficit. Nobody is even talking any more about a balanced budget. They are talking about reducing a domestic budget forgetting that the really big issue is that international trade and what they call current payments and interest deficit that is costing American jobs every day in the thousands.

We ended up, December 1984 with the most monstrous international trade deficit in the history of any country or combination of countries; $140 billion. I estimate that for every $10 billion of that $140 billion American have lost one-quarter of a million jobs permanently.

When the President was going over to the summit and arrived in Bonn, our newspapers had, some had it front page; some had it in inside pages, the announcement that unemployment had not gone down; that, as a matter of fact, they said it in a reverse sort of a way. It had gone up, but the most significant thing that I never thought under this new, jiggery-pokery way of figuring out the statistics would be admitted to, was that we had a total number of jobs less than before.

□ 1720

I am sure this had an impact in Europe because the President was going over to say how Reaganomics had brought prosperity, but at the same time, the week before, the Vice Chairman, or the equivalent of the Vice Chairman of the Federal Reserve Board, Preston Martin, in weasel words was saying we have now a depression in recovery, we have a depressed recovery. I have never heard a more contradictory use of words than that one. I marveled at the Vice Chairman's use of words.

What he was saying was that now you cannot hide the fact. The so-called Reagan recovery, which I have said all along was a delusion, the so-called control of inflation. Where has inflation been deflated? In the basic cost of living? Have rents gone down? Are they deflated? What I read is that they go up constantly, and I am chairman of the Subcommittee on Housing and Community Development, so I think I ought to know these statistics.

Has the price of groceries gone down? Are we paying less for groceries? Well, I will tell you that I would have a hard time, as I did when the colleagues from the other side were boasting about a recovery and inflation having been controlled, I defy them to go home and explain to my wife where the groceries have gone down; in fact, prove that they had not gone up.

The truth is that when it comes to the basic cost of living, we are in a constant and an inflationary situation. Wages, and the median average wages received by American workers, have gone down, not stabilized. It is less than it was in 1981, certainly less than it was in 1975, and this was when we were coming out of the then so-called dip or recession.

The significant thing is that at the bottom of this is this question of interest rates. I define interest as that mechanism by virtue of which wealth is transferred within a society. This fact was known as far back as 7,000 years before Christ, in the Code of Hammurabi. We read absolute, strict prohibitions on what we define as usury. At the time of Jesus Christ himself, usury was punishable, in certain areas by death.

So all through history that particular force which we call interest rates is something that has had to be controlled, and the reason is simple. The reason we have government is that those forces in our human existence that would destroy others needed the control of the collective defense of the people. This is why we have government. If government ceases to protect the people in their personal safety, and we have areas in our country today, I have some in my district that I have gone to the grand jury since 1970 because of the fear in which entire neigborhoods have lived and with no adequate police protection, that is, no State protection, no governmental assurance that they are safe in life and limb in their own homes.

These things do not occur happenstance. There are causes, and the basic cause, for most if not every one of the maladjustments we read about are predicated on the extortionate, sinful, I say criminal interest rates that have flagellated America now for quite a few years unbelievably. In 1966, when I first addressed a letter to the then President of the United States, I did not get much attention because interest rates were not much over 6 percent and nobody seemed to think that there was any reason to be concerned. It was to no avail that I reminded my colleagues then, and the President, that there was no force that would be around to prevent an inordinate increase. I remember the chairman of

the full Committee on Banking then saying, "Henry, you are overexercised. I cannot see interest rates ever going even as high as 7 percent." Well, I am sure he has turned over in his grave 50 times since 1980 when the prime interest rate went to 21 percent.

Now, what happened in the interval? The statistics are a sorry, sorry story. We have had as great or a greater number of businessess go broke, disappear, than ever since the depression. Our international trade balance, which means jobs to America, permanent jobs have been lost. For the first time, as of 1984, since Teddy Roosevelt's days, the United States is a debtor nation. We were not and had not been since about 1914. As a matter of fact, when Teddy Roosevelt did bring about the construction of the Panama Canal after the French failure, we had to go to Paris, France, to get the capital, about $40 million, in order to be able to construct the canal.

We are now a debtor nation for the first time since 1914, but more importantly, we are back in what I say is the equivalent of what was happening during the time of the American Revolution, and one of the basic reasons for the American Revolution was the mercantile system, where the colonies were supposed to be the dumping ground, the consumer, and any kind of manufactured article or goods would have to come from the mother country at a price that was so high that it finally led to revolution. American merchants and beginning manufacturers could not see why, with the use of the materials that we were sending to the mother country, that we, ourselves, could not manufacture, although in the beginning they may have been of a little bit more inferior quality, at about one-tenth of the price of what was having to be paid for this imported goods from the mother country.

We are in that situation now with respect to Europe. As I have pointed out, in 1979, the communique that came out of the economic summit meeting of 1979, the last sentence of that communique, I doubt that anybody in the general public or in the Congress paid attention to it, but it had one significant sentence. It said the signatories agreed to the development of the ECU, the European currency unit, and the EMS, the European monetary system.

Even though everything we read about President Reagan's trip to the Bonn economic summit meeting earlier this month had to do with the controversy about the visit to Bitburg, and then the big headline on the Sunday at the conclusion of the conference that France single handedly had not agreed to go along with what—with some vaguely reported trade agreements as to free trade and the like, and that kind of stuff.

But the real thing, as I reported to my colleagues in the RECORD before the summit meeting, late last month and the first week of this month, was that the finance ministers of the Group of 6 or Group of 10, depending on what you want to call the real powers of the European Community had had a meeting.

□ 1730

I am the only one that I know that reported this meeting, either in the American press or, much less, to the Congress, and that was that on April 13 and April 14, in Palermo, Sicily, the finance ministers of these six countries met and agreed to carry out the agreement they had reached sometime before April 13 and April 14 in Basel, Switzerland. And that was to put real significance and meaning into the European currency unit and to, therefore, put life into the European monetary system in order to decouple Western Europe from the U.S. economy.

Now, at the Palermo meeting the six ministers definitely decided to convert the ECU [European currency unit] into an international reserve instrument to compete with the dollar. The ECU, in short, is the accounting unit for the Eurpoean currencies. Their collateral action taken with respect to the EMS [European monetary system] was to provide for the first expansion of EMS, which would allow non-European central banks to hold ECU's [European currency units] which means then that the dollar is done in as the international currency unit.

What does that mean to us? Well, I think we have to go back and see what the catastrophic and monstrous international trade deficit has already done to us. The report that we saw the same day the President left for Bonn was that unemployment in effect, they were saying, has increased. It has not gone down any, and the President's story about how many jobs had been produced was fallacious; it was in error. We have lost jobs, most of them permanently, because of the fact that we have become a consumer, not a producing nation.

Who would have thought, for instance, that the American machine tool industry was in such a state of defunction as was presented to us in the Small Business Committee early last year by one of the spokesmen for the American machine tool industry? Well, let us see why. Designs for machine tools come from abroad, the parts are made in several countries, they are assembled in several others, and then the United States markets them with brand name firms. What that means is that all those jobs which we used to have in our machine tool industry, which used to be the leader, the pride of the world—this was what Franklin Roosevelt called the "arsenal of democracy" during World War II—are gone.

Another item is research and development. Pratt & Whitney joined Rolls Royce. For what? For new engine technology.

The almost totally nationalized nation of France signed agreements with 17 universities in our country to research robotics and the so-called artificial intelligence, and, therefore, France now has outcompeted us in such things as satellite communication, in which we were first, in which we had initial leadership until this year. France's and West Germany's imports into the United States just in 6 months of last year, the last 6 months, increased incrementally 20 percent. AT&T, ITT, and IBM compete for hookup with foreign firms, with Japan's Nippon Telephone and Telegraphic and Italy's Olivetti on their terms.

The reason? Again we go back to that old devil, interest rates.

Why are the S&L's in Ohio and, after that, in Maryland, in trouble? And there is one other State that has this kind of unique, S&L, State-initiated, State-supported, ostensibly State-regulated system. What is the condition of what we call our regular S&L's? Well, I would say at this point that over 70 percent of them are in serious trouble.

Why is that? Why does it appear to have happened all of a sudden? We have been trying to address this issue since 1966, and very specifically since the 1970's, and more specifically just 3 years ago, in 1982, when the Congress approved what now is called the Garn-St Germain bill, which was supposed to be almost exclusively for the purpose of saving the S&L's then.

I had the very distasteful lot to appear before the Rules Committee in opposition to my chairman, whom I respect highly and of whom I am glad to be a loyal supporter, as the ranking member of the Banking Committee. But why did I do so? Because in that bill Congress was enabled to really seal their fate. We no longer have a savings and loan system in our country.

Savings and loans were especially created along about 1940 for the purpose of housing Americans, constructing homes, and enabling Americans to purchase those homes at affordable prices through the use of a special credit allocation mechanism known as a savings and loan. They had certain privileges and subsidies that set them apart. But then came the advent of the money manias of the 1970's and the 1980's, the so-called real estate investment trusts, which today are one prime cause of this instability of the S&L's but which are now a demon because, instead of the old REIT's, the real estate investment trusts that were the scandals 10 years ago that were in

the private area, now they have mixed in the Government through the Government securities speculative markets, and we are really facing real, real serious problems and dilemmas, with nobody that I know specifically addressing the issue except as a post mortem—like after the Penn Square failure in Oklahoma and the Continental Illinois.

I do not know what any responsible Member of this Congress or any American leader is waiting for, but we have now more than the handwriting. We had the handwriting on the wall, as I saw it, in 1966. What we have now is the fulfillment of a rather direful and sorrowful prediction that we so unhappily felt compelled to make in the 1960's, the 1970's, and later in the 1980's. And what we have is this: We have the taxpayer investing $6 billion in order to save the Continental Illinois but in effect nationalizing the bank. We like to think that does not happen in the United States, that happens in other countries, that we do not nationalize. But we in effect did.

But look at the sorrowful tale. Even the post mortem here I deplore. I feel that we do not need post mortems unless they can lead to actions. Rather than post mortem actions, I like anticipatory actions. This is what I have been advocating, because not only have I been pointing out dangers and problems and deplored situations, I have offered specific suggestions by way of legislative proposals and other suggestions. I am on the record on that, and this is the reason I am on the record today, because, as I see it, we are on the verge of a teetering situation that we should anticipate.

The SPEAKER pro tempore. The time of the distinguished gentleman from Texas [Mr. GONZALEZ] has expired.

□ 1740

INTRODUCTION OF NUCLEAR WASTE LIABILITY LEGISLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington [Mr. MORRISON] is recognized for 30 minutes.

● Mr. MORRISON of Washington. Mr. Speaker, today, I am introducing important legislation which establishes liability and indemnification for nuclear incidents arising out of Federal storage, disposal, and transportation of high-level radioactive waste and spent nuclear fuel. This bill amends the Price-Anderson Act to ensure that the Federal Government, through its Federal contractors, assumes responsibility to provide total indemnification for public liability claims resulting from nuclear waste disposal activities.

The original cosponsors of this legislation are: NORMAN DICKS, ROD CHANDLER, BARBARA VUCANOVICH, HARRY REID, BEAU BOULTER, and LARRY COMBEST.

This bill, "The Federal Nuclear Waste Disposal Liability Act of 1985," addresses a troubling concern voiced by the States now involved in the site selection process for disposal of high-level nuclear waste and spent nuclear fuel. That concern simply expressed is: "Who has liability in the event of an accident and for how much?" While most authorities acknowledge only the remote risk of a nuclear waste incident resulting in substantial damages, that risk is ever present and is a driving force in any negotiations on nuclear waste. This is why we need to resolve the nuclear waste liability issue now as the affected States and the Federal Government work together to make the critical decisions on site selection.

However, the current laws governing nuclear waste and nuclear liability matters—the Nuclear Waste Policy Act of 1982 and the Price-Anderson Act of 1957 as amended—do not clearly settle who is responsible for such nuclear waste incidents and to what extent. The bill I am introducing today is intended to clarify this ambiguity by putting the brunt of the responsibility where it belongs—squarely on the Federal Government.

My bill accomplishes this objective by making two fundamental statutory changes.

First, the Price-Anderson Act is amended to eliminate the current $500 million liability ceiling for those Federal contractors engaged in nuclear waste disposal activities. With the existing liability cap, those parties injured from incidents related to the disposal of nuclear waste could not recover directly more than $500 million under the Price-Anderson mechanism. This limited notion of liability is an anathema to the States and other affected parties. The liability cap has become one of the major roadblocks threatening to sidetrack cooperation between the affected States and the Federal Government in the site selection process. In my mind, it is irresponsible for the Federal Government not to accept unlimited liability when they are taking title to spent nuclear fuel, managing its storage and disposal, and selecting and siting permanent repository sites.

Second, the bill sets up a two-tier system for payment of liability claims. The initial source for payment of liability claims—up to $5 billion—will be the nuclear waste trust fund established in the Nuclear Waste Policy Act of 1982. This fund, which can be adjusted accordingly, represents a ready pool of cash for paying claims. The fund is the appropriate source for payment of initial liability claims since it is essentially a user fee made up of revenues received from the generators of high-level nuclear waste. The second compensation tier for those liability claims in excess of $5 billion will be general Federal revenues.

I hope this legislation and other good-faith efforts to resolve the liability question will be a symbol of the continuing willingness of the Federal Government and the affected States to work out in a cooperative fashion potential areas of conflict and disagreement. For if the cooperation between the various entities—a hallmark of the act—is lost, the complete unravelling of the nuclear waste site selection process is not far behind.

A section-by-section summary of the bill as well as a copy of the legislation follow:

SECTION-BY-SECTION SUMMARY OF NUCLEAR WASTE LIABILITY BILL

SECTION 1.—SHORT TITLE

The bill is called "The Federal Nuclear Waste Disposal Liability Act of 1985".

SECTION 2.—FINDINGS AND PURPOSE

The Congress finds that the Federal Government currently does not, but should, assume the responsibility to provide total indemnification for public liability claims arising out nuclear waste disposal activities, including interim storage, transportation, and ultimate repository disposal. The Congress also finds that such indemnification should in part be paid out the Nuclear Waste Fund which consists of revenues obtained on a ratable basis from the generators of hgh-level nuclear waste and spent nuclear fuel.

The purpose of this Act is to amend the Price-Anderson Act to ensure that the federal government assumes the responsibility to provide, in part through the use of the Nuclear Waste Fund, total indemnification for public liability claims resulting from nuclear waste disposal activities.

SECTION 3.—FEDERAL NUCLEAR WASTE LIABILITY AND INDEMNIFICATION

A new paragraph (2) is added to Section 170d. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(d)) which mandates that:

(a) the Secretary of energy shall enter into indemnification agreements with all federal contractors carrying out nuclear waste disposal activities outlined in the Nuclear Waste Policy Act of 1982;

(b) in these nuclear waste federal contractor indemnification agreements, there shall be no cap on the amount of liability for which the federal government is responsible; and

(c) such payments required under the indemnification agreements shall be paid from amounts available in the Nuclear Waste Fund established in section 302 of the Nuclear Waste Policy Act, except that the amount available from the fund shall not exceed $5 billion per incident. Liability amounts in excess of $5 billion will be provided directly from general federal revenues.

Finally, the bill amends section 170n(1)(c) of the Atomic Energy Act sc that the waiver of defenses available for extraordinary nuclear occurrences are also applicable to those activities related to the disposal of nuclear byproduct material.

H.R. 2524

A bill to amend the Price-Anderson provisions of the Atomic Energy Act of 1954 to establish liability and indemnification for nuclear incidents arising out of Federal storage, disposal, or related transportation of high-level radioactive waste and spent nuclear fuel

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as "The Federal Nuclear Waste Disposal Liability Act of 1985".

SEC. 2. FINDINGS AND PURPOSE.

(a) FINDINGS.—The Congress finds that—

(1) the Federal Government currently does not, but should, assume the responsibility to provide total indemnification for public liability claims arising out of nuclear incidents relating to Federal storage, disposal, and related transportation of high-level radioactive waste and spent nuclear fuel; and

(2) such indemnification should be made in part from amounts available through the Nuclear Waste Fund established in section 302 of the Nuclear Waste Policy Act of 1982 (42 U.S.C. 10222).

(b) PURPOSE.—The purpose of this Act is to amend the Price-Anderson provisions of the Atomic Energy Act of 1954 (42 U.S.C. 2011 et seq.) to ensure that the Federal Government assumes the resonsibility to provide, in part through the use of the Nuclear Waste Fund, total indemnification for public liability claims arising out of nuclear incidents relating to Federal storage, disposal, and related transportation of high-level radioactive waste and spent nuclear fuel.

SEC. 3. FEDERAL NUCLEAR WASTE LIABILITY AND INDEMNIFICATION.

(a) LIABILITY AND INDEMNIFICATION FOR ACTIVITIES UNDER NUCLEAR WASTE POLICY ACT OF 1982.—Section 170 d. of the Atomic Energy Act of 1954 (42 U.S.C. 2210(d)) is amended—

(1) by inserting "(1)" after the subsection designation; and

(2) by adding at the end thereof the following new paragraph:

"(2 (A) The Secretary of Energy shall enter into agreements of indemnification with each contractor of the Secretary carrying out contractual activities pursuant to the Nuclear Waste Policy Act of 1982 (42 U.S.C. 10101 et seq.).

"(B) In such agreements of indemnification, the Secretary of Energy shall, notwithstanding the provisions of subsection e., indemnify the persons indemnified against claims for public liability for nuclear incidents arising out of or in connection with contractual activities pursuant to the Nuclear Waste Policy Act of 1982 (42 U.S.C. 10101 et seq.), including the storage, disposal, and related transportation of high-level radioactive waste and spent nuclear fuel.

"(C) The Secretary of Energy shall make any payments required under an agreement of indemnification entered into under this paragraph from amounts available through the Nuclear Waste Fund established in section 302 of the Nuclear Waste Policy Act of 1982 (42 U.S.C. 10222), except that the aggregate amount of payments made from amounts available through the Nuclear Waste Fund shall not exceed $5,000,000,000 in connection with each nuclear incident.".

(b) APPLICABILITY OF WAIVER OF DEFENSES REQUIREMENT TO LIABILITY FOR FEDERAL NUCLEAR WASTE ACTIVITIES.—Section 170n.(1)(c) of the Atomic Energy Act of 1954 (42 U.S.C. 2210(n)(1)(c)) is amended by striking out "a device utilizing".●

SOCIAL SECURITY COLA'S SHOULD NOT BE ELIMINATED

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from California [Mrs. BURTON] is recognized for 10 minutes.

● Mrs. BURTON of California. Mr. Speaker, like many of my colleagues, I was deeply disturbed that the President decided to retreat from his promise not to reduce Social Security benefits. The budget resolution passed by the other body, and supported by President Reagan, eliminates Social Security COLA's for 1 year. According to the Congressional Budget Office, over 600,000 senior citizens would fall below the poverty line as a result of such an action. We cannot let that happen.

In our efforts to reduce the deficit, there are those who have spoken forcefully against any cuts in defense spending. Yesterday, our colleague LES ASPIN informed us that defense spending has been overestimated by $9 billion. I think it is clear that we could hold down defense spending without weakening our national defense. The same is not true for Social Security cuts. Hundreds of thousands of people will suffer from such an action. Our elderly and disabled populations are least able to bear the financial burden of the President's deficit reduction plans.

LEGISLATION TO ACCELERATE PUBLIC RELEASE OF PROCEEDINGS OF INVESTIGATION OF ASSASSINATIONS OF PRESIDENT KENNEDY AND MARTIN LUTHER KING, JR.

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut [Mr. MCKINNEY] is recognized for 15 minutes.

● Mr. MCKINNEY. Mr. Speaker, today I am joining my colleagues from the former House Select Committee on Assassinations [SCOA] and many other Members to introduce a bill to accelerate the public release of the proceedings of the committee's investigation into the assassinations of President John F. Kennedy and Dr. Martin Luther King, Jr. The release of these carefully screened documents will complete the job the committee originally set out to do—shed light on all aspects of the assassinations and put to rest public speculation on these tragic events.

Because of time and funding constraints, the select committee did not meet to oversee the release of its records after submitting the final report on its findings, and the records became embargoed for 50 years in accordance with House tradition. Our resolution simply would direct the Clerk of the House to permit the Archivist of the United States to release, for public use, the committee proceedings, in accordance with the intent of the committee.

The proceedings of the Select Committee on Assassinations currently are the only collection of investigatory records on the Kennedy and King cases which have not been reviewed and released for public access. Over 90 percent of the proceeding of the President's Commission on the Assassination of President Kennedy, better known as the Warren Commission, have been available for years to scholars, historians, journalists, and the interested public. These records were made available by a special direction of President Johnson which waived the 75-year National Archives holding rule. My colleagues and I believe that the House of Representatives should show the same respect for open government and freedom of information and begin the release of appropriate Select Committee on Assassinations' records.

I can assure my colleagues that sensitive material would not be made public under this resolution, as it explicitly adopts guidelines used by the National Archives for processing the Warren Commission's records. These guidelines prevent the release of information that:

Would be detrimental to enforcement of U.S. law; might reveal the identity of confidential sources or jeopardize future investigations; or might embarrass innocent individuals.

This resolution also prohibits the release of records from any proceedings that the committee voted to keep secret or where confidentiality was guaranteed to a witness in executive session. The committee had strict and explicit rules regarding the designation and segregation of classified material, and these rules would be honored, without exception.

Last session, a similar resolution (H. Res. 160) was reviewed by the full Committee on House Administration. The suggestions made by the committee at that time have been incorporated into the resolution I am now introducing. In response to concerns raised, authority to disapprove the release of any record will remain with the Clerk of the House, who is directed to apply the standards established by the Warren Commission. This session's resolution also exempts records inconsistent with the privileges of the House from release, so as not to prejudice the House as an institution.

The opening up of these important documents would serve two purposes: It would assist those with a scholarly or personal interest in the lives of these two men; and it would allow the public to assess the performance and

conclusions of the Select Committee on Assassinations. I believe that the unique nature of this committee lends itself to a special consideration of the benefits of making these proceedings public, without jeopardizing those who testified under guarantee of confidentiality.

Finally, I hardly need to remind my colleagues that President John F. Kennedy and Dr. Martin Luther King, Jr., both were eloquent advocates of honest government and the value of an educated citizenry. Passing this resolution and releasing the records of the Select Committee on Assassinations would be a most worthy testament to the ideals for which these two men stood.●

DASH TO MANAGUA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. RITTER] is recognized for 60 minutes.

Mr. RITTER. Mr. Speaker, my colleagues and those who are watching this program, I would like to introduce an item that was published in today's Washington Post. It is an editorial by Rowland Evans and Robert Novak. It is entitled "Dash to Managua."

This editorial is disturbing. It is disturbing for reasons that are both constitutional and political. It is disturbing for reasons that are also related to the safety of the United States of America.

The constitutional question involves the Logan Act, the idea that the President and the executive branch makes foreign policy.

The political question involves the idea that Members of Congress are conducting foreign policy with a government hostile to the United States of America. Let me just read a little bit from this editorial today:

No sooner had President Daniel Ortega flown off to Moscow than two Democratic congressmen arrived in Managua for the weekend to plead, according to U.S. diplomatic cables, for help from the Marxist-Leninist regime in calming the congressional uproar over the Nicaraguan's telltale trip.

I ask you, what in the world are two Members of the United States House of Representatives doing in Managua, Nicaragua, pleading for help on a sensitive political issue from government leaders with expressed hostility to the Government of the United States?

Representatives GEORGE MILLER of California and DAVID BONIOR of Michigan, I might add, two individuals for whom I have respect and whose patriotism I do not question, going on with the quote:

Reps. George Miller of California and David Bonior of Michigan say "no comment" on their "private conversations" with Sandinista leaders, from which U.S. Embassy officials were excluded. But cables reporting on their talks have surfaced on Capitol Hill, where we obtained them. They describe the congressmen as making the trip to "see what the [Nicaraguan] government could do to help them out of a difficult political situation in the House."

Again, one has to ask the question, what in the world are two Democratic—or any Members of this House of Representatives—doing asking a Marxist-Leninist dictatorship for assistance in helping them to solve a difficult political situation in the House?

An unnamed member of the congressional delegation is quoted as advising Foreign Ministry officials that the regime should try and hold out for three more years because things back in Washington might radically change by then, meaning a new administration in power. Departing from his "no comment" rule, Miller told us that no such statements were made.

I think we have to question those kinds of comments. For two U.S. Congressmen to essentially hold out hope that in another political time, at another political day this Marxist-Leninist Soviet-backed regime would receive a much more favorable review from the administration, supposedly I guess a Democratic administration at that point in the future, I think is ludicrous.

As a matter of fact, I am outraged. I think the American people are outraged.

Going back to the article:

A House Democratic leader, who did not want his name used, said he was "uncomfortable" that their weekend in Managua brought Miller-Bonior "dangerously close to negotiations."

The Logan Act expressly prohibits the carrying on of foreign policy by citizens outside of the executive branch. It states as follows:

Any citizen of the United States, wherever he may be, who, without authority of the United States—

And I would suspect that the authority of the United States is referring to either the President or perhaps a Presidential congressional mandate—

directly or indirectly commences or carries on any correspondence or intercourse with any foreign government or any officer or agent thereof, with intent to influence the measures or conduct of any foreign government or any officer or agent thereof, in relation to any disputes or controversies with the United States, or defeat the measures of the United States, shall be fined not more than $5,000 or imprisoned not more than 3 years, or both.

Now, I think these gentlemen, whom I respect, are perilously close to violating the Logan Act, if not having already violated it.

Going back to the Evans and Novak article, it states:

But beyond the impropriety of congressmen playing diplomat is a grosser spectacle: a symbiotic relationship between American politicians and the Nicaraguan dictatorship.

Miller and Bonior dashed off to Managua as many Democratic colleagues fretted over Ortega's mission to Moscow immediately after the House vetoed any aid to anti-Sandinista guerrillas.

Now, I am not sure whether they fretted over Ortega's visit to Moscow and his intimate relations with the Soviet Union or whether they fretted over Ortega's timing.

Frankly, I would hope and I would suspect that most Members of this House fretted over the fact that we had just turned down $14 million in nonlethal assistance to the democratic—with a small "d"—forces fighting the Marxist-Leninists in Nicaragua and Ortega the next day is off to collect $200 million from his Soviet allies, including not only economic aid but heavy equipment and hardware and the kind of things that most certainly can be characterized as military aid. In any event, we do not know the details of the $200 million agreement and Mr. Ortega or Mr. Ortega's if not supporters in this Congress, those who voted against his opponents, have certainly not stated what is in that $200 million aid package.

□ 1750

Miller was accompanied by a staffer, Cynthia Arnson, "a prominent champion of the Sandinistas." I am quoting the Evans and Novak column. "* * * formerly employed by the" according to Evans and Novak, "left-wing Institute for Policy Studies."

I am going on to another paragraph in the article. It says, "In a departure from tradition but true to the latest fashion of pro-Sandinista Congressmen, U.S. Embassy officials were barred from the meetings."

For the life of me I cannot understand how in discussions with a hostile foreign power our own Members of this House are barring our own public service diplomats who are on the scene in this area.

"Miller informed the Embassy he had told Ramirez," Sergio Ramirez is the Vice President, "that he had told Ramirez the regime would have to ease censorship and allow what were termed democratic activities to keep the support of Democrats in Washington."

You know, I think we have to be careful here. I am all for substantive changes that conform to the promises that the Sandinistas made to the Organization of American States. I am all for those kinds of democratic, small "d," promises that the Sandinistas made to their own people in coming to power in 1979.

But I have to seriously question cosmetic changes that somehow are designed to gain 3 years of breathing space until a new administration is in Washington.

But reports from Nicaraguan sources, as reflected in tables being read on Capitol Hill, suggested the Congressmen were less interested in liberalization for its own sake than in getting themselves off the political hook back home.

One well placed source had the Congressmen warning that unless the Nicaraguan Government took steps toward pluralism, Congressional Democrats would switch and vote aid for the Contras. It was a second such source that quoted the Congressmen asking the Sandinistas to "help them out of a difficult political situation."

We, the Representatives of the American people, are interested in a pluralistic democratic Nicaragua that is not a threat to its neighbors, that will not destabilize the region, that is not flying off after a favorable vote in the United States Congress to gain $200 million in assistance from our Soviet adversaries. That is what we are interested in.

We are not interested in cosmetic changes to "help us out of a difficult political situation."

"The one meeting Embassy officials attended was with Jaime Chamorro, editor of the anti-Sandinista La Prensa. Miller told the embattled newspaperman that he had urged on government officials the necessity of freedom of the press. Chamorro was not impressed. La Prensa would not accept a separate agreement with the government, he said, insisting that freedom of the press must be part of a national 'dialog.'"

Again, the conflict between cosmetic changes to help U.S. Congressmen out of a political jam, and substantive changes designed to promote a free, open, and democratic and pluralistic Nicaragua.

"The MILLER-BONIOR weekend in Managua follows a pattern."

I will not mention Members of the other body, but two Democratic Members of the other body conferred with Ortega in Managua before the House vote. "* * * they not only barred U.S. diplomats but did not even report to them after the fact, as MILLER and BONIOR did." And I commend my colleagues for at least reporting back to their own Government officials.

"The Sandinista regime's offer to send 100—out of 2,000—Cubans back home followed secret negotiations not with U.S. diplomats but with congressional staffers."

I am sorry, but the way I look at it, congressional staffers should not be negotiating with hostile foreign powers. I frankly do not believe, and I do not think the American people believe either that U.S. Congressman separately should be negotiating with hostile foreign powers. Congressional staffers are to give information and provide research, and to do leg work for Congressmen. They are not to act as diplomats.

"The pattern may be breaking," it goes on to say in the Evans and Novak article, "partly because freelance congressional diplomacy is stirring bipartisan distate, Bernard Aronson, a Democratic insider and campaign adviser to Geraldine Ferraro last fall, writes in the current New Republic that his party should promise military support for the armed democratic resistance if all other efforts fail. That advice is the antithesis of Democrats, pursuing cosmetic Sandinista 'pluralism' while urging the comandantes to hang tough until the next American Presidential election."

I think what is at stake here is something much broader than this one incident. Aside from the conduct of American foreign policy in some reasonably unified fashion, what is at stake is the future of the Democratic Party.

Since the defeat of Mr. Mondale in the fall elections, a variety of Democrats have been holding meetings, conducting seminars, speaking publicly and amongst themselves on how to move their party back into the mainstream of American politics, how to move their party back into the broad center of American politics that wins national elections, that wins Presidential elections. These discussions have focused in many cases on the economy and the management of the economy and how Democrats must cease to be perceived, and really must cease to be simply the voice of fractionated special interest groups seeking their own advantage in Washington, DC.

These discussions have ranged to defense policy and to foreign policy. I can think of no greater symbol of the continuing dominance of a fringe element in democratic foreign policy than this recent vote in the House on the denial of assistance to the freedom fighters in Nicaragua and the subsequent reaction of those who stimulated the defeat in the wake of the Ortega visit to Moscow.

I urge my democratic colleagues, who I believe are similarly outraged by this disintegration of the foreign policy process in this country, to atone for the transgression, to see the handwriting on the wall, and when the next opportunity arises to speak on behalf of the forces of democracy in Central America.

□ 1800

Also to do something about promoting those forces in the form of assistance, that they would vote to provide that assistance, and not only help the forces of freedom in this hemisphere, the security of the United States, but their own party as well. Franklin Delano Roosevelt, Harry Truman, John F. Kennedy, Hubert Humphrey, and Henry Jackson are watching.

Mr. Speaker. I yield back the balance of my time.

ORDER OF BUSINESS

The SPEAKER pro tempore. For what purpose does the gentleman from Texas rise?

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that I may be allowed to proceed under special orders for 1 hour.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

UNITED STATES-MEXICO INTERPARLIAMENTARY EXCHANGE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas [Mr. DE LA GARZA] is recognized for 60 minutes.

Mr. DE LA GARZA. Mr. Speaker, and my colleagues, I take this time to inform the Members of the House that under the law we have established an interparliamentary exchange between the United States and Mexico wherein Parliamentarians from our country, both House and Senate, meet with our counterparts in the Mexican Congress. That occurs one year in the United States and the next year in Mexico.

This exchange was initiated 25 years ago and the initial exchange or meeting was held in Guadalajara, Talisco, Mexico, 25 years ago. We have just returned from Mexico City where we arrived for this meeting. Now, although the meeting was held in the city of Queretaro, State of Queretaro, Mexico, I must say, and not because I was the leader for the House delegation—and, by the way, my colleague from Texas, Senator PHIL GRAMM, led the Senate delegation—I must say that I think it has been one of the most successful meetings that we have had. Although it is of short duration, only 2½ days, we held three sessions of 3 to 4 hours, and one went about 5 hours, of sessions.

We discussed all of the issues that impact upon our relations as two neighboring countries, as two friendly countries. I must say that I think for the first time the discussions were spontaneous, a general back and forth discussion, rather than just reading position papers on one side or the other.

We were received in the inaugural session, and this is very interesting and prior to that let me go back into a bit of history of the area: The State of Queretaro and the city of Queretaro are almost the equivalent in the Mexican independence movements as what Philadelphia and Boston were to our independence movement.

It was there in the city of Queretaro that the plot, if you can call it that, of the independence movement was discovered by the Spanish forces who then occupied Mexico, and a lady, Josefa Ortiz de Dominquez, was the one that gave the signal or sounded the alarm to the mexican independence forces that the plot had been discovered, and that initiated the fighting part of the independence movement, not too distant, in a village called Dolores Hidalgo. This is in

effect what Paul Revere had done on our side when he came through the countryside announcing that the British were coming and the ensuing battles that were to follow, and he gave the signal.

Also there in Queretaro was the culmination of the French occupation of Mexico.

Not too many days ago I spoke about the battle of Puebla which is where the Mexican troops defeated the French troops and began the final process of eliminating the French rule over Mexico. But it was at Queretaro that they finally captured Archduke Maximilian who had been declared Emperor of Mexico. He was executed at a small hill near Queretaro. This was of interest, I think, to us here because of all of the Americas we were the first to declare independence from a foreign sovereign, which was Great Britain. But at Queretaro, with the execution of Maximilian, that ended the reign of the European designs for any of the Americas. This was the last of the European sovereigns to reign in the Americas. Maximilian, along with two Mexicans who had supported his endeavor, were executed there. So with that background we met not too far from the city of Queretaro and we discussed narcotics traffic, its use, its abuse, its control, in depth. We reached agreement on a resolution committing ourselves and our countries to a more forceful fight of narcotics traffic, use, abuse, and control, for its control. We discussed the Law of the Sea which to many of our areas is important, areas in the West with tuna fishing concerns, in the gulf with its shrimping off Mexican waters, where we have had problems not only because of the Law of the Sea but territorial expansion, both ours and theirs.

We discussed, of course, border problems. We have 2,000 miles of border between the United States and Mexico. We discussed those in depth. There is always the Rio Grande which is part of the boundary; Texas, the rest of the boundary, New Mexico, Arizona, into California.

We discussed environmental impact on the border. There are mines, smelting mines on either side of the border, there are problems in Mexico, more in Mexico than on our side, with respect to discharges of waters into the area of Tijuana, or down in Texas, that impact upon the quality of the water. We discussed border crossings, that traffic that we on our side would like to have more crossings to facilitate commerce and tourism.

□ 1810

I might add that Mexico's reply was that—and I can sympathize with that, that they have monetary problems, not only opening up a border crossing, but the staffing for customs, immigration, public health, agriculture, entails a lot of finances, and not all of that is recouped from charges that you might make for those who cross back and forth.

So we discussed that in depth, and particular crossings that we would like to have in my congressional district, and in adjoining districts. My home town of Mission, the city of Pharr, the city of Donna, Harlingen, San Benito.

We discussed all of those in depth, and what could we do together? How could one complement the other? We had extensive discussions related to our involvement in the Americas, both Mexico and us, in Central America, Salvador, Nicaragua in particular. We have some mutual concerns which are equal. We have some concerns that are not alike. We have some basic philosophy which is not similar in some areas to Mexico, but in the end, we resolved that we are all aiming for the same final conclusion; which would be peace, freedom, justice, equality, prosperity for the people of the individual nations of Central America and South America.

It was a very interesting, very forceful and frank conversation because there are some valid, indepth disagreements as to our concept as to what entails internal security and what entails protection of a basic territorial security.

The leader of the Mexican delegation for the House was Lic. Humberto Lugo Gil and for the Mexican Senate was former Ambassador to Washington Hugo B. Margin, who is now a member of the senate in Mexico.

In the beginning of the inaugural session, as I stated, we were received by the President of Mexico, Miguel de la Madrid, who came to our initial opening ceremony to open the session, which to us was very important and, of course, an honor and distinction that the President of the great Republic of Mexico would come out of Mexico City to begin the sessions that we were to continue for several days after.

He welcomed us, and pronounced some of the desires and intentions of Mexico, for their people, their relations to us, and to the rest of the hemisphere. It was a very impressive ceremony because with him were his Secretary of State, Bernardo Sepulveda, and they have a different Cabinet post that we do not have; it translates as Ministry of Interior. They call it "Gobernacion."

That Cabinet post is basically what we know as the upper echelon of the White House. The White House Chief of Staff, and the Executive Office of the Presidency, that is what "Governacion" or Interior Ministry would be in Mexico. He is of Cabinet rank.

Also we were received by the Governor of the state of Coahuila and the mayor of the city of Queretaro—the Governor of the state of Queretaro; not Coahuila, and the mayor of the city of Queretaro, and several of the mayors of the surrounding villages and small towns in that area.

We also were able to visit the surrounding countryside. Let me tell you that some people say that these visits are junkets; that you go off and have a good time.

Well, we managed to do both, because we would work all morning and then have a nice luncheon at a beautiful hacienda. In the evening after a late session they would honor us with a beautiful dinner. We had one of the most beautiful experiences that I have ever had in that Saturday evening, prior to the conclusion of the session, we were invited to the city of Queretaro where we were received by the populace of Queretaro in their main plaza. The whole town came out to greet us and to those of you that may not be acquainted, the Mexican towns are laid out in the old Spanish tradition, where there is a center plaza, or square with the cathedral or the church on one side, the municipal authorities on another side, the military compound on another side—this is a traditional Spanish Colonial or Mexican center plaza, or downtown square.

Well, this evening we walked right into the entire population of Queretaro almost, greeting us and wanting to touch and say hello and greet us, and then the cathedral—or church, I really do not know if it is a cathedral—but the Catholic church was all lit up in one of the most beautiful sights that you would want to see or experience.

Then they had a fireworks display from the ceiling of the church that looked fire was just raining down in front of that beautiful edifice. It was one of the most thrilling experiences, I assure you, any one of us have ever experienced or witnesses.

Then off to one side they had this beautiful fireworks that they do in Mexico—they rig a bamboo into a beautiful structure, that you cannot see it when it is in the dark, but then it lights up with wheels that turn and fireworks that shoot out, and then—in the colors; red, white, and blue and green, white and red, then both flags light up and then it says "Welcome, Parliamentarians, U.S. and Mexico."

If you can visualize that against a dark sky, lit up in all the beautiful colors with fireworks with the twisting, making a whistling sound, wheels at all of the extremes—and we were there in the plaza with the people of Queretaro, looking and observing that.

It sort of adds substance to your work, that you are able to visualize something like that. It was indeed a beautiful experience. While the bells of the church were ringing, at the same time.

Then the—this is an area of basic Indian population, and the leaders of the Indian tribes of that area came to do their dances and perform for us, and to each member of the delegation, of the leaders of the delegation, they presented us with one of their shields, that are made of feathers, of canary feathers and ostrich feathers—I guess any kind of feathered animal or bird that they gave this beautiful shield and welcome us on behalf of the Indian population of that area.

□ 1820

It was, to me, very exciting. And the connection that we have with our basic native Americans and to Mexico, which has probably more history before than ours, all pre-Colombian, and there were the different tribes there that evening to do the dances with us or for us. led by the Governor of the state and the different mayors of the area.

We continued with our meetings. We discussed anxieties, migrant workers, undocumented or illegals, whichever way you would want to call them. Mexicans presented their viewpoint as to the integrity of the individual. Basically, they have a different concept than we do as to the integrity, territorial integrity, because their position is that a human creature of God has a basic inherent right to travel.

We know that in a civilized world, where you have territorial integrity, you do not just have people coming and going. The people themselves call themselves Mexican or Argentinan or French or Italian, the people themselves designate what their basic territorial group is. So we have a difference there, but we do not have a difference that the individual is deserving of the protection of the law and should be treated as a creature of God, which we observe in this country nonetheless. Regardless of whether they are here legally or illegally, they come under the cloak of the Constitution and receive all of the protections afforded by law. But this is, to them, a very important factor.

We also discussed the monetary problems, world monetary problems, how they impact upon us here in the United States, how they impact upon Mexico, how trade and commerce between us and third countries impact on one or the other and the areas of concern, the areas of agreement, the areas of possible cooperation, and I assure you that this was a very fruitful, constructive discussion.

For many of us who live on the border and who know the situation, we live with it. But for some of our colleagues not from the border, it is very helpful to know that what we could do here, even without thinking, could have a very negative impact on Mexico economically or monetarywise. So it is for us to be concerned, which we are, as to the stability of the economy of Mexico, and they are, after Japan, our next best customer and we of them. We buy a tremendous amount of Mexican oil and gas, and a lot of the other things that Mexico has to sell in foreign commerce with us, and this is a very critical area both for our side and their side because we have a tremendous deficit, we have a horrendous debt. Just paying interest on the debt takes a large share of our budget and impacts on our deficit every year. They have an external debt, which is very critical, of some $80 billion, and it is very critical because they need foreign earnings, they need dollars to come into Mexico to pay out in dollars to the banks, to Europe and here, and to our Government or the Monetary Fund, whomever they owe the money, both the public debt and the private debt. They need the foreign earnings, otherwise to pay in pesos would be devastating. They have had a very difficult time.

In my inaugural talk in the inaugural session I commended the President of Mexico and my Mexican colleagues and the people because they have, to the best of their ability, grasped the situation and they are making headway by an austerity program where they are reducing expenditures and then increasing income by increasing revenues either through higher prices for items or taxes and a combination, and this would be very interesting to us and those who deal in that area that they said, "You can't balance your budget or reduce your inflation or reduce your debts solely by decreases, but you have to combine some with decreasing and some with increasing revenue, if necessary taxes." And I would commend that to those who work with the budget on our side of the border. But they have basically been successful in slowly reducing inflation and reducing their deficit. They have been more successful in reducing their deficit than we have been. And for this we commend them, and we are trying to do on our side, of course, our share. But this was a very interesting and, for me, a very productive area of discussion.

We went into areas of cultural exchange, of how we can better work, universities, groups, scientists, and it is very interesting to know that some of the things we are doing now we can verify. For example, not too long ago we started a dairy goat research center at Prairie View A&M in the State of Texas, and some of the Mexican colleagues knew about that and some universities from Mexico have now worked with Prairie View A&M in doing research and promoting dairy goat expansion and upgrading the dairy goat breeds, for the dairy goat is very important because you not only get milk and cheese, it can also be used for meat, you can use the hide, and you can raise maybe 20 or 30 dairy goats where you could have only one cow. So it is very important for developing countries. And those are the things we discussed.

On the border from Brownsville to Tijuana either the Mexican holiday or the American U.S. holiday is celebrated jointly, so on the border we have no problem, but it is going out that we were discussing exchanges, and so on, because on the border I guess we celebrate every chance we get, but it is jointly. Washington's birthday celebration in Laredo and Nuevo Laredo is a joint celebration. In Brownsville-Matamoros, we celebrate Washington, Lincoln, something called Charro Days, and they have a Mr. Amigo celebration during which the American side of the river honors a distinguished Mexican for his contribution to better relations as Mr. Amigo. And of course we know "amigo" means friend, Mr. Friend. And we have honored people from former Presidents of Mexico to movie actors to singers, distinguished ladies.

In our area, in McAllen where we live, Mission and McAllen, we have joint celebrations. The Mexican Independence Day, September 15, is celebrated on both sides of the border in many of our communities along the border.

So we discussed that, nuclear disarmament, and what it means to both sides. Mexico does not have the capability for atomic power or hydrogen power or nuclear power, but yet they were the leaders in the treaty of Thatelolco where the Americans initiated the concept of nuclear free area and began there in Mexico. This is a very important step.

We agreed that this was not only a major concern for both our two countries but for the world, and they sometimes feel that we do not go fast enough, that we do not put a sufficient emphasis on disarmament and nuclear nonproliferation. But we are. It is just that the other side has not been as cooperative. And we explained that.

□ 1830

I told them that as one American, and I thought that I spoke for every American, that I did not want our country or any other country to disappear from this planet in a ball of flame, and our ashes in the cloud that would fertilize a planet with no humans. That is the interest, I am satisfied, of every American. I would prefer that we take every cannon and every ship and every tank and melt them into plows and hammers and picks and shovels to build up our two countries, and to help build up the world.

Later I will have another special order and invite members of the dele-

gation who accompanied me so that we might have a broader discussion. I give this as a preliminary discussion so that they might be apprised of my report, and then, with the other members, we will have a much broader report.

With that, Mr. Speaker, I thank the Members for their attention and yield back the balance of my time.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. GONZALEZ, for 60 minutes, May 16.

Mr. GONZALEZ, for 60 minutes, May 20.

Mr. GONZALEZ, for 60 minutes, May 23.

Mr. DE LA GARZA, for 60 minutes, today.

(The following Members (at the request of Mr. SLAUGHTER) to revise and extend their remarks and include extraneous material:)

Mr. GINGRICH, for 60 minutes, today.

Mr. GINGRICH, for 60 minutes, May 16.

Mr. GINGRICH, for 60 minutes, May 20.

Mr. GINGRICH, for 60 minutes, May 21.

Mr. BROWN of Colorado, for 60 minutes, today.

Mr. MORRISON of Washington, for 30 minutes, today.

Mr. MCKINNEY, for 15 minutes, today.

Mr. RITTER, for 60 minutes, May 15.

Mr. WALKER, for 60 minutes, May 16.

(The following Members (at the request of Mr. DARDEN) to revise and extend their remarks and include extraneous material:)

Mr. DARDEN, for 5 minutes, today.

Mr. FORD of Michigan, for 5 minutes, today.

Mr. HUBBARD, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. RAHALL, for 5 minutes, today.

Mrs. BURTON of California, for 10 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. SLAUGHTER) and to include extraneous matter:)

Mr. COURTER.

Mr. BROOMFIELD.

Mr. DORNAN of California.

Mr. GREEN.

Mr. COLEMAN of Missouri in two instances.

Mrs. ROUKEMA.

Mr. COATS.

Ms. SNOWE.

Mr. SHUMWAY.

Mr. MCDADE.

Mr. SPENCE.

Mr. O'BRIEN in two instances.

(The following Members (at the request of Mr. DARDEN) and to include extraneous matter:)

Mr. KOSTMAYER.

Mr. COELHO.

Mr. FORD of Michigan.

Mr. LIPINSKI.

Mr. PENNY.

Mrs. BURTON of California in three instances.

Mr. STARK in two instances.

Mr. VENTO in two instances.

Mr. BARNES.

Mr. MONTGOMERY in two instances.

Mr. LEHMAN of Florida in two instances.

Mr. ORTIZ.

Mr. MURTHA in two instances.

Mr. SMITH of Florida in two instances.

Mr. ROE in two instances.

Mr. RAY.

Mr. HUBBARD.

Mr. RODINO in two instances.

Mr. EDWARDS of California.

Mrs. BOXER.

Mr. OBERSTAR.

Mr. FASCELL in two instances.

Mr. HOWARD.

Mr. CLAY.

Mrs. LONG.

Mr. SOLARZ.

SENATE CONCURRENT RESOLUTION REFERRED

A concurrent resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. Con. Res. 48. Concurrent resolution relating to the death of President-elect Tancredo Neves of Brazil; referred to the Committee on Foreign Affairs.

ADJOURNMENT

Mr. DE LA GARZA. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 31 minutes p.m.), the House adjourned until tomorrow, Thursday, May 16, 1985, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1285. A communication from the President of the United States, transmitting a request for supplemental appropriations for fiscal year 1985 and an amendment to the request for appropriations for fiscal year 1986, pursuant to 31 U.S.C. 1107 (H. Doc. No. 99-67); to the Committee on Appropriations and ordered to be printed.

1286. A letter from the General Counsel, General Accounting Office, transmitting a report on the status of budget authority proposed for rescission in the President's fifth special message, but for which Congress failed to pass a rescission bill, pursuant to 2 U.S.C. 885; to the Committee on Appropriations.

1287. A letter from the Deputy Secretary of Defense, transmitting a report on defense contractors and consultants who during the past 3 years held positions of GS-13 or above within the Department covering fiscal year 1984, pursuant to 10 U.S.C. 2397(e) (96 Stat. 1293) to the Committee on Armed Services.

1288. A letter from the General Counsel, Department of Defense, transmitting a draft of proposed legislation to amend title 10, United states Code, to authorize the United States to collect health plan benefits for medical and dental care provided to dependents of active duty members, former members, and their dependents in facilities of the uniformed services; to the Committee on Armed Services.

1289. A letter from the General Counsel, Department of Defense, transmitting a draft of proposed legislation to eliminate general or flag officer grade requirements from certain statutory positions, and for other purposes; to the Committee on Armed Services.

1290. A letter from the Auditor, District of Columbia, transmitting a copy of the Auditor's "Annual Report for Fiscal Year 1984", pursuant to Public Law 93-198, section 455(d); to the Committee on the District of Columbia.

1291. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting notification of the addition of three further countries to the 63 named previously: India, Israel, and Pakistan to the Antiterrorism Assistance Program, pursuant to FAA, section 574(a)(1) (97 Stat. 972); to the Committee on Foreign Affairs.

1292. A letter from the President, Overseas Private Investment Corporation, transmitting the Corporation's development and audit report for fiscal year 1984, pursuant to FAA, section 240A (92 Stat. 216; 95 Stat. 1024); to the Committee on Foreign Affairs.

1293. A letter from the Secretary of the Interior, transmitting a report of the Department's activities under the Freedom of Information Act during calendar year 1984, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

1294. A letter from the Department of Commerce and the Department of the Interior, transmitting the fourth report on activities with respect to the emergency striped bass research study, for the year 1984, pursuant to Public Law 89-304, section 7(b) (93 Stat. 859); to the Committee on Merchant Marine and Fisheries.

1295. A letter from the Acting Assistant Secretary (Civil Works), Department of the Army, transmitting a report from the Chief of Engineers, Department of the Army, on Cape Fear River from Acme to FAyetteville, NC, together with other pertinent reports; to the Committee on Public Works and Transportation.

1296. A letter from the Acting United States Trade Representative, transmitting a copy of the March 22, 1984, "Decision of the Committee on Trade in Civil Aircraft," including the Consolidated Annex to the 1979 Agreement on Trade in Civil Aircraft attached to the decision; to the Committee on Ways and Means.

1297. A letter from the Secretary of Energy, transmitting a report on the study by the Advisory Panel on Alternative Means

of Financing and Managing Radioactive Waste Facilities entitled, "Managing Nuclear Waste—A Better Idea", pursuant to Public Law 97-425, section 303; jointly, to the Committees on Energy and Commerce and Interior and Insular Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. OBEY: Joint Economic Committee. Report on February 1985 Economic Report of the President (Rept. No. 99-95). Referred to the Committee of the Whole House on the State of the Union.

Mr. HAWKINS: Committee on Education and Labor. H.R. 7. A bill to extend and improve the National School Lunch Act and the Child Nutrition Act of 1966; with an amendment (Rept. No. 99-96). Referred to the Committee of the Whole House on the State of the Union.

Mr. HAWKINS: Committee on Education and Labor. H.R. 2245. A bill to authorize appropriations for fiscal year 1986 for the National Endowment for the Arts and the National Endownment for the Humanities, and for other purposes; with an amendment (Rept. No. 99-97). Referred to the Committee of the Whole House on the State of the Union.

Mr. HAWKINS: Committee on Educaton and Labor. H.R. 1997. A bill to make certain technical and conforming amendments to the Library Services and Construction Act, and for other purposes; with an amendment (Rept. No. 99-98). Referred to the Committee of the Whole House on the State of the Union.

Mr. FUQUA: Committee on Science and Technology. H.R. 2319. A bill to authorize appropriations for environmental research, development, and demonstration for the fiscal year 1986, and for other purposes (Rept. No. 99-99). Referred to the Committee of the Whole House on the State of the Union.

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 1789. A bill relating to the authorization of appropriations for certain components of the National Wildlife Refuge System; with an amendment (Rept. 99-100). Referred to the Committee of the Whole House on the State of the Union.

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 1958. A bill to authorize appropriations for the National Ocean Pollution Planning Act of 1978 and title II of the Marine Protection, Research, and Sanctuaries Act of 1972 for the fiscal years 1986 and 1987, and for other purposes; with amendments (Rept. 99-101, Pt. I). Ordered to be printed.

Mr. SAM B. HALL, JR: Committee on the Judiciary. H.R. 1890. A bill to provide for an equitable waiver in the compromise and collection of Federal claims (Rept. No. 99-102). Referred to the Committee on the Whole House on the State of the Union.

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 2121. A bill to provide for the reauthorization of the Coastal Zone Management Act of 1972, and for other purposes; with an amendment (Rept. No. 99-103). Referred to the Committee of the Whole House on the State of the Union.

Mr. KASTENMEIER: Committee on the Judiciary. H.R. 2434. A bill to authorize appropriations for the Patent and Trademark Office in the Department of Commerce, and for other purposes; with an amendment (Rept. No. 99-104). Referred to the Committee of the Whole House on the State of the Union.

Mr. MONTGOMERY: Committee on Veterans' Affairs. H.R. 1408. A bill to amend the Emergency Veterans' Job Training Act of 1983 and title 38, United States Code, with respect to certain veterans' employment programs; with an amendment (Rept. No. 99-108). Referred to the Committee of the Whole House on the State of the Union.

Mr. MONTGOMERY: Committee on Veterans' Affairs. H.R. 2344. A bill to amend title 38, United States Code, to make improvements in the National Cemetery System and in the Veterans' Administration program that provides assistance to certain disabled veterans in acquiring specially adapted residences, and to express the sense of Congress with respect to the Veterans' Administration home loan origination fee (Rept. No. 99-109). Referred to the Committee of the Whole House on the State of the Union.

Mr. MONTGOMERY: Committee on Veterans' Affairs. H.R. 2343. A bill to amend title 38, United States Code, to make certain improvements in veteran's compensation programs, and for other purposes; with amendments (Rept. No. 99-110). Referred to the Committee of the Whole House on the State of the Union.

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 2494. A bill to authorize the appropriation of funds for fiscal year 1986 for construction, operation, and maintenance of water resources development projects under the jurisdiction of the Secretary of the Army, acting through the Chief of Engineers (Rept. No. 99-111). Referred to the Committee of the Whole House on the State of the Union.

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 2493. A bill to amend the Federal Water Pollution Control Act to authorize the appropriation of funds for fiscal year 1986 (Rept. No. 99-112). Referred to the Committee of the Whole House on the State of the Union.

Mr. RODINO: Committee on Judiciary. H.R. 2348. A bill to authorize appropriations to carry out the activities of the Department of Justice for fiscal year 1986, and for other purposes; with an amendment (Rept. No. 99-113). Referred to the Committee of the Whole House on the State of the Union.

Mr. MONTGOMERY: Committee on Veterans' Affairs. H.R. 505. A bill to amend title 38, United States Code, to improve the delivery of health care services by the Veterans' Administration; with an amendment (Rept. No. 99-114). Referred to the Committee of the Whole House on the State of the Union.

Mr. HOWARD: Committee on Public Works and Transportaton. H.R. 10. A bill to amend the Public Works and Economic Development Act of 1965 and the Appalachian Regional Development Act of 1965. (Rept. No. 99-115, Pt. I). Ordered to be printed.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 2478. A bill to amend the Revised Organic Act of the Virgin Islands, to amend the Covenant to Establish a Commonwealth of the Northern Mariana Islands, to provide for the governance of the insular areas of the United States, and for other purposes; with an amendment (Rept. No. 99-116). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 1905. A bill to offset the competitive advantage which foreign coal producers have as a result of not having to meet environmental, health, welfare and safety requirements of the kinds imposed on U.S. coal producers, and for other purposes; with an amendment (Rept. No. 99-117, Pt. I). Ordered to be printed.

Mr. UDALL: Committee on Interior and Insular Affairs. H.R. 2041. A bill to authorize appropriations to the Department of Energy for civilian energy programs for fiscal year 1986 and fiscal year 1987, and for other purposes; with amendments (Rept. No. 99-118, Pt. I). Ordered to be printed.

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 2416. A bill to direct the Architect of the Capitol to construct a building on the U.S. Capitol Grounds to provide office space for the judicial branch of the Federal Government, and for other purposes; with an amendment (Rept. No. 99-119). Referred to the Committee of the Whole House on the State of the Union.

Mr. KASTENMEIER: Committee on the Judiciary. H.R. 2378. A bill to amend section 504 of title 5, United States Code, and section 2412 of title 28, United States Code, with respect to awards of expenses of certain agency and court proceedings, and for other purposes; with an amendment (Rept. No. 99-120). Referred to the Committee of the Whole House on the State of the Union.

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 2092. A bill to amend the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979 to authorize appropriations for fiscal years 1986 and 1987, and for other purposes; with an amendment (Rept. No. 99-121, Pt. I). Ordered to be printed.

Mr. ST GERMAIN: Committee on Banking, Finance and Urban Affairs. H.R. 2253. A bill to provide for increased participation by the United States in the Special Facility for Sub-Saharan Africa, the International Bank for Reconstruction and Development, the International Finance Corporation, and the African Development Fund; with an amendment (Rept. No. 99-122). Referred to the Committee of the Whole House on the State of the Union.

Mr. SAM B. HALL, JR.: Committee on the Judiciary. H.R. 441. A bill to provide for the recovery by the United States of the costs of hospital and medical care and treatment furnished by the United States in certain circumstances, and for other purposes; with an amendment (Rept. No. 99-123). Referred to the Committee of the Whole House on the State of the Union.

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 1027. A bill to authorize appropriations to carry out the Endangered Species Act of 1973 during fiscal years 1986, 1987, and 1988; with amendments (Rept. No. 99-124). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. H.R. 1349. A bill to reduce the costs of operating Presidential libraries, and for other purposes; with amendments (Rept. No. 99-125). Referred to the Committee of the Whole House on the State of the Union.

Mr. DE LA GARZA: Committee on Agriculture. H.R. 1383. A bill to direct the Secretary of Agriculture to take certain actions to improve the productivity of American farmers, and for other purposes; with an amend-

ment (Rept. No. 99-126). Referred to the Committee of the Whole House on the State of the Union.

Mr. DE LA GARZA: Committee on Agriculture. H.R. 2355. A bill to extend the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for 1 year; with amendments (Rept. No. 99-127). Referred to the Committee of the Whole House on the State of the Union.

REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 1544. A bill to authorize appropriations to carry out the National Aquaculture Act of 1980 during fiscal years 1986, 1987, and 1988; with amendments; referred to the Committee on Agriculture for a period ending not later than May 31, 1985, for consideration of such provisions of the bill and amendment as fall within the jurisdiction of that committee pursuant to clause 1(a), rule XI (Rept. No. 99-105, Pt. I). Ordered to be printed.

Mr. HAMILTON: Permanent Select Committee on Intelligence. H.R. 2419. A bill to authorize appropriations for fiscal year 1986 for intelligence and intelligence-related activities of the U.S. Government, the Intelligence Community Staff, and the Central Intelligence Agency Retirement and Disability System, and for other purposes; with amendments; referred to the Committee on Armed Services for a period ending not later than May 24, 1985, for consideration of such provisions of the bill and amendments as fall within the jurisdiction of that committee pursuant to clause 1(c), rule XI (Rept. No. 99-106, Pt. I). Ordered to be printed.

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 1957. A bill to amend title I of the Marine Protection, Research, and Sanctuaries Act of 1972; with an amendment; referred to the Committee on Public Works and Transportation for a period ending not later than July 19, 1985, for consideration of such provisions of the bill and amendment as fall within the jurisdiction of that committee pursuant to clause 1(p), rule XI (Rept. No. 99-107, Pt. I). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. OBERSTAR (for himself, Mr. RUSSO, Mr. OWENS, Mr. STAGGERS and Mr. FRANK):

H.R. 2508. A bill to amend the Railroad Retirement Act of 1974 to provide survivor's annuities to certain employees' survivors not currently eligible for such annuities, and to provide for reductions in annuities otherwise due to persons likely to become such survivors and employees; to the Committee on Energy and Commerce.

By Mr. OBERSTAR (for himself and Mr. FRANK):

H.R. 2509. A bill to amend the Railroad Retirement Act of 1974 to eliminate the "last employer" rule, and certain related rules, as they affect the portion of certain annuities commonly referred to as "tier I" and to provide that certain deductions for work be made from such portion; to the Committee on Energy and Commerce.

H.R. 2510. A bill to amend the Railroad Retirement Act of 1974 to provide eligibility for annuities to divorced wives, not currently eligible, who would be eligible for a benefit under section 202(b) of the Social Security Act if their former husbands railroad service were included in employment for the purpose of the Social Security Act; to the Committee on Energy and Commerce.

By Mr. OBERSTAR (for himself, Mr. STAGGERS, and Mr. FRANK):

H.R. 2511. A bill to amend the Railroad Retirement Act of 1974 to provide that any worker with 25 years of service or more shall have a current connection for certain purposes; to the Committee on Energy and Commerce.

By Mr. OBERSTAR (for himself and Mr. FRANK):

H.R. 2512. A bill to amend the Railroad Retirement Act of 1974 to increase the earnings limit for recipients of certain disability annuities; to the Committee on Energy and Commerce.

H.R. 2513. A bill to amend the Railroad Retirement Act of 1974 to provide for a trial work period in disability situations similar to that provided under the Social Security system; to the Committee on Energy and Commerce.

By Mr. OBERSTAR (for himself, Mr. STAGGERS, Mr. FRANK, and Mr. HERTEL of Michigan):

H.R. 2514. A bill to amend the Railroad Retirement Act of 1974 to provide benefits for certain disabled spouses of railroad employees and for certain spouses of disabled railroad employees; to the Committee on Energy and Commerce.

H.R. 2515. A bill to amend the Railroad Retirement Act of 1974 to modify the "years of service" credit for military service; to the Committee on Energy and Commerce.

H.R. 2516. A bill to amend the Railroad Unemployment Insurance Act to provide that unemployment benefits of railroad employees will not be reduced by reason of the receipt of certain unrelated social insurance benefits; to the Committee on Energy and Commerce.

By Mr. CONYERS:

H.R. 2517. A bill to amend chapter 96 of title 18, United States Code; to the Committee on the Judiciary.

By Mr. BROOKS (by request):

H.R. 2518. A bill to discontinue or amend certain requirements for agency reports to Congress; to the Committee on Government Operations.

H.R. 2519. A bill to discontinue or amend certain requirements for agency reports to Congress; to the Committee on Government Operations.

By Mr. COURTER (for himself, Mr. DREIER of California, Mr. LAGOMARSINO, Mr. KASICH, Mr. RUDD, Mr. DENNY SMITH, Mr. HILER, Mr. BLILEY, Mr. WHITEHURST, Mr. STANGELAND, Mr. DELAY, Mrs. BENTLEY, Mr. SMITH of New Hampshire, Ms. FIEDLER, Mr. STRATTON, Mr. GINGRICH, Mr. DORNAN of California, Mr. BEDELL, Mr. WEBER, Mr. COATS, Mr. FISH, Mr. LOWERY of California, Mr. CONTE, Mr. KINDNESS, Mr. SMITH of New Jersey, Mr. STUDDS, Mr. DIOGUARDI, Mr. ARMEY, Mr. WORTLEY, Mr. SMITH of Florida, Mr. LEVIN of Michigan, Mr. RITTER, Mr. BURTON of Indiana, Mr. MONSON, Mr. BADHAM, Mr. BARTON of Texas, and Mr. MOORHEAD):

H.R. 2520. A bill to deny most-favored-nation trading status to Afghanistan; to the Committee on Ways and Means.

By Mr. FAUNTROY:

H.R. 2521. A bill to authorize the Board of Governors of the Federal Reserve System to regulate the market for Government securities; to the Committee on Banking, Finance and Urban Affairs.

By Mr. LIPINSKI:

H.R. 2522. A bill to amend the Urban Mass Transportation Act of 1964 to allow certain grants to be used for the overhaul of rolling stock and for reconstruction of equipment and materials on rolling stock, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. McDADE:

H.R. 2523. A bill to amend title XIX of the Social Security Act to assist severely disabled individuals to attain or maintain their maximum potential for independence and capacity to participate in community and family life; to the Committee on Energy and Commerce.

By Mr. MORRISON of Washington (for himself, Mr. DICKS, Mr. CHANDLER, Mrs. VUCANOVICH, Mr. REID, Mr. BOULTER, and Mr. COMBEST):

H.R. 2524. A bill to amend the Price-Anderson provisions of the Atomic Energy Act of 1954 to establish liability and indemnification for nuclear incidents arising out of Federal storage, disposal, or related transportation of high-level radioactive waste and spent nuclear fuel; jointly, to the Committees on Energy and Commerce and Interior and Insular Affairs.

By Mr. SCHUMER (for himself and Mr. OWENS):

H.R. 2525. A bill to amend the Fair Credit Reporting Act to establish certain requirements and restrictions respecting the retention and furnishing of information by consumer reporting agencies on individuals renting residential property; to the Committee on Banking, Finance and Urban Affairs.

By Mr. SEIBERLING:

H.R. 2526. A bill to amend the Communications Act of 1934 to require that, when any alcoholic beverage is advertised on television, radio, or cable, equivalent time shall be provided for public service announcements and programming regarding alcohol consumption and misuse; to the Committee on Energy and Commerce.

By Ms. SNOWE (for herself and Mr. CONTE):

H.R. 2527. A bill to amend the Internal Revenue Code of 1954 to increase the amount of the credit for dependent care expenses, to make such credit refundable, and to provide that certain respite care expenses are eligible for such credit; to the Committee on Ways and Means.

By Mr. STARK:

H.R. 2528. A bill to amend the Internal Revenue Code of 1954 to provide that research and experimental expenditures of corporations, including personal holding companies, shall not be treated as items of tax preference for purposes of the minimum tax; to the Committee on Ways and Means.

H.R. 2529. A bill to amend the Internal Revenue Code of 1954 to deny a deduction for amounts paid as restitution for other damages for violations of law involving fraud; to the Committee on Ways and Means.

By Mr. GRADISON (for himself, Mr. PANETTA, Mr. LEHMAN of Florida, Mr. HEFNER, Mr. BOLAND, Mrs. KENNELLY,

Mr. BARNES, Mr. RODINO, Mr. HAMMERSCHMIDT, Mr. WEISS, Mrs. BOXER, Ms. KAPTUR, Mr. FUQUA, Mr. DASCHLE, Mr. REGULA, Mr. STARK, Mr. WORTLEY, Mr. BUSTAMANTE, Mr. BORSKI, Mr. BEILENSON, Mr. SOLARZ, Mr. MCCAIN, Mr. CROCKETT, Mr. GUARINI, Mr. BOEHLERT, Mr. GROTBERG, Mr. VANDER JAGT, Mr. QUILLEN, Mr. BERMAN, Mr. HORTON, Mr. BONIOR of Michigan, Mr. SCHEUER, Mr. JONES of Tennessee, Mr. DARDEN, Mr. TORRICELLI, Mr. BILIRAKIS, Mr. BEDELL, Mr. KLECZKA, Mr. CHAPPIE, Mrs. ROUKEMA, Mr. LEWIS of California, Ms. MIKULSKI, Mr. WOLF, Mr. HUGHES, Mr. SHAW, Mr. ROE, Mr. WAXMAN, Mr. DEWINE, Mr. DICKS, Mr. DAUB, Mr. SAVAGE, Mr. THOMAS of Georgia, Mr. OWENS, Mr. FROST, Mr. HEFTEL of Hawaii, Mr. EDGAR, Mr. RICHARDSON, Mr. FAZIO, Mr. MARTINEZ, Mr. PASHAYAN, Mr. SABO, Mr. BIAGGI, and Mr. SMITH of Florida):

H.J. Res. 288. Joint resolution to designate the month of November 1985 as "National Hospice Month"; to the Committee on Post Office and Civil Service.

By Mr. CONYERS:

H. Con. Res. 148. Concurrent resolution expressing the sense of the Congress with respect to the enfranchisement of pretrial detainees, convicted misdemeanants, and persons appealing their convictions of crime; jointly, to the Committees on the Judiciary and House Administration.

By Mr. DE LA GARZA (for himself and Mr. MADIGAN):

H. Res. 172. Resolution to recognize the Centennial Anniversary of the Holstein-Friesian Association of America, A Premier Dairy Cattle Breed Organization; jointly, to the Committees on Agriculture and Post Office and Civil Service.

By Mr. MCKINNEY (for himself, Mr. FAUNTROY, Mr. FORD of Tennessee, Mr. EDGAR, Mr. HUGHES, Mr. DYMALLY, Mr. LAGOMARSINO, Mr. GREEN, Mr. HORTON, Mr. SMITH of Florida, Mr. LAFALCE, Mr. BEREUTER, Mr. DELLUMS, Mr. BATES, Mr. ACKERMAN, Mr. MORRISON of Connecticut, Mr. FRANK, Ms. KAPTUR, Mrs. BOXER, and Mr. BOEHLERT):

H. Res. 173. Resolution providing for accelerated release for public use of certain records of the former Select Committee on Assassinations; to the Committee on House Administration.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

124. By the SPEAKER: Memorial of the Legislature of the State of Hawaii, relative to the services of the U.S. Soil Conservation Service; to the Committee on Agriculture.

125. By Mr. RUDD: Memorial of the Legislature of the State of Arizona, relative to the prohibitions on commercial homework; to the Committee on Education and Labor.

126. By the SPEAKER: Memorial of the House of Representatives of the State of Hawaii, relative to a moratorium on nuclear weapons; to the Committee on Foreign Affairs.

127. Also, memorial of the House of Representatives of the State of Hawaii, relative to a policy of no-first-use of nuclear weapons; to the Committee on Foreign Affairs.

128. Also, memorial of the House of Representatives of the State of Hawaii, relative to the end to apartheid in South Africa; to the Committee on Foreign Affairs.

129. Also, memorial of the House of Representatives of the State of Hawaii, relative to peaceful uses of space; to the Committee on Foreign Affairs.

130. By Mr. RUDD: Memorial of the Legislature of the State of Arizona, relative to the Juan Bautista De Anza Trail; to the Committee on Interior and Insular Affairs.

131. By the SPEAKER: Memorial of the Senate of the Commonweath of the State of Pennsylvania, relative to the issuance of a commemorative stamp; to the Committee on Post Office and Civil Service.

132. Also, memorial of the Legislature of the State of Hawaii, relative to actions to assist schizophrenics; jointly, to the Committees on Energy and Commerce; Education and Labor; Banking, Finance and Urban Affairs; and Ways and Means.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 10: Mr. FAZIO.

H.R. 44: Mr. REGULA.

H.R. 512: Mr. CARPER.

H.R. 526: Mr. RODINO, Mr. FLORIO, Ms. MIKULSKI, Mr. BUSTAMANTE, Mr. YOUNG of Florida, Mrs. BENTLEY, Mr. GEJDENSON, Mr. EDGAR, and Mr. DURBIN.

H.R. 556: Mr. BEDELL.

H.R. 587: Mr. BREAUX, Mr. GUARINI, Mr. GRAY of Illinois, Mr. MARLENEE, Mr. MOLINARI, Mr. MARKEY, Mr. HILLIS, Mr. KEMP, Mr. BIAGGI, Mr. MOLLOHAN, Mr. GEKAS, Mr. KRAMER, and Mr. BROWN of California.

H.R. 622: Mr. LANTOS.

H.R. 696: Mr. LUJAN, Mr. RUDD, Mr. HUGHES, Mr. OLIN, Mr. DICKS, Mr. THOMAS of California, Mr. SKELTON, Mr. MARLENEE, Ms. KAPTUR, Mr. MILLER of Washington, Mr. RITTER, Mr. KOLTER, Mrs. SMITH of Nebraska, Mr. PACKARD, Mr. NIELSON of Utah, Mr. EMERSON, Mr. DREIER of California, Mr. LOWERY of California, and Mr. ECKART of Ohio.

H.R. 930: Mr. SKELTON, Mr. WILLIAMS, and Mr. CLINGER.

H.R. 1017: Mrs. BOXER.

H.R. 1027: Mr. HUGHES.

H.R. 1123: Mr. SILJANDER, Mr. PACKARD, Mr. HUTTO, Mr. GUNDERSON, Mr. LIGHTFOOT, and Mr. SCHUETTE.

H.R. 1142: Mr. COURTER.

H.R. 1202: Mr. HUTTO and Mr. YOUNG of Alaska.

H.R. 1208: Mr. GLICKMAN.

H.R. 1294: Mr. FLORIO and Mr. SAXTON.

H.R. 1436: Mr. GRAY of Illinois.

H.R. 1517: Mr. KINDNESS, Mr. SENSENBRENNER, Mr. HOPKINS, Mr. MILLER of Ohio, Mr. MADIGAN, Mr. O'BRIEN, Mr. CAMPBELL, Mr. EDWARDS of Oklahoma, Mr. HYDE, Mr. DURBIN, Mr. SCHUETTE, and Mr. BEVILL.

H.R. 1550: Mr. YATRON, Mr. HAMMERSCHMIDT, Mr. EVANS of Iowa, and Mr. LUNDINE.

H.R. 1591: Mr. LEWIS of Florida, Mr. MONTGOMERY, Mr. MCDADE, Mr. IRELAND, Mr. CHAPPIE, Mr. LUKEN, Mr. LOTT, Mr. EVANS of Iowa, Mr. LUNDINE, and Mr. BUSTAMANTE.

H.R. 1666: Mr. DIOGUARDI and Mr. BOEHLERT.

H.R. 1760: Mr. ARMEY, Mr. GINGRICH, Mr. HOPKINS, and Mrs. MARTIN of Illinois.

H.R. 1893: Mr. SHAW, Mr. BOEHLERT, Mr. FRANKLIN, Mr. KOSTMAYER, Mr. MICA, Mr. RUDD, Mr. BEREUTER, Mr. BROWN of Colorado, and Mr. DAUB.

H.R. 1957: Mr. JONES of North Carolina, Mr. LENT, Mr. CARNEY, Mr. HUGHES, Mr. SAXTON, Mr. SMITH of New Jersey, Mr. CARPER, and Mr. BREAUX.

H.R. 1958: Mr. JONES of North Carolina, Mr. SAXTON, Mr. LOWRY of Washington, and Mr. HERTEL of Michigan.

H.R. 1997: Mr. DE LA GARZA, Mrs. COLLINS, Mr. GUNDERSON, Mr. SMITH of Florida, Mr. RANGEL, Mr. MCGRATH, Mr. KOLTER, Mr. MATSUI, Mr. VENTO, Mrs. BOXER, and Mr. CROCKETT.

H.R. 2106: Mr. CONYERS, Mrs. COLLINS, Mr. DELLUMS, Mr. TOWNS, Mr. HAYES, Mr. LELAND, Mr. WEISS, Mr. ROYBAL, Mr. STOKES, Mr. LUNDINE, Mr. CROCKETT, Mr. SAVAGE, Mr. FRANK, and Mr. RANGEL.

H.R. 2121. Mr. JONES of North Carolina, Mr. MOODY, Mr. RANGEL, Mr. MATSUI, Mr. TORRES, Mr. CARPER, Mr. DYMALLY, Mr. WEISS, Mr. STUDDS, Mr. SMITH of Florida, Mr. FUQUA, Mr. SAXTON, Mr. MCKINNEY, Mr. MOAKLEY, Mr. LENT, Mr. BONKER, Mr. HERTEL of Michigan, Mrs. BENTLEY, Mr. ORTIZ, Mr. MILLER of Washington, Mr. MCKERNAN, Mr. BIAGGI, Mr. MANTON, and Mr. ROSE.

H.R. 2124: Mr. EDWARDS of California, Mr. VENTO, Mr. SABO, Mr. DURBIN, Mrs. BURTON of California, and Mr. BEDELL.

H.R. 2161: Mr. ROYBAL, Mr. MATSUI, Mr. ROBINSON, Mr. RANGEL, Mr. WHEAT, Mr. HAYES, Ms. KAPTUR, Mr. MOODY, Ms. MIKULSKI, Mr. BARNES, Mr. JONES of North Carolina, Mr. FRANK, Mr. BEDELL, Mr. CROCKETT, Mr. SAVAGE, and Mr. BUSTAMANTE.

H.R. 2226: Mr. APPLEGATE, Mr. BEVILL, Mr. DUNCAN, Mr. HAYES, Mr. KINDNESS, and Mr. ROE.

H.R. 2502: Mr. BEILENSON.

H.J. Res. 41: Mr. PACKARD.

H.J. Res. 64: Mr. PANETTA and Mr. WHITTEN.

H.J. Res. 76: Mr. LUKEN, Mr. BURTON of Indiana, Mr. GRAY of Illinois, Mr. EVANS of Illinois, Mr. GEKAS, Mr. ANDREWS, Mr. ATKINS, Mr. HOYER, Mr. LEVIN of Michigan, Mr. MARTINEZ, Mr. MOODY, Mr. RICHARDSON, Mr. WISE, and Mr. STANGELAND.

H.J. Res. 133: Mr. RINALDO, Mr. GALLO, and Mr. GUARINI.

H.J. Res. 151: Mr. CLINGER.

H.J. Res. 204: Mr. PERKINS, Ms. KAPTUR, and Mr. FLORIO.

H.J. Res. 222: Mr. HAYES and Mr. JEFFORDS.

H.J. Res. 281: Mr. LEWIS of Florida, Mr. LOWERY of California, Mr. FEIGHAN, Mr. YOUNG of Missouri, Mrs. COLLINS, Mr. HAYES, Mr. DAUB, Mr. DARDEN, Mr. LEWIS of California, Mr. LANTOS, Mr. BILIRAKIS, Mr. SCHAEFER, Mr. ADDABBO, Mr. DIXON, Mr. BURTON of California, Mr. CAMPBELL, Mr. HUTTO, Mr. BORSKI, Mrs. HOLT, Mr. HALL of Ohio, Mr. KOSTMAYER, Mr. JENKINS, Mr. JONES of North Carolina, Mr. REID, Mr. KASICH, Mr. HAMMERSCHMIDT, Mr. MOAKLEY, Mr. MOODY, Mr. MACK, Mr. RINALDO, Mr. ROSTENKOWSKI, Mr. SAVAGE, Mr. TALLON, Mr. WATKINS, Mr. SHAW, Mr. DEWINE, Mr. FRENZEL, Mr. ROWLAND of Connecticut, Mr. WIRTH, Mr. SMITH of Florida, Mr. YATES, Mr. LIGHTFOOT, Mr. SILJANDER, Mr. FORD of Tennessee, Mr. MURPHY, Mr. HILER, Mr. TAUKE, Mr. LEHMAN of Florida, Mr. DURBIN, Mr. PANETTA, Mr. FROST, Mr. WYDEN, Mr. WALGREN, Mr. ROSE, Mrs. SCHROEDER, Mr. VOLKMER, Mr. BENNETT, Mr. NEAL, Mr. GREGG, and Mr. FOLEY.

H. Con. Res. 90: Mr. FORD of Tennessee and Mr. TALLON.

H. Con. Res. 131: Mr. BOEHLERT and Mr. BONER of Tennessee.

PETITIONS, ETC.

Under clause 1 of rule XXII:

107. The SPEAKER presented a petition of Pastor Martin Hoover, Kempner, TX, relative to a redress of grievances; which was referred to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1555

By Mr. WALKER:

—On page 146, after line 4, add the following section:

SEC. 1112. PROHIBITION ON ASSISTANCE TO COUNTRIES OPPOSING UNITED STATES FOREIGN POLICY.

(a) REPORT.—Not later than January 31 of each year, or at the time of the transmittal by the President to the Congress of the annual presentation of materials on foreign assistance, whichever is earlier, the President shall submit to the Speaker of the House of Representatives and the President of the Senate a full and complete report which assesses, with respect to each foreign country, the degree of support by the government of each such country during the preceding twelve-month period for the foreign policy of the United States. Such report shall include, with respect to each such country which is a member of the United Nations, information to be compiled and supplied by the Permanent Representative of the United States to the United Nations, consisting of a comparison of the overall voting practices in the principal bodies of the United Nations during the preceding twelve-month period of such country and the United States, with special note of the voting and speaking records of such country on issues of major importance to the United States in the General Assembly and the Security Council, and shall also include a report on actions with regard to the United States in important related documents such as the Non-Aligned Communique. A full compilation of the information supplied by the Permanent Representative of the United States to the United Nations for inclusion in such report shall be provided as an addendum to such report.

(b) PROHIBITION.—The United States shall not provide any foreign assistance to any country which the President finds, based on the contents of the report required to be transmitted under subsection (a), is engaged in a consistent pattern of opposition to the foreign policy of the United States.

(c) CERTIFICATION.—The United States shall not provide any foreign assistance to any country whose votes in the most recent session of the United Nations General Assembly differed from the United States position by more than 85 percent, based on the contents of the report required to be transmitted under subsection (a), unless the President certifies to the Congress that national security or humanitarian reasons justify a waiver of the application of this section to a country. The President shall submit each waiver certification to the Congress.

(d) DEFINITION OF FOREIGN ASSISTANCE.—As used in this section, the term "foreign assistance" means any assistance provided under—

(1) the Foreign Assistance Act of 1961 (22 U.S.C. 2151 et seq.),

(2) the Arms Export Control Act (22 U.S.C. 2751 et seq.).

H.R. 1872

By Mr. BROWN of California:

—At the end of title II (page 29, after line 14) add the following new section:

SEC. 207. LIMITATION ON TESTING OF ANTI-SATELLITE WEAPONS.

The Secretary of Defense may not carry out a test of the Space Defense System (anti-satellite weapon) against an object in space until the President certifies to Congress that the Soviet Union has conducted, after the date of the enactment of this Act, a test against an object in space of a dedicated anti-satellite weapon. The prohibition in this section expires on October 1, 1986.

SENATE—*Wednesday, May 15, 1985*

(Legislative day of Monday, April 15, 1985)

The Senate met at 8:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

** * * when they knew God, they glorified Him not as God, neither were thankful * * *.*—Romans 1:21.

God of love and mercy, forgive us for ingratitude—for taking for granted daily, common blessings. We slept last night in clean, comfortable beds. Many slept in the streets or without shelter. We awakened this morning—many did not. We had reasons to get out of bed—many had no incentive to arise. We wasted water in showers and tubs—many had no water, not even to drink. We sat down to sumptuous breakfasts—many had nothing to eat this morning—nor yesterday—nor tomorrow. Dear God, we always have more than enough of everything—many never have enough of anything. Forgive us for ingratitude and the sin of presumption—receive our thanks for all of Your blessings—and make us mindful, compassionate, and responsive to those who never have the luxury of shelter, clean beds, full stomachs, and incentive to live. Thank You, gracious Lord. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, under the standing order, the leaders have 10 minutes each, followed by a special order in favor of the distinguished Senator from Wisconsin, Senator PROXMIRE.

Then we will have routine morning business, not to extend beyond the hour of 9 a.m., with statements limited therein to 5 minutes each.

Following that, I do intend to call up the conference report on H.R. 1869, repeal of the auto recordkeeping. I do not think that will take any great deal of time, but I wish to alert Members who may want to include statements or make statements on that rather important matter.

Then we will resume consideration of S. 960, the foreign aid authorization bill. I am advised by the managers on each side that unless something unforeseen happens, they feel certain they can finish it fairly early today, hopefully even earlier than they anticipate, perhaps by 2 o'clock.

Mr. President, we could then turn to the DOD authorization, if it is available. I will instruct the staff to see if there might be other possibilities such as clean air, clean water. There are a couple of other bills we might be able to take up.

I know the distinguished Senator from Connecticut is prepared to take up S. 407. We will see if we can clear that for action this afternoon.

Mr. President, I have been reminded that there is an amendment pending by the Senator from Massachusetts [Mr. KERRY], dealing with the Philippines. I am not familiar with all the details. It is anticipated that there will be a rollcall vote. That vote could come as early as 10:30 a.m.

It is also possible there could be a rollcall vote on the auto recordkeeping conference report. If that should occur, I would plan to postpone that vote until immediately preceding the vote on the Kerry amendment.

PEACE OFFICERS' MEMORIAL DAY/NATIONAL POLICE WEEK

Mr. DOLE. Mr. President, just last week this Nation and its allies and foes of World War II paused to remember the close of hostilities in Europe 40 years ago. In another 2 weeks we will again honor those who made the supreme sacrifice in defense of their country in our annual Memorial Day observances.

Yet today is also a day of remembrance, Mr. President, I refer to those who have made the supreme sacrifice in defense of their country to preserve domestic tranquillity. I refer to our peace officers who have fallen in the line of duty. Today is set aside by appropriate commemorative resolution as National Peace Officers' Memorial Day. It is the capstone of National Police Week. Now in its fourth year with congressional endorsement, this observance brings to a high level of public awareness the commitment and sacrifices of the more than half million men and women of more than 15,000 police organizations who lay their lives on the line of duty every day to protect us from the ravages of criminal activity.

More than a decade ago, a national study of our police was conducted by the Police Task Force of the National Advisory Commission on Criminal Justice Standards and Goals. This document, developed and written by police officials for use by police officials in their planning and operational activities, describes, with simple yet eloquent terms, what policing is about. I quote selectively from its first chapter:

> The police in the United States are not separate from the people. They draw their authority from the will and consent of the people, and they recruit their officers from them. The police are the instrument of the people to achieve and maintain order; their efforts are founded on principles of public service and ultimate responsibility to the public. . . .
>
> To a police officer, public service is more than a vague concept. When people need help, it is to a police officer that they are most likely to turn. He responds—immediately—without first ascertaining the status of the person in need. It does not matter if that person is rich or poor; he need not meet complicated criteria to qualify as a recipient of aid or as a potential client.
>
> Police officers are decisionmakers. A decision—whether to arrest, to make a referral, to seek prosecution, or to use force—has a profound effect on those a police officer serves. Most of these decisions must be made within the span of a few moments and within the physical context of the most aggravated social problems. Yet, the police officer is just as accountable for these decisions as the judge or corrections official is for decisions deliberated for months.
>
> The role the police officer plays in society is a difficult one; he must clearly understand complex social relationships to be effective. He is not only a part of the community he serves, and a part of the government that provides his formal base of authority, he is also a part of the criminal justice system that determines what course society will pursue to deter lawbreakers or rehabilitate offenders in the interest of public order. . . .
>
> Although local government provides many services the police are its most visible representatives. Because they are the agents of government who are most frequently in contact with the public, and because they are accessible around-the-clock, police are often contacted regarding services provided by other municipal, county, State, and Federal agencies. . . .
>
> The police are the criminal justice element in closest contact with the public; as a result, they are often blamed for failures in other parts of the system. In like manner, public confidence in the criminal justice system depends to a large extent on the trust that the people have in their police.

We, who ply the political sciences often think that we are the consumate public servants, that we are the true guardians of the public trust. However, Mr. President, I must stand aside in more than a little humility to contem-

plate the implications of the role of the police officer in the terms described above. What an opportunity for service—what a setting for sacrifice.

This week more than a 100 survivors are gathered here in Washington at a survivors seminar aimed at focusing attention upon some often overlooked victims of crime—the families of the slain officers. This gathering was sponsored jointly by the National Institute of Justice and Concerns for Police Survivors [COPS]. The aim of the seminar is to develop a clearer sense of the problems faced by the survivors and to find ways of helping and supporting the families in dealing with those problems.

In addressing this group, Lois Herrington, Assistant Attorney General for Justice Assistance, rightly observed:

> The loss of a loved one is always terrible. For the survivor of slain officers, the pain is compounded by society's callous assumption that death is simply an occupational hazard of law enforcement.

Mr. President, hundreds of people gathered today in the Senate park to pay tribute to the law enforcement officers who died in the line of duty over the past year. The memorial service was sponsored by the Grand Lodge Ladies Auxiliary of the Fraternal Order of Police, which has sponsored a similar service every year since 1982. I ask unanimous consent that the names of those officers honored at today's ceremony be placed in the RECORD at this point.

There being no objection, the names were ordered to be printed in the RECORD, as follows:

ROLLCALL OF HEROES

ALABAMA

David W. Campbell, Simmie L. Jeffries, Marcus L. Reid, Sharon K. Robinson, William O. Wilson.

ALASKA

Troy L. Duncan.

ARIZONA

Kenneth E. Campbell, Kevin W. Forsythe, Errol C. Hawkins, Robert L. Polmanteer, John A. Robertson.

ARKANSAS

Charles E. Barnes, Sr., Roy M. Brewer, Louis P. Bryant, Leonard E. Cross, William R. Gilham, Joseph Hutchins, Herman E. Jones, Sr., Robert W. Klein, Roy L. Leon, Jr., William T. Mills, Boyce Norwood.

CALIFORNIA

Edward J. Burch, Beauford L. Brooks, Ronald H. Fuller, David Holquin, Howard S. W. Huang, Duane C. Johnson, Arthur W. Koch, Michael W. McClung, Morley L. Miller, Errol J. Rogers, Timothy J. Ruopp, Chesley A. Stephens, Kimberly S. Tonahill, William C. Whitty.

COLORADO

Edgar B. Rains, Jr., Clifton Browning, Jr.

FLORIDA

Joel V. Broome, Mark C. Caperton, Jose R. DeLeon, Robert D. Edwards, Frederick J. Groves, Jr., Donald B. Kramer, Margaret E. Park, Eric B. Streeter, William A. Wilkerson, Anthony Yanniello.

GEORGIA

Thomas M. Bowen, Lee A. Crews, Stacy M. Fuller, James C. Haupfear, Ronald E. O'Neal.

ILLINOIS

Curtis Baker, Dorelle C. Brandon, Martin P. Clarke, John J. Collins, Fred Eckles, Jr., Bryan A. Keeney, Martin S. Murrin, Robert C. Reimann, Jr.

INDIANA

Ernest J. Malatinka, Harold L. Rogers.

IOWA

Bret N. Sunner.

KANSAS

James L. Reynolds.

KENTUCKY

Carnie F. Hopkins, Anthony E. Jansen, Donald R. Williams.

LOUISIANA

Harland M. Bonner, Carl R. D'Abadie, Warren Narcisse, Jr., Noel A. Smith, Edward Toefield, Jr., Sherman R. Walker.

MAINE

Donald E. Davey.

MARYLAND

Robert J. King, Marcellus Ward.

MASSACHUSETTS

Robert P. Dana, John J. Gilbert.

MICHIGAN

President Hinton, Jr., James S. Johnson, Robert J. Mihalik.

MISSISSIPPI

Jerry Bryant, Steven K. Gardner, William E. Lott, Jr., Jacquelyn K. Sherrill, James S. Wood.

MISSOURI

William H. Givens, Kenneth Koch.

MONTANA

Allen L. Kimery.

NEBRASKA

Robert J. Chab.

NEVADA

George T. Rice.

NEW JERSEY

William L. Carroll, Jr., Edward R. Errickson, Anthony J. Garaffa, Robert S. Heacock, Carlos M. Negron, Daniel J. Smith.

NEW MEXICO

Lowell D. Howard, Bruce A. Richard, David M. Smith.

NEW YORK

Juan E. Andino, Angelo E. Brown, James W. Carozza, Jr., John C. Hawley, Irma Lozada, Thomas P. Ruotolo, Ronald J. Siver, Richard B. Snyder.

UTAH

Charles H. Dickey, Jr., Rodney W. Schreurs.

VIRGINIA

James L. Biggs, George M. Brown, Sr., Douglas E. Drye, Lonnie L. Freeman, Robert T. Hicks, Donald A. Stillman, John C. Thomas III.

WASHINGTON

Nicholas N. Davis, Winfield S. Edie, Terry L. Hoffer, Michael L. Raburn.

WEST VIRGINIA

Harry G. Lucas, Jr.

WISCONSIN

Stuart J. Searles.

DISTRICT OF COLUMBIA

Christopher S. Eney.

PUERTO RICO

Carlos J. Andaluz Mendez, Dario Figueroa Rodriguez, Hilarino Silva Rosario.

Mr. DOLE. Mr. President, as we honor the memories of these men and women who sacrificed their lives, let us be mindful of their survivors as well. We pay our highest honor to these heroes, extend our deepest sympathies to their survivors, and give our lasting gratitude to them.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. WEICKER). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDING OFFICER. The acting minority leader is recognized.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the time of the minority leader be reserved for his use later in the day.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE] is recognized for not to exceed 15 minutes.

CONGRESS SHOULD ACT NOW TO PRESERVE ASAT TEST MORATORIUM

Mr. PROXMIRE. Mr. President, there is one issue that more clearly and clearly divides those who believe

in arms control as the principal salvation of a peaceful world from those who believe that the deterrence of sheer military power provides the realistic way to peace. That issue is the testing of antisatellite weapons. This is an urgent issue. The Senate must act on it in the next few weeks or even days. The President with all of the immense power and prestige of his status as Commander in Chief of the Armed Forces and as the Nation's No. 1 legislator seems firmly on the side of proceeding with antisatellite testing. Some of us in the Congress strongly disagree. Unless the Congress adopts legislation to continue the moratorium on ASAT testing, the fragile, tacit restraint both superpowers have pursued since August 1983 in refraining from ASAT testing against targets in space will probably end next month. Our Air Force has engaged in testing against a point in space. That testing has not provoked the Soviets to resume ASAT testing and development. Testing against targets, however, is very likely to provoke advanced Soviet testing ASAT and the arms race would be on.

Why does the administration want to shatter this moratorium? The Air Force has developed a new American ASAT—a two stage missile to be launched from an F-15 jet fighter. It uses a special infrared homing device. It is tipped with a small nonexplosive warhead. The warhead is not nuclear. Once it has been sufficiently tested and has become operational, it would be far in advance of the relatively primitive ASAT system now used by the Soviets. Such a U.S. development would very likely trigger a vigorous Soviet response to match or surpass the ASAT technology. This would make it very hard to stop an ASAT arms race. ASAT arms control would be dead.

Now Mr. President, if ever there were an arms race that no one could win, this would be it. Both superpowers would lose. Which, if either, superpower would be the bigger loser? Answer: Ultimately, the United States would be the biggest and surest loser. Why? First we have an open society. American newspapers and technical journals are full of our latest and newest military developments. Movement in and around this country by anyone is virtually unrestricted. Hundreds of thousands of people swarm around this country every day with cameras taking pictures of everything from children at play, young women in bathing suits to our missiles, our bomber bases, our submarine pens and much of our military establishment. So the Soviet Union is clearly less dependent on satellite photographic capability than the United States. Satellites are helpful to Soviet intelligence. But they are absolutely critical to the United States. If both countries should lose their satellites to antisatellite attack, can there be any doubt which country would suffer the greater loss?

How can the United States monitor military developments in the Soviet Union without satellite intelligence? A few weeks ago a young American officer was murdered by a Soviet soldier. Why? Because the American officer was taking a picture that the Soviets feared might provide this country with military information about Soviet military power.

Mr. President, that murdered American officer was not even taking pictures in the Soviet Union. He was taking pictures in East Germany. When an American plane wandered off course into Soviet territory a couple of years ago, the Soviets feared it might be on an intelligence mission. They shot it down. Travel in the Soviet Union, even by native Russians, is rigorously restricted. As we know, there is no free, inquiring, investigative press in the Soviet Union that lets all the world in on Soviet military activities. The central Communist Government controls every word printed in every newspaper, book, pamphlet, or technical report. Nothing, but nothing, useful about the Soviet military is revealed except with the approval and knowledge of the Kremlin. Radio, television, virtually any kind of speech to more than a tiny handful of people is carefully controlled and limited in that police state. So how does the United States derive its knowledge of the Soviet Union? The answer, Mr. President, is by satellite. William Colby, the former head of our Central Intelligence Agency, has told the Defense Appropriations Subcommittee of this body of the marvels of information about the Soviet Union that we can determine in astonishing detail by our satellites. Colby has called the satellite reconnaissance far more reliable, accurate, timely and useful than the information we can get from personal observers.

So, who loses if we violate the tacit restraint both superpowers have pursued for nearly 2 years in antisatellite testing? Can there be any question that the United States is bound to be the ultimate loser? Both nations lose. Both lose because we destroy the prime technological necessity of an effective arms control agreement—technological verification—a verification that can only come from satellites.

Mr. President, what is the answer to this? Those who favor moving ahead with our ASAT program contend that the Soviets have a deployed ASAT system right now that we must counter. The fact is that the Soviets do indeed have an ASAT system deployed. It is similar to the system we had deployed about 15 years ago. It is a ground-launched weapon that can only reach low-orbit satellites. It could not touch most of our command, control, and communications satellites. They are in high orbit far out of reach of the Soviet ASAT. The new, untested F-15 American ASAT is low-orbit, but so are the Soviets' command, control, communications and their intelligence satellites, too.

The testing and operational deployment of our new ASAT's would give this country military superiority in space. So why not seize and exploit that superiority? The answer, Mr. President, is that we should not push ahead with this arms race even though we win the first lap, going away. Unless we expect to be at war with the Soviet Union in the next 5 or 6 years or so, this ASAT race would be a big loser for our country. The race would move swiftly to the development of high-orbit satellite killers by both superpowers. And there goes the present invulnerability of our vital command, control, and communications satellites and what was left of our intelligence satellites.

With our satellites dead, our eyes in the skies would be blinded. We would be shut out from knowledge of military developments in our adversary, the super-closed society of the Soviet Union. They would lose their satellite intelligence, too. But the Soviets would still have the ability to learn a great deal about the military activities of our wide-open country. So if we cut loose with ASAT testing against targets in space next month, as the Air Force plans, we lose and we lose big.

Mr. President, I ask unanimous consent that an excellent statement set forth by the Council for a Livable World in support of preserving the ASAT test moratorium be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

COUNCIL FOR A LIVABLE WORLD REPORT—PRESERVE THE ASAT TEST MORATORIUM

Last year, Congress mandated a moratorium on U.S. anti-satellite (ASAT) weapon testing against objects in space at least until March 1, 1985. The moratorium remains in effect today. Congress enacted this measure last October in the hope that mutual U.S.-Soviet restraint would enhance the prospects for a negotiated treaty banning or strictly limiting these space-directed systems. The Soviets had earlier adopted a policy of restraint in August 1983 when Yuri Andropov announced that the Soviet Union would not conduct ASAT tests for as long as the United States reciprocated.

THE U.S. ASAT PROGRAM

The U.S. Air Force has developed and begun initial testing of a highly sophisticated anti-satellite weapon, the third American ASAT system. The two previous U.S. ASATs were developed and deployed in the 1960s and early 1970s; these earlier versions consisted of ground-launched, nuclear-tipped missiles that would explode within close range of an orbiting target satellite.

The new American ASAT, however, is not a ground-launched weapon and it is non-nuclear. It is an 18-foot two-stage missile carried beneath and launched from an F-15 jet fighter. This new ASAT, often called the F-15 ASAT, is tipped with a small non-explosive warhead that separates from the missile to destroy a satellite target by impact. The warhead uses a special infrared homing device and is commonly referred to as the Miniature Homing Vehicle (MHV). In January 1984, the Air Force conducted a flight test of the F-15 ASAT that successfully demonstrated separation of the two stages of the ASAT missile. In a later flight test, conducted in November 1984, the ASAT was fired successfully at a point in space. The F-15 ASAT has not been tested since then, and has never been tested against a target in space.

According to Administration officials, the Air Force plans to conduct its first test against a target in space this June. Despite the initial flight tests of the U.S. F-15 ASAT last year, the Soviets still have not conducted any ASAT tests since Andropov's declaration in August 1983. In fact, the last Soviet ASAT test occurred in June 1982. However, the Soviets have indicated that they may resume ASAT testing if the United States proceeds with further testing.

Two important factors should be underscored—first, the United States has not begun testing the new F-15 ASAT against targets in space, and second, the Air Force is preparing to begin such tests later this year. The F-15 ASAT, like any newly-developed weapon system, must undergo a series of tests in simulation of its intended military role before it can be declared operational. This is a critical consideration in the current ASAT debate because once a sufficient number of such tests has been completed the Soviets must assume and act as if the ASAT system is fully operational.

If the F-15 ASAT reaches an operational state, given the missile's small size and hidden deployment position beneath the F-15, the Soviets would find it difficult—if not impossible—to locate and monitor deployed U.S. ASATs by satellite reconnaisance. An ASAT ban or even strict limitations would be extremely difficult to achieve without such verification capability. Moreover, this new weapon system, unlike the ASATs deployed by the United States in the past, would pose a very credible threat to the Soviets' strategic satellites because of its range, speed and accuracy. In sum, a successful ASAT test program by the United States will trigger a determined and intensive Soviet effort to match this advanced ASAT technology, and diminish the potential for ASTA arms control.

IMPLICATIONS OF A U.S.-SOVIET ASAT COMPETITION

The most frequently used argument in favor of testing and deployment of the new U.S. ASAT is that the Soviets have a deployed ASAT system which we must counter. The Soviets, ASAT is similar to the second U.S. ASAT which was deployed during the late 60s and early 70s. It is a ground-launched weapon, launched from a massive booster. The Soviet ASAT succeeds by entering orbit, circling the earth until within striking distance of its target, and then exploding a non-nuclear warhead which sprays the target satellite with shrapnel. This Soviet ASAT can only strike low orbit satellites; it is recognized to be a primitive system which poses virtually no threat to our vital, high orbit military satellites. With our reconnaissance satellites, we can readily determine when and where Soviet ASATs are deployed.

The vast majority of our military command, control, communications and intelligence (C^3I) satellites are in high orbit, out of reach for the low orbit Soviet ASAT. The U.S. F-15 ASAT is also a low orbit system. However, it would be highly effective against the Soviets, C^3I system because most of their vital strategic satellites are in low orbit. In the near term, therefore, the F-15 ASAT would give the United States a significant ASAT edge—a tempting proposition if immediate, military superiority in space is our goal.

In the long term, however, an escalating U.S.-Soviet ASAT competition would be extremely detrimental to our military security. Under the conditions of competing and unrestrained ASAT advances, U.S. and Soviet research and development are likely to produce high orbit ASATs. This means that in the future, our most vital strategic satellites would be threatened by Soviet ASATs. The security of our strategic military forces would then be jeopardized. Moreover, the United States relies far more on satellites for communications and intelligence operations than does the Soviet Union. For example, the United States must use satellites to gather the type of Soviet information that is frequently unclassified in the United States and available to Congress, the public, and therefore the Soviets. It would be extreme folly for the United States to be seduced by the short-term prospect of an edge in ASAT technology when, in the long run, the United States will have far more to lose in an unrestrained ASAT race. The time is now to avoid the trap of inevitable U.S. and Soviet ASAT developments that would put both low and high orbit satellites at risk.

U.S. ASAT POLICY: RECOMMENDATION FOR IMMEDIATE ACTION

Recognizing the gravity of the long-term ramifications of a U.S.-Soviet ASAT competition, the United States in 1978 adopted a "dual-track" policy for this type of weaponry. That year, the United States launched a two-pronged effort—to develop a new weapon (to become the F-15 ASAT), and to negotiate an agreement with the Soviet Union to ban these weapons. The threat posed by the advancing weapon program, it was argued, would give the United States valuable bargaining leverage. Pressure on the Soviets to head off testing and deployment of the forthcoming U.S. ASAT was expected to motivate them to agree to dismantle their ASAT system and, more importantly, not to deploy new ASATs. U.S.-Soviet ASAT negotiations began in June 1978 and continued until July of 1979. After the Soviet invasion of Afghanistan later that year the talks were called off.

The U.S. ASAT program as it stands—on the verge of testing against targets in space—offers a valuable bargaining tool for the U.S. negotiators who have begun space weaponry discussions in Geneva. The Soviets have made it very clear that they are willing and anxious to bargain seriously on ASATs; it is now vitally in their national security interests, as it is in ours. The United States can take full advantage of this leverage by proposing an ASAT treaty to halt the burgeoning ASAT race. A U.S. decision to proceed with tests against targets in space will seriously undermine the chances for success at Geneva.

The ASAT amendment legislated by Congress last fall stipulated that the United States could not conduct ASAT tests against targets in space before March 1, 1985. To begin such tests, the President must report to Congress on U.S. ASAT policy and wait 15 days; the United States may then conduct up to three tests during this fiscal year, which ends on October 1.

Without further legislative action, the decision to proceed or not to proceed with these crucial tests against targets in space is left entirely in the hands of the President. The report requirement poses no obstacle—Reagan will more than likely submit the report to Congress about 15 days before the first test is scheduled, giving proponents of the moratorium the least possible time to react. If Reagan remains committed to the current plans to begin the tests in this fiscal year, it is up to Congress to adopt legislation that would bar the tests.

On April 3, 1985, Senators John Kerry (D-Mass.), John Chafee (R-R.I.) and Charles McC. Mathias (R-Md.) introduced S. 885, a bill which mandates a continuation of the ASAT test moratorium at least until the end of fiscal 1986. This resolution is binding legislation. If enacted, it would prohibit U.S. ASAT tests against objects in space unless the Soviets (1) refuse to continue negotiating on anti-satellite weaponry or (2) conduct an ASAT test against an object in space.

Adoption of the Kerry-Chafee-Mathias bill would demonstrate sound judgement and strategic foresight. The success of the Geneva discussion on defensive weapons may depend on the willingness of both sides to refrain from technological advances in space weaponry that will provoke a breakdown of the negotiations and launch a spiraling space arms race. If the Reagan Administration genuinely wants to enhance our national security and negotiate a treaty to ban or strictly limit ASATs, the ASAT test moratorium currently being observed by both nations must be preserved. A U.S. decision to conduct ASAT tests would increase U.S.-Soviet tensions, complicate the negotiations, and significantly reduce the prospects for an ASAT treaty. At the very best, a U.S. policy of pushing ahead with testing of the F-15 ASAT, before reaching any bilateral ASAT agreement, would create extremely inauspicious circumstances for the recently renewed negotiations on space weapons—if not across the arms control board.

THE GENOCIDE CONVENTION WILL NOT OVERRIDE THE CONSTITUTION

Mr. PROXMIRE. Mr. President, recently, opponents of the Genocide Convention have once again started claiming that the treaty would override the U.S. Constitution.

The answer to these allegations is a resounding "no way!" The Genocide Convention is completely constitutional. Not just in my view. That is a position shared by the American Bar Association, the Reagan administration, and experts ranging from the American Civil Liberties Union, on the left of our political spectrum, to William Rehnquist, one of the most conservative Supreme Court Justices.

In fact, William Rehnquist testified before the Senate Foreign Relations Committee on behalf of the Nixon administration in 1970. He was then serv-

ing as an assistant attorney general, Office of Legal Counsel, and his testimony resoundingly repudiates these allegations.

First, he made it clear that "the treaty is entirely constitutional."

Second, he noted that "the Constitution is superior to any treaty no matter how interpreted." He noted that the controlling Supreme Court case was Reid versus Covert (1957) whose language is straightforward on this point. He testified:

There is nothing in this language (the supremacy clause) which intimates that treaties and laws enacted pursuant to them do not have to comply with the provisions of the Constitution. Nor is there anything in the debates which accompanied the drafting and ratification of the Constitution which even suggest such a result. It would be manifestly contrary to the objectives of those who created the Constitution, as well as those who were responsible for the Bill of Rights—let alone alien to our entire constitutional history and tradition—to construe Article VI as permitting the United States to exercise power under an international agreement without observing constitutional prohibitions.

The prohibitions of the Constitution were designed to apply to all branches of the National Government and they cannot be nullified by the Executive or by the Executive and the Senate combined.

Third, when asked whether treaties became the supreme law of the land, implying that they would be superior to domestic Federal law, Mr. Rehnquist responded:

Senator, I do not think that is a full statement.

The Constitution says all laws made in pursuance thereof, and all treaties made under the authority of the United States shall be the supreme law of the land. I am paraphrasing, but it puts laws and treaties of equal dignity.

Fourth, Mr. Rehnquist reaffirmed that Americans' right of free speech could not be affected by a treaty and would not be affected by this treaty in any way. Racial slurs or ethnic jokes do not constitute genocide under the plain language of the treaty. Moreover, only actions taken with intent to physically destroy the group constitute genocide.

Finally, Mr. Rehnquist killed two birds with one stone by describing the impact that any opinion of the world court might have on American citizens and the role of treaties vis-a-vis the Constitution when he notes that:

• • • nothing the ICJ [International Court of Justice] said on the subject would have any bearing on the rights of Americans because the Constitution is superior to any Treaty no matter how interpreted.

Without question, no treaty or domestic Federal law is valid unless it is consonant with the provisions of the Constitution and both must bow before any constitutional prohibitions. That is the way it should be.

Mr. President, this body regularly approves treaties which protect the lives of migratory birds and whales. How can we refuse to ratify a treaty which protects the all-important right of groups of people to live without the fear of extinction? How can we fail to speak out against genocide, the most horrible crime attributed to man?

Since every constitutional argument raised against the Genocide Convention has been refuted, what is this body waiting for? Mr. President, I once again urge my colleagues to ratify the treaty.

DON LAMBRO'S 10 WORST BOONDOGGLES

Mr. PROXMIRE. Mr. President, the first issue of a new publication, "The Taxpayer's Lobbyist"—that is volume 1, No. 1 carries a lead article by Donald Lambro. He has written an article titled: "Washington's 10 Worst Boondoggles." Lambro has made himself the supreme expert on waste in Government. No widely read columnist in America has so consistently and effectively exposed, highlighted, documented and raised such unshirted hades about wasting the taxpayer's money as Donald Lambro. The article in the Taxpayer's Lobbyist is terse and simple. Most, but not all of these boondoggles survived the recently passed Senate budget resolution. Some were eliminated. Some were trimmed. Some were frozen. But all of them may be revived later, possibly later this year in the House of Representatives.

Mr. President, I ask unanimous consent that the article to which I have referred by Donald Lambro be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Taxpayer's Lobbyist, April 1985]

WASHINGTON'S 10 WORST BOONDOGGLES

(By Donald Lambro)

"You haven't any suggestions, have you, of more places that we can find to cut the budget?" President Reagan once asked me during an Oval Office interview.

Indeed I had. Finding ways to shrink the bloated federal budget is one of my principal jobs as an investigative reporter. My twice-weekly, nationally syndicated column regularly roots out and exposes wasteful federal spending. And I'm especially pleased that many of the budget-cutting recommendations I've made in my column, and in my new book *Washington—City of Scandals*, have been adopted by President Reagan in his latest budget proposals to Congress.

Now the ball is in Congress's court as lawmakers battle over how to trim between $40 and $50 billion from next year's estimated deficit of $200 billion. But enacting a meaningful deficit-cutting bill isn't going to be easy. It's going to take an aroused, highly-motivated and well-informed army of concerned tax-payers to put the pressure on Congress to *stop runaway spending now.*

That's why I eagerly agreed to a request from *The Taxpayer's Lobbyist* to name what I consider the most wasteful federal spending programs in existence. It's a tough assignment, because out of the hundreds of programs and expenditures I have investigated, dozens immediately come to mind as among the worst.

But after considerable thought, I've picked the following federal boondoggles as the 10 *most* indefensible. Here is spending that cries out to be abolished:

1. *Revenue Sharing.* How does Congress justify giving $4.6 billion a year in no-strings-attached revenue-sharing checks to over 39,000 localities, thousands of which regularly run up budget surpluses?

Bear in mind that the deficit-ridden U.S. Treasury must borrow the money for revenue-sharing programs, in order to give it away to every community in America. Who gets this money? A lot of communities that by no stretch of the imagination deserve it. Wealthy Palm Springs, California gets $660,000 each year. Ritzy Beverly Hills pockets $220,000. And Grosse Point, Michigan, where the median family income is nearly $70,000 a year, also gets an annual subsidy from Uncle Sam. Thousands of similarly upper-crust communities receive yearly checks from the federal government.

2. *Urban Development Action Grants.* This heavily politicized, $444 million discretionary slush fund in the Department of Housing and Urban Development gives most of its money to a handful of cities. Twenty big municipalities scoop up 44 percent of all UDAG dollars—and use the money to assist downtown corporate development. UDAGs have helped to build 262 luxury hotels; to subsidize upper and middle class housing projects; and, to enrich giant businesses like the Hyatt Corporation, Sherwin-Williams, and General Motors.

UDAG supporters claim that the grants create new jobs. But the Office of Management and Budget disagrees, saying UDAGs "do not add to national investment or job creation. Federal economic development subsidies politically reshuffle the national economic pie—not expand it."

3. *National Institute of Education.* For years this $48 million research arm of the Department of Education has been handing out esoteric and wasteful research grants that have done nothing to improve the education of our children.

Among NIE's useless research projects: A catalogue on early American textbooks, costing $34,000; a legal history of American colleges, with a price tag of $80,000; and a study on "Sex Role Attitudes in Young Women and Men", which cost $102,000.

4. *Small Business Administration.* This scandal-plagued program assists very few of America's 14.3 million small businesses. Indeed, a full *98 percent* of the nearly 600,000 new businesses born each year are created without any SBA help. The recipients of SBA's loans and 8 (a) assistance programs are often determined by political and congressional pressure on the agency, not by sound business decisions.

OMB explains that most of SBA's loan subsidies "go to economic strap hangers—weak businesses who get repeated SBA loans." Indeed, 77 percent of all SBA borrowers in the first half of 1983 were repeat customers. Eliminating the agency would save $576 million next year. President Reagan has asked Congress to do so, but faces great opposition from legislators who put the demands of inefficient businesses ahead of the national interest.

5. *Export-Import Bank.* A handful of big corporations reap most of the benefits of subsidized Ex-Im loans. Out of more than $3.1 billion issued in such loans in 1982, 44 percent benefited just 10 corporations,

seven of which are Fortune 500 companies! The list includes Boeing, General Electric and Westinghouse—corporations that need no federal handouts to compete in world markets. Terminating Ex-Im's direct-loan program would save $400 million next year, and more than $1.4 *billion* in 1987.

6. *Coast Guard User Fees.* Almost all of the Coast Guard's services are provided free of charge to private and commercial boat owners—including over 9 million recreational boats—at great cost to taxpayers. Levying a reasonable system of user fees, as proposed by the Administration, would raise more than $1 billion over a three-year period.

7. *Community Development Block Grants.* Thousands of well-to-do upper and middle class communities are now cashing in on this $3.5 billion grant program, which was originally set up to help low-income people. My investigation shows CDBGs going to middle-class localities like Newport Beach, California, and Stamford, Connecticut. The program has also provided $88 million to oil-rich Dallas, and $2.3 million to Arlington County, VA., one of the nation's wealthiest counties.

If it keeps this program at all, Congress should restrict CDBGs to America's poorest communities. Minimum savings: $1 billion.

8. *Military Commissaries.* America's 238 military commissaries are selling subsidized cut-rate groceries to active-duty personnel, as well as to military retirees in second-career jobs. By modestly raising their prices, these stores could still pass a hefty 10-15 percent savings on to their customers. Eliminating the subsidies would save $758 million a year.

9. *Rural Electrification Administration.* Can *you* get a loan at 5 percent, with 35 years to pay it off? These are REA's taxpayer-subsidized terms for direct loans to electric cooperatives and telephone utilities, which are owned by big, tax-exempt cooperatives or indepentent corporations.

REA subsidies will total $2.6 billion next year. Many of the agency's once-rural customers have become big businesses and suburban residential users who profit from substantially reduced electric rates, courtesy of the federal taxpayer. Savings from an REA phase-out: $5.1 billion over the next five years.

10. *Airline Subsidies.* Since 1978, taxpayers have shelled out nearly a half-billion dollars in subsidies to air carriers, in order to preserve allegedly "essential service" to smaller communities during the transition into airline deregulation. Today, with deregulation giving birth to many new, smaller airlines, these subsidies are no longer needed.

Nearly half of the subsidized markets are within 100 miles of a major airport. Thus, the federal handouts fund inefficient and unfair competition with cheaper transportation alternatives, such as buses and passenger vans. For example, the Office of Management and Budget found that the per person, roundtrip subsidy to fly from Los Angeles to Blythe, Calif. was $1,096. "At 80 cents per mile," OMB says, "the same passenger could have used the subsidy to take a taxi to Las Vegas, lose $500 at blackjack, and take a taxi home, with cash to spare."

(Donald Lambro is a nationally syndicated Washington columnist, author and radio commentator. His twice-weekly investigative column, which appears in newspapers from coast to coast, is distributed by United Feature Syndicate. Mr. Lambro has achieved a national reputation for his aggressive investigations into federal spending programs. The author of four books on the government, Mr. Lambro's most recent book is Washington—City of Scandals, published by Little, Brown and Company.)

Mr. PROXMIRE. Mr. President, I yield the floor.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond the hour of 9 a.m., with statements therein limited to 5 minutes each.

THE PROBLEMS OF THE AMERICAN FARMER

Mr. MELCHER. Mr. President, American farmers are not receiving enough for the products that they produce in order to show a profit. For many of the agricultural producers in America, that means this may be their last year as farmers and ranchers. The prices that they receive for their commodities are lower now than they were in 1980, and 1980 was no particularly good year.

I do believe that this tragedy of continuing foreclosure or liquidation of farms and ranches throughout the country is one that must be reversed. Part of the reason that the agricultural producers are having so much problem in net farm income is that the American dollar is very strong and there is a great disparity between our money and the value of money in other countries, which makes our exports very high, based on the strong dollar, and imports relatively cheap.

A particular case in point is Canada where the disparity between their dollar and ours is about 32 to 34 percent. Cattle and hogs from Canada yield much more for Canadian producers if they are sold in the United States than if they are sold in Canada. Because of that, American buyers for packing companies are, of course, going to Canada and buying as much supply as they can, bringing them into the United States and having them slaughtered.

The devastation which that causes for the cattle and hog feeders cannot be overly exaggerated. They are simply going broke very quickly. Agricultural producers in short are getting the very dirty end of the stick.

During the consideration of S. 960 I think we should discuss the disparity of our dollar versus the Canadian dollar and seek some restraint by the Canadian Government, that is, to restrict the movement of Canadian cattle and hogs to U.S. markets and thereby exacerbating the very serious situation in which our pork and beef producers find themselves today.

There is another bill that is being considered in the Senate Agriculture Committee. It is in the initial stages of markup. That is a new farm bill. The first section of that bill is trade expansion, and I think that bodes well for agriculture producers in this country, providing we act quickly and with some meaning and purpose to expand exports of U.S. agriculture products.

We cannot forget about those who are hungry in the United States and I do not believe we will. At least this is the first indication we have had that the committee is sensitive to this point and that we will be careful in looking at food stamps, school lunches, and women and children nutrition programs that come under the jurisdiction of our committee.

But beyond that, if we are going to give any hope to the hard-pressed agricultural producers of this country, we must look at the export-import side, try to expand our exports and limit imports when they are extremely damaging to domestic producers.

That is our first task, and I am encouraged that the committee has decided the trade section of the bill will be that part first marked up.

TRIBUTE TO DAVID BERKE

Mr. WEICKER. Mr. President, during the long days of deliberation on the budget, the process of times seemed reduced to a mathematical problem to be solved. In trying to deal with a complex issue, our focus often narrows to the point where we lose sight of the whole picture. Today I want to share with my colleagues an eloquent reminder of what our job here is all about. David Berke, a young man from Connecticut, wrote some poems expressing his concern for the future. He described very accurately the kind of decisions we are making here in Congress—decisions on the quality of life for our children and their children. David was killed in an automobile accident not long ago. We are fortunate to have his thoughts with us as we go about our job.

The poems follow:

POEMS OF DAVID BERKE

It is said this country was made great,
long ago by farsighted men,
who invested in their hope in the future,
for the benefit of their children's children.

Do you go with the short term investment,
that will make you very happy right now?
Or do you invest in and plan for the future,
which might not show up some how?

Your short term may even go sour,
it might not get into the black,
yet you might spark a new innovation,
which will turn the others all back.

To start the long term investment,
a very high price you will pay.
To give up the short run will cost you,
something you might even regret someday.

The question that will face us tomorrow,
is do we see the profits right now—
or forget the pleasure and sorrow
and think of the future somehow.

Now if these men had all lived today,
would they see the way that I see?
Is love just a short term benefit
or a long term investment for me?

I can't trust those around me
I don't like my race
We're crummy, we're cruel, we're dirty
and just plain two-faced.

I keep hearing a peace—
How the world should be run
Why can't we all be happy as one?

Yet we're building more planes
and building more guns,
hoping someday it won't have to come.

Missiles and bombers,
tanks and planes
Sometimes I think we're all just insane.

Someday we'll do it
the Die will be cast,
No one around to tell of our past.

It may be too late
someday you'll see
We'll all be just shadows
Including you, your neighbor and me.

It's finally happened
It's finally done,
There will be Peace on Earth
for all time to come.●

CHILDREN'S HOME SOCIETY OF FLORIDA

Mrs. HAWKINS. Mr. President, the Children's Home Society of Florida employs a very simple statement which embodies the focus of their work and their single objective over the years: "For every child the kind of care he needs."

This worthy organization is 82 years old but their programs are even more needed today. I would like to take this opportunity to draw attention to just a few of the programs supported by the Children's Home Society.

Plans are presently underway for the society's newest and largest facility for previously hospitalized, abused children, the McLamore Center in Miami, FL. The center will care for children who are able to leave the hospital but may otherwise have no safe place to go.

They have also joined with the Kugelman Foundation to establish the Kugelman Family Counseling Center in Pensacola, FL. The center attempts to solve problems that can destroy family unity.

The center also provides foster parents for children awaiting adoption. Other CHS homes provide therapeutic services and training for retarded children. In addition, the Children's Home Society operates a number of outstanding residential care facilities for children.

Other CHS foster homes provide therapeutic services and training for retarded children. Professional counselors work with the families of retarded youngsters with the goal of keeping them at home and out of an institution. CHS also operates a number of outstanding residential care facilities for children. The Thad and Loca Lee Buckner Division offers a home, counseling and educational opportunities for pregnant young women while they await childbirth. Additionally, Buckner Manor serves as a shelter for abused young women who need protection and care.

Keeping families together has been a primary goal of the society. Through counseling and direct assistance in home life, their staff of professional family counselors help parents solve problems that can, if solved, disrupt the family and lead to the removal of the children from their homes.

The society also offers counseling and training programs designed to keep pregnant teens and young parents from dropping out of school. CHS programs have been acclaimed by school and community leaders for success in breaking the pattern of welfare dependency and child abuse for thousands of young people.

VETERANS JOB BANK

Mr. PRESSLER. Mr. President, I speak today on an important program for increasing the employment prospects of our Nation's veterans. Over the past several years, much work has been done in developing a computerized job bank that will allow veterans to locate jobs for which they are qualified from coast to coast. Currently, most employment notices are sent to job service offices across the country by mail and the lag time can be up to 2 weeks. Often, by the time a person responds to the notice, the job has long since been filled.

Recently, I joined Senator KERRY in introducing legislation which would extend and reorganize the Emergency Veterans Job Training Act of 1983. An important part of this bill would provide funding for a veterans national job bank. Earlier this year, Partnerships Data Net received an ACTION grant to develop such a system. The concept for the job bank was formed by the Vietnam Veterans Leadership Program [VVLP], an ACTION project.

The veterans national job bank will have the capability to operate effectively on the local, State, and national levels, with the basis for communication being CompuServe mainframe computers. The computer network will provide millions of employers with access to a bank of qualified veterans applicants for employment and training, as well as provide veteran small businesses with procurement opportunities. The system will reduce the time necessary to process paperwork, exchange information, market programs, develop jobs, post listings, and match veterans with job and training openings from days and weeks, down to a few minutes.

The veterans job bank will have the following capabilities:

Assess a veteran by education, past work experience, military training and experience, and/or aptitude tests and match that veteran with an appropriate occupation out of the 12,375 occupations defined in the Dictionary of Occupational Titles [DOT];

Match civilian and military occupations, training and work experience to industries and specific employers that would employ those occupations. The system will have information supplied by Dun & Bradstreet on 6 million employers;

Assist veterans affirmative action programs required by section 2012 of title 38 United States Code, by listing all suitable openings by Federal contractors and subcontractors;

Develop good career and training opportunities in the large segments of the private sector traditionally not accessed by Federal employment and training programs;

Enable private sector employers to post job and training openings directly to the computer;

Match employers and employees to special programs such as the Emergency Veterans Job Training Act [EVJTA]; and

Match recently separated servicemen and military reservists and guardsmen to civilian occupations that will utilize their military skills, enhancing not only recruiting job promises, but also military readiness.

The computerized veterans job bank would be invaluable to the Department of Labor's Job Service Local Veterans Employment representatives and Disabled Veterans Outreach Program personnel, as well as the Veterans' Administration's rehabilitation counseling offices, vet center facilities, and VA regional offices.

Also, any public or private sector employer with a computer and modem could utilize this system, making it far easier and faster for employers to post jobs and receive qualified applicant referrals than do current job service practices. The Veterans Service Organization and service officers, military recruiting and separation points, and educational institutions would also be positively affected.

The following is a list of those organizations which are currently participating in the development of the veterans job bank:

1. Partnerships Data Net (PDN). PDN is a 501(c)(3) not-for-profit organization whose mission is to facilitate and to implement partnerships between the public and private sectors. Organized in part by the White House Office of Private Sector Initiatives, PDN is intended to be a network of networks. Its membership includes the National Association of Manufacturers, and the Young Presidents Organization, as well as federal, state, and local governments and civil and community organizations. The Job Bank will fall under the overall umbrella of PDN and will involve the active participation and interaction of much of its membership through computer linkages.

2. The Vietnam Veterans Leadership Program (VVLP). VVLP will use its network of successful Vietnam veteran volunteers to market the computer network to the private sector and to develop employment and training opportunities using the system. VVLP, in certain instances, will also counsel, prescreen, and provide supportive services to veterans participating in the Job Bank. Some chapters of the Vietnam Veterans of America will participate in the system in a similar capacity.

3. CompuServe. Partnerships Data Net has a contract with CompuServe, Inc. CompuServe has the nationwide telecommunications network, computing services, software and other resources to implement the system within four months. Using CompuServe's network services, all parties participating in the program can do assessments, exchange information, post jobs and match veterans with employers by using a wide variety of computer hardware and software.

4. PESCO Data Base. The system will use the PESCO (Progressive Evaluation Systems Company) data base which contains all 12,375 occupations defined in the federal government Dictionary of Occupational Titles. Each occupation has a narrative description of the occupation broken down into specific tasks which can be used as a training outline. Each occupation contains 112 separate categories of information on the educational level, physical demands, temperaments, and aptitudes necessary, as well as the length and type of training required to become proficient in a specific occupation.

5. Dun and Bradstreet. This firm is the largest compiler of business information in the world. The Dun and Bradstreet data base contains information on five million American employers. The Job Service accesses only about ten percent of the employers in the country. The Dun and Bradstreet data base will identify almost every employer in the country, along with the major occupations they employ, thus facilitating highly targeted job development. The Dun and Bradstreet data base can readily identify high tech and growth industries. The data base will also provide information on federal procurement requests and federal contractors. The Job Bank will be able to identify federal contractors subject to affirmative action requirements for veterans. The system will also serve as the basis for veteran small businesses to obtain subcontracts and bid on a timely basis on procurement notices.

6. Booz Allen and Hamilton, Inc. This firm is one of the nation's largest management consulting firms. Its data base correlates 8,000 Military Occupational Specialties (MOS) to over 1000 civilian occupations, as well as civilian training and apprenticeship programs. This data base will enable recently separated servicepersons to make maximum use of their military training and experience in starting a civilian career. It will also enhance National Guard and Reserve recruiting and readiness by providing civilian careers which are compatible with the military mission and training.

The veterans job bank is initially for veterans, but can be readily adapted to serve the entire labor market. By fulfilling statutory responsibilities exclusively for veterans and ensuring critical quality control, employers will be more likely to post good career opportunities for veterans than they would if the system were initially wide open to all clients. The appropriate careers for the majority of unemployed and underemployed veterans are often very different than the low paying, entry level jobs traditionally available through Federal employment, training, and placement systems.

All the resources to develop the comprehensive national job bank and assessment system exist in the private sector, as stated earlier. The system will be programmed and on-line for demonstration purposes in 4 or 5 months.

Operational cost for the first year of use of the system will be approximately $4 million. The Department of Labor has requested $800,000 for computer hardware in its offices. Most other end users already have the necessary computer hardware. Local employment service offices can purchase terminals and printers—under $3,000—out of the $9 million authorized under title IV C veterans national programs grants to the States.

Mr. President, I would urge my colleagues to take a careful look at the merits of the veterans national job bank system. We still are faced with a large group of veterans in the 30 to 34 age bracket who are struggling to fit into the job market. The cost for this program is minimal compared to the increased taxes that a higher veterans employment rate would bring. This small investment should be seen as an investment in a more productive veteran population, and potentially, a more productive American citizenry.

TOGO INTERPARLIAMENTARY UNION CONFERENCE

Mr. STAFFORD. Mr. President, I take this opportunity to report on the recent meeting of the Interparliamentary Union held in Lome, Togo, March 25-30 of this year. Unfortunately because of the schedule in the U.S. Congress during that week—particularly because of the MX vote in the House—very few of our colleagues were able to attend this important session at which parliamentarians from 84 countries participated. Senator QUENTIN BURDICK and I were required therefore to devote extra time and energy to the tasks of representing the U.S. Congress at the session.

The conference considered three main issues: First, disarmament and the promotion of peace and security in various parts of the world, particularly the Mideast, second, the burden of international debt, and finally the famine, desertification and drought in Africa. This last issue was particularly timely given the tragic human suffering occurring on the African continent at the time of our conference and at the present time.

During the plenary debate, I was able to explain to delegates about U.S. action to help alleviate the tragic famine in Africa. This provided an opportunity to show the record of service and support of independent American citizens as well as the generosity of the U.S. Government. Senator BURDICK, in his plenary statement, drew particular attention to ways our parliaments can help alleviate the problem of debt burden. He pointed to the need for realism and stressed that countries with the financial means and countries facing serious debt need to adopt measures to overcome this problem. I ask that these two plenary statements be included at the end of my remarks.

Senator BURDICK also took upon himself the particularly difficult job of working in the political drafting committee assigned to negotiate on the very controversial matters of disarmament and the Mideast. Despite his efforts and the good faith efforts of others, the IPU adopted a final resolution considerably opposed to U.S. policy and the policies we have supported in the Senate. Therefore, our delegation, together with many other delegations, did not support the final resolution. At the meeting, we indicated some of our objections, and I ask that the statement I made on behalf of our group be included in the RECORD at the end of my remarks.

Despite the arduous negotiations and sometimes heated discussions on disarmament and Mideast issues, I do believe that increased understanding was promoted in the IPU Conference in Togo. Particularly valuable were the frequent caucuses with our European friends and allies and the many bilateral discussions with parliamentarians from other regions in the world. This coming fall, the IPU will hold its next session in Ottawa. There Members of the U.S. Congress can build upon the understandings already achieved.

I ask unanimous consent that the statements of myself and Senator BURDICK be made a part of the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF THE HONORABLE ROBERT T. STAFFORD—MARCH 26, 1985

Fellow delegates: My American colleagues and I wish to express our heartfelt gratitude to President Eyadema, President of the Togolese National Assembly, Apeido-Amah, and to the Government and citizens of Togo.

Meeting here in Africa, I feel impelled to comment on the dimensions of famine in vast areas of this continent. Tens of thousands have died in Ethiopia alone, and the continent-wide death toll now may be approaching the one million mark. In human terms television has brought us countless dramatic and heart-rending scenes of helplessness as mothers anxiously search for food for their children.

The United Nations Food and Agricultural Organization (FAO) estimates that 1984

grain production in 21 drought affected countries of Africa will drop another 12 percent below the already drought-reduced output of 1983. The U.S. Department of Agriculture estimates that per capita food production in sub-Saharan Africa has fallen 20 percent since 1960. What makes the famine situation especially serious this year is the cumulative effect of three years of sparse rainfall throughout vast areas of the continent. Poor economic conservation and agricultural policies have also contributed substantially to the problem.

What is to be done?

We, as parliamentarians, should persuade our governments to cooperate in a worldwide outpouring of generosity directed to Africa and other areas of the world which are in desperate need. Let us no longer compete in megatons of nuclear destruction but rather turn our energies to food for the hungry, and medicine for the sick.

The United States has made a beginning. Independent American citizens, on a strictly private voluntary basis, have contributed $81 million for famine relief in Ethiopia alone. We in the Congress have just authorized over $800 million in special aid for Africa. It is clear that our famine-relief for Africa this year will exceed one billion U.S. dollars.

At a special U.N. conference on Africa famine in Geneva this month, Vice President Bush pledged that the United States would meet 50 percent of Africa's food needs. President Reagan has released 300,000 tons of wheat from the U.S. Food Security Reserve—the first time that has been done for overseas famine—and the U.S. Agency for International Development (AID) is providing $50 million to process and transport it.

Moreover, U.S. emergency food aid to Africa has totalled 793,000 metric tons of grain to the nations of Ethiopia, Sudan, Kenya, Niger, Mozambique, Chad, and Mali.

We are proud of our record of service and support in behalf of the desperate needs of the countless millions of African men, women and children suffering from the ravages of hunger and pestilence. The challenge to assuage the hardships of much of the African continent is a challenge which all parliamentarians must assume—with the expectation that we will respond appropriately in timely fashion.

In future years let it be said that the end of hunger in Africa began at the 73rd Conference of the Interparliamentary Union meeting in Lome, Togo.

Turning next to the subjects of arms control and disarmament, I must emphasize that the United States places the highest priority on the control of nuclear weapons and the eventual reduction of all armaments—even their elimination. The United States deeply regretted the suspension of arms control negotiations with the Soviet Union in 1983 and we are happy that talks have now resumed in Geneva. I feel confident that our U.S. representatives will demonstrate flexibility and good will. If our Soviet counterparts do likewise we believe that an agreement can be reached.

We should caution our fellow parliamentarians and ask you to understand that these negotiations will be long and complicated. Some of the issues involved are very technical, and many different considerations must be taken into account to assure the security of both the Soviet Union and the United States and our respective allies.

The current negotiations in Geneva have one element which is relatively new to arms control negotiations. That issue is the inclusion of space weapons, a Strategic Defense Initiative. In March 1983, President Reagan proposed that the United States begin a research program to examine the feasibility of building such a defense capability against ballistic missile attack. While there is considerable debate within the United States and elsewhere about the technical and strategic merits of such a defensive system, there is substantial support for some level of research if only to determine the feasibility of a purely defensive system which would render offensive nuclear weapons useless.

The United States believes that the use of chemical weapons must cease. A draft treaty has been proposed by the United States, and we invite the Soviet Union and other nations of the world to endorse it.

Parliamentarians must make it clear that international terrorism is a major inhibiting factor to the promotion of peace and security in the world. No one is safe. Within a week, a Soviet diplomat was shot dead in front of his horrified wife. Whether it be officially supported state terrorism such as the machine gun murder of a British policewoman by criminal elements of the Libyan Government or random attacks on Turkish diplomats, the destabilizing result is the same. It is incumbent upon all governments to deny terrorists sanctuary and to assist in legitimate investigations.

The United States condemns the mining of the Red Sea and appeals to States which manufacture marine mines not to sell them to those who would use them there.

The recent military disaster suffered by Iran shows that only stalemate is likely to result from either sides' effort to defeat the other. With this prospect before them, the parties have but one reasonable course—to initiate and pursue dialogue to end the war.

The U.S. delegation joins with the U.N. Secretary General and the President of the Interparliamentary Council in condemning the inhuman practice of apartheid. South Africa must change its policies, eliminate apartheid and begin to respect the rights of all its citizens.

The United States also urges that all foreign forces withdraw from Lebanon and all efforts to undermine the sovereignty of the Lebanon Government cease. We continue to support U.N. Security Council Resolution 242 and encourage all parties in the region to do likewise.

Finally, as Chairman of the U.S. Senate Committee on the Environment and Public Works, I would like to commend the work of the Interparliamentary Conference on Environment held in Nairobi in November 1984. The conclusions and recommendations for legislation and incentives for environmental protection make eminent sense. Pollution does not respect national boundaries and more and more is seen as an international problem.

We are conscious of our critical role in world affairs. Members of our U.S. House of Representatives and Senate involve ourselves in every appropriate way to promote arms control and disarmament and to encourage those actions in international affairs that can contribute best to the peace and welfare of the citizens of the world.

STATEMENT OF THE HONORABLE QUENTIN N. BURDICK—MARCH 28, 1985

Mr. Chairman, fellow delegates: On behalf of my colleagues in the United States delegation, let me express how we welcome this debate opportunity. Our own Congress has directed attention to the problem of international debt and we are seriously—at this very moment—grappling with the problems of our economic and financial situation. IPU consideration of this issue at this time may give positive impetus to concrete actions by our respective parliaments.

Parliaments and governments must take action, but they alone cannot solve the problem. Many actors are involved, ranging from the international banks and corporations to small entrepreneurs and peasant farmers in the debtor countries. To overcome the negative impact of debt on development, governments need the active cooperation of all involved parties. This cooperation cannot and should not be coerced. Indeed, policies in the developing and developed countries which distort marketplace incentives are a contributing cause to the current crisis. Parliaments need to enact legislation which provides the proper incentives and guidance to secure fruitful cooperation by all the actors involved. We should also encourage our governments to seek solutions, in the meetings next month of the World Bank Interim and Development Committees, which endorse the case-by-case approach to the debt problem, with solutions appropriate to the interests and conditions of each country.

There is great danger that the issue of debt and poverty will be politicized. To the extent that governments begin using each other as scapegoats, playing on the passions of their constituents rather than coping seriously with the issues, the problem will be compounded. In the present situation, Parliaments should seek to help educate their constituencies to the difficult choices which lie ahead. This will not be easy, for in many cases it goes against the grain to ask sacrifices of one's constituents and the immediate self-interest of powerful local groups.

The debtor countries have diverse interests, and no single formula can possibly fit all their needs. The problems we are now seeing are the result of the major changes in the world economy which occurred during the 1970s, particularly after 1979. Some middle income countries adjusted their economies early and were reasonably prepared to cope with the strains which occurred after 1979. Other middle income countries postponed the adjustment process by borrowing heavily abroad. They now find themselves in very difficult economic straits, with a very large portion of their export earnings mortgaged to service their commercial debts. A third group of countries, mainly the poorest nations, have limited commercial debts but their capacity to service their existing debt is limited by the basic weakness of their economies and by changes in the economic environment. In many cases, these countries have compounded their problems by misguided economic policies. The appropriate prescriptions for the three groups of countries differ considerably.

Countries with the financial means need to be prepared to provide foreign aid and other forms of official financing to the neediest countries for humanitarian reasons, and also to help them acquire the capacity to make the necessary changes in their domestic policies. The middle-income developing countries require continued access to world capital markets, as well as opportunities for increased exports. This may place pressure on the political leaders of the developed countries—already under pressure because of high interest rates, unemployment, and budget deficits—to limit

access to their capital markets or to erect trade barriers against increased imports from developing nations.

The debtor countries need to be prepared to make major changes in their national economic policies. Subsidies need to be reduced, production incentives need to be improved, domestic budget deficits and monetary expansion need to be limited, and many other potentially unpopular steps need to be taken if the debtor countries are to adjust their economies and lay the foundation for future growth.

Indeed, the long-term interests of the debtor countries would not be served by adopting a policy of debt repudiation or blanket cancellation. This would cut off the middle income countries from new international credit, thus crippling their capacity to finance their trade and frustrating their future growth. Meanwhile, for the poorer countries, a widespread cancellation of their outstanding official credits would probably have such a negative impact on public opinion as to make it a very dubious proposition as far as future aid is concerned.

It is the policy of the United States that it is neither wise nor feasible for the governments of the industrial countries to cancel the developing countries' foreign debts. Neither is it realistic to expect these debts to be paid off with the funds of taxpayers in the developed countries. In the long run, the debts must be serviced and paid off by the borrowers themselves.

This having been said, let me make it clear that the U.S. Government strongly supports actions which will alleviate the debt burden and facilitate needed structural economic changes. The United States provides most of its aid to the poorer countries on grant terms, for example, and it is willing to refinance the official debt of countries which are taking realistic steps to adjust their economic policies.

Along with the World Bank and the IMF, the United States holds that economic adjustment by the debtor nations must be the foundation for any successful effort to manage the debt crisis. The United States also believes that the existing international financial institutions—the IMF and World Bank—must be the centerpiece of any program to deal with the international debt crisis. The United States also believes that a program of sustainable noninflationary growth and more open markets is needed, in all countries, in order to provide the basis for the ultimate resolution of the crisis.

Although countries with heavy burdens of debt service may have prolonged periods of adjustment ahead, the worst of the world debt problem may be behind us. We have proven that the major industrialized nations, working in cooperation with the IMF and major international banks, are able to coordinate their policies to assist those nations unable to service their debts.

Let me underscore the fact that there is no short-term, quick-fix solution on the debt problem. The real solution depends on the ability of debtors and creditors to adopt and stay with policies which best assure sustainable, noninflationary growth, continued adjustment in debtor countries to increase their capacity to export, and action by all to enhance the openness of markets for trade and direct investment.

Nevertheless, delegates to this conference should know that the United States has approved substantial flows of U.S. economic aid. Last year's figure was a 35 percent increase over the appropriation for two years before. This has been done at a time when the principal focus of political debate in our legislature was on ways to trim federal expenditures in order to lessen the U.S. Government's budget deficit. In 1983, during the midst of the worst part of the debt crisis, Congress enacted legislation to approve U.S. participation in the recent expansion of IMF resources. It also approved several rules which sought to lessen some of the cost of rescheduling commercial bank debt.

The prospects of the developing countries depend very much on whether a U.S. economic recovery can be sustained. It is perhaps a sign of the increased interconnectedness of the world economy that our country's ability to cope with its own economic and budgetary situation is the single most important thing we can do to promote the development of the Third World and the consequent alleviation of poverty in the developing nations.

STATEMENT OF THE HONORABLE ROBERT T. STAFFORD—MARCH 29, 1985

The draft resolution presented by the drafting committee has unfortunately very many deficiencies:

1. It calls for a world disarmament conference despite the fact that there are already very many arms control and disarmament discussions going on. Following the Helsinki Final Act, parties have been meeting in Stockholm to improve confidence building measures in Europe. In Vienna, both sides have presented proposals on conventional weapons that could lead to a positive conclusion. As members here will recall, in Geneva the Committee on Disarmament under the United Nations is a forum for comprehensive arms discussions. The United States is in fact pushing chemical weapons negotiations there.

The IPU should be encouraging these discussions rather than calling for another meeting that just will delay the real confrontation of the issues.

2. The resolution distorts the objectives of U.S.-Soviet talks. Both the United States and the Soviet Union are undertaking complex and difficult negotiations on strategic nuclear weapons, intermediate range nuclear weapons and space. These negotiations do not merely point to the problems of space. Yet, this resolution gives way too much emphasis on the space aspect. Perhaps this is understandable because of the newness of the issue. However, delegates should consider that the Soviet Union itself is very much experimenting with space weapons, some even believe they are ahead of the United States in certain space weapons. But the main point is that the United States and the Soviet Union need to proceed on all fronts, not just with space.

3. The resolution discusses aspects of strategic doctrine which, if we took the resolution seriously, would undermine the deterrence that has helped maintain peace in Europe since the last world war. I find it hard to believe that the IPU seriously wants to undermine NATO or Warsaw Pact doctrines which, although they contemplate the possibility of war, have served so well in preserving the peace.

4. Let me mention the Mideast. Unfortunately the resolution restates much that has been said on this issue before. Here the IPU is showing just how out of touch it is with world realities. Just at this moment, there are several developments in Mideast diplomacy, involving Jordan, Egypt, Palestinians and many other actors. Everyone knows that the only way to true peace is full implementation of UN Security Council Resolutions 242 and 338, yet the drafting committee has refused to plainly state this fact. The draft resolution endorses the PLO, as other IPU documents have, and thereby ignores the discussions currently underway in the Mideast that might really give the Palestinians a substantive role in the negotiations. The draft resolution indicates little progress has been made, thereby ignoring the fact that Israel and Egypt are at peace.

Finally, the draft calls for a Mideast peace conference which in my view will only set back prospects for peace. Imagine, with due respect, the 103 members of the IPU sitting to negotiate about the very vital interests of the states in the Mideast. Do you really believe that the whole world will move with any more determination than an effective negotiation group of the parties most directly involved. The IPU should endorse respect of the rights of the states and peoples in the Mideast region. It should not endorse a world Mideast peace conference.

"NEW" SS WREATHS, OLD ANTI-SEMITISM

Mr. KENNEDY. Mr. President, 10 days ago, over the strong objections of many of us in Congress and large numbers of Americans across the country, President Reagan went through with his controversial visit to the Nazi SS cemetery in Bitburg, a visit that reopened old wounds from World War II and dishonored the 6 million innocent victims of the Holocaust.

Bitburg was no ordinary military cemetery, because World War II was unlike any other war. The sheer depravity of the Nazi attempt to exterminate the Jews has set that war apart from any other conflict in recorded history.

We are all aware today of the fanatical hatreds that threaten the security of Israel and that are poisoning the hopes for peace in the Middle East. And we are also aware of the long and unhappy history of intolerance which still flourishes at the extremist fringe of American politics. In recent years, I have spoken on many occasions about the importance of tolerance and the fragile relationship between faith and freedom in our society and in every other nation on Earth. When discrimination is permitted to flourish anywhere, liberty is diminished everywhere.

Sadly, one of the consequences of the Bitburg visit has been a new stirring of the ancient evil of anti-Semitism. I read with deep concern the extraordinary article by Marvin Kalb in yesterday's New York Times about his personal encounters with anti-Semitism in Germany in the days immediately following the President's trip to Bitburg.

Thomas Jefferson taught us that eternal vigilance is the price of liberty. And in this troubled time of controversy over the meaning of reconciliation and remembrance, it is clear that eternal vigilance against anti-Semitism is

one of the most important guarantees of liberty in our own day and generation.

Mr. President, I ask unanimous consent that the article by Marvin Kalb may be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, May 14, 1985]

NEW SS WREATHS, OLD ANTI-SEMITISM

(By Marvin Kalb)

WASHINGTON.—The controversy over the Reagan visit to Bitburg is receding, no longer a front-page embarrassment. But do you hear an echo from the past?

I visited the cemetery the morning after President Reagan and Chancellor Helmut Kohl placed wreaths of reconciliation in front of its chapel. For years, the cemetery had been largely ignored; now, it was an instant shrine, a focus of political debate. Small flower pots marked many flat graves, 49 of them honoring Waffen SS troops. By the end of my visit, many hundreds of Germans and occasional Americans from the nearby Air Force base paused before the wreaths. Some took pictures. Mothers hushed children. A religious air seemed to saturate the scene.

But look and listen: all around there were the sights and sounds of the new Germany—and old. Six feet to the left of the President's wreath stood an equally impressive one. Across its banner: "To the Waffen SS who fell at Leningrad." No more than a foot to the right of the Chancellor's was another wreath: "For the fallen comrades of the Waffen SS."

These two wreaths had been placed in the chapel, out of sight, hours before the President arrived. They were restored to their original places of honor only hours after he left. In the ensuing tranquility, the Waffen SS could again be honored in the springtime sun.

A middle-aged visitor from Nuremberg said the Waffen SS were simply soldiers—young conscripts doing their duty. "Let them rest in peace. For us, a dead soldier is a dead soldier, not a hero."

A native of Bitburg, who looked to be in his 20's, expressed a view I was to hear with disturbing regularity. "We Germans and Americans had been cooperating very well"—he lowered his voice—"until the Jews began to make trouble."

Another Bitburger zeroed in on Elie Wiesel. "Imagine the nerve of a Jew lecturing President Reagan. I saw him on television, making trouble the way they all do."

An old woman complained that Mr. Reagan had spent only eight minutes at the cemetery. "You know why the visit has to be cut back? Because of the Jews." She stalked away to join a group of friends nodding in agreement.

A man with a cane stopped and said: "If they don't like it here, the Jews, let them go away. We were better off without them in Germany." There are only 28,000 left, he was reminded. "Too many," he replied.

The people of Bitburg are pleased that Mr. Reagan came to visit, that he didn't yield to pressure. But it's clear they resent their new notoriety—and equally clear whom they consider responsible for the unwelcome change: the Jews and the media. The Jews are seen as a group separate from Germans and Americans—an indigestible lump, a foreign body. The media are seen as intrusive and irresponsible and, somehow, controlled by the Jews.

So it went. A few days later, a Munich newspaper editor explained that anti-Semitism is an "anthropological phenomenon" in Germany. The controversy seems only to have uncorked the venom once again. There is a sad irony. Bitburgers consider themselves remarkably enlightened. In 1933, when Hitler won a critical election, this conservative Catholic town voted overwhelmingly against him.

Is Bitburg an aberration? It is impossible to judge and dangerous to generalize. But a number of leading West German politician and professors—several close to Mr. Kohl—think anti-Semitism was on the rise even before Bitburg. "The Jews were getting too impertinent," one politician said, citing, among other things, their opposition to West German tank sales to Saudi Arabia. "We've listened to them much too long. It's enough."

The pursuit of reconciliation by way of Bitburg has been a failure. What should have been obvious from the beginning is that reconciliation is a long process—not a single photo opportunity, an event, a moment frozen in time. Bitburg, exposing clumsiness and poor political judgment in Bonn and Washington, in the process lifted the scab on dark coners of recent German history. There is a time to know when to leave well enough alone.

As I entered the cemetery, I noticed a sign: "Please do not disturb the peace and rest of the dead." Too late.

[Marvin Kalb is an NBC News correspondent.]

COOL PAPA BELL

Mr. EAGLETON. Mr. President, in St. Louis, MO, there is a street named after a great baseball player—James "Cool Papa" Bell Avenue. On that street, there lives a great man—that same James "Cool Papa" Bell. If I may, I would like to take just a few minutes today to pay tribute to this outstanding man.

It was once said that Cool Papa Bell was the only man who could turn out the lights and be in bed before the room got dark. Fast he was, indeed. At the age of 45 he scored from first base on a bunt. Bell may reign forever as the king of base bandits. How many did he steal? Surprisingly, nobody knows, not even Bell, but he remembers stealing 175 bases in a 200-game season one year. He was once timed circling the bases in 12 seconds.

Cool Papa Bell was more than just a speedburner, though. He could do it all. He was a knuckleball pitcher who moved to centerfield where he played outstandingly. At the plate, he was a consistently excellent batter, never hitting below .308 in any of his 29 seasons. He hit an astonishing .480 in one season.

In 1974, Bell was voted into the Baseball Hall of Fame. At that time, he was asked if getting into Cooperstown was his biggest thrill. "No," Cool Papa responded, "it's my biggest honor, but not my biggest thrill." In disbelief, his questioner asked what could have been a bigger thrill than the Hall of Fame? "When they opened the door in the majors for the black players," Cool Papa Bell replied, "that was my biggest thrill."

You see, Cool Papa Bell is black, and during his career the only way for a talented black ballplayer to play baseball was through the Negro leagues—leagues totally segregated from the all-white major leagues. Not until 1947 did Jackie Robinson break that color barrier.

As foreign as it may seem to us today, it was just that recently when skin color was judged so important that it was the determinant of much of a man's life. Skin color determined his educational opportunities, what jobs were open, even what baseball field the man could play on. Not ability, not talent, but skin color.

In the St. Louis of my youth, segregation was a totally accepted and accustomed way of life. In Sportsman's Park, one area was assigned to blacks—the right field pavilion—and blacks were not permitted elsewhere in the park. When the Negro League teams played in St. Louis, they competed before a virtually all-black crowd, received pennies for their performance, and found it rare if their heroics were mentioned in the papers or even acknowledged by contemporary white society.

The history of the Negro Leagues is rich with heroes enough for any dozen epic tales, but much of the lore has been lost to time. The all-white leagues attracted the lion's share of the attention of the press and the fans, and thus while we have millions of feet of film of the Yankees and the other major league teams, and billions of words written about the Dodgers, the Browns, and others, we have so little to review for the legacy of the Stars, the Monarchs, and the Homestead Grays. Statistics, the grist of every baseball fan's conversation and the yardstick of comparison, were haphazardly kept, if at all, in the Negro Leagues. All of this contributed to a tendency to overlook the accomplishments of these remarkable men who surely must have played the game for the love of it.

Under these circumstances, it is easy to see how you would be frustrated, and then embittered, by this discrimination by omission. It is easy to understand how you would want to lash out at society, to return some of the hurt inflicted on yourself. Cool Papa Bell has never allowed himself to give into those emotions. In their place he has enormous dignity and grace. He has humiliated those who kept him from major league ball parks by rising above their indignities and injustices. With his stamina and strength, he has triumphed in life as he did on the ballfield.

I invite my colleagues to join with me in saluting Cool Papa Bell, the

ballplayer and the man. I am proud to represent him in this body.

ANDREI SAKHAROV DAY

Mr. SYMMS. Mr. President, today I would like to join my colleagues in honoring the Nobel Peace Laureate Andrei Sakharov.

In 1970, Dr. Sakharov and other Soviet physicists founded the Committee for Human Rights, an organization dedicated to promoting in the Soviet Union the principles expressed in the Universal Declaration of Human Rights. These principles guarantee to all the rights of freedom of thought, religion, and expression. Because of Dr. Sakharov's active role on the committee and his courageous stand for freedom, he was arrested and banished to internal exile by the Soviets.

In this country we believe in human rights and human dignity. When the Soviets became members of the Helsinki accords, the situation in the Soviet Union appeared to be undergoing positive change. There can be no doubt, however, that the Soviet Union has engaged in deliberate violation of those accords and has persecuted the man who stands as a symbol of man's struggle for freedom.

We must not lose sight of the fact that human rights and peace are inseparable. Sakharov often warned that the Soviet failure to observe basic human freedoms is a grave threat to peace because it silences voices of dissent within the Soviet Union. Human rights is not, and cannot be an entirely internal matter. The denial of fundamental human rights to any group of people—anywhere in the world—is a threat to the liberties of all. Sakharov understands this, and I think it appropriate that we remember and rededicate ourselves to this principle on this day.

Mr. Sakharov's example gives hope to the millions around the world who are fighting for their human rights. Dr. Andrei Sakharov has achieved the highest of honors within the world scientific community. He has earned a place of respect among the people of the world as a man of peace. We in the United States honor Dr. Sakharov with receptions, concerts, and even a Sakharov Day, while the Soviet Union honors him with silence and exile. Let us join together to remember and honor this great and nobel man and the principles he stands for.

APPOINTMENTS BY THE VICE PRESIDENT

The PRESIDING OFFICER. The Chair, on behalf of the Vice President, in accordance with title 22, United States Code 1928(a)-1928(d), as amended, appoints the Senator from Tennessee [Mr. GORE] as a member of the Senate delegation to the North Atlantic Assembly spring meeting to be held in Stuttgart, Germany, May 17 to 20, 1985; and, in accordance with title 22, United States Code 276(d)-276(g), as amended, appoints the Senator from Montana [Mr. BAUCUS] and the Senator from Alabama [Mr. HEFLIN] as members of the Senate delegation to the Canada-United States Interparliamentary Group during the first session of the 99th Congress, to be held in Niagara-on-the-Lake, ON, Canada, on May 17 to 20, 1985.

AMBASSADOR FUNDERBURK'S COURAGEOUS ANALYSIS OF POLICY FAILURE

Mr. HELMS. Mr. President, this morning's Washington Post carries a full accounting of the untenable position in which our Ambassador to Romania, David Funderburk, has been forced to endure over the past 3½ years.

Despite Ambassador Funderburk's repeated pleas to toughen U.S. policy toward Romania because of Romania's continued and flagrant human rights violations, senior policy makers were not concerned with the seriousness of the abuses in Romania. Even the evidence Ambassador Funderburk sent to the State Department, in support of his repeated request for policy change, was repressed and ignored.

Ambassador Funderburk was diplomatic in citing names of senior policy advisers who refused even to examine the facts of the abuses in Romania. But I feel no such reticence. Our Romanian policy has been in the hands of Richard Burt, Assistant Secretary of State for European Affairs. It is Mr. Burt who is ultimately responsible for this fiasco. As Assistant Secretary of State for European Affairs, Mr. Burt has consistently favored Most Favored Nation trade status not only for Romania, but for all Eastern European countries, no matter what the price to freedom. Assistant Secretary of State Burt appears to have an ambition to excuse the failures of Communist countries, and build a closer relationship at any cost. For example, Mr. Burt is well known inside the administration for:

Opposition to raising the issue of all Soviet arms control treaty violations at the Standing Consultative Commission in Geneva, finally agreeing to raising these issues only because of strong pressure from other administration officials;

Down-playing the issue of Vietnamese and soviet slave labor in the building of the Soviet pipeline;

Opposing implementation of the provisions of the Taiwan Relations Act, including writing memoranda on how to evade the intent of Congress with respect to this act, as well as opposing all arms sales to our ally, the Republic of China;

Collaborating with the Soviets on covering up aspects of the Major Nicolson murder, reportedly including his advising the Soviets on press relations.

Mr. President, there has been a great deal of careful scrutiny going on with regard to Mr. Burt's record. I know that many other points will be brought out in the future.

Ambassador Funderburk's critique of our policy in Eastern Europe shows that it is time for the United States to have an Assistant Secretary of State for European Affairs who will work toward the best interests of the United States and our allies, and who will represent the views of the President in dealings with Communist countries, including Romania.

Mr. President, I commend Ambassador Funderburk for his candid—and courageous—critique of the failures of our policymaking apparatus. His temperate and factual analysis will assist all those involved in foreign policy to understand the failures of our Government.

Mr. President, I ask unanimous consent that the article appearing in today's Washington Post concerning the situation in Romania be inserted in the RECORD at the conclusion of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ENVOY QUITS, FAULTS POLICY—FUNDERBURK SEES ROMANIA CODDLED

(By Bradley Graham)

MUNICH.—After 3½ years of trying to persuade officials in Washington to toughen their approach to Romania, David Funderburk has resigned as the U.S. ambassador to Bucharest and decided to publicize the policy dispute he has waged with senior administration officials. Funderburk argues that U.S. policy toward Romania at present is largely misconceived and ineffective.

Funderburk, in an interview here Monday, called for a revision of U.S. policy and a possible end to the most-favored-nation trading status and other concessions Washington grants the Bucharest government.

Romania has received preferential U.S. treatment since the late 1960s on the basis of a foreign policy that often diverges from Moscow's. But Funderburk contends that Romania's independence is exaggerated and its ties to the Soviet Union are more extensive than Washington policy makers are willing to recognize. Moreover, he says, Romania's abysmal record on human rights and its lack of internal reforms are a mockery of declared U.S. policy goals.

For example, he said, on the surface, it looked recently as if the Romanians were complying with U.S. wishes to relax emigration constraints. Hundreds were being granted permission to leave Romania and were flooding the U.S. Embassy requesting visas.

But on closer examination, U.S. officials found they had been outwitted by Romanian President Nicolae Ceausescu, he said. Many Romanians being let go turned out to be unqualified for admission to the United States.

"We were outfoxed by Ceausescu," Funderburk said. "He in effect dumped people on us like a mini-Mariel," a reference to the massive boatlift of Cubans to the United States in 1980. "Hundreds of those approved for emigration were undesirables. Meantime, many of those we wanted out are still waiting for official permission.

"This situation has created a dilemma for us," Funderburk said. "We have this long list of people asking to come to the States. About 30 or 40 of them protested outside the embassy several weeks ago. They were put up to it by Romanian authorities at the passport office.

"Ceausescu is trying to turn the tables on us. At human rights conferences, to defuse the emigration issues, the Romanians now say to us, look, you can't criticize us for not letting enough people out because many of those we've already approved to go have yet to be let into the United States."

Funderburk tells the story as an example of what he says is the need to be wary of the Romanian regime. He thinks the Reagan administration has not been wary enough.

There is a street term the Romanians use, *smecher,* meaning someone who is sneaky, crafty, a wheeler-dealer," he said. "That applies to the government in Bucharest."

Funderburk, 41, a former university professor of history with links to conservative Sen. Jesse Helms (R-N. Car.), was appointed ambassador in 1981. He speaks Romanian and studied in Romania for two years in the 1970s on a Fulbright and other foundation grants.

In a letter accepting his resignation "with deep regret," President Reagan expressed appreciation for Funderburk's "efforts to improve the human rights situation in Romania" and commended him for "steadfast support of our national security interests in Europe."

Funderburk's 1981 Senate confirmation hearing was marked by controversy over illtempered statements he had authored in a 1978 pamphlet alleging the "misteaching of communism" in U.S. universities and accusing the State Department of whitewashing human rights reports on eastern Europe.

Such remarks strained his relations with some foreign service professionals from the start. But he said he is not alone among U.S. diplomats in advocating a harder line on Romania.

He said his views are supported by a majority of the principal officers at the Bucharest embassy, and he spoke of efforts by senior State Department officials to curb such nonconformist thinking.

Accusing the State Department of disapproving of dissent in its own ranks, Funderburk said a handful of embassy officers due for reassignment are being transferred to lesser posts than they deserve in apparent retribution for having challenged current policy on Romania.

"Two at the embassy, for instance, were recently moved to out-of-the-way positions back in Washington where they will be out of the limelight," he said. "They have been put in places where they can't step out publicly and where they can be monitored. It looks like a dead end for their careers."

[State Department spokesman Ed Djerejian, responding to Funderburk's charges, said that under a "longstanding policy" in effect since the 1970s, "constructive and creative dissent is something encouraged by the State Department." Djerejian said that in addition to regular channels for diplomats abroad to make dissenting views known to Washington, there are special channels "if they feel stymied," and the "dissent-channel messages go to the top." Djerejian said the State Department had no further comment on Funderburk's allegations.]

Funderburk referred to a "network" of administration officials, primarily at the departments of State and Commerce and including some at the Central Intelligence Agency, who, he said, have dismissed or belittled evidence the embassy in Bucharest has collected documenting Romania's growing economic ties with the Soviet Union, the presence of large numbers of nonmilitary Soviet personnel in the country, the transfer to the Soviet Union of technology Romania has obtained from the West, and Bucharest's position as a major exporter of arms.

"Much evidence we sent in was overlooked and ignored," he said. "They scrambled to denigrate a lot of the material we put forward."

He complained of a tendency among some administration officials to soften criticism of human rights abuses in Romania and to lavish praise on the Bucharest government for foreign policy positions which, in Funderburk's view, often have more form than substance.

Funderburk said he raised some of his concerns directly with President Reagan in an August 1983 meeting at the White House that was attended also by Vice President Bush, then-national security adviser William P. Clark and then-presidential aide Edwin Meese III. "All seemed interested in and sympathetic with what I had to say," Funderburk said.

The problem, he alleged, rests mainly with others in the administration. "There's a difference between Reagan's stated goals and our policy as implemented," he said. "What I would like to see is the State Department implementing policy more consistently with Reagan's declared ideals."

He said he decided to speak out now after becoming free of the constraints of serving as an ambassador and after leaving a country as keenly sensitive to criticism as Romania is.

"When I went to Romania, I wasn't aware how much our policy needed change," he said. "When I realized it did, I thought that by working through the U.S. government system, we could have a major impact on policy.

"But I found that the people who we had to report to directly were unsympathetic to change or to new information. It's difficult to get anyone's attention at State if you have a view that's different because their minds are made up. That's what I found disappointing."

U.S. policy toward Romania has been based on the premise that the public displays of independence from Moscow by Ceausescu, who has ruled Romania since 1965, are a genuine irritant to the Soviet Union and a positive example to other East Bloc states, and therefore should be encouraged.

Ceausescu has criticized the Soviet invasions of Czechoslovakia and Afghanistan. His country is the only Warsaw Pact member that refuses to let Soviet troops on its territory for maneuvers and that does not send troops to joint pact training exercises. He defied the Soviet-led boycott of the Olympic Games in Los Angeles last year, and he has scolded the Soviet Union as well as the United States for raising tensions in Europe over nuclear weapons.

Additionally, Ceausescu's ties with China and his relations with all parties in the Middle East have proved useful back channels for U.S. policy makers. Romania is the only East European nation to have maintained diplomatic contacts with Israel since 1967.

The U.S. position was spelled out by Bush in a 1983 speech explaining the basis on which Washington differentiates among East European regimes.

"We look to what degree countries pursue autonomous foreign policies, independent of Moscow's direction, and to what degree they foster domestic liberalization—politically, economically and in their respect for human rights," he said. "The United States will engage in closer political, economic and cultural relations with those countries such as Hungary and Romania which assert greater openness or independence. We will strengthen our dialog and cooperation with such countries."

Referring to the Bush speech, Funderburk said: "If you take the two goals he mentioned and measure what success we've had in Romania, we've gone backward. We've been unable to effect any reform in terms of the economy, the standard of living or human rights with the exception of a few individual cases."

He said he would "like to see a policy that brings about greater Romanian independence for the Soviet, internal reforms and improved human rights," or, failing that, a reduction of U.S. support, "including the possible withdrawal of MFN status, fewer high-level official visits and reduced economic assistance."

But standing in the way of a policy revision, according to Funderburk, are some senior U.S. officials with a vested interest in sustaining the image of Romania as a Soviet Bloc maverick deserving of U.S. concessions.

"There are people back in Washington will go the limit to make excuses for and to defend Ceausescu, because their jobs, promotion, careers depend on proving they were right about Romania," he said.

"So every three or four weeks we give something —a high-level visit, a trade concessions, whatever. We ought to get more from these people for the confessions we make."

Funderburk said other western countries are ahead of the United States in reassessing formerly positive approaches to Romania. He said he had seen diplomiatic reports describing increasingly negative views of Romania among several Western European states and a report by an official of a neutral European country who, after visiting most East Bloc countries recently, concluded Romania ranked worst in observance of human rights and general conditions.

To support his charges against Washington officials, Funderburk cited several instances in which he said administration members sought to refute material contrary to Romania's independent image or to temper public criticism of Romania.

On Soviet presence: "Our guys observed a large Soviet presence in Romania that was not welcome news to some officials in Washington. On our own initiative, we looked in registries, checked schools, traced license plates and came up with an ungodly number of resident Soviets, including Soviet agents in factories monitoring Romanian exports to the Soviet Union. This should have been an indication that Soviet-Romanian cooperation is closer than had been reported previously and a sign that Romania is a more reliable Warsaw Pact partner than is

commonly thought. Instead, the information was ignored."

On Soviet-Romanian trade: "I've reported that Soviet-Romanian trade relations are getting closer. But this was downplayed by some in Washington who found ways of juggling figures to suggest the increase doesn't have much meaning. Part of my argument was that the Soviet percentage in overall Romanian trade has risen. They answered me with the argument that this was only a statistical aberration resulting from a drastic cutback of Romania's imports from the West."

On technology transfers: There is evidence reported by various sources that Romania has transferred to the Soviet Union technology it obtained from the West, although it denies this. Those at State concerned about maintaining or improving good relations with Romania have tended to make light of such information. In virtually every case when the sale to Romania of a particular U.S. product has been disputed among American agencies, State has argued for the sale.

"To facilitate one deal, I was asked to reconsider a negative opinion I had sent in. We were considering selling the Romanians a ground station to receive geological and agricultural data from a Landsat satellite. I didn't change my mind, and the sale hasn't yet been approved.

On arms exports: Figures prepared by the U.S. Arms Control and Disarmament Agency on the world's leading arms exporters were published last October in Business Week. They listed Romania as the fifth largest exporter in 1982. Funderburk said Deputy Defense Minister Ilie Ceausescu, Nicolae's brother, denied that Romania exported weaponry.

"When we reported the fact of Romania's ranking to Washington, they went bananas," Funderburk said. "Agencies scrambled and said it couldn't be true. But we hadn't fabricated a thing. We were just reading from ACDA figures. The first response from Washington came back to us saying, you nasty guys, Romania couldn't have been fifth. Weeks later, we got an acknowledgment, a short and quiet one, conceding that perhaps Romania ranked within a notch or two of the published figure."

On human rights: Funderburk said the European Bureau at the State Department has shown a willingness to water down or delete criticism of Romania's human rights abuses, although State's own Human Rights Bureau has forcefully condemned Romanian oppression.

Funderburk said he resigned not for political reasons but out of personal and family considerations and to reture to Campbell University in North Carolina to teach government studies. He agreed to meet here with this reporter, whom Romania denied entry last week because of past articles.

Funderburk said his conflicts with some senior policy makers in Washington had been compounded by the cloud under which he began as a diplomat.

"From the beginning I was branded an unseasoned, naive political appointee, a Helmsite and a radical," he said. "Efforts were made to try to isolate me and this embassy from the policy-making process.

"Word filtered back to me that Eagleburger [Lawrence Eagleburger, undersecretary of state, who retire last year] thought I was carrying on a parallel policy. At one point, he sent me an eyes-only cable which I interpreted as saying, why are you calling so much attention to human rights and let's not allow it to get in the way of a good thing."

He said he sees "Eagleburger proteges; in the State Department's European Bureau as most responsible for the policy he faults.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER (Mr. MURKOWSKI). Morning business is closed.

REPEAL OF CONTEMPORANEOUS RECORDKEEPING REQUIREMENTS—CONFERENCE REPORT

Mr. PACKWOOD. Mr. President, I submit a report of the Committee of Conference on H.R. 1869 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 1869) to repeal the contemporaneous recordkeeping requirements added by the Tax Reform Act of 1984, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

Mr. METZENBAUM. Mr. President, I demand the report be read.

The PRESIDING OFFICER. The clerk will read the report.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 1869) to repeal the contemporaneous recordkeeping requirements added by the Tax Reform Act of 1984, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate to the text of the bill and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

SECTION 1. REPEAL OF CONTEMPORANEOUS RECORDKEEPING REQUIREMENTS, ETC.

(a) CONTEMPORANEOUS RECORDKEEPING REQUIREMENTS.—Subsection (d) of section 274 of the Internal Revenue Code of 1954 (relating to substantiation requirements for certain deductions and credits) is amended by striking out "adequate contemporaneous records" and inserting in lieu thereof "adequate records or by sufficient evidence corroborating the taxpayer's own statement ", and the Internal Revenue Code of 1954 shall be applied and administered as if the word "contemporaneous" had not been added to such subsection (d).

(b) PROVISIONS RELATING TO RETURN PREPARERS AND NEGLIGENCE PENALTY.—Paragraphs (2) and (3) of section 179(b) of the Tax Reform Act of 1984 are hereby repealed, and the Internal Revenue Code of 1954 shall be applied and administered as if such paragraphs (and the amendments made by such paragraphs) had not been enacted.

(c) REPEAL OF REGULATIONS.—Regulations issued before the date of the enactment of this Act to carry out the amendments made by paragraphs (1)(C), (2), and (3) of section 179(b) of the Tax Reform Act of 1984 shall have no force and effect.

SEC. 2. SUBSTANTIATION REQUIREMENTS NOT TO APPLY TO CERTAIN VEHICLES WITH LITTLE PERSONAL USE.

(a) IN GENERAL.—Subsection (d) of section 274 of the Internal Revenue Code of 1954 (relating to substantiation required) is amended by adding at the end thereof the following new sentence: "This subsection shall not apply to any qualified nonpersonal use vehicle (as defined in subsection (i))."

(b) QUALIFIED NONPERSONAL USE VEHICLE DEFINED.—Section 274 of such Code is amended by redesignating subsection (i) as subsection (j) and by inserting after subsection (h) the following new subsection:

"(i) QUALIFIED NONPERSONAL USE VEHICLE.—For purposes of subsection (d), the term 'qualified nonpersonal use vehicle means any vehicle which, by reason of its nature, is not likely to be used more than a de minimus amount for personal purposes."

SEC. 3. EXEMPTION FROM REQUIRED INCOME TAX WITHHOLDING FOR CERTAIN FRINGE BENEFITS.

Section 3402 of the Internal Revenue Code of 1954 (relating to income tax collected at source) is amended by adding at the end thereof the following new subsection:

"(s) EXEMPTION FROM WITHHOLDING FOR ANY VEHICLE FRINGE BENEFIT.—

"(1) EMPLOYER ELECTION NOT TO WITHHOLD.—The employer may elect not to deduct and withhold any tax under this chapter with respect to any vehicle fringe benefit provided to any employee if such employee is notified by the employer of such election (at such time and in such manner as the Secretary shall by regulations prescribe). The preceding sentence shall not apply to any vehicle fringe benefit unless the amount of such benefit is included by the employer on a statement timely furnished under section 6051.

"(2) EMPLOYER MUST FURNISH W-2.—Any vehicle fringe benefit shall be treated as wages from which amounts are required to be deducted and withheld under this chapter for purposes of section 6051.

"(3) VEHICLE FRINGE BENEFIT.—For purposes of this subsection, the term 'vehicle fringe benefit' means any fringe benefit—

"(A) which constitutes wages (as defined in section 3401), and

"(B) which consists of providing a highway motor vehicle for the use of the employee."

SEC. 4. REDUCTION IN LIMITATIONS ON INVESTMENT TAX CREDIT AND DEPRECIATION FOR LUXURY AUTOMOBILES.

(a) GENERAL RULE.—

(1) INVESTMENT TAX CREDIT.—Paragraph (1) of section 280F(a) of the Internal Revenue Code of 1954 (relating to investment tax credit) is amended by striking out "$1,000" and inserting in lieu thereof "$675".

(2) DEPRECIATION.—Paragraph (2) of section 280F(a) of such Code (relating to depreciation) is amended—

(A) by striking out "$4,000" in subparagraph (A)(i) and inserting in lieu thereof "$3,200", and

(B) by striking out "$6,000" each place it appears in subparagraphs (A)(ii) and (B)(ii) and inserting in lieu thereof "$4,800".

(b) 4-YEAR DEFERRAL OF INFLATION ADJUSTMENT.—

(1) ADJUSTMENT AFTER 1988.—Subparagraph (A) of section 280F(d)(7) of such Code (relating to automobile price inflation adjustment) is amended by striking out "pas-

senger automobile" and inserting in lieu thereof "passenger automobile placed in service after 1988".

(2) 1987 BASE PERIOD.—Subclause (II) of section 280F(d)(7)(B)(i) of such Code is amended by striking out "1983" and inserting in lieu thereof "1987".

(3) TECHNICAL AMENDMENT.—Clause (i) of section 280F(d)(7)(B) of such Code is amended by striking out the last sentence.

SEC. 5. NEW REGULATIONS.

Not later than October 1, 1985, the Secretary of the Treasury or his delegate shall prescribe regulations to carry out the provisions of this Act which shall fully reflect such provisions

SEC. 6. EFFECTIVE DATES.

(a) REPEALS.—The amendment and repeals made by subsections (a) and (b) of section 1 shall take effect as if included in the amendments made by section 179(b) of the Tax Reform Act of 1984.

(b) RESTORATION OF PRIOR LAW FOR 1985.—For taxable years beginning in 1985, section 274(d) of the Internal Revenue Code of 1954 shall apply as it read before the amendments made by section 179(b)(1) of the Tax Reform Act of 1984.

(c) EXCEPTION FROM SUBSTANTIATION REQUIREMENTS FOR QUALIFIED NONPERSONAL USE VEHICLES.—The amendments made by section 2 shall apply to taxable years beginning after December 31, 1985.

(d) WITHHOLDING AMENDMENT.—The amendment made by section 3 shall take effect on January 1, 1985.

(e) REDUCTION IN LIMITATIONS ON INVESTMENT TAX CREDIT AND DEPRECIATION.—

(1) Except as provided in paragraph (2), the amendments made by section 4 shall apply to—

(A) property placed in service after April 2, 1985, in taxable years ending after such date, and

(B) property leased after April 2, 1985, in taxable years ending after such date.

(2) The amendments made by section 4 shall not apply to any property—

(A) acquired by the taxpayer pursuant to a binding contract in effect on April 1, 1985, and at all times thereafter, but only if the property is placed in service before August 1, 1985, or

(B) of which the taxpayer is the lessee, but only if the lease is pursuant to a binding contract in effect on April 1, 1985, and at all times thereafter, and only if the taxpayer first uses such property under the lease before August 1, 1985.

And the Senate agree to the same.

That the House recede from its disagreement to the amendment of the Senate to the title of the bill and agree to the same.

Signed by the managers on the part of the Senate: Senators Packwood, Dole, Roth, Danforth, Long, Bentsen, and Matsunaga; and managers on the part of the House: Mr. Rostenkowski, Mr. Gibbons, Mr. Pickle, Mr. Rangel, Mr. Stark, Mr. Duncan, Mr. Archer, and Mr. Vander Jagt.

The PRESIDING OFFICER. The question is on proceeding to the conference report.

Mr. METZENBAUM. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Ohio will state his parliamentary inquiry.

Mr. METZENBAUM. Has the entire conference report been read, including all of the additions and addendums to it, including the statutory language which, it is my understanding, is a part of the conference report?

The PRESIDING OFFICER. The entire conference report has been read.

The question on proceeding to it is not debatable.

All in favor, say "aye."

Mr. METZENBAUM. A parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Ohio will state his parliamentary inquiry.

Mr. METZENBAUM. Mr. President, I understand the ruling of the Chair is that the question of proceeding to the conference report is not debatable but the conference report itself is debatable.

The PRESIDING OFFICER. The Senator is correct.

All in favor of proceeding to the conference report——

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. PACKWOOD. Mr. President, I am ready to proceed unless the Senator from Ohio is raising a point of order.

Mr. METZENBAUM. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. Mr. President, are we now on the conference report?

The PRESIDING OFFICER. We are not on the conference report at this time.

Mr. PACKWOOD. Mr. President, I move to proceed to the consideration of the conference report.

The PRESIDING OFFICER. The question is on the motion.

There being no objection, the Senate proceeded to the consideration of the conference report.

Mr. PACKWOOD. Mr. President, the Senate and House conferees met on Wednesday, May 1 and resolved the differences between the Senate-passed and House-passed versions of H.R. 1869, which repeals the contemporaneous recordkeeping requirements of the Tax Reform Act of 1984.

As businesses and individuals sought to understand and comply with the contemporaneous recordkeeping requirements, it became clear that the requirement swept too broadly and generally imposed excessive recordkeeping burdens on many taxpayers. The conference agreement adopts the Senate-passed version of H.R. 1869 with respect to the substantiation requirements and reinstates the prior-law substantiation rules of Code section 274(d). In addition, the conference report requires the Internal Revenue Service to issue regulations not later than October 1, 1985, and the regulations must fully reflect all the amendments made by this conference agreement.

EXPLANATION OF PROVISIONS

REPEAL OF CONTEMPORANEOUS REQUIREMENTS

Under the conference agreement, the requirement of "contemporaneous" records to substantiate certain deductions or credits is repealed.

The conference agreement adopts the Senate provision on substantiation, which permits taxpayers to substantiate deductions and credits for expenses by sufficient evidence corroborating their own statements as well as adequate records. Thus, there will be no statutory requirement that such evidence be in writing. In addition, the conference agreement directs the Internal Revenue Service to request specific information on tax returns concerning mileage and business use of vehicles and other listed property, effective for 1985 tax returns.

REPEAL OF REGULATIONS, RETURN PREPARERS' PENALTY AND SPECIAL NEGLIGENCE PENALTY; NEW REGULATIONS

Under the conference agreement, the contemporaneous recordkeeping regulations issued to carry out the amendments made by the Tax Reform Act of 1984 are repealed. In addition, the conference agreement repeals the return preparers' penalty and special negligence penalty added by the Tax Reform Act.

EXCEPTIONS FROM SUBSTANTIATION RULES AND EXCLUSION FROM INCOME FOR CERTAIN VEHICLES

The conference agreement exempts from the substantiation rules vehicles which, by reason of their nature, are not likely to be used more than a very minimal amount for personal purposes and excludes such minimal personal use from the employee's income. The exemption from these substantiation requirements is effective January 1, 1986.

In addition, the conference agreement authorizes the Treasury Department to issue regulations exempting from the substantiation and income exclusion requirements certain officially authorized uses of unmarked vehicles by certain law enforcement officers.

WITHHOLDING ELECTION

The conference agreement permits employers an election not to withhold income taxes with respect to noncash fringe benefits attributable to commuting or other personal uses of a highway motor vehicle.

In addition, the conference agreement allows employers to elect to withhold income taxes and employment taxes on all noncash fringe benefits on the following basis:

First, by pay period; second, quarterly; third, semiannually; or fourth, annually.

REDUCTION IN LIMITS ON INVESTMENT TAX CREDIT AND DEPRECIATION FOR LUXURY AUTOMOBILES

The conference agreement reduces the limits on the investment tax credit and depreciation for automobiles. The maximum investment tax credit is $675. Maximum depreciation (cost recovery) deductions are reduced to $3,200 in the first year, and $4,800 per year thereafter. In addition, indexing of the limits for automobile price inflation is delayed until 1989.

Mr. President, the conference agreement achieves the purposes of the Senate-passed version of H.R. 1869 and fully incorporates all of the provisions which the Senate unanimously supported.

I would like to thank Senator ABDNOR, Senator HEINZ, and Senator WALLOP for the leadership roles they have played in repealing the contemporaneous recordkeeping rules. I hope all of my colleagues will join me in supporting the conference agreement.

Basically—and this is a generalization but it is 99 percent true—what we have done, as far as automobile recordkeeping, is return to the law prior to the passage of the Tax Reform Act last year. There are some very minor changes, but I think we can say to everyone in this country, "If you were able to live with the law prior to the passage of the act last year, you will be able to live equally well with the law as it is corrected by this conference report."

I would therefore encourage the adoption of the conference report to rectify this mistake that we made a year ago.

Mr. LONG. Mr. President, the conference action represents a workable balance between the necessity that deductions be proved and the desire that taxpayers not be unduly burdened. It recognizes the common sense fact that there is more than one acceptable way to prove business use.

I hope that the Treasury Department recognizes the balance the conferees have struck, and will not repeat its previous mistake of forgetting that reasonableness is an important part of our tax system.

I am pleased that we have acted both promptly and responsively. I urge my colleagues to support the conference action.

Mr. METZENBAUM. Mr. President, I rise to speak on this issue under unusual circumstances. I want to start off by saying that I have been in the U.S. Senate, 1 year in 1974 and then since 1977 I have served here continuously. To the best of my knowledge and recollection, this is the first time that I—and I think it applies to others as well—have been called to the floor in connection with an issue where I had a hold, a hold only indicating that I wanted to be on the floor when the matter came to the floor.

As soon as the conference report was completed, my staff indicated to the staff of the majority leader, as well as the staff of the Finance Committee chairman, that I wished to be on the floor to discuss this conference committee report as well as a sideline issue having to do with a Treasury action. That Treasury action was prompted by the action of the majority leader and the action of the report language that came out of the Senate committee but actually never was technically before the Senate, on a subject really unrelated or only somewhat related to this issue having to do with the manner in which executives report the value of their airline passage on corporate jets or corporate planes.

I said that I wanted to point out to the Senate what this issue was all about, that I had no intention to filibustering or trying to delay the matter, that I was prepared to come to the Senate floor at a time agreeable to the chairman of the Finance Committee, and that I was willing to agree to a limited time for debate. I proceeded on the assumption that we would have no difficulty in working out that arrangement.

Last evening, when I arrived home, having picked up my wife at the airport and came home at approximately 11 o'clock, I received a call from my office saying that they have scheduled the conference report for 9 o'clock this morning. I asked if they were not made aware of the fact that that was not convenient for me and how would that come about since that never is normally done in this body and we certainly are not in the closing hours of a session where one might have to use emergency procedures by reason of the exigencies of the moment. That did not seem to matter and apparently the majority leader knew the situation but was determined to go forward. I am not angry. I am disappointed, and I am concerned as to whether or not this new leadership in the Senate—with whom I feel I have had a good working relationship even prior to the time the new leadership took over the leadership of the Senate—is going to change the procedures that have been operable and have worked so well in the past.

All the Senator from Ohio had indicated was that he wished to work out a time mutually convenient with the chairman of the Finance Committee, and there was not any doubt in my mind—and I do not think there was any doubt in the mind of the chairman of the Finance Committee—that we could work out such a time. My staff had further advised the staff of the chairman of the Finance Committee that we were not talking about sometime 1 month or 2 months from now, but that we were talking about some day this week.

I do not believe that the chairman of the Finance Committee was aware of this issue, this side issue of scheduling of this matter, and I think it was a leadership decision; a leadership decision that I do not believe was the kind that should be made. I do not think that when this side of the aisle was in control of the Senate such occurrence became a fact, and I do not have any recollection of it being a fact any time since I have been here.

I think that all we are really doing is taking up far more time than otherwise would have been necessary in order to dispose of this issue.

The Senator from Ohio has great concerns about the issue itself. The issue is a simple one. While everybody is jumping up and down about balancing the budget and everybody is talking about closing tax loopholes, in effect this is opening another tax loophole or reopening one that had heretofore been closed. We are doing it without a piece of legislation, and we are doing it with the full cooperation of the Treasury Department which advised me within the last 24 to 48 hours that it was not able to respond to a letter that I wrote to it on the issue more fully than it did because it was so busy with the President's tax program.

I do not have any problem about that. I understand their first priority. And I understand that issue is far more important than this. But I also understand that this issue, simple as it may be, makes it possible for a great many corporate executives to get off scot-free when they take the corporate plane on a vacation or to a baseball game, or they take their family with them. It just means that they will pay a very, very small amount taxwise as compared to what the law presently is. There has been a lot of push for this, so much push that the schedule is for 9 o'clock in the morning without a whole lot of concern for Members of this body, particularly for this Member.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PRYOR addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. PRYOR. Mr. President, I would like to commend this morning the chairman of the Finance Committee, Senator PACKWOOD, and also the rank-

ing member of the committee, Senator LONG, and the conferees for their efforts in repealing a very onerous contemporaneous recordkeeping requirement, and I hope that the conference report that we are going to adopt will solve these problems once and for all, will allow businessmen and farmers to continue in their business endeavors without having to fill out a massive amount of paperwork.

Before we adopt the conference report, however, I would like to ask the chairman of the committee a couple of questions. As the chairman is aware, I was very interested in the issue of whether or not policemen and other public safety employees would be taxable on the use of certain specially equipped vehicles. When we considered the bill in the Finance Committee, the chairman of the committee will recall that we included report language stating that certain vehicles, like police cars, ambulances, school buses, and others, would not give rise to any income imputed when driven by certain employees. The chairman was very helpful in this effort, and I appreciate his help.

Then, when the bill was on the floor of the Senate, I raised an issue about unmarked police cars. At that time, it is my recollection that the chairman stated that the IRS would be instructed to exempt these vehicles as well, so that our law enforcement officers would not have any income when they drove these vehicles for legitimate law enforcement reasons.

It is my understanding, Mr. President, that when the conferees met on this bill, there was quite a bit of discussion on the issue of the tax treatment of unmarked cars. From what I have heard, the chairman did indeed argue for similar treatment, and to a large extent, prevailed. I thank him for this.

Mr. President, I have two questions I would like to respectfully pose to the distinguished chairman of the Finance Committee. The first of those questions is that I would like to make certain that unmarked police cars will not be treated any worse than marked police cars. If, for example, all of the tests for unmarked cars are met, then is it the chairman's intent that commuting use and other de minimis use should be considered a working condition fringe?

Mr. PACKWOOD. The Senator from Arkansas is correct.

Mr. PRYOR. The second question, Mr. President, I have for the distinguished chairman is this: When the tests are listed for exclusion of the use of an unmarked car, the statement of the managers refers to activities such as undercover work, stakeout activity or responding to emergencies. Is it the chairman's intent, and do you consider it to be the intent of the Congress, that this list is not all-inclusive and that if other legitimate law enforcement reasons exist for the use of an unmarked car, this use would also qualify?

Mr. PACKWOOD. The Senator is again correct, and I want to thank him for calling this issue to our attention. As he recalls when this bill went through the Finance Committee, we simply overlooked the issue of the unmarked police cars. The Treasury has indicated they will be able to accommodate the concerns of the Senator from Arkansas but I think had he not raised them they might not have been raised.

Mr. PRYOR. I do appreciate the distinguished chairman's comments on that and also his dedication to see to it that these unmarked police cars and other public service vehicles are not going to be subject to the imputed income to the drivers.

Mr. PACKWOOD. Absolutely.

Mr. PRYOR. I did thank the chairman of the committee. As I have stated earlier, I appreciate all of his help and concern in this area. I thank the chairman and the ranking member, Senator LONG, and those conferees who have sent this conference report to the floor this morning. I thank the Chair.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll

The bill clerk proceeded to call the roll.

Mr. MATSUNAGA. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATSUNAGA. Mr. President, I rise in strong support of the conference report on the bill, H.R. 1869, which repeals the contemporaneous recordkeeping requirements, earlier adopted as part of the Deficit Reduction Act of 1984, and which also sets a substantiation standard for the business use of property.

As a member of the Senate conference committee, I had the opportunity to work with other conferees in an effort to establish reasonable recordkeeping rules for the business use of vehicles and other business property. The objectives of the conferees in addressing this issue were twofold: First, to ensure compliance with our tax laws; and second, to ensure that the rules set forth to accomplish this goal are not overly burdensome to the taxpayer.

The repeal of the contemporaneous recordkeeping requirement, as approved by both the House and the Senate bills and as set forth in the conference agreement, should remove the unintended onerous recordkeeping burden foisted on the taxpayer by the Deficit Reduction Act of 1984. As a replacement for the contemporaneous recordkeeping standard, the conferees agreed to a substantiation standard, which in large measure had been in effect prior to the 1984 act. Under the conference agreement, taxpayers would be allowed to substantiate tax deductions for the business use of property by "adequate records or by sufficient evidence corroborating the taxpayer's own statement." I am confident that this substantiation standard, which has been interpreted by the Internal Revenue Service through regulations since 1962, will provide a reasonable compliance standard for the taxpaying public without inhibiting the Government's ability to enforce compliance with our Federal income tax rules pertaining to the business use of property. I, therefore, urge my colleagues to approve the conference report.

Mr. ZORINSKY. Mr. President, thank you for giving me the opportunity to speak on behalf of thousands of Nebraskans who urge swift passage and enactment of the legislation before us today. I strongly support this much needed measure, which will relieve millions of taxpayers across the Nation from the excessive burden of maintaining detailed records for every trip taken in a business vehicle.

Like all of my colleagues here in the Senate, I have heard from hundreds of outraged constituents. Their message is as clear as it is consistent: Repeal this burdensome, ridiculous recordkeeping requirement immediately. They rightly blame Congress as the originator of their problem, and now look to Congress to act and to act quickly to provide a solution.

I strongly opposed the adequate contemporaneous records rules when they were under consideration last year. I wrote the members of the House-Senate conference and urged that these regulations be deleted. I came to Congress to get Government off the backs of the private sector, not to increase the paperwork requirements, and these rules run completely counter to those goals. Unfortunately, my advice was not heeded.

Particularly hard hit by these autolog rules is the farm and the small business sector. Over 2 million farmers filed individual tax returns during 1983. Because of the nature of their business, most, if not all, of these individuals are affected by the recordkeeping requirements. Adding to the difficulties already facing the farm communities, as well as the small businesses around my State, is entirely inappropriate.

Quickly action is now warranted to remove this burden. I am pleased to have cosponsored S. 245 and S. 260,

measures aimed at repealing these excessive tax provisions. The thrust of these bills is embodied in the proposal before us today. They would eradicate the requirement which one of my constituents from Broken Bow called, "* * * the greatest waste of productive time that has ever been put upon us * * *."

This bill gets us back on track. It provides a uniform standard for deductibility of business expenses, and, more importantly, will get people out of the business of filling out forms and back into the business that gives them jobs and income. The broadbased, bipartisan support for the repeal of vehicle recordkeeping requirements serves as testimony to the strength of the American people when they are moved to take action. I hope that my Senate colleagues will join me today in voting with the overwhelming wishes of this country to pass H.R. 1869 and to repeal once and for all these recordkeeping requirements.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. Mr. President, I ask unanimous consent to set this business aside and have it become the pending business when we dispose of the foreign aid bill.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

TIME LIMITATION AGREEMENT

Mr. PACKWOOD. Mr. President, I ask further unanimous consent that there be a time limit not to exceed 40 minutes, with 30 minutes under the control of the Senator from Ohio [Mr. METZENBAUM] and 10 minutes under my control.

The PRESIDING OFFICER. Without objection, the time limitation is agreed to.

Mr. PACKWOOD. I thank the Chair.

FOREIGN AID AUTHORIZATION, FISCAL YEAR 1986

The PRESIDING OFFICER. The clerk will state the pending business.

The bill clerk read as follows:

A bill (S. 960) to amend the Foreign Assistance Act of 1961, the Arms Export Control Act, and other Acts to authorize appropriations for the fiscal year 1986 for international security and development assistance, the Peace Corps, the Inter-American Foundation, and the African Development Foundation, and for other purposes.

The Senate resumed consideration of the bill.

Pending:

Kerry Amendment No. 112, to express the sense of the Senate that Congress should encourage the revitalization of democracy in the Philippines.

Mr. PACKWOOD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. LUGAR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LUGAR. Mr. President, at this time I yield to Senator KERRY for a discussion of his amendment.

The PRESIDING OFFICER. The Senator from Massachusetts.

AMENDMENT NO. 112, AS MODIFIED

Mr. KERRY. Mr. President, I have not yet asked for the yeas and nays on my amendment, and at this time I send to the desk a modification of the amendment which was submitted last night.

The PRESIDING OFFICER. The amendment is so modified.

The modified amendment is as follows:

At the appropriate place in the bill, add the following:

It is the sense of the Senate that Congress should encourage the revitalization of democracy in the Philippines. To that end, the Congress affirms its intention to grant future aid to the Philippines according to the determination of the Congress that United States security interests are enhanced and sufficient progress is made by the government of the Philippines in:

(1) guaranteeing free, fair and honest elections in 1986 and 1987, or sooner should any such elections occur;

(2) ensuring the full, fair and open prosecution of the murder of Benigno Aguino, including those involved in the cover-up;

(3) ensuring freedom of speech and freedom of the press, and unrestricted access to the media on the part of all candidates for public office in the municipal elections of 1986 and the Presidential election of 1987;

(4) establishing the writ of habeas corpus and the termination of the Presidential Detention Action and all other forms of detention without charge or trial;

(5) releasing all individuals detained or imprisoned for peaceful political activities; and

(6) making substantial progress in terminating extrajudicial killings by the Philippine military and security forces and the prosecution of those responsible for such killings in the past.

It is further the sense of the Senate that Congress finds and declares that the primary purpose of United States assistance to the Philippines should be to maintain and foster friendly relations between the people of the Philippines and the people of the United States, and to encourage the restoration of internal security—both of which goals can be best served by the achievement of an open and stable democracy.

Mr. KERRY. Mr. President, I ask for the yeas and nays on the amendment as submitted.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KERRY. Mr. President, the pending amendment is jointly sponsored by me, the distinguished Senator from Alaska [Mr. MURKOWSKI], the distinguished Senator from Connecticut [Mr. DODD], and the Presiding Officer [Mr. BOSCHWITZ].

I want to express my appreciation to Senator MURKOWSKI, who, as chairman of the East Asian and Pacific Affairs Subcommittee of the Foreign Relations Committee, was more than cooperative with and helpful to me by joining in an effort to try to reach a compromise which would be acceptable to both sides of the aisle, and which, at the same time, would make the kind of strong statement we believe the U.S. Senate should be making with respect to this issue.

I also express my gratitude to the distinguished chairman of the Foreign Relations Committee, Senator LUGAR, for his assistance in this matter as well and for his willingness to accept this compromise.

Mr. President, while I would have preferred a stronger version of the amendment currently before this body, I do believe that what Senator MURKOWSKI and I have worked out sends a strong signal from the U.S. Senate that the revitalization of democracy in the Philippines is of paramount concern to us as a nation and of paramount concern to our foreign policy.

It is the belief of those of us who sponsor this amendment that the security interests of the United States will be enhanced in the Philippines only by a return to democracy at the earliest possible moment.

I know the distinguished chairman of the Foreign Relations Committee and the other sponsors of this amendment share with me a belief that the United States has important security interests in that region which include access to the vital sealanes in the South China Sea. We do have bases there which attract a significant amount of attention and which are vital to our ability to service our fleet in the Indian Ocean, and vital to protecting our interests in the Persian Gulf and elsewhere in that part of the world.

But we also have very, very important interests which stem from years of a unique relationship with the Filipino people. It is a relationship that goes back to 1898 and progressed through difficult periods of a war, a difficult period of the development of democratic institutions, through World War II, and subsequent to World War II the emergence, with the help of the United States, of democracy, of a constitution modeled on our

own Constitution, and of democratic institutions in which, though there might have been some imperfections, the United States can take great pride.

Mr. President, today as we hear much rhetoric in the U.S. Senate about the spread of communism throughout the world and the need of the United States to make efforts to try to respond to that so-called threat. I believe we have a unique opportunity to, in fact, respond to that threat. And I think if the Senate is not willing to go on record and if we are not willing down the road to hold accountable those whom we help with our aid to certain standards of behavior, then we may in fact be helping inadvertently the opportunity for communism to spread and to succeed.

I share with all Members of this body an abhorrence for the way in which people would have to live if they lose the rights that they could lose in the Philippines. But we must take note of the fact that there is a growing insurgency and that insurgency is able to grow and able to flourish to a large degree because it can draw on the frustration that people feel, and for which there is not any political outlet, as a consequence of the policies of the current government in the Philippines.

From April 6 through April 11 of this year I was in the Philippines where I held lengthy discussions with President Ferdinand Marcos, other Philippine Government officials, members of the opposition from all walks of life—business, professional, political, the church, academia—and the U.S. Embassy and military personnel.

During nearly 3 hours of private discussions with President Marcos, I raised a host of issues which I believe concern the Congress of the United States, including the absence of free and open and honest elections, the arbitrary and capricious use of Presidential detainment actions used to imprison people without charge or trial, human rights abuses on the part of the Filipino Army and security forces and, in particular, a practice which is known as salvaging, whereby those people who are in opposition to the government simply disappear from the face of this Earth.

I raised the issue of an independent and impartial Committee on Elections which is an essential ingredient for monitoring and setting up a process to guarantee free and honest elections. On many issues, the President promised that some reform would be undertaken. On others he was either noncommittal or he explained why he could not, or did not feel compelled to, take action.

For the record at this point, I wish to express my appreciation to President Marcos for the directness and candor with which he spoke and for according me, and I think through me the Senate Foreign Relations Committee, the courtesy of listening to our concerns and of responding to them.

I came away from this trip with a deep concern that unless there is a rapid restoration of democracy in the Philippines the chances for success of the Communist insurgency will be greatly strengthened.

In briefings by our military officials at the Subic Bay Naval Base, I was told that out of a population of 54 million people only 12 million or so, by their estimates, staunchly oppose the New Peoples Army, with 12 million people susceptible to NPA influence; the balance of the population some 30 million people remain indifferent; if the NPA does not bother them they do not seem to care.

Mr. President, I was alarmed by this estimate, alarmed that 22 percent of the population in the Philippines could easily be fully supportive of the efforts now of the NPA. But more than that statistic, the fact that 55 percent of the population of the Philippines is indifferent to the struggle going on between the government and the NPA is cause for concern not only to that government but to the United States.

The fact that the present regime can count on support from only 12 million Filipinos, or only 22 percent of the population, in order to deal with this effective growing insurgency is, I think, a point that ought to underscore our concern. And if nearly 78 percent of the population of the Philippines is supportive of or susceptible to NPA influence or controls or are neutral in this struggle, then that seems to me to be a stark statement about the loss of legitimacy of the current government.

Yet I also found, Mr. President, that while the Marcos regime continues to lose support among the population and the NPA continues to gain increasing control over the countryside, and even our own Defense Department has pointed to the fact that at the current rate of growth of the NPA there is the possibility of a military stalemate within the short period of perhaps 4 or 5 years, even though that is the situation, I believe there is room for hope. That hope stems from what I saw and I think others who have visited the region have seen, which is a ground swell of popular pressure to bring about political change in the Philippines through elections. Local elections scheduled for May 1986 are the key to the possibility of genuinely contested Presidential elections in 1987. If these elections are not free, then the chances for an electoral route for political and economic change in the Philippines may be lost, or at a minimum they will be seriously jeopardized.

That is why I believe it is imperative for Congress to go on record and to warn the present regime in the Philippines that it is our intention to grant future aid only if sufficient progress is made on the following:

First, a guarantee of fair and free and honest elections in 1986 or 1987, or sooner, should for any reason elections occur sooner;

Second, the full, fair and open prosecution of the murderer of Benigno Aquino, including those indicated and involved in the cover up;

Third, a restoration of the full freedom of speech and freedom of the press and unrestrained access to the media on the part of all candidates for public office in the local elections of 1986 and the Presidential election of 1987;

Fourth, the establishment of the writ of habeas corpus and the termination of the Presidential detention action and all other forms of detention without trial or charge;

Fifth, the release of all individuals detained or imprisoned for peaceful political activities and;

Sixth, that substantial progress is being made in terminating extrajudicial killings by the Philippine military and security forces and the prosecution of those responsible for such killings in the past.

I also believe it is imperative for Congress to go on record declaring that it is the primary purpose of our assistance to the Philippines to maintain and foster friendly relations between the people of the Philippines and the people of the United States, and to encourage the restoration of internal security—both of which goals can best be served by the achievement of an open and stable democracy.

I believe, Mr. President, these are important signals for the Congress of the United States to send.

In my discussions with the wide spectrum of groups in the Philippines, it was evident that a prevailing view among an increasing number of people in the Philippines is that the United States is not acting as strongly as it might to encourage democratic revitalization. In other words, Mr. President, the United States is—viewed as being only—interested in is the bases, not the Filipino people, not the record of democracy in that region, not the boarder interest of the U.S. foreign policy, but only the bases.

Now I would in no way diminish the importance of those bases. Yes; they are important to the United States. But, if we value them and if we want access to them in the future and if there is another government 5 years from now in the Philippines and that government remembers adversely what the United States has done during this difficult period, then I would respectfully suggest to this

great institution that our ability to be able then to negotiate our access to those bases may be diminished.

So if we are truly interested and truly want to protect the security interests of the United States, I believe we do so by moving to strongly advocate, and pressure, and leverage the the government of Ferdinand Marcos to change now. And we have to prove to the people of the Philippines that there is something beyond the bases that is important to us. We have to demonstrated our primary concern is for the people of the Philippines themselves.

As one opposition member of Parliament put it to me, "The United States has two military bases in search of a policy in the Philippines, and that is why you are caught in a bind supporting a dictator like Marcos."

This trip brought home to me the fact that our strategic interests in the Philippines must be more solidly based on our support of a democratic government and social and economic progress in that country. It is not simply because the United States had colonial responsibility in the Philippines for nearly half a century, or that Filipinos and Americans fought side by side during World War II, or that our country has an obligation to support the popular aspirations of the Filipino people for democracy. What is even more important is that there remains, even after 13 years of martial law and authoritarian rule, or perhaps because of that experience, there remains a tremendous popular desire in the Philippines for the kind of freedom and pluralism for which the United States should fight and should support and nurture as the primary element of our foreign policy.

At great risks to themselves, and at great odds, millions of Filipinos have shown by their actions this past year-and-a-half that they want a democratic system with free elections, checks and balances, a return to free enterprise, and a government that is accountable to them. There are very few third world countries where the opportunity to support a genuine democratic alternative is as clear and as compelling as that in the Philippines. We strive to find nations that would give us the opportunity to win the kind of victory we could win for democracy in the Philippines. We have that opportunity now.

So I believe, Mr. President, we can choose to make a bona fide effort to affect the course of events there or not. But in choosing not to, we would be turning our backs not only on millions of Filipinos who look to us for leadership and for a sustained effort to foster democracy, we would be turning our backs ourselves on our own best interests.

Mr. President, I met very many remarkable and committed people in the Philippines during my brief visit. I was impressed with their commitment to democracy in the face of 13 years of martial law that has done great injury to the very institutions which we should be supporting. I made a commitment to those people that I and others would return here to do all we could to support them and their efforts to bring freedom and democracy back to their homeland.

It is time for us to act now to begin support of those aspirations before it is too late. I believe we owe it to the people of the Philippines to support with our actions as well as with our words the restoration of democratic institutions.

That is the message we will be sending with this amendment. I do not believe that this amendment does all it might in terms of setting up that leverage. But I believe that if the Senate, for the first time—and this will be the first time—if the Senate will go on record stating its intention to watch what happens there and stating its willingness to be able to exert that kind of leverage at a future moment in the event that appropriate actions are not taken, then we will have begun a process which I think is important for the millions of people who look to us for that leadership; important to protecting the security interests of the United States of America; and important to giving our foreign policy the force that I think every Member of the U.S. Senate wants it to have.

So I am honored to join with the distinguished chairman of the subcommittee, the distinguished Senator from Alaska, Senator DODD and others in the effort to try to see that the Senate will begin that process and that we will at least hold ourselves accountable for our own actions.

Mr. President, I yield back my time.

Mr. MURKOWSKI. Mr. President, I rise on behalf of the sense-of-the Senate resolution introduced by my colleague from Massachusetts, Senator KERRY. I wish to compliment him on the eloquence of his statement. I feel that the proposed amendment reflects an obligation of the United States to the nation of the Philippines. That obligation goes to the nation and to the people.

The particular expression given in the amendment relates fairly to the concerns of the United States with regard to the very difficult situation occurring in the Philippines at this time. I think it is a responsible amendment in expressing the concern of the Senate with regard to some of the very basic issues, as indicated by the statement of my colleague from Massachusetts. And I think it represents certainly an effort, in expressing this concern, to recognize the full independence of the nation of the Philippines.

We are not engaging ourselves, by the intent of this resolution, in their internal affairs. We are not involving ourselves in their election process. What we are doing is sending a clear signal from the Senate of the United States of our interest in seeing that the Philippine Government or any successor government conduct free, fair and honest elections in the future, either in 1986 or 1987, to ensure the full prosecution of all those implicated in the Aquino affair, and other points covered in the six specific statements in the sense-of-the-Senate resolution.

As the chairman of the Subcommittee on Pacific and East Asian Affairs, I want to assure my many friends in the Philippines that the U.S. Senate, in expressing its views in this sense-of-the-Senate resolution, does not intend to involve itself in Philippine internal affairs. It simply represents an attitude and a feeling of commitment to the recognition of human rights and free elections and to encouraging a climate where democracy can continue to grow and flourish. And with the tenor and tone of the amendment, I think it fairly represents the concern in the United States and certainly in this body to ensure that the basic constitutional foundation of the Philippines is strengthened and encouraged by the amendment itself.

I have no further comments with regard to the sense-of-the-Senate resolution. I yield my time to Senator PELL.

Mr. PELL. Mr. President, in my mind this is an excellent amendment. It indicates to the Philippines and to the world as a whole the fact that the United States is looking at what goes on there more closely than it has in the past, that we are concerned about certain drifts in certain directions that the Government seems to be leading its people, and it gives us the foundations from which to examine our policy in the Philippines in the future.

The great pressure will not only be what the amendment does itself but also it serves as an earmark or a point of reference to what progress they make in the future.

If we look ahead a year or 2, we are sitting in this body, and we see that little progress is being made along these lines, it will then give us a basis at that time to have a more radical look at the situation and then perhaps a more harsh change of policy.

I commend the Senator from Massachusetts on the amendment and look forward very much indeed to supporting him.

Mr. LUGAR addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. I join Senator PELL in commending Senator KERRY for his diligence in crafting the amendment, and his personal involvement through

visits with responsible authorities in the Philippines for a first-hand view prior to crafting the amendment. I appreciate the work of the subcommittee chairman, Senator MURKOWSKI, and the comments which he has made about the amendment.

Mr. INOUYE. Mr. President, I intend to vote for the amendment offered by Senator KERRY, but I shall do so with strong reservations.

We are, all of us, concerned with the future of democracy in the Philippines. We are, all of us, supportive of efforts to support and encourage the revitalization of democracy in the Philippines. I do not believe that anyone in this Chamber would object to the statement that the primary purpose of U.S. assistance to the Philippines should be—as the text of the amendment itself states—"to maintain and foster friendly relations between the people of the Philippines and the people of the United States * * *."

I do, however, believe there is reason to be concerned that this amendment, if read literally, could undermine rather than revitalize democracy in that very troubled Republic. We are agreed that free and fair elections must not only be guaranteed, but also that such guarantees must be enforced. We are agreed that there must be a "full, fair, and open prosecution of the murder of Benigno Aquino."

But it must be asked, Mr. President, who is going to enforce those electoral guarantees? Who is going to prosecute the murderers of Aquino? I would submit that in both instances it will be the Government and the military of the Republic of the Philippines which will assume and carry out these responsibilities. Because of that, I would submit that it is not only presumptuous but counter to our purposes to issue, in this sense of the Senate provision, a blanket accusation of the Government of the Philippines and the military of murder, euphemistically referred to as "extrajudicial killings."

Mr. President, why does this amendment make no reference to the dedicated and courageous men and women who are working from within the Government and the military to preserve the integrity of their institutions, to protect the rights of their fellow citizens, to ensure the rule of law. It is not necessary to be blind to abuse, to be ignorant of the ultra vires exercise of power, to wish to be supportive of those who are presently conducting themselves with honor in the Government and military establishments in the Philippines. There have been abuses, that is beyond question. There have been unlawful acts perpetrated by some in the Government and the military—and not just at the lower ranks.

It is also true—and I would assert that the future of democracy rests on this fact and not on sense-of-the-Senate provisions, however well intentioned that there are people who each day put their lives and their futures at risk to preserve democracy in the Philippines. Some of those people serve in the Government, some serve in the military, some serve in private life—but they are numerous and they should be recognized. Many fought with us in the Second World War, alongside our troops in combat. Can we presume to instruct them on how they should defend democracy in their homeland? Can we assume that they have given up the struggle? Should we not recognize their continuing contribution to freedom and democracy?

Mr. President, I shall vote in favor of this amendment to support those in the Government and the military—in all walks of life—in the Philippines who are dedicated to democratic government and individual freedoms. I will not turn my back on those who have been my friends and comrades in arms. I reject any suggestion that all who serve in the military or Government are guilty of wrongdoing. On the contrary, I assert that many are the champions of Democracy.

Mr. KENNEDY. Mr. President, I support the amendment offered by Senator KERRY. An increase of 150 percent in military aid to the Philippines may be seen by the Filipino people as support for the Marcos regime and might therefore endanger U.S. strategic interests in the long term, unless we make clear that our aid is intended to strengthen democracy and human rights rather than to prop up an unpopular regime.

The continuing crisis in the Philippines is one of the most serious foreign policy problems currently faced by the United States in the Asian and Pacific region. The impatience of the Filipino people for a return to democracy, the unpopularity and isolation of the Marcos regime, the deteriorating economy and living standards, official corruption and human rights abuses by the armed forces are undermining the stability of this key friend and ally in the Pacific. This situation also fuels a growing Communist insurgency, which could threaten important U.S. strategic interests unless the Philippines Government and armed forces significantly improve their ability and will to deal with its causes.

I believe that American economic and military assistance to the Philippines is one necessary element for an effective effort against the NPA insurgency. But I also believe that our assistance will be ineffective and wasted unless it encourages political, economic and military reforms that address the root causes of the insurgency and promote a democratic alternative to the Communist NPA. Moreover, I am concerned that U.S. assistance to the Philippines not be seen by the Filipino people as support for the Marcos regime, lest our own interests in the Philippines become captive to Marcos' fate.

This amendment would not affect the level of economic or military aid for the Philippines for fiscal year 1986, but it would spell out clearly the reasons for U.S. assistance to the Philippines. It would also send a message to the Philippines Government and people that future U.S. aid will depend on progress toward democracy and human rights. Without progress toward these objectives, our assistance to the Philippines will at the very least be ineffective against the insurgency, and it could very well be detrimental to the preservation of a close U.S. relationship with the Philippines in the future. This amendment deserves our support.

TO SUPPORT DEMOCRACY IN THE PHILIPPNES

Mr. CRANSTON. Mr. President, the Senate has an important opportunity to send a strong message to Manila today.

This message should be clear. And this message should be unequivocal.

We will not continue however funding of the corrupt Marcos regime unless meaningful reform in forthcoming. We will not provide exorbitant amounts of military aid if that regime continues to thwart democratic development.

Mr. President, prior to the repressive reign of Ferdinand Marcos, the people of the Philippines had a proud tradition of free elections and peaceful government transition. And their principal opposition forces have been loyal, patriotic, and democratic. But unless change is forthcoming, the future for democracy in the Philippines is bleak.

Someday in the not-to-distant future, Marcos will be gone and the U.S. Government will then have to answer to opposition forces for its past policies.

Will we be part of the problem in the Philippines? Or will we be part of the solution, a solution which thwarts repression on the right and Communist insurgency on the left?

The amendment before us today, though not as strong as I would like, would make clear that U.S. interests require a rapid release of the stifling grip with which the Marcos regime throttles democracy. He would also make clear the importance with which the Senate views the obligation of the Philippines judicial system to prosecute those involved in the assassination of Benigno Aquino, and its subsequent cover up.

I support this amendment and urge its adoption by a strong vote.

Mr. LUGAR. My judgment is that the amendment probably will receive overwhelming support. A rollcall vote has been called. I know of no other Senators who wish to speak, and suggest that we proceed to vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Massachusetts. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

Mr. BYRD. Mr. President, I suggest the absence of a quorum.

THE PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from Massachusetts. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON] are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska, [Mr. EXON] is absent because of illness.

The PRESIDING OFFICER. (Mrs. KASSEBAUM) are there any other Senators in the Chamber desiring to vote.

The result was announced—yeas 89, nays 8, as follows:

[Rollcall Vote No. 78 Leg.]

NOT VOTING—3

East	Exon	Wilson

So the amendment (No. 112), as modified, was agreed to.

Mr. LUGAR. Madam President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 114

(Purpose: To terminate the prohibition relating to participation by U.S. officers or employees in foreign police arrest actions or interrogations)

The PRESIDING OFFICER. The Senator from Arizona is recognized.

Mr. DECONCINI. Madam President, I send to the desk and amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Arizona [Mr. DECONCINI], for himself, Mr. CHILES, Mrs. HAWKINS, and Mr. DENTON, proposes an amendment numbered 114:

On page 54, between lines 14 and 15, insert the following:

PARTICIPATION IN FOREIGN POLICE ARREST ACTION AND INTERROGATION

SEC. 509. Section 481(c)(1) of the Foreign Assistance Act of 1961 (22 U.S.C. (c)(1)) is amended to read as follows:

"(c) The head of any department or agency of the United States employing individuals who are authorized to engage or participate in any direct police arrest action in any foreign country with respect to narcotics control efforts, or any interrogation in connection with such efforts, shall prescribe regulations for the conduct of, and the procedures used by, such individuals.".

Mr. DECONCINI. Madam President, the amendment that I am offering today for myself, Senator HAWKINS and Senator CHILES would effectively repeal section 481(c)(1) of the Foreign Assistance Act of 1961 (22 U.S.C. 2291(c)) commonly known in law enforcement circles as the Mansfield amendment. As the war on narcotics traffickers, both overseas and in the United States, escalates this amendment will remove one more impediment to effective law enforcement overseas. If approved, this amendment will allow our law enforcement officers in foreign countries to better assist foreign agencies with their own domestic drug trafficking problems as well as help eradicate the drug smuggling threat that plagues our Nation.

Madam President, unless you are a hermit or live in a cave in the Grand Canyon, it is common knowledge that this country is under seige by the drug trafficker. The tragic, brutal murder of one of our finest Drug Enforcement Administration [DEA] agents in Mexico and the threat against our Customs and Immigration officers along the Mexican borders by members of the drug community have focused renewed attention on the need to attack the drug menace at the source. The Mansfield amendment is viewed by most law enforcement agencies as an impediment to allowing our drug enforcement agents in source and transit countries to assist host government law enforcement efforts to go after the narcotics trafficker in those countries that are plagued with a serious drug threat. What was born nearly 10 years ago in response to a preceived overzealousness by our drug enforcement agents in Thailand has remained on the books since 1975, weakening enforcement efforts overseas and frustrating our civilian law enforcement agents here at home. The amendment we are introducing today would take the shackles off our drug enforcement agents in foreign countries, while at the same time directing our civilian law enforcement agencies to promulgate appropriate regulations to assure proper conduct of our individual agents overseas.

Madam President, I ask unanimous consent to have printed in the RECORD at this point an outline of some of the history surrounding the adoption of the so-called Mansfield amendment nearly a decade ago.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

A BRIEF LEGISLATIVE HISTORY OF THE MANSFIELD AMENDMENT

In a report by Senator Mike Mansfield dated October 1975, entitled "Winds of Change: Evolving Relations and Interests in Southeast Asia," the Senator stated that the day before his arrival in Thailand, U.S. Drug Enforcement Administration agents and Thai police had carried out a joint raid on an opium refinery. His opinion of that activity was as follows:

This sort of U.S. anti-drug activities in Thailand seems to be highly dubious. Quite apart from the expenditure of U.S. funds, the direct participation by U.S. agents in police activities within Thailand amounts to involvement in internal Thai affairs. While it undoubtedly is meritorious in objective, it is a foot-in-the-door, a joint of entry which could lead to extensions and in the end, renewed entrapment in the internal affairs of that nation at renewed cost to the people of the United States. The sorry history of military and economic aid and other activity in Indochina and Thailand over the past two decades should serve as a precaution in this respect. Police actions, including local drug enforcement, are functions of indigenous governments. If there is a U.S. role, it should be limited to the exchange of information and intelligence with appropriate Thai or other officials. Beyond that point U.S. financial assistance for anti-drug operations at whatever level may be set by the Congress, in my judgment, is best channeled through international or regional organizations.

Regrettably, the briefing Senator Mansfield received in Thailand may have been unclear as to DEA's involvement in the seizure of a large heroin laboratory by Thai police on August 10, 1975, at Songkhla, Thailand. The fact is that DEA agents were only supportive, they furnished reliable information, they did not accompany the Thai police during the arrests and seizure of the laboratory, and arrived on the scene about 1½ hours after the Thai police had the situation under control.

Similarly regrettable, was that after Senator Mansfield made his report, DEA did not arrange for a full briefing of the Senator to explain not only the pertinent facts regarding the case in Songkhla, Thailand, but also to fully inform the Senator of DEA's oper-

ations and guidelines in foreign countries. This erroneous, uncorrected impression on the part of Senator Mansfield let to his submission of an amendment aimed at limiting DEA's activities in foreign countries.

The committee print of S. 2662, dated December 18, 1975, a bill to amend the Foreign Assistance Act of 1961 and the Foreign Military Sales Act, and for other purposes, contained the following provision in section 303(c)(1):

Notwithstanding any other provision of law, no officer or employee of the United States may engage in any police actions in any foreign country with respect to narcotics control efforts.

DEA envisioned the provision as virtually obviating its operations in foreign countries and made its views known to various levels of the Government.

On February 6, 1976, President Ford sent a letter to Senator Mansfield indicating concern with the amendment, and that he believed any excesses can be avoided by careful and continuous scrutiny by the Executive branch and by promulgation of appropriate operating guidelines.

During Senate debate on February 5, 1976, Senators Percy and Mansfield engaged in a dialog attempting to explain the meaning of the provision. Senator Percy said that—

This amendment does not preclude American narcotics agents from engaging in other activities which are permissible under the law of the host nation and which would be of great help in the enforcement of Federal drug laws here in the United States. These include principally:

Undercover operations or other information-gathering methods, not involving the use of force, for acquiring tactical and strategic intelligence;

The handling and development of informants;

Evaluating intelligence, information-gathering, and drug law enforcement operations of foreign police officials;

Training foreign police officials to undertake special surveillance assignments, or contracting with private parties and informants to undertake such activities.

The Senate also had before it the report of the Senate Committee on Foreign Relations, which stated in part as follows:

In adopting this restriction, the Committee seeks to reconcile two important U.S. interests; motivating foreign governments to cooperate to the fullest degree in stopping drugs from reaching the U.S. and avoiding excessive U.S. intervention in the internal affairs of other nations. The range of actions carried out by U.S. narcotic agents overseas covers a wide spectrum—from the innocuous (exchanging information and intelligence) to the clearly objectionable (actions involving the use of force and actions involving arrest of foreign nationals).

It is the Committee's intent that "police action," as used in this provision, is meant to prohibit U.S. narcotics agents abroad from engaging in actions involving the use of force and actions involving the arrest of foreign nationals—whether unilaterally (acting on their own) or as members of teams involving agents or officials of other foreign governments. And more broadly, it is the Committee's intent that the Drug Enforcement Administration and Chiefs of U.S. narcotics agents overseas not engage in any types of actions in which there is a reasonable risk of embroiling the U.S. in the internal af' 'rs of other countries by tending to lead them into situations involving the use of force or the arrest of foreign nationals. On February 18, 1976, the Senate passed S. 2662 by a vote of 60 yeas and 30 nays.

The House of Repesentatives had not included a similar provision in the House bill. Consequently, the committee of conference proceeded to rewrite the Senate provision in S. 2662. The conference committee adopted a substitute provision which would prohibit U.S. personnel from engaging or participating in direct police arrest actions in any foreign country in connection with narcotics control efforts. Essentially, the conference committee added the words "direct" and "arrest" to the Senate provision. The conference committee explained the intent of the provision as follows:

In adopting the provision the committee of conference seeks to insure that U.S. narcotics control efforts abroad are conducted in such a manner as to avoid involvement by U.S. personnel in foreign police operations where violence or the use of force could reasonably be anticipated. By "arrest actions" the committee of conference means any police action which, under normal circumstances, would involve the arrest of individuals whether or not arrests, in fact, are actually made. The committee of conference intends that the U.S. Ambassador in any country where U.S. narcotics control activities are being carried out shall exercise close supervision over such activities to insure that U.S. personnel do not become involved in sensitive, internal law enforcement operations which could adversely affect U.S. relationships with that country.

The committee of conference emphasizes that this provision is not intended to prohibit U.S. government agencies from assisting laws on narcotics trafficking by providing such assistance as training, technical equipment, and intelligence.

On March 24, 1976, DEA Administrator Peter B. Bensinger directed that specific DEA foreign guidelines be prepared in anticipation that eventually the Mansfield amendment would become law. Mr. Bensinger assigned DEA's Chief Counsel Donald E. Miller to draft the guidelines in coordination with other concerned DEA offices and the Department of State. Mr. Bensinger directed that the final paper would include DEA's general foreign mission and guidelines as to what DEA's representatives can and cannot do in foreign countries.

The provision as finally enacted by the Senate and House of Representatives in S. 2662 was as follows:

SEC. 504 * * *

* * * * * *

(c)(1) Notwithstanding any other provision of law, no officer or employee of the United States may engage or participate in any direct police arrest action in any foreign country with respect to narcotics control efforts.

On May 7, 1976, President Ford sent a message returning S. 2662 without his approval. He gave as his reason that "the bill would seriously obstruct the exercise of the President's constitutional responsibilities for the conduct of foreign affairs." The veto message did not make any reference to the restrictions imposed on DEA's activities.

Subsequently, S. 3439 was introduced in the Senate and H.R. 13680 was introduced in the House with compromises in attempt to respond to the President's veto. H.R. 13680 was passed by the House on June 2, 1976, and includes the same language effecting DEA's foreign operations as did S. 2662. Senate bill S. 3439 was passed on June 25, and it too, contains the same provision affecting DEA.

On June 4, 1976, DEA Administrator Bensinger issued "DEA Functions and Guidelines Relating to Operation in Foreign Countries" to all affected DEA personnel, with instructions to insure that all employees are in full compliance as of June 21, 1976.

Mr. DECONCINI. Madam President, one only needs to look 50 to 60 miles off the Florida coast to see that the Mansfield amendment is hurting our drug interdiction efforts. I am referring to both Bimini and the Bahamas. For example, if a Customs aircraft is pursuing a drug smuggler who has been profiled as suspect, or who has actually been seen offloading contraband, or air-dropping drugs to marine vessels, the smuggler can fly into the friendly confines of Bimini or the Bahamas leaving the Customs air officer with no alternative but to return to port. If the Mansfield amendment were repealed, arrangements could be worked out with the Bahamian Government to allow Customs to continue its pursuit and interdiction into the Bahamas, to assist Bahamian police make an arrest and seizure of the pilot, the plane and, hopefully, the contraband itself. Right now the Bahamian Government is unable to mount sophisticated air or marine drug interdiction operations. By working closely with Bahamian enforcement officials, our DEA, Customs, and Coast Guard personnel could assist in interdicting large drug shipments before they are broken down and scattered among hundreds of small speedboats.

Madam President, let me cite one very recent, clear example of the frustration U.S. law enforcement officers face in tracking drug smugglers coming out of foreign countries and returning with impunity. On May 3, the Customs Air Branch in Albuquerque picked up a twin engine aircraft flying from Mexico through New Mexico and into the vicinity of Morenci, AZ. There the suspect aircraft airdropped marijuana to waiting vehicles and then retreated toward Mexico with the Customs Citation II in pursuit. The aircraft retreated into Mexican airspace and ultimately landed in Mexico—again, with impunity. If the Mansfield amendment were repealed, arrangements could be worked out with the Mexican Government to allow Customs to follow the suspect aircraft into Mexico and, with the help of Mexican law enforcement agents, arrest the suspect.

Finally, Madam President, I am convinced that if the Mansfield amendment had not been on the books during the tragic, painful weeks of speculation about the fate of Mr. Camarena, our kidnaped DEA agent in Mexico, our drug enforcement agents would have been less constrained to aggressively pursue the arrest and interrogation of suspects in the case. We

need to take the gloves off of our drug enforcement agents overseas so that they can protect their associates and better pursue the drug trafficker who threatens their lives and ours.

Madam President, the Mansfield amendment has outlived its usefulness. It is no longer needed. I understand that former Senator Mansfield even told Senator HAWKINS on a trip to China that the amendment was no longer needed. I am confident that our law enforcement agents will conduct themselves appropriately overseas. I know of no abuses of power or discretion by these men and women overseas. And the time has come to unite their hands in helping slam the door on the drug trafficker who works overseas and sells his deadly poison here in the United States.

Madam President, there has been some discussion with staff—and I appreciate the majority staff of the Foreign Relations Committee bringing it to our attention—about constitutional rights and protections. I call to the attention of the Senate the fact that the amendment provides that the appropriate law enforcement agencies would prescribe regulations for the conduct and the procedures of such American agents overseas, which certainly would include being sure that the constitutional rights are preserved.

I thank the ranking minority member and the chairman of the committee for their consideration of this amendment, and I urge its adoption by the Senate.

Mr. LUGAR. Madam President, I congratulate the distinguished Senator from Arizona for his thoughtful amendment. It is indeed one on which the staff of the majority and the minority have worked with the distinguished Senator, and we are prepared to accept the amendment.

Mr. DECONCINI. I thank the distinguished chairman and the ranking minority member.

The PRESIDING OFFICER. Is there further debate? If there is no further debate, the question is on agreeing to the amendment.

The amendment (No. 114) was agreed to.

Mr. DECONCINI. Madam President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 115

(Purpose: To provide for a study of ways to increase use of private and voluntary organizations and cooperatives)

Mr. LUGAR. Madam President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Indiana [Mr. LUGAR], on behalf of Mr. DANFORTH, propose an amendment numbered 115:

At an appropriate point in the bill, insert the following new section:

SEC. . Use of private and voluntary organizations, cooperatives, and the private sector.

"(a) The Administrator of the Agency for International Development is directed to undertake a comprehensive study of additional ways to provide development assistance through non-governmental organizations (including United States and indigenous private and voluntary organizations, cooperatives, and other private entities). Such study shall include:

"(1) an analysis of the percentage of development assistance allocated to governmental and non-governmental programs;

"(2) an analysis of structural impediments, within both the United States and foreign governments, to additional use of non-governmental programs; and

"(3) an analysis of the comparative economic benefits of governmental and non-governmental programs.

"(b) the Administrator is directed to conduct the study using available funds and to prepare a final report to the Congress no later than September 30, 1986.".

Mr. DANFORTH. Madam President, during a recent trip to Africa I visited a dry land research project in Somalia where local Somali farmers had been taught to grow healthy stands of sorghum without irrigation, without complicated equipment and without expensive fertilizers simply by changing the time of planting and adjusting the spacing between the planted seeds. The American agriculture experts who had developed these techniques emphasized two points. First, the African farmer, properly schooled through extension techniques common in our own country, has excellent skills and is highly motivated. Second, the most successful way to transfer the knowledge necessary to increase Africa's food production will come through people-to-people programs. "A major obstacle to more people-to-people programming is our overreliance on bilateral, government-to-government assistance. The Agency for International Development does have authority through the use of its existing 106 account to provide matching grants to private and voluntary organizations [PVO's] and direct funding to other private sector programs which can bypass government. The question is whether Congress should require greater utilization of this authority.

The purpose of my amendment is to direct AID to undertake a comprehensive study on how it could shift development programs away from governments and more toward PVO's and the private sector.

In Africa, far too often, farm cooperatives are created and operated by the African governments themselves. The centralized planning and marketing of African Parastatals is a well-known failure. It is possible that American farm co-ops and PVO's can be more effective in encouraging the spread of truly private sector cooperatives.

Mr. LUGAR. Madam President, I know of no opposition to the amendment, and I support it.

Mr. PELL. Madam President, I understand that this amendment does not in any way cut into the money that is available for the private organization.

Mr. LUGAR. That is correct.

Mr. PELL. There is no objection to the amendment. I think it is a good amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 115) was agreed to.

Mr. LUGAR. Madam President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 116

(Purpose: To terminate United States assistance for Bolivia unless Bolivia eradicates 10 percent of its coca production, and for other purposes)

Mrs. HAWKINS. Madam President, I wish to offer an amendment to the Foreign Assistance Act to call for the termination of U.S. assistance to Bolivia unless that nation eradicates 10 percent of its coca production.

I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Florida [Mrs. HAWKINS] proposes an amendment numbered 116.

Mrs. HAWKINS. Madam President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 64, between lines 16 and 17, insert the following:

RESTRICTIONS ON ASSISTANCE FOR BOLIVIA

SEC. 914. (a) The Congress finds that—

(1) cocaine has had a severe negative impact on productivity, public health, education, and the quality of life in the United States and on the national security of the United States;

(2) Bolivia is the source of more than 50 percent of the world's cocaine, and Bolivian production of cocaine continues to rise;

(3) 50 percent of the population of Bolivia is under 19 years of age, and cocaine production has had a severe, negative impact on the youth of Bolivia;

(4) the production of, and trafficking in, cocaine by Bolivia has contributed significantly to Bolivia's 1,000 percent rate of inflation.

(5) the failure of the Government of Bolivia to take steps to curb the production of

coca in Bolivia during 1984 was cited in the report of the Department of State entitled "International Narcotics Control Strategy Report" as a major disappointment in its review of drug producing countries; and

(6) Bolivia received more than $37,000,000 in United States assistance during the fiscal year 1984 and during such fiscal year did not eradicate a single coca bush.

(b)(1) Beginning with the fiscal year 1986 and for each fiscal year thereafter, no United States assistance may be provided Bolivia unless the President certifies to the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate that the amount of coca that was produced in Bolivia during the preceding fiscal year is at least 10 percent less than the amount produced in Bolivia during the fiscal year which preceded such preceding fiscal year.

(2) Whenever the President certifies under paragraph (1) that the amount of coca that is produced in Bolivia is reduced by more than 10 percent from one fiscal year to the next, the amount of any such additional reduction shall be carried over and counted as if it has occurred in the fiscal year following the year in which it actually occurred.

(3) The Secretary of the Treasury shall instruct each United States Executive Director of the International Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation, and the Inter-American Development Bank to oppose actively the extension of any loan or the furnishing of any financial assistance or technical assistance during the fiscal year 1986 or any fiscal year thereafter by the respective international financial institution to Bolivia, unless the President certifies under paragraph (1) that the amount of coca that was produced in Bolivia during the preceding fiscal year is at least 10 percent less than the amount produced in Bolivia during the fiscal year which preceded such fiscal year.

(4) In carrying out this section, coca produced solely for pharmaceutical purposes shall not be counted in determining amounts of production.

(5) As used in this section—

(A) the term "coca" means cocaine hydorchloride; and

(B) the term "United States assistance" includes any assistance of any kind (other than assistance involving only the provision of food or medicine) which is provided by grant, sale, loan, lease, credit, guaranty, or insurance, or by any other means, by any agency or instrumentality of the United States Government to or for the benefit of any foreign country, including—

(i) assistance under the Foreign Assistance Act of 1961 (including programs under title IV of chapter 2 of part I, relating to the Overseas Private Investment Corporation, but excluding programs under chapter 8 of part I, relating to international narcotic control assistance);

(ii) sales, credits, and guaranties under the Arms Export Control Act;

(iii) sales under title I (including title III) of the Agricultural Trade Development and Assistance Act of 1954 and donations under title II of such Act of nonfood commodities;

(iv) financing programs of the Commodity Credit Corporation for export sales of nonfood commodities;

(v) financing under the Export-Import Bank Act of 1945;

(vi) assistance under the Migration and Refugee Assistance Act of 1962;

(vii) programs under the Peace Corps Act;

(viii) assistance under the Inter-American Foundation Act;

(ix) assistance under the African Development Foundation Act;

(x) financial assistance for foreign persons or groups under the Mutual Educational and Cultural Exchange Act of 1961; and

(xi) assistance of any kind under any other Act.

CONDITIONS OF ESF ASSISTANCE TO JAMAICA

SEC. 915. Of the funds allocated for Jamaica for fiscal year 1987 under chapter 4 of part II of the Foreign Assistance Act of 1961, $5,000,000 shall be withheld from obligation until the President certifies to the Congress that the Government of Jamaica has prepared, presented, and committed itself to a comprehensive plan or strategy for the control and reduction of illicit cultivation, production, processing, transportation, and distribution of marijuana within a specifically stated period of time.

On page 64, line 18 strike out "Sec. 914." and insert in lieu thereof "Sec. 916.".

Mrs. HAWKINS. Madam President, we have given the Bolivians time, we have given them support, we have given them notice, and we have given them money, lots of money—$57 million in U.S. aid in 1984, $4 million earmarked for eradication alone. And what did we receive for the investment? We received a 10- to 15-percent increase in the production of cocaine.

This year the Foreign Assistance Act allocates almost $50 million in U.S. aid for Bolivia for the next fiscal year. It is time that this Government stopped funding our own destruction.

Last year, with 16 of my colleagues, I introduced a bill to cut off all U.S. foreign aid to Bolivia until that nation reduces its illegal crop by 10 percent. I have 16 cosponsors.

I have made numerous efforts, personally, to try to convince the Government of Bolivia to take steps to curb its drug production. I went to Bolivia and met with authorities there to make sure that they knew how destructive is their major crop of export; I sponsored a Western Hemisphere Conference on Narcotics Control in Washington and included Bolivian representatives for them to witness the drug control efforts of their fellow Western Hemisphere nations; I introduced the diplomancy against drugs amendment to give notice to drug producing nations that their involvement in the narcotics trade was intolerable; and I conducted a hearing into the State Department's international narcotics control strategy report on the compliance of drug-producing nations to the diplomacy against drug laws. The results of this report were for me the last straw.

As most of my colleagues know, I am chairman of the Subcommittee on Children, Family, Drugs and Alcoholism. In a recent hearing we discovered that Bolivia is doing nothing. Before this State Department report was released, it was acknowledged that Bolivia now providing fully half of the world's cocaine, but its production has actually increased dramatically. This report contained the following fact: Bolivia has not eradicated a single coca bush in the last year.

The diplomacy-against-drugs law passed in the Senate by a vote of 96 to nothting. Every one of my colleagues thereby acknowledged that use of this economic and diplomatic leverage could be effective in stopping drugs at the source. Then why not use it? Isn't 2 years for a nation with a strong army, alternate agricultural possibilities, and massive direct and indirect aid from the United States, enough time to pull up one coca bush?

I think it is time, Madam President. As a matter of fact, I am sure it is time. American parents have waited long enough. While waiting for Bolivia to take the action that it must, I have seen too many children go through the hell of narcotics addiction; too many young adults ruin their careers and their marriages before they have even started; too many people suffer financial calamity; too much drug-related criminal activity; and too much death and destruction—all because of cocaine.

Madam President, this morning's Washington Post has an article headlined "Recent Cocaine Use Seen in 30 percent of D.C. Arrestees," in the month of July. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

RECENT COCAINE USE SEEN IN 30 PERCENT OF D.C. ARRESTEES

(By Sandra Evans)

About 30 percent of all persons arrested in the District of Columbia have used cocaine recently, more than double the level of cocaine use among criminal defendants recorded just last July, according to the most recent tests in D.C. Superior Court.

The use of PCP among defendants now just barely outstrips cocaine use, at between 30 and 32 percent, said John A. Carver, director of D.C. Pretrial Services Agency, which does the testing.

"We are seeing some significant changes in the drug use patterns in the District," with cocaine use rising sharply among defendants, Carver said at hearings yesterday before the House Appropriations D.C. subcommittee on the city's proposed 1986 budget.

Last July, 14 percent of those arrested in the city tested positive for cocaine. That figure jumped to 22 percent by December and now has jumped another 8 percentage points in five months, according to the Pretrial Services Agency.

Carver said he did not know the reason for the sharp rise, though he said police have reported that the price of cocaine has dropped.

Two-thirds of all arrestees now either admit drug use or test positive for one or more of the five drugs the agency looks for, Carver said.

Defendants held in the court's cell block before arraignment are required to give a

urine sample that is tested for traces of heroin, PCP, cocaine, methadone and barbiturates as part of a program begun in March 1984 to examine how drug use affects criminal behavior.

The agency does not bother to test for marijuana use among those arrested. Carver said after the hearing, because "nobody cares about it."

Later during yesterday's hearing, Rep. Julian C. Dixon (D-Calif.), the subcommittee chairman, criticized D.C. Department of Corrections Director James Palmer for a "cavalier" attitude toward testing for drug use at Lorton Reformatory.

After Palmer and officials accompanying him were unable to provide recent figures on drug use at the city's prison, Dixon responded incredulously: "This is a major issue, and nobody here knows how many in any given month are tested and what the results of the test are?" Palmer promised to provide figures for the record.

In early 1984, after press reports about drug use at Lorton, officials tested the entire prison population and found evidence that about 10 percent had recently used drugs. The mayor announced a crackdown on drug smuggling into the prison, which was to include random drug tests.

In other testimony, officials of the D.C. Public Defender Service said that District judges now are issuing longer sentences, with 80 percent of persons convicted of serious crimes being incarcerated for some period.

Charles Ogletree, PDS deputy director, said that judges have given out harsher sentences in part because of sentencing guidelines being developed by a judicial commission, which Ogletree said has resulted in "peer pressure." Some convicted persons who in the past would have received probation are now getting jail terms, he said.

One knowledgeable law enforcement official, who asked not to be named, said that view had to be "pure speculation," however.

One issue that continues to receive intense interest on Capitol Hill is the construction of a new prison in the District, currently under study, which Mayor Marion Barry agreed to under pressure earlier this year.

William D. Golightly, D.C. assistant director for administrative services in the corrections department, said the city is considering a 500-bed prison facility. This is a significantly lower figure than advocates of a new prison have discussed informally.

Five hundred beds would not take care of current prison and jail overcrowding in the District, said one law enforcement source.

Mrs. HAWKINS. Madam President, Bolivia must be forced to accept its responsibility in this situation, and I am convinced the only way to make them understand is in economic terms and they must be strong economic terms.

Very simply, we in the United States must not accept this situation from Bolivia. With the enactment of this legislation, we would be saying to the Bolivians: You continue to produce and market your coca crop, you will lose U.S. aid, all of it.

Even with this proposed amendment, we are giving the Bolivians even more time, time that I do not personally feel they deserve. All they have to do to show that they are making an effort is to eliminate 10 percent of their coca crop. And this action would even benefit this troubled nation directly. They are currently operating at an astounding 2,200 inflation rate—caused in large part by the false economic atmosphere created by their illegal narcotics industry.

Madam President, I ask my colleagues to join me in this necessary amending of the Foreign Assistance Act to stop the flow of drugs into our country and to help parents in this country, the citizens of our Nation, by taking whatever steps are necessary to enact this legislation with all possible speed.

Madam President, I ask unanimous consent that Senators MATTINGLY, CHAFEE, FORD, HOLLINGS, DECONCINI, GARN, and MOYNIHAN be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LUGAR. Madam President, I commend the distinguished Senator from Florida for her leadership in the whole area of worldwide flight against drug abuse. She has been an eloquent and effective spokesperson for a point of view which is shared I believe by a large majority of the people of this country. We are grateful to her for her leadership.

Therefore, I think we all listen carefully when she speaks to these issues.

The specific point of this amendment has been the very regrettable activity of the Government of Bolivia in particular, and I support the amendment on our side.

We are prepared to accept the amendment.

Mr. PELL. Madam President, this is an excellent objective, one with which we can all agree.

I only have one question for the junior Senator from Florida. In what way does this differentiate or differ from the amendment we passed last night of Senator CHILES also dealing with Bolivia?

Mrs. HAWKINS. As soon as the bill is signed, all aid will be cut off until they eradicate 10 percent of the present crop. I do not believe there are any direct numbers in the language passed last night. It was just no standard, just discretionary—you can eradicate whatever you want, is what I read in.

Mr. PELL. Does the amendment of the junior Senator from Florida go farther?

Mrs. HAWKINS. Yes. It is tougher. It gives a standard of 10 percent eradication. It says immediately eradicate 10 percent and we will start giving them their allowance again.

Mr. PELL. The junior Senator from Florida sees no conflict between her amendment and the one passed last night?

Mrs. HAWKINS. Mine is much tougher.

Mr. PELL. I thank the Senator.

There is no objection.

The PRESIDING OFFICER. If there be no further debate, the question is on agreeing to the amendment of the Senator from Florida.

The amendment (No. 116) was agreed to.

Mr. LUGAR. Madam President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PELL. Madam President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 117

(Purpose: To express the sense of the Congress regarding foreign exchange intervention)

Mr. BRADLEY. Madam President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from New Jersey [Mr. BRADLEY] on behalf of himself, Mr. BENTSEN, Mr. MELCHER, Mr. MOYNIHAN, Mr. KERRY, Mr. BUMPERS, Mr. BINGAMAN, and Mr. HARKIN, proposes an amendment numbered 117.

Mr. BRADLEY. Madam President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 64, between lines 16 and 17, insert the following:

POLICY REGARDING FOREIGN EXCHANGE INTERVENTION

SEC. 914. (a) The Congress finds and declares that—

(1) the trade deficit looms larger than any other threat to the ability of the United States to generate jobs and create economic well-being;

(2) the trade deficit continues to deteriorate even from the 1984 level of $123 billion;

(3) the trade deficit will continue to deteriorate until the value of the dollar declines on foreign exchange markets;

(4) the dollar's rise may slow down but is unlikely to fall sufficiently as a result of Congress' contemplated budget deficit reduction measures;

(5) the dollar would probably fall under a number of tax reform proposals but industries losing market share due to the exchange rate may not be able to wait for a complete tax package;

(6) the only remaining timely option for lowering the dollar is intervention in foreign exchange markets by the Treasury or the Federal Reserve;

(7) any such intervention must be strong enough to achieve the Congress' intent of lowering the dollar's value but sufficiently moderate to prevent a sudden drop in its value;

(8) any such intervention in order to assure a gradual decline and protect against too large a drop in the value of the dollar; will require coordinated action by the central banks of Europe and Japan as well as the United States; and

(9) such coordination is especially important to strengthen economic and political ties with the allies of the United States and

to promote consistent macroeconomic policies to the mutual benefit of all.

(b) Therefore, it is the sense of the Congress that—

(1) the Secretary of the Treasury and the Chairman of the Federal Reserve Board, in concert with our allies and coordinated with the central banks of the Group of Five or other major central banks, should take steps as are necessary to lower gradually the value of the dollar;

(2) such steps should not exclude intervention in the foreign exchange markets;

(3) the Secretary of the Treasury and the Chairman of the Federal Reserve Board should work to ensure that the domestic macroeconomic policies of the United States and its allies are forged to reinforce rather than oppose one another.

Mr. BRADLEY. Madam President, my amendment calls on the Chairman of the Federal Reserve Board and Secretary of the Treasury, in concert with our allies, to take such steps as are necessary to lower the value of the dollar.

Such steps should not exclude moderate intervention in the foreign exchange markets.

Madam President, the purpose of the intervention would be to bring the dollar down gradually from its current astronomical rate of exchange with foreign currencies.

Any action taken by the Chairman of the Federal Reserve and the Secretary of the Treasury should be coordinated with the central banks of our major trading partners.

In addition, it is important that the dollar not be allowed to drop without limit.

The purpose of the intervention is to contribute to the stability, not the volatility, of international trade and finance.

The trade deficit has become our most immediate economic problem. Last year's $100 billion deficit in goods and services reflected a terrible loss of market share in every sector open to foreign competition. That was just the culmination of a process that had been going on for 3 years. For example, in early 1983, we crossed an important threshold. For the first time we imported more machinery and transport equipment than we exported.

Now I am not talking about portable radios here; I am talking about machine tools, tractors, and construction equipment.

It is a threshold that frankly I hope we will cross in the other direction at some time in the near future.

Mr. President, some people question the importance of the trade deficit. They point out that although our imports increased 26 percent in 1984, our exports increased 9 percent, reflecting substantial growth for American producers. There are two answers why we should take little comfort from that fact.

First of all, the increase of both imports and exports arises from the opportunities created by world economic growth and our trading system. But that does not mean that we are in good shape so long as our exports do not actually fall.

Our import-sensitive industries are taking a beating. More generally, all of our trade-sensitive sectors are losing their share in the world market. Their proportion of the pie is shrinking even though the size of their slice, like the size of the whole pie, may be growing. The importance of market share comes from the fact that in many manufacturing industries and information-based services, the future success of an enterprise depends on its size relative to its competitors, rather than its absolute size. Our loss of market share is just one more factor contributing to the competitive disadvantage of U.S. companies competing in world markets.

The second reason we should be concerned about the explosion of the trade deficit even if our exports continue to grow is that the net increase of imports over exports has been financed by foreign credit. In fact, the average U.S. citizen purchased over $400 more in foreign goods than he or she produced for foreign consumption in 1984. That difference was financed by foreign credit, mostly to the Government, which allowed us to keep our taxes down. So the end result of this is the same as a $400 consumer loan made by foreign banks to every man, woman, and child in the United States that they do not even know they received. This foreign credit would be a boon to the economy if it were all financing economic development. But since a large portion is going to finance the Federal budget deficit, thereby releasing taxpayer dollars for consumption of foreign goods, it is no surprise we have not experienced the shot in the arm to the economy that foreign credit usually delivers to the private sector.

The reason to worry is that we will have to pay off those loans without having had the full developmental benefit of the credit. The trade deficit is a serious problem whether or not our overall exports are up.

Madam President, the key to reducing the trade deficit is the value of the dollar. The value of the dollar rose 30 percent against foreign currencies between 1981 and 1983 and rose the same amount again in 1984. Compare that with the dollar's stability, within a 10-percent range, during the 6 years from 1975 to 1981.

The level of the dollar is killing jobs, business plans, and future economic opportunity. Unless we immediately address the problem posed by the value of the dollar, we will be putting U.S. industry into an economic hole out of which it will be incredibly hard to grow.

Perhaps the only long-term solution to the pressure raising the dollar is budget deficit reduction. Only by eliminating the demand for capital created by the budget deficit will we be able to stop the capital inflows from abroad in the long run. And only by stopping those capital inflows will we create natural downward pressure on the dollar.

Tax reform is another positive long-term solution. A broader based tax would make the economy more efficient and better able to grow out of its deficits. But neither budget deficit reduction nor tax reform promises any relief for the American worker in the short run. Both are slowed down by the political process, which is necessary to guarantee the integrity of Government and generate consensus.

The only immediate option for bringing down the value of the dollar and relieving the competitive disadvantage under which U.S. industry is now operating is moderate intervention in foreign exchange markets. Through moderate intervention the Federal Reserve and the Treasury can send a signal to the market that at least our central bank believes the value of the dollar is too high to sustain.

The crucial advantage of foreign exchange intervention is the speed of its effects. A reduction in capital inflows will immediately reduce the value of the dollar. But for that very reason it is important that the Federal Reserve and the Treasury proceed with caution and do not permit the dollar to fall without limit. Sustained, moderate intervention is most likely to produce the gradual decline in the dollar that we need.

It is important for the Federal Reserve to have considerable freedom in its response to foreign exchange intervention.

For example, the Federal Reserve should be free to choose not to cover the whole value of any sale of dollars abroad by raising cash in the Government bond market. Such a choice would reflect the importance of coordinating our monetary and foreign exchange policies so that they do not work against each other. If the Federal Reserve believes it is constrained to finance every sale of dollars by selling Treasury bills, it will be constrained to counteract any intervention that the Treasury might undertake. We should increase rather than limit our options.

Madam President, equally important, we must coordinate any foreign exchange intervention we undertake with the actions of the central banks of our major trading partners. If the central banks of Germany and Japan were to sell dollars the same day the Treasury did, we would weaken the Treasury's portfolio without having any impact on the value of the dollar. Conversely, if the dollar began to fall and the foreign banks refused to buy

dollars, it could indeed fall precipitously.

The world trade system cries out for greater coordination of economic policies of its major players. This is a first and necessary step in the direction of greater coordination. Our willingness to consider coordinated foreign exchange intervention should have a positive effect on our relations with our most important allies, as well as bringing them to the table for trade negotiations.

Madam President, in summary, our economy suffers from horrendously high trade deficits. One of the central causes of those deficits is the value of the dollar. To reject intervention as a means of getting the value of the dollar down is to embrace the kind of yo-yo exchange rates that we have experienced in the last 4 to 5 years.

Madam President, I hope that if the Senate were to adopt this amendment, it would send a clear message to the chairman of the Federal Reserve and to the Treasury that we are concerned about what the dollar's value is doing to our export sector and to the import-sensitive sectors of the economy; and that, given a range of options, the Federal Reserve and the Treasury should consider an active policy of intervention to get the dollar down and prevent speculators from keeping it high as opposed to a policy that is passive and says we have no control over the price of our exports or the price of imports that flood this country and take away American jobs.

This is a sense-of-the-Senate resolution. It indicates a feeling on the part of the Senate. I think it is an important message for us to send.

Mr. SIMON addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. SIMON. Thank you, Madam President.

I frankly am not sure whether I want to support this amendment or not. If the Senator will yield, I am not among those who are critics of the Federal Reserve Board for not printing more money in general. Our basic problem is a fiscal problem rather than a monetary problem.

At the same time, I think some limited intervention in the currency market may very well be justified. How do you resolve this dilemma for those who are in my situation? I may be describing your own situation. I am not sure.

Mr. BRADLEY. I say to the distinguished Senator from Illinois that certainly in the long run there is no doubt that both deficit reduction and tax reform are central to keeping a currency near where its true value should be. In the short run, some sense of currency intervention has the possibility of weighing against speculative pressures that put the value of the dollar up. As the Senator points out, one way you do this is by printing money, and another way of doing it is by simply selling Treasury bills. You can do that without increasing the money supply, and therefore, help control inflationary pressures that I am sure you are concerned about. So my short answer to you is to say that right now the policy of this Government is to say absent deficit reduction there is nothing that can be done about the value of the dollar. As a matter of principle, we refuse to do anything actively to get the value of the dollar down.

From my perspective, that is a choice that locks you in not only to the excessively high exchange rates of the last several years, but into a real possibility that the yo-yo exchange rates of today will continue ad infinitum, make the trading system almost untenable, and unleash strong pressures for protection that I think would not be in our long-term interest.

Mr. SIMON. I thank the Senator.

I am concerned about that very principle, that yo-yo situation. How can a person in business in Illinois or New Jersey possibly make long-term commitments when you do not know what the pound, the franc, the yen, the deutsche mark, or anything else is going to be?

It also strikes me as at least a possibility that if the Federal Reserve Board as a result of the adoption of this amendment were simply to announce we are going to consider intervention almost overnight, you would see the dollar take some drop and you would diminish speculation. Am I making a correct assumption here?

Mr. BRADLEY. The Senator is exactly correct, and there has been a recent case in point. That is the case of Great Britain. As a conservative Government it has been on record now for the last 6 or 7 years as being absolutely opposed to any kind of intervention whatsoever in the foreign exchange market as a matter of conservative principle. That conservative principle was given up when the pound got down to about $1.05 at which point, as it is commonly reported in the financial press, Margaret Thatcher called President Reagan and said "Help. Intervene. Help us out." The very statement the following day that the Government might intervene was responsible for a dramatic increase in the next week in the value of the pound.

So the Senator is exactly correct. One might not even have to intervene, but the prospect that one might intervene or at least had not excluded the possibility of intervening could have a very salutary effect on the value of the dollar in the sense of getting it lower so that our goods would be more competitive abroad and foreign goods would be more expensive here at home.

As the Senator knows, as a Senator who represents Illinois, 1983 was the first year in the country's history that we imported more tractors and machine tools than we exported. I do not believe that was related to the quality of our workers, nor to the quality of our management. It was related instead to the relative price differential that stemmed primarily from the value of the dollar.

So the Senator is exactly correct. This is a moderate first step in the direction of saying we have to control our financial circumstances. To abdicate that is irresponsible.

Mr. SIMON. I thank the Senator from New Jersey. It seems to me this is an amendment that ought to be weighed carefully by the Members of the Senate. If, frankly, we had a Federal Reserve Board that was capricious and whose judgment I did not think was fundamentally good and sound, I would probably vote against this amendment. Again, I do not consider my vote for this amendment as a criticism of the Federal Reserve Board. I think the Federal Reserve Board's policies have been basically sound. The problem has been here in Congress. But the Senator from New Jersey offers an amendment that gives us the possibility of bringing the value of the dollar down almost overnight. And I think it could be a real help in this massive trade deficit problem that we face.

So unless I hear some argument to the contrary that is persuasive to me, my strong inclination is to believe that the gentleman from New Jersey has a small tool here that without jeopardizing the monetary policy of this country can move us in a short term toward some better answers while we get our fiscal house in order.

I thank the Senator from New Jersey.

I yield back my time.

Mr. BAUCUS. Madam President, I rise in support of the resolution offered by the Senator from New Jersey. This amendment follows on a resolution I offered just before the Bonn Summit regarding the problems caused by the high value of the U.S. dollar.

I have spoken frequently about the damage to our industries, to our farmers, to our workers by the appreciation of the dollar. In the Finance Committee we heard 2 days of testimony about the problems caused by the appreciation of the dollar.

There appears to be nearly universal agreement that the dollar's appreciation—and its volatility—is a major contributor to our trade imbalance. I say nearly universal agreement because the President of the United States does not agree. The President sees no problem. He says the high dollar should be a source of pride!

Well, Madam President, Eastman Kodak increased its productivity 13 percent last year but saw that improvement swamped by an appreciation in the dollar. Ask them if they are proud of the high dollar.

Ask the American wheat farmer, whose productivity is the miracle of the modern world, if he is proud of an escalating dollar.

Ask the people in my friend from Illinois' State who work for Caterpillar Tractor if they think the overvalued dollar is a source of pride.

All of these people, Madam President, will say no.

Madam President, the Finance Committee held hearings on the question of currency values and the volatility of exchange rates. We found unanimous agreement that there was a problem. We did not find unanimous agreement on how to solve this problem. But we did find agreement on two steps: reducing the Federal deficit and some form of coordinated intervention in currency markets.

Madam President—the President of the United States must recognize the problem and allow the Federal Reserve to act.

INTERNATIONAL MONETARY STABILIZATION

Mr. BENTSEN. Madam President, I support Senator BRADLEY'S amendment. Its purpose is straightforward and certainly reflects the sentiment of many close observers of international economics and trade that the dollar is overvalued.

I chair the Senate Democratic Working Group on Trade. Several weeks ago, the group issued its initial report in which we made two specific points about our present trading system: First, that currency rather than trade flows determine exchange rates; and second, that a much closer coordination of economic policies between nations is needed to rein in currency fluctuations.

Let me explain.

The report noted that foreign exchange rates are set today by speculative currency flows, not trade flows. This revolutionary situation has its roots in the March 11, 1973, breakup of the Bretton Woods system of regulated exchange rates. In place of Bretton Woods, a new flexible exchange rate market was born, a world market in currencies enormously different from what preceded it. Today, world currency flows are about 25 times the size of world trade, $50 trillion a year versus $2 trillion a year in trade.

Thus, the tail now wags the dog: Instead of competitive prowess or relative resource attributes driving exchange rates, exchange rates determine whether the world's most efficient farmers or manufacturers can find a buyer. This is all the difference in the world. Now the price of goods is influenced by whatever currency speculators and investors look to; one day it may be the safety and security of the United States or Germany, the next, America's deepening budget deficit or Japan's burgeoning trade surplus; the third day, record U.S. real interest rates or sagging French exports.

GLOBAL INTERDEPENDENCE

A second change has been the growing interdependence of world trade. The explosion in world trade since the sixties has meant a larger share of jobs and income than ever before in most nations inextricably linked to foreign trade. Domestic economic health is determined by a host of variables originating abroad, many beyond the reach of domestic economic discussions and decisions.

In combination with flexible exchange rates, this interdependence has added a striking degree of volatility to domestic economies. Foreign economic policies are no longer muted by inflexible exchange rates. Quite the opposite, in fact. They have become magnified by flexible rates. And domestic macroeconomic policies have become less potent in the near term.

This volatility can be reduced or even eliminated in a variety of ways. For one, the world could return to a regime of fixed exchange rates. Another unappealing option is to simply reduce the volume of trade itself. The preferable course is to minimize exchange rate volatility by closer coordination of fiscal and monetary policies between the major trading countries. As Paul Volcker said in Houston on March 30:

> The exchange rate today is too important an economic variable to ignore in our policymaking.

Such coordination might have prevented the unbalanced combination of tight monetary and flat-out fiscal policies adopted by the administration in 1981, which gave such a lopsided cast to the recovery. In doubling and redoubling the budget deficit, the administration sent real interest rates to record levels, luring tens of billions from abroad, sending the dollar up 40 percent and more on foreign exchange markets. Since that time, the bloated dollar has eviscerated American farmers and manufacturers, imperiling rural Americans and American industry, and cast serious doubt on this Nation's ability to compete internationally.

International consultations could have prevented this needless economic trauma.

Moreover, with exchange rates driving trade flows, it is dawning on businessmen, farmers, and workers that they may never be able to become competitive. American firms report cutting costs by 50 percent in 1 year, only to find they must locate abroad. Workers settle for pay freezes, and learn new technologies, only to find the exchange rate has made their product more expensive than productivity growth cheapened it.

MODERATING EXCHANGE RATE SWINGS

The amendment before us makes the same point made by the Working Group: the dollar is bloated for reasons that have nothing to do with relative American economic prowess. It is bloated due to budget deficits. And the bloated dollar alone is responsible for about 45 percent of our trade deficit—a deficit that threatens to humble the economic recovery by diverting badly needed consumer spending abroad.

The dollar is still hobbling our economy despite its decline in recent weeks. And it will continue to do so until the budget deficit is reduced. In the meanwhile, the price being paid by American industry for the bloated dollar continues rising. Data Resources found that the dollar alone has lopped about 1 percentage point off economic growth in recent years, and cost us 2 million jobs.

As the trade deficit has widened, the impact of the bloated dollar has spread. The household data survey in April found that 174,000 jobs were lost that month, about half in manufacturing. Since January, 132,000 manufacturing jobs have been lost and sectoral unemployment there has jumped to 8 percent in April from 7.2 percent in December. More broadly, the number of jobs in the goods-producing sector has stagnated for about a year now with employment still far below the prerecession employment peak. And the foreign trade imbalance has destroyed nearly 700,000 highly paid manufacturing jobs since 1981 despite the recovery. The imbalanced nature of that recovery is vividly portrayed by the contrasting creation of nearly 5.8 million jobs in the lower paid service sector over the same period.

The trade deficit has inhibited growth sufficiently to leave unemployment stalled higher than any recovery in history. It is hovering far above the low point of 5.7 percent attained in the previous extended recovery from the 1974 recession. And it has even stalled above the trough of 7 percent attained by the mini-1981 recovery. Indeed, while growth has been good in 3 of the preceding 4 years, unemployment from 1981 through 1984 has averaged 8.8 percent—nearly 40 percent above the 6.2 percent average unemployment rate during the seventies. Virtually all of that shortfall rests squarely with the more than 2 million jobs lost in recent years by our eroding foreign trade sector. The failure of the recovery to return the economy to a lower unemployment path can be laid at the feet of the high-flying dollar.

The high-flying dollar needs to be reined in. Congress is moving to cut the deficit, a good first step. The administration and Federal Reserve should ensure that they, in turn, leave

no stone unturned in taking actions to bring the dollar down, as well.

For the longer term, the major trading nations—the United States, Japan, and the Economic Community countries—need to collaborate more closely to prevent a recurrence of the soaring dollar. They must conduct much more extensive discussions designed to ensure that our fiscal and monetary policies are not out of kilter. Such discussions can help avoid situations like the administration's decision to clamp down on monetary policy while turning the deficit-spending faucet wide open. That cockeyed policy pitted the two major government economic policy tools against one another. They were in conflict rather than working as a team. International consultations may have inhibited this unbalanced policy approach and the bloated dollar it created.

So it is my hope that this amendment will send a strong signal to the administration and the Federal Reserve. I want them to hear that it's time to get off their hands and join Congress with actions to move the dollar to more resonable levels. And, it is time to listen to what other nations are saying.

Mr. LUGAR addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Madam President, the Senator from New Jersey presented a very important analysis of the problems. I appreciate the colloquy that the Senator was conducting with the distinguished Senator from Illinois. The manager of this bill would state frankly that the problem I have as I listened to the colloquy, and as I read the resolution offered as an amendment to the Foreign Assistance Act, is that the parliamentary situation under which we are considering this bill does not have a germaneness element. As a result, it is not going to be useful for this Senator or any other to lodge a point of order because the Chair would find that we do not have a germaneness situation at all.

I mention that because this legislation is fair game for almost any consideration that comes before the attention of any Senator today. It could be a general discussion of life, times, and the problems that beset our country and almost any condition.

We have had a good spirited discussion. I suspect Senators might be stimulated to come to the floor and discuss the trade problem and the currency exchange problem at some length. It is not in any sense of detriment to the merits of the amendment because I really do not want to get into the that, although some important comments have been made on the face of the amendment. First of all, the Congress finds and declares that the trade deficit looms larger than any other threat to the ability of the United States to generate jobs and create economic well-being.

Perhaps that statement could be proven. One can think of other factors that are very important likewise. I doubt whether the Congress will come to that finding as a free-standing economic assumption without considerable debate and study.

I would suggest to the Senator from New Jersey very respectfully that I am prepared to move to table this amendment simply because of the economy of time. It would be without prejudice to the amendment. I wanted to signal that intent and rationale for doing so before bringing debate to an end.

I hope the Senator understands and will be prepared either to accept that judgment or to withdraw the amendment. I yield to him for his response.

Mr. BRADLEY. Let me say to the distinguished chairman of the Foreign Relations Committee that it is perfectly within is right to move to table the amendment, with which he disagrees. I suspect that is what he will do, and we will take a vote on this resolution.

I do not believe that this resolution will be the last time we will visit this issue. The fact of the matter is that if we are serious about bringing our economy away from the abyss out there, it will require not only deficit reduction and tax reform, but also a willingness actually to pursue a policy to lower the value of the dollar.

Frankly, although it is not in this amendment, if you want to know my personal view, it will also require us to be a little more aggressive in getting more of the Third World debt rescheduled.

I would say to the Senator from Indiana that this issue will be revisited as long as we continue to have these enormous trade deficits. The point will be made again and again until there is at least an awareness on the part of the authorities that active intervention is preferable to excessively high values of the dollar and it is preferable to yo-yo exchange rates.

To say you do nothing, which is the present policy, is to lock yourself into a position that I think endangers not only the economic health of our country today and in the next several years, but the very structure of the world trading and financial system.

So I say to the distinguished chairman of the Foreign Relations Committee that he will do what he will do and we will proceed and move ahead.

Mr. LUGAR. I thank the Senator from New Jersey for his gracious statement and for his constructive analysis.

For the reasons I have suggested earlier, since we are making a strong attempt today to complete a very complex piece of legislation, and I know of many amendments that deal directly with the foreign assistance situation, Madam President, I move to table the amendment.

Mr. BRADLEY. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Indiana to lay on the table the amendment of the Senator from New Jersey. The yeas and nays have been ordered and the clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Nevada [Mr. LAXALT] is necessarily absent.

I also announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON] are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Mississippi [Mr. STENNIS] is necessarily absent.

I also announce the the Senator from Nebraska [Mr. EXON] is absent because of illness.

The PRESIDING OFFICER (Mr. NICKLES). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 39, nays 56, as follows:

[Rollcall Vote No. 79 Leg.]

YEAS—39

Abdnor	Gramm	Pressler
Andrews	Grassley	Quayle
Armstrong	Hatch	Roth
Chafee	Hawkins	Rudman
Cochran	Hecht	Simpson
Denton	Helms	Stafford
Dole	Humphrey	Stevens
Domenici	Kassebaum	Symms
Durenberger	Lugar	Thurmond
Evans	Mattingly	Trible
Garn	McClure	Wallop
Goldwater	McConnell	Warner
Gorton	Murkowski	Weicker

NAYS—56

Baucus	Ford	Matsunaga
Bentsen	Glenn	Melcher
Biden	Gore	Metzenbaum
Bingaman	Harkin	Mitchell
Boren	Hart	Moynihan
Boschwitz	Hatfield	Nickles
Bradley	Heflin	Nunn
Bumpers	Heinz	Packwood
Burdick	Hollings	Pell
Byrd	Inouye	Proxmire
Chiles	Johnston	Pryor
Cohen	Kasten	Riegle
Cranston	Kennedy	Rockefeller
D'Amato	Kerry	Sarbanes
Danforth	Lautenberg	Sasser
DeConcini	Leahy	Simon
Dixon	Levin	Specter
Dodd	Long	Zorinsky
Eagleton	Mathias	

NOT VOTING—5

East	Laxalt	Wilson
Exon	Stennis	

So the motion to lay on the table amendment (No. 117) was rejected.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, the Senate has spoken clearly on this issue, and for my part I propose that the amendment be accepted; that we

move to a favorable vote and, if it is the pleasure of the distinguished Senator from New Jersey, the proposer of the amendment, we do so by a voice vote.

Mr. BRADLEY. Mr. President, I think this body has spoken very clearly. I think the message will be loud and clear that we should not exclude intervention, and I hope that this encourages the new Secretary of the Treasury and Chairman Volcker at least to hold it out as a possiblity to lower the value of the dollar and to make our exports more competitive and prevent the import flooding we have experienced.

I have no objection to a voice vote on the amendment.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 117) was agreed to.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BRADLEY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LUGAR. Mr. President, I ask unanimous consent that section 915 of the Hawkins amendment, which was just adopted, be stricken. This has been agreed to by all parties, including Senator HAWKINS.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 118

(Purpose: To establish the International Narcotics Control Commission)

Mr. LUGAR. Mr. President, on behalf of Senator HAWKINS and Senator PELL, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Indiana [Mr. LUGAR], for Mrs. HAWKINS and Mr. PELL, proposes an amendment numbered 118.

Mr. LUGAR. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 64, between lines 16 and 17, insert the following:

INTERNATIONAL NARCOTICS CONTROL COMMISSION

SEC. 914. (a) There is established the International Narcotics Control Commission (hereafter in this section referred to as the "Commission").

(b) The Commission is authorized and directed—

(1) to monitor and promote international compliance with narcotics control treaties, including eradication, money laundering, and narco-terrorism; and

(2) to monitor and encourage United States Government and private programs seeking to expand international cooperation against drug abuse and narcotics trafficking.

(c)(1) The Commission shall be composed of twenty-three members as follows:

(A) Seven Members of the House of Representatives appointed by the Speaker of the House of Representatives. Four Members shall be selected from the majority party and three shall be selected, after consultation with the minority leader of the House, from the minority party.

(B) Seven Members of the Senate appointed by the President of the Senate. Four members shall be selected from the majority party of the Senate, after consultation with the majority leader, and three shall be selected, after consultation with the minority leader of the Senate, from the minority party.

(C) One member of the Department of State appointed by the President.

(D) One member of the Department of Justice appointed by the President.

(E) One member of the Department of the Treasury appointed by the President.

(F) Five members of the public to be appointed by the President after consultation with the members of the appropriate congressional committees.

(2) There shall be a Chairman and a Cochairman of the Commission.

(3) On the date of enactment of this section and at the beginning of each odd-numbered Congress, the President of the Senate, on the recommendation of the majority leader, shall designate one of the Senate Members as Chairman of the Commission. At the beginning of each even-numbered Congress, the Speaker of the House of Representatives shall designate one of the House Members as Chairman of the Commission.

(4) At the beginning of each odd-numbered Congress, the Speaker of the House of Representatives shall designate one of the House Members as Cochairman of the Commission. At the beginning of each even-numbered Congress, the President of the Senate, on the recommendation of the majority leader, shall designate one of the Senate Members as Cochairman of the Commission.

(d) In carrying out this section, the Commission may require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memorandums, papers, and documents as it deems necessary. Subpenas may be issued over the signature of the Chairman of the Commission or any member designated by him, and may be served by any person designated by the Chairman or such member. The Chairman of the Commission, or any member designated by him, may administer oaths to any witness.

(e) In order to assist the Commission in carrying out its duties, the President shall submit to the Commission a semiannual report regarding the status of compliance with narcotics control treaties, the first one to be submitted six months after the date of enactment of this section.

(f) The Commission is authorized and directed to report to the House of Representatives and the Senate with respect to the matters covered by this section on a periodic basis and to provide information to Members of the House of Representatives and the Senate as requested. For each fiscal year for which an appropriation is made the Commission shall submit to the Congress a report on its expenditures under such appropriation.

(g)(1) There are authorized to be appropriated to the Commission for each fiscal year and to remain available until expended $550,000 to assist in meeting the expenses of the Commission for the purpose of carrying out the provisions of this section, such appropriation to be disbursed on a voucher to be approved by the Chairman of the Commission.

(2) For purposes of section 502(b) of the Mutual Security Act of 1954, the Commission shall be deemed to be a standing committee of the Congress and shall be entitled to the use of funds in accordance with such sections.

(3) Not to exceed $6,000 of the funds appropriated to the Commission for each fiscal year may be used for official reception and representational expenses.

(h) The Commission may appoint and fix the pay of such staff personnel as it deems desirable, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and general schedule pay rates.

On page 64, line 18, strike out "Sec. 914." and insert in lieu thereof "Sec. 916.".

Mr. LUGAR. Mr. President, the amendment calls for a commission on narcotics. For the reasons stated in the amendment, we on this side are in favor of the amendment and support its adoption.

Mr. PELL. Mr. President, this is an excellent amendment. The structure of the commission is modeled somewhat along the lines of the Helsinki Commission, which has proved to be so successful over the years. I think this will focus attention on this matter and will bring greater cooperation between the various elements involved. I hope the amendment is adopted.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 118) was agreed to.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MATTINGLY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 119

(Purpose: To provide restrictions on the furnishing of assistance for Peru)

Mr. MATTINGLY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Georgia [Mr. MATTINGLY] proposes an amendment numbered 119.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 54, between lines 14 and 15, insert the following:

RESTRICTION ON ASSISTANCE TO PERU

SEC. 509. United States assistance, as defined by section 481(1)(4), may be provided to Peru for the fiscal year 1986 only if the President certifies to Congress that the Government of Peru has demonstrated substantive progress in developing a plan, in accordance with the Single Convention on Narcotic Drugs of 1961, that will establish its legal coca requirements, license the number of hectares necessary to produce the legal requirement, and eliminate illicit and unlicensed coca production.

Mr. MATTINGLY. Mr. President, I have long been concerned about the international drug trafficking problem and have sought and supported measures designed to deal with it. An international problem requires an international solution. The governments of a number of nations, such as Columbia and more recently the Bahamas, have made deliberate and specifc efforts to cooperate with United States. Others, like the Peruvian Government, have not. In the past two decades, coca production in Peru has increased dramatically, and today coca leaves grown in Peru provide the raw materials for approximately 45 percent of the cocaine which enters the United States. This production is in clear violation of the single Convention on Narcotic Drugs of 1961 to which Peru agreed and which came into force in Peru in 1964. That treaty requires Peru to license its coca cultivation. It also obligates the Peruvian Government to establish its legal coca requirement, necessary to meet the demands of its coca leaf chewing population, while it phases out this leaf chewing practice by 1989. The production of coca leaves is to be abolished simultaneously with the reduction in leaf chewing. Despite the treaty, the Peruvian Government has not implemented and enforced an effective licensing program. It has not forced decreased production, even though it is obligated under the treaty to uproot wild coca bushes and destroy illegally cultivated coca. In fact, as I mentioned a moment ago, coca production has increased radically. In 1966, annual production was less than 10,000 metric tons. By 1981, production had grown to 50,000 metric tons and it continues to increase today.

The amendment I offer today says to the Government of Peru that the United States is serious about seeing the influx of illegal drugs into this Nation curbed. It makes clear that the United States will no longer tolerate Peru's indifference to this Nation's efforts and the provisions of a treaty to which it has agreed. Specifically, my amendment states that U.S. assistance to Peru may be provided for fiscal year 1986 when the President certifies to Congress that the Government of Peru has demonstrated substantive progress in developing a plan, in accordance with the single Convention on Narcotic Drugs of 1961, that will establish its legal coca requirements, license the number of hectares necessary to produce the legal requirement, and eliminate illicit and unlicensed production. As my colleagues are aware, current law allows for the suspension of assistance to any nation which the President reports to Congress is failing to progressively eliminate the illicit production of narcotic crops. This amendment is similar. But instead of relying on the administration to report failure to cooperate, it requires the President to act, to certify that Peru is making a real effort, and progress, before the assistance is released. It specifically requires that this progress should be measured in reference to three specific provisions of the 1961 convention.

It is my belief that the amendment will result in positive action, in serious negotiations between the two nations if that is necessary, to determine a plan to eliminate illicit coca production. I urge the adoption of the amendment. I believe it has been cleared on both sides.

Mr. LUGAR. Mr. President, I commend the distinguished Senator from Georgia for a very constructive amendment. He is correct that the amendment has been cleared on this side, and we are prepared to proceed to a vote on the amendment.

Mr. PELL. Mr. President, the Senator is correct. The amendment has been cleared on this side of the aisle. We urge its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 119) was agreed to.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MATTINGLY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 120

(Purpose: To reduce the military assistance program and increase funds for the donation of agricultural commodity sales abroad)

Mr. BINGAMAN. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Mexico [Mr. BINGAMAN] proposes an amendment numbered 120.

Mr. BINGAMAN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, line 12, strike out "5,464,500,000" and insert in lieu thereof "5,364,500,000".

On page 54, between lines 14 and 15, insert the following:

PL-480 FUNDS

SEC. 509. In addition to funds otherwise available for such purpose, there are authorized to be appropriated $100,000,000 to be used to carry out title II of the Agricultural Trade and Development Act of 1954.

Mr. BINGAMAN. Mr. President, this is a very simple amendment, but I believe it responds to several pressing needs now facing us.

The amendment calls for a reduction of $100 million in military assistance, excluding aid to Israel, Egypt, Greece, and Turkey, and it transfers that $100 million to funds authorized by Public Law 480, the Food for Peace Program. It does not add money to the foreign aid authorization. It simply allocates the funding.

Mr. President, this amendment is necessary, in my view, for several reasons. It is needed to address the serious famine problems which exist in Africa, the surplus grain situations we have in this country and the effect that surplus is having on our farmers, and the need to bring the Military Assistance Program into reasonable austerity budgetary alignment.

The amendment is also needed to restore funding for the successful Food for Peace Program. For these reasons, the amendment should be adopted.

Despite the international recognition of the drought problems and the resulting famine in Africa, little progress has been made toward a humane solution in this troubled part of the world. Unfortunately, this problem does not exist only in Africa. It is a serious worldwide problem.

According to recent statistics, yesterday 40,000 children around the world below the age of 5 died of undernourishment and associated causes; 40,000 more will be dead before today ends, and another 40,000 will die tomorrow. According to UNICEF, a total of 13 million to 17 million children die each year before reaching their fifth birthday. What can be done to help these children and solve the world hunger problem?

I think a lot can be done. The problems of world hunger exist not because the world has a food shortage. While the last decade has seen the greatest world population growth in history, world food production has grown even faster, but unfortunately, as we debate our foreign policies in this country, we have not recognized this fact. Instead of efficient, productive, and even lifesaving use of U.S. farm products, we find inefficiency, forced underproduction, and even waste and spoilage.

These bad policies have led to serious problems for the American farmer, threatening the future of many family-run small farms in my home State of New Mexico and throughout this country.

We now have a situation where farmers are fighting off foreclosure by overproducing. As a result, the price of 22 of 28 major farm commodities is below what it cost to produce those commodities. This has put 1,600 farmers out of business every week.

Also as a result of our inefficiencies we have created a situation where over 85 million metric tons of grain and powdered milk are left in storage elevators and warehouses of America at a time when the world adds 79 million more people to feed every year.

In my State of New Mexico, I have had farmers come up to me who want to give food away. They are seriously interested in donating food and grain to African drought victims, but unable to do so without great expense to themselves. I am working with these farmers to make low-cost transfers possible; however, we must also act to increase U.S. food aid to higher levels.

One of the best ways to increase food aid is through the Food for Peace Program which was created in 1954. Since then it has proven its success by providing food assistance to famine victims in every corner of the world.

Food for peace provided a record 18.3 million metric tons of grain in 1965 when America donated nearly 20 percent of its total wheat production for 2 consecutive years to help drought-stricken India. The expanded Food for Peace Program should now again be used to help drought-stricken Africa. it should be used to reduce the U.S. 4-year average stored food grain reserves from a 20-year high of 53 percent of annual use to a much more acceptable and traditional 35 percent.

This action would not cause any increase in consumer food prices because we would still have 35 percent reserves at home.

My amendment targets the $100 million in increased aid to title II of the program which is used for food donation to foreign nations to combat malnutrition and to meet emergency food requests.

Government-owned commodities are donated under government-to-government agreements and through the U.N. World Food Program and nonprofit voluntary relief agencies.

From 1954 through 1984, approximately 8.9 billion dollars' worth of commodities have been donated under title II. It is time we use this authority again to help famine victims in Africa. Adding $100 million to the Food for Peace Program should simply add to the $640 million requested by the administration and bring the level up to the fiscal year 1984 level of some $750 million, which was agreed to as a result of the 1984 supplemental.

This amendment would also bring our military assistance to a more reasonable level. Foreign military sales have increased dramatically from $1.096 billion to a recommended $2.364 billion under the current foreign aid authorization.

The emphasis on security buildup at the cost of development and technical assistance program is shortsighted. In 1985, some $650 million was authorized for title II of Public Law 480. The supplemental appropriation approved by Congress earlier this year to assist famine-stricken Africa makes clear that the 1985 authorization was woefully inadequate to meet the emergency that we faced.

We cannot continue to increase security assistance while droughts in Africa continue and 40,000 children die each day.

Since 1981 military assistance has increased 109 percent in current dollars while economic support has increased 91 percent and bilateral development and food assistance, 11.8 percent.

During this same time Public Law 480 funds increased a mere 6.5 percent and multilateral assistance increased 27.2 percent.

The $100 million reduction of foreign military assistance would not do harm to our commitments to our allies. The reduction is a small fraction of the $5.4 billion foreign military assistance figure, and it excepts Israel, Egypt, Greece, and Turkey.

Finally, this amendment gives the President flexibility to allocate funds among those countries which receive our military assistance.

The amendment is clearly reasonable. It is badly needed. It helps our farmers, it helps famine victims in Africa, and it does not break any commitments to our world partners.

I urge the adoption of the amendment.

Mr. President, I also ask unanimous consent that Senators HATFIELD, ROCKEFELLER, BUMPERS, PRYOR, and DECONCINI be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BINGAMAN. Mr. President, I urge the adoption of the amendment.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. LUGAR. Mr. President, the amendment offered by the distinguished Senator from New Mexico is unfortunate in these respects, and I say this most respectfully.

First of all, Public Law 480, the Food for Peace Program, does not appear in this bill. In due course, the Committee on Agriculture, Nutrition, and Forestry will be discussing the levels of that assistance this year, and I have no doubt that they will be generous levels.

The Senate has already acted, in fact acted on several occasions, to try to provide famine relief to Africa this year.

The poignant situation the Senator has brought to our attention has been raised already in several committees and on several instances.

I know of no dispute over the need for our country to take a stronger humanitarian role, and indeed, Public Law 480 is a means of moving substantial amounts of our agricultural surpluses.

I think we are mindful of that aspect of the program. The Senator from Indiana is mindful of it every time I visit with colleagues on the Agriculture Committee. They are in process of marking up legislation even today to address the issue of reducing surpluses.

The Senator from New Mexico has mentioned the extremely desperate problem of farmers in New Mexico who have lost employment, and who probably are in jeopardy of losing farms. The same situational exists in Indiana and across the country.

So I understand the desirability of having a tradeoff that would be helpful to our general agricultural surpluses as well as providing a way to manifest our humanitarian desires.

But I must say that in a technical sense there are real problems in doing this type of transfer within the foreign assistance bill.

Mr. President, the more substantial objection that I have to this amendment is based on the fact that $100 million is to be taken from foreign military sales, foreign military assistance.

This issue already been raised in debate on the Foreign Assistance Act. There can indeed be substantial differences of opinion as to the emphasis we should have on economic as opposed to security assistance.

But I must say to my colleagues that the administration has pointed out through a letter to Senator PELL and to me and perhaps to other Members of this body a very strong desire that we increase the military assistance aspect of the bill by $194 million.

The facts are that the budget that we passed last week in the Senate has a cap which would allow addition of this $194 million, which represents reductions already made by the Foreign Relations Committee.

There is a strong desire on the part of the administration that the Senate move to restore these funds for military assistance. This position is not based on any fear that the administration is somehow misguided or has mismanaged the allocation of resources, as the distinguished Senator from New Mexico has recognized, in exempting certain situations: Israel, Egypt, Greece, and Turkey.

There are other countries that also have very considerable ties to the United States of America and which are important to our foreign policy.

These countries unfortunately are at the end of the allocation line. As the military funding is taken out of the bill or not restored, they may be out of luck altogether. The problems of reallocation become much more intense.

Throughout the management of this bill in committee and in the Chamber, we have tried to maintain support from several constituencies.

It is obviously very important that we have strong bipartisan support on this floor for foreign assistance. It often has been a very difficult area for Senators to support and I am heartened that a majority appear to be in support of this legislation as we are moving along. We had a 16-to-1 vote in the committee.

But I think we also have to be mindful that we need to attempt to make certain that strong administration support remains for this legislation. It is a fact that in the past one reason the authorization bill did not pass in the Senate was that the administration, whether it was Democratic or Republican, decided that they really did not need to go to bat for this particular authorization. Ultimately, all that we are now in the process of trying to work out in an aboveboard, meticulous way happened in the dead of the night at the end of a session, in the continuing resolution or in some obscure appropriations process.

So I am mindful of the need for keeping onboard strong administration support, in addition to the bipartisan support we have fashioned thus far for the legislation.

I would simply plead with Senators that the administration request already exceeds by a long shot what we have provided in this bill. We, as managers of the bill, do not plan to ask for the additional $194 million that the administration has requested. But to accede to a request that we cut the already low level by another $100 million seems to me to be inadvisable and precarious if we hope to retain the administration's support. I believe we need that support if the bill is going to ultimately move through both Houses and finally to reestablish the authorization procedure that most of us want.

I would point out, once more, that we will have a Public Law 480 authorization that will undoubtedly be very generous. Money has been allocated in the budget process to the agricultural function that will allow both famine relief and Food for Peace as well as various other developmental efforts. That legislation will be proceeding through the Agriculture Committee and there is plenty of latitude in the bill and a lot of support for a generous authorization.

There is not any latitude left in this bill. And even if technically it were possible to make this sort of transfer, I would advise the Senate that it would not be a good idea in terms of our relationship and the trust that other countries have in us, countries such as Israel, Egypt, Turkey, and Greece.

I will in due course entertain debate from other Senators. There may be some who are on the floor who want to speak. My understanding is that we have at least another speaker on our side.

If Senator PRYOR wishes to speak on this bill, I will yield the floor.

Mr. PRYOR. I thank my friend from Indiana very much for yielding the floor at this time. I do not have prepared remarks.

First, I commend the Senator from New Mexico, Senator BINGAMAN, for offering this amendment at this time.

Second, I wish to commend the chairman of the Foreign Relations Committee, Senator LUGAR. I think in his approach this year in the matters of relationships with countries around the world, I think the Senator from Indiana, the distinguished chairman of the Foreign Relations Committee, has been prudent. I think he has exercised restraint and I think that the distinguished chairman has exercised an awful lot of common sense.

Third, it is my understanding that the chairman of the Foreign Relations Committee and the committee members have recommended a freeze on military arms sales, or the MAP program, for fiscal year 1986. And I commend the chairman and his colleagues for that.

However, I wish to state that it is my understanding that the military arms sale program, perhaps during the last 4 years, has been the fastest growing program of our Government. I know that last year I offered an amendment to cut back the funding level, if I am not mistaken, to either the 1983 or 1982 fiscal year levels. This amendment was accepted, I might say, with modified rapture. In other words, I did not get many votes, Mr. President, for that amendment. But I think it is time we take a look at this program.

I am proud to be a cosponsor of the amendment of the Senator from New Mexico. I think he is going to the real soul of what this debate is all about, and that is whether we are going to try to arm the world or whether we are going to try to use the bountiful products of our farmers and help feed the world. This Senator would say that I want to help feed the world rather than try to harm it.

I strongly believe that in this particular program, it is not sales, these are grant funds and they have increased by over 500 percent from the 1981–82 levels. Once again, the fastest growing program in our Federal function. I think the amendment of the Senator from New Mexico is right on target. I think this is the least we could do in removing at least a minimum amount of $500 million and transferring that to the Food for Peace Program to help feed the hungry and the starving throughout our world.

Finally, Mr. President, I would just like to say that a later time during the course of this afternoon, if the chairman of the Foreign Relations Committee would yield to me for some questions about the MAP program, I will deem it a good opportunity to discuss a few items I would like to pose to the Senator from Indiana, the chairman of the Foreign Relations Committee.

I thank the Senator for yielding.

Mr. BINGAMAN. Mr. President, I ask unanimous consent that the distinguished Senator from Montana, Mr. BAUCUS, be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BINGAMAN. Mr. President, I appreciate the comments of the distinguished chairman of the committee and the manager of the bill. I think this is a question simply of priorities. I do not doubt that the administration perhaps has a different set of priorities than I do as to where they think this money should be spent. I do not doubt that they would like to see an increase over what is presently represented in this bill for military assistance.

My view is that in the last several years we have seen a dramatic increase in military assistance. With the hunger problems we have worldwide and the problems we have in our own farm sector, it is time for us as a nation to reassess those priorities. I think this amendment is a small step in doing that.

One hundred million dollars is not a major item when you compare it to the size of the military assistance budget. I think that this would certainly be an improvement in the bill pending before the Senate and I do not believe it in any way destroys or prejudices the bipartisan support for the foreign aid bill.

Mr. President, I will conclude my remarks at this point. I believe the yeas and nays have been requested and I would urge everyone to support this amendment.

Mr. LUGAR. Mr. President, Senator HELMS wishes to speak on this amendment. Pending his arrival, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SIMON. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMON. Mr. President, I would like to ask unanimous consent first of all to be added as a cosponsor to the amendment.

The PRESIDING OFFICER (Mr. COCHRAN). Without objection, it is so ordered.

Mr. SIMON. I want to commend my colleague from New Mexico. Let me say to the chairman of the Foreign Relations Committee that there has been restraint in this budget relative to where we were 2 years ago on the foreign military sales. But as I look at the overall picture—for example, in fiscal year 1970, 17.7 percent of foreign aid authorizations were for military aid—we are now up in this authorization to 49.6 percent.

It is true that as of 2 years ago—fiscal year 1984—we were at 56.5 percent. So there has been a slight drop. But it does seem to me that what the Senator from New Mexico is suggesting is something that just makes an awful lot of sense. My own instinct and belief from some years of travel abroad and observance of these issues is that we have put much too much emphasis on the military side of things. The security of the world, and the future for my children and your children is not only going to be with bombers, submarines, and other things, but it is going to be with people who have food in their stomach, and who have an opportunity.

I think the Senator from New Mexico addresses that. The appeal of Marxism—that is really what we are talking about to a great extent when we talk about the political impact of all of this—is not what it stands for but what it is against. If we give people an opportunity, and this is an amendment that will given them a little more opportunity, I think we will do a lot more good than that extra $100 million on foreign military sales.

I commend my colleagues. I appreciate what he is doing here.

I yield back the floor.

Mr. LUGAR addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, I appreciate the good debate we have raising the merits and objections to this amendment. Earlier in the debate I indicated that I felt it unfortunate that Public Law 480 was being brought into this consideration of the foreign assistance bill at this point. During the Budget Act we suggested transfers of funds between various accounts. I do not think that such transfers will work in this particular situation.

It is for this reason, I believe, that a point of order lies against this amendment in that it strikes the bill in more than one place. I raise the point of order with regard to the amendment of the distinguished Senator from New Mexico.

Mr. BINGAMAN. Mr. President, I make a motion to divide my amendment, and ask for the yeas and nays on each of the provisions of the amendment.

The PRESIDING OFFICER. The Senator is permitted to divide his amendment.

Mr. BINGAMAN. Mr. President, I hereby divide my amendment, and ask for the yeas and nays on each of the portions.

The PRESIDING OFFICER. Is there further debate on the first portion? The request is made for the yeas and nays. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Is there further debate?

Mr. LUGAR. Mr. President, a point of inquiry with regard to the division of the amendment into two sections. I appreciate that the first portion of the amendment strikes $100 million out of the military assistance part of the Foreign Assistance Act. But as a matter of inquiry, how does the second portion stand at this point as a freestanding motion? How can it stand?

The PRESIDING OFFICER. The second portion of the amendment stands without the necessity of being connected with the first portion of the amendment. It is grammatically correct.

Mr. LUGAR. Mr. President, a further question: Is it possible to authorize appropriations for Public Law 480 within the confines of this bill?

The PRESIDING OFFICER. It is possible to do so with a floor amendment.

Mr. LUGAR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, as the distinguished occupant of the Chair knows, we are deeply immersed at this moment in the Agriculture Committee in the consideration of the farm bill. That explains my absence from the floor.

This amendment troubles me in several aspects.

Let me ask the distinguished manager of the bill, the able chairman of the Senate Foreign Relations Committee, what was the military assistance figure requested by the administration?

Mr. LUGAR. The administration requested figure approximately $400 million more for military assistance than the committee provided.

Mr. HELMS. And this was with the full understanding and, indeed, the approval of the Foreign Relations Committee?

Mr. LUGAR. That is correct.

The administration, I must tell the able Senator from North Carolina, initiated the economy of the Foreign Relations Committee in the overall emphasis upon deficit reduction. They are delighted we were budget-minded this year, but they pleaded with the Budget Committee that the committee provide for a cap that would allow restoration of the $194 million. In the administration's judgment the Foreign Relations Committee had simply gone too far in cutting the request.

We understand the emphasis upon deficit reduction, but in providing for the security interests of our country—and that is what these foreign military sales represent—some of us agree that we are going to need $190 million more. But there has been no motion to restore that money. The amendment that comes to me from the distinguished Senator from New Mexico, in fact, goes the other way. It cuts another $100 million.

Mr. HELMS. Let me tell the Senator the problem I have with the amendment. I dislike holding up the amendment of the distinguished Senator from New Mexico. We are, right now, working on a farm bill in our committee, which has the relevant jurisdiction for Public Law 480. I wish the amendment had not been offered, but I certainly do not fault the Senator for offering any amendment that he wishes. However, Public Law 480 is under the purview of the Committee on Agriculture and we in committee are all aware of the same concern he has.

Further than that, Mr. President, there is the question of the compromise on military spending we came to in the Foreign Relations Committee. If this agreement is broken, I ask the able chairman, does that leave it open to me or to other Senators to raise or lower amounts that may seem right to us?

Mr. LUGAR. I would not encourage the Senator to begin that process. Up to this moment, we have had a tenuous truce. I speak quite frankly, there are Senators in favor of taking apart this bill limb by limb.

Mr. HELMS. Like developmental aid.

Mr. LUGAR. Yes, a lot of Senators are not keen on developmental funds. Some do not like other funds. We have come to a reasonable compromise thus far. The administration, as I have indicated, has not signed off on the compromises. They are very unhappy; the military side of the bill is low. But at least on this side of the aisle, we have tried to maintain this tenuous truce and I have the feeling that cuts on the military side will lead to cuts on the development side.

That is a good reason, it seems to me, to try to keep things roughly as they are if we possibly can do so.

Mr. HELMS. I think we may experience an unraveling if an amendment of this sort is approved.

I thank the Senator from Indiana.

Mr. LUGAR. Mr. President, I thank the distinguished Senator from North Carolina for coming to the floor.

I know of no one else who wishes to debate this issue. I have spoken, I think, as strenuously as I can and still keep some peace within our family in the committee on this tenuous truce. I hope the amendment will be defeated.

I move to lay the amendment of the distinguished Senator from New Mexico on the table. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to table division 1 of the Bingaman amendment.

The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Utah [Mr. GARN] is necessarily absent.

I also announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON] are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Mississippi [Mr. STENNIS] is necessarily absent.

I also announce that the Senator from Nebraska [Mr. EXON] is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote.

The result was announced—yeas 56, nays 39, as follows:

[Rollcall Vote No. 80 Leg.]

YEAS—56

Abdnor	Gramm	Nunn
Andrews	Hatch	Packwood
Armstrong	Hawkins	Pell
Biden	Hecht	Pressler
Boschwitz	Heflin	Quayle
Chafee	Heinz	Roth
Cochran	Helms	Rudman
Cohen	Humphrey	Sarbanes
D'Amato	Kassebaum	Simpson
Danforth	Kasten	Specter
Denton	Lautenberg	Stafford
Dodd	Laxalt	Stevens
Dole	Lugar	Symms
Domenici	Mathias	Thurmond
Durenberger	Mattingly	Trible
Evans	McClure	Wallop
Glenn	McConnell	Warner
Goldwater	Murkowski	Weicker
Gorton	Nickles	

NAYS—39

Baucus	Ford	Long
Bentsen	Gore	Matsunaga
Bingaman	Grassley	Melcher
Boren	Harkin	Metzenbaum
Bradley	Hart	Mitchell
Bumpers	Hatfield	Moynihan
Burdick	Hollings	Proxmire
Byrd	Inouye	Pryor
Chiles	Johnston	Riegle
Cranston	Kennedy	Rockefeller
DeConcini	Kerry	Sasser
Dixon	Leahy	Simon
Eagleton	Levin	Zorinsky

NOT VOTING—5

East	Garn	Wilson
Exon	Stennis	

So the motion to lay on the table division 1 of the amendment (No. 120) was agreed to.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BINGAMAN. Mr. President, in light of the vote, I ask unanimous consent that the order for the yeas and nays on the second division of the amendment be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BINGAMAN. I also ask unanimous consent that I be allowed to withdraw the second division of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BINGAMAN. Mr. President, before I yield the floor, let me say that the second part of this amendment would have added $100 million to the Food for Peace Program.

We did have the assurance of the manager of the bill and the distinguished Senator from North Carolina, the chairman of the Agriculture Committee, that the Public Law 480 Food for Peace Program would be funded at a very substantial level, an adequate level, in the farm bill which will come to the floor of the Senate later this year. So I will be eager to see what level that is funded at.

If there is need for additional funding, I hope to get the support of the Senate at that time in adding additional funds. I do not think it is appropriate to go forward with the second division of the amendment, in light of the disposition of the first division.

Mr. LUGAR. Mr. President, I thank the distinguished Senator from New Mexico for his discussion of this issue.

I offer assurances that indeed this Senator and many others will be active in the discussion of Public Law 480 in the Agriculture Committee and in the Chamber and many of the aims that he had today will still be fulfilled, in my judgment, as we proceed through the legislation this year.

I appreciate likewise his expediting our consideration of the bill through the vitiation of the additional rollcall vote.

Mr. PELL. Mr. President, I commend the Senator from New Mexico for his amendment and for his objectives, with which I wholeheartedly agree.

However as ranking minority member of the Foreign Relations Committee and comanager of this bill I regret that I will have to support the chairman in this matter on procedural grounds. I do hope, however, that the Senator from New Mexico will keep pursuing the goals and direction of this amendment, and I look forward to giving support to him on another occasion.

AMENDMENT NO. 121

(Purpose: To establish a Peace Corps National Advisory Council and to provide for nonpartisan appointments)

Mr. CRANSTON. Mr. President, on behalf of the Senator from Kansas [Mrs. KASSEBAUM] and myself, I send to the desk an uncontroversial amendment dealing with the Peace Corps and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from California [Mr. CRANSTON], for himself and Mrs. KASSEBAUM, proposes an amendment numbered 121.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 54, below line 21, insert the following new sections:

SEC. 602. (a) The Peace Corps Act (22 U.S.C. 2501 et seq.) is amended by inserting after section 11 the following new section:

"PEACE CORPS NATIONAL ADVISORY COUNCIL

"SEC. 12. (a) A Peace Corps National Advisory Council (hereinafter in this section referred to as the 'Council') shall be established in accordance with the provisions of this section.

"(b)(1) The Council shall advise and consult with the President and the Director of the Peace Corps with regard to policies and programs designed to further the purposes of this Act and shall periodically report to the Congress.

"(2) Members of the Council shall visit, examine, and inspect the Peace Corps' activities in the United States and in other countries in order to, among other things—

"(A) evaluate the accomplishments of the Peace Corps;

"(B) assess the potential capabilities and the future role of the Peace Corps; and

"(C) make recommendations to the President, the Director of the Peace Corps, and the Congress to guide the future direction of the Peace Corps and to help ensure that the purposes and programs of the Peace Corps are carried out in ways that are economical, efficient, responsive to changing needs in developing countries and to changing relationships among peoples, and in accordance with law.

"(3) The Council may provide for public participation in its activities.

"(c)(1) Persons appointed as members of the Council shall be broadly representative, including representation of educational institutions, private volunteer agencies, private industry, farm organizations, labor unions, different regions of the United States, different educational, economic, racial, and national backgrounds and age groupings, and both sexes.

"(2)(A) Subject to the succeeding sentence, fifteen members of the Council shall be appointed by the President by and with the advice and consent of the Senate. At least seven of such members shall be former

Peace Corps volunteers, and no more than eight of such members shall be members of the same political party.

"(B) The first appointments of members of the Council under this paragraph shall be made not more than sixty days after the date of the enactment of this section and, solely for purposes of determining the expiration of their terms, shall be deemed to take effect on the sixtieth day after such enactment date.

"(C) No member appointed under this paragraph shall be an officer or employee of the United States Government.

"(D) Of the members initially appointed under this paragraph, eight shall be appointed to one-year terms and seven to two-year terms. Thereafter, all appointed members shall be appointed to two-year terms.

"(E) A member of the Council appointed to fill a vacancy occurring before the expiration of the term for which the member's predecessor was appointed shall be appointed only for the remainder of that term.

"(F) No member of the Council may serve for more than two consecutive two-year terms.

"(G) Members of the Council shall serve at the pleasure of the President.

"(H) An appointed member of the Council may be removed by a vote of nine members for malfeasance in office, for persistent neglect of or inability to discharge duties, or for offenses involving moral turpitude, and for no other cause.

"(I) Any vacancy in the Office of an appointed member of the Council shall be filled by the President within thirty days after such vacancy occurs.

"(3) The Secretary of State shall be a voting member, ex officio, of the Council. The Secretary may designate any officer in the Department of State compensated at level II or III of the Executive Schedule under section 5313 or 5314 of title 5, United States Code, to act for the Secretary under this section.

"(4) The Director and Deputy Director of the Peace Corps shall be non-voting members, ex officio, of the Council.

"(d)(1) Except as provided in paragraph (2), a member of the Council who is not an officer or employee of the United States Government shall be (A) paid compensation out of funds made available for the purposes of this Act at the daily equivalent of the highest rate payable under section 5332 of title 5, United States Code, for each day (including travel-time) during which the member is engaged in the actual performance of duties as a Council member, and (B) while away from his or her home or regular place of business on necessary travel, as determined by the Director of the Peace Corps, for actual performance of such duties, paid per diem, travel, and transportation expenses in the same manner as provided for under subchapter I of chapter 57 of title 5, United States Code.

"(2) A member of the Council may not be paid compensation under paragraph (1)(A) for more than twenty days in any calendar year.

"(c) A majority of the voting members of the Council shall constitute a quorum for the purposes of transacting any business.

"(f) A member of the Council shall disclose to the Council the existence of any direct or indirect financial interest of that member in any particular matter before the Council and shall not vote or otherwise participate as a Council member with respect to that particular matter.

"(g) At its first meeting and at its first regular meeting in each calendar year thereafter, the Council shall elect a Chair and Vice Chair from among its appointed members who are citizens of the United States. The Chair and Vice Chair shall not both be members of the same political party.

"(h)(1) The Council shall hold a regular meeting during each calendar quarter and shall meet at the call of the President, the Director of the Peace Corps, the Council's Chair, or one-fourth of its members.

"(2) The Council shall prescribe such bylaws and regulations as it considers necessary to carry out its functions. Such bylaws and regulations shall include procedures for fixing the time and place of meetings, giving or waiving of notice of meetings, and keeping of minutes of meetings.

"(i) No later than January 1, 1988, and not later than January 1 of each second year thereafter, the Council shall submit to the President and the Director of the Peace Corps a report of its views on the programs and activities of the Peace Corps. Each report shall contain a summary of the advice and recommendations provided by the Council to the President and the Director the period covered by the report and such recommendations (including recommendations for administrative or legislative action) as the Council considers appropriate to make to the Congress. Within 90 days after receiving each such report, the President shall submit to the Congress a copy of the report, together with any comments concerning the report that the President or the Director considers appropriate.

"(j) The Director of the Peace Corps shall make available to the Council such personnel, administrative support services, and technical assistance as are necessary to carry out effectively its functions.".

(b) Sixty days after the date of the enactment of this Act, any advisory body carrying out functions similar to those assigned to the Peace Corps National Advisory Council provided for by subsection (a) shall cease to operate and shall become defunct.

NONPARTISAN APPOINTMENTS

SEC. 603. The Peace Corps Act is amended—

(1) by redesignating sections 25, 26, and 27 as sections 26, 27, and 28, respectively; and

(2) by inserting after section 24 the following new section:

"NONPARTISAN APPOINTMENTS

"SEC. 25. In carrying out this Act, there shall be no political test or political qualification used in (1) selecting any person for enrollment as a volunteer or for appointment to a position at, or for assignment to (or for employment for assignment to), a duty station located abroad, or (2) promoting or taking any other action with respect to any volunteer or any person assigned to such a station."; and

(3) in subsection (a) of section 5, by amending the final sentence to read as follows: "In carrying out this subsection, there shall be no discrimination against any person on account of race, sex, creed, or color.".

Mr. CRANSTON. Mr. President, briefly, let me state that this amendment is derived from legislation, S. 882, that I introduced on April 3, cosponsored by Senators MATHIAS, PELL, KASSEBAUM, and DODD.

Mr. President, this amendment is intended to help continue the revitalization of the Peace Corps as it celebrates next year, its 25th anniversary.

For almost a quarter of a century, Americans of all ages have volunteered for the Peace Corps. In all, over 100,000 Americans have served as Peace Corps volunteers. They have established throughout the world a record of service of which every one of us can and should be proud.

Former Peace Corps volunteers are continuing to contribute in a multitude of ways, from activities in small communities to national leadership. Two former Peace Corps volunteers, the Senator from Connecticut [Mr. DODD] and former Senator Tsongas from Massachusetts have been elected to this body. Four former volunteers currently serve in the House of Representatives.

Mr. President, the 25th anniversary of this unique program presents us with a special opportunity to reflect upon the Peace Corps and on where it should be going in the next 25 years.

Despite the renewed sense of interest in and a much greater public awareness of the Peace Corps since Congress granted it independence in 1981, the Peace Corps today is one-third the size it was in 1966 when more than 15,000 Peace Corps volunteers were serving throughout the world. Today, we have barely 5,000 volunteers. Concerns over the utilization of overseas Peace Corps staff posts as political patronage plums continue to plague the program. The resources, talents, and ideas of the thousands and thousands of former Peace Corps volunteers bearing on the future direction of the Peace Corps Program are not used as a part of the formal structure within which Peace Corps planning and programming decisions are made.

The amendment I am offering is derived from legislation, S. 882, I introduced on April 3, cosponsored by Senators MATHIAS, PELL, KASSEBAUM, and DODD. The amendment would do two things: First, it would mandate the establishment of a Peace Corps National Advisory Council which would be directed to evaluate the accomplishments of the Peace Corps, assess the potential capabilities and future role of the Peace Corps, and make recommendations to the Director of the Peace Corps, the President, and the Congress. The Council's recommendations would serve to help guide the future direction of the Peace Corps and ensure that the purposes and programs of the Peace Corps are carried out in ways that are economical, efficient, responsive to changing needs in host and potential host countries, and to changing relationships among peoples, and in accordance with law. The Council would consist of 16 voting members.

Mr. President, after discussions with the distinguished chairman of the Foreign Relations Committee, the Sena-

tor from Indiana [Mr. LUGAR], this provision has been modified somewhat from the proposal contained in S. 882. The membership of the Advisory Council as provided for under S. 882 would have been comprised of eight members appointed by congressional leaders and seven by the President. Under the amendment I have offered today, all appointments would be made by the President, but with the advice and consent of the Senate. At least seven of these appointed members would at all times be required to be former Peace Corps volunteers and not more than eight could ever be members of the same political party. The other requirements in S. 882 regarding qualifications of those appointed are also included in this amendment. The Secretary of State would serve as an ex officio, voting member.

This Council would serve as a real, working group, not a perfunctory rubberstamp.

Mr. President, our amendment provides specifically that the Council may provide for public participation in its activities. This provision thus makes clear that members of the public may be permitted actually to participate in the meetings and other activities of the Council. Of course, pursuant to section 10(a) of the Federal Advisory Committee Act [FACA] the Council's meetings would be open to the public. In this connection, I would also like to note that provisions of our amendment require regular meetings each calendar quarter, establish procedures for the election of the Chair, and give to the President, the Director of the Peace Corps, the Council's Chair, and one-fourth of the Council members each the authority to call meetings. These provisions are intended to override the provisions of section 10 (e) and (f) of FACA which require the administrative designation of an officer or employee of the Federal Government to chair or attend meetings, prohibit meetings to be conducted in that officer's or employee's absence, authorize that individual to adjourn meetings, and require his or her approval for the holding of a meeting. In addition, I would note that, since this new Council would advise the President, it would not be subject to the provision in FACA section 10(f) requiring a designated officer's or employee's approval of its agenda.

Mr. President, there is a nonstatutory Advisory Council to the Peace Corps. However, as far as we can tell from the scant information available about it, it contains no former Peace Corps volunteers and does not have the type of mission, responsibilities, scope, or experience and representative membership as the Advisory Council which would be established under this legislation.

I am convinced that this is the right point in the history of the Peace Corps to create this kind of specialized, representative, bipartisan body, to bring together individuals with relevant experience and insights about the role that the Peace Corps should play in the world during its next quarter of a century.

Second, Mr. President, this legislation would amend the Peace Corps Act to provide that overseas staff appointments must be nonpartisan. This provision deals with a problem that has plagued the Peace Corps through both Republican and Democratic administrations. Unfortunately, Peace Corps country directorships have sometimes been viewed as political patronage prizes. These posts are too important to be handed out to unqualified persons. A Peace Corps country director is a vital link both to the Government of the host country and to scores of volunteers in the field who must depend on the country director's good judgment and sensitivity on numerous occasions.

Peace Corps volunteers often serve in precarious positions, hundreds of miles from any governmental—ours or the host country's—support mechanism or protection. They don't live, as do most Foreign Service Officers, in American compounds or foreigners' enclaves with special commissary and diplomatic privileges. Peace Corps volunteers live generally at the level and in the communities of the people they come to serve and help.

They deserve to know that their country director and support staff were chosen specifically because of the capacity to be of help to Peace Corps volunteers and not as a regard for political contributions or campaign work.

Unlike overseas diplomatic missions of the U.S. Government which are supported by a cadre of career, professional Foreign Service staff, the Peace Corps overseas programs are staffed by very small numbers of American employees serving in the Peace Corps for statutorily limited periods, generally no more than 5 years. Under these circumstances, missteps or miscalculations by an unqualified Peace Corps country director or other staff person could have dire consequences. Each overseas Peace Corps staff member must be competent and dedicated to the goals of the Peace Corps and to the well-being and success of the volunteers and should be expressly selected because of and only because of those attributes.

This provision is not intended to interfere with the proper exercise of the President's authority to appoint or employ personnel for overseas assignments. The selection of individuals for such assignments appropriately entails substantial discretion. This legislation is designed to ensure that political considerations are not among those taken into account in making these important personnel decisions.

Mr. President, I wish to clarify that, with respect to individuals appointed or seeking appointment pursuant to Foreign Service Act authorities, the protection afforded by this provision is intended to be in addition to any protections afforded by provisions of the Foreign Service Act of 1980, such as the section 105 prohibition against discrimination based on political affiliation. Of course, the protections afforded by current law to persons applying for or employed in stateside positions would be unaffected by our amendment.

I would also note that the prohibition in our amendment against the use of any political test or qualification is much broader than the Foreign Service Act prohibition, which applies only to discrimination based on political affiliation. Thus, in addition to any qualification or test based on party membership, our amendment would preclude consideration of such matters as how an individual has voted or intends to vote; whether the individual has contributed or plans to contribute to a political organization or to a campaign fund; and whether the individual has worked for or plans to work for a particular candidate or candidates for public office. Likewise, our amendment would preclude the use of a screening test gauging the individual's political philosophy.

Mr. President, the amendment does not contain a third provision which was included in S. 882. That provision would have established a goal of having, to the extent appropriate, a Peace Corps volunteer strength of 10,000 individuals. In 1984, there were about 5,200 Peace Corps volunteers serving in 60 countries around the world. For the past 18 years, however, the number of Peace Corps volunteers has steadily declined, from its height of more than 15,000 in 1966, to 9,000 in 1970, and 6,000 in 1980.

Obviously, an increase in the size of the Peace Corps must be carefully planned and executed. Expansion must be tailored to, first, the needs of and requests for assistance from host countries, second, the pool of qualified volunteers, and, third, the capacity of the Peace Corps to provide adequate training and support to and placement of volunteers. But I believe there is little doubt that a goal of a total volunteer strength of at least 10,000 is attainable and worthwhile.

I would certainly have preferred that this provision be retained in the bill, but the chairman was not receptive to it and we thus agreed to delete it. A similar but more specific 10,000-volunteer corps goal is contained in H.R. 1555, the foreign assistance bill reported by the House Foreign Affairs Committee. Thus, it will be an issue in

conference and the chairman has agreed to take another, very close look at our formulation of this provison in connection with the House provision.

CONCLUSION

Mr. President, the peace corps has always been a very special program for me. In the midsixties, I had the honor of serving as a Peace Corps program evaluator, visiting volunteers on the job in Ghana. Seeing first hand the tremendous work being done by these dedicated Americans left me with an enduring commitment to this truly outstanding endeavor.

Peace Corps volunteers have contributed in countless ways to the goal of world peace and understanding. Both America and the world have much to gain from an expanded, rededicated, and nonpartisan Peace Corps. I believe that enactment of this legislation will provide an opportunity to reinforce and strengthen the bipartisan support for this program and help make the next 25 years the best they can be for this unique people-to-people effort.

Mr. LUGAR. Mr. President, I congratulate the distinguished senior Senator from the State of California for a very constructive amendment. Clearly, he has been a student of Peace Corps activities for many years, a very strong booster. This amendment, in my judgment, will strengthen the Peace Corps and strengthen this legislation.

We are prepared to accept the amendment on our side.

Mr. CRANSTON. I thank the chairman.

Mr. PELL. Mr. President, I am delighted to join in commending the Senator from California on this legislation and all that it does to strengthen and enhance the Peace Corps. I urge my colleagues to support it.

Mr. CRANSTON. I thank the Senator from Rhode Island.

The PRESIDING OFFICER. If there be no further debate, the question is on agreeing to the amendment of the Senator from California.

The amendment (No. 121) was agreed to.

Mr. LUGAR. Mr. President, I move to reconsider the bill by which the amendment was agreed to.

Mr. CRANSTON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 122

Mr. BUMPERS. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Arkansas [Mr. BUMPERS] proposes an amendment numbered 122.

Mr. BUMPERS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, add the following:

"Sec. . The Senate finds that:

A free and democratic El Salvador is in the security interests of the United States; and

Jose Napoleon Duarte was elected President of El Salvador last year in the most democratic election held in El Salvador in many years; and

Political violence in El Salvador has declined dramatically under President Duarte's leadership; and

President Duarte's policies of respect for human rights, political pluralism, dialogue and reconciliation with the Salvadoran guerrilla forces, legal and social reform, and effective defense against the violent overthrow of the Salvadoran government are deserving of praise from all who believe in a democratic form of government; and

The March 31 legislative and municipal elections were successfully carried out, with 64 percent of the electorate defying guerrilla attacks to vote; and

The victory of President Duarte's Christian Democratic Party reaffirms the support for these policies by his fellow citizens, the essential test of any government or movement; and

In spite of the state of seige technically in effect due to the insurgent threat, observance of free speech, free press, and free assembly are widely enjoyed in El Salvador and permit public airing of opposing political views; and

President Duarte is firmly committed to judicial reform and prosecution of cases involving "death squads";

His leadership and popular support has notably weakened the popular support given the guerrillas, as evidenced by the high levels of voter participation in the free elections held in El Salvador since 1982, the reduction in territory in which the guerrillas can freely operate, their inability to mount frontal military attacks, and their resort to economic sabotage, ambushes, political assassination, and urban terrorism with blatant disregard for basic human rights; and

He has succeeded in reversing the decline in his country's economy which, though still weak, has better prospects than in recent years;

Based upon the above findings, it is the sense of the Senate that:

President Duarte is to be congratulated for his outstanding leadership under difficult circumstances and for his efforts to foster democratic government and institutions in his country, and he is encouraged to continue his efforts to promote political pluralism, democratic institutions, and respect for human rights in his country; and

The armed services of El Salvador are to be congratulated for their improved performance and professionalism in defending Salvadoran citizens and their democratically elected government from attack by armed insurgents, and especially for their role in helping to protect and uphold the electoral process; and

The Senate reaffirms the importance of continued support for democratic principles and institutions and respect for human rights by the various sectors of Salvadoran society, which is a major factor in U.S. support for El Salvador.

Mr. BUMPERS. Mr. President, I have submitted copies of this amendment to both the distinguished floor managers, and it is a very simple amendment.

Today, President Duarte of El Salvador is coming to the United States. He is going to be here and visit with Members of this body both this week and next.

This amendment is a finding by the Senate that President Duarte has done a really outstanding job of trying to provide for judicial reform, bringing human rights to El Salvador, raising the morale of the people of El Salvador, that he has moved that country toward free speech, freedom of the press, and open assembly, and has apparently convinced the military that they should be subservient to civilian command. Furthermore, he has done everything in his power to bring the death squads to an end so that, while the civilian violence still exists there, it is at a much reduced rate.

All of us who have had the opportunity to visit with President Duarte find him to be a very engaging person, but more than anything else he is also a very courageous man who is totally dedicated to his country.

In this particular case, it is most fortuitous that we have had strong bipartisan support for the Salvadoran Government, and that the people of El Salvador have found a man of outstanding leadership capacities in Napoleon Jose Duarte.

I think it is only proper in light of all of that—I do not want to open wounds or anything—but this is quite different from the situation in Nicaragua. We have strong differences of opinion in this body about what our position on Nicaragua should be, whether or not to aid the Contras, and how to deal with Ortega. I must say that we have received bipartisan support in this body for El Salvador in no small part because of the atrocities of the Marxist guerrillas there against civilians, against the farmers, by burning their crops, by the slaughter of innocent men, women, and children. We have deplored that. That is one of the reasons we have been so supportive of the Salvadoran Government.

On the other hand, we continue to receive reports that the Contras are engaging in the very same kinds of activities in Nicaragua that we deplore in El Salvador. But that is another subject, a subject of another debate, and right now I think it is altogether fitting and proper that the Senate go on record while President Duarte is in this country, commending him for his courage and his outstanding work in El Salvador.

Mr. President, this amendment was drafted in my office in consultation with the State Department, who has expressed their support for it, and I have submitted a copy of it to each of the floor managers.

I hope the amendment will be accepted.

Mr. LUGAR. Mr. President, I deeply appreciate the amendment of the Senator from Arkansas. It is timely. The distinguished President of El Salvador will be with many of us in the next few days. He will have an opportunity to address students at the University of Notre Dame in my State on Saturday, and there will be many people in my State and throughout the country who will wish him well.

This amendment clearly puts us on record and I think we all share the feeling of joy in his success and our success with him in El Salvador.

On our side, we are pleased to accept the amendment.

Mr. PELL. Mr. President, I think all of us in this Chamber have high regard for the ability, objectives, and character of Mr. Duarte, and it is particularly fortuitous that this amendment is coming up at this time when he is soon to visit the United States.

I recommend we support this amendment.

Mr. BUMPERS. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. If there be no further debate, the question is on agreeing to the amendment of the Senator from Arkansas.

The amendment (No. 122) was agreed to.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PELL. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 123

Mr. MURKOWSKI. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Alaska [Mr. MURKOWSKI] proposes an amendment numbered 123.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert:

Of the funds authorized to be appropriated in this Act to carry out Chapter 2 or Chapter 4 of Part II of the Foreign Assistance Act of 1961, up to $5 million for FY 1986 may be made available to noncommunist resistance forces in Cambodia, provided that the Secretary of State finds that the Association of Southeast Asian Nations has acknowledged that material assistance to the noncommunist resistance is also being supplied by members of that Association.

(Mr. MATTINGLY assumed the chair.)

Mr. MURKOWSKI. Mr. President, the purpose of this amendment is to address specifically the role of the U.S. Senate with regard to the issue that was brought up in the House of Representatives and referred to more commonly as the Solarz amendment. Basically, Mr. President, the bill as proposed in the House would provide $5 million in aid to the non-Communist resistance in Cambodia. This matter came up for consideration before the Foreign Relations Committee but was not formally acted upon.

At one of the hearings which I held as chairman of the Subcommittee on East Asian and Pacific Affairs, there was discussion with various witnesses of the administration, including Paul Wolfowitz, Assistant Secretary for Pacific and East Asian Affairs at the State Department.

I think it is fair to reflect on the policy implications of aid to the non-Communist Cambodian resistance groups. First of all, U.S. aid would be an important signal to Hanoi regarding congressional and public attitudes toward Vietnam's illegal occupation of Cambodia and the consequent military threat to the region.

The aid would allow our country to provide either economic or military assistance to the non-Communist resistance and would supplement our political and humanitarian assistance. It would also confirm our support for our friends in the Association of Southeast Asian Nations, the ASEAN group, who have been playing and will continue to play a leading role in the strategy to obtain a political solution in Cambodia.

The United States would continue to play a supportive secondary role. I understand that the non-Communist resistance does not need arms now. But U.S. economic aid could be helpful to this valiant group of Cambodian nationalists struggling to make their country free and independent. I would like to emphasize, Mr. President, that no U.S. aid—I repeat, no U.S. aid—would go to the Communist Khmer Rouge.

I think that it is important to examine at some length the implications of just what U.S. aid would mean. First of all, I would like to emphasize that I do support the idea of funding aid to the non-Communist Cambodian resistance.

However, I think that the United States should not be the only country which openly pledges aid to the non-Communist resistance. The ASEAN countries have taken a political lead at the United Nations and elsewhere, but ASEAN, I feel, must also come out openly and confirm that it basically approves material aid as well.

The question, Mr. President, is why should the United States be alone on this crucial point? I think we must avoid being placed in a vulnerable position. I think ASEAN is willing to share responsibility for overt assistance. Unless ASEAN—which, after all, is a major portion of Southeast Asia, and the area most directly affected by the Cambodian situation—unless ASEAN is willing to identify itself, then the appropriate question comes up: Why should the United States shoulder the public reaction and the political risks associated with aid?

I would point out to my colleagues the reality of just what the American presence in Southeast Asia means. It adds tremendously to the stability in Southeast Asia and obviously the benefactors, in addition to the United States, are the ASEAN countries. I would urge that any aid to the non-Communist resistance be in effect conditioned, in a general form, so that ASEAN clearly plays a visible role materially and in all ways.

Mr. President, one only has to reflect on a few years back when in this body there was a good deal of debate on just what our role should be in Southeast Asia and Indochina. And I go back to the 1960's. We got far out in front in Indochina in the sixties. We picked up the ball, literally, and we carried the burdens—and carried them and carried them. Should not ASEAN now in the eighties, when ASEAN has prospered—they are confident; their standard of living has increased—should not ASEAN also step up and take an open responsibility for the Cambodian strategy that is now underway?

I know there are differences of views within ASEAN in how best to deal with the Vietnam situation, and I respect these differences. I have had an opportunity to meet with various leaders in ASEAN, including the Prime Minister of Singapore and others. But the question is, should the United States be asked to do what ASEAN itself is reluctant to do openly, and that is to come out in front on the matter of overt assistance?

Make no mistake about it, Mr. President, the appropriation of $5 million is not a significant amount. However, the principle of what that aid stands for, in the sense of the United States indicating its willingness to assume a responsible effort to aid the non-Communist Cambodian resistance, is a very meaningful one.

Mr. President, I think that we should reflect on the memory of what occurred in the sixties, our role in Indochina at that time, a reflection on the attitude of the liberal press in the United States toward our role, and the significance of just what this amendment means in the sense of stability to the ASEAN region. We should not go it alone. We should not be asked to go it alone.

I am personally convinced that there is a willingness of support from ASEAN to the resistance. We are all aware that ASEAN has made substantial contributions. But there is a sig-

nificance as to whether or not these contributions are openly acknowledged in an overt manner.

Mr. President, the amendment that I offer today, make no mistake about it, represents an overt intention. The $5 million in assistance for fiscal 1986 may be made available to the non-Communist resistance forces in Cambodia provided specifically that the Secretary of State finds that the Association of Southeast Asian Nations has acknowledged that material assistance to the non-Communist resistance is also being supplied by members of that association.

Mr. President, that is the crux of my amendment. I think it represents a responsible commitment by the United States to stand by our intention to assist in the security and stability of that part of the world through an appropriate role, and that is by indicating a significant policy change as represented in the Solarz amendment which is in the House foreign aid bill.

Again I would like to reemphasize, Mr. President, the significance of what this policy statement means and the realities associated with having an acknowledgement by the ASEAN countries of their willingness to assist in this regard.

I am not going to belabor the amendment any further. I will be happy to respond to any questions that my colleagues may have, or enter into a colloquy. I know the concern that the administration has expressed over the appropriateness of there being any acknowledgement on behalf of the ASEAN countries. But I think this is significant enough from the standpoint of a policy change that indeed it should be connected with some recognition and willingness from the ASEAN countries to indicate their willingness openly to involve themselves in a formal acknowledgement.

I yield the floor.

Mr. LUGAR addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, there is considerable sentiment in this body in the judgment of this Senator for adoption of $5 million of assistance to the resistance forces in Cambodia. Clearly, as the Senator from Alaska has pointed out, there has been discussion, at least on this side of the aisle, about the result of the amendment he has proposed: namely, that the Secretary of State needs to find that the Association of the Southeast Asian Nations has acknowledged assistance to the non-Communist resistance also being supplied by members of that association. There are, I suspect, Senators who are prepared to proceed without that assurance. The Senator from Alaska, however, has made an excellent point. For our part on this side of the aisle we are prepared to accept the amendment, and hope it will be adopted.

Mr. MURKOWSKI. Mr. President, I therefore thank my colleague, Senator LUGAR, and ask that the amendment be adopted.

Mr. PELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. PELL. We have no objection to its adoption. It is a good amendment, and we recommend support.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Alaska [Mr. MURKOWSKI].

The amendment (No. 123) was agreed to.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DODD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 124

(Purpose: To provide further for the availability of funds for Israel)

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina is recognized.

Mr. HELMS. Mr. President, I send an amendment to the desk, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from North Carolina [Mr. HELMS] proposes an amendment numbered 124.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 64, between lines 16 and 17, insert the following:

AVAILABILITY OF FUNDS FOR ISRAEL

SEC. 914. (a) Funds authorized to be appropriated by this Act which are made available for the purpose of improving living and employment conditions of the residents in the territories of Gaza, Judea, and Samaria under the control of the Ministry of Defense of Israel shall be allocated for projects which benefit all residents of such territories; provided that those projects which benefit Israeli citizens residing in such territories shall receive funds allocated in the proportion which the number of such Israeli citizens bears to the total number of the residents of such territories.

(b) Funds authorized to be appropriated by this Act which are made available for Israel shall be available for use within any of the territory administered by Israel on the date of enactment of this Act.

On page 64, line 18, strike out "Sec. 914." and insert in lieu thereof "Sec. 915.".

Mr. HELMS. Mr. President, this amendment would ensure that humanitarian assistance funds provided for the so-called West Bank and Gaza Strip territories would be available to all residents of those areas, regardless of ethnic or religious origin.

The administration has asked for $17 million—$8 million for the fiscal year 1985 supplemental and $9 million for fiscal year 1986—for the purpose of improving living and employment conditions of the residents of Judea, Samaria, and Gaza. Yet even though 50,000 of these residents are Israeli citizens, the administration has chosen to limit its request to benefit only residents of Palestinian background.

At the same time, the Department of State has a second policy which requires Israel to agree that none of the aid provided to Israel may be spent in the territories added to Israeli administration after 1967. There is no statutory basis for this second policy, yet State Department officials routinely include such a restrictive clause in every aid agreement signed with Israel. When I asked the State Department the basis for such action, the Department made the following written reply:

It is the policy of the U.S. Government to require that foreign assistance funds provided Israel shall only be used in the geographic areas which were subject to the Government of Israel's administration prior to June 5, 1967, and Congress has traditionally made this clear in its consideration of legislation. This requirement is normally written into agreements between the U.S. and Israel which disburse the funds.

Mr. President, such a requirement was news to me, as I find it is with most of my colleagues with whom I have talked. Nor do I ever recall it being discussed on this floor during consideration of this legislation. It may have been discussed in 1 year or other for 30 seconds, but it certainly escaped my attention. There is definitely no statutory basis for this requirement whatsoever. If there were, the State Department would have been quick to give the citation.

Mr. President, I think it would be useful for all my colleagues to see a copy of the most recent aid agreement with Israel, and I ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the agreement was ordered to be printed in the RECORD, as follows:

AGREEMENT BETWEEN THE GOVERNMENT OF ISRAEL AND THE GOVERNMENT OF THE UNITED STATES OF AMERICA ACTING THROUGH THE AGENCY FOR INTERNATIONAL DEVELOPMENT

Agreement, dated October 31, 1984 between the Government of Israel ("Israel") and the Government of the United States of America, acting through the Agency for International Development ("A.I.D."), together referred to as the "Parties."

ARTICLE I

The Grant

To support the economic and political stability of Israel, A.I.D., pursuant to the Foreign Assistance Act of 1961, as amended, agrees to grant to Israel under the terms of this Agreement not to exceed One Billion Two Hundred Million United States Dollars ($1,200,000,000) (the "Grant").

ARTICLE II

Conditions Precedent to Disbursement

SECTION 2.1. Conditions Precedent to Disbursement

Prior to the disbursement of the Grant, or to the issuance by A.I.D. of documentation pursuant to which disbursement will be made, Israel will, except as the Parties may otherwise agree in writing, furnish to A.I.D., in form and substance satisfactory to A.I.D., a statement of the name of the person holding or acting in the office specified in Section 6.2, and of any additional representatives, together with a specimen signature of each person specified in such section.

SECTION 2.2. Notification

When A.I.D. has determined that the conditions precedent specified in Section 2.1 have been met, it will promptly notify Israel.

SECTION 2.3. Terminal Dates for Conditions Precedent

If all of the conditions specified in Section 2.1 have not been met within ninety (90) days from the date of this Agreement, or such later date as A.I.D. may agree in writing, A.I.D., at its option, may terminate this Agreement by written notice to Israel.

ARTICLE III

Disbursement

SECTION 3.1. Disbursement of the Grant

After satisfaction of the conditions precedent, A.I.D. will deposit in a bank designated by Israel the sum of One Billion Two Hundred Million United States Dollars ($1,200,000,000).

SECTION 3.2. Date of Disbursement

Disbursement by A.I.D. will be deemed to occur on the date A.I.D. makes deposit to the bank designated by Israel in accordance with Section 3.1.

ARTICLE IV

Covenant

SECTION 4.1. Binational Foundations

Israel agrees to contribute not less than sixty-five million United States Dollars ($65,000,000) of this Grant to four existing United States-Israeli binational foundations, organized for industrial research and development, science, agricultural research and education, for the purpose of capitalizing endowments in such foundations. The endowments shall be established on terms and conditions, including interest rates and Israeli matching funds, mutually acceptable to Israel and A.I.D. Israel shall provide A.I.D. a written report providing evidence of the capitalization of the endowments, including the terms and conditions thereof, within 6 months of this agreement. Should Israel fail to comply with this covenant, A.I.D., at its option, may require Israel to refund to A.I.D. all or part of the amount provided hereunder for the binational foundations in U.S. dollars within sixty (60) days after receipt of a request therefor.

ARTICLE V

Special Covenants

SECTION 5.1. No Use for Military Purpose

It is the understanding of the Parties that the Grant will not be used for financing military requirements of any kind, including the procurement of commodities or services for military purposes.

SECTION 5.2. Use Only Within Pre-1967 Boundaries

Program uses of the Grant shall be restricted to the geographic areas which were subject to the Government of Israel's administration prior to June 5, 1967.

ARTICLE VI

Miscellaneous

SECTION 6.1. Communications

Any notice, request, document, or other communication submitted by either Party to the other under this Agreement will be in writing or by telegram or cable, and will be deemed duly given or sent when delivered to such Party at the following address:

To Israel: Economic Minister, Embassy of Israel, 3514 International Drive, NW., Washington, D.C. 20008.

To A.I.D.: Director, Office of Project Development, Bureau for Near East, Agency for International Development, Washington, D.C. 20523.

All such communications will be in English, unless the Parties otherwise agree in writing. Other addresses may be substituted for the above upon the giving of written notice.

SECTION 6.2. Representatives

For all purposes relevant to this Agreement, Israel will be represented by the individual holding or acting in the office of Economic Minister, Embassy of Israel and A.I.D. will be represented by the individual holding or acting in the office of Director, Office of Project Development, Bureau for Near East, each of whom, by written notice, may designate additional representatives for all purposes.

The names of the representatives of Israel, with specimen signatures, will be provided to A.I.D., which may accept as duly authorized any instrument signed by such representatives in implementation of this Agreement, until receipt of written notice of revocation of their authority.

SECTION 6.3. Amendment

This Agreement may be amended by the execution of written amendments by the authorized representatives of both the Parties.

In witness whereof, Israel and the United States of America, each acting through its duly authorized representative, have caused this Agreement to be signed in their names and delivered as of the day and year first above written.

Mr. HELMS. Mr. President, I further call attention to section 5.2 of this agreement, which reads as follows: "Use Only Within Pre-1967 Boundaries: Program uses of the Grant shall be restricted to the geographic areas which were subject to the Government of Israel's administration prior to June 5, 1967."

Mr. President, despite the State Department's grasping at the straw of alleged congressional coconspiracy in this policy, I think it is important that the Senate be given an opportunity to speak on the issue. For when you put the two policies together—the structuring of humanitarian aid on the West Bank and Gaza so it only benefits Palestinians, while at the same time blocking aid to Israeli citizens on the West Bank—you have a concerted effort to discriminate against Israeli citizens living in Judea, Samaria, and Gaza.

But it is even worse. Much of the U.S. aid to Palestinian Arabs resident in Judea, Samaria, and Gaza is provided through private voluntary organizations that channel funds to a number of groups that support the goal of the Palestinian Liberation Organization in destroying Israel. Although the work of these groups is ostensibly humanitarian—providing child care, health, and education, for example—the structure of the aid sets up a network of PLO loyalists working to subvert Israel.

For example, one of the recipients of this aid in the past has been the Arab Palestinian Women's Union, which operates PLO institutions in the 1967 territories and in Lebanon. One such is an institution known as the School for Children's Happiness. Now who could be against children's happiness? Well, it all depends upon how children's happiness is defined.

According to a brochure published for this school, this is the way the school day begins:

> When morning breaks, the first lesson our children grasp is always Palestine, they respectfully salute the rising Palestinian Flag. While the Palestinian National Anthem fills the new day with its words and lyrics, you can then see on our children's faces, smiles of hope, awaiting impatiently a future of groves of roses that will be Palestine.

Now I can understand why people involved in a revolutionary struggle would attempt to instill their ideals in the children. But these children are being prepared for an actual revolution. The pamphlet states: "The Arab Palestinian Women's Union is an industrious institute which hopes to be an important effective tool in the hands of the revolution." Indeed, one goal of the school has been to care for the children of PLO fighters who died in the 1967 attack on Israel. Obviously, it is a work of charity to care for and educate orphans; but do they have to be inculcated with hate propaganda through the assistance of U.S. aid funds? The School for Children's Happiness states quite plainly that "the one way to achieve our aims is the return to the whole of our Palestinian land."

There are many examples of U.S. aid assisting similar projects. Another prime example is Bir Zeit University, which is supposed to be for the education of Palestinian young men and women. But Bir Zeit also happens to be a hot bed of PLO agitation and terrorism. The school has had to be closed numerous times because of the disruptive and subversive activity which takes place at Bir Zeit. It is almost impossible to be a student or professor at Bir Zeit without being part of the PLO network. Yet scholarships to Bir Zeit are funded through U.S. aid.

What has happened is that, many times in the past, the humanitarian

intent of the grants has been subverted by giving the grant to institutions which use the funds to support and reward a PLO-oriented infrastructure working for a Palestinian state on the West Bank and Gaza. It is hard to conceive that the State Department is not aware of this. It is also true that, to a certain extent, it would be hard to assist any Palestinians without touching people who are sympathizers with the PLO cause. But the problem specifically is in putting the money in the hands of a leadership elite that uses the funds to reward PLO followers and deny assistance to those who are not. This is not just a case of humanitarian aid; it is building the PLO infrastructure.

I know that the Israeli Government has raised questions about some of the grants; and recently there has been more cooperation by AID, particularly when the projects involve construction and other actions which require permits and approval. But the net effect of the State Department policy is to say that the United States has taken sides in the dispute over the future of the West Bank. We are saying on the one hand that we are in favor of negotiations over the future, but on the other we expect that the negotiations will have a specific outcome that will result in Arab control of Judea, Samaria, and Gaza.

If we lived in a simple world, I would move to strike all of the funds intended for this purpose. But we don't live in a simple world. We live in a world where people have needs and problems, as well as political goals. I think that the grants could be restructured, with good will on both sides, so that they resulted only in humanitarian projects and benefits.

But we must eliminate the perception that the United States—with the explicit consent of Congress—has cast its lot with one side in the West Bank dispute. We must eliminate the perception that it is all right to give humanitarian assistance to Palestinians living on the West Bank, but not to Jews. The proportion of Jewish citizens living in Judea, Samaria, and Gaza is small—from 5 to 8 percent. But it is the symbolism that counts, not the dollars involved.

I believe that U.S. assistance, no matter where it is given, should be available to all the needy inhabitants of the territory that is being served, without discrimination as to race, creed, or color. I think that it is unconscionable that our policy affirmatively permits Palestinians to receive benefits, but effectively prevents Israeli citizens in the same area from being eligible, just because of ethnic and religious differences.

If we do not eliminate this discrepancy, we are saying, in effect, that Israeli citizens have no right to live in Judea, Samaria, and Gaza. We are prejudging the outcome of the negotiations as to the future.

Yet it is not the policy of the United States that the Israeli settlements in Judea, Samaria, and Gaza are illegal. The territories involved were never Jordanian. They were part of the Palestine mandate administered by Great Britain. Jordan invaded and seized the territories illegally in 1948. The present so-called green line was a line marking the farthest extent of Jordan's invasion. No countries in the world recognized this illegal seizure, except Great Britain and Pakistan. In 1967, Jordan invaded Israel proper, and in self-defense, Israel drove the invader back beyond the Jordan. Israel's position in the territory is at least as good as Jordan's was, if not better, under international law. At the present time, the legal regime in Judea, Samaria, and Gaza remains the same as it was after June 1967, administered by the Israeli Ministry of Defense.

The only difference in that intervening period is that the GNP of Judea and Samaria increased threefold in that period, and the GNP of Samaria 3.4-fold. Private per capita income has more than doubled in that time, in real terms. A welfare economy—in Gaza up to 70 percent were on welfare—has been exchanged for an economy in which unemployment has dwindled to rates less than in many advanced industrial economies. New housing starts have increased six times; the number of automobiles has increased from 1,900 to 27,000 in Judea-Samaria and from 1,200 to 14,800 in Gaza.

That is why this administration believes that it is not illegal for Israeli citizens to settle in the areas outside the 1967 borders. President Reagan reiterated that over and over again as a candidate in 1980. He pointed out:

> Israel has never tried to annex the West Bank and the (Carter) Administration is dead wrong when it says Israel's West Bank settlements are "illegal." Jewish and Arab Palestinians have a right to settle there until Jordan and Israel between them decide on secure and recognized borders.

In October 1980, he said:

> The charge by the (Carter) Administration at the time those settlements first started that they were illegal is false • • • all people—Moslem, Jews and Christian—are entitled to live on the West Bank.

As President, President Reagan has never retreated from that position on the legality of the settlements. And Secretary of State Shultz has reaffirmed their legality.

So why not treat all residents of the 1967 territories on the same basis? Why not reject discrimination in our treatment of Israeli citizens in those areas?

Mr. President, the stock answer, reiterated over and over again, is that the settlements are an "obstacle to peace." Of course, that depends on what you think "peace" may be. If you think that the outcome of negotiations will only bring peace if the settlers withdraw, then you are saying that the Israeli citizens have to give up their rights to live on those lands. If their presence there is not illegal, then they give up their rights if they are forced to withdraw. If they remain under a new administration, obtained as a result of negotiations, they must expect to be able to live under the new administration. And we can assume that Israel will not negotiate away their rights or accept an arrangement that is not viable.

I think it follows, Mr. President, that those who say the settlements are an obstacle to negotiations are saying that there can only be one outcome—an outcome totally acceptable to the Palestinians and the PLO leaders. The United States is therefore not neutral in the outcome, but committed to a specific outcome.

That is what this amendment is all about. It is not about money as such; it is an attempt to move U.S. policy from a policy committed to the Palestinian side—to a policy that treats both sides the same. In other words, it moves the United States from partisanship for the Palestinians to neutrality. It suggests that the United States will accept more than one outcome from the negotiations.

What this amendment does, Mr. President, is to recognize that all the peoples in the area have historic and religious rights in Judea, Samaria, and Gaza. It also recognizes that the territories in question have important consequences for the strategic defense of Israel. It suggests that Israel is not forestalled by U.S. pressure from adopting a negotiated solution that allows proper military and security measures to be adopted for the protection of Israel proper.

What it does not do, Mr. President, is to predetermine the future of these territories. It is my personal view that Israel would make a grave error if it gave up military and security control of these areas. The internal arrangements are open to negotiations, but not security considerations. I do not retreat from that position. But this amendment does not go that far. It does not say that Israel has the right to annex the territories in question, or to ignore the legitimate aspirations of the Palestinians. It does not mean that the historic land rights and cultural life of the Palestinians can be suppressed. Nor is it contrary to the Camp David agreements.

I repeat, Mr. President, that my amendment returns the United States to a position of neutrality in the outcome, allowing the future to be decided by Jordan, the Palestinians, and the Israelis themselves. It is noteworthy, Mr. President, that Israel has al-

ready given up 90 percent of the territory occupied in the 1967 war—territories that were seized for security reasons when Israel was invaded. The good faith of Israel has been demonstrated; but Jordan and the Palestinians have not even agreed to negotiate.

Finally, Mr. President, this amendment would restore equity to our program of humanitarian aid to residents of the West Bank and Gaza by requiring proportionality of benefits to everyone. It would not cut the amount of aid intended for those territories, but would see that it is distributed equitably to all groups, regardless of ethnic or religious origin. In conclusion, it would make it clear that there is no congressional authority for blocking the use of humanitarian U.S. aid funds in any of the territories currently being administered by the Israeli Government.

Mr. LUGAR. Mr. President, the Senator from North Carolina has raised in this amendment a very interesting and important point of equity and justice. Indeed, there are funds available to residents of the area, and I will not try to demarcate the precise division of those funds, but such funds do exist in the bill.

At the same time, I hope the Senator from North Carolina appreciates that this amendment raises a very complex subject in our foreign policy. It is a subject that has not been considered to the best of my knowledge by the Subcommittee on the Middle East, nor the full Foreign Relations Committee for that matter. It is something that I hope the Senator from North Carolina will appreciate ought to have at least the benefit of a hearing and some response by the administration as to how our general foreign policy will be affected in the event we try to address the issue.

So I would appreciate it if the Senator would not persist in pressing a vote on the amendment today but would accept the assurances of the chairman that a hearing will be held. I will work in particular with Senator BOSCHWITZ. I know he has a deep interest in this issue as subcommittee chairman. The Senator from North Carolina himself would probably want to be a part of that hearing process. There will be other opportunities, I suspect, to rectify an injustice if there is one, but I would appreciate it if the Senator would accept these assurances of a hearing and a study at this point.

Mr. HELMS. Mr. President, I thank the Senator. As he obviously knows, I merely wanted to raise the question today and lay out my thoughts on the subject so that they can be considered in the coming days and weeks, not only by members of the Foreign Relations Committee, but by the entire Senate and by the administration. I think the subject is one whose time has come. I thank the Senator very much for assuring us that hearings will be held.

In addition, I will say to my friend, I am frankly disturbed by the position and attitude of the State Department on this matter. I understand that some Members of this body and others interested in the subject have been told by the administration that if this amendment were to pass, it would be necessary to ask that the bill be brought down and removed from the calendar. I certainly would not want to do that to my good friend from Indiana, nor to the ranking minority member of the Foreign Relations Committee, Mr. PELL. But it is clear that the State Department by that message was threatening to jeopardize the entire foreign aid bill, and in particular the aid to the Middle East, just so that they could avoid the principle of nondiscrimination in the distribution of aid benefits on the West Bank.

Mr. President, is it such a great change of policy to establish the principle of nondiscrimination? Is the administration really saying that only Palestinians have the right to live on the West Bank? Does the administration really think that it would jeopardize the peace process to take a neutral position in the dispute over the future of the territory?

Mr. President, I would like to know why the Israeli settlements are an obstacle to peace. If Israeli citizens have the legal right to be there, how can it be an obstacle to accommodate their right? Is the administration saying that the only way to peace is for those Israeli citizens rightfully residents in the territories to surrender their rights? Is the administration saying that the security of Israel can only be safeguarded by the concession of territories that are strategic to the defense of Israel? I do not see how Israeli military and strategic control can be given up. It seems to me that there is plenty of room for negotiation between the concept of a total Palestinian State on the West Bank associated with Jordan on the one hand, and the concept of total incorporation of the territory into the State of Israel.

I can see a lot of solutions that fall in between those two extremes, but I would leave it to the Palestinians, the Jordanians, and the Israelis to make the decisions. I do not see why the U.S. State Department should adopt a policy which excludes all solutions except the one which totally adopts Palestinian-Jordanian control over the territories.

If, in the popular slogan, Israel were to be so foolish as to exchange "territories for peace," I think what we would have is an exchange of territories for a piece of paper. There were no settlements in 1948 to constitute an obstacle to peace; yet the Jordanians invaded. There were no settlements in 1967 to constitute an obstacle to peace; yet the Jordanians invaded again. Does anyone really believe that the settlements are preventing good faith negotiations? I rather think that the settlements are a principle reason that Jordan has not invaded Israel for the past 18 years. The settlements are an obstacle to war.

Mr. President, it is my personal view that the Israeli settlements on the West Bank are not an obstacle to peace; rather they provide the basis for a meaningful negotiation protecting the interests of both parties to the dispute. There is no reason, therefore that we should not adopt a nondiscrimination policy as to the beneficiaries of our aid projects in those areas.

However, Mr. President, we should not allow the State Department to jeopardize the aid program to Israel and Egypt just so that they can avoid the principle of nondiscrimination.

I thank the Chair. I thank the Senator from Indiana and I thank the Senator from Rhode Island.

I yield the floor.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MURKOWSKI addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. MURKOWSKI. Mr. President, I thank my colleague from North Carolina.

AMENDMENT NO. 125

Mr. MURKOWSKI. Mr. President, I send an amendment to the desk, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment of the Senator from North Carolina, Mr. HELMS, is still pending.

Mr. MURKOWSKI. Mr. President, I withdraw the request.

Mr. President, may I make an inquiry as to the pending business before the Chair?

Mr. HELMS. Mr. President, I withdraw my amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

The Senator from Alaska.

Mr. MURKOWSKI. Mr. President, I send an amendment to the desk, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Alaska [Mr. MURKOWSKI] proposes an amendment numbered 125.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that further

reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, beginning on line 9 with (d) strike all through the end of line 19.

Mr. MURKOWSKI. Mr. President, the purpose of this amendment is to terminate the Extended Repayment Loan Program under FMS, foreign military sales.

The current Extended Repayment Loan Program is a rather unique, rather innovative, and fairly recent extension of our Federal military sales policy. It provides for a 10-year grace period and a 20-year amortization period basically for a 30-year loan term. I think you will agree, Mr. President, that is a rather generous term for repayment.

In my comments, I will be more specific about why this unfortunate program is really adding dramatically to the debt which our friends and neighbors are assuming.

This program has been in existence since the mid 1970's. Prior to that, the term for FMS loans was 5 and 7, 5-year grace—when I say grace I mean interest only—and amortization beginning in the 7th, for a 12-year period. Mr. President, that was much more realistic and acceptable.

Before I go on, I would note that in my dear colleague letters on the issue, there were references to Greece. I would like to offer clarification to my colleagues. Greece was recently switched from the extended payment program to a different category, concessional. So in my discussion here, Greece will be excluded.

However, I want to make it clear that this does not change my position because my amendment is not country specific but program specific. That is the reason for which I rise on this occasion to elaborate a little more fully on the implications of just what this extended repayment loan program does and why it must be abolished.

I would note, to begin, that the debate on the foreign assistance bill is timely in the sense that it comes on the heels of successful deliberations on a budget package which I believe can finally start us on the road to fiscal solvency and declining Federal budget deficits. I think, however, we can all realize that as usual, one inevitable result of debate concerning foreign assistance will be that some in this Chamber will call for reductions or freezes in foreign assistance. We have seen that already. However, the chairman of the Foreign Relations Committee, Senator LUGAR, has, I think, done an extraordinary job in moving this legislation and recognizing that indeed it is not in our best interest to reduce foreign assistance program levels as agreed in our committee.

However, we are at a time when it is crucial to recognize what our priorities are, whether it be to our senior citizens, to our veterans, or others. The upshot is that I, for one, do not plan, at least in the traditional way to object to the agreed levels of foreign assistance. I want to make that very clear to my colleagues. This proposed amendment does not affect the assistance levels which the administration has recommended and the Foreign Relations Committee has passed. Rather, it specifically reflects the payback procedure.

For that reason, what I propose to do with this amendment is to refine the bill, without assistance level directly. However the refinement would at the same time achieve goals—and savings—which I think we can support. For that reason, I would like to emphasize again that this bill is responsible. It bears out the willingness of the Foreign Relations Committee as well as the administration to live by our commitments.

The goals of my amendment are to, first, cut the budget deficit as much as we can in the Foreign Relations Committee; second, to simplify our military assistance program; third, and I emphasize this, to save ourselves and our friends and allies a considerable amount of money; and, finally, to institute fiscal responsibility and honest oversight.

One of the unique features of this particular type of amendment is that few of my colleagues understand it in all its complexities. This was evidenced in the committee markup and in the various discussions that went on at that time.

What this amendment does is to strike that part of the Arms Control Export Act which allows the President to negotiate foreign military sales loans on the favorable extended repayment terms of 30 years, with the first 10 years involving interest-only repayment.

As I stated earlier, this is in contrast with the normal FMS loan, which is for a 12-year term with a 5-year grace period, a loan term which makes considerable economic and political sense.

I emphasize economic and political sense.

As I will point out further in my remarks, the Extended Payment Program which we have adopted really establishes a horrendous and a very burdensome potential debt which all of these countries will have incurred as a consequence of our willingness to extend the repayment period. This is as opposed to realistic fiscal responsibility which would dictate that a country, by its own determination, would ascertain what it can afford to borrow and pay back. And it always has the option of refusing to accept a loan if it feels it cannot meet a debt obligation.

The administration has proposed a total of $1.03 billion for six countries under this program. As I have indicated, Greece has been removed from the Extended Loan Program to concessional. So I am not discussing Greece. But I am discussing the countries of Turkey, Portugal, Korea, Thailand, and the Philippines, as well as Spain.

These are the countries that will be affected specifically if the Extended Repayment Program is terminated.

On the surface, it would appear that allowing the 30-year repayment with a 10-year grace period may be advantageous and may be a creative mechanism to help our allies and friends who are in some temporary economic difficulty to spread out their repayments. The truth is far different, and I think the citizens of our country can appreciate the staggering debt implications of what occurs as a consequence of simply extending repayments under such a program.

A country may be able to live with and to meet an individual payment. But when you consider the conglomeration of payments, they still have the realities associated with whether or not they can pay their total debt.

The fact is that because 30-year loans are by definition far more costly than 12-year loans in the long term, extended repayment loans will inevitably force our friends and allies into a never-ending debt spiral from which they may never emerge. I can illustrate that point, but I think it has been made clear through the general awareness of the financial difficulties of various countries throughout the world.

I want to make it very clear for the record, Mr. President that I do not criticize at all aid to these countries—Turkey, Portugal, Korea, Thailand, the Philippines, and Spain. These are our allies. Korea probably is the most significant single example of the workability of our foreign policy, a country that established a democracy, a country that has established the recognition of human rights, truly one of the outstanding examples of an effective American foreign policy.

What I object to is the formula. I want to reemphasize that to my friends in these various countries and to my colleagues.

Let me make my point specifically of just what a 30-year loan means and why it adds to the never-ending debt spiral.

If a nation bought a $50,000 military truck with a 10-year life in year 1, it probably would have to buy two or three over the 30-year term of the loan to meet the same capability. Let us say because of the inflation the second and third truck sold for $60,000 and $70,000 respectively. If these three trucks were financed by a 30-year extended repayment FMS loan which

would then have a 10-year grace period, the country would have paid us some $440,000 by year 30.

It will then still owe us some $280,000. And in year 31, it will once again have to finance a new truck since the other three are no longer usable. So much for financing a 10-year item, a typical usable life of such items, for 30 years.

Contrast this with doing the same transaction by furnishing the same three trucks using a series of normal FMS 12-year market loans with a generous 5-year grace period over the same 30-year period. Using that method, the payback by the country would be some $287,000, $157,000 less than under extended repayment. And it would owe us only $105,000—that is, $175,000 less than under extended repayment. The fact that at the same time we are denying ourselves a return on the principal of the loan for 5 additional years under extended repayments loans, which have a 10-year grace period as opposed to the normal 5-year grace, is another aspect which, in these tight budgetary times, is totally unacceptable.

Mr. President, my example was of a $50,000 truck. If you multiply that figure for much more costly things—tanks and various airplanes—and extrapolate the numbers for the over $1 billion proposed for this program this year, you can see that the inevitable result is less return for us and a far greater long-term debt burden for our allies, all in the name of giving our allies and friends a "break."

I contend that the only breaks involved in this program are broken economies. These are the broken economies of our allies as a consequence of too much debt. We will continue to contribute to this if we continue this program.

Let us look at some of the examples of the current debt problems of countries with whom we have Extended Repayment Programs.

The administration proposes a total military assistance program for Turkey of $785 million for fiscal year 1986 when that country is going to have to repay us over the amount we are providing them, $406 million in fiscal year 1986, from previous FMS loans. That is the inconsistency of the program, Mr. President.

Another clear example of this can be expressed in the case of Korea. The administration proposed a program of $228 million in fiscal 1986 FMS extended repayment loans, when we will be receiving a larger amount—a larger amount, Mr. President—$231 million in FMS loan repayments during the same time. You might use the argument that you are not taking it out of the same pocket. But the fact remains that at the same time we give Korea $228 million in fiscal year 1986, they will be paying us back $231 million on outstanding FMS loan balances that have been made previously.

I ask you, Mr. President, what have we accomplished for Korea? We have accomplished absolutely nothing. We have simply added to their long-term debt.

The practicability of having a program that does not do what it is designed to do, but simply extends the repayment term to an unrealistic length, is really questionable, especially as to whether it provides any significant benefits for the recipient countries—if doesn't.

Yesterday the Senate included Spain's FMS Program under extended repayment. We should know that, whereas we would be lending Spain some $400 million under FMS extended repayment fiscal year 1986, they will be paying us back $291 million for FMS loans during the same period of time. So, actually, out of the $400 million provided Spain, they are paying us about $300 million. So there is a net of $100 million for the FMS Program for Spain as a consequence of this heavy indebtedness.

Mr. President, I can project and I am sure my colleague, the chairman of the Committee on Foreign Relations, would agree, that if we keep extending this program, within a few years each country will inevitably be paying us back each year more dollars than we provide them with as a consequence of interest on accumulated debt. The sense of that, very frankly, escapes me.

I have discussed it with the administration. They indicate that it appears to be in each country's best interest. But, Mr. President, I respectfully suggest that we have an obligation in providing assistance that we not add to the tremendous financial burden of our friends and neighbors, including the six countries in question who are the only recipients of FMS under the extended repayment programs that I am seeking to curtail.

I think it is interesting to reflect on another matter that concerns me. That is fairness. How do we determine whether or not a country should have an extended repayment, a 30-year repayment, as compared to a country that has a 12-year repayment? Obviously, the administration and the Department of State must have some formula that is applicable, but it is pretty hard to justify that formula.

Further, if you look at the facts and the history of the program, we see that there are more and more countries that are asking for extended repayment loans simply because they ease their financial burdens until tomorrow.

But, as we all know, this is not a program that results in anything of lasting value. Recognize, Mr. President, if you buy an automobile, the financial institution will not extend your payment program beyond the reasonable life of that automobile. As a consequence, you have to pay a car off in 5 to 7 years, perhaps on the more expensive models 8 or 9. But what we are doing under this FMS program is to stimulate sales of various military hardware and equipment and to provide 30-year repayment schedules on equipment that has a life of about 10 years. There are some exceptions to that, but that is certainly the average.

I have before me a list of the various items proposed for purchase under the 30-year extended repayment program. I think if we look at Portugal, it wishes P-3 aircraft as well as spares and repair parts, and support for existing weapons systems; Turkey—ships, M48-A5 tanks, F-16 aircraft; Thailand—Bell 206 helicopters, A-36 aircraft, F-16 aircraft; Philippines—communications equipment, vehicle, aircraft, ship spares, and 2½-ton cargo trucks.

I ask you, Mr. President, are those trucks going to be around in 30 years? We know they are not. These things generally have a life of less than 10 years, but I am certainly willing to recognize 10 to 15.

We have in existence an entirely appropriate FMS Program with terms including a 5-year grace, and a 7-year payback on principal, that is a 12-year term, for these items. The justification for going 30 years instead of 12 is one, again, that simply does not recognize the reality that this equipment will be worn out before one-third of the loan is paid back. I defy the administration to indicate otherwise. Even if the equipment does not wear out, in general terms it is going to be obsolete in terms of technology.

The point is, and I have perhaps emphasized this too extensive—but I think it is very basic—we are doing a disservice here. If we feel these countries should be recipients of a grant, we should sit down with the administration and recognize that we should change these loans into grants if it is in our own national and best interest. But to simply add to the debt and hope that somehow this will work out does not, I think, represent fiscally responsible action by this body.

Remember, Mr. President, the situation exists now when the extended repayment program is comparatively young. But this program is growing. I have already indicated the long-term implication of the debt burden on our friends and allies. It can only grow and grow. As I have indicated, inevitably some day several of the countries may not be able to pay us back. Then they will come to us for debt forgiveness.

What does this mean for us, Mr. President? Simply that, whereas the extended repayments we are now engaging in via a small-scale diplomatic sleight-of-hand—as I have indicated,

taking money from our left hand and giving it to our right—we will be doing it more frequently and in more ridiculous proportions in years to come. This is especially true if we keep adding more countries. And they have every right to ask to be added to the extended repayment list. In fact, if all the countries designated for are given it this year, only $450 million of a total $2.5 billion of FMS loans, excluding Israel and Egypt, which I would have treated separately and not touched by the amendment at all, would be granted normal FMS market rate loans.

In short, what used to be normal will become the exception. It already has. This will be because as country after country continues to carry a growing debt load, they will seek relief. It will thus inevitably mean, and I predict comparatively soon, these nations, simply because of the realities of the staggering growth of their debt, will be requesting forgiveness of repayment. They simply will not be able to pay their debts. And they will be right. And it will be our fault, Mr. President, for not correcting the problem now and avoiding having to do so in the future when the problem will be much worse.

For all these reasons, I believe it important that the Senate start right now to bring some truth in lending into our FMS loan program while at the same time benefiting ourselves and our friends at no additional cost to either in our assistance levels by abolishing the extended FMS loan program.

Mr. President, again I would like to reiterate that I support FMS loans to these countries. I feel we are doing a disservice to them not in the loans themselves, but in the manner in which we have proposed repayment simply because of the tremendous resultant debt burden, and I have so indicated in the case of both Spain and Korea, and others. I would like to repeat again that in the case of Korea, the administration proposes $228 million in FMS for fiscal 1986, yet they will be paying back $231 million. In other words, they will be paying $3 million more than we are providing.

As a consequence of this, Mr. President, I think my proposed amendment gives this body an opportunity to look realistically at a program which needs changing. I think by doing so we will be correcting a disservice to the affected countries here, Spain, Philippines, Turkey, Portugal, Thailand, and Korea.

Mr. President, I suggest that those countries have the option of not accepting these loan terms, and they also, I think should recognize, that we should accept the responsibility, if we deem it in our national interest, to openly come forth with other kinds of programs which are viable and as a consequence should be addressed.

If we look at the extended repayment proposal further, we can see more visibly the inconsistencies that exist. Let me give you an example, Mr. President, of some of these inconsistencies as we compare our friends, the Pakistanis and the Koreans. We provide to Korea extended repayment, but we do not provide it for Pakistan. We are providing Korea, as I have indicated, $228 million worth of FMS loans, but we are providing Pakistan $325 million worth of FMS loans. The FMS payment for fiscal year 1986 for Korea, as I have indicated, is $231 million; Pakistan is $8.7 million. We have a trade imbalance with Korea. We have a positive trade balance with Pakistan. My point is not to be critical of Korea and its trade imbalance. Korea is actively trying to resolve its trade imbalance by having procurement missions come to the United States. But the point is there is an inconsistency. We provide Korea 30 years payback, and we do not provide Pakistan with 30 years. We give them 12.

Let's look at Jordan and Portugal. We do not provide extended repayment for Jordan. We do for Portugal. The FMS loan levels, $30 million, are the same for each country. Again, here we have two countries with similar size programs, yet only Portugal, which has probably a stronger economy than Jordan, is getting the extended repayment loans.

If we look at Thailand and Oman, again there is an inconsistency. The amount provided under the FMS loan program is $58 million for each country. The FMS repayments are 5.6 for Thailand and 3.3 for Oman. The point is, we provide extended repayment, 30 years, for Thailand; Oman, 12. The inconsistency is, Mr. President, that the two countries with similar debt situations and exactly the same amount of FMS loans proposed are treated differently. Presumably the difference, as I have indicated, is in a stronger economy in Oman. But as shown above, the weaker the economy, the more it should not be given the extended repayment.

I emphasize this because it is a basic fallacy within the administration's policy and, I think, something that many of my colleagues on the Foreign Relations Committee have missed. The weaker the economy, the more it should not be given the extended repayment, since it will simply weaken the economy, reduce the country's credit rating, and only hurt that state more in the long term.

I think you would agree, Mr. President, that no country should have or obtain more debt than it can service. Those countries have to make judgments about their economies. As a consequence, to provide an extended loan program of 30 years is too much of a "short-term temptation" for them, and more often than not they would think that there will be two or three changes of administration in the country over the 30 years, and the problem of repayment, Mr. President, will be somebody else's as opposed to those who are borrowing at that time.

Another interesting point is the reality that we might as well realize that a 30-year loan contains some element of a grant. If you figure the inflation factor at 4 or 5 percent over 30 years, obviously they are paying that back with very, very cheap dollars, and as a consequence maybe we should examine the program in its true light as proposed by the administration and recognize that it contains a small grant element.

I cannot understand, Mr. President, why we continue to kid ourselves and kid the American public about another aspect of this problem. We have cases where we can buy commitments in the sense of funding to various countries in return for consideration on use of military bases. This is no secret. It is well known in the Foreign Relations Committee and throughout the administration. But, for reasons unknown, it is not acknowledged.

In the case of the Philippines, we have bases; in Spain, we have bases. The realities of why we should not enter into an open, forthright consideration on lease terms for those bases instead of hiding it within a foreign assistance program, whether it be at the FMS level or otherwise, is something, Mr. President, that totally escapes me.

Mr. President, I intend to continue to make every effort to educate my colleagues within the committee on the significance of having a realistic foreign assistance program that calls a spade a spade, that directly reflects what is in the best interests of the United States and our friends and allies, and that recognizes the realities of just what is a loan and what is not. A loan is obviously a commitment and an agreement for terms of repayment. But when it is for a specific purpose such as military sales and when those items bought in military sales have a realistic lifespan of 10 years, yet we go on and extend the repayment program to 30 years, why, we are doing a grave disservice to ourselves—and we are being less than honest with our friends and allies.

As a consequence, Mr. President, I should like to make sure that my colleagues understand what this amendment would do. It would simply strike the 30-year repayment schedule for those countries that we are proposing to receive it. It would not be retroactive to those countries that already receive it. That would be grossly unfair. This would just address an inconsistency from this date forward.

I look forward to any questions on my amendment with regard to the realistic fact that we are creating for more long-term debt for these countries through this program than we would with the conventional term repayment, which is 12 years, as well as my contention that it is an obligation of our committee and our Government and our administration to make appropriate grants when it is in our best interests.

I should also like to point out, so that there is no misunderstanding, that this amendment will not reduce the dollar levels to these countries at all. I do not address that. I think the recommendations of the administration in that regard are appropriate, and I support as well the action taken by the Foreign Relations Committee in its markup. It is simply an effort to rectify a program that has gotten way out of hand.

I hope my colleagues will support me in this amendment.

Mr. LUGAR. Mr. President, the distinguished Senator from Alaska has attempted to bring the attention of all Senators to the very difficult problems that are faced by countries that have extended foreign military sales repayment terms.

He is correct that the burden of interest over the long-term may exceed the capacity of the country to meet those obligations. As a result, there are pleas from these countries for extenuating circumstances.

However, the problem I see with the amendment of the distinguished Senator is that no one forces a country to take the 30-year repayment terms on their market rate loans.

It is fair to say that it is comparable to situations we all know, of individuals who have financial problems. Many countries we are attempting to work with, our friends and allies, need our support and have financial problems. Frequently, people in this condition will ask for longer repayment terms on their individual loans. I suppose a good portion of the Members in this Chamber have often thought in terms other than 25- or 30-year home mortgages. We are not obligated to do this. Indeed, we would borrow less in principal and interest if we just went for a 10-year mortgage to begin with, and called it quits at that.

Maybe the Senator is saying that this degree of indulgence nationally on our part, in letting countries have 30-year repayment terms, is bad for them and bad for us, and he may be right. But I think the dilemma is a fairly simple one.

Essentially, we are trying to help countries which are attempting to help us. We listen to them carefully, and they want extended repayment terms. We are prepared to offer them. A 10-year grace period, as the Senator from Alaska has pointed out, with 20 years after that, are very extended terms.

We anticipate, in all realism, that the value of the dollar in 30 years will depreciate, and in some periods of our history it has depreciated very rapidly. So, even if payments are made, they will be made in depreciated currency. We go into that with our eyes wide open.

This bill is not about charity; it is about the security of our country. It is about relationships we have with other nation-states that we think will be valuable to us as well as to them. It is about arms in their Armed Forces because we would prefer not to send American men and women in uniform there. We prefer that they defend themselves and thus help defend us. That is the hardheaded reality of this situation. If we were to make the changes the Senator has suggested, we would not know the implications in each of those relationships. I think we will need to know that before we take such far-reaching action.

The Senator pointed out that his amendment is not retroactive, that it is prospective, and so presumably it could be argued that a country that enters into one of these FMS loans knows it is 12 years for repayment, not a 10-year grace period and 20 years after that.

Perhaps all the countries we are dealing with can make that kind of adjustment. Perhaps they can go back into their councils and say, "We thought we were going to go for 30 years, but it turns out that we are going to be in for 12 years." Maybe they can make those adjustments without difficulty, but we do not know that.

It seems to me prudent in this instance to study a great deal more carefully, country by country, what the effects of this amendment would be, what the effects of abruptly changing the expectations a country might anticipate, and the effects it could have upon our relationship with that country and on our military security, if we have guessed wrong.

There is no latitude for error in terms of our national security, quite apart from the security of the countries with which we deal.

I simply rest the case with that thought: that we need to know a great deal more before acting on such a far-reaching amendment. It is an interesting proposition, but its time has not yet come in my judgment.

I hope the Senator will accept assurances from the chairman that we will be prepared to work with him in terms of studies that are required to come to better judgments. But in the event he wishes to press on to a vote on the amendment today, I would have to oppose it and ask my colleagues to oppose it. Having done so, in the event that my position should prevail, I would still say that it is an idea that must be studied.

The difficulties the Senator has pointed out are real—I do not claim they are illusory—but this is not the appropriate moment to make major changes, prior to knowing where we are headed.

Mr. MURKOWSKI. Mr. President, will the Senator yield for a question?

Mr. LUGAR. I yield.

Mr. MURKOWSKI. I thank the chairman of the Foreign Relations Committee, my friend from Indiana.

I am wondering how he would reflect on the military grant program, which the administration prepares in recommendations before our committee. Subjective decisions have to be made on the issue of what we will loan and what we will provide in the form of grant assistance.

I agree that we help those nations that help us with military assistance and that we have our own national security interests as our primary guiding consideration. But my question is this: Why do we not recognize the grant process on its merits, and debate the recommendations of the administration on the issues of grant?

I do not think the Senator would agree, but perhaps he would not disagree totally, that in this 30-year repayment program there is more than just an indication of a grant feature.

Mr. LUGAR. As I said, the depreciation of currency in 30 years, in practical effect, may make it closer to a grant.

I guess the difference is simply a common sense one—that with some countries, we anticipate their ability to make payments on the loans we offer to them. We are not prepared to make a gift right off the bat. We believe that we are making something a bit less than a gift and that they may contribute to paying some interest on the money. We may be in error in our judgment as to the benefits from that income, and maybe it is not worth it. But, as a practical matter, I think that is why we lend some people money, as opposed to granting them money straight off.

Mr. MURKOWSKI. The Senator indicates that sometimes it is justificable to make an extended-term loan simply because of the financial needs of a country, just as we all have financial needs. I think the Senator used the analogy of a 30-year mortgage.

I totally agree with the chairman, if indeed that was an analogy that was applicable in the sense of him and me buying a home. We have a 30-year mortgage, and at the end of 30 years we have a home, and 9 chances out of 10 that home would have appreciated and would have something positive.

But I asked whether or not the chairman agrees that this program is designed for purchases that have life

spans of 7 to 10 to 12 years? In making a 30-year loan, does not that directly involve the reality that the equipment is going to be worn out and replaced two or three times before the loan is paid off and that as a consequence the countries are going to have to make other purchases, and does not that just add to the debt spiral at an alarming rate?

Mr. LUGAR. The point with regard to collateral is well taken, and much of the material that is purchased in a military sense will not last 30 years; whereas, we hope most residences will.

I really have no argument on that point. I still suggest that the financial need problems might be comparable regardless of what the collateral is, and that is one reason we get in the 30-year repayment period. Another reason, as the Senator knows, is that some countries plead that they have short-term financial difficulties and that a period of grace of 10 years, might get them over difficulties so that they are in a better position to repay.

I admit the answer to my own argument is simply very rapidly we begin to get close to a grant in terms of the real value of dollars in the present sense, is that in some cases countries prefer not to have grants, or we prefer not to give the money away. We prefer at least to have a chance at earning some return in terms of interest on it.

Mr. MURKOWSKI. I wonder if I could pose one additional question to my friend from Indiana, and recognize I am not at all being critical of our relationship or our many friends in Korea. I have the utmost regard for the Koreans and what they stand for.

Again my point is to give an example of the inconsistency of the program. What possible contributions are we making to Korea when we are making them a loan of $228 million for the 1986 fiscal FMS and they are required to pay us back $231 million in repayments on the outstanding accrued principal?

Mr. LUGAR. We may be making life very difficult for Korea in the instance that the Senator suggested. But I suppose the common sense answer is also that we could forgive the $231 million if we wished to do so. For various reasons, primarily our own revenue needs, we have not chosen to do that.

I think the Senator's whole point is an interesting one concerning what is our best national interest as well as the interests of our allies we are attempting to help.

Mr. MURKOWSKI. I thank the chairman, and I agree with him.

I would be pleased to debate the merits of perhaps forgiving the accrued balance that Korea owes if that were the question. I am not necessarily suggesting that.

But the reality that they are paying us $3 million more than they are getting points out my concern on this issue.

I do believe this is my last question. When we consider the question of changing abruptly the program, I am sensitive to that and can understand the Senator's reluctance and perhaps the concern of the administration to dramatic change. I point out that there are only six countries that are receiving loans under this program at this time. But we have already seen within the last few days a change of two countries. Greece has switched, quite appropriately so—and I am not being critical at all—from an extended payment loan to a concessionary loan. And Spain has been added as a recipient of an extended repayment loan.

This was done just with some communication. But it points out that there is the capability for abrupt changes.

So I ask the chairman, does this seem too great a change when one recognizes that a third of the countries considered have already been changed from one category to the other? Why is it so unsuitable for us to consider changes when there are only four remaining countries that have not had a very recent change? If we are ever going to correct a program, we should correct it as we go along and recognize the inconsistencies of it. We do have inconsistency in this FMS program because of the extended term.

Mr. LUGAR. Let me just respond to the distinguished Senator by saying that indeed the news of these changes did come swiftly. My best information is that considerable discussion preceded that news and that the decisions were not reached abruptly. The point I have tried to make is that through study and discussion with the four remaining countries—and there may be others that we do not know about where arrangements are being contemplated—we should have time for the policymakers in those governments and in our own to think through what is going to happen.

It may very well be that the Senator has information of discussions with the remainder of the countries. Maybe we will be surprised by unusual announcements.

But I think that is unlikely, and I think the need for consultation and for some timely study of this issue is important.

Mr. MURKOWSKI. I thank my colleague, the chairman of the Foreign Relations Committee, and I do agree.

I wish to close by making one reference to a sensitivity that I think is very apparent.

As we have debated the merits of the recent reduction in the budget, the commitment to try and reduce the greater growth of our deficit, all our citizens have been called upon to make sacrifices. I suppose we could generalize by saying sacrifices have been made in the sense that the foreign assistance budget is lower than the level the administration has proposed. But we are not talking about dollars here. What we are talking about is a principle. We must recognize when a program has gone askew. We see our elderly asked to make sacrifices on Social Security COLA's, our veterans asked to make sacrifices on veterans COLA's, our farmers, on and on and on. Obviously, we must be sensitive to these concerns when we review the foreign assistance budget.

Again, while I recognize we are not disagreeing about assistance levels, we are talking about a sensitivity to a program, there indeed is a relationship in the sense of what it is for, specifically, that is the acquisition of equipment from our private sector through loans made by the Government. that equipment has a life span of 10 to 12 years. By a country borrowing for 30-year repayment, we are forcing them to get into a debt cycle that I think if we had an opportunity to sit down and talk to their treasurer, he would openly acknowledge that this is not in the long-term best interests of that country. We know it is not in the long-term best interests of our own country to make this available. I agree with the chairman that these countries are going to ask for it because it puts off their problem into the future.

But our resonsibility I think is a real one in the sense that the United States does not buy friendships with money. The United States depends on relationships built on a foundation of other than just monetary considerations.

I want to think that in the spirit of offering this amendment those particular countries that are the proposed recipients of the extended repayment will consider the intention of the Senator from Alaska. That intention is simply to recognize that virtually every country in the world has a staggering debt problem because the governments are not facing up to the realities associated with that accumulated debt. The private sector, whether it be the private banks of this country or others, have not faced up to the realities of how much debt a country can have, and here we are today debating the very same principle.

And that principle, Mr. President, is one of fiscal responsibility. And to make available extended debt that countries cannot possibly repay is a fiscal irresponsibility that I would much prefer to debate with the chairman of the Foreign Relations Committee on the merits, including whether we should give them a simple grant based on our understanding of what that grant should mean to our Nation and our own national security. But since we do not have that opportunity and we are forced to relate to what is

before us, Mr. President, I can only ask for your support and that of my colleagues in the sense of recognizing the purpose of my amendment.

Again, I appreciate and want to thank my colleague, the senior Senator from Indiana, who has obliged me in giving me an opportunity to present fully the merits of my amendment. For that I am most thankful.

Again, I trust that those nations that will have an opportunity to reflect on this debate will recognize the intention for which the amendment was offered.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER [Mr. QUAYLE]. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PELL. Mr. President, I, too, must join the chairman of the Foreign Relations Committee in opposing this amendment. If it were passed at this time it would cause a good deal of confusion and difficulty. For that reason, I am compelled to oppose its adoption.

The PRESIDING OFFICER. Is there further debate?

If not, the question is on agreeing to the amendment of the Senator from Alaska [Mr. MURKOWSKI]. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. EAST] the Senator from California [Mr. WILSON] are absent due to illness.

Mr. CRANSTON. I announce that the senator from Nebraska [Mr. EXON] is absent because of illness.

The PRESIDING OFFICER [Mr. HELMS] Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 27, nays 70, as follows:

[Rollcall Vote No. 81 Leg.]

YEAS—27

Abdnor	Harkin	Pressler
Andrews	Hatfield	Proxmire
Bingaman	Hollings	Roth
Burdick	Kassebaum	Specter
DeConcini	Mattingly	Stevens
Garn	McClure	Symms
Goldwater	Melcher	Thurmond
Gramm	Murkowski	Wallop
Grassley	Nickles	Zorinsky

NAYS—70

Armstrong	Dole	Kasten
Baucus	Domenici	Kennedy
Bentsen	Durenberger	Kerry
Biden	Eagleton	Lautenberg
Boren	Evans	Laxalt
Boschwitz	Ford	Leahy
Bradley	Glenn	Levin
Bumpers	Gore	Long
Byrd	Gorton	Lugar
Chafee	Hart	Mathias
Chiles	Hatch	Matsunaga
Cochran	Hawkins	McConnell
Cohen	Hecht	Metzenbaum
Cranston	Heflin	Mitchell
D'Amato	Heinz	Moynihan
Danforth	Helms	Nunn
Denton	Humphrey	Packwood
Dixon	Inouye	Pell
Dodd	Johnston	Pryor
Quayle	Sasser	Trible
Riegle	Simon	Warner
Rockefeller	Simpson	Weicker
Rudman	Stafford	
Sarbanes	Stennis	

NOT VOTING—3

East	Exon	Wilson

So the amendment (No. 125) was rejected.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. PELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SPECTER, Mr. TRIBLE, and Mr. MURKOWSKI addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania sought recognition first, and I believe he wishes to yield to the Senator from Virginia. Is that correct?

Mr. SPECTER. I ask unanimous consent that I might yield to the Senator from Virginia without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TRIBLE. Mr. President, I rise in support of this year's bill to authorize foreign assistance for fiscal year 1986.

This legislation will enable the United States to meet its international commitments in a manner consistent with the need to restrain Federal spending. In fact, the amounts authorized in this bill represents a virtual freeze in budget authority. I want to commend the distinguished chairman of the committee [Mr. LUGAR], for his exceptional effort at balancing the demand for funds with the need to reduce the Federal deficit.

The chairman and the distinguished Senator from Rhode Island [Mr. PELL] at forging legislation that commanded broad support in the committee. Largely as a result of his efforts, it is likely that the Senate will approve foreign assistance legislation for the first time in several years.

There is much to recommend this bill to the Senate. It sustains our commitment to peace in the Middle East, it lends support to those nations that protect NATO's Southeastern flank; it continues our efforts to foster peace and prosperity in Central America, and it aids those countries that enhance American security either by granting us basing rights or by furthering American foreign policy objectives.

As in the past, the largest amounts are provided to the signatories of the Camp David accords, Egypt and Israel. The Camp David accords remain the foundation on which a wider Mideast peace must be built. By assisting the two nations who have made peace, we demonstrate our assurance of aid to other nations willing to pursue the path of peace.

For Israel, the committee approved economic assistance of $1.2 billion and military assistance of $1.8. The amounts for Egypt are $815 million and $1.3 billion. These sums are for fiscal 1986.

Both Israel and Egypt are experiencing severe economic difficulties and both have taken steps to reinvigorate their economies.

Israel has curbed its policy of indexation, agreed to restraints on wage increases, and slowed the growth of government spending. This reform and austerity program is showing signs of success.

Egypt, too, has taken a number of steps to eliminate subsidies, and is reportedly planning to take additional steps in the future.

In light of the current economic distress and the efforts of Egypt and Israel, I am pleased that the authorization of supplemental economic assistance for 1985 has been included in this bill. The additional $1.5 billion for Israel and $500 million for Egypt will enable these two countries to cope with their current difficulties.

The committee's bill provides concessional military assistance to Greece and Turkey, maintaining the 7:10 ratio which has characterized previous American aid, and which provides the necessary balance in military support for our two NATO allies.

Like many of my colleagues I remain concerned about the apparent lack of progress in achieving a peaceful reunification of the Island of Cyprus. It would be my hope that discussions could take place at the highest level to being stability and self-rule to Cyprus at the earliest possible date.

In addition, the committee affirmed its support for the recommendations of the Bipartisan Commission on Central America. Fostering democracy improving living conditions and restoring peace are essential not only to U.S. security but to the entire hemisphere. We can achieve these goals only through a long range and forward looking policy, one that maintains an adequate level of economic and military support. In this way we can confront successfully the complex humanitarian, economic, political, social and security issues of the region.

Finally, the legislation provides for a significant effort to meet basic human issues. The plight of sub-Saharan Africa—particularly of Ethiopia and the Sudan—must stand in the forefront of our concern. The needs remain immense, the threat to life still hangs over millions.

The short-term aid provided by this Congress must be supplemented by a long-term strategy intended to ameliorate the problem of hunger. In its report the committee urges AID to devise such a strategy. This cannot come soon enough.

Mr. President, this bill makes a substantial contribution to the security of our Nation, to the cause of peace and freedom, and to the well-being of millions around the world. I urge my colleagues to support it.

I yield to the distinguished Senator from Pennsylvania and thank him for this time he yielded to me.

AMENDMENT NO. 126

(Purpose: To prohibit trade with Libya and other countries engaged in terrorism)

Mr. SPECTER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Pennsylvania [Mr. SPECTER] proposes an amendment numbered 126.

Mr. SPECTER. Mr. President, I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On p. 64 at the end of the bill, add the following new section:

SEC. (a) Notwithstanding any other provision of law, the President may prohibit any article grown, produced, extracted, or manufactured in Libya or any other country determined by the President to be engaged in terrorism from being imported into the United States.

(b) Notwithstanding any other provision of law, the President may prohibit any goods or technology, including technical data or other information subject to the jurisdiction of the United States or exported by any person subject to the jurisdiction of the United States, from being exported to Libya or any other country determined by the President to be engaged in terrorism.

(c) For purposes of this Act, the term "United States" includes territories and possessions of the United States.

(d) Any action taken pursuant to this section shall conform to the requirements of section 204 of the International Emergency Economic Powers Act (50 U.S.C. App. §17).

Mr. SPECTER. Mr. President, this amendment seeks to provide to the President of the United States the authority to stop all trade with Libya and, further, to terminate trade with any other country which is engaging in acts of terrorism.

The amendment provides that any action taken pursuant to this section shall conform to requirements of section 204, the International Emergency Economic Powers Act, which requires consultation and generally congressional interaction between the executive branch and Congress.

Mr. President, I submit that legislation of this sort is vitally necessary as a minimal approach to deal with the problems of international terrorism. The situation with Libya sank to an incredible low last year when the British policewoman was brutally murdered outside the Libyan Embassy in Great Britain. Under the guise of diplomatic immunity, the murderers were permitted to leave Great Britain.

Libya has carried on a course of international terrorism in a very flagrant and outrageous way. It is apparent, listening to the words of Muammar Qadhafi, the dictator of Libya. In a speech marking the seventh anniversary of his revolution, he spoke about the Beirut bombings that claimed the lives of over 260 U.S. Marines and bragged that:

The defeat the Americans suffered in Lebanon is not less than its defeat in Vietnam * * * the Marines, who can land and occupy any place in the world—they were dealt a powerful blow by the blowing up of the U.S. and French headquarters and were forced to leave.

Qadhafi went on:

If we are able—we the revolutionary forces, the Libyans, the steadfast Syrians, and Palestinian resistance—to overthrow the May 17 Agreement (the Lebanese-Israeli disengagement agreement) it would mean we have the power to overthrow the Camp David Agreement by the Liberation of Egypt.

Qadhafi is clearly bent on the destruction of Egyptian President Mubarak and President Nimeiri of Sudan. "They are the agents of America," he said in his speech.

The ones who enter Camp David and those who welcome Mubarak, who is head-to-toe sinking in treason. They entered the list of Sadat, the Camp of Shame, which must be liquidated either individually or in the form of a revolution against their regime.

It may come as a surprise to many Americans that between 1981 and 1984, the United States exported over 1½ billion dollars' worth of goods to Libya and imported more than 6 billion dollars' worth of goods from Libya. Trade with Libya actually increased in 1984 over 1983 levels. Exports for 1984 were up to $200 million from $190.9 million in 1983, and imports rose from less than $1 million—$.9 million—in 1983 to $10 million in 1984. So far, in 1985, U.S. exports to Libya total $41.9 million and U.S. imports from Libya are $1.5 million.

This subject came up when Secretary of State George Shultz appeared before the Foreign Operations Subcommittee on March 7, 1985.

This is a portion of his testimony:

Senator SPECTER. Mr. Secretary, on the subject of terrorism, this is a vast subject, and I am going only to touch one phase of it. You and I had a number of discussions about it in the past, but I would like to pursue one line.

Qadhafi has this week been reported or stated that he is prepared to carry out Lybia's policy of assassination worldwide. There is a real issue here about his conduct requiring some very, very forceful response in line with the conduct of so many of the terrorists calling for some forceful response, but that is a question really for another day.

You and I had occasion to discuss informally the issue of our trade with Lybia, and I have gotton the updated figures and confirmed them again this morning from the Department of Commerce about our trade with Lybia, and in 1983, we had $190.9 million in exports and $900,000 imports. In 1984, $200 million in exports; $10 million in imports. And in the context of the murder of an English policewoman last year and Lybia's continuing course, why do we continue to trade with them?

Secretary SHULTZ. From the government standpoint, we do everything we can to discourage and stop trade and discourage Americans from being there. We are not in a position to prohibit people from going there nor can we literally stop all trade.

Senator SPECTER. You do not have the authority under existing law to stop all trade?

Secretary SHULTZ. No.

Secretary SPECTER. Would you support legislation? I am prepared to introduce it promptly, giving you congressional authorization. It will have to be approved by the President——

Secretary SHULTZ [interposing]. As far as I am concerned, we are better off if we don't have any trade with Libya under the circumstances, as you described them, and I don't quarrel with them at all. I agree with you. I don't say that thinking that by cutting off our trade that puts some special crimp on their capacities because other countries do trade with them, and it is replaceable.

So the business of the sanctions will work in the sense of putting an economic squeeze on Libya, but I think that from our standpoint, we just shouldn't want to deal with them.

Senator SPECTER. I am glad to hear your view on that and your support for such legislation. As I say, I will introduce it promptly.

Secretary SHULTZ. I don't want to give a blanket endorsement to some legislation that my lawyers haven't read, but subject to that qualification, I will be delighted to look at it.

Senator SPECTER. I have heard an endorsement of a bill to stop U.S. trade with Lybia; do I hear correctly?

Secretary SHULTZ. Yes, sir.

Senator SPECTER. Wonderful. The second part of that subject, I can't understand why Great Britain deals with Lybia, and I don't expect you to answer that question, but I would hope that we would take leadership with other nations to boycott Lybia economically. I think we could make a real change in Qadhafi's policies if we at least went that far.

Would you be willing to undertake an initiative to encourage Great Britain and other Western democracies not to trade with Lybia?

Secretary SHULTZ. Well, we have tried, but we haven't succeeded because their economic stakes and numbers of people, and so forth, persuade them that they shouldn't do it.

Senator SPECTER. Like you say, on so many of the other lines, it is something we ought to keep trying.

Mr. President, when Secretary of State Shultz raises the point that action by the United States will not necessarily cut off Libya's access to materials which are exported there, it is undoubtedly true, but I believe that our Government should take the leadership and say to the world that an outlaw nation like Libya ought not to be traded with. If we take this position, then it would be a motivation for the British to do the same thing. Actually, in my judgment, the British

should have taken the lead on this kind of sanction, since it was their policewoman who was the victim and the coldblooded murder occurred in British territory. If we do not take the lead, then it will be business as usual with Libya and we will continue to do business with an international criminal.

In terms of purchases from Libya, there is absolutely no justification for our buying anything from Libya. When we talk about having action by the United States of America in authorizing retaliatory action; as came to light during the course of the past week, it may be necessary to undertake some action in the future which will have to be very carefully thought through. But an economic sanction is much less forceful in its terms, much easier to carry out successfully, much easier to formulate, and can be effectuated without the great risk of having any retaliatory forceful action.

Mr. President, it is my view that the United States and the world authorities ought to be doing a great deal more on the subject of terrorism than we are.

Pursuant to that, this Senator has submitted a sense-of-the-Senate resolution calling for a revision of the Vienna Convention with respect to diplomatic immunity. This Senator has also introduced legislation which would make it a violation of the laws of the United States for any diplomat to use a firearm. There is no justification for diplomatic immunity to extend to acts of violence, to murder, and assault with intent to kill, and to assaultive conduct with a firearm.

I believe further, Mr. President, as encompassed in my sense-of-the-Senate resolution, that the United States should take the leadership on the world scene to have terrorism classified as an international crime, so that terrorists could be prosecuted wherever they are found.

Under the normal principles of criminal procedure, someone accused can only be tried in the jurisdiction where the offense was committed, as a basic requirement of venue.

There was an exception to international law under the doctrine of piracy, where a pirate could be prosecuted wherever he was found. Some authority exists in terms of the offense of torture, for making and classifying torture an international offense. It is my sense that terrorism should be an international crime, so that terrorists could be prosecuted wherever they could be found.

Mr. President, I further believe, supported by legislation which this Senator has introduced, that the United States should enact legislation which would make it a crime for anyone to assault an officer, an agent, or an employee of the United States in the performance of official duties anywhere in the world.

We have authority to have that kind of extraterritorial jurisdiction.

There is the case of *Kerr* versus *Illinois*, which set a very important principle under a doctrine articulated by the Supreme Court of the United States, going back to 1886.

In the *Kerr* case, the State of Illinois routed out Kerr in Peru and brought him back to Illinois for trial. Kerr defended the case all the way up to the Supreme Court of the United States on the ground that he was abducted and brought back to Illinois for trial, without appropriate extradition. The Supreme Court of the United States said that the Kerr conviction was proper and that the court could have acquired jurisdiction even if it amounted to abduction.

The principles of *Kerr* have been repeatedly upheld in courts of the United States, including a learned opinion by Justice Hugo Black in a Supreme Court decision in 1950. Few Justices in the history of our Supreme Court have been more noted for their concern about civil liberties than Justice Black.

The principles of *Kerr* have been affirmed by courts of appeals within the past few years. So that there is precedence for taking terrorists into custody through the process of arrest worldwide, should we choose to take that action.

Mr. President, I have discussed some of those aspects of what we might do to deal with international terrorism which would be much more drastic than simply a provision to cut off trade with Libya or with other countries that are engaged in terroristic activities. In formulating this legislation, I had considered enumerating a number of countries, such as Iran, or Syria, or other countries which support terrorism, and I decided not to do so because it might interfere with negotiations which are currently under way in the Mideast. But I did think it appropriate, while directing this legislation principally against Libya, to include a provision that the President of the United States might prohibit imports or exports from other countries where there is a determination made by the President that those countries are engaged in terrorism, as it is obvious that Libya is so engaged in acts of terrorism.

Mr. MATHIAS. Mr. President, will the Senator yield for a question on that point?

Mr. SPECTER. I yield.

Mr. MATHIAS. Mr. President, I want to salute the Senator for his vigorous opposition to terrorism. As he has told the Senate, he has been consistent, and persistent, and totally dedicated in his opposition. I agree with the thrust of what the Senator proposes to do in the amendment before the Senate.

One of the problems, however, with terrorism—in fact, one of the most pernicious evils of terrorism—is that it forces innocent people to live in an armed camp, to surround ourselves with all kinds of weapons that we would not normally choose to employ, and that includes legal weapons.

My question to the Senator is this: Would it not be desirable, on line 5 of his amendment, to substitute the words "the President" for the words "the joint resolution"?

In other words, it would make that determination of the addition of other countries a matter in which Congress participates in the decision. This would make Congress and the President coordinate partners, as I believe the Constitution intended them to be, in important decisions of foreign policy. It would give an extra thrust to any determination that another country was to be added to the list. It would give Congress an opportunity to speak, and to speak for the American people, and I believe it would add something to the Senator's original proposal.

Mr. SPECTER. I thank the distinguished Senator from Maryland for his question.

I am not committed to the precise language or every comma in what I have sent to the desk, but I have concerns with what the Senator from Maryland has suggested, in terms of the practicality of getting that kind of congressional input. It would require a joint resolution by Congress identifying some nation as a nation which is engaged in acts of terrorism.

It seems to me that the requirements of section 204, the Emergency Economic Powers Act, to which I referred earlier, do contain some significant limitation on the President.

I call the Senator's attention to the specific language, which provides that "the President, in every possible instance, shall consult with the Congress before exercising any authorities granted by this chapter, and shall consult regularly with the Congress so long as such authorities are exercised."

Section (b) provides:

> Whenever the President exercises any of the authorities granted by this chapter, he shall immediately transmit to the congress a report specifying—
>
> (1) the circumstances which necessitate such exercise of authority;
>
> (2) why the President believes those circumstances constitute and unusual and extraordinary threat, which has its source in whole or substantial part outside the United States, to the national security, foreign policy, or economy of the United States;
>
> (3) the authorities to be exercised and the actions to be taken in the exercise of those authorities to deal with those circumstances;

(4) why the President believes such actions are necessary to deal with those circumstances; and

(5) any foreign countries with respect to which such actions are to be taken and why such actions are to be taken with respect to those countries.

Then there is section (c), which I shall not read, relating to periodic followup reports, and (d), supplemental requirements.

So Congress has powers analogous to those of the executive branch, and we do have these requirements of executive responsibility.

I am just concerned that if we have to come back to Congress for this type of determination, we will not act. It is very surprising to me that the President does not have the authority today. When I first discussed this matter informally with the Secretary of State, he was surprised that we trade with Libya. When I talked with my colleagues there was surprise.

Mr. MATHIAS. Mr. President, will the Senator yield for a question?

Mr. SPECTER. I yield.

Mr. MATHIAS. The Senator has made his purpose in citing the provisions of section 204 very clear, and I have a copy of that statute before me.

The Senator is a distinguished Philadelphia lawyer, and I hesitate to even pose a legal question to a Philadelphia lawyer. But would it not take more than a mere reference to section 204 of the International Emergency Economic Powers Act to accomplish what the Senator wants to do? Would it not be necessary to provide that in exercising the authorities granted by this section, the President shall adhere to the consultation and reporting requirements contained in section 204 of the International Emergency Economic Powers Act?

It seems to me that it is necessary to do a little more than simply reference that provision of law.

However, I still revert to my earlier suggestion that the Senator reconsider, to provide that you could add a new country—I am not talking about Libya now. Once we have acted on this, the President's power would be whole and complete to deal with Libya.

But to say that a President could simply look at a map, pick out a new country without any reference to any other provision of law is, it seems to me, aggrandizing power of the Presidency in a fashion that is unnecessary for the problem.

What you might do is to include it within the emergency powers concept so that the President declares an emergency as he did in the case of Nicaragua and then exercise emergency powers or you can set it up in that framework in which there is some ultimate review by Congress.

But if you simply grant this power to the President without my review by Congress, without any kind of guideline under which he may exercise this authority, we are in fact doing exactly what terrorists would like us to do, disrupting our own system of government and our own sense of values in order to cope with the kind of problems that they are presenting.

So I urge those two suggestions upon the Senator and hope that he might accept them as amendments to his amendment.

Mr. SPECTER. As to the first suggestion, the language currently reads that "any action taken pursuant to this section shall confrom to the requirements of section 204 of the International Emergency Economic Powers Act."

But I would be willing to adopt the language suggested by the Senator from Maryland. Would he repeat the language?

Mr. MATHIAS. "In exercising the authority granted by this section, the President shall adhere to the consultation and reporting requirements contained in section 204 of the International Emergency Economic Powers Act."

Mr. SPECTER. I would be willing to accept that modification.

Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. SPECTER. How may that be accomplished most directly?

Mr. MATHIAS. By sending it to the desk.

The PRESIDING OFFICER. The Senator may, of course, modify the amendment and I assume the Senator from Maryland will send the modification to the desk.

Mr. SPECTER. Mr. President, I ask that my amendment be modified in accordance with the language submitted by the Senator from Maryland.

The PRESIDING OFFICER. The Chair so authorizes the modification.

Mr. SPECTER. It is so modified, Mr. President?

The PRESIDING OFFICER. Yes.

Mr. SPECTER. I thank the Presiding Officer.

The modified amendment is as follows:

On p. 64 at the end of the bill, add the following new section:

SEC. (a) Notwithstanding any other provision of law, the President may prohibit any article grown, produced, extracted, or manufactured in Libya or any other country determined by the President to be engaged in terrorism from being imported into the United States.

(b) Notwithstanding any other provision of law, the President may prohibit any goods or technology, including technical data or other information, subject to the jurisdiction of the United States or exported by any person subject to the jurisdiction of the United States, from being exported to Libya or any other country determined by the President to be engaged in terrorism.

(c) For purposes of this Act, the term "United States" includes territories and possessions of the United States.

(d) Any action taken pursuant to this section shall conform to the requirements of Section 204 of the International Emergency Economic Powers Act (50 U.S.C. App. § 1703).

(e) In exercising the authorities granted by this section, the President shall adhere to the consultation and reporting requirements contained in Section 204 of the International Emergency Economic Powers Act (50 U.S.C. App. 17).

Mr. SPECTER. Mr. President, with respect to the second suggestion, the President could make a determination with respect to Libya or other countries under existing law by declaring a national emergency as the President did recently with respect to Nicaragua.

Mr. MATHIAS. And the importance there would be having declared a national emergency it becomes subject to the review of the Emergency Powers Act and Congress in the fullness of time has an opportunity to look at it, to debate it, and perhaps to support it or to modify it or if Congress is in violent disagreement, to change it. I cannot imagine that would be the case in reference to a terrorist activity. But, nonetheless, there is at least a kind of review that will be important in the larger scheme of things in keeping the Government of the United States in some sort of equilibrium in which we do not allow any one branch to gain disproportionate power over the other.

Mr. SPECTER. While the discussion is continuing, I will take a look at this language and will consider the point which Senator MATHIAS has made.

Mr. MATHIAS. I thank the Senator.

Mr. SPECTER. I indeed will consider it.

Mr. President, at this stage, I yield the floor. Perhaps there is other debate.

But I do ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PELL. Mr. President, I wish to ask the Senator from Pennsylvania one question, which is whether his definition of "terrorism" is the definition found currently in law in the Foreign Intelligence Surveillance Act of 1978.

(c) "International terrorism" means activities that—

(1) involve violent acts or acts dangerous to human life that are a violation of the criminal laws of the United States or of any State, or that would be a criminal violation if committed within the jurisdiction of the United States or any State;

(2) appear to be intended—

(A) to intimidate or coerce a civilian population;

(B) to influence the policy of a government by intimidation or coercion; or

(C) to affect the conduct of a government by assassination or kidnapping; and

(3) occur totally outside the United States, or transcend national boundaries in terms of the means by which they are accomplished, the persons they appear intended

to coerce or intimidate, or the locale in which their perpetrators operate or seek asylum.

My understanding is that this is the standard definition of "terrorism." Does that accord with the views of the Senator from Pennsylvania?

Mr. SPECTER. I believe that the distinguished Senator from Rhode Island has read the language under existing law as to the definition of "terrorism."

Mr. PELL. The Senator is correct.

Mr. SPECTER. Will the Senator cite the source for me?

Mr. PELL. The Foreign Intelligence Surveillance Act of 1978 (50 U.S.C. section 1801(c)).

Mr. SPECTER. The answer to the Senator's question is yes.

Mr. PELL. I thank the Senator very much.

Mr. LUGAR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SPECTER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPECTER. Mr. President, after conferring with the distinguished chairman of the Foreign Relations Committee, Senator LUGAR, and the distinguished ranking member of the committee, Senator PELL, I am prepared to accept a modification to the amendment which will strike the words "the President" and insert in place thereof "joint resolution", so that the provision would now have the effect of prohibiting trade absolutely, giving the President the authority to prohibit trade absolutely as to Libya and any other country so designated by joint resolution.

The PRESIDING OFFICER. The Chair would advise the Senator of two things. One is it would require unanimous consent and the second would be to send the proposed modification to the desk.

Mr. SPECTER. Mr. President, I do at this time send the proposed modification to the desk and ask unanimous consent that the proposed modification be permitted.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The amendment (No. 126) as further modified is as follows:

On p. 64 at the end of the bill, add the following new section:

SEC. (a) Notwithstanding any other provision of law, the President may prohibit any article grown, produced, extracted, or manufactured in Libya or any other country determined by joint resolution to be engaged in terrorism from being imported into the United States.

(b) Notwithstanding any other provision of law, the President may prohibit any goods or technology, including technical data or other information, subject to the jurisdiction of the United States or exported by any person subject to the jurisdiction of the United States, from being exported to Libya or any other country determined by joint resolution to be engaged in terrorism.

(c) For purposes of this Act, the term "United States" includes territories and possessions of the United States.

(d) Any action taken pursuant to this section shall conform to the requirements of section 204 of the International Emergency Economic Powers Act (50 U.S.C. App. 1703).

(e) In exercising the authorities granted by this section, the President shall adhere to the consultation and reporting requirements contained in Section 204 of the International Emergency Economic Powers Act (50 U.S.C. App. 17).

Mr. SPECTER. Mr. President, in providing for this modification, there will be a significant advance in the present law in that this amendment does achieve the principal objective of this Senator, and that is that the President shall have the authority to stop all trade with Libya. So that is what was in mind at this time.

As stated earlier in the discussion, this Senator had decided not to enumerate other countries at this time for reasons which I mentioned. We will have an opportunity at a later time to revisit this issue in terms of perhaps at a later date proceeding with the amendment in its original text and some of the after-the-fact consideration in considering the provisions of the use of powers under the declaration of a national emergency. There is a problem of the Chadha decision as to how we would handle that. That is a complicated factor which seems to me to warrant proceeding with this matter by a joint resolution. We will be achieving the desired objective as to Libya. Other nations can be added by joint resolution, and we can consider perhaps another modification in the law at a later date.

So with that modification, it is my understanding that the amendment, as modified, is agreeable. If that is so, then I ask unanimous consent that the yeas and nays be vitiated.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. LUGAR. Mr. President, I would like to ask the distinguished Senator from Pennsylvania whether the term "joint resolution" replacing "the President" occurs in both line 5 and line 11 of the amendment?

Mr. SPECTER. It does.

Mr. LUGAR. I thank the Senator.

Mr. SPECTER. The document just sent to the desk has that modification in both places.

Mr. LUGAR. Mr. President, I appreciate very much the constructive work of the Senator from Pennsylvania and other Senators on this amendment. It is an important amendment. It will strengthen our legislation. We are prepared to accept it. I personally support it.

Mr. PELL. Mr. President, I join the chairman in supporting this legislation. It serves a useful purpose. I commend the Senator from Pennsylvania on it.

Mr. SPECTER. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Pennsylvania [Mr. SPECTER].

The amendment (No. 126), as modified, was agreed to.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

(Later the following occurred:)

Mr. LUGAR. Mr. President, earlier this afternoon, the distinguished Senator from Pennsylvania [Mr. SPECTER] offered an amendment (No. 126) on terrorism, which was subsequently modified. I have the corrected text of that amendment before me, and I ask unanimous consent that this corrected text be submitted for the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

On p. 64 at the end of the bill, add the following new section:

SEC. (a) Notwithstanding any other provision of law, the President may prohibit any article grown, produced, extracted, or manufactured in Libya, or in any other country determined by joint resolution of Congress to be engaged in terrorism, from being imported into the United States.

(b) Notwithstanding any other provision of law, the President may prohibit any goods or technology, including technical data or other information, subject to the jurisdiction of the United States or exported by any person subject to the jurisdiction of the United States, from the being exported to Libya, or to any other country determined by a joint resolution of Congress to be engaged in terrorism.

(c) For purposes of this Act, the term "United States" includes territories and possessions of the United States.

(d) In exercising the authorities granted by this section, the President shall adhere to the consultation and reporting requirements contained in section 204 of the International Emergency Economic Powers Act (50 U.S.C. App. § 1703).

(Conclusion of later proceedings.)

Mr. DOLE. Mr. President, I want to indicate for many of my colleagues who have asked me about this evening that I understand the manager is making excellent progress on the bill, and we do hope to finish it. But again I do not know how quickly that will come. Hopefully those who have amendments will notify the managers on each side that they have amendments, and that those who will offer amendments will do so rather quickly.

There are a number of Members who have commitments that begin as early as 6:30. It is my hope that we can

complete action by 6:30. If we complete action on this bill tonight, that will be all we will do this evening. We will not bring up the DOD authorization bill. In fact, they are still in markup I understand. We do have the recordkeeping conference report. But I understand there will not be a rollcall on that.

Mr. HART. Mr. President, will the distinguished majority leader yield for a question?

Mr. DOLE. I am happy to yield for a question.

Mr. HART. What would be the leader's intention if we do not finish by 6:30 this evening?

Mr. DOLE. To have a little, 1-hour intermission and come back after that. It is up to the managers. I assume the managers would like to complete this. I am getting a firm response from both sides.

Mr. HART. I thank the distinguished majority leader.

Mr. DOLE. I thank the distinguished Senator.

I thank the Chair.

AMENDMENT NO 127

Mr. MURKOWSKI. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Alaska [Mr. MURKOWSKI] proposes an amendment numbered 127.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 6, beginning on line 5 with "Notwithstanding" strike out all through the end of line 7.

On page 2, line 12, strike out "$5,464,500,000" and insert in lieu thereof $5,269,300,000".

On page 14, line 18, strike out "$805,100,000" and insert in lieu thereof $1,000,300,000".

Mr. MURKOWSKI. Mr. President, I wish to place before the Senate an amendment on the FMS Program which further refines the excellent bill that Senator LUGAR has placed before the Senate. This proposed amendment eliminates the legal fiction known as the Foreign Military Sales Concessionary Loan Program and proposes to replace it with a combination of market rate loans and MAP grants.

While there would be no gain or loss in the amount of military assistance, through this amendment, presuming the Senate increases the MAP level accordingly, we would, by adopting this amendment, simplify and rationalize our military assistance program and be honest with ourselves and our allies and our friends.

Mr. President, I would ask that we consider for just a moment the reality of what this concessionary loan currently provides to the recipients. It provides a preferential loan rate of 5 percent. I ask you, Mr. President, where in this country can Americans get a loan of any kind for a rate of 5 percent?

The proposal is that this program be abolished and that only the standard loan rate be available to FMS recipient countries.

I would like to add for my colleagues' consideration that the normal FMS rate structure offered is roughly 12 percent, or the rate at which the Federal Government is able to borrow. Mr. President, that is the most preferred rate available.

Let me again reiterate very briefly the significance of concessionary rate loans to certain of our friends and allies at a rate of 5 percent—when the regular program is made available to another group of countries at the very best rate which our Nation is able to borrow, approximately 12 percent. I think my colleagues will agree that the latter in itself certainly is a favorable rate structure and much lower than any at which American citizens or the American business community can borrow.

That is not the point, Mr. President. The point is simply that we are not recognizing the grant feature in the concessional loan program. Obviously, there is a consideration of grant between the general program which is at 12 percent, and the preferred concessionary program which is at 5 percent. What we do not recognize is that the difference in rates is a grant and it should be recognized as a grant.

The administration originally proposed a total of $650 million in concessionary loans, that is, a 5-percent rate on the borrowings over 12 years for 15 countries in the fiscal year 1986 fiscal year proposal. This represents approximately 25 percent of all FMS loans for countries other than Egypt and Israel which are quite correctly treated differently and left out of my concessionary loan discussion.

Because of the reduced interest rates, the U.S. Treasury, that is, our tax dollars, Mr. President, must pay the difference in the receipt of interest of 5 percent and the market rate currently at 12 percent. This represents the grant, or the subsidy, or whatever you want to call it, element of this program. To suggest that is anything but a grant is inappropriate in the view of the Senator from Alaska. What this simply means is that we are increasing our budget deficit through yet another diplomatic device that over the course of the loan will mean that the nation, involved will pay back 30 percent less than if it were paying at the rate of 12 percent. That is, over the 12-year term that countries would, for the $650 million proposed, pay us back a total of $874 million at a rate of 5-percent interest and some $1.24 billion if the rate was 12 percent. The difference in payback is approximately 30 percent.

I would like to make this very clear to my colleagues, and emphasize to the chairman, and to the distinguished ranking member of the Foreign Relations Committee, that, as I noted at the beginning of the debate, I do not propose to decrease aid levels for any country or for the overall program. The aid levels as recommended by the administration and modified by the Foreign Relations Committee should remain. However, what I do propose is that since the concessionary loan program contains a grant element of 30 percent—this is the amount of money the Treasury has to make up in any case—then let us call it a grant and be done with it. That is, let us take the amount of money involved in a typical program of concessionary loans and give the country 70 percent of the money at the current market rate, 12 percent, which is the best rate the Federal Government can borrow at, with a 5-year grace period and 7-year repayment as usual. But the remaining 30 percent I am suggesting not be retained as a loan but rather should be given on a country-by-country basis under the MAP Program as a grant under the discretion of the State Department. This is a true grant program and it is appropriate since that is what it is. But now we do not call it a grant. We call it something else. We call it preferred interest of concessionary rate.

I suggest that by granting this differentiation between 5 and 12 percent we are honestly recognizing our responsibility in the legislative process.

Mr. President, I note again that the net effect in terms of payback under my proprosal and the current program would be the same. But we would again institute the truth in lending into our FMS Program, have a more streamlined, honest, and rational military assistance loan program, and be able to recognize and utilize grants when appropriate.

Mr. President, in a time of budgetary austerity it is essential that we in the Congress be honest and frank with the American people as well as our friends and allies. This proposal achieves that objective while also opening the way for the future use of this means when necessary to achieve our foreign policy objectives of furthering the security of our friends and allies.

I trust my colleagues will see it in that light also and vote into law the abolition of this misguided program as well as the appropriate increase in the amount of MAP.

Mr. President, as regards the countries that are affected here—it is not the intent of the Senator from Alaska

to eliminate anything that is recommended to these countries. I would simply recognize the differentiation between 5 and 12 percent and make that a grant at the discretion of the State Department.

Mr. President, we must recognize that Americans are sacrificing to meet the obligation to try and reduce the rate of growth of our deficit, a deficit which in this fiscal year is going to approach $180 to $220 billion. And we must realize, Mr. President, that probably next year the interest on our total debt of $1.8 trillion will be in excess of next year's anticipated deficit.

Most Americans are aware that 18 cents out of every dollar spent by the Federal Government goes for interest on the accumulated debt of $1.8 trillion. My point simply is, Mr. President, to recognize that it is time to examine all our subsidized loan programs and to suggest that we should not be granting loans at 5 percent under our FMS programs. I think this is an unintentionally deceptive effort in not being totally honest with the taxpayers of this country. The taxpayers of this country are not able to borrow at 5 percent. Yet I totally agree that we should be making grants to countries that are deserving of those grants and if it is in our own national interest. My amendment will allow us to achieve those objectives.

Mr. President, this proposed amendment also gives us the opportunity to be open and forthright, and to make grants to appropriate countries that are acting reciprocally to further our mutual best interests. It also puts the responsibility on determining which countries should get grants where it should be, with the Secretary of State.

Mr. President, there are 16 countries involved in this program, including Greece. The total amount is now some $1.150 billion. But the essential facts are that at a 5-percent rate over 12 years the recipient country pays back 30 percent less than under a 12-year market rate, the repayment over the first 5 years would be slightly higher under the 12-year loan for 70 percent of the assistance figure, which would be to an short-term benefit. But the reality is that we would be offering these countries the same amount of aid and each country would be receiving the same recommended amount. The only difference would be that the 30-percent portion would be recognized as a grant. I think that is a responsible judgment as to just what our responsibility is, as opposed to a concessionary loan program which is unjustified, as well as pretty hard for the American taxpayer to support let alone understand. There is an old cliche, Mr. President, that charity begins at home. I do not think it is necessarily applicable in all instances. But when we consider the realities of being anything less than forthright in the manner in which we make military assistance grants and when we attempt to hide the grants under a concessionary loan differential, the difference between 5 and 12 percent, these actions I think, Mr. President, bear the scrutiny of this body. This was the purpose of the amendment. I urge my colleagues to examine it closely and judge its merits. I would be happy to respond to any questions.

Mr. LUGAR. Mr. President, the Senator from Alaska has brought to our attention another problem of loans and grants at concessionary rates, and these subjects are complex. I congratulate the Senator on attempting to frame the issue in ways that we might understand. I shall try to refine the process a little further to indicate what I believe is the basic dilemma we face in the financing of foreign military sales. I know the sincerity of the Senator from Alaska and his desire to pursue this amendment. I would hope that he would not press this amendment to a vote again, but if he does, I would have to oppose it because, once again, we are faced with a very substantial change in the way we conduct our financing of foreign military sales.

As the Senator has pointed out, there are more countries involved than there are in the last amendment the Senator proposed. And there are substantial problems in terms of our relationships with all of these countries and their expectations about funding levels in the future.

Leaving aside what I believe to be the abruptness of change that approval of this amendment would create, I appreciate there could be an honest contention that it is better to go with 70 percent of the concessional rate loans at 12 percent and 30 percent for zero, that is, at grant levels, as opposed to having a 5-percent loan rate. There clearly is a differential between 5-percent and 12-percent interest rates. The Senator has made the point that currently this may be hidden in the concessional rate loans. The same point could be made with regard to rural electrification loans offered for many years at 5 percent. Many persons would point out that this has been a grant to a very substantial number of people in the country, one that Congress decided to do and apparently the Congress will persist in doing. That is the judgment that we are trying to make presently: Is it in the best interests of the United States to make loans at 5 percent, at 12 percent or at zero percent or at some combination of these amounts or at some point in between.

The system is hardly perfect, but each of the countries recommended for concessional rate loans has come about because there was a desire on our part in the United States to make certain that our ally or friend, was well equipped and prepared to help us.

This is not simply a business transaction. This is a situation of improving our alliances, and our national security. It is also a question of what these countries feel they can afford, what we feel we can afford, and some evaluation of the costs involved.

To the extent we need to be more candid about the low interest rates, I would ask Senators to allow the Foreign Relations Committee and the administration some more time and latitude in thinking through the ability of various countries to bear more of the cost and, likewise, the advisability of sorting out the effects of various interest rates. The Senator from Alaska may be correct that we would be better off to lend the money at market terms, perhaps better off as he suggested in the last amendment to do it in a shorter period of time, but none of these propositions are obvious, to say the least. Each has considerable risk in terms of the country relationships involved. I respect the Senator's diligence in pursuing this. He has brought a very valid point to our attention, but I must oppose the amendment and ask Senators to assist me in that opposition.

Mr. MURKOWSKI. I wonder if my friend, the senior Senator from Indiana, will yield for a question?

Mr. LUGAR. Of course.

Mr. MURKOWSKI. One of the points that was made, of course, was that a domestic subsidy program such as REA was designed for the rural electrification of America. There was a good deal of debate in the Budget Committee and on the floor about the eventual disposition of REA in America. Those of us out West are still in the process of transition, not necessarily from the whale oil lamp in Alaska, but many areas are very dependent on REA. And yet there was a great deal of scrutiny given the program and whether or not it should be phased out. I think there is a proposal pending in the House with regard to an 8-year phaseout.

We recognize, Mr. Chairman, when we consider an REA loan or any other domestic loan program, that we have an obligation from the point of return to our citizens. Now, there is a return here in the FMS programs to our national security and our national interests. I do not dispute that. I think it has been very eloquently stated in the Senator's rebuttal. But in reality, how can we possibly curb the movement of countries toward these more generous programs?

I am told that there are 16 countries now that have met the requirements, whatever they might be, of concessional interest rates, which means 5 percent—that is 7 percent less than the best rate at which our country can

borrow. Yet there are some 12 countries that are not on concession rates. Each year, I think it fair to generalize, there is more and more pressure by countries to switch over to the subsidized rate.

How can we stop this effort and still be responsible without addressing the question? Because I think the Senator as well as I has asked the administration, "How do you come to this conclusion?" It is kind of fuzzy. So I would ask the Senator, how can we get a curb on this?

Mr. LUGAR. I am not certain, Mr. President, in response to the distinguished Senator's question, that we want to get a curb on interest rate loans. I think the Secretary of State ought to have the widest degree of latitude in making determinations on interest-bearing loans. Not to express the rural electrification analogy again, because it is an imperfect one, the return to our citizens of that lighting is substantial; that is why we have persisted in a subsidized loan. I should add that the return to the American people of foreign loan assistance in terms of foreign policy and national security is a very substantial one, also.

As I have pointed out previously, this is not a charitable exercise we are engaged in. We are attempting to make certain that our allies are prepared to help us at the frontlines of conflict, so we want to make sure the programs work. The Secretary of State ought to have the latitude to try to make sure that they do work.

I grant the point is valid that if the interest rate is less than 12 percent at the market rate, or just higher than zero, people may be misled as to what is being offered and how much it is costing. But I am not certain that that misleading aspect is substantial in terms of anyone appreciating the actual cost. It seems to me that one could calculate, as the Senator has, that 70 percent of all concessional rate loans at 12 percent or 30 percent of these loans at zero percent as opposed to all of it at 5 percent come to something that appears to be truth in lending, as the Senator has said.

I hope that the Senator would not press the issue beyond this point simply because I am not sure the 70-30 formula is any more perfect, although it is an attempt, as the Senator has said, to simplify the process.

I think it is a complex process. I think flexibility is desirable in the furtherance of our needs; therefore, I am not certain that the formula the Senator sees as necessary I see at all.

Mr. MURKOWSKI. Mr. President, the Senator indicated when we were discussing the extended payment, his acknowledgement that some type of study should be undertaken. This has come up previously at various discussions in the committee. The Senator indicated, I think, a general concern over the wide discrepancy, whether it be 70-0, 70-30, or whatever. Does the Senator not feel we should adopt some realistic guidelines somewhere along the way so we can all understand just how accounting generally fits into one category or another? Or should we not perhaps put a little more emphasis on sitting down and deciding who gets a grant vis-a-vis who can best be supported for concessionary or a subsidized rate?

Mr. LUGAR. The Senator's question is a good one. I would feel more comfortable, as would the Senator from Alaska, if we did have better criteria and if we had an opportunity to discuss with the administration to see if such criteria could be found.

I must confess that this is difficult to work out on the floor this afternoon. I would be hopeful that the Senator would be willing to take some leadership and would be willing to participate in dialog with the administration—in hearings, if necessary—to explore if it is possible to have guidelines that are simpler and more equitable.

Mr. MURKOWSKI. Mr. President, this was the next question for my colleague, the distinguished chairman of the Committee on Foreign Relations, the senior Senator from Indiana: Would he entertain, during a reasonable timeframe based on his other priorities, the idea of holding hearings specifically on the formulas applicable to our Foreign Assistance Program?

Also, there is another program which I have not addressed here. It is the guaranteed reserve fund. Though it is inappropriate that I go into it now, I think my colleague would agree that that also is a program that has had a history of defaults. There is no reserve account adequately set up based on past performance.

As a consequence, of our deliberations on the GRF, we, in the committee, had the opportunity for the first time to hear from Office of Management and Budget Director David Stockman that we do not even bother with reserve account funds. What we do is just go to the Treasury for our shortfall.

The fiscally responsible attitude toward that issue is that it has no rationale, because that is just like going to the bank and saying, "Give me what I need" at any given time. We have seen fit within the committee to request an appropriation for GRF for whatever that shortfall may be. But I think if the Senator and I were to examine it, we would find that it would be totally inadequate based on the experience of defaults within the loan program.

Mr. President, to get back to the other issue, FMS financing, I would accept the offer of my colleague to hold some hearings on the formula process so that not only can Members better understand it, but became I think it is time for the administration to have an opportunity to have some legitimate input on how this determination is made.

I think it would also ease the pain of those who are responsible for representing their governments in this country to be able to understand the system. I am told, and I think both Senator LUGAR and Senator PELL would agree to a certain extent, that often these representatives see one country getting favorable attention and they feel it is their job and obligation to see that their country should get the same favorable treatment. So maybe as a consequence of trying to avoid this problem, we can establish some general policies that will enable us all to better understand the FMS programs.

I think the concessional loan system we use now is really only a device. While I believe my amendment would eliminate this device and achieve the same end with a more honest approach, I do not disagree with my chairman that it is difficult to expect our colleagues to follow the complexities of this now. As a consequence, I am not going to ask for the yeas and nays on my amendment.

I do appreciate the opportunity to have had the time allotted to me to enlighten our colleagues as well as the RECORD on the inconsistencies in this program.

I thank the chairman and the chair for this time.

I yield back to the chairman.

Mr. LUGAR. Mr. President, let me ask the Senator if he is prepared to withdraw the amendment. I pledge to the Senator that the Foreign Relations Committee will have a hearing or hearings on the subjects, and I shall ask the guidance of the Senator from Alaska on the topics that ought to be covered so that the hearings help produce a better policy.

Mr. MURKOWSKI. I thank the chairman, the distinguished senior Senator from Indiana. I do withdraw my amendment and look forward to participating with the other Members in the discussion and the examination of these matters. Again, I thank him for allowing me the opportunity to bring them to light.

The PRESIDING OFFICER. The Senator has the right to withdraw his amendment.

The amendment (No. 127) was withdrawn.

THAI-CAMBODIAN BORDER PROBLEMS

Mr. GLENN. Mr. President, I have two amendments. I believe the language of these amendments has been resolved so that we will not have to have a rollcall vote on them. Before we address them, however, I would like to briefly discuss another issue for a couple of minutes.

I apologize to the distinguished chairman of the Committee on Foreign Relations for not bringing this particular item up in advance, but I want to make a statement on a matter of great interest. I am concerned with what is going on along the Thai-Cambodian border. While this problem comes under the immigration function of the Committee on the Judiciary, I think it can also be mentioned here and now because we have foreign relations matters on the floor.

A while ago, Secretary of State Cyrus Vance made a commitment to the Thai Government, as I understand it, that difficulties with refugees along the Thai-Cambodian border would be addressed jointly by Thailand and the United States. To date, we have done that. We have had resettlement of these unfortunate people. I believe we have resettled a total of between 300,000 and 400,000 refugees from Southeast Asia in this country.

We have lived up to that commitment with the Thais and have worked to resettle these people and tried to get families that were split up reunified. We have done very well on this issue.

We thought this whole issue would be settled by now, but something unforseen has happened. With the Vietnamese incursions into Cambodia, there recently have been some 250,000 to 300,000 Khmer people forced out of their homes across the border into Thailand.

The reason I bring this up now is this: Our plan now, as I understand it, is to close our screening process in Thailand by the end of May. The original plan was to end by late June. We did not foresee the complexities of this new wave of people, and I am not suggesting that we wait until all of the new refugees are taken care of. But, there is still a nucleus of original refugees that we have been working with who have family reunification problems. And, because of this recent wave of people across the border, the original group is not able to get satisfactory screening and rescreening which has been necessary for many of them.

I have a number of Khmer people as constituents in Ohio who have relatives in Thailand that are waiting for resettlement. Because of this interest, my daughter, Lyn Freedman, recently spent a month in Thailand and the Far East. She talked to many of those relatives, and she went to the border camps to visit with the new refugees. I know secondhand from her about the refugee situation there.

The reason I bring this matter up, is that while we are taking up foreign policy matters, I hope the administration can be convinced that we should keep our State Department and INS screening teams in Thailand long enough to get the original refugee groups screened and rescreened, so every effort is made to be certain that families are reunified where it is justified. Let me make it very clear, I do not want any Khmer Rouge to be processed, but I am concerned that many Khmer have been wrongly branded as Khmer Rouge.

The original commitment Cy Vance made was a commitment by the United States of America. I think we have carried it out fairly well through the years. It has not gone perfectly, but I would hate to see us end this screening process at a time when we have an opportunity to bring it to a more satisfactory conclusion.

I know that we cannot keep our State Department and INS people out there forever, and I know that we have resource demands in other parts of the world. But I say to the chairman of the Foreign Relations Committee, Senator LUGAR, who is the floor manager of this bill, that I hope that whatever representations need to be made to the Immigration and Naturalization Service are made, so that our people will be kept in Thailand until the processing is brought to a satisfactory conclusion.

Senator SIMPSON has worked on this issue in the Judiciary Committee, as has Senator KENNEDY. They have worked very hard on it, and I appreciate their efforts.

I would be remiss, however, knowing the situation out there perhaps a little better than most Senators, in not bringing this matter up when we are considering foreign relations issues.

I think we have a commitment to that part of the world, and we have fulfilled it up to now. But let us not end it prematurely. I urge the Immigration and Naturalization Service and the State Department to keep those teams there longer, so we can get the screening completed.

I thank the distinguished floor manager for bearing with me, and for allowing me to bring this matter to his attention and to the attention of all those who read the RECORD, as well as the Immigration and Naturalization Service, to whom I will talk tomorrow.

I hope this screening service is not terminated preemptorily at the end of May, no matter what the situation is, just because we said a year ago that it was going to end. The situation has changed, and I think the termination date deserves to be extended.

AMENDMENT NO. 128

(Purpose: To express the sense of the Congress that the policy of separate development and the forced relocation of South African blacks to designated "homelands" is inconsistent with fundamental American values and internationally recognized principles of human rights and should be discontinued)

Mr. GLENN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio [Mr. GLENN], for himself and Mrs. KASSEBAUM, proposes an amendment numbered 128.

Mr. GLENN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 64, between lines 16 and 17, insert the following:

POLICY TOWARD SOUTH AFRICAN "HOMELANDS"

SEC. 914. (a) The Congress finds that—

(1) the sanctity of the family, individual liberty, maximum freedom of choice, ownership of private property, and equal treatment of all citizens, regardless of race, are principles which are fully supported by the American people;

(2) the forced relocation of blacks by the Government of the Republic of South Africa to designated "homelands" divides families, as families are required to remain in the "homelands" while fathers seek work in the so-called "white areas";

(3) the forced removal of persons living in so-called "black spots" in "white" rural areas in South Africa denies them the fundamental right to live and to farm on land they have legally occupied for years, and subjects them to arbitrary arrest and detention when they seek these rights;

(4) compared to "white" South Africa, the designated "homelands," which are meant to accommodate the largest South African population group on a fraction of South African territory and were established without the consent of the vast majority of the governed, are characterized by high rates of infant mortality, unemployment, and malnutrition and by a severe shortage of medical services;

(5) the policy of the Government of the Republic of South Africa denies blacks their rightful claim to full South African citizenship; and

(6) the recent violence in South Africa must be seen as an inevitable result of the denial of the full rights of citizenship.

(b) It is the sense of the Congress that—

(1) the policy of separate development and the forced relocation of the people of the Government of the Republic of South Africa are inconsistent with fundamental American values and internationally recognized principles of human rights;

(2) the Government of the United States should continue to regard as citizens of South Africa all persons born within the internationally recognized boundaries of the Republic of South Africa, and not differentiate among these citizens on the basis of the South African Government's claim to have granted independence to various "homelands";

(3) at such times that any "homeland" official applies for a visa for travel to the United States, no such visa should be granted to such official unless such official holds a passport which is recognized as valid by the Government of the United States; and

(4) the Government of the United States should urge that the forced relocation of South African citizens be discontinued and that policies be adopted for all South Africa's citizens which protect the sanctity of the family, individual liberty, maximum

freedom of choice, ownership of private property, and equal treatment of all citizens, regardless of race.

On page 64, line 18, strike out "SEC. 914." and insert in lieu thereof "SEC. 915.".

Mr. GLENN. Mr. President, this amendment is submitted on behalf of myself and Senator KASSEBAUM. It tracks the language of Senate Concurrent Resolution 6 which has been cosponsored by Senators MATSUNAGA, BRADLEY, CHAFEE, HART, KENNEDY, MATHIAS, SARBANES, DURENBERER, KERRY, and ROCKEFELLER. It is the same language that the Senate approved on October 3 of last year but which did not receive final House approval in the waning days of the last Congress.

I believe it is vitally important that we in the Congress speak out strongly and with a united voice against South African apartheid. U.S. policy toward South Africa is deservedly receiving increased scrutiny today. During this session we will undoubtedly be debating at length the merits of "constructive engagement" and the several proposed alternatives which would serve to demonstrate concretely our distaste for apartheid and allow us to distance ourselves from the regime which enforces it. Today, however, I am offering a simple proposal on which I trust we can all agree: that the policy of separate development and the forced relocation of South African blacks to designated "homelands" is inconsistent with fundamental American values and internationally recognized principles of human rights and should cease. Homelands they have never seen. Homelands they are forced to. Homelands where there is no water. Homelands where no one else wants to live. Homelands, indeed:

Relatively, the South African Government announced a "suspension" of forced removals. I say that a suspension is not good enough, it must be permanently discontinued and revoked. We have a responsibility to raise our voices in united protest over this blatant abuse of human rights and I hope my colleagues will join me in cause and conscience to reject and condemn South Africa's homelands policy. The purpose of this resolution is simple. It expresses the great concern of the Congress over South Africa's policy of forcibly removing black South Africans to desolate "homelands." I believe that all Americans are appalled by the South African policy of denying any voice in government to the majority of South Africans. That policy is completely alien to values we Americans cherish, and it is completely contrary to the principles upon which our Nation was founded.

The homelands policy is an integral part of the noxious scheme known as apartheid. And let there be no mistake over what the purpose of apartheid really is. It is to deny citizenship and basic political rights to the entire black population of that nation. In the words of a recent report of the South African Council of Churches and the Southern African Catholic Bishop's Conference, the goal of apartheid is:

> A South Africa in which there are no black South African citizens or nationals but only black "aliens" working in South Africa who bear the nationality of one of the "independent" Bantustans. For in this way, the Nationalist Government seeks to escape its moral obligation to extend political rights to all South African citizens or nationals.

And how is this to be brought about in a country whose population is over 70 percent black and only 16 percent white? The answer lies in the homelands policy. Under that policy, black South Africans are denied citizenship within South Africa, and instead are assigned citizenship in 1 of 10 homelands based very loosely on old tribal reserves. In 1913, the South African Parliament passed the Native Lands Act assigning 10 percent of South Africa's total area for African occupation and prohibiting Africans from purchasing land outside the reserves. The Native Trust and Land Act of 1936 increased the total land area of the reserves to about 14 percent of the territory of South Africa. But since these acquisitions have yet to be fully realized the homelands now comprise just 13 percent of the total land area of South Africa.

What is life like in these homelands to which over 70 percent of South Africa's people are to be assigned citizenship? Again, according to the Council of Churches report:

> Today, the Bantustans are characterized by mass unemployment; by proverty so desperate that the position of the residents is worse than that of the inhabitants of any other part of Africa except perhaps the "Sahel" countries. They are characterized by outbreaks of diseases such as cholera, bubonic plague and typhoid, and malnutrition so far advanced that about a fifth or more of the children die before the age of 5.

One especially repugnant aspect of the homelands policy concerns what the South African Government refers to as "blackspots." My original resolution was focused on "blackspots"—and I think it deserves a moment of our time. Blackspots are areas occupied by Africans but surrounded by whites. Most of them are either African freehold land purchased before passage of the Native Land Act of 1913 or church owned land occupied and used by Africans. Since blackspots are inconveniently located in white areas, the South African Government has determined that they have to go. And since blackspots are, by definition, outside the reserves, the Government says blackspot inhabitants must be removed to the homelands in order to make way for white development. To date, a total of some 3.5 million black South Africans have been removed from white-designated areas. The relocated people come from farming and urban areas as well as the so-called blackspots. It is estimated that some 2 million more still face removal, over 1 million from the blackspots alone.

What does this removal policy mean in human terms? According to an excellent 1981 study sponsored by the Rockefeller Foundation, the "forced resettlement of Africans from white South Africa to the homelands has caused as much human suffering, hardship, and despair as any other apartheid measure." To prove it, we need only look at one recent example.

One hundred and twenty miles west of Johannesburg was the village of Mogope. Here 300 peasant families lived in relative stability and prosperity on farmland which the Bakwena tribe owned and worked for 72 years. This village of 300 families contained homes, churches, and schools built by the community. Declared a blackspot by the Government of South Africa, the community was informed that its town would be leveled and its people relocated to the homeland known as Bophuthatswana. Since most of them had never set foot in Bophuthatswana, they quite naturally objected to this decree. Led by a member of the community, a farmer named Saul Mkhize, the people of Mogope peacefully attempted to voice their objections. During the course of a demonstration the unarmed Saul Mkhize was shot dead by the South African police. The families of his village were forcibly removed, and their homes, schools, and churches were bulldozed. Tragically the tale of Mogope is not unique. Thousands of black South Africans are threatened by the same fate that befell the people of Mogope.

Mr. President, I think every single Member of this body would agree that the scheme of grand apartheid is appalling, unhumane, and unjust. But simply agreeing with that assessment is not enough. I believe we also have a responsibility to raise our voices in protest over this blatant abuse of human rights. If we oppose only those human rights violations committed by our enemies—and ignore those perpetrated by real or imagined friends, then all the world will soon know our human rights policy for the hypocrisy it is. So let us no longer stand silent in the face of this outrage. Let us resolve never to use "quiet diplomacy" as an excuse for closing our ears to the cries of those who suffer. And let us join together in cause and conscience to reject and condemn South Africa's homelands policy. I urge my colleagues to adopt this amendment unanimously.

Mr. LUGAR. Mr. President, I commend the Senator from Ohio on a very constructive amendment, and we are prepared to accept the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment.

The amendment (No. 128) was agreed to.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GLENN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 129

(Purpose: To require a report on enhancements in technology of defense articles and defense services made after sale but before delivery to a foreign country)

Mr. GLENN. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio [Mr. GLENN] proposes an amendment numbered 129.

Mr. GLENN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 24, between lines 9 and 10, insert the following:

SENSITIVE TECHNOLOGY

SEC. 128. Section 36(b) of the Arms Export Control Act (22 U.S.C. 2776(b)) is amended—

(1) by inserting before the period at the end of the second sentence of paragraph (1) the following: "and a detailed justification of the reasons necessitating the sale of such articles or services in view of the sensitivity of such technology"; and

(2) by adding at the end thereof the following new paragraph:

"(5) (A) II, before the delivery of any major defense article or major defense equipment, or the furnishing of any defense service or design and construction service, sold pursuant to a letter of offer described in paragraph (1), the sensitivity of technology or the capability of the article, equipment, or service is enhanced or upgraded from the level of sensitivity or capability described in the numbered certification with respect to an offer to sell such article, equipment, or service, then, at least forty-five days before the delivery of such article or equipment or the furnishing of such service, the President shall prepare and transmit to the chairman of the Committee on Foreign Affairs of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report—

"(i) describing the manner in which the technology or capability has been enhanced or upgraded and describing the significance of such enhancement or upgrade; and

"(ii) setting forth a detailed justification for such enhancement or upgrade.

"(B) The provisions of subparagraph (A) apply to an article or equipment delivered, or a service furnished, within ten years of the transmittal to the Congress of a numbered certification with respect to the sale of such article, equipment, or service.

"(C) If the enhancement or upgrade in the sensitivity of technology or the capability of major defense equipment, defense articles, defense services, or design and construction services described in a numbered certification submitted under this subsection costs $14,000,000 or more in the case of any major defense equipment, $50,000,000 or more in the case of defense articles or defense services, or $200,000,000 or more in the case of design or construction services, then the President shall submit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a new numbered certification which relates to such enhancement or upgrade and which shall be considered for purposes of this subsection as if it were a separate letter of offer to sell defense equipment, articles, or services, subject to all of the requirements, restrictions, and conditions set forth in this subsection. For purposes of this subparagraph, references in this subsection to sales shall be deemed to be references to enhancements or upgrades in the sensitivity of technology or the capability of major defense equipment, articles, or services, as the case may be.".

"(D) For the purposes of subsection b(5)(A), major defense article shall be construed to include electronic devices, which if upgraded, will enhance the mission capability of a weapons system"

Mr. GLENN. Mr. President, this amendment, I am sure, will shock many of my colleagues to find out that it is even necessary.

As we approve sales of military equipment and technology to be sent to different countries around the world, we also approve the level of technology and level of complexity for that equipment, so that we make certain that the more sensitive technolgy does not fall into the hands of those who might compromise our national security. We set those levels very carefully in committee and on the floor of the Congress.

From then on, whatever the administration, either Democratic or Republican, wants to do in upgrading that equipment can be done with no further reports being made to Congress.

An example of this is the AWACS airplane. We approve it for a certain level of complexity and technology. We do not wish to exceed that level. But any administration that wanted to can upgrade the boxes, add new equipment, triple the range of the radar, if possible—and none of this would have to be reported back to Congress.

That loophole is a major fault of section 36(b) of the Arms Export Control Act.

My amendment is very simple. It will require that Congress be notified in the event that capability or substantive technology of a previously approved arms sale is upgraded, without regard to the dollar amount of the upgrade.

A similar but more stringent amendment was passed unanimously by the Senate Foreign Relations Committee during the last two sessions of Congress.

Under current law Congress need not be notified of any equipment changes, increases in capability, or upgrade of technology unless these upgrades exceed the $14/$50/$200 million thresholds contained in the Arms Export Control Act. This is an unlikely event for any upgrade.

This loophole, in my view, is a very significant circumvention of the intent of the Arms Export Control Act for several reasons. First, it allows the executive branch to change the technology of most arms sales without notifying Congress. Second, this loophole denies Congress its legitimate role in the review of arms sales and therefore bypasses our system of checks and balances. Finally, it denies the Congress its role in shaping U.S. foreign policy.

The effect of the amendment that I am proposing today is very clear and simple. When enhancements are made to defense items or services after Congress has approved the sale, Congress should always be notified. When I say enhancement made to defense items or services, we do not want to see every nut and bolt change that does not change combat capability. What we do want to know is where enhancements are made that change combat capability. As long as the executive branch provides only what Congress has approved, there will be few notifications. Alternatively, if the executive branch makes a large number of upgrades, then the reporting requirement and the resulting paperwork will be extensive, and rightly so.

For example, several years ago the sale of F-16's to Pakistan was approved in the Foreign Relations Committee by one vote. I was on the Foreign Relations Committee at that time. That vote to send the F-16's was approved by one vote. I voted to approve that sale since I was convinced that the aircraft had a downgraded avionics package which, if lost or transferred to a third country, would not be a serious loss of technology. However, as you are aware, subsequent to the approval of that sale, a more advanced avionics package was put into that aircraft without the notification to Congress.

I submit, Mr. President, that had I known of the plans for that upgrade, my vote might very well have been different and the approval of that sale would not have been voted by the committee. It might even have been turned down by Congress.

Mr. President, another sale of continuing concern is that of the Saudi AWACS—a very controversial sale. Congress approved that sale in 1981, yet today, 4 years later these aircraft have yet to be delivered. I opposed the sale of AWACS planes to Saudi Arabia because of my deep and longstanding concern that the United States should not transfer such highly sensitive technology to other countries without direct American control, especially to

countries in such an unstable region of the world as the Middle East. How certain can we be that when the AWACS are delivered in 1986, these aircraft will indeed be limited to the same technology and the same capability that Congress narrrowly approved 4 years ago? As the law is currently written, there is simply no assurance that we will even know about it, because the administration has no requirement to notify us of any upgrades they may be making.

Is this idle speculation? No, it is not because there apparently has been an upgrade in the Saudi AWACS system. This past January, I wrote Secretary of Defense Weinberger asking him if the technology in the Saudi AWACS was being upgraded. The response I received from Lt. Gen. Philip Gast of the Defense Security Assistance Agency indicates that there have five configuration changes made to the Saudi AWACS since the program was first approved in 1981.

At this point, I ask unanimous consent that my letter to Secretary of Defense Weinberger and the response from General Gast be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, DC, January 17, 1985.

Hon. CASPAR WEINBERGER,
Secretary of Defense,
The Pentagon, Washington, DC.

DEAR MR. SECRETARY: It has come to my attention that there is reason to believe that the E-3A Airborne Warning and Control System (AWACS) units that the United States is selling to Saudi Arabia may be upgraded to a level that enhances their capability. I am writing to inquire as to whether or not any upgrade of the technology or capability of the AWACS units scheduled for delivery to Saudi Arabia is planned or currently underway. If so, specifically what type of modifications are planned or underway for the Saudi AWACS?

As you may know, I oppose the sale of AWACS planes to Saudi Arabia because of my deep and long-standing concern that the United States should not transfer such highly sensitive technology to other countries outside of direct American control, especially to countries in such an unstable region of the world as the Middle East. I fear that the introduction of AWACS planes into the volatile Middle East, upgraded above the level of their capability at the time of their approved sale on October 28, 1981, could have a potentially detrimental effect on American national security interest.

I strongly feel that upgrading can significantly alter the character of an arms sale and should therefore be subject to congressional review procedures pursuant to the spirit, if not the letter of Section 36(b) of the Arms Export Control Act. I hope you share my view on the importance of consultation between the Executive and Legislative branches on this issue.

I look forward to your response to my inquiry at your earliest convenience. Thank you for your attention to this important matter.

Best regards.

Sincerely,

JOHN GLENN,
U.S. Senator.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, DC, February 15, 1985.

In reply refer to: I-006934/85.

Hon. JOHN GLENN,
U.S. Senate,
Washington, DC.

DEAR SENATOR GLENN: In your letter of January 17, 1985, to Secretary Weinberger, you asked if any upgrade of the technology or capability of the AWACS units scheduled for delivery to Saudi Arabia is planned or currently underway.

There have been five noteworthy configuration changes made to the Saudi AWACS since the program was initially approved in 1981:

The TF33-PW-100A engine has been replaced by the commercial CFM-56 engine. This replacement provides better fuel efficiency and increased engine thrust for the AWACS aircraft and results in improved takeoff performance, increased time-on-station without refueling and slightly higher optimal cruising altitude. The developmental costs for the replacement were fully funded by the Saudi Arabian Government. As a result of this development, the U.S. Navy will save an estimated $50-$60 million in nonrecurring costs on its E-6 program. Authorization for this change was provided in October 1983.

A secure teletype capability was approval in May 1983. This is a system similar to that used on the NATO E-3A which allows for the transmission and receipt of radio teletype messages. Commercial security equipment and lack of NATO unique software preclude operation on the NATO teletype data link.

A UHF radio relay capability was also approved in May 1983. These radios can function only in the relay mode and are not accessible to the mission crew. The original Saudi E-3A baseline configuration included a relay capability using existing mission radios.

Color monitors were approved in September 1984. This enhances displays on the mission consoles and is common with USAF change to color systems. Mission avionics performance is not affected.

Infrared countermeasure (IRCM) sets were approved for installation on the E-3A aircraft in August 1984. Similar IRCM sets have been installed on other Saudi aircraft, and the Saudi E-3A IRCM sets are based on sets which have previously been approved for release to other foreign countries. The sets will provide enhanced survivability of AWACS by protecting it from attack during critical phases of flight.

Some other minor changes have been made to the baseline configuration to keep USAF and Royal Saudi Air Force systems common when feasible and to substitute for equipment that is no longer manufactured.

While there have been some other technology upgrades and capability enhancements requested by the Saudis, we have not approved those which went beyond that configuration notified to Congress and have remained faithful to the specific exclusions that were proposed for the Saudi AWACS.

From the foregoing, I believe you will agree that the changes made to the original configuration notified to the Congress are improvements which do not represent significant technological upgrades related to mission avionics or other sensitive systems. In most cases, these hardware changes are related to improved safety, reliability, or communications capabilities of the basic airframe. These changes do not significantly alter the character or scope of the arms sale as submitted to Congress under Section 36(b) AECA. Accordingly, no amended notification was made in this case.

Sincerely,

PHILIP C. GAST, *Director.*

Mr. GLENN. Mr. President, General Gast stated in his letter that "the changes made to the original configuration notified to the Congress are improvements which do not represent significant technological upgrades related to mission avionics or other sensitive systems." This is clearly a subjective judgment that is not in keeping with the spirit of effective consultation between the executive and legislative branches. We only received that, Mr. President, because I took the initiative in inquiring. This notification was not sent over to us automatically. I do not believe Congress should rely on the judgment call of an administration official to say if an upgrade is significant or not.

Congress should be able to review all upgrades and decide for itself, under out Government system of balance of powers, whether or not the upgrades are significant.

Mr. President, colleagues from both sides of the aisle who share my concern about the transfer of sensitive technology and about the legitimate right of Congress to participate fully in the arms sale review process have expressed strong interest in the passage of this legislation. I ask that the Senate approve this important amendment to section 36(b) of the Arms Export Control Act which will reaffirm the legitimate role of Congress in the foreign policymaking process.

The PRESIDING OFFICER. (Mr. GORTON). The Senator from Indiana.

Mr. LUGAR. Mr. President, first of all, I commend Senator GLENN on the earlier comments he made on the Thailand border situation and the special notice he gave to the administration and to all who might see his remark in the RECORD. The remarks were well taken.

For our side, we approve and support and commend the amendment the Senator has just spoken to, and we will be pleased to proceed with it expeditiously.

Mr. PELL. Mr. President, this is an excellent amendment. It has been approved unanimously twice in the past by the Foreign Relations Committee in 1983 and 1984.

I hope that we in the Senate will now do exactly the same.

I know how much we in the committee miss the voice of the Senator from Ohio, especially for his expertise on questions of sensitive technology and nuclear matters.

Mr. GLENN. Mr. President, I thank both the chairman and ranking minority member for their remarks. I appreciate them.

Mr. President, it is my understanding that with the additions of the word "major" before "defense article" on line (1), and a change from 60 days to 45 days on line (9), we have an agreement on the language of this amendment.

There is one further point that I wish to make, Mr. President. I wish to ensure that electronic devices, which commonly we call "black boxes" for lack of better wording, if not specifically included on the list of major defense equipment as defined by the Department of Defense, are to be included as major defense articles for purposes of this amendment and, therefore, any upgrades of "black boxes" must be reported.

Thus, at the end of the amendment I have added a new subsection (d) which states:

For the purposes of subsection b(5)(A) "major defense article" shall be construed to include electronic devices which, if upgraded, will enhance the mission capability of the weapons system.

It is my understanding, Mr. President, that the distinguished floor manager of the bill is prepared to accept that language, and I move the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. GLENN. Mr. President, I am prepared to yield the floor if the distinguished floor managers are prepared to vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Ohio [Mr. GLENN].

The amendment (No. 129) was agreed to.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 130

(Purpose: To strengthen United States programs to protect endangered species)

Mr. PELL. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Rhode Island [Mr. PELL], for himself and Mr. Cranston, proposes an amendment numbered 130.

Mr. PELL. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 36, add the following at the end:

Section 314A: The Foreign Assistance Act of 1961, as amended, is amended by adding at the end of section 119 the following new subsections:

"(e) Each Country Development Strategy Statement (country plan) shall include a detailed and specific plan to assist the recipient country in the conservation of biological diversity. Each such plan shall include, as appropriate, assistance to countries in the identification, acquisition, and protection of wildlife habitats, of representative ecosystems, and of significant or unique natural areas. Each Country Development Strategy Statement shall take account of the information derived from the activity undertaken pursuant to subsection (h).

(f) The Administrator of the Agency for International Development, and the Directors of other appropriate United States agencies, are authorized and directed to enter into long-term agreements with recipient countries to protect wildlife habitats, representative ecoysystems, and significant or unique natural areas in the recipient country.

(g) Of the amount by which funds appropriated to the Agency for International Development for agriculture and forestry exceeds the amounts appropriated for agriculture and forestry in fiscal year 1986, at least fifty percent shall be available only for countries which enter into long-term agreements pursuant to subsection (f). Funds made available by this subsection may be used in support of the long-term agreements.

(h) The Administrator of the Agency for International Development is authorized and directed to support the creation of biological inventory programs in recipient countries, to support programs to identify critical ecosystems in developing countries, and to make surveys of national parks and proposed protected areas where such surveys will enhance the protection of endangered species or the protection of critical ecosystems."

(B) In subsection (d) of Section 119 of the Foreign Assistance Act of 1961, as amended, strike "subsection" and insert in lieu thereof "section"

Mr. PELL. Mr. President, I offer this amendment to strengthen the existing provisions of law to protect endangered species.

In 1983 Congress enacted the International Environmental Protection Act of which I am proud to have been the principal sponsor. Among other issues, that law authorized U.S. assistance to developing countries "in protecting and maintaining wildlife habitats and in developing sound wildlife management and plant conservation programs."

In response to this provision, AID has, in conjunction with other Federal agencies, devised a strategy to conserve biological diversity. The amendment I am proposing follows up on that strategy.

The amendment has four principal components:

First, it requires that each AID country plan include assistance to protect wildlife habitats, representative ecosystems, and unique natural areas;

Second, it directs AID to enter into long-term agreements to protect wildlife habitats and representative ecosystems;

Third, it rewards countries that enter into long-term agreements to preserve endangered species by channeling one-half of the increase in AID funding over fiscal year 1986 levels for agriculture and forestry to these countries;

Fourth, it directs AID to assist countries in making inventories of critical ecosystems and in making surveys of protected areas.

The costs of this amendment are minimal. The issues however are very basic.

It is estimated that more than 1,000 plant and animal species will become extinct each year and that if present rates of tropical deforestation and ecosystem disruption continue into the next century, 20 percent of all species on Earth may become extinct within the next human generation.

The extinctions projected in the coming decades will be largely due to human activities. They will occur on a scale that render natural biological extinction trivial by comparison. This loss of species and ecosystems due to human activities is resulting in the progressive impoverishment of the Earth's biological systems. This, in turn, reduces the ability of natural systems to support human populations.

For example, the center of origin of many food plants are in the tropics. As tropical areas are converted, ancestral stocks of these plants are jeopardized or lost. Only three species—corn, wheat, and rice—produce two-thirds of the total world grain crop. The food supply of the entire world now depends on maintaining a balance between the genetic systems of these and a few additional crops, and their pests and diseases. In the future, new sources of food may need to be developed from as yet undiscovered germplasm.

The U.S. Government is in a unique position of world leadership to help conserve biological diversity. Most of the areas that need to be protected are in developing countries. There is a clear and close relationship between the poverty of the people of those countries and biological impoverishment—and this will intensify if current trends are not altered. Through its own aid programs and through the multilateral assistance programs it can influence, the U.S. Government can play a major role in reversing these negative trends which affect our economic and security interests as surely as they affect the well-being of people in the developing world.

Mr. President, I ask unanimous consent that a letter from Brent Blackwelder of the Environmental Policy Institute, on behalf of a coalition of

environmental groups, be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

ENVIRONMENTAL POLICY INSTITUTE,
Washington, DC, May 15, 1985.

Senator CLAIBORNE PELL,
Senator ALAN CRANSTON,
U.S. Capitol, Washington, DC.

DEAR SENATOR PELL AND SENATOR CRANSTON: We commend you for your efforts to address a serious global resource issue, the loss of biological diversity, as the Foreign Assistance Act is debated this week. The rapid disappearance of species this century is depriving civilization of a vast genetic pool. A significant percentage of prescription medicine now comes from species found in tropical moist forests which are rapidly vanishing.

Your amendment to Section 119 is a welcome and much needed step toward solving this problem. Your amendment would provide each country's development strategy plan to include measures to conserve biological diversity and would provide for A.I.D. to enter into long-term agreements with recipient countries to protect wildlife habitats and unique natural areas. By offering financial incentives for protection of critical habitats out of amounts appropriated for forestry and agriculture, your amendment offers the hope of succeeding in its objective.

The Natural Resources Defense Council, the Environmental Policy Institute, the National Audubon Society, and the National Wildlife Federation support these legislative initiatives in your amendment.

Sincerely,

BRENT BLACKWELDER, *Director, International Resources Project.*

Mr. LUGAR. Mr. President, the Senator from Rhode Island, my distinguished colleague, has presented a number of important and interesting ideas in this amendment. It is an amendment which I know from personal experience is important and in fact is being pressed by a number of important environmental organizations in our country that have an interest in international aspects of the environment.

Unhappily, and I say this respectfully to my colleague, this amendment arises late in the game; namely, during the course of this debate. The full implications of this amendment cannot clearly be foreseen, and they are important.

I have expressed these views privately to my colleague. I would hope to explore much more fully those implications and hold a committee hearing.

I would like to suggest, respectfully, to my colleague that the Foreign Relations Committee conduct a hearing, or hearings, on the Pell amendment, and I would pledge to work with him on having a markup so that we would have definitive action on the amendment. In that way, the public policy interests might be better served in refinement of those ideas, but I must confess I am not able to comprehend them on first impression.

Mr. PELL. Mr. President, I appreciate very much indeed the words of the Senator from Indiana. I concur in his generous offer and ask that my amendment be withdrawn.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 131

(Purpose: To require reports to the Congress on the foreign debt crisis in Latin America)

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Massachusetts [Mr. KENNEDY] proposes an amendment numbered 131.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 64, between lines 16 and 17, insert the following:

REPORTS ON FOREIGN DEBT IN LATIN AMERICA

SEC. 914. (a) The Congress finds that—

(1) the foreign debt of Latin American countries has soared from $27 billion in 1970 to over $350 billion in 1983;

(2) the foreign debt of Latin American countries is a serious obstacle to their economic progress, threatens their stability, and endangers the democratic processes in those nations;

(3) the economic and political futures of many of the Latin American countries hang in the balance and depend upon a successful resolution of the foreign debt crisis; and

(4) the confidence of the American people in the United States system of banking is also involved in a successful resolution of the foreign debt crisis.

(b)(1) Not later than October 1, 1985, the Secretary of State shall prepare and transmit to the Congress a report on—

(A) the magnitude of the foreign debt crisis in this hemisphere;

(B) the impact of the foreign debt crisis on the economies of the nations of Latin America;

(C) the degree to which the national security interests of the United States are implicated in this crisis; and

(D) the steps being taken and the policy being pursued by the United States aimed at dealing with this crisis.

(2) Not later than October 1, 1985, the Secretary of the Treasury shall prepare and transmit to the Congress a report on—

(A) the degree to which the foreign debt crisis affects the system of banking in the United States; and

(B) the steps being taken and the policy being pursued by the Department of the Treasury aimed at dealing with this crisis.

On page 64, line 18, strike out "Sec. 914." and insert in lieu thereof "Sec. 915."

Mr. KENNEDY. Mr. President, this amendment requests the Secretary of State and the Secretary of the Treasury to report to the Congress on the magnitude of the foreign debt crisis and on the implications of the crisis for U.S. national security interests and on what steps the United States is taking to deal with the crisis.

Mr. President, perhaps the most perplexing and troubling aspect of Congress never-ending debate about Nicaragua is that, in our fixation with the Sandinistas, we have lost sight of what is, without doubt, one of the most serious threats to democracy in this hemisphere in the past 25 years, the foreign debt crisis. According to the report of the Inter-American Dialogue published a year ago:

No single year in the last 50 was more disastrous for the economies of Latin America and the Caribbean than 1983 * * * The very economic and political futures of many of the Latin American countries are in the balance.

In the face of such a serious threat to the stability of our hemisphere and to the future of democracy in Latin America, there seems to be little if any sense of urgency, either in Congress or in the administration. One searches in vain, for example, for any mention of the foreign debt crisis in the foreign aid bill.

It is time that we acknowledged the following facts:

This crisis is unique in our history. The foreign debt crisis has no analog in the history of our hemisphere. It is not simply a problem of working out a series of repayment schedules or of rolling over the debt ad infinitum. The magnitude and the complexity of this crisis are simply too great to treat it with a business as usual attitude. Developments inside the United States have, in fact, made the problem much worse, not better. As the report of the Inter-American Dialogue put it:

The present combination of large public sector deficits (in the United States), high interest rates, and an overvalued dollar overwhelms the efforts of Latin American countries to emerge from the debt crisis and to restore sustainable growth * * * Unless the United States puts it financial accounts in order, its own economic prosperity and that of the whole hemisphere will be at risk.

Which brings me to the next point.

The stakes are high. Vital interests of the United States—at home and abroad—are seriously implicated in the foreign debt crisis. If the new democracies of Argentina, Brazil, Uruguay, and Peru are not permitted to succeed, Nicaragua may be just a taste of what the future holds for countries that are of far greater importance to the United States than Nicaragua could ever be. And it is of no less importance to hundreds of U.S. banks whose very survival may be in the balance if these loans go bad. Our banking institutions are precarious enough as it is. It would be no exaggeration to suggest that a default on over $350 billion in loans could have a catastrophic effect on our entire system of banking.

People are suffering today. Last week, I met with the Governor of the State of Rio de Janeiro, Lionel Brizola, who told me that millions of people are going hungry today because of the

pressure on the central Government of Brazil to make regular payments on its debt. This kind of hardship can only lead to the kind of political instability that will undermine the fledgling democracy in Brazil.

Both Congress and the administration must recognize that the crisis of the foreign debt in Latin America is not just a technical banking problem; it is quintessentially a problem of foreign policy. Our Nation's vital interests are at stake,

This amendment is a modest effort to focus our attention and to focus the attention of the administration on this crisis. This amendment simply requests the Secretary of State to report to the Congress, before the end of this fiscal year, on the following matters:

The magnitude of the foreign debt crisis in this hemisphere; the impact of the foreign debt crisis on the economics of the nations of Latin America; the degree to which the national security interests of the United States are implicated in this crisis; and the step being taken and the policy being pursued at the present time by the United States to deal with this crisis.

This amendment also requests the Secretary of the Treasury to submit a comparable report to Congress on the degree to which the foreign debt crisis affects the system of banking in the United States; and the steps being taken and the policy being pursued by the Department of the Treasury aimed at dealing with this crisis.

Mr. President, this is an extremely important matter, one of enormous significance to the countries in Central and South America, many of which have moved now toward democratic institutions and democracies: Argentina with Alfonsin, Brazil, and other countries in the hemisphere. The problems are very deep and they do affect American banking institutions.

It seems to me that it would be wise for us, as a matter of public policy, to have information of this nature available to the Members of the Senate, the Congress, and the American people.

I have had the opportunity to talk this over briefly with the floor manager and the ranking minority member. I hope they would be willing to accept this amendment.

Mr. CHILES. Mr. President, I rise to echo the concerns expressed by my colleague from Massachusetts on the present debt crisis in Latin America. The debt problems of the Latin American region have not been solved and, indeed, demand the attention of this country.

Equally, Congress must begin to examine whether proposed U.S. assistance programs to the region represent appropriate measures for dealing with the region's deteriorating economic situation; a deterioration reflected in the growing security concerns we have in the region and the accelerated political changes we are seeing all over Latin America. To date, I do not believe that the State Department has adequately addressed this problem.

For example, Bolivia, which is $3.7 billion in debt and faces a debt service ratio in excess of 100 percent, has an economy which has been described as imploding. Bolivia has an annual inflation rate in excess of 1,000 percent; a fiscal deficit in excess of 28 percent of its gross domestic product, and unemployment reportedly as high as 40 percent. Bolivia is over $1 billion in arrears on its debt service. The government has all but repudiated its external debts and an IMF stabilization program is out of the question. Nonetheless, the State Department response is to offer $10 million in cash transfer. I cannot understand how $10 million can substantially help a country over $1 billion in arrears on its debt service.

Bolivia is not the only country in trouble. Peru is also in arrears on its debt service. Argentina recently fell out of compliance with its agreement with the International Monetary Fund.

This crisis is real. It affects all of us, and it is getting worse.

Last November we sent a staff group from the Budget and Appropriations Committees to the Dominican Republic, Panama, Colombia, Peru, Bolivia, and Argentina to look into the debt crisis. Their report is very illuminating and I commend it to the attention of all my colleagues. I ask unanimous consent it be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

FIELD SURVEY: UNITED STATES ASSISTANCE PROGRAMS—LATIN AMERICA

ASSISTANCE OBJECTIVES

Congress has appropriated for fiscal year 1985 $909 million in economic and developmental aid and $280 million in security assistance to Latin American nations. The President's 1986 budget request is expected to include increased assistance to the region, and possibly a request for supplemental funding for FY 1985. These figures may be compared with fiscal year 1980 assistance levels of $272 million for economic and developmental aid and $22 million for security assistance. Such dramatic increases reflect broad acceptance of the underlying premise of U.S. foreign assistance programs. Specifically, foreign economic aid is justified as contributing to a stable world order both by blunting short-term political unrest arising from economic and financial instability and by promoting long-term social and economic development. Military aid is justified as improving America's defense capabilities and improving relationships with regional friends and allies. Foreign assistance, both security and developmental, are said to be major factors in our ability to help friends and allies meet economic, political and social challenges. These are the stated objectives of the Reagan Administration's foreign assistance programs as articulated to the Congress.

Consequently, it is highly appropriate to review current U.S. foreign assistance programs in Latin America, as well as the Administration's proposals for continuing and expanding that assistance, both in terms of the actual conditions which exist in the region and the contribution these programs make to the larger goals which such assistance programs are intended to serve. To do otherwise, to consider these proposals without reference to the political, economic and military realities of Latin America, would make it impossible to evaluate the ability of U.S. foreign assistance programs to effect these stated objectives. Today, in Latin America, this means that one must examine whether proposed U.S. foreign assistance programs represent appropriate measures for dealing with the region's deteriorating economic situation; a deterioration which is reflected in the heightened security concerns and accelerated political changes which characterize the region.

COMMON FACTORS AFFECTING STABILITY

U.S. economic and security assistance program for Latin America are seen as contributing to political stability and economic development by responding to the following disruptive influences:

International debt as a contributing factor in economic and political destabilization;

Internal economic conditions and insurgent political movements as threats to nascent democracies; and

Illicit narcotics production and trafficking as a corrosive influence on the economy and polity of certain countries in Latin America.

To examine the accuracy of this view, in November 1984, we travelled to Latin America, visiting a total of seven countries. The countries visited were carefully chosen because they all have certain commonalities which commend them to a comparative review, although it is also true that they have many other characteristics which distinguish one from another. The countries visited were the Dominican Republic, Panama, Colombia, Peru, Bolivia, and Argentina. These countries are all nascent democracies burdened by heavy external debts. Each is considered important to U.S. foreign and security interests. Moreover, each of these countries represent a different stage of political and economic development along a continuum. Without drawing too fine a distinction, it can be said that they represent different points along a continuum measuring political and economic stability. As will be seen, we found that U.S. foreign assistance programs are often blind to these differences and give too great an emphasis to the promotion of short-term stability. Furthermore, we believe this misplaced emphasis frequently occurs at the expense of the larger goal of helping countries move along the continuum towards the greater stability and development which is the mark of mature democracies.

DIVERGENT POLICIES

In our visits to these seven nations, we were struck by the increasing divergence between rational long-term economic policies and short-term political demands. Bolivia represents the most extreme example, where short-term political dynamics have completely captured the decision-making process, thereby rendering the government incapable of halting a marked economic decline. This has left Bolivia with an annual inflation rate in excess of 1,000 percent, debt payments which exceed export earn-

ings, a fiscal deficit in excess of 28% of gross domestic product (GDP) and virtually unchecked growth in the money supply. As will be discussed more fully in the section of this report which deals with Bolivia, we found that current and proposed assistance to Bolivia is recognized by knowledgeable U.S. officials to be wholly inadequate with respect to the magnitude of the amounts required to restore economic order. Furthermore, continued U.S. assistance does not respond to the inability of the Bolivian government as presently constituted to make any meaningful use of such assistance. Increased U.S. assistance, specifically, recent and projected cash transfers, will provide little ecomonic benefit, but may well serve to extend ineffective government in Boliva. Nevertheless, we learned that the U.S. Agency for International Development and the State Department propose to provide Bolivia $20 million in economic support funds in 1986.

Colombia, on the other hand, presented a more favorable picture. It is likely to be successful in controlling this political-economic divergence, providing the government does not succumb to increasing domestic political pressures. The government of President Belisario Betancur Cuartas has been attempting to pursue economic policies aimed at encouraging long-term development. Rapidly increasing debt service requirements, however, have hampered the government's ability to finance development projects. Because he has been unable to respond to political pressure from groups demanding continued high government spending for development, President Betancur's popularity has declined sharply. In time, perhaps in short order, this may force the Colombian government to take politically popular, but economically undesirable, decisions. While at present the United States provides no economic assistance to Colombia; the United States, may want to consider, working through multilateral institutions, such as the Inter-American Development Bank or the IMF, assisting the Colombian government in its efforts to achieve economic reform.

CURRENT ECONOMIC AND POLITICAL PRESSURES

The situation facing the Betancur government is not unique. Political stability and economic development in the countries we visited is being hindered by the burden of heavy external debt and the insatiable demands of historically deprived and violatile electorates. These debt burdens were incurred during the late 1970s and early 1980s by governments attempting to ease economic and political pressures and maintain standards of living in the face of global recession. Repayment difficulties were further exacerbated by the increasing prices of imported energy and the falling prices for exported commodities in this same period. While South American economies continued to grow in this period, this growth was largely financed with borrowed capital from Western banks.

At present, each of the countries we visited is simultaneously confronted by:

Global economic conditions which impose varying degrees of hardship on their respective national economies;

The harmful after-effects of economic mistakes and burdens incurred by previous governments; and,

The demands of electorates which assume that their present governments, though newly established and imperfect democracies, should be able to satisfy immediately both political and economic needs.

These conditions and expectations undercut the ability of the governments in the region to pursue rational economic policies. In consequence, sound political responses, which take into account economic realities and lay the groundwork for stable government, are often swept away by the flood of competing demands.

PARADOX OF CAPITAL EXPORTS

While these influences are strongly felt in the United States and other developed nations, in Latin America their effect is compounded by such factors as a marked decline in capital inflow and a marked increase in capital outflow from Latin America to the United States and Western Europe. In Latin America, we find the paradox that developing countries, which in accordance with classical economic theory, should be importing capital to offset a chronic lack of sufficient investment to spur economic growth, are currently net exporters of capital. This outflow has occurred as investors take advantage of the high returns on investment opportunities and interest rates in the industrialized nations. In 1981, capital inflow to Latin America (largely borrowings) was at a record $38 billion; in 1984, Latin America became a net exporter of capital—at a time when payments for interest and principal on a large volume of previously contracted foreign debts were accelerating. Additionally, the monetary and budget policies of the United States and other industrialized countries made access to additional external credit too costly. Simply put, Latin American countries were no longer able to borrow sufficient funds to finance development and debt service.

EXPECTATIONS OF U.S. ASSISTANCE

It is ironic that countries which undertook political reform with the encouragement of the United States and Western Europe, and with the expectation that the adoption of democratic institutions would be rewarded by increasing flows of financial assistance, now find that the economic policies of the industrialized nations work to their disadvantage. This has led many of these countries to conclude that their economic futures are at the mercy of international financial institutions and private banks which appear quite willing to sacrifice new and fragile political institutions on the alter of economic austerity. The expectation on the part of these countries that the Western democracies, particularly the United States, would soften the impact of austerity and support an extended period of adjustment has not been realized. In point of fact, it is questionable whether U.S. economic assistance programs, which also include U.S.-supported multilateral programs, could approach what is required to finance such a transition. It is evident that the strength of private banking would have to carry the largest share of any such financing program.

"MUDDLING THROUGH"

While it is commonly recognized that austerity measures are required to reverse economic decline, in the absence of a comprehensive program to finance what may be termed graduated austerity, the unfortunate political tendency in these countries is to try to "muddle through." Obviously this is not a workable solution and only exacerbates fundamental economic problems. The ability of many of these nations to strike a balance between political and economic imperatives is being tested as never before. The answer, however, must be found; and soon, for the longer these issues are put off, the more acute the economic situation will become and, consequently, the more difficult the political choices.

EXERTING U.S. INFLUENCE

Equally, delaying decisions needed to deal with deteriorating economic conditions makes it more difficult and more costly for the United States to effectively contribute to the development of stable and economically viable democracies. If at present, it is costly and difficult to make this contribution—and it is—in time it will be even more so. We must recognize the means available to exert U.S. influence are limited. The U.S. can:

Undertake domestic economic policies which reduce the export of capital to the United States and which create a favorable trade environment;

Take a more active role within multilateral institutions, such as the IMF, to ensure that adjustment programs are appropriate;

Adopt regulatory changes which would more directly involve private banking in the adjustment process; and,

Structure and implement bilateral aid programs which are supportive of, and not a substitute for, an integrated structural adjustment program.

Clearly, U.S. domestic economic policies could be structured to have an enormously beneficial impact on the situation. However, we learned that U.S. domestic economic policies are having an extremely detrimental impact on Latin American economies. It must be noted, that two-thirds of the total debt of the Latin American region has been contracted at floating interest rates. Knowledgeable officials in several of the capitals we visited told us that current U.S. policies, associated with high interest rates, are responsible for unanticipated and increasingly burdensome debt service costs. This problem, they told us, is compounded by the acceleration of outward capital flows encouraged by the same economic policies. The willingness of the United States to accept large trade imbalances, and thus increase the export incomes of foreign countries has but a marginal effect in these countries which, apart from Argentina, have relatively little of value to export. In the views of these officials, U.S. trade imbalances do not adequately compensate for the high interest rates and capital flight being experienced in the region.

ROLE OF PRIVATE BANKING

Since the largest portion of Latin America's debt, is held by the IMF and private banks, the U.S. role in multilateral institutions and in exercising influence over the private banks offers great potential to bring positive change. However, U.S. participation in multinational banking is often in conflict with the goal of achieving stable and economically viable democracies. In its relationships with the IMF, the multilateral development banks and commercial banking, the U.S. too often succumbs to the overriding objective of these institutions, namely the preservation of the Bretton Woods system. The banks and the IMF seek, with active U.S. participation, to enforce the repayment norms which are part of that system. The private banks and the IMF are by their charters indifferent to the nature or form of the governments which participate in sovereign borrowing. Their sole objective is to maintain the existing international financial system. In consequence, nascent democracies, such as Argentina, which have succeeded "borrow-and-spend" authoritarian governments, are held to repayment sched-

ules which bear little relationship to the new government's stability or its capacity to meet such repayment schedules. As the IMF and the banks adhere to the code of austerity and rigidly insist upon prompt repayment, they effect a gradual but certain impoverishment of these countries. Under conditions of rigid austerity, there is no opportunity for growth, for an increase in capacities to service debt and to satisfy consumer demands; there is only the requirement that governments somewhow achieve a revenue surplus which can be used to repay existing debt—a requirement that wealth be transferred from poor in the developing countries to the rich in the developed.

Earlier in this paper, we noted that there is common recognition of the need for austerity measures to halt economic decline in Latin America. There is equally broad agreement that austerity measures will fail if taken without regard to differences in the capacities of the respective countries to withstand the rigors of austerity. Furthermore, such measures will fail if they are not constructed so as to visibly enhance prospects for positive economic growth. This is what we mean by the term graduated austerity.

The rigid application of IMF inspired austerity measures has two predictable results: (1) it leads to failures to achieve the provisions of the structural adjustment programs and, thus, their subsequent collapse; and, (2) as a corollary, if all countries were to pursue austerity, the global economy would collapse inward and, rather than preserving the Bretton Woods system, austerity would lead to its demise.

Thus, powerful arguments exist for easier repayment terms. Not only did the present democratic governments not contract the debt, to a large extent they also never received much long-term benefit from it since much of borrowing was squandered on unwarranted military purchases and ill-conceived development programs. Furthermore, authoritarian governments which faced no serious monitoring by legal oppositions allowed, and in some cases encouraged, the flight of capital abroad. Equally, lending institutions did not place responsible constraints on the amounts and terms of the loans made to these governments. In an effort to recycle "petrodollars" in the late 1970s and early 1980s, banks, through unconstrained lending, allowed these authoritarian regimes to mortgage their countries' economic futures.

CONSTRAINTS OF THE BRETTON WOODS SYSTEM

Not withstanding these arguments, the banks appear anxious to maintain the existing arrangements for dealing with countries facing debt crises (specifically, using the IMF as the primary agent for establishing economic conditionality by using the Fund agreements with individual governments as precursors to the renegotiation of privately held loans). Neither the Administration, the IMF nor the private banks appear to the undertaking positive action adequate to deal with the potential unraveling of that system. There are, however, increasing signs that the countries of the region are no longer willing to blindly adhere to a system which is increasingly at odds with their political and economic aspirations. While we would not want to place too great an emphasis upon this point, nonetheless it is significant that officials of various governments in the region talk of establishing a "debtor's cartel" (the Cartegena Group) as a means of protecting the interests of debtors.

Moreover, this newfound resolve on the part of debtors to question the existing system is echoed in expressions of concern by IMF and bank representatives that certain governments are apparently unwilling or unable to negotiate in good faith. Questions as to the continued viability of IMF agreements as a means of guaranteeing economic adjustment are being raised. Indeed, it is broadly accepted that the value of IMF adjustment programs is being debased as debtor countries attempt to cope with the difference between what they are required to say they will do to secure further financing and what they know will be beyond their capacity after thay have obtained such financing. This is demonstrated by the increasing incidence of renegotiation of IMF adjustment programs before they have run their course. These unrealistic requirements for policy change have prompted officials in the Dominican Republic, Colombia, Peru and Bolivia to express desires to circumvent IMF agreements as prerequisites to further U.S. economic aid or the renegotiation of debts held by private banks. The Dominican Republic, for example, recently secured the disbursement of $50 million in U.S. economic support fund financing prior to final agreement on an IMF approved economic plan.

A POLICY OF INSUFFICIENCY

The Dominican Republic secured this extraordinary infusion of U.S. bilateral aid by successfully arguing that these funds were needed to avoid a recurrence of the riots and political unrest which followed last April's efforts to implement an IMF approved program for economic stabilization. It remains to be seen whether this extraordinary assistance will enable the Dominican Republic to undertake a revived and more realistic IMF adjustment program, or whether the $50 million, because it is insufficient or inappropriate, will have no beneficial impact. What must be proven is that the disbursement of this $50 million, if it is to be considered sufficient and appropriate, is linked to a sustainable program of adjustment which corresponds to the concept of graduated austerity.

Current U.S. economic assistance funding often functions as a placebo. Because these programs are driven by the foreign policy objectives of demonstrating support to nascent democracies and short-term considerations relating to the maintenance of political relationships with various governments, more often than not they simply subsidize failing economies. However, the level of subsidy is insufficient to gain any real economic policy advantage or to substantially alleviate the human suffering associated with deteriorating economic conditions. For example, internal State Department proposals to give Bolivia a $20 million cash transfer in the context of a country which, at the end of 1984, was well over $1 billion in arrears on its public and private sector debt, are, in our judgment, so politically and economically irrelevant as to be absurd.

The United States must develop a systematic and cohesive approach for dealing with the region's economic crisis. Such an approach would have to recognize the weaknesses of the current system of debt management. The present system remains heedless to internal political dynamics; provides insufficient assurance that these countries actually implement the economic reforms agreed to as part of debt management proposals; does not afford positive opportunities for these countries to improve their own economic conditions while meeting past debt obligations; and, finally, does not shield these countries from the unintentional negative impacts of the economic policies of the industrialized world, particularly the United States. Since there is not a concerted approach, the benefits from one set of activities are frequently nullified by the damage caused by other actions.

It is critically important that proposals for future U.S. aid programs to the region be evaluated as to their potential to actually contribute to economic recovery and give full consideration to the recipient nation's economic woes. Palliatives, such as the proposed cash transfer to Bolivia or further balance of payments support to Peru while foreign military purchases continue unabated, only contribute to the continued deferral of necessary economic and political choices.

The United States is appropriately favoring democratic governments in the region over authoritarian alternatives, even though some of these alternatives offer the illusion of being more able to survive the political repercussions of harsh but necessary economic reforms. While this democratic preference is a worthy consideration, the United States cannot base continued economic support to countries in the region simply because they maintain a facade of "democracy." Governments which seek to lay claim to that title must demonstrate that they are prepared to manage government finances through civilian institutions which are accountable to the people through their elected representatives. Democracies which are unable to build solid economic foundations will not be able to develop long-term political stability. In this sense, the United States can best promote democracy by nurturing "good government" and by supporting those governments that are willing to consistently undertake rational economic policies within realistic political frameworks. To finance failure not only wastes U.S. tax dollars, but also raises questions in the region as to the desirability of democratic governments and the ability of the United States to act as an intelligent and capable ally.

NARCOTICS

As an adjunct to our review of U.S. economic and security assistance programs, we also examined the effectiveness of U.S. supported activities to counter the corrosive influence of illicit narcotics production and trafficking on political and economic stability in certain of the countries we visited.

Clearly the control and suppression of narcotics is of significance not only to Latin American countries, who wish to free themselves from the corruption and violence associated with the drug trade, but also to the United States, which in addition to corruption and violence, suffers enormously from the destructive influence of narcotics on our youth. It should not be forgotten, that while Latin American countries are the producers of illicit narcotics, it is we who are the consumers.

U.S. narcotics control assistance has registered dramatic successes in the control and eradication of narcotics substances in many regions of Latin-America, especially in Mexico and Colombia. At great personal risk, anti-narcotics officers of the United States and local governments have tirelessly pursued those who profit from this trade. Unhappily, the narcotics traffickers continue to flourish and interdiction and eradication efforts in the region appear to have passed the point of diminishing returns. Al-

though recent efforts directed against concaine processing laboratories in the region have resulted in several spectacular and well-publicized cocaine seizures, the Miami police department's vice and narcotics squad reports that wholesale prices of cocaine dropped from $60,000 a kilo to just over $20,000 a kilo in 1984. A major increase in street prices should have occurred if cocaine imports were significantly constrained or disrupted by a the Colombian seizures. Yet, as noted, the price continued to drop following the large seizures of Colombian cocaine.

In meetings with knowledgeable U.S. and local officials, we learned that the amount of money derived from illicit narcotics trafficking, which flows into the national economies of Latin America is vastly overstated. This is not to say that substantial money flows are not associated with the narcotics trade. Rather, the money which comes from the production and sale of narcotics remains largely outside the producting nation. For example, Colombia, which produces 75 percent of the cocaine and 66 percent of the marijuana entering the United States, is estimated to see only $400 million returned to the national economy. U.S. officials in Colombia estimate that if the drug trade were to be completely eradicated, the economic impact would be less than one-and-a-half of Colombia's GDP. The impact of narcotics money on the economies of Latin America is further diluted because narcotics traffickers seldom use their repatriated profits for capital investment, but rather for conspicuous consumption.

Furthermore, while we note that on a national level the economic impact of the narcotics trade is negligible, many Latin American economies are so unevenly distributed that in impoverished regions, the money derived from illicit trafficking can have a disproportionate if not controlling influence. Invariably, it is in these regions that narcotics trafficking is most deeply entrenched. Crop substitution or eradication programs are stymied by the undeniable evidence that production of narcotics is the most profitable cash crop and that narcotics producing plants are among the heartiest found in nature and grow virtually everywhere. This makes it prohibitively costly to "buy off" the small producer or to completely destroy the crop.

New approaches need to be developed which would directly attack the incentive structure for dealing in narcotics. Specifically, new approaches are needed to:

Lower the demand for illicit drugs;

Disrupt the enormous money flow associated with these activities (much of which flows through reputable banking institutions); and,

Arrest, extradite and imprison major narcotics traffickers.

In the absence of such measures, sizeable new investments in narcotics interdiction and eradication should be limited since their overall impact on the problem is likely to be negligible.

DOMINICAN REPUBLIC

Economic Situation

With prudent management, and some outside assistance, the Dominican Republic should be able to arrest the decline in its economic situation. This Caribbean country has managed to substain modest real growth (+3.9 percent in 1983) despite continued depressed prices in the international markets for its primary exports (sugar and ferronickel) and an overvalued currency. U.S. Embassy and Dominican officials, as well as private bank representatives, all agree that if the government takes appropriate measures to establish a hospitable environment, significant potential exists for outside investment in non-traditional areas, such as specialty fruits for export to the United States.

The depth of the economic crisis facing the Dominican Republic should not be underestimated. The Gross Domestic Product (GDP) is not expected to grow significantly in 1984 and per capita GDP is forecast to decline. Unemployment now exceeds 24 percent of the workforce and is projected to grow in 1985. Per capita income stands at around $525 per year, nearly one-half 1980 levels. Inflation in 1984 was approximately 30 percent and is forecast to be even higher in 1985.

As of December 1984, the Dominican Republic's external liabilities, including accumulated debt arrearages, exceeded $3 billion. That this debt places an extraordinary burden on the economy is shown by the fact that debt service requirements for 1984 will total $729 million, almost one-third of the total 1983 GDP. This problem has been growing at least since 1978 when balance-of-payments difficulties began to worsen. For 1984, cash flow analysis forecast Central Bank reserve losses of some $400 million. Accelerating losses are demonstrated by the fact that while 1984 losses alone will total some $400 million, the cumulative deficit accured during the 1978-1982 period was $768 million. The balance-of-payments situation had become so acute that by December 1984, the Dominican Republic effectively suspended external debt service payments pending an IMF stand-by agreement and a hoped for rescheduling of debts held by private banks.

To recover control of its economy, it is estimated that the Dominican Republic must reschedule in 1985 about $570 million in debts on commercial bank and government loans. A substantial portion of this $570 million is in arrears from 1983 and 1984 and consequently renegotiation will be costly because, in accordance with customary practice, past due interest must be paid.

Negotiations on a new IMF agreement have been protracted. The Dominican government has claimed that IMF conditionality is politically unacceptable. This assessment has been based in part on the government's fear of a recurrence of the April 1984 riots which followed an earlier IMF agreement. These riots, which left 60 people dead, were triggered by the government's decision to raise cooking oil prices to market levels, pursuant to conditionality provisions which required a reduction in government subsidies. In August 1984, the Dominican government produced an Economic Policy Statement outlining a comprehensive adjustment program. This document has served as the basis for current negotiations toward a 1985 agreement with the IMF, leading to additional IMF adjustment financing.

Larely in anticipation that an agreement with the IMF would be reached, the United States, in December 1984, disbursed $50 million in economic support fund grants. These funds were part of the $95 million programmed for the Dominican Republic in accordance with Congressional directives. It must be underscored that this disbursement was made prior to the conclusion of an IMF agreement. It was made with the expectation that the Dominican Republic would institute economic reforms, to include unification of the exchange rate, reduction of fiscal imbalances and a rescheduling of debt payments. Since the United States disbursed these funds to support a government prior to conclusion of an IMF agreement, this action marks somewhat of a departure. In contrast to established practice, the United States advanced these funds with the understanding that doing so would encourage the Dominican Republic to follow through on its announced intentions for economic reform. The unintended effect of this infusion of cash, however, may be to make it easier for the Dominican government to defer action on the more difficult policy reforms required by the IMF and the private banks. Therefore, unless the United States acts to ensure that this funding facilitates a comprehensive effort by all parties involved to assist the Dominican Republic in extricating itself from its economic prediciment, it may actually be counterproductive.

Political Situation

The government of President Salvador Jorge Blanco appears to be committed to economic reform. However, since 1983, splits within the ruling Revolutionary Democratic Party (PRD) appear to be limiting Jorge's ability to move ahead with economic adjustment measures, especially those designed to increase tax revenues. This situation is exacerbated further by elections scheduled for this year and the search for a successor to Jorge Blanco.

The willingness of the Dominican legislature to act positively and promptly on an austerity package will be a crucial factor in the Dominican Republic's ability to meet any new conditions imposed by an IMF agreement. While the executive has demonstrated the political will to carry out an adjustment program, the willingness of the Dominican congress to support budget cuts and tax increases in an election year is unclear.

Not to be forgotten is the fact that there is a violatile electorate in the Dominican Republic. Some 40 percent of the population lives below the poverty line. As a result of economic reforms, prices of basic staples have steadily risen at a time when real wages were declining. Of necessity, conditionality is likely to force further increases in prices, which hit hard on the poorest sectors of society. Consequently, if the United States expects to see the Dominican Republic successfully implement appropriate economic policies, it must make every effort to ease the political costs of implementing those policies.

PANAMA

Economic Situation

The overall Panamanian situation appears to be one of slow but continued deterioration. The Panamanian economy has been at a virtual standstill since 1983. This be attributed largely to a slackening of world trade brought on by the global recession and a sharp decline in the demand for traditional exports of goods and services. The economic outlook will worsen in 1985 and 1986 because projected government revenues will fail to keep pace with scheduled increases in debt service costs. This will limit the government's ability to maintain current services and could arouse resistance to necessary austerity measures.

Panama is facing a public debt of some $3.4 billion, of which $700 million was due at the end of 1984. With IMF financing, it is expected that Panama will experience only a shortfall of $35 million in financing 1984 expenditures. In 1985, the gap between gov-

ernment obligations and revenues is projected to grow to $75 million.

The Administration is considering a $40 million cash transfer to help fill this gap; although, obviously, this amount is insufficient to meet Panama's projected need. We do not know of any decision to condition future economic support fund disbursements on the maintenance of an economic reform program by the new Panamanian President and legislature which was convened in November 1984. In December 1984, in response to widespread public protest, President Nicholas Barletta announced he would withdraw his government's economic reform program. Unless a meaningful economic reform program in instituted, and soon, U.S. assistance funds will be among those lost to the perpetuation of inefficient and ineffective economic policies.

Panama's ability to adjust monetary policy to meet short-term political needs is constrained because the Panamanian currency is the U.S. dollar. Since Panama cannot print money to finance the government's budget deficit, certain political choices are more painful. For example, Panama's ability to create jobs through currency inflation is limited; yet, job creation is very important to maintaining social and political stability. The key benefit to maintaining the dollar as the unit of currency, is that a weak government is prevented from moving the country into an inflationary spiral.

Political Situation

This year's Panamanian election is generally acknowledged to have been "flawed." There is universal recognition in Panama that the Presidential elections were not fair, and that President Barletta was installed in office by the National Guard. Nonetheless, many people (including Barletta opponents) believe that Barletta did receive nearly 50% of the vote and this represents some kind of mandate. Equally, many believe that if his opponent, Arnulfo Arias, had been elected, he would not have been allowed to take office.

Barletta is seen by some to be freer from National Guard influence than previously thought. Questions relating to the conduct of the election may weaken his ability to carry-out broad-scale and unpopular economic reforms. In this context, it does not seem appropriate for the United States to initiate cash transfers until policy reforms are fully articulated and actually underway. Then, it would be appropriate for the United States to step in and provide visible support to President Barletta through assistance which moderates the impact of austerity on the most vulnerable elements of Panamanian society.

COLOMBIA

Economic Situation

Although the current state of the Colombia's economy appears healthy, many observers believe that external debt service requirements may precipitate an economic crisis in the next two to three years. Colombia is facing very heavy capital payments in this period. In 1982 debt service payments were $250 million. In 1985, these payments will climb steeply to $730 million. Consequently, in 1985, a balance-of-payments shortfall exceeding $1 billion is expected to wipe out Colombia's remaining hard currency reserves. This balance-of-payments situation is expected to improve over time, but projections of current trends suggest an additional $500 million draw on hard currency reserves will come in 1986 and Colombia will be forced to seek external financing.

The next two years will be critical, Colombia must integrate a long-term development strategy (based on opening new coal and oil deposits which will be exploitable in the late 1980s) and, short-term policies designed to halt the erosion of hard currency reserves. This will be extremely difficult, because it appears that Colombia is mortgaging future income potential to meet the costs of short-term stabilization. For example, our conversations led us to believe that Colombia is considering selling coal futures in order to finance current budget shortfalls. If so, it is probable that they will be selling their future development potential at rock-bottom prices because current market prices for coal are depressed. Since much of the future income of these projects is already obligated to pay back development and production costs, the benefits of such a scheme are likely to marginal.

Over the years, Colombia has been conservative in its handling fiscal matters. Hence, Colombia has a relatively small external debt. In recent years, however, Colombia has been hurt by high interest rates which the Colombian Ministry of Finance has linked to the record U.S. budget deficit which it asserts have cost Colombia some $1.5 billion in increased interest payments. Additionally, Colombian government finances have been weakened by slow economic growth and reduced revenues from tax evasion.

Colombia does not presently have an IMF program. It does not receive economic assistance from the United States. Currently, Colombia is seeking to reschedule its commercial debts in the absence of an IMF agreement. Colombia intends to convince the commercial banks of its credit-worthiness by unilaterally undertaking an IMF-like economic austerity program. However, the banks have resisted and already indicated that they will not reschedule Colombia's debt in the absence of the legitimacy ascribed to an IMF sanctioned adjustment program. It is not clear whether the banks will continue to maintain this hardline position.

Political Situation

Colombia's political stability seems predicated on Betancur's ability to balance competing political interests—which range from a conservative establishment opposed to social change to leftist insurgencies demanding a fundamental re-ordering of society. Betancur's continuing ability to maintain this equilibrium will be challenged by new outside forces, particularly in the form of pressure exerted by the banks and the IMF as they seek to instill economic reforms in return for continued credit and eased debt service requirements.

Colombia's efforts to rationalize its economy could be disrupted by internal security considerations. Growing pressures for budget austerity have reduced the 1984 Colombian military budget to a level 30 percent less than the 1983 budget and the 1985 budget is expected to be 40 percent less than the 1984 budget. The total impact of these reductions is not clear, since the 1983 budget totals were unusually high and the potential remains for 1985 supplemental funding. However, this could be disastrous if the current truce with the insurgents breaks down and the level of fighting increases (requiring higher defense expenditures). In that case, increases in military expenditures would be driven by urgent requirements which would override budgetary considerations for austerity. Thus, in the Colombian situation, where spending on military items has been relatively modest, U.S. security assistance could meaningfully contribute to shielding economic reforms from the legitimate demands for increased military spending. Of course, Colombian military requirements would need to be carefully reviewed.

PERU

Economic Situation

Peru's economy is in a state of imminent collapse. This is largely due to the sharp contraction in international markets for Peru's main export commodities, a series of devastating natural disasters, and continued government mismanagement of the economy through interventions and subsidies, as well as excessive spending on capital investment projects of dubious value.

GDP, which had averaged approximately 4 percent growth in 1980-1981, fell by 12 percent in 1983 alone and continued to decline in 1984. As a result, by 1984, massive unemployment and the collapse of entire sectors of the economy had driven real per capita income to below 1963 levels. The public sector deficit, which was 1 percent of GDP in 1979 had grown to 11 percent of GDP in 1983. Under Peru's short-lived 1982 stand-by agreement with the IMF, the public sector deficit was not to exceed 4.1 percent of GDP in 1984. Nonetheless, the deficit was larger and is forecast to grow to 15 percent in 1985. By the end of 1984, Peru, having suspended payments on principal in March 1983, was some $400 million in arrears on interest payments to its $13.3 billion foreign debt. Including unpaid interest, Peru is scheduled to pay $1.6 billion to foreign creditors in 1985.

No one knows how this will be done. At present, because the government has financed on-going activities through the sale of dollar-denominated certificates, which are liquid claims, Peru actually has net negative reserves. Being a resource poor country, which has mortgaged the major portion of its foreign exchange-earning fishing industry to the Soviet Union to pay for arms purchases, it is highly unlikely that Peru can expand its remaining exports sufficiently to obtain the hard currency required to meet its overdue interest payments, let alone retire any principal. Beleaguered officials in the Peruvian government, told us that because of Peru's unfavorable reserve position, and the demands for foreign exchange to meet existing overdue obligations of interest and principal, a "mere rescheduling" would not ease the financial crisis. Peru needs "fresh" money, and in substantial amounts.

It is in this context that U.S. proposals to provide additional economic support funding must be evaluated.

It is questionable that additional U.S. assistance could have any utility. The government of President Fernando Belaunde Terry shows little sign of fiscal responsibility, and appears unable to set and enforce priorities. For example, in a declining economy with some 75 percent of government revenues already being spent on interest payments and military spending, the government has signed newly negotiated contracts with France for the purchase of 26 Mirage 2000 interceptor aircraft for the Peruvian air force. This $600 million deal is said to represent a victory for the armed forces over civilians who would have preferred to dedicate this hard currency to managing the present debt. It is indicative of the weakness of democratic institutions in Peru that, some four years after civilian rule was said to have replaced military control, the armed

forces are able to unilaterally commit government resources.

The ability of the IMF to secure Peruvian commitment to economic reform is questionable. Peru's former Prime Minister, Manuel Ulloa, resigned in late 1982, at least partially over disputes with President Belaunde over the government's commitment to maintaining the economic reforms which were conditions of their 1982 stand-by agreement with the IMF. Negotiations with the IMF have broken down completely, effectively precluding refinancing and rescheduling agreements with the private banks which will be necessary to stabilize Peru's economy. Such economic decisions have been put off until after a new president is installed in June.

Political Situation

The first round of Peruvian national elections are scheduled for April 1984. The political parties of the ruling center-right coalition have failed to build a coalition and, as a result, have splintered into three factions. This favors the prospects of the center-left APRA party, led by Alan Garcia, in the run-off election scheduled for May. Peru's electoral system, providing for run-off elections, virtually guarantees that the party of whomever is elected President will not have a majority in the legislature. Obviously, this could have negative implication for the new president's ability to implement economic reforms.

BOLIVIA

Economic Situation

Bolivia's economy has been described as "imploding". Inflation has surpassed an annual rate of 1,000 percent. Per capita income is the lowest in Latin America and declining. The country is $3.7 billion in debt and faces a debt service ratio over 100 percent. Bolivia is in its fourth year of real economic decline (real GDP fell 1.5 percent in 1981; 8.7 percent in 1982; 7.7 percent in 1983; and is expected to continue its decline in 1984 and 1985). The fiscal deficit is in excess of 28 percent of GDP; the Bolivian peso is overvalued by some 200 percent (in spite of a 75 percent devaluation in April 1984). Official unemployment is 12 percent, but real unemployment is reportedly as high as 40 percent in the cities. The money supply is growing at 100 billion pesos per month.

Even if the country had not been the victim of declining world commodity prices and the Andean drought, the economy would still be deteriorating because of ineffective economic policies that, for example, subsidize fuel prices to a level of $0.06 per gallon. In reference to this policy, a Bolivian cabinet minister noted that liter of gasoline costs less than the price of a cigarette. Tax rates are based on a 1970 census and peso rate. The government of President Hernan Siles Zuazo appears incapable of implementing economic reform. The real economy has shifted almost completely to the unofficial side.

The government has all but repudiated its external debts and has stopped payments since May 1984. An IMF stabilization program is out of the question at this point. Moreover, negotiations with the private banks have been suspended. Banks have disbanded groups formed for the purpose of negotiating with the government. The few U.S. banks which remain in La Paz are reduced to skelatal staffs and remain only to monitor the situation.

In this context, the State Department is considering granting a $20 million cash transfer to Bolivia, a country well over $1 billion in arrears on its debt service.

Political Situation

The Bolivian political scene is dominated by continuing conflict between the original leaders of Bolivia's 1952 revolution. These men include: Victor Paz Estenssoro, leader of Bolivia's largest opposition party; Siles Zuazo, the President; Juan Lechin, the leading trade unionist; and, Guillermo Lora, the Trotskyite theoretician of the powerful Bolivian worker's union. Their continued fractious approach to government has effectively frozen the decision-making process in Bolivia.

Perhaps the most surprising thing about the government of President Hernan Siles Zuazo is that it survived for two years. Siles Zuazo's National Revolutionary Movement of the Left and its allies won three successive elections in 1978, 1979 and 1980, but were prevented from taking office each time by military action or electoral fraud. Bolivia had ten different governments between 1977 and 1982. Since Siles Zuazo came to power in October 1982 there have been seven known coup attempts.

This instability and continued strangulation of the government, while preventing the effective day-to-day functioning of the government, has at least created pressures for change. A positive sign may be found in the decision, by consensus, to advance presidential elections to June 1985. It is, of course, questionable whether these elections will lead to the creation of a government capable of undertaking the painful steps of restructuring Bolvia's economy. In any case, the United States should husband scarce foreign assistance resources until it becomes clear that the new government is willing to undertake substantive reforms.

ARGENTINA

Economic Situation

The Argentine economy began a modest recovery in 1983, with GDP growing by 2.5 percent after a cumulative decline in 1981-1982 of 11 percent. This has been taken by some as a sign that the recession in Argentina has bottomed out. Nonetheless, while Argentina's economy is more robust than that of other Latin American countries, it still faces a $43 billion external debt; annual inflation of over 300 percent; declining government revenues (down by 1.5 percent of GDP in 1983) and a growing government budget deficit.

Moreover, the legacy of the previous military government, which had presided over an increase in external debt from $8 billion in 1975 to nearly $45 billion in late 1983, without a significant addition to the nation's capital base and infrastructure, has severely constrained the present democratic government's ability to deal with contemporary economic difficulties. Furthermore, the military, through incompetent management of the economy, brought disorganization and disruption to the entire system for producing goods and services. This legacy has made it extraordinary difficult for the present government to effectively use Argentina's economic strengths to produce and export in sufficient quantities to meet debt service requirements, and promote vigorous economic growth.

Argentina's economic problems appear resolvable. It has a broadly-based economy and is well-endowed with human and natural resources. If the country is not subjected to economic disasters (such as a collapse in commodity prices) and the government remains committed to maintaining its economic reform program sustained recovery and growth is possible. This will be tested by its adherence to the austerity plan associated with the latest IMF stand-by agreement which will require squeezing government wages.

Political Situation

Alfonsin's most powerful adversaries are the labor unions, particularly the Peronist-dominated labor federation. The unions have already expressed their reluctance to accept economic austerity measures. The unions claim that almost any alternative would be preferable to an IMF agreement and, as a consequence, they will not cooperate in wage reductions.

Furthermore, the unions will probably move to protect the jobs of rank and file members threatened by budget reductions. For example, Alfonsin is planning substantial cuts in Argentina's military budget. While in the wake of the Falklands/Malvinas debacle, the country might be willing to accept these reductions, Argentina has over 26,000 people employed in domestic arms industries. These workers are unionized and likely to have great influence on whether the government is able to follow through with the proposed cuts.

Alfonsin's government appears stable for now. Labor groups are expected to grow more resistive over the summer months, particularly if the government maintains its austerity program. Although the political role of the military has been limited since the elections, observers of the Argentine military question whether Alfonsin's impact has been more than superficial.

Mr. LUGAR. Mr. President, I commend the distinguished Senator from Massachusetts for a very useful amendment. It strengthens our bill. We are prepared to accept it on this side.

Mr. PELL. Mr. President, I think it is an excellent amendment. I am very glad to accept it for the Democrats.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there further debate on the amendment of the Senator from Massachusetts? If not, the question is on agreeing to the amendment.

The amendment (No. 131) was agreed to.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 132

(Purpose: To authorize appropriations to pay charges on shipments by certain private and voluntary organizations.)

Mr. KENNEDY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Massachusetts [Mr. KENNEDY] proposes an amendment numbered 132.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 36, after line 26, add the following:

OCEAN FREIGHT REIMBURSEMENT

SEC. 314. Section 123(b) of the Foreign Assistance Act of 1961 (22 U.S.C. 2151u(b)) is amended—

(1) by inserting "(1)" immediately after "(b)"; and

(2) by adding at the end thereof the following new paragraph:

"(2) In addition to funds otherwise available for such purpose, there are authorized to be appropriated to the President $20,000,000 to pay charges on shipments described in paragraph (1).".

Mr. KENNEDY. Mr. President, this amendment would add some $13 million to the $6.5 million requested by the administration in support of the ocean freight reimbursement, and earmarks it.

This is necessary because the administration has cut back by a half-million dollars on this account, precisely at the time when the voluntary agencies need it most. Also, the administration is refusing to use any of the supplemental appropriations we just passed for Africa to support ocean freight costs of the voluntary agencies, despite the strong legislative history that they should.

The tragedy in Africa has produced an extraordinary outpouring of generosity from the American people, much of it in terms of donated goods, food, and medicine and other essential items for the relief operation. Without some help in meeting the shipping costs, these goods will be lost.

Just a few miles from where we are this afternoon, in a warehouse in Maryland, there is $1.5 million in dated medicines that have been given to the Church World Service and they are sitting there because of the lack of ocean freight support.

This is one of AID's most cost-effective programs. For every $10 in essential good donated by the private sector, the Government only spends $1 to provide ocean shipping. These essential goods related to the relief efforts, not canned goods and luxury items.

I would like to inquire of the chairman and ranking minority member of the committee about their attitude on this issue.

Mr. LUGAR. Mr. President, as the distinguished Senator from Massachusetts knows, we are sympathetic to the needs of the voluntary agencies he has outlined, but we must oppose any additional funding in this bill. I agree that additional resources ought to be given to the ocean freight account to handle donations by Americans for the famine relief effort in Africa. And I also agree that AID should use some of the funds we have authorized recently in the emergency supplemental for Africa to cover ocean freight reimbursement as well as the inland transportation costs of voluntary agency programs.

On behalf of the Foreign Relations Committee, I would be pleased to write to the Administrator of AID to express my concern that AID should utilize the resources it has in a supplemental to respond to the ocean freight needs of the voluntary agencies. Would that be an acceptable course of action for the Senator?

Mr. KENNEDY. I want to thank the chairman of the Foreign Relations Committee for his response. It seems to me with the urging of the chairman of the Foreign Relations Committee and the ranking minority member that we could get some positive response for this fiscal year, and to have an opportunity if there was not a positive response to address this issue later at the time of the supplemental down the line. So I thank the chairman of the committee and the ranking minority member. With those assurances, Mr. President, I withdraw the amendment.

Mr. PELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. PELL. I would like to assure the Senator from Massachusetts that I would most gladly associate myself with the chairman in doing whatever we can to be of help in pressing along with this idea. It is a good idea, and one that I hope is achieved before too long.

The PRESIDING OFFICER. Without objection, the amendment is withdrawn.

AMENDMENT NO. 133

(Purpose: To encourage the preservation and protection of the cemeteries, monuments, and historic buildings associated with the foreign heritage of United States citizens)

Mr. KENNEDY. Mr. President, I send an amendment to the desk, and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Massachusetts [Mr. KENNEDY] for himself and Mr. MATHIAS, proposes an amendment numbered 133.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

That because the fabric of a society is strengthened by visible reminders of the historical roots of the society, it is in the national interest of the United States to preserve and protect the cemeteries, monuments, and historic buildings associated with the foreign heritage of United States citizens.

SEC. 2. There is established a commission to be known as the Commission for the Preservation of America's Heritage Abroad (hereafter in this Act referred to as the "Commission").

SEC. 3. The Commission shall—

(1) identify and publish a list of those cemeteries, monuments, and historic buildings located abroad which are associated with the foreign heritage of United States citizens, particularly those cemeteries, monuments, and buildings which are in danger of deterioration or destruction;

(2) encourage the preservation and protection of such cemeteries, monuments, and historic buildings by obtaining, where appropriate and in concurrence with the Department of State, assurances from foreign governments that the cemeteries, monuments, and buildings will be preserved and protected;

(3) sponsor or otherwise support demonstration projects to help preserve and protect such cemeteries, monuments, and historic buildings;

(4) prepare and disseminate reports on the condition of and the progress toward preserving and protecting such cemeteries, monuments, and historic buildings; and

(5) coordinate its efforts with the United States International Council on Monuments and Sites.

SEC. 4. (a) The Commission shall consist of five members appointed by the President.

(b) Members shall be appointed for terms of three years except—

(1) of such members first appointed—

(A) two shall be appointed for two years; and

(B) three shall be appointed for three years;

(2) a member appointed to fill a vacancy on the Commission shall serve for the remainder of the term for which the member's predecessor was appointed; and

(3) a member may retain membership on the Commission until the member's successor has been appointed.

(c) The President shall designate the chairman of the Commission from among its members.

(d) The Commission shall meet at least once every three months.

SEC. 5. (a) Members of the Commission shall receive no pay on account of their service on the Commission.

(b) While away from their homes or regular places of business in the performance of services for the Commission, members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5 of the United States Code.

SEC. 6. (a) The Commission may appoint such personnel (subject to the provisions of title 5 of the United States Code which govern appointments in the competitive service) and may fix the pay of such personnel (subject to the provisions of chapter 51 and subchapter III of chapter 53 of such title, relating to classification and General Schedule pay rates) as the Commission deems desirable.

(b) The Commission may procure temporary and intermittent services to the same

extent as is authorized by section 3109(b) of title 5 of the United States Code, but at rates for individuals not to exceed the daily equivalent of the maximum annual rate of basic pay then in effect for grade GS-18 of the General Schedule (5 U.S.C. 5332(a)).

(c) Upon request of the Commission, the head of any Federal department or agency, including the Secretary of State, is authorized to detail, on a reimbursable basis, any of the personnel of such department or agency to the Commission to assist it in carrying out its duties under this Act.

SEC. 7. (a) The Commission may secure directly from any department or agency of the United States, including the Department of State, any information necessary to enable it to carry out this Act. Upon the request of the Chairman of the Commission, the head of such department or agency shall furnish such information to the Commission.

(b) The Commission may accept, use, and dispose of gifts or donations of money or property.

(c) The Commission may use the United States mails in the same manner and upon the same conditions as other departments and agencies of the United States.

(d) The Administrator of General Services shall provide to the Commission on a reimbursable basis such administration support services as the Commission may request.

SEC. 8. The Commission shall transmit an annual report to the President and to each House of Congress as soon as practicable after the end of each fiscal year. Each report shall include a detailed statement of the activities and accomplishments of the Commission during the preceding fiscal year and any recommendations by the Commission for legislation and administrative actions.

SEC. 9. This Act shall take effect on October 1, 1985.

On page 64, line 18 strike "SEC. 914." in lieu therefore "SEC. 915."

Mr. KENNEDY. Mr. President, I offer this amendment, with the Senator from Maryland, Senator MATHIAS.

Today, with Senator MATHIAS, I am introducing this legislation that will establish a commission for the preservation of America's heritage abroad.

We are a nation of immigrants. Almost all Americans can find roots abroad. And those roots are important to remember and respect. In many cases, cemeteries, monuments, and historic buildings are all that is left of the communities from which our ancestors emigrated.

Since the 1970's I have worked with Americans interested in preserving their heritage abroad. I discovered a distressing fact—many of these reminders of our ancestors are in danger of deterioration or destruction. Simple neglect over the years has taken its toll in some cases. Deliberate Government actions have been responsible in others.

Many cemeteries throughout Eastern Europe and the Soviet Union, representing communities of diverse religious faiths, have not been well cared for. In Poland, for example, only some 400 Jewish cemeteries remain out of 800 before World War II. Only a small portion of those are in decent condition.

The U.S. Government is in a position to assist Americans to preserve their heritage abroad. However, there is no one point in the Government to which Americans can turn. This problem deserves ongoing and sustained attention.

The Commission on the Holocaust recognized this problem and proposed a solution in its report to the President. The Commission recommended:

That in recommendation of the sanctity of the physical remains of the Jewish communities of Eastern Europe and the right of the dead to a final resting place, the State Department should continue to express its concern over the destruction of cemeteries, urging that they be maintained in a suitably respectable manner.

Hence the concept of a commission. The Commission proposed in this legislation would identify foreign cemeteries—to which Americans have ancestral ties—that are in jeopardy and to propose policies for encouraging foreign governments in whose countries such monuments are located to take steps to protect them.

Specifically, the Commission would:

Identify and publish a list of cemeteries, monuments, and historic buildings located abroad and associated with the foreign heritage of U.S. citizens which are in danger of deterioration:

Encourage their preservation by working in concurrence with the Department of State to obtain assurances from foreign governments that the landmarks will be protected;

Sponsor or support demonstration projects to help preserve and protect such cemeteries, monuments, and historic buildings;

Prepare and disseminate reports on the conditions of and progress toward preserving and protecting these landmarks;

Coordinate with the U.S. International Council on Monuments and Sites.

The Commission will consist of five members appointed by the President. Commissioners shall receive no pay for their service to the Commission.

I have had the opportunity to review this again with the chairman of the committee, and the ranking member of the subcommittee. It involves no additional funding.

It is a simple amendment but it is I think important. I hope that the Senate will be willing to give it favorable consideration.

Mr. MATHIAS. Mr. President, President Reagan has recently returned from Europe where among other things he participated in ceremonies commemorating the 40th anniversary of V-E Day. Throughout the world there are many cemeteries and monuments which also commemorate the sacrifices of Americans. Many of these cemeteries and monuments are in danger of deterioration or destruction. If these landmarks are allowed to perish, the memory of our ancestors, their triumphs, and the lessons to be learned from their failures will also perish.

Today I am introducing an amendment with Senator KENNEDY to establish a Presidential Commission to preserve these landmarks, as part of America's heritage abroad. The Commission will identify cemeteries, monuments, and historical buildings located abroad that are associated with the foreign heritage of U.S. citizens, particularly those sites which are in danger of deterioration or destruction. It will recommend policies to the State Department to encourage the governments, in countries where the cemeteries and buildings are located, to preserve them. In addition, the Commission will sponsor and support projects to help this effort.

The Commission would consist of five members appointed by the President. They will receive no compensation for their services, although travel expenses incurred will be covered, and a support staff will be provided. The Commission will meet at least once every 3 months and will submit to the President and to both Houses of Congress an annual report.

These historic landmarks can have a very powerful emotional impact. On this, I can speak from personal experience. A few years ago, I traveled to the Soviet Union to open America's "Agriculture USA" exhibit in the city of Kishinev in Modavia. In the course of my travels, I stopped briefly in Kiev to lay a wreath at Babi-Yar, in memory of the hundreds of thousands of Jews who were massacred there by the Nazis when they occupied the Ukraine.

It was a humbling and moving experience to stand at the edge of that fatal ravine, under a bleak winter sky, and pay my respects to the dead. The ravine's harsh, tragic outlines are softened now by landscaping and the scene, after years of official neglect, is dominated by a powerful monument.

But not a single word in the inscription on the monument tells you that it was Jews who were massacred there—that it is Jews who lie in the mass grave at Babi-Yar. The omission is significant. It is not accidental. It underscores the need for this Commission.

Elsewhere in the world the memory of the Holocaust is kept alive so that successive generations may learn its lesson: That man's fate is in his own hands—that by remembering the past, we may shape a better future.

It is in this spirit of remembrance that I am proposing the Commission for the Preservation of America's Heritage Abroad.

Mr. LUGAR. Mr. President, the amendment is an excellent one. We are prepared to accept it on this side.

Mr. PELL. Mr. President, I think this amendment fills a very real need. This Commission will fill actually a vacuum. I think it is an excellent one and we are glad to support it.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Massachusetts [Mr. KENNEDY].

The amendment (No. 133) was agreed to.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 134

(Purpose: Calling upon the President to initiate discussions with the Soviet Union and France to foster negotiations to limit and control arms control transfers to developing nations)

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, I send an amendment to the desk, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Oregon [Mr. HATFIELD] for himself and Mr. PELL, proposes an amendment numbered 134.

Mr. HATFIELD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following new section:

"The Control of Conventional Arms Transfers

"SEC. —— (a) The Congress recognizes that conventional arms transfer agreements with the Third World by all suppliers from 1981-1984 totaled $153.2 billion (in constant 1984 dollars); in which non-communist suppliers accounted for $94.1 billion and communist suppliers accounted for $59.1 billion. The United States, the Soviet Union and France have been the three predominant arms suppliers to the Third World from 1977-1984 and collectively accounted for 83% of all conventional arms transfer agreements with the Third World in 1984.

"There is grave concern for the effect conventional arms transfers may have on regional stability, arms races and the economic needs of Third World nations, including their development, and ability to meet basic human needs. There is further concern about the effect of conventional arms transfers on regional stability, and ultimately on United States and Soviet security. Conventional arms transfer agreements made by the U.S., the Soviet Union and France are at levels closer to rough equivalence than at any time in history. This could be a significant factor in facilitating progress to limit and control arms transfers. Since new arms transfers are unpredictable, and since new cycles of arms purchases by the less developed nations could occur at any time, the U.S. should re-evaluate its conventional arms transfer policies and practices and seek to achieve negotiated conventional arms control agreements which enhance the national interest at the earliest possible date.

"(b) Therefore,

"(1) The President should, at the earliest possible date, in consultation with our allies, initiate discussions with the Soviet Union and France aimed at beginning multilateral negotiations to limit and control the transfer of conventional arms to the less developed world.

"(2) Within one year of the date of enactment of this section, the President shall submit to Congress a report to the Speaker of the House of Representatives and the Chairman of the Committee on Foreign Relations which examines and analyzes United States policies concerning the transfer of conventional arms, especially sophisticated weapons, and including a review of measures being taken to fulfill the objectives stated above. This report shall also examine and analyze—

"(A) the lessons of earlier efforts to negotiate restraints on the export of conventional arms;

"(B) the evolution of supplier practices and policies;

"(C) the evolution of recipient country attitudes regarding conventional arms transfers;

"(D) the effect upon regional stability and security of conventional arms transfers by the United States and its allies and the Soviet Union and its allies in recent years;

"(E) the relationship between arms exports by major suppliers and the needs of those countries to support their domestic military procurement programs;

"(F) the relationship between arms imports and the external debt of recipient countries allocation of internal resources, and their economic well-being.

"(G) the relationship between arms transfers and regional military stability.

"(3) The report provided for in subsection (2) shall be submitted in unclassified form, with an unclassified summary and with classified appendices, as appropriate and necessary.

Mr. HATFIELD. Mr. President, there has been rather extended negotiation today between the majority and minority staff of the Foreign Relations Committee, and my staff to work out an agreement on this amendment. I believe we have reached a consensus upon which we can adopt the amendment.

Let me explain it. The Congressional Research Service has recently produced a document that I requested sometime back indicating trends in the transfer of arms by the three major world suppliers—the United States, the Soviet Union, and France—to Third World countries. I think one of the very significant factors to emerge is that between 1981 and 1984, there has been a total of $153 billion of arms that have been peddled throughout the world. I need not indicate the significant economic impact this has on the recipient countries, and on those countries which are the producers. But be that as it may, it seems to me that because of the erratic trend line that has been established through the year-by-year analyses it is indeed significant that this year the three major suppliers are roughly at parity in the value of their respective arms transfer agreements. This is a prime time, it seems to me, to urge and direct the administration, which this amendment does, to undertake discussions with France and the Soviet Union regarding some kind of control over this constant peddling of arms.

We then require a report back to the Congress in the resolve section of the amendment so that we will have better knowledge of the relationship between arms and economics in the recipient countries, we also require a report on steps which are being taken to fulfill the central purpose of the amendment. Other types of data are also requested.

Earlier today we had some discussion on the kind of indebtedness that these countries are experiencing. It is going to create some very serious, very cataclysmic economic problems for them down the road. I am not going to take the time of the Senate right now to get into a lot of detail on that except to say that this is a resolution that would indicate the sense of the Senate that the President shall do this.

President Carter made some attempt in the late 1970's, but only on a bilateral basis. It failed. Even if a bilateral miracle had been worked out between the United States and the Soviet Union, France would have remained a major supplier. So this is a different path in that it requires a trilateral approach which I think ultimately has to be obtained in order to get an effective agreement or an effective program. I think this is a very significant and historic document that has been produced, and this is a very significant and historic action of the Senate to take at this time. It gives meaning to the data and the information in the CRS document.

I urge its adoption.

Mr. President, I ask unanimous consent that the Senator from Rhode Island, Mr. PELL, be made a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LUGAR. Mr. President, I commend the distinguished Senator from Oregon for his thoughtfulness in this area. He has been a long-time champion of reason and commonsense in an area which needs a great deal more of that. We believe that his amendment is well drafted. It would be a most constructive addition to our bill. We support it on this side.

Mr. PELL. Mr. President, I am very glad to be a cosponsor of this bill. I think it is an excellent proposal and hope very much that it will be passed.

Mr. HATFIELD. Mr. President, I thank the chairman of the Senate Foreign Relations Committee and the ranking minority member, Mr. PELL, for their cooperation.

I want to pay a special tribute to staff. Under conditions of this kind where bills are being amended on the floor, there is a tremendous amount of energy and stress put upon the staff. The staff of the Foreign Relations Committee has been most courteous and most cooperative in working with my staff on this, amongst many of the other chores that they have on a day of this kind.

In addition to Rick Rolf and Pat Reiten of my staff I want to pay a special tribute to Bill Ashworth, Dave Smith, on the staff of the Foreign Relations Committee. Andy Semmel and Graeme Bannerman deserve special praise. Finally, Dick Grimmet of the Congressional Research Service for his excellent and scholarly work in the area of arms statistics. He has made an invaluable and objective contribution.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Oregon [Mr. HATFIELD].

The amendment (No. 134) was agreed to.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 135

(Purpose: Expressing the sense of the Senate that Republic of China (Taiwan) should retain full membership in the Asian Development Bank and that its status and designation should not be a precondition for membership in that body by the People's Republic of China)

Mr. KASTEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Wisconsin [Mr. KASTEN] proposes an amendment numbered 135.

At the appropriate place in the bill add the following:

Since the People's Republic of China is seeking to apply for admission to the Asian Development Bank, conditioning its application upon administrative changes affecting the status and designation of the Republic of China (Taiwan) within that body;

Since the Republic of China (Taiwan) is a founding member of the Asian Development Bank, actively participating in the Bank's activities and faithfully fulfilling its obligations since the Bank's establishment in December 1966;

Since the Republic of China's (Taiwan's) subscription to the initial capital stock of the Bank was determined on the basis of the area, population, and economic condition of the island of Taiwan;

Since neither the relationship between the Republic of China (Taiwan) and the Bank, nor the circumstances under which these relations were established, have changed since 1966;

Since the Asian Development Bank agreement specifically prohibits the Bank from being influenced in its decision by politics;

Since it was the strong conviction of the founders of the Asian Development Bank that the introduction of political considerations would undermine the ability of the Bank to carry out its mission, namely to further economic growth and cooperation in the region; and

Since the Republic of China (Taiwan) has assisted in carrying out the mission of the Asian Development Bank over the years, moving from borrower to donor: Now, therefore,

It is the sense of the Senate that—

(1) Republic of China (Taiwan) should remain a full member of the Asian Development Bank, and that its status and designation within that body should remain unaltered no matter how the issue of the People's Republic of China's application for membership is disposed of; and

(2) the President and the Secretary of State should express support of the Republic of China (Taiwan), making it clear that the United States will not countenance attempts to make administrative changes affecting the status and designation of another member without that member's full knowledge and consent.

Mr. KASTEN. Mr. President, the amendment I am introducing expresses the sense of the Senate that the Republic of China [ROC]—Taiwan—should retain full membership in the Asian Development Bank, and administrative changes affecting its status and designation should not be a precondition for membership in that body by the People's Republic of China [PRC].

Over a decade ago, the United States and the PRC began the process of normalizing political and economic ties. This process culminated in the U.S. recognition of the PRC in 1979. There are excellent strategic and political reasons for this normalization process to continue. But in our effort to establish new friends, we should not abandon old ones. We should never allow those old friends to be sacrificed for political reasons, no matter what the short-term advantage may be.

This is precisely the issue that faces us now as the PRC seeks to join the Asian Development Bank. On the one hand, the administration has expressed its support for the PRC's membership in the Asian Development Bank. This support can be seen as a part of the process of normalization, leading to better relations. On the other hand, the PRC has demanded that, as a precondition for its membership in the Asian Development Bank, ROC—Taiwan—must change its status and designation. Regardless of whether or not one believes the PRC ought to be allowed to join this body, there is no justification at all for ROC—Taiwan—to change its status and designation as a member of the Asian Development Bank.

The argument put forward by the PRC in the past, to the effect that there cannot be two governments claiming to represent the Chinese people, does not apply in this case. This argument has allowed the PRC to replace ROC—Tawian—in the United Nations, the International Monetary Fund, and the World Bank.

But when ROC—Taiwan—helped to found the Asian Development Bank in 1966, it was not in control of the Chinese mainland and did not claim to represent all the people of China in the Asian Development Bank. ROC's—Taiwan's—subscription to the initial capital stock of the Bank was determined on the basis of the area, population and economic conditions of the island of ROC—Taiwan. Neither the relationship between ROC—Taiwan—and the Bank, nor the circumstances under which these relations were established have changed since 1966. Therefore, the question of who is the sole, legal government of China and the representative of the Chinese people in international organizations cannot provide any basis for action here. And even if there were merit to the PRC's claim, there is no provision within the Asian Development Bank charter for downgrading the status and designation of a country which is already a member in good standing.

The Asian Development Bank is a nonpolitical regional financial organization. Its sole purpose is to provide the developing member countries with financial and technical assistance for their economic development. Article 36 of the Asian Development Bank Agreement specifically prohibits the influence of political considerations on the decisions of the Bank: "Only economic considerations shall be relevant to their decisions—in order to achieve and carry out the purpose and functions of the Bank." Political influences, of the sort being brought to bear by the PRC, undermine the ability of the Asian Development Bank to carry out its mission; namely to foster economic growth and cooperation in the region.

In conclusion, let me reemphasize that improved relations with the PRC should not be sought at the price of abandoning our oldest Asian ally. No matter how strongly we desire to normalize our relations with the PRC, the United Stated is morally obligated, at a minimum, to ensure that ROC—Taiwan—is not sacrificed. This is certainly the case with respect to ROC's—Taiwan's—status and designation in the Asian Development Bank. I ask that all my colleagues join me in

this effort to protect the status and designation of ROC—Taiwan—in the Asian Development Bank.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, on our side, we believe the amendment presented by the distinguished Senator from Wisconsin has been well drafted. It certainly offers the sense of the Senate as we understand it, and he ought to be commended. Therefore, we support it and ask for its adoption.

The PRESIDING OFFICER. Is there further debate on the amendment?

Mr. PELL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PELL. Mr. President, I ask unanimous consent that the order for the quroum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from Wisconsin.

The amendment (No. 135) was agreed to.

Mr. LUGAR. I move to reconsider the vote by which the amendment was agreed to.

Mr. KASTEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LUGAR. Mr. President, while there is a moment as the Senators are regrouping, let me indicate to all who may be listening to this debate in offices that we are very close to completing the bill. There is a sense of urgency on the part of most Senators, and the managers are only too well aware of that. There is a hope that this bill can be completed by 6:30 p.m. I think that is fully within the range of possibility, if Senators would come to the floor and make certain that the last few amendments are presented and, hopefully, make short arguments. I know of no amendments at the moment that might call for rollcall votes, but I am prepared to be surprised if somebody should walk through the door with such amendments. We would like the attention of all Senators within the hour to complete this bill.

AMENDMENT NO. 136

Purpose: To establish Presidential certification on aid to the People's Republic of Mozambique

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I have an amendment at the desk. I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from North Carolina [Mr. Helms] proposes an amendment numbered 136.

At the appropriate place in the bill, insert the following new section:

SEC. ( ). (a) None of the funds authorized to be appropriated for fiscal year 1986 under chapter 2 and 5 of Part II of the Foreign Assistance Act of 1961 shall be made available to the People's Republic of Mozambique unless the President makes a certification in accordance with subsection (a) within thirty days of the enactment of this section and every one hundred and eighty days thereafter.

(b) The certification required by subsection (a) is a certification by the President to the Speaker of the House of Representatives and to the chairman of the Senate Committee on Foreign Relations that the Government of the People's Republic of Mozambique—

(1) is making a concerted and significant effort to comply with internationally recognized human rights;

(2) is making continued progress in implementing essential economic and political reforms, including the restoration of private property and respect for the right to engage in free enterprise in all sectors of the economy;

(3) has implemented a plan to reduce the number of foreign military personnel to no more than 55 by September 30, 1986.

(4) is committed to holding free elections at a date no later than September 30, 1986, and to that end has demonstrated its good faith efforts to begin discussions with all major political factions in Mozambique which have declared their willingness to find and implement an equitable political solution to the conflict, with such solution to involve a commitment to—

(A) the electoral process with internationally recognized observers; and

(B) the elimination of all restrictions on the formation and activities of opposition policial parties.

Mr. HELMS. Mr. President, this amendment is quite simple. I believe the leadership and the managers on both sides are willing to accept it. It requires Presidential certification as a condition for aid to the Communist regime of the People's Republic of Mozambique. This certification is a minimum requirement should we decide to embark on a program of largesse to communism in Mozambique.

Mr. President, my amendment requires the President to certify the following in order for Mozambique to receive U.S. aid which this year is at a level of $18,150,000. First, the President must certify that Mozambique is making a concerted and significant effort to comply with internationally recognized human rights.

Second, the President must certify that Mozambique is making continued progress in implementing essential economic and political reforms, including the restoration of private property and respect for the right to engage in free enterprise in all sectors of the economy.

Third, the President must certify that Mozambique has reduced the number of foreign military advisers to 55 by September 30, 1986.

Fourth, the President must certify that Mozambique is committed to holding free elections at a date no later than September 30, 1986, and to that end has demonstrated its good-faith efforts to begin discussions with all major political factions in Mozambique which have declared their willingness to find and implement an equitable political solution to the conflict, with such solution to involve a commitment to, first, the electoral process with internationally recognized observers and, second, the elimination of all restrictions on the formation and activities of opposition political parties.

Mr. President, here is the point: It is inconceivable, at least to this Senator, that the United States is allocating $18,150,000 for the Communist regime of Mozambique in this year's foreign aid bill, $3 million to be allocated for a military assistance program and an additional $150,000 are for a military education and training program.

The ruling Communist Party of Mozambique, Frelimo, was founded in 1962. The leftist coup in Portugal in 1974 facilitated the rise to power of Communist National Liberation Movements in the Portuguese territories in Africa. Mozambique became independent in 1974 and under the Communist Frelimo regime proceeded to place a Soviet AK-47 assault rifle as part of the national flag.

At the Third Party Congress of Frelimo in February 1977, Frelimo was officially designated a Marxist-Leninist "vanguard party." The transformation of this National Liberation Movement into an orthodox Marxist-Leninist Party was effected through cooperation with the Communist Party of the Soviet Union. The process of this Moscow-guided transformation is paralleled to the Angolan case and the case in Nicaragua.

The Chairman of the Frelimo Party and President of the People's Republic of Mozambique, Samora Machel paid an official state visit to Moscow in November 1980. Following this official state visit, a "Joint Soviet-Mozambican Statement" was released. A review of its contents reveals the true nature of the Machel regime.

The Soviet-Mozambican statement declares:

During the exchange of opinions of cooperation between the CPSU (Communist Party of the Soviet Union) and the Frelimo, it was reaffirmed that the development of the fraternal ties between the two parties, based on the principles of Marxist-Leninism and proletarian internationalism, is of important significance for the whole complex of the revolutionary movement.

Mozambique's attitude toward the Soviet Union and its rule in the world was clarified as follows in the joint statement:

The Mozambican side welcomed the big successes scored by the Soviet people under

the leadership of the Communist Party of the Soviet Union in building a developed Socialist society and creating the material and technical basis of communism. It stressed the big role which the country of Lenin is playing in the preservation of peace in the entire world. In the struggle for an end to the arms race, for détente and disarmament, for the victory of the revolutionary forces of today.

Mr. President, it is no secret that the Mozambican economy is in a complete shambles after 10 years of Communist rule. Hunger and starvation haunt the land. The Mozambican GNP had risen from a 4.2-percent growth rate in 1967 to a 9.5-percent growth rate in 1971. Prior to independence in 1974, the country was poised to attain an annual growth rate of 10 percent and its prospects were bright. Communism has plunged the country into chaos.

Shortly after the Communist Frelimo regime rose to power in 1975, the country was set on a course of internal Sovietization. The Communist regime nationalized land, nationalized rented property, nationalized schools, nationalized banking institutions, nationalized insurance institutions, and provided no compensation for nationalized private property. Over 250,000 whites fled the country as did thousands of blacks. Tribesmen were forcibly shifted from ancient ancestral areas to collectivized settlements. Political indoctrination was combined with other schemes of mass mobilization. A network of concentration camps has honeycombed the country. The economy went into a collapse. By 1978, agricultural and industrial production had dropped by 70 percent.

Mr. President, this is the Communist economy that we are being asked to bale out to the tune of some $15 million. It has been estimated that Machel's Communist regime spent over $175 million per year in assisting Robert Mugabe's Communist movement come into power in Rhodesia. Some 30 percent of the Mozambican national budget was diverted to assist Mugabe install communism in Rhodesia. Now, the American taxpayer is being asked to bail out the Communist regime in Mozambique.

Mr. President, Samora Machel's Communist Frelimo regime in the face of complete economic disintegration, massive social disintegration and unrest, and armed internal opposition, has consistently tightened its relations with the Soviet bloc. Some argue that the barbaric Machel regime can be moderated through economic inducements. To the contrary, Mr. President, such largesse makes it easier for Machel to maintain his dictatorship and continue to have close relations with the Communist world. To vote for aid to prop up this Communist regime, aid which includes military supplies and training, at a time when a major freedom fighter movement is trying to liberate Mozambique from communism, is not only immoral but simply wrong.

Mr. President, the Mozambican National Resistance Movement is struggling for freedom in Mozambique. It is exactly the same type of movement as Jonas Savimbi's UNITA in Angola: the FDN and ARDE freedom fighters in Nicaragua; and the Afghan freedom fighters.

Mr. President, we have given over $120 million in aid to the Communist regime in Nicaragua. This money was supposed to have moderated the Communists in Managua and made them friendly to the United States. We do that all the time. As all the world has seen, the Communist regime in Nicaragua has increased its own internal system of terror and repression and has spread the flames of war and destruction throughout Central America. It makes no sense to embark on the same policy with regard to Communist Mozambique in order to build communism.

Mr. President, I hope that my colleagues will reflect on our failed policy toward the Communists of Nicaragua and support this amendment against aid to the Communist dictators of Mozambique.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, if the Senator from North Carolina is willing to indulge in a short colloquy, I will appreciate his responses to these thoughts.

In the amendment he has suggested, the number of military advisers is to be reduced to no more than 55 by September 30, 1986. It occurs at least to this Senator that if there are maybe as many as 1,600 persons involved—and I am advised there might be that number—that type of withdrawal and those numbers by that date may be very difficult for the administration to determine.

I am sympathetic to the amendment but trying to think through it is practical terms. I appreciate the parallel situation with El Salvador, and 55 is sort of an historic goal. But will the Senator entertain any modification that would give a feeling of substantial reduction without getting to the number of 55 and the specific date of September 30, 1986?

Mr. HELMS. Mr. President, if the Senator will yield, my feeling is that we ought to tighten the screws on all situations involving U.S. aid to Communist regimes, and particularly this one that involves a Communist regime where the Soviet Union is doing exactly what it is in Syria and elsewhere. What number does the Senator have in mind?

Mr. LUGAR. I would prefer not to state a number but to speak in terms of a substantial reduction. I appreciate this approach has a necessary vagueness to it, but without being able to consult with the administration, I am not certain what kind of tactical problems they have in fulfilling this reduction in the event that it should become the law of the land.

Mr. HELMS. The Senator knows that I will cooperate, because I understand the difficulty of moving bills of this magnitude through the Chamber. But at the same time, I am loath to accept language that the State Department and others might use to their advantage in terms of not achieving what I hope to achieve by this amendment.

Now, if we could have some idea, for legislative history, what is meant by "reducing substantially," then I would be willing to consider that.

Mr. President, in this connection, while Senators are conferring, I will ask unanimous consent to insert in the RECORD an article from Human Events entitled "Will U.S. Bail Out Communist Mozambique?"

The Soviet bloc military presence in Mozambique this day, as we stand on the Senate floor, is at an alltime high. A noted authority, Dr. Jack Wheeler, stated recently that:

> Mozambique's government is formally Marxist-Leninist with an official Memorandum of Friendship with the Soviet Union. It is kept in power by Marxist mercenaries: some 1,000 to 2,000 Cuban troops and advisors, 500 East Germans, 1,000 Russians, 3,000 to 5,000 Zimbabwean and 3,000 Tanzanian soldiers, plus 80 North Korean military specialists.

This adds up, Mr. President, according to my arithmetic, to between 8,000 and 10,000 military personnel.

I ask unanimous consent that the article by Mr. Wheeler from Human Events dated April 27, 1985, be printed in the RECORD.

There being no objection, the article was orderd to be printed in the RECORD, as follows:

WILL U.S. BAIL OUT COMMUNIST MOZAMBIQUE?

Conservative Caucus Chairman Howard Phillips has been waging a bitter campaign against Assistant Secretary of State for African Affairs, Chester Crocker, particularly zeroing in on Crocker's policy toward Mozambique. One of Phillips' key charges—carried in newspaper ads around the country—boils down to this: Why is the Administration bailing out Samora Machel's communist regime?

Phillips has drawn some blood. No less an Administration official than Vice President George Bush felt impelled to dispatch a letter to Phillips on March 27 arguing that the President himself approved the policy.

"President Reagan," Bush told Phillips, "believes that a military assistance program with Mozambique is in our national interest and essential to the pursuit of policies that have thus far been highly successful in asserting U.S. influence in the region."

Bush pointed out that Machel—with U.S. assistance—signed the 1984 Nkomati non-aggression pact with South Africa (thus closing down anti-South African guerrilla bases

operating in Mozambique), has joined the IMF and the World Bank and has made a major new effort to attract Western investors.

Bush went on: "The Soviet Union has publicly attacked these moves. Our provision of a modest military assistance program ($1.15 million proposed in FY 85) will help demonstrate that the Mozambicans need not rely on the East Bloc for their total security. Bringing some military officers to the United States for training will broaden our contact with this key element of Mozambican society and improve how we are viewed within the military."

Phillips replied on April 8, stressing that conservative opposition to military assistance "is premised on the grounds that it [Mozambique] continues to be an unfriendly government." Phillips then cited former United Nations Ambassador Jeane Kirkpatrick as a source.

Before the Committee for the Free World in London on March 19, Kirkpatrick chastised the United States for approving food aid and $10 million in supplementary military assistance to anti-Western Mozambique in the same week that 17 Soviet MiG fighters arrived in Mozambique's capital.

Phillips pointed to other evidence suggesting that Crocker had not yet been able to bribe Machel into the capitalist world. For instance:

The Foreign Broadcast Information Service (FBIS), which monitors foreign broadcasts, reported on December 3, 1984, that "The Frelimo [Machel's party] and the Communist party of Cuba (PCC) signed in Havana yesterday an accord of cooperation in the field of propaganda."

FBIS disclosed on February 20 of this year that the governments of Communist Mozambique and Communist North Korea renewed their pledge of mutual assistance in a ceremony in Maputo. Said Machel: " * * * As socialist nations and members of the Nonaligned Movement, our countries have engaged themselves in the struggle against imperialism, for peace and liberation of humankind. It is in this context that our country gives its political, moral and diplomatic support to the ANC [African National Congress] of South Africa, SWAPO, the Polisario Front, the Revolutionary Front for an Independent East-Timor, and all people who in the various parts of the world, particularly in Latin America, the Caribbean, and Asia, struggle for independence."

On February 27, FBIS reported that "The Bulgarian ambassador to Mozambique said at a press conference in Maputo yesterday that there has been a new upsurge in Mozambican-Bulgarian cooperation since the fifth session of the two countries' joint commission was held last year."

FBIS also reported on March 5, 1985, the arrival in Mozambique of "over 15,000 tons of diesel from the Soviet Union * * * being unloaded at the Mozambican port of Matola from the Soviet tanker Kerch." A second Soviet tanker. "the Friendship Among Peoples, was currently taking * * * 18,000 tons of diesel to the ports of Beira, in the center of Mozambique, and Nacala, in the north of the country."

What, Phillips would like to know, are we getting for our money? In a splendid new book called Combat on Communist Territory, edited by Prof. Charles Moser, chairman of the Department of Slavic Languages at George Washington University, there is a lengthy chapter on Mozambique which suggests an answer: that U.S. assistance is preventing this strategically placed African nation from falling directly into the Western camp.

Machel, according to the book, is currently cooperating with the West, making deals with South Africa, etc., because his country suffers serious economic difficulties and he fears he will be overthrown by a powerful anti-Communist insurgency, the Mozambique National Resistance, also known as RENAMO.

Machel signed the Nkomati Accord or nonaggression pact with South Africa not because he wanted to close down African National Congress guerrilla bases, but because South Africa agreed to stop helping the increasingly successful insurgency.

The most immediate impact of the accord was the shutting down of RENAMO's Voice of Free Africa. The day following the signing, Machel called on Mozambicans to "finish off the rebels." Speaking to a rally of 70,000 in Maputo, he said the pact meant that South Africa had accepted responsibility for ending training of the RENAMO bandits."

Machel confirmed to the Wall Street Journal after he signed the accord, moreover, that Marxism-Leninism "can't be stopped, because science does not stop. It keeps developing, unlike the Bible or Koran, which can't produce anything new."

Journalist Jack Wheeler, an expert on anti-Communist insurgencies who has talked extensively with the RENAMO forces, has been insensed by Crocker's actions. In a lively speech before the Conservative Political Action Conference in Washington, D.C., on March 2, he said:

"Mozambique's government is formally Marxist-Leninist with an official Memorandum of Friendship with the Soviet Union. It is kept in power by Marxist mercenaries; some 1,000 to 2,000 Cuban troops and advisers, 500 East Germans, 1,000 Russians, 3,000 to 5,000 Zimbabwean and 3,000 Tanzanian soldiers, plus 80 North Korean military specialists."

Given this and Machel's oppressive regime, he added, it is no surprise that RENAMO, led by Alfonso Dhlakama, now "has over 20,000 trained and equipped guerrillas operating in all 10 provinces of Mozambique, and is getting nearer to the capital of Maputo every day. . . .

"When I interviewed Afonso Dhlakama in Africa last fall, I asked him what he and RENAMO were fighting for. He replied: 'First is to free ourselves from Soviet colonialism * * *. Second is to free ourselves from the tyranny of Marxism. There are no freedoms of any kind in Mozambique—of religion, of speech, of the press, of assembly, none * * *.

" 'Our demands, then, are (1) withdrawal of all foreign troops and advisers from our country, especially the Cubans, East Germans, and Soviets; and (2) the dismantling of the current Marxist-Leninist system, with a democratic, multi-party system and free election in its place.' "

Dhlakama, adds Wheeler, "wants RENAMO to be the first democratic liberation movement in history to overthrow a Soviet-backed Marxist-Leninist regime."

So, asked Wheeler, "who tries to come to Machel's rescue just in the nick of time? Of course: the reactionary, elitist invertebrates of the State Department who pathetically whimper about how they can 'win Machel over,' who equate cynicism with sophistication in foreign policy, and 'peace and stability' with the consolidation of Marxist tyranny.

"What these spiritually eviscerated souls must realize is that, the morally repugnant spectacle of America militarily protecting a murderous Communist dictator from pro-Western liberation forces aside, in terms of hard-headed Realpolitik, they are backing a loser. Instead of seizing the situation as an opportunity to advance democracy and freedom by insisting Machel accede to RENAMO's two basic demands, they frantically try and prop him up when he is on his last legs.

"So I want to ask Ronald Reagan, and I'd like all of you to ask him with me, 'When, Mr. President, are you going to lose your temper with the breathtaking naivete responsible for such a contemptible farce, and demand its eviction from Foggy Bottom?' "

What Phillips and Wheeler and plenty of other conservatives seem to be shouting at the Administration, in short, is an old Goldwater slogan: Why not victory?

Mr. LUGAR. Mr. President, some consultation is going to be required. For the moment, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, we had a slight syntax problem here which we worked out with the distinguished manager of the bill, Mr. LUGAR.

I am going to send this modification to the desk, but let me read it so there will be no mistake about it.

At the bottom of the page, lines 21 and 22, make it read:

(3) has implemented a plan by September 30, 1986, to reduce the number of foreign military personnel to no more than 55.

I send the modification to the desk.

The PRESIDING OFFICER. The amendment is so modified.

The modified amendment reads as follows:

At the appropriate place in the bill, insert the following new section:

SEC. . (a) None of the funds authorized to be appropriated for fiscal year 1986 under chapter 2 and 5 of Part II of the Foreign Assistance Act of 1961 shall be made available to the People's Republic of Mozambique unless the President makes a certification in accordance with subsection (a) within thirty days of the enactment of this section and every one hundred and eighty days thereafter.

(b) The certification required by subsection (a) is a certification by the President to the Speaker of the House of Representatives and to the chairman of the Senate Committee on Foreign Relations that the Government of the People's Republic of Mozambique—

(1) is making a concerted and significant effort to comply with internationally recognized human rights;

(2) is making continued progress in implementing essential economic and political reforms, including the restoration of private property and respect for the right to engage

in free enterprise in all sectors of the economy;

(3) has implemented a plan by September 30, 1986 to reduce the number of foreign military personnel to no more than 55.

(4) is committed to holding free elections at a date not later than September 30, 1986, and to that end has demonstrated its good faith efforts to begin discussions with all major political factions in Mozambique which have declared their willingness to find and implement an equitable political solution to the conflict, with such solution to involve a commitment to—

(A) the electoral process with internationally recognized observers; and

(B) the elimination of all restrictions on the formation and activities of opposition political parties.

Mr. LUGAR. Mr. President, on our side we are prepared to accept the amendment with the modification made by the distinguished Senator from North Carolina, which we believe strengthens the language.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 136) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 137

(Purpose: To provide funding for Africa famine recovery and development)

Mr. KASTEN. Mr. President, I send an amendment to the desk, on behalf of myself and Senator KENNEDY, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Wisconsin [Mr. KASTEN], for himself and Mr. KENNEDY, proposes an amendment numbered 137.

Mr. KASTEN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 34, between lines 8 and 9, insert the following new section:

AFRICA FAMINE RECOVERY AND DEVELOPMENT FUND

SECTION 308. Chapter 1 of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new section:

"SEC. 129. Africa Famine Recovery and Development Fund.—(a) The Congress reaffirms the commitment of the American people to assist the countries of Sub-Saharan Africa in dealing with drought and famine conditions which threaten the lives of millions of its people. The Congress reaffirms the commitment of the United States Government to continue its support, in concert with other nations and in cooperation with the affected nations in Africa, of the international relief, rehabilitation, and recovery program to assist these nations in dealing more effectively with drought and achieving self-sufficiency in agricultural production, eliminating forever the threat of famine.

"(b) The President is authorized to furnish assistance, on such terms and conditions as he may determine, for the long-term agricultural recovery and development of the Sub-Saharan Africa region. particularly for support of policy reform and agricultural support and research for small farmers. Assistance furnished under this section shall be in accordance with a long-term, multidonor development plan which calls for equitable burdensharing with other donors and shall be furnished, whenever appropriate, in cooperation with in international coordinating mechanism or international agency.

"(c)(1) There are authorized to be appropriated to the President up to $100 million, which sums shall be derived from any funds authorized by this Act to carry out the purposes of this section

"(2) Amounts appropriated under this section are authorized to remain available until expended.".

Mr. KASTEN. Mr. President, it is a pleasure to join once again with the senior Senator from Massachusetts on an initiative which seeks to alleviate the pain and suffering in sub-Saharan Africa, a situation which in the short term has been met with an overwhelming response of generosity from the American people and the American Government.

The initiative now before the Senate is an effort to address long-term relief, rehabilitation and recovery programs in that part of the world. I would especially like to emphasize, and I know that the senior Senator from Massachusetts is also going to emphasize, the importance of agricultural and other policy reforms, which this legislation encourages in order to minimize the affects of drought in the future. Ideally, of course, such policy reforms will also help to ensure that that part of the world can in the future feed itself.

Mr. President, Senator KENNEDY and I are sensitive to the position taken by the leadership of the Senate Foreign Relations Committee that we not add more funds to this legislation, and, therefore, we have fashioned our initiative so that those funds which are authorized for this purpose are available from other funds already authorized by this legislation. The important thing is to get the fund authorized and in place, and in the future if more resources and new resources are necessary, we would expect that the administration would request such funds under this authority.

Mr. President, a lot of debate on this subject is not necessary. We are all aware of the need, and I hope my colleagues will respond to that need by supporting this amendment.

Mr. KENNEDY. Mr. President, I am pleased to join Senator KASTEN in offering today an amendment that will establish within the Foreign Assistance Act a long-term authority for African famine recovery and development. It is patterned along the lines of legislation I offered in 1974, with the late Senator Hubert Humphrey, in establishing the original Sahel drought fund—which has, and which continues to do so much to assist the countries in that region to cope with drought and famine, and to develop their agricultural resources.

Regrettably, Mr. President, we now need to do this for the other countries of sub-Sahara Africa who are facing today one of the greatest human tragedies of this century. Drought and famine have spread across the African Continent, affecting more than a dozen countries and threatening the lives of millions.

All Americans can be proud of what our country has done so far to help the starving peoples of Ethiopia, Sudan, and other parts of Africa. In this terrible time of crisis, it is literally true that "We are the world; we are the children."

United States aid—contributions from the church agencies, and private donations—have already saved millions of lives. But we cannot afford to relax now. We must keep the pipeline filled with food, and keep the pressure on, so that help gets where it is needed most.

Equally important, we must begin to prepare now for the longer term. The central challenge today is whether the nations now suffering recurrent drought and famine in Africa can ever feed themselves again. Two decades ago, the same question was posed—and answered affirmatively—in Asia. In the 1960's the United States acted to avert repeated famine in India, but today India feeds itself, thanks to international assistance and agricultural reforms.

Mr. President, that is the purpose of the amendment we are offering today. As in the Sahel a decade ago, this amendment will help us move from an emergency relief effort to programs for rehabilitation and recovery to longer-term agricultural development. As in the Sahel, we need a longer term authority in our foreign assistance program to launch this longer-term effort to help the African nations recover from drought and famine, to achieve agricultural development and, hopefully, to become self-sufficient in food production.

Our amendment simply establishes an "African Famine Recovery and Development Fund" to allow the President to seek appropriations for long-term agricultural recovery and development programs, particularly for support of policy reforms and for agricultural support and research for small farmers. These goals of the Fund are specified because all agree today that they are central to Africa's effort to achieve self-sufficiency in food.

The key to avoiding future famines, and to minimizing the effect of droughts when they do occur, is to pursue broad agricultural reforms. Ultimately, the African nations themselves must make a commitment to reform. However, they can do so only if they obtain help from other countries. The United States should make clear that it is ready to respond generously to nations that pursue policy reforms, and to reward them with additional assistance when they do.

Unfortunately, many governments in Africa still maintain economic and agricultural policies that favor urban consumers to the detriment of rural farmers. Prices paid to farmers are kept artifically low. Currencies are inflated, and with loans from abroad, urban citizens are able to purchase inexpensive foods and goods from overseas at the expense of their own farmers. Sometimes cash crops have been promoted to support food imports at the expense of domestic crops. It will take political courage for any of these nations to reverse their policies, but we should be prepared to help those that begin the effort.

Second, the Fund's authorizing language also emphasizes agricultural research and support for small farmers. There is widespread agreement that the best method to increase food production in Africa is to strengthen rural farmers, who are frequently neglected or ignored in current government programs and agricultural extension services. Recently, for example, the Office of Technology Assessment released a study concluding that "farmers and herders with little access to economic and natural resources hold the key to increasing food production in Africa." As the OTA report notes, we must help promote technologies in Africa that are "low risk, resource-conserving, small-scale and adapted to local labor conditions, and which are consistent with traditional agricultural methods."

Mr. President, it is impossible today for us to establish an exact dollar level for these programs, even for the coming fiscal year, much less for the years ahead. We are still involved in an emergency operation, with emergency needs still growing in several countries.

But we must begin now to plan for the future, and to authorize longer-term recovery and development programs, even through the exact funding levels cannot be clearly established at this time.

Mr. President, the lesson of past experience is that a self-sustaining future for nations dealing with drought and famine is possible only through agricultural reform. In recent years, per capita food production has been rising steadily in Asia and Latin America, but it is sharply down in Africa. Unless this basic trend is reversed, there will be no long-term progress. There is hope for Ethiopia and Sudan and other hard-hit nations if the United States and the West are willing to help—not just today, but tomorrow, too. That is the goal of the special fund we are establishing by this amendment, and I urge the Senate to support it.

Mr. KASTEN. Mr. President, this amendment has been cleared by both sides, and I hope it will be adopted.

Mr. LUGAR. Mr. President, we do support the amendment, and I urge its adoption.

Mr. PELL. Mr. President, this amendment has been cleared on this side as well, and we urge its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 173) was agreed to.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 138

Mr. KASTEN. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wisconsin [Mr. KASTEN], for himself and Mr. INOUYE, proposes an amendment numbered 138:

On Page 50, line 19, after the word funds insert: "authorized to be".

Mr. KASTEN. Mr. President, the amendment seeks to correct what may well be a drafting error wherein the text earmarking authorized funding under the international organizations and programs account actually earmarks funds appropriated, rather than funds authorized to be appropriated.

The amendment Senator INOUYE and I have introduced simply corrects this error and places it in the usual form.

Mr. President, some day we are going to all have to face the issue of earmarkings in both authorizing and appropriations legislation. That is, earmarkings can be disruptive, especially in the case where the authorizing committee has earmarked more than might be appropriated—this action simply requires us—I repeat, requires us—to earmark funds in the appropriations legislation. It is not, however, my intention to get into this issue at this time, but merely to correct a technical drafting error.

Mr. President, I believe this has been cleared on both sides, and I hope it will be accepted.

Mr. LUGAR. Mr. President, we support the amendment and urge its adoption.

Mr. PELL. Mr. President, I concur and support the amendment, and I urge its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 138) was agreed to.

Mr. KASTEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 139

(Purpose; Expressing the sense of the Congress that Josef Mengele be brought to justice and with reference to the need for the cooperation of the Government of Paraguay)

Mr. SPECTER. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania [Mr. SPECTER] proposes an amendment numbered 139.

Mr. SPECTER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following new sections:

SEC. . (a) The Congress finds that—

(1) Josef Mengele was the selecting physician at the Nazi concentration camp of Auschwitz-Birkenau during the Second World War where he personally sent more than four hundred thousand Jews, including close to two hundred thousand children, to the gas chambers and conducted unspeakable pseudo-scientific experiments on many of the inmates of Auschwitz;

(2) Josef Mengele has lived in freedom since the end of the Second World War, initially, it is thought, in Germany and, thereafter, for the past thirty-five years, in South America;

(3) Josef Mengele became a naturalized citizen of Paraguay in 1959, and is believed still to be living in the region; and

(4) the Minister of the Interior of Paraguay has promised that the Paraguayan Government would undertake a nationwide investigation to locate Josef Mengele and allow foreign observers to participate in such investigation.

(b) It is therefore the sense of Congress that—

(1) the United States Government should undertake all possible efforts to ensure that Josef Mengele is brought to justice;

(2) the Government of Paraguay should, consistent with its previous commitments, carry out an immediate investigation to locate Josef Mengele and, if he is to be found in that country, arrest him and extradite him to a country where a warrant is outstanding for the arrest of Josef Mengele for crimes against humanity.

(3) the United States Government should seek to enlist similar efforts on the part of other regional governments; and

(4) in pursuance of these ends, the United States Government should send representatives to Paraguay and such other regional states as appropriate to participate in these investigations;

(c) Report to Congress on efforts of the Government of Paraguay to apprehend Josef Mengele.

SEC. The President shall submit a report to the Speaker of the House of Representatives and the President Pro Tempore of the Senate on the efforts made by the Government of Paraguay to apprehend Josef Mengele. Such report shall be submitted no later than October 1, 1985 and shall include—

(1) a detailing of the efforts made by the Government of Paraguay to locate Josef Mengele;

(2) the degree to which other countries have cooperated with the investigation; and

(3) the results of the Government of Paraguay's efforts to locate and apprehend Josef Mengele.

Mr. SPECTER. Mr. President, I have sent this amendment to the desk on behalf of myself and Senators MOYNIHAN, D'AMATO, KENNEDY, and PELL. This is a sense-of-Congress resolution which calls for action with respect to the Josef Mengele case.

Josef Mengele was the selecting physician at the Nazi concentration camp of Auschwitz-Birkenau during the Second World War where he personally sent more than 400,000 Jews, including close to 200,000 children, to the gas chambers and conducted unspeakable pseudo-scientific experiments on many of the inmates of Auschwitz.

Josef Mengele has lived in freedom since the end of the Second World War, initially, it is thought, in Germany and, thereafter, for the past 35 years, in South America.

Josef Mengele became a naturalized citizen of Paraguay in 1959, and is believed still to be living in the region.

The Minister of the Interior of Paraguay has promised that the Paraguayan Government would undertake a nationwide investigation to locate Josef Mengele and allow foreign observers to participate in such investigation.

The sense of the Senate resolution calls for action by the U.S. Government to undertake all possible efforts to ensure that Josef Mengele is apprehended and prosecuted.

The Government of Paraguay should, consistent with its previous commitments, carry out an immediate investigation to locate Josef Mengele and, if he is to be found in that country, arrest him and extradite him to a country where a warrant is outstanding for the arrest of Josef Mengele for crimes against humanity.

The U.S. Government should seek to enlist similar efforts on the part of other regional governments; and

In pursuance of these ends, the U.S. Government should send representatives to Paraguay and such other regional states as appropriate to participate in these investigations, and report to Congress on efforts of the Government of Paraguay to apprehend Josef Mengele.

The President shall submit a report to the Speaker of the House of Representatives and the President pro tempore of the Senate on the efforts made by the Government of Paraguay to apprehend Josef Mengele. Such report shall be submitted no later than October 1, 1985, and shall specify the efforts made by the Government of Paraguay to locate Josef Mengele, the degree to which other countries have cooperated with the investigation, and the results of the Government of Paraguay's efforts to locate and apprehend Josef Mengele.

Mr. KASTEN. Mr. President, will the Senator yield?

Mr. SPECTER. I yield.

Mr. KASTEN. I commend the Senator for his resolution. I rise in strong support of the resolution, and I ask to be named as cosponsor.

Mr. SPECTER. I thank the distinguished Senator from Wisconsin.

Mr. President, I ask unanimous consent that the name of Senator KASTEN be added as an original cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPECTER. Mr. President, a series of hearings have been held in the Committee on the Judiciary, the Subcommittee on Juvenile Justice, in light of the fact that so many of the victims were children.

Very intensive efforts are being undertaken now by the Department of Justice and the Department of the Army. Secretary Shultz, appearing before the Foreign Operations Subcommittee, responded to questions from Senator D'AMATO and myself that every effort will be made by the Department of State to cooperate in the investigation. This sense-of-the-Senate resolution is an effort to achieve that objective and to provide for certain reporting on the efforts to be made worldwide.

Mr. President, it is my understanding that this amendment has been cleared on both sides.

Mr. D'AMATO. Mr. President, I rise to support this amendment which expresses the sense of the Congress that the Government of Paraguay should immediately carry out its investigation into the whereabouts of Dr. Josef Mengele, do all in its power to locate and arrest Josef Mengele, and extradite him to the Federal Republic of Germany. This amendment calls on the United States to send representatives to Paraguay to observe and participate in this investigation to the extent possible and reasonable. Finally, this amendment requires a report to Congress by the President on Paraguay's efforts to apprehend Mengele.

It is important that the United States send this strong signal to the Government of Paraguay that we consider their harboring of the world's most heinous criminal an affront to our relations with them and a mark on their standing in the international community. Currently, Paraguay receives military aid from the United States. We must use this assistance as a weapon to make Paraguay more responsive to the world's efforts to bring Dr. Mengele, the butcher of Auschwitz, to justice.

Dr. Josef Mengele served as the selecting physician at Auschwitz, the Nazi extermination camp in Poland. While there, he became one of history's worst mass murderers. He is responsible for the murders of more than 400,000 innocent men, women, and children. He was the officer who stood on the train platform where the arriving cattle cars delivered their cargoes of freezing and starving captives. He determined with a gesture of his hand who was to live and who was to go to the gas chambers.

At Auschwitz, Mengele also turned his medical skills into tools of evil. He personally conducted barbaric and often fatal "experiments" on innocent captives. His particular favorites were twins. Mengele would administer a drug, or attempt a surgical procedure, on one twin and, when that twin died, he would kill the other so he could perform autopsies and compare the results.

I have joined my colleagues in making the capture of Mengele a personal priority. We are actively pursuing every lead. At our request, the Army, the CIA, and other U.S. agencies are searching their records for documents that pertain to Mengele and that may lead to his capture and punishment. In the past few weeks dozens of such documents have been released as the result of those efforts.

In January, I called upon the President's National Security Adviser, the Director of Central Intelligence, and the Secretary of the Army to form a special task force to seek any and all information concerning Mengele that may exist in our files. I asked for swift release of any information they may locate, so that this war criminal can be apprehended.

These efforts are starting to pay off. We are making progress; a worldwide search is now underway. But we can, and must, do more.

We must continue to press our agencies for a rapid and thorough search of all U.S. records. Walter Kempthorne, a retired engineer, and Richard A. Schwartz, a retired attorney, both of whom served as guards at a U.S. civilian internment camp at Idar-Oberstein in Germany immediately after World War II, came forward to help us with our investigation. Mr. Kempthorne reported seeing Mengele in that camp. Mr. Schwartz recalled a "sterilization doctor" as one of the prisoners in the war criminal section there. I have asked the army to swiftly search their

records for any information which would confirm or deny this story.

If we had Mengele in our custody, then we would have a special moral obligation to bring him to justice. He has now enjoyed 40 years of liberty when he should have remained in custody to face the Nuremburg tribunal with the rest of his associates. Now, we must act before it is too late.

To make certain no one could ever believe he could safely commit genocide again, we must never rest in our pursuit of the bloody-handed directors of Hitler's holocaust. Mengele must be found, and he must be found now.

I urge my colleagues to support this amendment and send a message to Paraguay and to the world that perpetrators of genocide will not be allowed to live free forever.

Thank you, Mr. President.

Mr. KENNEDY. Mr. President, today I am pleased to join Senators SPECTER, MOYNIHAN, and others in introducing this amendment urging the Government of Paraguay to bring Josef Mengele to justice.

As my colleagues are aware, this year marks the 40th anniversary of the end of World War II. An intensive search is underway for Josef Mengele who personally sent more than 400,000 men, women, and children to the gas chambers and who conducted repulsive and sadistic human experiments on thousands of innocent victims at the concentration camps.

Last February, the Reagan administration joined the worldwide effort and opened its own investigation to locate Mengele. Last March, I proposed that a reward of $1 million be authorized to be paid by the Department of Justice for information leading to the apprehension of Mengele. To date, the Governments of Israel and West Germany, the Washington Times, as well as the Simon Wiesenthal Center in Los Angeles have set aside a total of about $3.3 million as a reward to persons responsible for Mengele's capture—bringing the total amount of rewards to well over $4 million from public and private groups. Such a substantial amount will most likely induce those with information concerning Mengele to come forward.

Experts at the Simon Wiesenthal Center in Los Angeles and other Nazi tracks believe that Mengele is alive and may be living in a remote area of Paraguay. He is also reported to have been sighted in recent years in other countries in South America, as well as in Europe.

The amendment we introduce today urges Paraguay, the United States, and other governments in the region to join these efforts to locate Mengele. It places the Senate on record as asking Paraguay to carry out an immediate investigation to locate Mengele and extradite him to a country where a warrant for his arrest is outstanding for his crimes against humanity.

This amendment also asks the U.S. Government to undertake all possible efforts to ensure that Josef Mengele is brought to justice and requests that the President submit to Congress a report on the efforts made by Paraguay and other countries to locate Mengele.

The sadistic and barbarous crimes committed by Josef Mengele are an affront to civilization and we must urge all those who have the capacity to locate him to join in our efforts to locate Mengele. His abominable crime must not go unpunished.

I urge my colleagues to support our amendment.

Mr. LUGAR. Mr. President, we find this amendment to be one that has great merit. It is timely, obviously. The eyes of the world are on this situation. We appreciate the diligence of the Senator from Pennsylvania in crafting this amendment, and we are prepared to accept it.

Mr. PELL. Mr. President, I, too, think it is an excellent amendment and urge its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 139) was agreed to.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MOYNIHAN. Mr. President, I thank my colleagues for agreeing to this amendment respecting the search for Josef Mengele.

With adoption of this amendment, the Senate has agreed that both the Paraguayan and the United States Governments should undertake greater efforts to find the notorious Dr. Josef Mengele and see that he is brought to the justice he has for 40 years evaded.

Despite a promise made to an American delegation last November that the Paraguayan authorities would cooperate with Americans in this search, no progress on this front has yet been realized. It is time to reiterate, and emphasize, the deep concern that exists in this country that Paraguay fulfill its obligations, both under customary international law and bilaterally.

This amendment requires that the President provide to Congress a report next October on the progress that hopefully will have been made by that time. That report surely will be instrumental in this body's deliberations about whether and how much foreign aid to provide to Paraguay next year.

On February 18, 1985, I introduced Senate Concurrent Resolution 14, expressing the sense of Congress that Josef Mengele should be brought to justice. Since then, 21 Senators have joined as cosponsors, and have similarly expressed their outrage that, after 6 months, the Paraguayan Government has not yet begun its investigation into the whereabouts of Josef Mengele.

Josef Mengele was the chief doctor at the Nazi concentration camp of Auschwitz-Birkenau during the Second World War where he personally ordered more than 400,000 Jews—including close to 200,000 children—to the gas chambers after, in many cases, conducting barbarous, unspeakable pseudoscientific experiments on many of them. Despite this vast criminality, Mengele has lived in freedom since the end of the Second World War and, for the past 35 years, in South America.

Mengele apparently became a naturalized citizen of Paraguay in 1959, and is generally believed to be living there still. The Paraguayan Minister of Interior promised a private American group on November 22, 1984, that the Paraguayan Government would undertake a nationwide investigation to ascertain the whereabouts of Josef Mengele and that it would allow foreign observers to participate in the investigation. But still, now 6 months later there has been no investigation.

The civilized peoples of the world ought no longer allow Josef Mengele's crimes to go unpunished, and to allow him to live, untried, in freedom. The world community and the United States must ensure that justice is done.

I would like to thank the distinguished chairman of the Senate Committee on Foreign Relations, Mr. LUGAR, and the distinguished ranking minority member of the committee, Mr. PELL, for their assistance in the passage of this amendment. Mr. President, again the U.S. Senate has shown that it stands on the side of moral right and justice. Let us hope that there is no further delay in bringing Josef Mengele to trial.

Mr. President, I ask unanimous consent to have printed in the RECORD the text of Senate Concurrent Resolution 14, a list of the cosponsors of the concurrent resolution; and an article from the New York Times of November 27, 1984.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. CON. RES. 14

Whereas Josef Mengele was the chief doctor at the Nazi concentration camp of Auschwitz-Birkenau during the Second World War where he personally sent more than four hundred thousand Jews, including close to two hundred thousand children to the gas chambers and conducted unspeakable pseudo-scientific experiments on many of the inmates of Auschwitz;

Whereas Josef Mengele has lived in freedom since the end of the Second World

War, initially in his hometown of Gunzburg, in the American zone of Germany, and thereafter, for the past thirty-five, years, in South America;

Whereas Josef Mengele became a naturalized citizen of Paraguay in 1959, and is believed still to be living there; and

Whereas the Minister of the Interior of Paraguay has promised the members of a delegation sponsored by the International Network of Children of Jewish Holocaust Survivors that the Paraguayan Government would undertake a nationwide investigation to locate Josef Mengele and allow foreign observers to participate in such investigation: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That it is the sense of Congress that—

(1) the Government of Paraguay should immediately carry out an investigation to locate and arrest Josef Mengele and extradite him to the Federal Republic of Germany;

(2) the United States should send representatives to Paraguay to observe and participate in such an investigation; and

(3) the United States should take all possible actions to ensure that Josef Mengele is brought to justice.

LIST OF COSPONSORS OF SENATE CONCURRENT RESOLUTION 14

Senators Sarbanes, Proxmire, Exon, Kennedy, Chafee, Quayle, Stennis, Lautenberg, Hollings, Simon, Boren, Cranston, Mattingly, Levin, Durenberger, DeConcini, Kerry, Dodd, Bradley, Biden, and Dixon.

[From the New York Times, Nov. 27, 1984]

PARAGUAY PLEDGES TO HUNT FOR NAZI—PRIVATE AMERICAN GROUP SAYS AUTHORITIES DENY KNOWING MENGELE WHEREABOUTS

(By Ralph Blumenthal)

A delegation that traveled to Paraguay seeking information and publicity in a hunt for the Nazi fugitive Josef Mengele reported yesterday that officals still denied knowing the whereabouts of the notorious Auschwitz doctor but had pledged to search for him.

The four-member private group, which returned to New York on Sunday, said the Paraguayan Government had agreed for the first time to allow foreign observers to monitor its investigation and to answer written questions about it. It also agreed to consider allowing a Paraguayan newspaper to run an advertisement offering a $25,000 reward for information leading to the capture of Dr. Mengele, 74 years old.

District Attorney Elizabeth Holtzman of Brooklyn, one of the team, called the agreements an important breakthrough, but she and others also admitted to doubts over the Government's sincerity. Miss Holtzman said she went as a former member of Congress who had pursued cases of former Nazi war criminals living in the United States.

Another member of the delegation, Menachem Z. Rosensaft, a lawyer whose mother was a prisoner at Auschwitz, said he was convinced that the Paraguayan authorities, if they wanted to, would be able "rather easily to put their hands on him."

Mr. Rosensaft, founding chairman of the International Network of Children of Holocaust Survivors, said the visit was intended in part to focus public attention on the search for the Nazi doctor, who he said had selected up to 400,000 Jews, including 200,000 children, for the gas chambers at the Auschwitz-Birkenau death camp and conducted pseudoscientific medical experiments on prisoners.

OTHER MEMBERS OF DELEGATION

The other members of the delegation were Beate Klarsfeld, a West German woman who was pursued Nazi war criminals around the world, and Bishop Rene Valero of the Brooklyn Archdiocese.

They said that from last Thursday to Saturday in Asuncion, the Paraguayan capital, they had met with Eugenio Jacquet, Minister of Justice and Labor; Luis Maria Argana, president of the Supreme Court, and Sabino Augusto Montanaro, Minister of the Interior.

They said they had been unable to arrange a meeting with President Alfredo Stroessner, who was said to have been out of the city.

Efforts to find and arrest Dr. Mengele in Paraguay go back more than 20 years, shortly after his flight there from Argentina, where he had escaped after World War II. He was granted Paraguayan citizenship in 1959 but the Government revoked it in 1979, maintaining he had been absent from the country for more than two years. Witnesses, however, told of seeing him in a remote region of Paraguay in 1978.

Since 1962, the West German Government has been seeking to extradite him to stand trial for Nazi killings.

Miss Holtzman said the United States Government could also put pressure on Paraguay.

AMENDMENT NO. 140

(Purpose: To fund International organization and programs at the level requested by the President)

Mr. HELMS. Mr. President, I send an amendment to the desk.

THE PRESIDING OFFICER. The amendment will be stated. The bill clerk read as follows:

The Senator from North Carolina [Mr. HELMS] proposes an amendment numbered 140:

On page 50, strike line 15 through line 26, inclusive, and insert in lieu thereof the following: "There are authorized to be appropriated to the President for grants to carry out the purposes of this chapter, in addition to funds available under any other Acts for such purposes, $196,211,000 for the fiscal year 1986."

Mr. HELMS. Mr. President, this is an amendment that will save the American taxpayers $71,475,000, according to my calculation, and will make the vast majority of the American people happy.

Here is the point, Mr. President: This amendment reduces spending for international development programs of the United Nations to the amount requested by the President. In other words, the $196,211,000 specified in the amendment is what the President asked for. The committee in its wisdom added $71,475,000 to that.

Last week, Mr. President, the Senate voted to carry out a number of adjustments in our domestic spending programs and voted to freeze defense spending, and the question arises, can we exempt the United Nations from this process of scrutiny and judicious management?

Let me give a few facts which are never reported, to my knowledge, by any of the major news media. They are silent in seven languages about it. I wonder how many Americans know that voluntary contributions by American taxpayers to the United Nations supply from 22 percent to over 40 percent of the total funding of the various United Nations agencies?

The Soviet Union voluntary contributions, on the other hand, supply less than 1 percent of the funding of these agencies.

The United States pays assessed contributions to the United Nations at a fixed rate of 25 percent of the total received by the United Nations, while the Soviet Union with two of its puppet members, Byelorussia and the Ukraine, contribute 12 percent of the total.

Moreover, the Soviets are not even paying that. They are $200 million in arrears. So Uncle Sam has been translated into Uncle Sucker.

In 1983 the State Department reports that the United States paid a total of $961.5 million to the United Nations, a conservative figure which does not include several other contributions. Let me repeat that figure for emphasis: $961.5 million. The Soviet Union, on the other hand paid approximately $60 million the same year.

The figures are fuzzy because there is a certain tendency in this town to protect the U.N. account from excessive scrutiny by Members of Congress and the American people. Article XIX of the U.N. Charter requires that a member more than 2 years in arrears of assessed contributions should lose its vote in the General Assembly. Yet the United States, acting on a precedent established by Ambassador Goldberg in 1965, has never demanded that this rule be applied to the Soviet Union, which is now, of course, liable under the rule.

Let us move along and see what is being done to the American taxpayer by the United Nations.

I wonder how many Americans, who have to cough up all this money, after all, are aware that the heads of these various U.N. agencies have a net after-tax income of $110,000 a year. This is far in excess of the salaries paid to any U.S. Government employee. In real terms it is pretty close to what the President of the United States gets. Bear in mind that, of the $110,000 which these yo-yos at the United Nations draw, 25 percent comes from the American taxpayer. These U.N. bureaucrats have an after-tax income of $110,000 a year.

Midlevel personnel of the agencies addressed by my amendment get between $40,000 and $60,000 a year tax free. This is more than the heads of U.S. executive agencies take home from their job.

To describe the retirement packages for these organizations, generous is too modest a term. After 30 years with

the U.N. development agencies, for instance, the higher ranks receive a lump sum tax free of $300,000 plus an annuity of $50,000 a year.

By bringing their U.N. salaries in line with the U.S. civil service salary levels, the agencies will be able to maintain their programs without a reduction in humanitarian service.

I am going to shorten this, Mr. President, and briefly address the question of espionage. From time to time I have been in correspondence with the distinguished Director of the Federal Bureau of Investigation. I believe he will tell any Senator who inquires that the United Nations is a hotbed of spies. If you want to consult the distinguished former Ambassador from the United States to the United Nations, Jeane Kirkpatrick, ask her for her assessment.

All in all, Mr. President, I would feel that I had failed my responsibility if I did not try at least to reduce the amount of funding of the United Nations to what the President of the United States requested. That means a cut of $71,475,000 from what the committee recommended, but it meets precisely the $196,211,000 that the President of the United States requested.

I think I need to say no more, Mr. President. This is a matter of great concern to citizens all across this land. For years and years they have seen what has happened to U.S. interests in the United Nations.

Now, when the United Nations was established there were all sorts of great hopes for what it would render to mankind and I submit that it has been a total failure.

I yield the floor.

The PRESIDING OFFICER (Mr. DURENBERGER). The Senator from Indiana.

Mr. LUGAR. Mr. President, the distinguished Senator from North Carolina has made a number of insightful comments in regard to the problems of the international organizations. Indeed, this body has addressed many of the difficulties that we have with the United Nations particularly and the Senator has revisited those.

I really do not propose at this hour to debate with the Senator on the quality of service of the salary levels, or what have you.

There are a number of thoughts that come to mind that distress many Americans about the international organizations.

But let me just say that earlier in the day we had a very important vote and it went to a rollcall vote. We have not had many issues that went that far during consideration of the bill, but this one did, an important amendment by the distinguished Senator from New Mexico [Mr. BINGAMAN] who felt that the foreign military assistance sales ought to be decreased by $100 million.

At that time this Senator mentioned that we had within the committee tried to come to some agreement, and it was not easy to do so, between the Senators who felt very strongly that more foreign military assistance was required and others who felt that more development funds should be required. But all members of the committee were constrained by the fact that we were attempting to freeze the levels of activity and that gave us a low ceiling under which to operate.

We succeeded in our general budgetary purpose and we succeeded, I think, in fashioning a compromise between those who favored essentially the military development and those the economic development.

Part of that compromise was the figure for international organizations, the figure that comes into play in the Senator's present amendment. The Senator proposes to reduce the budget for international organizations and programs by a substantial amount, by an amount that would take it down to the amount that was requested by the administration. We started at that amount and deliberately increased the amount as a part of the general compromise worked out with all members of the committee. I support that compromise. I support that budget.

I think that looking at these items line by line would be a project in which all of us could indulge, and indeed, the Senate might wish to do that. I hope not, because I believe that we have struck a balance. We have tested that balance once before today by defeating an amendment from the other side.

The Senator from North Carolina is aware of that process. He feels deeply, I know, about the difficulties in the international organizations and wants to express that feeling in the form of an amendment and at the same time move substantively to reduce the total expenditures. I appreciate those points of view.

But I would ask the Senate to affirm once again the general outline reached by a very large bipartisan consensus within the Foreign Relations Committee, within the purview of the committee that had time to explore each of these items and test them out for size, at least in their relationship to each other. So for that reason, I respectfully must oppose the amendment by the distinguished Senator from North Carolina and ask that the general committee compromise be affirmed once again.

Mr. KENNEDY. Mr. President, I would like to speak very briefly. I do not know what the desire is of the chairman of the committee.

I might just mention some brief statistics, Mr. President. Today over 40,000 children die a day in the world, and most of them die from preventable diseases. Over 15,700,000 die a year under the age of 5.

Yesterday, I had the opportunity to attend with five Nobel laureates, Dr. Salk and Dr. Sabin, and others at the Pan American Health Organization to help launch a program for the immunization of children in Central America and South America against polio. Rotary International has pledged over $100 million to help purchase those vaccines over the next 6 years. We have the private sector involved.

And two of the United Nations organizations which the Senator from North Carolina has identified for program cuts were instrumental in providing the infrastructure and support for that program which can hopefully have some impact in lessening the possibility of polio and other childhood diseases in Central America and South America. He would cut the outstanding work of those U.N. agencies.

In El Salvador this past year, thanks in part to WHO support, there was a total ceasefire by both government troops and by the guerrillas to allow for a countrywide immunization program for the first time in years. For what program? For immunizing children against polio—for children's health programs, originated by the religious groups in that country with the support of U.N. agencies. And the organizations which were dealing with this are the two organizations which the Senator from North Carolina has identified for reduction in funding. The first time there has been a silence in gunfire in El Salvador dealt with children and with the support for children's immunization programs.

None of us hold a brief for overstaffed organizations filled with bureaucrats. But I think that the chairman of the Foreign Relations Committee has already given this body ample assurances that he is going to review that particular issue. He has demonstrated in the past his desire to do so and to ensure that the American taxpayers' dollars that go to those organizations are, to the maximum extent possible, going to have some impact on children's well-being.

I commend the position that has been taken by the chairman of the Foreign Relations Committee. I know how strongly the Senator from Indiana believes in this program. UNICEF at this time supports the Children's Immunization Program which I have outlined. The Oral Rehydration Program, which was established in Dhaka, Bangladesh, which I have had the opportunity to visit, is probably the most effective program for dealing with the principal killer of children in Third World countries and it is supported by the United Nations. That program costs only a few million dollars, but it has had an extraordinary impact in

saving the lives of children throughout the Third World.

The other programs which would be affected by his amendment are the water program—and we understand the importance of that, particularly when water is used in terms of infant formula—and also the support for children's programs as a result of the famine in Africa.

So, the case, I think, as been well made by the chairman of the Foreign Relations Committee. I think with his assurance that we are going to maximize every tax dollar that goes through those organizations, I cannot think of an amendment that deserves to be defeated as much as this one. It is a gratuitous slap at U.N. agencies who are doing outstanding work.

Mr. PELL. Mr. President, I think the arguments against this amendment have been presented very rationally and very eloquently, both by the chairman of the committee and by the senior Senator from Massachusetts. I think what some of us do not realize is that the programs that would be affected are those very same programs that have the highest public approval in the United States. Here I am thinking of the UNICEF, the U.N. Children Fund; U.N. Development Program; World Heritage Trust; U.N. Torture Fund; the Trust Fund to Combat Poverty and Hunger in Africa; World Food Program; U.S. Trust Fund for South Africa; and the Institute for Training and Research.

These are all good and successful programs, and they are voluntary programs depending on voluntary contributions. They do not derive their funds from the regular assessment.

I join in hoping that these programs will not be disturbed.

Mr. HELMS. Mr. President, we have just heard a recitation of the argument that occurs every time a proposal is made to cut Federal spending. It is the argument that could be boiled down to one line: "Throw money at problems; that is the way to solve them."

I thought I made clear in my opening remarks that the United Nations is rampant with mismanagement, but nobody around this place wants to pay any attention to that. It is going on throughout the Federal Government and that is why the American people are upset with this Congress, because they think we are not listening.

Time and time again, we hear the same old argument, "If you don't spend more money for this, you are in favor of cholera or smallpox." Bosh. It just is not so, and those who say it know it is not so.

I am addressing the mismanagement and the waste, which is so obvious in the United Nations. And I dare say that no Senator wants to take me on in debating that subject with respect to this amendment or others that I could offer.

Now, I want to talk with the distinguished manager of this bill for a moment and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. LUGAR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LUGAR. Mr. President, I would like to suggest, respectfully, to the distinguished Senator from North Carolina this formula for resolution of this difficulty, because it appears to me that we have two different procedures, two different tracks. We are in the authorization process now, but, as the Senator knows, we will be proceeding in due course to the appropriations process. Another group will examine that and ultimately all of us will have to examine it again.

It would occur to the Senator from Indiana that between this time and that time there might be an examination by our committee, by the Appproriations Committee, and by all Senators who are interested, of the actual facts of operations in these international organizations.

The Senator has made a number of points, and I suspect many Senators will be intrigued to find out more in trying to make those judgments. With that in mind, I would ask the Senator's cooperation, at least on this occasion, to retain the formula of cooperation and bipartisan support that we have in the committee for figures that we have in the authorization but with the full understanding that the facts will be out, that the Senators may reach other judgments at a different point, and that we will have another revisiting of this project during the appropriation process.

Mr. HELMS. Mr. President, I am grateful to my friend from Indiana and I respect him. Let me say at this point that the distinguished Senator does a remarkable job as chairman of the Foreign Relations Committee, and it is not easy to be chairman of any committee, let alone the Foreign Relations Committee.

Having said that, the Senator has made me an offer I cannot refuse. As a matter of fact, it is one that I hoped the Senator might offer when I submitted the amendment. The Senator is exactly right, Mr. President. This is an authorization bill. The real spending of the money occurred on the appropriation bill.

What I am trying to do with this amendment—and what I intended to do—was to buy a little time to have this matter explored, examined and studied by Senators. We may or may not come up with a majority who agree with me. If I lose, I lose. But I think I am right about it. On the other hand, I have no desire whatsoever to frustrate the distinguished chairman in his efforts to reach a conclusion of the consideration of this bill.

So with that in mind, Mr. President, and with the understanding that everybody will be on notice that when the appropriations bill comes, this matter will be reviewed; and with the further understanding that the distinguished chairman of the Foreign Relations Committee and the Senator from North Carolina will work together to achieve a study that is fair, equitable, and objective on the whole matter, I am inclined to withdraw the amendment. But before I do so, I want to thank the distinguished chairman for his customary courtesy, and to express again my admiration for the great job he is doing as chairman of the Foreign Relations Committee.

Mr. President, I withdraw the amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. LUGAR. Mr. President, I thank the Senator for his thoughtful remarks on this occasion, and for his great cooperation in handling this bill.

AMENDMENT NO. 141

(Purpose: To urge discussions with the Canadian Government to aggressively pursue immediate reduction in the Canadian export of cattle and hogs to the United States.)

Mr. MELCHER addressed the Chair.

The PRESIDING OFFICER. The Senator from Montana.

Mr. MELCHER. Mr. President, I send an amendment to the desk for myself and Mr. PRESSLER, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Montana [Mr. MELCHER], for himself and Mr. PRESSLER, proposes an amendment numbered 141.

At the end of the bill, add the following new section:

SEC. . Since, livestock prices have been in decline for some time due to excessive supply partially caused by dramatic increases in importation of live cattle and hogs from Canada, which has increased by 1,000 percent in the last decade in the case of hogs alone; and

Since, American livestock producers are suffering from the same general economic crisis affecting all of agriculture, and many will face liquidation or foreclosure in the near future; and

Since, the disparity between the U.S. and the Canadian dollar amounts to 32%-34% and results in even further increases in Canadian hogs and cattle being imported into the United States;

Therefore, it is the sense of the Congress that the President should direct appropriate members of the Administration, including the United States Trade Representative, the Secretary of Agriculture, and the Secretary

of Commerce, to aggressively pursue discussions with the Canadian Government directed toward immediate reduction in the Canadian export of cattle and hogs to the United States.

Mr. MELCHER. Mr. President, I am offering this amendment on behalf of myself and the Senator from South Dakota, Senator PRESSLER. I am offering it as an effort to get some agreement between ourselves and the Canadians on the situation that we are finding ourselves in right now—principally because of the disparity of the Canadian dollar as compared to the American dollar.

The packer buyers from the United States are offering the Canadian hog and cattle producers more than what Canadian markets can offer, and, therefore, there is a heavy importation at this time of both Canadian cattle and hogs.

The disparity—the differential, as I understand it—between the value of the Canadian dollar as compared to the U.S. dollar is approximately somewhere between 30 to 34 percent. Obviously, this makes our markets down here much more attractive to those Canadian livestock producers. Again, I do not blame them for the situation. I only ask in the sense-of-the-Congress resolution that the mechanism that we employ when there is some economic catastrophe affecting either our good neighbor, Canada, or ourselves be ironed out as quickly as possible.

This suggests to me that restraint on the part of the Canadian shipments into the United States of both cattle and hogs should be reduced, and it should be reduced immediately.

That is the only purpose on an economic basis. But there is one other matter that I should draw to the attention of my colleagues. That is this: About a year ago the use of choloranphenicol, which is an antibiotic, was banned in this country for food producing livestock because it can develop into or cause development of aplastic anemia when it is consumed by humans. The Canadians, however, have not banned the use of the drug in their country. Three States have banned the importation of animals treated with this drug. Those States are Nebraska, South Dakota and Iowa. The Governor of South Dakota, Governor Janklow, has required that all Canadian hog shipments into South Dakota must provide a stringent certification that the animals were never treated with choloranphenicol. The certifications are very strict, and the Canadian hog importation into South Dakota has been stopped.

The Canadian Government has announced that a 60-day exemption period has begun to reevaluate the further use of this particular drug. The main problem with it is that it is hard to identify in residue samples, and hence there is the rather stringent action taken by the Governor of South Dakota requiring the certification on the part of the shipper that this drug was not used in the production of those hogs that entered South Dakota from Canada.

I mention this, Mr. President, in relation with the sense-of-the-Congress resolution that I am offering in behalf of myself and Senator PRESSLER. I mention it because it, too, has a bearing on our concern about hogs coming in from Canada. I repeat, our relationship with our Canadian neighbors has been ideal, one where we have generally been able to work out problems that exist between the two countries in terms of imports or exports. I hope that this particular problem can be worked out quickly. I offer the amendment on that basis to urge on the President and appropriate members of the administration that they engage immediately in discussion with Canadian officials.

Mr. SYMMS. Mr. President, will the Senator yield?

Mr. MELCHER. I shall be delighted to yield.

Mr. SYMMS. I thank the distinguished Senator for yielding.

Mr. President, I cannot help recalling that in my first term in the other body, the distinguished Senator from Montana was then chairman of the forestry subcommittee, on which we worked very closely for 4 years in formulating some very important legislation which affected the National Forest System and the timber supply in the Pacific Northwest and the intermountain region in Montana, Wyoming, and other States. I was wondering if the Senator had given any thought, in this sense-of-the-Senate resolution, which is asking the administration to make immediate aggressive pursuit of the discussions, to including timber in the sense-of-the-Senate resolution, or did he feel it would confuse the issue too much?

If the Senator would want to modify his amendment, I think that, since timber producers are in a similar situation, it could be added right at the end of the beginning clause, where it says "Since, the disparity." He could add "Since timber producers are in a similar situation." At the end he could, if he wanted to modify it, make it read "cattle, hogs, and timber."

I wonder if that would not be an appropriate place to put it or what the Senator would feel on that.

Mr. MELCHER. Mr. President, I thank my friend from Idaho for bringing this point up. I believe it would be inappropriate on this particular amendment, but I must confess that, although we have gone through the process with the Canadians regarding the logs and the lumber products that come into the United States from Canada, principally from the point of view of the disparity in the value of their money compared to ours, I would only say this: It would be inappropriate in this particular sense-of-the-Senate resolution, but I would be glad to cooperate with my friend from Idaho on a certain one because a parallel situation does exist.

We have had a longer time to look at the log and lumber situation where approximately 30 to 35 percent of the lumber products that we use in this country that are made from soft wood are from Canada, which is very damaging for our mills here in the United States. So we have not put a stop to it, but perhaps it would be time to have another look at it.

Mr. SYMMS. I just make the suggestion; I do not wish to interfere in any way with the Senator's amendment because it does speak to a problem that is of great interest to all agricultural States.

I see the other distinguished Senator from Montana on the floor. He has led a great deal of the discussion on this subject in the Finance Committee on the problem of Canadian timber products in this country. It might just be that we can let the record show, which it will show, to the administration in this sense-of-the-Senate resolution that the same problem exists with respect to timber and an aggressive immediate response is needed with respect to timber, also.

I think the distinguished Senator, as I know him—none of us is asking for a trade war with our friends from the north in Canada, but we do have an immediate problem on which we wish we could get some redress, to somehow soften the pressures which we feel in the wood processing industry.

I thank the Senator very much for his comment. I appreciate his answer.

Mr. MELCHER. I thank my friend from Idaho for his question. I think he is correct that the colloquy which has transpired perhaps will push our administration officials even further in discussions with Canada on this situation.

Mr. PRESSLER. Will my colleague from Montana yield?

Mr. MELCHER. I am glad to yield.

Mr. PRESSLER. Mr. President, the Senator from Montana and I have worked for the last 2 years on this subject in terms of trying to get the Canadians to limit their export of hogs and to change their rules on the use of the antibiotic, chloramphemical. I understand that on May 7 the Canadian Government issued an informational letter to their bureaucracy, with a 60 day comment period. Without question, the governments of the three States are attempting to protect the health of the people involved by banning Canadian livestock imports.

There are a number of other international trade issues that have arisen on the importation of hogs. A prelimi-

nary International Trade Commission investigation has found that Canada provided their hog producers an 18-percent subsidy. As a result of this finding, bonds must now be posted when Canadian hogs come into the United States.

I was told by the Canadian Ambassador just a couple of days ago that the health concern would be solved shortly by Canada bringing its regulations into line with U.S. regulations.

I think this is a very important amendment, because it raises the question of importation of food products that do not meet the same health requirements as food raised in the United States. It is something we must be very vigilant on. We must protect our consumers. I think it is a very important subject.

Mr. President, I join this effort and have worked on it for several years. I have testified before various committees, written letters, and participated at meetings during the last 2 years. It is of great importance, and I do hope we will see it resolved in the near future. If it is not resolved, our U.S. Government should declare a moratorium on the importation of Canadian livestock until the same drug standard is met.

I thank my colleague very much.

Mr. LUGAR. Mr. President, we are prepared to accept the Melcher amendment and we recommend its passage.

Mr. PELL. Mr. President, I am glad, too, from the minority side to accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 141) was agreed to.

Mr. LUGAR. I move to reconsider the vote by which the amendment was agreed to.

Mr. PELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 142

(Purpose: To condition security assistance to Guatemala on the inauguration of a civilian government and significant improvements in human rights abuses; and to prohibit the use of U.S. funds for the Guatemala rural resettlement program)

Mr. KENNEDY. Mr. President, I send an amendment for myself and Mr. DODD to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Massachusetts [Mr. KENNEDY] for himself and Mr. Dodd proposes an amendment numbered 142.

(a) CONDITIONS ON MILITARY ASSISTANCE AND SALES.—For fiscal year 1986, assistance may be provided for Guatemala under chapter 2 (relating to grant military assistance) or chapter 5 (relating to international military education and training) of part II of the Foreign Assistance Act of 1961 and sales may be made and financing may be provided for Guatemala under the Arms Export Control Act (relating to foreign military sales) only if the President makes the following certifications to the Congress:

(1) For fiscal year 1986, an elected civilian government is in power in Guatemala and has submitted a formal written request to the United States for the assistance, sales, or financing to be provided.

(2) For fiscal year 1986, the Government of Guatemala made demonstrated progress during the preceding year (A) in achieving control over its military and security forces, and (B) toward eliminating kidnapings and disappearances, forced recruitment into the civil defense patrols, and other abuses by such forces of internationally recognized human rights.

(b) CONTINUATION OF IMET PROGRAMS UPON ELECTION.—Notwithstanding subsection (a), up to 30 percent of the amount allocated for Guatemala for fiscal year 1986 for assistance under chapter 5 of part II of the Foreign Assistance Act of 1961 may be provided, upon the election of a civilian government in Guatemala, for the continuation of existing programs under that chapter.

(c) CONSTRUCTION EQUIPMENT AND MOBILE MEDICAL FACILITIES AND RELATED TRAINING.—If the conditions specified in subsection (a) are met, Guatemala may be provided with the following for fiscal year 1986 (in addition to such other assistance, sales, or financing as may be provided for Guatemala):

(1) Sales of construction equipment and mobile medical facilities to assist in development programs that will directly assist the poor in Guatemala.

(2) Sales of training, to be provided outside of Guatemala, which is related to the sales described in paragraph (1).

(3) A total for fiscal year 1986 of no more than $10,000,000 in credits under the Arms Export Control Act for sales described in paragraphs (1) and (2). Such sales and credits shall be provided only to enable the military forces of Guatemala to obtain equipment and training for civilian engineering and construction projects and mobile medical teams, which would not be used in the rural resettlement program.

(d) PROHIBITION ON FURNISHING WEAPONS.—Funds authorized to be appropriated by title I of this Act may not be used for the procurement by Guatemala of any weapons or ammunition.

(e) SUSPENSION OF ASSISTANCE IF A MILITARY COUP OCCURS.—All assistance authorized by this Act which is allocated for Guatemala shall be suspended if the elected civilian government of that country is deposed by military coup or decree.

(f) RURAL RESETTLEMENT PROGRAM.—Assistance provided for Guatemala for the fiscal year 1986 under chapter 1 of part I (relating to development assistance) or under chapter 4 of part II (relating to the economic support fund) of the Foreign Assistance Act of 1961—

(1) may not be provided to the Government of Guatemala for use in its rural resettlement programs; and

(2) shall be provided through private and voluntary organizations to the maximum extent possible.

(g) INVITATION FOR ICRC TO VISIT GUATEMALA.—The Congress calls upon the President to urge the Government of Guatemala to allow the International Committee of the Red Cross—

(1) to conduct an unimpeded visit to Guatemala in order to investigate humanitarian needs in that country, and

(2) to investigate the possibilities of its providing humanitarian services in that country.

(h) RELATIONS BETWEEN BELIZE AND GUATEMALA.—It is the sense of the Congress that the United States should use its good offices and influence to encourage the Government of Guatemala to recognize the independence of Belize and to enter into a mutual nonaggression treaty with Belize.

Mr. KENNEDY. Mr. President, the issue of Guatemala is a matter that has been before the Foreign Relations Committee, raised by my friend and colleague from Connecticut [Mr. DODD], and I think it is appropriate to address this issue even in the final moments of consideration of this foreign aid bill.

The bill, for the first time since 1977, offers $10 million in military assistance to Guatemala. This amendment would postpone or delay that assistance until the President certifies that there has been a transition from military to civilian rule and that the human rights abuses of the security forces have been significantly reduced if not totally eliminated.

The human rights record of the Government of Guatemala has been appalling and there continue to be gross abuses of human rights—kidnapings continue, murders continue, disappearances continue. Over 50 people a month are disappearing today. Over 38,000 Guatemalans have disappeared in the last 38 years.

Just this last spring, two leaders of a human rights group were murdered in cold blood.

In 1983, three U.S. citizens, employees of AID, were kidnaped and murdered, and there have been no prosecutions. In 1984, the Guatemalan Human Rights Commission reported 713 killings and 506 disappearances had occurred—just last year.

Mr. President, this amendment has three major parts.

First, it prohibits military assistance and FMS credits to Guatemala until an elected civilian government is in power and until the Government of Guatemala has made demonstrable progress in controlling its military and security forces, and in elimination certain human rights abuses.

Second, no more than $10 million may be provided for the military forces of Guatemala to obtain equipment and training for civilian engineering and construction projects and mobile medical teams. No funds may be used for the procurement of weapons or ammunition, and all assistance will be suspended in the event of a military coup.

Third, all additional assistance shall be provided through private and voluntary organizations to the maximum extent possible.

The Reagan administration has asked for an increase in military assistance to Guatemala from $300,000 to $10.3 million. Until last year's $300,000, we had given no military assistance to Guatemala since 1977, when the military government withdrew their request for assistance rather than comply with President Carter's requirements for human rights certification.

The administration justifies military aid on the basis of the Guatemalan Government's plan to hold presidential elections this fall and to inaugurate a constitutional government early next year.

But there is no democractic government today.

A presidential election has not yet been held.

The ballots have not yet been counted.

The military has not yet allowed the future constitutional government to be inaugurated.

Military aid now to a de facto military government is putting the cart before the horse. Let us wait for a democratic government to be inaugurated before we approve military aid.

That degree of caution is not merely desirable; it is essential if we want to truly support democracy in Guatemala.

We have also been told that the human rights situation has improved dramatically. They conclude that the relaxation is real, that unconditional assistance is needed by the government to protect the electoral process against guerrilla attacks, and that the prohibition on providing weapons and ammunition is "highly undesirable" in view of the "democractic" role of the armed forces.

But the human rights situation in Guatemala is still bad, and the number of victims of violence in Guatemala is staggering. America's Watch, a widely recognized human rights organization, reported in February 1985:

> Torture, killings, and disappearances continue at an extraordinary rate, and millions of persons remain under the strict scrutiny and control of the government through the use of civil patrols and "model villages". Guatemala remains, in short, a nation of prisoners.

The UNHCR has put the number of Guatemalan refugees in Mexico at 40,000, and the number in Honduras at 1,500. We cannot even begin to guess at the number in this country. In late 1984, an official census supervised by the supreme court stunned the nation when it found that there were over 51,000 orphans in three provinces of the highlands—and that estimates indicated the figure would rise to 100,000 if the other highland provinces and the refugees in Mexico were included.

Over 50 people a month are disappearing, a rate higher than that of the bloodiest years of 1981-82. The Guatemalan bishops stated in September of 1984 that over 38,000 Guatemalans have disappeared in the last 30 years since the CIA aided coup that deposed the last civilian government. Time has shown that the pace and degree of human rights violations have been severest when the democratic challenge to those in power is the greatest, and in 1982 especially the army showed its willingness to kill large numbers of noncombatants, including whole villages, in order to eliminate the guerrillas' popular support.

This spring saw the murders of two leaders of the Mutural Support Group. Their crime—an effort to discover the fate of their loved ones who had disappeared. The Kissinger Commission captured the situation clearly when it wrote of "the brutal behavior" of the Guatemalan security forces: "In the cities they have murdered those even suspected of dissent. In the countryside, they have at times killed indiscriminately to repress any sign of support for the guerrillas." This is what the Kissinger Commission said about these people, and we should know that these are the people still in power today in Guatemala; these are the people who will receive these millions of dollars of U.S. assistance.

The history of the military in Guatemala demands that we wait. They have ruled with force, violence, and total disregard for human rights. In the first years of this decade they killed not hundreds but thousands of rural peasants in a scorched earth policy aimed at defeating the small guerrilla opposition. It was a policy which had no respect for human life. It was a policy that produced an estimated 100,000 refugees and 500,000 displaced persons.

In 1983, three Guatemalan linguists employed by USAID were kidnaped and murdered. No one has ever been prosecuted and no one has ever been punished for those crimes. Last year the Guatemalan Human Rights Commission reported 713 killings and 506 disappearances during the first 9 months of the year. The British Parliamentary Human Rights Group reported on disappearances and killings of university students. The Inter-American Commission on Human Rights, the official agency of the Organization of American States, reported in November 1984 that "death squads" had been reactivated under the government of General Mejia and reported an average of almost 80 disappearances per month.

At one point last year America's Watch reported that the "entire Executive Council of the Student Association at San Carlos University disappeared. Subsequently, some of the students reappeared, tortured; others remain 'disappeared'."

These are not the signs of a government that has seen the error of its ways and is intent on reform. There is no reason yet to reverse the position Congress has held since 1977. Mr. President, this brief history is a strong argument against providing military aid to the Government of Guatemala at this time. It is a strong argument against providing military aid to the armed forces of that country while they continue to engage in brutal human rights abuses of the kind I have cited. It is a strong argument that the United States should await the inauguration of a democratic government before it considers approving any military aid to the Government of Guatemala. And it is a strong argument that this administration has failed to give adequate consideration either to human rights in Guatemala or to democracy in Guatemala.

Mr. President, I have talked to the chairman of the committee as well as the ranking minority member about his issue, as well as the Senator from Connecticut. I yield to the Senator from Connecticut at this time.

Mr. DODD. Mr. President, I commend my colleague from Massachusetts. As he rightfully pointed out, I raised this amendment in the committee. We did not prevail, but the Senator has accurately pointed out the serious conditions which exist in Guatemala. I said at the time of the debate in the committee, and I repeat again, there have been some indications that the Guatemalans are pursuing a policy to improve the human rights conditions in that country and are talking seriously today about civilian elections. But it is only in the talking stage at this particular point. Nothing concrete has happened. I for one, and I think others, would be willing to provide Guatemala with assistance in the future provided they demonstrate a concrete determination to have a civilian government determined through a democratic process in that country. I think to provide this kind of assistance at this juncture, short of that clear demonstration, would be a mistake, so I am pleased to join with my colleague from Massachusetts in this amendment and urge its adoption.

Mr. INOUYE. Mr. President, I strongly urge the adoption of the amendment proposed by the Senator from Massachusetts.

While I certainly do not dismiss Guatemala's vaunted move toward democracy, I remain skeptical. The results of the July 1, 1984 Constituent Assembly election gave a greater percentage of seats to the rightist party—the MLN—than it received in voter support. This was due in part to a proportional representation scheme which skewed the election results to the right. It is this rightist party which has been accused of the bloody

repression of Indian demands for political freedom and democratic expression.

Furthermore, it should be noted that power has not passed from the military. The July election, which is so often cited as evidence of the movement toward democracy, did not elect those who would rule Guatemala; it elected who would draft a new constitution. I might note, Mr. President, that Guatemala is not noted for abiding by a constitution, having had six different versions in its history. Some of the worst excesses of violence and repression have taken place under the existing constitution, drafted in 1965.

In any case, the question has not been one of an improperly or imprecisely drafted constitution; it has been the failure of successive governments to abide by and have a respect for basic human rights. The present chief of state cannot be said to have an unbroken record of service to constitutional authority—Gen. Oscar Mejia Victores came to power in a coup against another general (Rios Montt) who had himself come to power through a coup.

Since seizing power, Mejia's "campaign against subversion" has, if anything, been more brutal and repressive. Mejia himself has been implicated in the coverup of the murder of three AID contract employees working on a linguistics program with indigenous Mam indians. It is Mejia's regime which would receive military assistance from the United States under the proposed bill.

I remind my colleagues that it was the Mejia regime and its security forces which was characterized by the Kissinger Commission as having exhibited brutal behavior. The Commission report has been cited in the debate on this bill; it has been quoted as an authoritative statement of what American policy ought to be. Its descriptive commentary on the Guatemalan security forces is illuminating:

> In the cities they have murdered those even suspected of dissent. In the countryside, they have at times killed indiscriminately to repress any sign of support for the guerrillas. Such actions are morally unacceptable.

Mr. President, these are the security forces which would receive U.S. military assistance under the committee bill. They remain under the same leadership which they had at the time the Kissinger Commission issued its report.

The provision of military assistance to this regime is morally unacceptable. I urge my colleagues to support this amendment.

Mr. LUGAR. Mr. President, I appreciate the amendment and the spirit in which it is offered, and the comments of my colleague from Connecticut. Both Senators have been strong advocates of constructive thinking about the human rights situation in Central America and have directed specific attention from time to time to Guatemala.

Let me make these points, Mr. President, and I do so respectfully. We have successfully to this point moved on consideration at least for this day away from the Central American region. There are any number of ways we could have visited that region today. Senators have been off the floor consulting with one another. They are thinking carefully about responses, maybe ultimately fairly strong bipartisan responses.

In truth, Guatemala is not Nicaragua and is not El Salvador, but it is a very important question. I make this proposal to the distinguished Senator from Massachusetts.

I suggest that I write a letter to the Secretary of State indicating the very strong concern I have about the human rights situation in Guatemala, and specifically whether the elections which are now scheduled for this fall—in October, as I recall—will help achieve civilian government in Guatemala. I would include in this letter, in addition to my own personal concern, my thought that if the human rights situation in Guatemala does not improve, that I would have to recommend to the Secretary that the aid we are now giving not be favorably considered again. In short, that we would have to reconsider in the strongest terms the good will that is expressed in this respect.

If we are able to use this approach, we will not have to get into conditionality, into a set of fences. I visited with the distinguished Senator from Massachusetts. I know of his concern, and I have discussed with him a number of the violations which he has mentioned.

But I hope this letter might be helpful and lead the Senator to withdraw his amendment at this time given these assurances.

Mr. KENNEDY. I thank the Senator from Indiana, the chairman of the committee, for a very positive response. The strong commitment of the Senator on this issue, and indicating such to the Secretary of State, I think, is a very constructive and positive step. I am hopeful it will elicit the kind of response we would have had if this amendment had been accepted.

I ask the Senator from Rhode Island, the ranking minority member, whether he, too, could join in such an expression. I believe that it is important to get an expression of concern about these violations.

I also ask my colleague from Connecticut, who has been working in this area, whether he agrees with me that this would be a very substantial step forward.

Mr. DODD. If my colleague from Massachusetts will yield, I, too, commend the chairman of the committee for a number of reasons, not the least of which is how he has generally handled this bill. I think he has done a masterful job. His consideration on this particular issue is very worthwhile.

I presume the distinguished Senator from Indiana would have no objection if such a letter as suggested would be cosigned by the ranking minority member. I think it would serve us all very well.

I thank the Senator from Massachusetts for that suggestion. I certainly agree that, with that kind of alternative, I would have no objection to the amendment being withdrawn. I think it is an excellent step.

Mr. PELL. Mr. President, it seems to me this is an excellent resolution to the original proposal of the Senator from Massachusetts. I will be delighted to work with the chairman and cosign the letter. I recognize very much, indeed, that the human rights situation in Guatemala is still one with serious problems, and it may be that this action will do something to reverse it.

Mr. LUGAR. I welcome the Senator in signing the letter with me, and we will be prepared to draft it shortly.

Mr. MELCHER. Mr. President, I commend the Senator from Massachusetts and the Senator from Connecticut for raising these points. The Guatemalan refugees, in Mexico have come to escape brutalization, most of them to save their lives and the lives of their families. The fact that we have not been more positive in searching out the reasons for Guatemalan terrorism of its own people, indeed, is a blot on our efforts to help stabilize and bring progress to the Western Hemisphere. I viewed the Guatemalan refugee camps in Mexico from the air. At that time they were not allowing Americans to enter the camp. The situation is one that demands more attention and cooperation from us and our Mexican counterparts, who are doing an outstanding job in providing a haven for Guatemalan people who are persecuted in their own country.

Mr. KENNEDY. I thank the chairman and ranking member of the committee. I look forward to working with both of them on this issue. I know they are very deeply committed to the cause of human rights in Guatemala. With that understanding, I withdraw my amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

The Senator from Indiana.

AMENDMENT NO. 143

Mr. LUGAR. Mr. President, on behalf of Senator DOLE and Senator KASSEBAUM, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Indiana [Mr. LUGAR], for Mr. DOLE, Mr. DENTON, and Mr. KASTEN, proposes an amendment numbered 143.

Mr. LUGAR. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 64, between lines 16 and 17, insert the following:

ASSISTANCE FOR THE CAMBODIAN PEOPLE

SEC. 914. The President may make available to the noncommunist resistance forces in Cambodia up to $5,000,000 for fiscal year 1986 of the funds authorized to be appropriated to carry out chapter 2 or chapter 4 of part II of the Foreign Assistance Act of 1961, notwithstanding any other provision of law.

On page 64, line 18, strike out "Sec. 914." and insert in lieu thereof "Sec. 915.".

Mr. DOLE. Mr. President, I am pleased to join Senators KASTEN and DENTON in offering an amendment to provide up to $5 million in 1986 in support of the non-Communist resistance forces in Cambodia.

In the years since the Vietnamese invasion of Cambodia, the brave people of that country have continued to risk their lives in a desperate struggle for national sovereignty and national identity. They have confronted the full force of the Vietnamese war machine, vastly superior in manpower and equipment. They have indirectly faced the might of the Soviet Union, which has lavishly bankrolled and equipped the Vietnamese aggression, to the tune of about $4 to $5 million per day—about $1.5 billion per year.

Fortunately, the people of Cambodia have not had to struggle entirely alone. They have had the strong backing of their immediate neighbors in Southeast Asia, particularly the free States of ASEAN, who have provided vital support. They have had the strong political backing of free nations everywhere, who have refused to recognize—either bilaterally or in the UN—the illegal regime that Hanoi has installed in Phnom Penh. And they have had the sympathy and prayers of free people everywhere.

We, too, have backed those resistance forces which aim to reinstitute a democratic, nonaligned government in Cambodia. We have provided them unqualified political support, following the lead of the ASEAN States.

Now, I believe, we must do a bit more.

The Vietnamese this year launched an unusually massive, brutal dry season offensive. This offensive, like all Communist military operations, was as much political as military in intent. It was aimed primarily at the democratic elements of the resistance coalition, seeking to destroy them as an effective barrier to Vietnam's occupation and, equally important, to destroy them as a strong element of the resistance forces. The Vietnamese recognize clearly that a resistance totally dominated by the Khmer Rouge will have far less credibility and appeal both within and without Cambodia than one in which the democratic resistance forces play a central role.

So this amendment aims to do two things. First, to aid the resistance to Vietnam's aggression, to help ensure that it will not succeed. And, second, to aid the democratic elements of the resistance, so that they remain a viable and effective alternative for the people of Cambodia. And I might add, the Proxmire amendment we passed yesterday further ensures none of these funds can reach the Khmer Rouge.

Ours is a flexible amendment, befitting the fluid nature of the situation in Cambodia. By authorizing use of either MAP or ESF funds, and by giving the administration some latitude in administering the funds, it will permit the creation of a support package which can best meet the needs of the democratic resistance.

But this amendment does not represent the nose of any camel. It is offered, and will be used, above board, with the clearly stated intent of providing support to the non-Communist resistance. This is not the first installment of anything, or an open-ended commitment to do anything. It is an ad hoc provision of support to people who need it and who deserve it. Any decision to continue or extend this aid—and no such need is now envisioned—would have to be fully considered and approved by the Congress, under all normal procedures and safeguards.

I might also add, as the Senate knows, that the House is now considering similar amendments on its version of the foreign aid authorization bill.

Mr. President, no nation's struggle against aggression has ever been easy or painless, either physically or emotionally. But no nation, perhaps, has ever suffered pain on any greater scale than the nation of Cambodia. We cannot directly ease that pain—only the aggressors, the Vietnamese and the Soviets, can accomplish that, by ending their aggression—but we can lend our support to those whose nation, whose culture, whose lives are in jeopardy.

Mr. President, I strongly urge all of my colleagues to join Senators KASTEN, DENTON, and me in adopting this amendment.

Mr. DENTON. Mr. President, the amendment that I have jointly sponsored with Senators DOLE and KASTEN authorizes $5 million in aid in fiscal year 1986 to the non-Communist resistance forces in Cambodia. The aid would be provided through the regular grant Military Assistance Program [MAP] and the Economic Support Fund [ESF].

The provision of direct aid is not intended to chart a new course or role for the United States in Southeast Asia, but continues our policy of following the lead of the ASEAN nations. On February 7, in response to the latest dry season offensive against the Cambodian resistance, the ASEAN nations issued a public call for the international community to increase "support and assistance to the Kampuchean people in their political and military struggle to liberate their homeland from foreign occupation."

I believe that the amendment is a measured and timely response to the current situation in Cambodia, reflecting not only a concern for the security of our ASEAN allies but also an awareness of where the real hope for a free, prosperous, and peaceful future for the Cambodian people lies.

The Khmer people of Cambodia have endured 10 years of brutal Communist tyranny. Under the Chinese-backed Khmer Rouge regime, a regime that came to power with the active support of the North Vietnamese and the Viet Cong, at least a million and a half people died from disease, starvation, or execution. The actual number may have been as high as 3 million. I must point out that the brutal policies that produced those deaths were either dismissed or defended before the United Nations by both the Soviet Union and Vietnam.

The Communist Khmer Rouge resisted political domination by the Vietnamese, and the Vietnamese Army invaded on Christmas Day 1978 to assert its hegemony. Two weeks later, Pol Pot and his ruthless cohorts were in the mountains, and Heng Samrin, a former division commander in the Khmer Rouge, was in power as a wholly owned subsidiary of the Vietnamese. Then 200,000 Vietnamese troops occupied the country, and current estimates place the occupation troop strength at 170,000.

Although the Heng Samrin regime cannot and has not been accused of the wanton brutality that characterized the Pol Pot years, its own human rights record is appalling. Nearly a quarter of a million people have fled to the Thai-Kampuchean border to live under the protection of the Thai government or one of the armed resistance groups. Reports suggest that thousands of political prisoners are held for indeterminate periods, and many are tortured. Civilians are often conscripted to labor on military-related projects near the border, where their lives are at risk.

What survived of Khmer culture following the Khmer Rouge effort to communize the country is now being

threatened by Vietnamese aggrandizement and colonization. In July 1983, the Kampuchean Foreign Minister signed an agreement with Hanoi legalizing the Vietnamese annexation of Cambodian territory and islands. Thousands of Vietnamese settlers are in Cambodia, receiving more favorable treatment from the Heng Samrin regime than it accords to its own people. Cambodian natural resources are routinely exploited by the Soviet Union and Vietnam. Scarce food resources go first to the occupying army.

There are now three armed groups resisting Vietnamese occupation. The first and largest of them is the Communist Khmer Rouge, which numbers 35,000 to 40,000. Pol Pot is now commander-in-chief of the army, and it is well-supplied by Communist China. Although the Khmer Rouge claims to have changed its policies since being thrown out in 1979, refugee reports indicate that it still has an appalling human rights record.

The other two groups are non-Communist: the Khmer People's National Liberation Front (KPNLF) led by Son Sann, a former prime minister, and the Sihanouk National Army (ANS) under Prince Sihanouk. The growing troop strength of the KPNLF is 15,000 to 20,000, and Prince Sihanouk's men number 8,000. Their numbers continue to grow.

In 1982, under pressure from China, the ASEAN nations, and the United States, the non-Communist forces formed a coalition with the Khmer Rouge. The principal backer for the Coalition Government of Democratic Kampuchea (CGDK) is China, but much of the PRC's aid does directly to the Communist Khmer Rouge.

Recognizing the greater inherent danger posed by the non-Communist resistance forces, the Vietnamese army successfully directed its latest dry season offensive against them first. That offensive included substantial incursions into Thailand, with some of the Vietnamese forces even electing to remain inside the Thai border.

The Vietnamese troops were ultimately repelled by Thai troops, but the nature of the incursions represented a clear escalation in Vietnam's aggressive posture and caused grave concern to Thailand and its ASEAN neighbors. That concern, in conjunction with Vietnam's continuing failure to enter serious negotiations about its occupation of Cambodia, compelled the ASEAN nations to issue their public plea for international material support for the armed resistance.

I believe that there are at least four good reasons for supporting the non-Communist resistance forces in Cambodia:

First, the aid will represent an important counterweight to Chinese aid for the Khmer Rouge. Under no circumstance can we permit the Khmer Rouge and Pol Pot to return to exclusive power. To date, much of the strength of the Khmer Rouge stems from the fact that it receives consistent and abundant support from the PRC. Should a Vietnamese withdrawal be negotiated and a political settlement reached, it is critical that the non-Communist forces be able to field sufficient forces to ensure their continued participation in the internal political affairs of their country.

Second, the provision of aid to the non-Communist resistance would further isolate both Vietnam and the Heng Samrin regime, which has yet to receive international recognition. By raising the cost of Vietnam's occupation, the aid would apply further pressure on Vietnam to settle the conflict in Cambodia peaceably.

Already Vietnam has paid a stiff economic price for its adventurism in terms of lost aid and trade opportunities, and it is heavily dependent upon the Soviet Union for support. The Heng Samrin government remains in power only by force. Recent reports indicate that mid-level defections from the regime are increasing and that Vietnamese efforts to assert its control over the country will become more difficult. The ability of the non-Communist forces to present themselves as legitimate alternatives to Heng Samrin and the Khmer Rouge will further undermine the legitimacy of Heng Samrin and his Vietnamese advisers.

Third, aid to the non-Communist resistance will lend additional support to our ASEAN friends who must live next door to a regime that shares with its principal backer a totalitarian ideology that is inherently expansionist. The Vietnamese presence in Cambodia is viewed by the ASEAN nations as a significant threat. They believe that the Soviet Union's willingness consistently to back Vietnam's imperialist designs in the region provides the Soviets with greater leverage over Vietnam and increases Soviet influence in the region.

Moscow provides an estimated $1 billion a year in economic and military aid to Vietnam. Some of it is used in Cambodia for the development of infrastructure: roads, airports, port facilities, and communications. In return, the Soviet Union receives base rights in Vietnam—20 to 25 Soviet Navy ships, 16 nuclear capable TU-16 Badger medium bombers, and a squadron of Mig-23 fighter bombers are currently located in Cam Ranh Bay.

Those forces threaten key sealanes and United States bases in the Philippines. Should the Soviets complete the port facility at Kompon Som in Cambodia, they will be able for the first time to establish a presence on the Gulf of Siam.

The resistance forces are a buffer for the ASEAN nations, particularly Thailand, against Soviet expansion and Vietnamese adventurism. The ASEAN nations—the Philippines, Thailand, Malaysia, Indonesia, Singapore, and Brunei—are one of our bulwarks to preserve the free world.

Finally, many refugees live in camps inside Cambodia and under the protecton of the various resistance groups. The Vietnamese Army has attacked the camps in the past, and I am certain that it will do so again in the future. Aid to the non-Communist resistance affords greater protection to people who have fled the policies of the Heng Samrin regime.

I have heard some people argue that we should not do anything to alter the current situation in Cambodia if it could lead to a return of the Khmer Rouge to power. I suggest to my colleagues that there is another alternative in Cambodia to continued foreign occupation or the return of the Khmer Rouge. That alternative is a non-Communist political movement.

I urge my colleagues to support the amendment. It will enable the United States to support the ASEAN nations and the non-Communist resistance in Cambodia, and to help free the people of Cambodia from the tyranny of the last 10 years.

Mr. KASTEN. Mr. President, this amendment, cosponsored by myself, the majority leader, and Senator DENTON, is a variation of the Solarz amendment authorizing assistance to the non-Communist resistance movements which are engaged in battling the occupying forces of Vietnam in Cambodia. We have made some changes to that amendment in order to overcome some objections which have been made against the Solarz amendment that a bad precedent would be set by allowing economic support funds to be used for military assistance. My amendment authorizes either economic or military assistance, but requires that military assistance be provided under the Military Assistance Program.

Mr. President, on May 8 the Foreign Operations Subcommittee of the Committee on Appropriations, which I chair, held a hearing on the general topic of providing assistance to the non-Communist insurgents. It is my belief that we as Americans are compelled by our own traditions and history to support such movements, and that we must, therefore, send a signal to all freedom fighters that we support the ideals they fight for.

The hearing, I think, represented a good beginning in developing a bipartisan policy on the overall question of assistance to non-Communist insurgencies. While I have started to develop legislation along these lines, much work remains to be done, and I doubt that such legislation will be ready for inclusion in the legislation currently

before the Senate. Nonetheless, with the amendment previously offered and accepted by the senior Senator from New Hampshire, with this amendment and the amendment in the House version by Congressman SOLARZ, the debate on this question has already begun. I am hopeful that this is just a beginning, and that in the very near future we can, in fact, produce bipartisan legislation which will be helpful to all those who are fighting for democratic principles against Communist governments around the world.

In the meantime, I would urge that my colleagues support this amendment for the Cambodian non-Communist insurgencies. It is my understanding that the amendment is acceptable to both managers of the bill.

Mr. LUGAR. Mr. President, this is an amendment calling for $5 million of aid to Cambodia under certain conditions. It has been accepted on both sides, to the best of my knowledge. It has been anticipated for some time. We support the amendment.

Mr. PELL. Mr. President, this is an excellent amendment which fits in with an amendment we adopted yesterday. I recommend its adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 143) was agreed to.

Mr. DOLE. Mr. President, it is my understanding that we could provide a window between 7 and 8 o'clock. It appears that we cannot finish the bill prior to that time. It is my understanding that we are near the end, and we hope we can dispose of additional amendments.

AMENDMENT NO 144

Mr. DOLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE] proposes an amendment numbered 144.

Mr. DOLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 51, lines 8 and 9, strike out "Cuba, or Syria" and insert in lieu thereof "or Cuba".

Mr. DOLE. Mr. President, this amendment would delete the addition of Syria to the list of countries and organizations excluded from receiving any U.S. aid under section 302 of the Foreign Assistance Act.

Until now, that list has included, such countries and organizations as Libya, Iran, and the PLO. Syria was added to the list through an amendment narrowly adopted during Foreign Relations Committee markup.

Let me make clear what my amendment does. It does not change anything in our law or policies. In fact, it preserves the status quo. By contrast, the action taken in markup by the Foreign Relations Committee would have the effect of altering our policy toward one of the key countries of the Middle East, at a particularly delicate time.

Let me also stress that, by offering this amendment, I am not expressing any particular sympathy for the Government or the Policies of Syria. In fact, I oppose many of the policies of that Government, which have complicated our search for a Middle East peace.

However, the fact is that Syria is just not in the same geopolitical league with Libya, Iran, and the PLO. Libya and Iran are the only two nations I know of which practice terrorism as a central tenet of state policy. The PLO, of course, has refused to denounce the use of terror as a political weapon and vows the destruction of our ally and friend, Israel. It is not necessary to be an admirer of Syria to recognize that it has undertaken a different course.

In recognition of that, we have maintained full diplomatic relations with Syria, and engage its leaders regularly in important diplomatic exchanges.

And that policy is in our own self-interest. Whether we approve of its policies or not, we have to acknowledge and act on the fact that Syria has a key role to play in the Middle East, especially in Lebanon and in the search for a secure peace for Israel.

It does not appear, unfortunately, that any real progress has been made toward a Middle East breakthrough. But we intend and should continue our efforts, and we must include Syria in those efforts. Now is not the time to complicate our task by lumping Syria with Libya and Iran.

Mr. President, I believe we should adopt this amendment, not because we like Syria but because it is the wrong action at the wrong time. We may not like Syria, but Syria is not Libya or Iran, and it is a country with which we shall have to deal as we continue our search for peace in the Middle East.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 144) was agreed to.

AMENDMENT NO. 145

(Purpose: To urge discussions with the Canadian Government to aggressively pursue immediate reduction in the Canadian softwood timber to the United States)

Mr. SYMMS. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho [Mr. SIMMS] proposes an amendment numbered 145.

Mr. SYMMS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following new section:

SEC. . Since, softwood timber prices have been in decline for some time due to excessive supply partially caused by dramatic increases in importation of processed softwood timber from Canada, which has increased from 18 percent of U.S. market in the last 2 years to 35 to 40 percent today.

Since, American timber producers are suffering from this economic crisis and the difficulty in requiring timber from the National Forest system.

Since, the disparity between the United States and the Canadian dollar amounts to 32 percent to 34 percent and results in even further increases in processed softwood timber being imported into the United States.

Therefore, it is the sense of the Congress that the President should direct appropriate members of the Administration, including the United States Trade Representative, the Secretary of Agriculture, and the Secretary of Commerce, to aggressively pursue discussions with the Canadian Government directed toward immediate reduction in the Canadian export of softwood timber to the United States.

Mr. SYMMS. Mr. President, this amendment has been cleared by the chairman of the Finance Committee and the ranking minority member.

It involves a problem that exists in the softwood timber industry in the Pacific Northwest, and is similar to the argument made by the distinguished Senator from Montana with respect to hogs and livestock.

I ask that the amendment be adopted.

Mr. LUGAR. Mr. President, we accept the amendment.

Mr. PELL. Mr. President, the amendment is accepted on this side.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 145) was agreed to.

Mr. DANFORTH. Mr. President, as we consider the fiscal year 1986 foreign aid authorization bill, I would like to compliment the Foreign Relations Committee on its inclusion of provision for U.S. participation in the second replenishment of the International Fund for Agriculture Development [IFAD].

I am also pleased with a sympathetic reference in the committee's report to "a strong U.S. role in establishing a possible special fund for Africa within IFAD." I know from my own experience that long-term solutions to the current famine affecting so many people in Africa lie in increasing food production in those very countries.

From all accounts, IFAD has already made a contribution to that process and deserves the resources necessary to continue its efforts with small farmers and landless laborers.

As some of my colleagues are aware, on Thursday and Friday of this week negotiations will resume in Rome on the replenishment of IFAD resources to cover its activities for the years 1985–87. It is my hope and expectation that the meetings will be successful and that IFAD will receive a new lease on life for another 3 years.

Because of the importance of the meetings, I would like to insert into the RECORD an editorial in yesterday's Los Angeles Times entitled "Quibbling in the Face of Crisis." The editorial states that "a quibble over burden-sharing now jeopardizes [IFAD's] future."

The editorial concludes that:

The real risk is that the United States will remain rigid on burden-sharing, and in this way kill the organization at the very moment that it could play an increasingly important role in development—particularly in crisis-ridden Africa.

Mr. President, I ask that the Times editorial be printed in today's RECORD.

The editorial follows.

[From the Los Angeles Times, May 14, 1985]

QUIBBLING IN THE FACE OF CRISIS

A quibble over burden-sharing now jeopardizes the future of the International Fund for Agricultural Development. But an appropriate compromise is in sight if the government of the United States will accept the payment formula that the other major donors have already approved, and if the oil-producing nations make an adequate pledge.

Survival of this innovative fund is important for two reasons. With its establishment in 1977, IFAD provided an international foreign-aid organization that attracted for the first time substantial support from the Organization of Petroleum Exporting Countries. And the fund has filled an important aid gap by targeting its assistance on the poorest farmers of the Third World, helping directly those most in need of help.

The controversy now centers on OPEC's declining support—a decline due in part to reduced earnings as oil production has been cut back, and in part to the Iran-Iraq war and the revolution in Iran, which have led Tehran to renege on all commitments and Baghdad to reduce support for the fund. In this circumstance the OPEC share, originally 43 percent of the total, then 42 percent, is now proposed at 40 percent. This has been accepted by all the contributing nations except the United States.

American resistance has been all the more damaging because it has been matched by declining U.S. contributions, down from 20 percent of the original funding to 17 percent.

Another effort to resolve the controversy will be made at the end of this week at IFAD headquarters in Rome. The project may collapse because of a failure of OPEC to promise an adequate level of funds. The OPEC commitment is still a secret, but it is expected to be adequate to assure continuation of the program. The real risk is that the United States will remain rigid on burden-sharing, and in this way kill the organization at the very moment that it could play an increasingly important role in development—particularly in crisis-ridden Africa.

Mr. MATHIAS. Mr. President, I was pleased that the Foreign Relations Committee included a provision in S. 960 which supports continued U.S. participation in the International Fund for Agricultural Development [IFAD] and encourages a strong leadership role for the United States in establishing a special fund for Africa within IFAD.

IFAD is highly regarded within the international development community. It has succeeded in mobilizing substantial amounts of resources from the OPEC nations which makes it a remarkable institution within the family of international organizations.

IFAD focuses its activities on increasing the food production of small farmers in the poorest countries by involving farmers directly in the planning and carrying out of development projects. The largest share of its resources is committed to Africa, which as we all know needs all the help it can get on the reconstruction and development front.

I am aware that certain difficulties remain to be resolved before IFAD's basic replenishment for 1985–87 is finalized. I am pleased that negotiations are taking place in Rome this week and hope and expect that they will prove successful.

Discussions are also proceeding about establishing a special fund within IFAD for Africa. This would be a mechanism for IFAD to provide additional resources to deal with the long-term famine problem in Africa. Without such a long-term program to solve this problem, we will be faced with a continuing food crisis in Africa, and a continuing need to provide emergency food assistance.

I urge the President to pay particular attention to this section of S. 960 and to take a leadership role in the creation of the special fund for Africa.

THE 7-TO-10 RATIO AND SECURITY ASSISTANCE TO TURKEY AND GREECE

Mr. PRESSLER. Mr. President, in reporting out the fiscal year 1986 foreign assistance bill, the Senate Foreign Relations Committee has chosen not to resort to the type of restrictions on United States aid to Turkey that were imposed last year through my amendment and which aimed at a peaceful resolution of the Cyprus conflict. My amendment this year, approved with modifications by the committee by a 9-to-4 vote, limits grant assistance for Turkey in fiscal year 1986 to $215 million, with the understanding that the availability of this grant military assistance total for Turkey be accompanied by urgent and determined U.S. actions to prevent the permanent bifurcation of Cyprus. It further limits the total credits to be extended to Turkey in fiscal year 1986 to $500 million and limits the total credits to be extended to Greece in fiscal year 1986 to $500 million. Thus, the resulting committee recommendations on assistance levels to Greece and Turkey were fully consistent with the so-called 7-to-10 ratio.

Greece and Turkey, both NATO members yet neighbors with long-standing bilateral problems, have received U.S. military and economic assistance since 1947. For the past several years, Congress has developed informally the practice of granting military aid to these two nations on a 7-to-10—Greece-Turkey—basis. This approach reflects a compromise forged from competing domestic and foreign policy concerns and recognizes a long-standing difference in congressional and executive perspectives on the two nations, their bilateral disputes, the Cyprus conflict, and on the intended link between U.S. aid and U.S. policy in general toward the eastern Mediterranean.

The context in which Congress has considered military aid to Greece and Turkey has been colored since 1974 by the Turkish intervention in Cyprus. An estimated 20,000 Turkish troops remain on that divided island, and efforts to obtain a withdrawal as part of an overall solution of the crisis have failed to date. A major part of the American approach to the Cyprus conflict was the congressional vote in February 1975 to place an embargo on military aid to Turkey.

Although the embargo was lifted completely in 1978—with the Senate voting 57 to 42 in favor of its repeal, there never emerged in the Congress or between the Congress and the Executive a clear consensus regarding the effectiveness of the embargo as leverage on Turkey to remove its troops from Cyprus. Many Members felt that the lifting of the embargo deprived the United States of any leverage on Turkey, thus relieving any pressure on Turkey to alter its policy toward Cyprus. Thus, the seeds of the 7-to-10 ratio were planted in the legislative language lifting the arms embargo against Turkey in 1978, wherein security assistance to Greece and Turkey was henceforth to be designed in part to ensure that:

". . . the present balance of military strength among the countries in the region, including Greece and Turkey, is preserved. Nothing in this paragraph shall be construed to prohibit the transfer of defense articles to Greece and Turkey for legitimate self-defense or to enable Greece and Turkey to fulfill their NATO obligations." (Sec. 620 C of the Foreign Assistance Act of 1961).

While this language remains in force, subsequent debates in the Congress have not clarified with precision the meaning of present balance.

Two defense and cooperation agreements discussed but never implemented between the United States and

Turkey and Greece in 1976 may provide the key to the origin of the 7-to-10 ratio. In March 1976, the United States and Turkey signed an agreement which called for "defense support consisting of grants, credits, and loan guarantees at $1 billion during the first 4 years this agreement shall remain in effect." The very next month, April 1976, the Department of State released "Principles to Guide Future United States-Greek Defense Cooperation," which referenced "a 4-year commitment to Greece of military assistance totaling $700,000,000, a part of which will be grant aid."

Despite the inherent difficulties of relating such a ratio to a fair balance in military strength between the two countries, the ratio has since 1979 been used by its congressional supporters as a formula for aid levels to Greece and Turkey. Initially little more than a guideline used informally by Members, the ratio has never been incorporated into law and, until the aid debate in 1983, was not explicitly mentioned in the authorization committees' reports on the aid bills.

In the past few years, the debate between the legislative and executive branches has broadened to include other factors: First, the quality of the respective aid programs has come under scrutiny since Greece has sought a portion of its military aid also on a grant basis and FMS credits at concessionary rates; second, new issues have come to the fore including Turkey's transition from military to civilian rule, the stormy course of U.S. talks with Greece on the terms and duration of base access and agreements, and anti-American statements and actions on the part of the current Greek Government; and third, the Unilateral Declaration of Independence by the Turkish Cypriots in 1983 and the convocation of proximity talks between Turkish and Greek Cypriots under the auspices of the U.N. Secretary General.

The Reagan administration and its immediate predecessor have presented arguments against the congressional practice of utilizing the 7-to-10 ratio in apportioning military assistance to Greece and Turkey. It has been argued that the ratio idea is unnecessary to fulfill the present balance mandate; in particular, the notion that a balance could result directly from a financial ratio has been attacked. Nonetheless, while expressing that they recognize no legally binding ratio, executive branch officials have not wanted to oppose strenuously congressional action to maintain the 7-to-10 ratio, lest such opposition jeopardize the entire aid program for the eastern Mediterranean.

This year the committee continued the informal practice of utilizing the 7-to-10 ratio as a guideline in recommending levels of military assistance to Greece and Turkey. The committee accepted the administration's request of $500 million in military assistance for Greece but rejected the administration's request of $785 million in military assistance to Turkey, agreeing instead on $715 million. The committee also added a provision that the concessional rate FMS credits extended to Greece shall be at the same interest and in the same proportion of the FMS credits extended to Turkey. Thus, some 60 percent of FMS credits to both Turkey and Greece would be at congressional rates—that is, loans at a concessional rate of approximately 5 percent.

The committee discussed the economic criteria by which the administration determines whether a country is eligible for concessionary terms. GNP per capita is the major criteria, and $2,190 is the highest level GNP per capita that currently qualifies a country for concessionary rates. At the present time, GNP per capita for Turkey is estimated to be $1,230, while that for Greece is $4,290—that is, three times that of Turkey. Thus, the administration did not request concessionary terms for military assistance to Greece. The committee, however, decided otherwise, believing that the 7-to-10 ratio in military assistance to Greece and Turkey and the equal proportion of concessional rates for Greece and Turkey were reflective of the traditional intent of Congress to provide a degree of balance in military assistance to the two countries.

Countries which provide the United States with the right to utilize territory to maintain bases are critical to the forward projection of the American global defense posture. Security assistance for those countries is essential to sustain confidence in the best effort pledges which underpin all U.S. base agreements.

Although a larger amount of security assistance to Turkey might be justifiable on programmatic grounds, the amount recommended by the committee is sufficient to assist Turkey to meet its NATO commitments through force modernization, including purchase of F-16 aircraft. Furthermore, a large portion of the Turkey program is on a concessional basis to avoid undercutting that country's stringent economic stabilization program which has helped to turn the economy around. Nonetheless, some improvements in Turkey's economic performance have permitted a reduction in the amount of economic support funds.

The committee recommendation for Greece is identical to last year's. U.S. security assistance to Greece assists in the modernization of the armed forces to meet both Greek and NATO defense needs and has helped to ensure continued use of four U.S. military facilities and a number of smaller installations.

In short, security assistance supports key NATO allies and has the dual result of providing the United States with continued access to important military bases and helping these countries modernize their own military capabilities. By so doing, U.S. security assistance sustains confidence in U.S. best efforts commitments which are the foundation of base agreements.

Succeeding administrations have generally presented strategic arguments for increased military aid to Turkey. The Congress, for its part, has made clear the need for U.S. policy to focus on a settlement of the Cyprus problem. The 7-to-10 ratio has served us well as a vehicle for demonstrating the limits to which United States-Turkish military cooperation can expand in the absence of progress on Cyprus.

The committee actions this year stand in contrast to last year's actions when the committee voted to condition the grant MAP portion of military assistance to Turkey on the return by the Turkish Cypriots of Famagusta/Varosha to the Greek Cypriots for the purposes of refugee resettlement under U.N. auspices. However, my amendment this year should not be interpreted as a lack of resolve to take any and all steps necessary to promote a peaceful settlement of the Cyprus dispute. It was instead a sign of support for the recent good-faith efforts of the Turkish Cypriots and Greek Cypriots to bring about the U.S.-sponsored proximity talks between President Kyprianou and Rauf Denktash. Although these talks have ended inconclusively for the moment, they were an important step toward resolution of the Cyprus conflict and their resumption should be encouraged. The Foreign Relations Committee will be monitoring the situation closely with the hope that all parties will continue to engage in good-faith discussions and return to the summit table in the near future. If such good-faith efforts by all parties do not continue, I will be prepared to consider appropriate restrictive actions to signal congressional disappointment.

But, ultimately, the true test of the utility of the 7-to-10 ratio in apportioning military assistance to Greece and Turkey is whether it serves American security interests. The actions and behavior of Greece and Turkey, both in their relationships with one another and toward the United States, must be judged in terms of their impact on American interests. If such actions and behavior come to be perceived as contrary to American interests, then the 7-to-10 ratio loses whatever utility it has and pressures may build for major reductions in military assistance to both countries.

Mr. DECONCINI. Mr. President, I will cast my vote against the S. 960, the foreign aid authorization bill for fiscal year 1986. I recall very clearly that when Ronald Reagan was running for the Presidency against President Carter he spoke out loud and long against foreign assistance programs. Yet during the recent campaign, President Reagan was silent on the issue of spending U.S. tax dollars on foreign aid during a time of financial hardship for most Americans. Let us take a look at the Reagan record on foreign aid. Since President Reagan took office:

Military assistance grants have grown by 632 percent.

The Economic Support Fund increased by 78 percent.

Foreign military sales credits and grants grew by 153 percent.

State Department salaries, expenses and building acquisition funds have increased by 99 percent.

The administration's budget request for fiscal year 1986 also included substantial growth in major foreign aid accounts such as:

An 18-percent increase in the Military Assistance Program.

A 14-percent increase in foreign military sales credits.

At least a 7-percent increase in the Economic Support Fund.

A 13-percent increase in State Department salaries, expenses, and building acquisition funds.

To its credit, the Foreign Relations Committee has trimmed the President's foreign aid budget request by $416.9 million. Without doubt, there are some portions of this bill that I strongly support, such as assistance for Israel and Egypt, funding for antiterrorist programs, and support for international narcotics control. In fact, I appreciate the decision of the distinguished managers of the bill to accept my amendment which will permit U.S. law enforcement personnel to participate in narcotics arrest actions in foreign nations. However, I believe it is long past time for our foreign aid programs to be subjected to the same budgetary stringency that our domestic programs have endured year after year after year. Until President Reagan returns to that campaign promise that he made not so many years ago to pare back our foreign aid programs, I cannot justify supporting foreign aid levels such as that which is contained in the bill before us today.

Mr. PELL. Mr. President, I would like to commend Geryld Christianson, Gerald Connolly, William Ashworth, and the various members of the minority staff for their tremendous help in weaving the warp and woof of this bill.

Mr. SYMMS. Mr. President, I cannot in good conscience support passage of this foreign aid authorization bill. There are many items in this bill which I wholeheartedly support, particularly the vital military assistance which we are providing to our allies around the world. But, there are also many items which I believe to be extraneous, unnecessarily expensive, and some of which I think are downright immoral. I remain deeply concerned about the obvious, longstanding failures of American foreign policy, of massive amounts of taxpayer dollars being poured into socialized economies, which show no positive results in response to American largesse.

Last night I spoke on the floor about my concerns for our strategic interests in Africa, about our failure to support democratic resistance movements, and our unwarranted support for unelected, illegitimate, Marxist governments on that continent.

Africa reflects the ravages of state planning, the lack of the incentives of capitalism, and the turmoil of malevolent foreign intervention. The massive aid that America has poured into Africa has been largely ineffective, and America and other Western powers should promote policies that could make Africans self-reliant and able to defend themselves from outside aggression. A Time magazine article of January 1984 pointed out the fact that foreign aid to Africa had fostered the proliferation of "technological white elephants." One Nigerian noted that "We build palaces but can't run them, we import cars we can't repair, we are attracted by everything that glitters." U.S. citizens will always be asked to reach deep into their pockets, until we help other nations to adopt policies that promote, rather than inhibit growth, and until we provide adequate military assistance so that Africans can free themselves from the shackles of Soviet, Cuban, and Eastern bloc imperialism and exploitation. We should export the ideas of freedom and capitalism—that would reduce poverty.

The failures of our foreign policy are not apparent solely in Africa; they are evident in Central America, with costly and ineffectual land reform in El Salvador, and in Bolivia, where millions in economic assistance have been expended with no improvements in public living standards. Mr. President, the list goes on—we are expending billions of dollars in "economic" aid that has become gratuitous, that is feeding greedy and bloated bureaucracies and not its intended beneficiaries, and which remains a drain on our own economy.

Another concern is U.N. funding. Americans insist on accountability, but the United Nations has flagrantly abused American funding, and spurned our complaints about improper use of funds. One blatant example of the U.N.'s disregard for human needs was the appropriation earlier this year, for a $73 million conference center in Addis Ababa, Ethiopia's capital city, at the height of public outcry in the United States over the Marxist-induced famine in Ethiopia. While the American people were contributing generously to alleviate the famine, U.N. bureaucrats were voting for a plush new office complex in the midst of Ethiopia's deprivation.

Despite the well-documented abuse of U.N. funding, this bill adds an additional $71.5 million above the administration's request for international organizations and programs.

Mr. President, we have important foreign policy and defense commitments abroad which deserve support and funding, but there are too many items in this legislation which do not merit our support. Charity, it is often said, begins at home. When the Congress is cutting back on domestic spending, similar restraint must be shown in foreign aid programs, particularly when they do not serve pressing national security or humanitarian objectives.

I ask unanimous consent to include the following article—by our distinguished colleague, Senator ARMSTRONG.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NEEDED: FOREIGN AID PROGRAM AMERICANS WILL SUPPORT

(By Senator William L. Armstrong)

Foreign aid is about as popular as a classical string quartet at a Michael Jackson concert. For most Americans, it's at the top of the list for cutting federal spending. Whenever I get together with constituents to discuss issues, I can count on someone—Republican or Democrat, young or old—to ask me why with our own staggering deficit, we are giving many billions of dollars in foreign economic and financial assistance.

They've got a point. It seems that the United States gives to a particular country this year simply because we gave last year, and that's the rationale for doing it next year, too.

And yet, those Americans who gripe about overseas giveaways have a remarkable record, unique in the world really, of selfless sharing to aid the needy everywhere. Let there be famine in Africa, earthquake in the Andes, explosion in Mexico, a disaster anywhere our charity can reach, and the American people are first to send help. Their private organizations, particularly church groups, routinely send thousands of volunteers and millions of dollars to heal, teach and build around the globe. Hardly a corner of the earth has not been touched by their dedication and by the private giving that backs them up.

Those two seemingly divergent responses are not at all schizophrenic. There is no contradiction between the altruism of our people and their skepticism about foreign aid. What brings the two into focus is the fact that their personal contributions for foreign assistance are made through organizations they know and trust. They feel a sense of identification with those charities which bear the brunt of international relief work. Even allowing for necessary overhead,

they feel their dollars go a long way in the private sector, and go to the right people.

Can I tell them the same is true of their tax dollars in governmental foreign aid? The taxpayers are too wise, and I hope I'm too candid for that. We know too much about the way many, perhaps most, governments function in the developing world. We understand how things are controlled by, and often for, small elites concentrated in the subsidized capitals of those needy nations. We don't know what we're getting for our money, apart from official assurances that it's for a worthy cause.

What's worse, it seems the more foreign aid we give, the more we are told will be needed. The main justification for foreign aid is that it helps recipient nations, over time, to become economically self-sustaining. But where has that been the case?

In Western Europe after World War II, when our Marshall Plan expedited the rebirth of a devastated continent; in Korea and the Republic of China, where a powerful work ethic and national will have wrought economic miracles; and in some OPEC countries, where spurting oil revenues have brought artifical prosperity to otherwise backward lands.

But where else? Certainly not in the score of Third World countries where Western aid has become a permanent line item in their budgets. The mixture of U.S. money with Socialist economic planning has been as bad a combination as drinking and driving. It has enabled governments bankrupt both financially and intellectually to persist in economic follies without suffering their ruinous consequences. With his customary candor, President Reagan explained, in his policy paper for the United Nations Conference on World Population in 1984, the conditions our assistance has been subsidizing:

"The post-war experience consistently demonstrated that, as economic decision-making was concentrated in the hands of planners and public officials, the ability of average men and women to work towards a better future was impaired, and sometime crippled. In many cases, agriculture was devastated by government price-fixing that wiped out rewards for labor. Job creation in infant industries was hampered by confiscatory taxes. Personal industry and thrift were penalized, while dependency on the state was encouraged. Political considerations made it difficult for an economy to adjust to changes in supply and demand or to disruptions in world trade and finance.

That declaration was a quarter of a century overdue, but it was worth waiting for.

If the foreign aid program is ever to regain public support, our government will have to set some things straight with recipient nations. In the first place, they will have to junk the offensive notion, fashionable in some quarters in this country as well as in tropical capitals, that we owe them this assistance. Americans have never demanded craven appreciation, but they will not tolerate rude demands for more as a substitute for thanks.

Another idea that needs to be discarded is that the Third World's backwardness is due to America's prosperity. Some say we use too much of the earth's resources. (We pay for them and thereby help others prosper.) Some say we exploit overseas labor. (Foreigners beg us to invest in their communities.) And some cling to Lenin's antique theory that capitalism necessarily involves economic imperialism.

That simple brew sometimes comes in fancy bottles. For example, there is a superficially elaborate argument now popular to the effect that poor nations are being ruined by the strength of the American dollar. Therefore, the U.S. has a moral obligation to inflate its currency, adjust its interest rates, and abort the Republican recovery of the last three years. Incredibly, that line is repeated by people who can read and write, including French President Mitterand and other European sages, who use it to explain the disastrous effects of their own statist economic policies.

Another theory for the reject file is the contention that the U.S. doesn't do its fair share in international assistance, compared to France or Sweden or Germany, in proportion to our Gross National Product. But if anyone doubts whether the American people do their share, let them add to our official, foreign aid budget the enormous contributions in cash, in kind, and in manpower made through the private sector.

Another myth is that our dollars work better when channeled through multilateral aid arrangements, rather than as direct donations. That dodge wouldn't fool a kid on a skateboard. Our money doesn't become more efficacious when laundered through the U.N., the World Bank, or the bureaucracies of regional development agencies. But multilateral funding does reduce the credit we receive for providing it and the leverage we can exert over its expenditure.

There's nothing wrong with a developing nation's people's knowing that the money for their new factory, irrigation projet, fertilizer plant, or health clinic came from the people of Baltimore, Boston and Beaumont. We owe it to ourselves to tell them.

If this assessment of foreign aid appears a trifle negative, I hasten to add that there is a very positive side. Or there could be, if the program were restructured. Imagine a new American effort to aid those developing countries—only those—which commit to economic freedom for their people by rejecting state planning and controls.

Right off the bat, our dollars would be concentrated in fewer nations, where they would make a much larger impact. Imagine that all foreign aid went directly to recipient countries, not through multilateral institutions, so that the American people received full credit for their benevolence.

Now, to go a step farther, imagine that the aid would be given, not to foreign governments, but to self-help groups, indigenous charities, and private institutions, thereby strengthening the private sector and keeping economic decisions out of the hand of politicians.

Finally, to take this a giant step ahead, imagine that our government channeled a major portion of foreign aid through those private American groups which already do so much on their own to share our way of life with others.

The resulting program, leaner and more targeted, largely in private hands here and overseas, would be an instrument of both our country's ideals and our country's interests. Most important, it would spark enthusiasm among the American people. Their good hearts and willing hands have not weakened from the task of helping the rest of the world. Challenge them to do more, and they will. But first, we must replace a time-worn foreign aid program with one that merits generosity.

ECONOMIC AND MILITARY ASSISTANCE FOR ISRAEL

Mr. WARNER. Mr. President, I rise today to indicate my strong support for the foreign assistance funds we are now considering for the State of Israel.

Israel has been a consistent and staunch ally and consistently supports the United States in the United Nations and other international forums.

At a time when all of us are searching for ways to reduce the Federal deficit, it is tempting at times to look to foreign aid programs for some of these needed cuts—and perhaps funds for some of these countries should be reduced.

But, I strongly recommend that this body fully fund the foreign aid request for Israel.

I have an editorial which appeared in the Richmond News Leader on February 26, 1985.

This article expresses very clearly the case for supporting the foreign aid package for Israel, and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

EVERY CENT

Every year the United States spends billions—on foreign aid. Much of the money goes to countries that do not deserve it, much of it goes to countries that waste it, and much of it goes to countries that seldom support the U.S. in international forums. A healthy chunk, however, does go to deserving countries. And no country deserves U.S. military and financial assistance more than Israel.

The money the U.S. spends on Israel is money spent well. Israel cooperates with the U.S. It votes with the U.S.—and against the Communist bloc and its Third-World waterbearers in the UN. When American officials visit Jerusalem and Tel Aviv, crowds do not mass in front of their hotels chanting, "Yankee go home!" or "U.S. out of [fill in the blank]."

Foreign aid ought to go to countries reflecting America's commitment to liberty. Israel represents democratic ideals. It is the Middle East's only legitimate democracy. Palestinian Arabs living in Israel enjoy far more rights than Palestinian Arabs living in Saudi Arabia, Syria, or under any other Arab regime.

Israel also needs U.S. support. It is a small country confronting clear and present dangers. It has fought five major wars and countless skirmishes since its rebirth in 1948. With the exception of Egypt, none of its neighbors concedes its right to exist. Although the Middle Eastern situation is relatively quiet now, Israel's defense forces never can sleep soundly.

Despite its own severe economic problems, Israel has not abandoned Jews facing persecution or enduring distress in other countries. Israel helps people who need help. It also needs help from others. High inflation and assorted problems are sapping its economic strength President Reagan rightly has proposed a $1.5 billion boost in economic aid to help carry Israel through its tough times.

Socialism causes many of Israel's economic problems. High taxation and a confusing array of subsidies spur inflation. A fragile coalition government is enjoying some success in bringing inflation down, but it has not come down enough. Eventually Israel

will have to dismantle huge portions of its welfare state. It will have to cut spending and taxes. Although the U.S. should not interfere with Israel's economy, it can use its aid to encourage Israel to rely more fully on the free market.

The citizenry's list of favorite programs probably puts subsidies for "artists" who drop confetti from airplanes ahead of foreign aid. And much of the foreign aid package could be cut. But the money marked for Israel ought to be off-limits to the budget shears. Israel's foreign aid allotment comes to about $4.5 billion. It deserves every cent.

Mr. HELMS. Mr. President, as the author of section 303(c) of S. 960, adopted in the Foreign Relations Committee on a strong bipartisan vote of 13 to 3, I want to make sure that it is clearly understood.

Mr. President, section 303(c) of the bill before us adds a new restriction to section 104(f) of the Foreign Assistance Act. This new restriction will prohibit the use of U.S. population assistance, directly or indirectly, either: First, in any country which permits, officially or in practice, infanticide or coerced abortion; or second, by any organization which provides funds, directly or indirectly, with respect to such a country.

This new restriction should be an effective barrier to any U.S. support for the crimes of infanticide or coerced abortion around the world. It stops U.S. population funds from being used in any country permitting such crimes—either by the government or by any other entity—and by any organization assisting such a country—wherever the organization may operate. With this restriction, the United States will send a signal to the world that we have no tolerance for infanticide and coerced abortion.

Mr. President, my amendment is intended to be very broad in order to deal with what is a fundamental violation of human rights now existing in Communist China but which could occur in other countries as well. It employes the principle of the Reagan administration policy on population, announced in July 1984 in connection with the Mexico City Conference, in that it conditions receipt of U.S. funds on an organization not engaging in certain activity, even with its own resources. In this case, the proscribed activity is providing funds, directly or indirectly, with respect to a country permitting, officially or in practice, infanticide or coerced abortion. Thus, an organization renders itself ineligible for U.S. population funds if is provides assistance to or in a country allowing the proscribed activity.

By "infanticide" is meant the killing of an infant, and by "coerced abortion" is meant undergoing an abortion under pressure—physical, emotional, economic, penal, or otherwise—from the Government or any other source.

Mr. President, I ask unanimous consent that an article from the May 13, 1985, Wall Street Journal by Stephen W. Mosher, entitled "How China Uses U.S. Aid for Forced Abortion," be printed in the RECORD at the conclusion of my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HOW CHINA USES U.N. AID FOR FORCED ABORTIONS

(By Stephen W. Mosher)

By Peking's own calculation, a staggering 53 million abortions have been performed in China over the past five years as part of a rigorous campaign to limit population growth. Through money provided to the United Nations Fund for Population Activities (UNFPA), the U.S. government has supported this campaign.

The Chinese government claims that the guiding principle of this abortion program is "voluntarism," but there was nothing voluntary about the process I observed when living in a Chinese village in 1980. It involved subjecting pregnant women, many very close to term, to exhausting morning-to-night "study sessions," levying heavy penalties on them and their families, and the actual incarceration of those who still proved recalcitrant. Nor does the description "voluntary" adequately encompass the reports that have come out of China in the years since then of pregnant women being handcuffed, thrown into hog cages and taken to the operating tables of rural clinics.

I estimate that 90 percent of the abortions performed in China are forced upon women who, if they were truly free to choose, would bear the children. Under the "one child per family" law, abortion in China is for all practical purposes mandatory for women who become pregnant outside the state-assigned quota. Not only are the pregnancies of married women who already have one child terminated under this law, so are the pregnancies of many who do not yet have a child.

Many of these abortions are done late in term and in a way that can only be described as brutal. Induced stillbirth and murders of newborns are common. I observed full-term unborn children being injected with a Western drug the Chinese called Rivalor, which causes the unborn child's death within 24 to 48 hours and in most cases its post-mortem ejection from the womb.

In other cases the child is killed at the time of parturition, sometimes by using forceps to crush the child's skull when it is still in the birth canal, other times by injecting formaldehyde into the soft spot of the head or by strangling as the child emerges. Since the baby is still partly in the womb at this time, this is not considered to be infanticide but merely abortion. Moreover, late or full-term abortions are carried out despite a regulation forbidding the termination of pregnancy after the 6th month. Officials anxious to meet the strict birth quotas set by higher-ups order doctors to ignore this proscription.

The Chinese government has loudly and repeatedly protested that these "excesses" are not government policy and that those who take part in them will be punished according to law. In fact, however, aside from a handful of halfhearted prosecutions of peasant parents for killing their infant daughters, no official in China to date has been publicly punished for mandating late abortions, for using coercion or for ordering doctors to kill infants at birth.

The only conclusion that can be drawn from these appalling facts is that Peking's assurances are merely a smoke screen. It is the birth quotas that officials enforce, not the written guideline advising no abortion after 6 months. And it is this quota the officials are held accountable for, not paper exhortations for "voluntarism." The Chinese officials who say the opposite are, at best, naive. At worst, they are consciously duplicitous.

To date, UNFPA seems to have taken at face value these Chinese assurances. A recent UNFPA report on its aid quotes official Chinese denials of government coercion and infanticide. Because of the unsatisfactory UNFPA response, the U.S. Agency for International Development recently asked Congress to rescind $10 million of the $46 million earmarked for that organization this year. The remaining $36 million would be put in a separate account for projects in other countries.

An investigation is under way in Congress to determine what further action, if any, should be taken. In this review, particular care should be given to examining UNFPA's admission that "the bulk of our program is provided for inputs requiring foreign currency" and "the provision of modern technology." Clearly, among the "inputs requiring foreign currency" would be drugs such as Rivalor and the latest in abortion technology.

It is, of course, highly unlikely that any investigation would be able to uncover evidence that U.S. funds were or are being used for infanticide and forced abortions in China. Nor should this be made a precondition of further cutting back of aid. Not only has UNFPA admitted that it has been "instrumental in setting up the infrastructure of the Chinese program," it has unconditionally committed $50 million in aid over the next four years to the program's continuance. The fact that U.S. aid continues to go to an organization that supports a program so tainted with abuses makes Americans silent accomplices to that program. The United States ought to distance itself from forced abortion and infanticide completely, morally and monetarily.

A total cutoff of indirect U.S. aid would not end the Chinese population-control program. But there is a good chance such a move would goad Peking into correcting the worst abuses of its program.

NEW MULTILATERAL BANK AID

Mr. DOMENICI. Mr. President, it seems like only yesterday that we, as a body were wrestling with the question of how to achieve 53 billion dollars' worth of budget restraint in order to reduce the Federal deficit.

We all know that going through the budget process is a very difficult undertaking, and I think that last week proved two things. First, that the United States as a country has reached the point where it can no longer afford many programs that have merit and serve the people of this great Nation. Second, that the United States as a country can no longer sign up for every new program and can no longer make commitments for every foreign aid proposal that comes along.

Last week I emphasized that while the choices we were making were very difficult, the most prudent course that the Senate could chart was to keep our economy healthy and vibrant by reducing the deficit. I detailed the benefits that we all enjoy when our economy performs well—low-interest rates, high employment, growth, and prosperity.

The benefits I outlined last week, also should be kept in mind today as we discuss foreign aid. Some members of the Foreign Relations Committee wanted to bring up as an amendment the authorization for an additional $1.5 billion for the World Bank. Increasing the U.S. participation in the World Bank by an additional $1.5 billion, and increasing our commitment to the International Finance Corporation over the next 5 years by $685 million does not seem consistent with the shared sacrifice of the budget resolution. The United States already contributes substantial assistance to the MDBS.

Almost all of the members of the copper caucus, which I cochair objected to considering the multilateral bank aid increase in conjunction with the foreign aid bill. We will continue to object until we see some postive action to remedy the worldwide copper problem—a problem that the multilateral banks have exacerbated.

When the Congress approved the $8.5 billion IMF quota increase, I voted against it. I know that many of my colleagues voted for the IMF increase believing that this would be sufficient for future multilateral lending.

That was merely 18 months ago. The MDBS are back today asking us to approve what they refer to as "parallelism," that is, an increase in the World Bank and IFC to mirror the IMF increase. I thought the IMF increase was a bad idea, and I think this parallelism is a bad idea, as well.

The report for this bill claims that the World Bank is the world's preeminent multilateral financial intermediary operating in developing countries. It had an estimated $11 billion lending program in fiscal year 1985.

Let me ask, what kind of economic development has this preeminent multilateral financial intermediary helped create? At a hearing before the International Monetary Policy Subcommittee of the Foreign Relations Committee, Dr. Anibal Pinto, an economist with the Economic Commission for Latin America was quoted. He characterized Chile as experiencing severe declining terms of trade, that is, declining prices for Chile's copper exports—65 cents instead of $1.15 per pound; increasing prices of Chile's imports—between the third quarter 1981 and the third quarter of 1984, the Chilean peso depreciated 145 percent against the dollar. This means that although Chile sells more copper each year, it can buy less of everything else. Chile's predicament, according to Dr. Pinto's analysis reminded him of Alice in Wonderland.

"Here you see," the Red Queen told Alice, "You have to run as fast as you can simply to stay in the same place. If you want to get somewhere else, you must run at least twice as fast as that."

What Dr. Pinto meant was that when copper was $1.15—the historical price in constant terms of copper this century—the copper producing countries were barely making their international debt commitments. In 1984 copper prices have ranged from as low as 55 cents a pound to an annual average of 65 cents.

Dr. Pinto's observations were made in 1978. The Bureau of Mines has been making predictions about the low growth prospects for world copper consumption for years. The International Trade Commission has twice found that there is excess copper production in the world and yet the World Bank continues to make loans for copper projects, and foreign producers continue to expand production.

The major copper producing countries' economies are less diversified than they were a decade ago and the assistance they have received from the World Bank has helped very little to develop beyond the monoproduct stage of copper, more copper and still more copper. I ask unanimous consent that the list of copper and other mining projects financed through the World Bank and the International Finance Corporation be printed in the RECORD at this point.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

WORLD BANK GROUP ASSISTANCE TO NON-FUEL MINERAL PROJECTS 1979 TO MID–1984

[In millions of dollars]

Country	Source [1]	Purpose	Amount of loan	Total project cost
1984:				
Zambia	IBRD	Copper	75.0	300.0
Peru	IFC	Zinc	4.0	16.1
1983:				
Chile	IFC	Copper	44.5	71.3
Peru	IFC	Silver	4.0	22.1
Senegal	IDA	Phosphate	7.7	9.6
Thailand	IFC	Tantalum	57.4	90.0
Tunisia	IBRD	Iron and steel.	16.8	54.1
Tunisia	IBRD	Phosphate, potash.	13.4	24.6
Zaire	IDA	Copper, cobalt and zinc technology assistance.	7.0	9.3
1982:				
Brazil	IBRD	Iron ore	304.5	4,926.6
Chile	IFC	Lithium	10.0	61.0
Liberia	IBRD	Iron ore	11.7	67.1
Nepal	IFC	Magnesite	6.2	24.9
Uganda	IDA	Phosphate technology assistance.	4.0	4.5
Zambia	IFC	Copper	30.0	250.0

WORLD BANK GROUP ASSISTANCE TO NON-FUEL MINERAL PROJECTS 1979 TO MID–1984—Continued

[In millions of dollars]

Country	Source [1]	Purpose	Amount of loan	Total project cost
1981:				
Burundi	IDA	Nickel explora-tion.	4.0	7.3
Morocco	IBRD	Lead and zinc.	9.5	15.2
Philippines	IFC	Copper smelting.	5.0	435.0
Thailand	IFC	Tin explora-tion.	0.6	3.8
Thailand	IBRD	Potash	8.9	10.4
Togo	IDA	Phosphate	5.7	8.9
1980:				
Ecuador	IFC	Copper, zinc, silver, and gold.	1.3	5.2
Greece	IFC	Asbestos	10.9	85.0
Mexico	IFC	Silver, lead, and zinc.	30.0	146.9
Morocco	IFC	Copper	15.3	65.0
Peru	IFC	Zinc	3.2	12.9
Peru	IBRD	Phosphate	7.5	9.5
Zambia	IFC	Cobalt	30.0	202.0
1979:				
Bolivia	IDA	Minerals	7.5	16.5
Colombia	IBRD	Ferronickel	80.0	340.0
Egypt	IBRD	Phosphate	11.0	13.0
Mauritania	IBRD	Iron ore	60.0	500.7
Peru	IFC	Silver	2.5	10.0

[1] IBRD—International Bank for Reconstruction and Development. IDA—International Development Association. IFC—International Finance Corp.

Mr. DOMENICI. I also ask unanimous consent that the list of 15 additional copper projects that the developing countries would like to finance at the World Bank be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

MAJOR MINE DEVELOPMENTS/EXPANSIONS BEING CONTEMPLATED

Deposit/mine	Country	Prospective output/year (thousand tons)	Start date
Carro Colorado	Panama	175	1990?
Roxby Downs	Australia	150	1990?
El Pachon	Argentina	100	1986
Carajas	Brazil	160	?
Pelambres	Chile	125	1986?
Andacolla	Chile	75	1984?
El Teniente (x)	Chile	80	1980's
Disputada (x)	Chile	200	1986?
Quebrada Blanca	Chile	100	1986?
Toromocho	Peru	83	?
Quellaveco	Peru	56	?
Tintaya	Peru	68	1984
Toquepala (x)	Peru	40	1980's
Ok Tedi	Papua, New Guinea	100	1980's
Sar Cheshmeh	Iran	130	1980's

Mr. DOMENICI. Mr. President, we have seen a lot of money spent on World Bank copper development loans. Additionally, the IMF has provided $4.4 billion to the major copper producers. In spite of this assistance Chile is now negotiating with the IMF to reschedule its debt. The emergency financing package was reported in the Wall Street Journal on May 9, 1985. The article describes a package for Chile which includes plans for a $250 million guarantee by the World Bank. This proposal is significant for a number of reasons. First, it is the ultimate shocking example of the multi-

lateral lending institutions' flagrant disregard for economic discipline as applied to the copper exporting countries. Chile is forced to renegotiate a new IMF standby agreement that includes $800 million in new financing in order to make the next year's interest payments—largely because the Chilean Government has virtually used up its available funds under the compensatory financing facility and because Chile has caused the prolonged crisis in the international copper market by overproduction in 1981, 1982, 1983, and 1984. In the face of all this, we now have the World Bank offering an unprecedented guarantee of $250 million in order to make the whole package possible.

Officials from Chile are firmly on record as opposing any production restraint. They will adamently tell you that they are the world's low cost producer. However, they don't mention that the IMF has set a target price for their copper of 75 cents per pound, and that for every cent the price of copper sells for below that price, it costs the Chilean Government $26 million in lost revenue. That means in 1984 with an average price of 65 cents, the copper glut cost Chile $260 million which they now have to borrow.

Let me take it one step further. That same depressed price of copper meant losses for the U.S. producers of more than $2.5 billion over the last 4 years. Employment in the copper mining industry has dropped from 28,000 in 1979 to an estimated 13,000 in 1984. Those figures do not include the recent closure of the Kennecott Mine in Utah.

As far as I am concerned, the United States has already paid the price for the foreign producer's excessive copper production policies. Nonetheless, there is a bill on the calendar which was going to be brought up as an amendment today to the foreign aid bill. If enacted that legislation would authorize more money for the World Bank and the International Finance Corporation.

Thus far, I have kept my remarks specific to copper, however, the same type of development is going on in the entire mining sector. This same type of development is threatening the entire world mining sector.

In 1981, U.S. metals mining was a $8.9 billion enterprise. By 1983 it had shrunk to just $5.9 billion. The jobs provided exceeded 109,000 in 1981. At the beginning of this year what remains of a workforce of about 44,800. The prognosis is a further reduction of another 30 percent.

Given the overall state of the mining industry in the United States, is it really in our best interest to double the resources of the World Bank and the International Finance Corporation when we know that the World Bank according to John Strongman, senior mineral economist, mining and nonferrous metal division of the World Bank, states that World Bank lending for mining accounts for about 10.3 percent of the banks loans? I believe that copper was just the beginning. Unless the Congress takes some definitive action we will see excess capability and surpluses for all kinds of metals.

New Mexico is a preeminent extractive industry state and it really suffers from all of the World Bank and International Finance Corporation "development."

The experience of the copper market is instructive. First, new production is financed by the World Bank or other multilateral lending institutions. Projects are funded regardless of the world demand for such minerals. Once the production is online, the law of supply and demand is disregarded by foreign producers. These development projects continue to produce at full capacity regardless of market conditions. This causes a commodity glut that further depresses the price. Market conditions cannot correct themselves even though U.S. producers cut back to reflect the decreased demand. When the price stays below cost of production for prolonged periods the U.S. producers go broke. When government owned foreign producers derive a substantial amount of their export income from the commodity in surplus the IMF insulates these producers from the impact of their production policies. The governments can go to another multilateral institution, the compensatory financing facility at the IMF and borrow the difference between what they actually earned and what they would have earned if the price had not been depressed. It does not matter that the "export income shortfall" was attributable to a producer contributing to the market glut. Actually, the IMF requires that the shortfall not be the countries' fault and cutting production could be construed as being the countries' fault. The practical effect is that the IMF's policies encourage these countries to disregard the supply and demand by pursuing full capacity production regardless of price. Such disregard for the market leads to low prices. Ironically the developing countries are also exploiting their resources when the price falls.

The copper caucus has introduced a resolution to do away with the compensatory financing facility. I hope that sometime soon this body will pass that resolution.

I have several amendments that I may offer at the appropriate time.

I respect my colleague, Senator MATHIAS, and I appreciate his willingness to work with me and other members of the copper caucus regarding amendments. I sincerely hope that at the appropriate time we can all come to an understanding about the problem and the appropriate response through the amendment process. I also look forward to working with the new U.S. Trade Representative to urge that a production restraint agreement for copper be negotiated.

Mr. HELMS. Mr. President, although the able manager of this bill has worked long and hard, and has done an excellent job, I cannot support final passage of this bill because it contains onerous provisions relating to Central America—provisions which I am confident will rise to haunt this Nation in the future.

As chairman of the Western Hemisphere Subcommittee, I have spent as much time—and possibly more time—than any other Member of this body studying Central American issues.

In this bill the Senate is approving multiyear funding for Central America—a unique approach to foreign affairs which removes our policy from congressional scrutiny. This is a sword which cuts both ways—Senators of opposite philosophical persuasions should have united to defeat this end-run around the Constitution. I know that our constituents will be wondering why we have abdicated our Senatorial responsibility. This Senator declines to abdicate that responsibility.

In the same way, the provisions for prohibiting the use of U.S. funds for compensation for land expropriation in El Salvador will put the U.S. Treasury behind a program of socialism which has nearly destroyed El Salvador and make further assistance impossible. The irony is that the compensation will probably end up in the bank accounts of fat cats in Miami, rather than strengthening El Salvador.

Finally, Mr. President, this bill contains highly restrictive language which penalizes Nicaraguan freedom fighters. What has happened to this Nation, when we refuse to help those oppressed by Marxist totalitarianism? Does this body not have the will to protect freedom? Mark my words: If this language survives in the conference, this Nation will rue the day that we turned our backs on freedom. That is why I cannot vote for this bill.

Mr. LUGAR. Mr. President, I have two comments to make before asking for final passage.

First, I have been in communication with the Secretary of State, and he has indicated to me that the administration will support this bill as amended to this point. But, at the same time, the administration hopes, and I have given assurances to them, that there will be other opportunities to take a look at the funding levels.

The administration is specifically concerned about the foreign military assistance part of our bill today, and that has been the subject of discussion.

The distinguished Senator from New Mexico offered an amendment which led to substantial discussion about it, and the distinguished Senator from North Carolina had another amendment on it.

In essence, Senator PELL and I indicated the bipartisan spirit that had permeated our committee discussions, and Senators respected that and maintained that spirit of bipartisanship. The arguments that have been made will be given further hearing by Senators as we proceed through the appropriations procedure.

Second, I say to my colleagues, very frankly, that I had considered today an attempt to repeal an amendment that had been offered by Senator PELL successfully in the committee. It was a close vote in the committee, and it was a question of some importance—namely, that we would have no understandings on aid to the Contras in Nicaragua with other nations with which we had military assistance or sales dealings under foreign assistance.

I have chosen not to offer that amendment in the same spirit that other Senators have agreed, and I appreciate very much not getting into a substantial revisiting of Nicaragua or Central American questions in this bill.

I am aware that many Senators have been interested in those questions. I think it is appropriate that both our committee and the Senate discuss Nicaragua and other Central American questions in due course, and I will want to participate in that debate. I simply want to express appreciation and indicate my reticence to offer an amendment I had planned to offer and on which I had some feeling.

Mr. President, I know of no other amendments, and I say that tentatively and hopefully.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. LUGAR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Arizona [Mr. GOLDWATER], the Senator from Maryland [Mr. MATHIAS], and the Senator from Virginia [Mr. TRIBLE] are necessarily absent.

I also announce that the Senator from North Carolina [Mr. EAST] and the Senator from California [Mr. WILSON] are absent due to illness.

Mr. CRANSTON. I announce that the Senator from Nebraska [Mr. EXON] is absent because of illness.

The PRESIDING OFFICER (Mr. ANDREWS). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 75, nays 19, as follows:

[Rollcall Vote No. 82 Leg.]

So the bill (S. 960), as amended, was passed, as follows:

S. 960

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "International Security and Development Cooperation Act of 1985".

TITLE I—MILITARY SALES AND RELATED PROGRAMS

FOREIGN MILITARY SALES CREDIT AUTHORIZATION AND AGGREGATE CEILINGS

SEC. 101. (a) The first sentence of section 31(a) of the Arms Export Control Act (22 U.S.C. 2771(a)) is amended to read as follows: "There are authorized to be appropriated to the President to carry out section 23 of this Act $5,464,500,000 for the fiscal year 1986.".

(b) Section 31(b)(1) of such Act (22 U.S.C. 2771(b)(1)) is amended to read as follows:

"(b)(1) The total amount of credits extended under section 23 of this Act shall not exceed $5,464,500,000 for the fiscal year 1986."

(c) Section 31(b)(3) of such Act (22 U.S.C. 2771(b)(3)) is amended to read as follows:

"(3)(A) Of the total amount of credits extended under section 23 of this Act, not less than $1,800,000,000 for the fiscal year 1986 shall be available only for Israel, and Israel shall be released from its contractual liability to repay the United States Government with respect to such credits.

"(B) If the Government of Israel requests that funds be used for such purposes, up to $150,000,000 of the amount of credits available only for Israel under subparagraph (A) shall be available for research and development activities in the United States for the Lavi program and not less than $250,000,000 of such credits shall be available for the procurement in Israel of defense articles and defense services, including research and development.".

(d) Section 31(b)(5) of such Act (22 U.S.C. 2771(b)(5)) is amended to read as follows:

"(5) The principal amount of credits provided under section 23 at interest rates equivalent to the current average interest rate for United States Government obligations of comparable maturity, or under section 24(a) if provided by the Federal Financing Bank, with respect to Greece, Korea, the Philippines, Portugal, Spain, Thailand, and Turkey, shall (if and to the extent each country so desires) be repaid in not more than twenty years, following a grace period of ten years on repayment of principal.".

(e) Section 31(b)(6) of such Act (22 U.S.C. 2771(b)(6)) is amended to read as follows:

"(6) Of the total amount of credits extended under section 23 of this Act, not less than $1,300,000,000 for the fiscal year 1986 shall be available only for Egypt, and Egypt shall be released from its contractual liability to repay the United States Government with respect to such credits.".

(f) Sections 31(b)(7) and 31(c) of such Act (22 U.S.C. 2771 (b)(7) and (c)) are repealed.

VALUATION OF CERTAIN DEFENSE ARTICLES

SEC. 102. (a) Section 21(a) of the Arms Export Control Act (22 U.S.C. 2761(a)) is amended—

(1) by redesignating paragraphs (1), (2) and (3) as clauses (A), (B), and (C), respectively;

(2) by inserting "(1)" immediately after "(a); and

(3) by adding at the end thereof the following new paragraph:

"(2) For purposes of clause (A) of paragraph (1), the actual value of a naval vessel of 3,000 tons or less and 20 years or more of age shall be considered to be not less than the greater of the scrap value or fair value (including conversion costs) of such vessel, as determined by the Secretary of Defense.".

(b) Section 47 of such Act (22 U.S.C. 2794) is amended in paragraph (2) by inserting "except as otherwise provided in section 21(a)" after "excess defense articles".

ADMINISTRATIVE SURCHARGE

SEC. 103. Clause (A) of section 21(e)(1) of the Arms Export Control Act (22 U.S.C. 2761(e)(1)) is amended by inserting "(excluding a pro rata share of fixed base operation costs)" immediately after "full estimated costs".

CATALOG DATA AND SERVICES

SEC. 104. Section 21(h) of the Arms Export Control Act (22 U.S.C. 2761(h)) is amended—

(1) by inserting "(1)" immediately after "(h)";

(2) by redesignating clauses (1) and (2) as clauses (A) and (B), respectively; and

(3) by adding at the end thereof the following:

"(2) In carrying out the objectives of this section, the President is authorized to provide cataloging data and cataloging services, without charge, to the North Atlantic Treaty Organization or to any member government thereof, if such Organization or member government provides such data and services in accordance with an agreement on a reciprocal basis, without charge, to the United States Government.".

CONTRACT ADMINISTRATION SERVICES

SEC. 105. Section 21(h)(1) of the Arms Export Control Act (22 U.S.C. 2761(h)(1)) is amended by inserting "contract administration services," immediately after "inspection," in the text above clause (A).

SALES CREDITS

SEC. 106. Section 23 of the Arms Export Control Act (22 U.S.C. 2763) is amended to read as follows:

"SEC. 23. SALES CREDITS.—The President is authorized to finance procurement of defense articles, defense services, and design and construction services by friendly foreign countries and international organizations, on such terms and conditions as he may determine. The President shall charge interest at a rate determined by the Secretary of the Treasury taking into consideration the current market yields on outstanding marketable obligations of the United States of comparable maturities. Notwithstanding the preceding sentence, the President may charge a lesser rate of interest if he determines that the national interest requires a lesser rate. Loan agreements under this section shall require repayment in United States dollars within a period of not to exceed twelve years after the loan agreement is signed on behalf of the United States Government, unless a longer period is specifically authorized by law for such country or international organization.".

REPORT ON REPLENISHMENT OF THE GUARANTY RESERVE FUND

SEC. 107. (a) For the purpose of providing recommendations for improving the security interests of the United States and the friends and allies of the United States, the President shall prepare and transmit to the Congress within ninety days of the date of enactment of this Act a report which sets forth the history of United States financing under the Foreign Assistance Act and the Arms Export Control Act. Such report shall include recommendations on replenishing the Guaranty Reserve Fund under section 24 of the Arms Export Control Act and recommendations on other matters agreed to in consultation with the chairman and ranking minority member of the Committee on Foreign Relations of the Senate.

(b) Section 24(c) of the Arms Export Control Act (22 U.S.C. 2764(c)) is amended by adding at the end thereof the following: "The single reserve described in this subsection may, on and after the date of enactment of the International Security and Development Cooperation Act of 1985, be referred to as the 'Guaranty Reserve Fund'.".

REPORTING REQUIREMENT

SEC. 108. (a) Section 25(a) of the Arms Export Control Act (22 U.S.C. 2765(a)) is amended in the text preceding paragraph (1) by inserting "or, in the case of paragraph (4), no later than April 1 of each year" immediately after "each year".

(b) Section 25(a) of such Act (22 U.S.C. 2765(a)) is amended by amending paragraph (4) to read as follows:

"(4) an estimate of the amount of sales and deliveries of weapons and weapons-related defense equipment by all major arms suppliers to all major recipient countries in the developing world during the preceding calendar year;".

REPORT ON CASH FLOW FINANCING

SEC. 109. Section 25(a) of the Arms Export Control Act (22 U.S.C. 2765(a)), as amended by section 108, is further amended by—

(1) inserting "(A)" immediately after "(5)";

(2) adding "and" after the semicolon in paragraph (5); and

(3) adding at the end of paragraph (5) the following new subparagraphs:

"(B) for each country that is proposed to be furnished credits or guaranties under this Act in the next fiscal year and that has been approved for cash flow financing, as defined in subparagraph (C) of this paragraph, in excess of $100,000,000 as of October 1 of the current fiscal year—

"(i) the amount of such approved cash flow financing;

"(ii) a description of administrative ceilings and controls applied; and

"(iii) a description of the financial resources otherwise available to such country to pay such approved cash flow financing; and

"(C) the term 'cash flow financing' means, for the purposes of subparagraph (B) of this paragraph, the dollar amount of the difference between the total estimated price of a Letter of Offer and Acceptance or other purchase agreement that has been approved for financing under this Act or under section 503(a)(3) of the Foreign Assistance Act of 1961 and the amount of the financing that has been approved therefor;".

COOPERATIVE AGREEMENTS ON AIR DEFENSE IN CENTRAL EUROPE

SEC. 110. (a) The Secretary of Defense is authorized to carry out the European air defense agreements. In carrying out those agreements, the Secretary—

(1) may provide, without monetary charge, to the Federal Republic of Germany articles and services as specified in the agreements; and

(2) may accept from the Federal Republic of Germany (in return for the articles and services provided under paragraph (1)) articles and services as specified in the agreements.

(b) In connection with the administration of the European air defense agreements, the Secretary of Defense may—

(1) waive any surcharge for administrative services otherwise chargeable under section 21(e)(1)(A) of the Arms Export Control Act (22 U.S.C. 2761(e)(1)(A));

(2) waive any charge not otherwise waived for services associated with contract administration for the sale under the Arms Export Control Act of Patriot air defense missile fire units to the Federal Republic of Germany contemplated in the agreements;

(3) use, to the extent comtemplated in the agreements, the NATO Maintenance and Supply Agency—

(A) for the supply of logistical support in Europe for the Patriot missile system; and

(B) for the acquisition of such logistical support, to the extent that the Secretary determines that the procedures of that Agency governing such supply and acquisition are appropriate;

(4) share, to the extent contemplated in the agreements, the costs of set-up charges of facilities for use by that Agency to perform depot-level support of Patriot missile fire units in Europe; and

(5) deliver to the Federal Republic of Germany one Patriot missile fire unit configured for training, to be purchased by the Federal Republic of Germany under the Arms Export Control Act as contemplated in the agreements, without regard to the requirement in section 22 of that Act for payment in advance of delivery for any purchase under this Act.

(c) Notwithstanding the rate required to be charged under section 21 of the Arms Export Control Act (22 U.S.C. 2761) for services furnished by the United States, in the case of 14 Patriot missile fire units which the Federal Republic of Germany purchases from the United States under the Arms Export Control Act as contemplated in the European air defense agreements, the rate charged by the Secretary of Defense for packing, crating, handling, and transportation services associated with that purchase may not exceed the established Department of Defense rate for such services.

(d) For the purposes of this section, the term "European air defense agreements" means—

(1) the agreement entitled "Agreement between the Secretary of Defense of the United States of America and the Minister of Defense of the Federal Republic of Germany on Cooperative Measures for Enhancing Air Defense for Central Europe", signed on December 6, 1983; and

(2) the agreement entitled "Agreement between the Secretary of Defense of the United States of America and the Minister of Defense of the Federal Republic of Germany in implementation of the 6 December 1983 Agreement on Cooperative Measures for Enhancing Air Defense for Central Europe", signed on July 12, 1984.

(e) The authority of the Secretary of Defense to enter into contracts under the European air defense agreements is available only to the extent that appropriated funds, other than those made available under section 31 of the Arms Export Control Act (22 U.S.C. 2771), are available for that purpose.

INCREASE IN CRIMINAL PENALTIES FOR CERTAIN VIOLATIONS OF THE ARMS EXPORT CONTROL ACT

SEC. 111. (a) Section 38(c) of the Arms Export Control Act (22 U.S.C. 2778(c)) is amended by striking out "not more than $100,000 or imprisoned not more than two years, or both" and inserting in lieu thereof "for each violation not more than $1,000,000 or imprisoned not more than ten years, or both".

(b) Section 38(e) of such Act (22 U.S.C. 2778(e)) is amended by adding at the end thereof the following: "Notwithstanding section 11(c) of the Export Administration Act of 1979, the civil penalty for each violation involving controls imposed on the export of defense articles and defense services under this section may not exceed $500,000.".

(c) This section shall take effect upon the date of enactment of this Act or October 1, 1985, whichever is later. The amendments made by this section shall apply to violations occurring after the effective date of this section.

OFFICIAL RECEPTION AND REPRESENTATION EXPENSES

SEC. 112. Section 43 of the Arms Export Control Act (22 U.S.C. 2792) is amended—

(1) in subsection (b) by inserting "and official reception and representation expenses"

immediately after "administrative expenses"; and

(2) by adding at the end thereof the following new subsection:

"(c) Not more than $72,500 of the funds derived from charges for administrative services pursuant to section 21(e)(1)(A) of this Act may be used each fiscal year for official reception and representation expenses.".

SPECIAL DEFENSE ACQUISITION FUND

SEC. 113. Section 51(a) of the Arms Export Control Act (22 U.S.C. 2795(a)) is amended by adding at the end thereof the following new paragraphs:

"(3) In order to maintain the readiness of the Armed Forces of the United States while facilitating the transfer of less advanced weapons systems in the inventory of the Department of Defense to foreign countries and international organizations in accordance with the provisions of this Act, the Foreign Assistance Act of 1961, or as otherwise authorized by law, instead of the transfer of more advanced weapons systems from procurement, the Fund may be used to acquire defense articles and defense services in anticipation of their transfer, on a reimbursable basis, to the Department of Defense to replace items transferred from the inventory of that Department to foreign countries and international organizations if such items are no longer in production for use by the Armed Forces of the United States.

"(4) The Fund may be used to keep on continuous order such defense articles and defense services as are assigned by the Department of Defense for integrated management by a single agency thereof for the common use of all military departments in anticipation of the transfer of similar defense articles and defense services to foreign countries and international organizations authorized by this Act, the Foreign Assistance Act of 1961, or other law.".

MILITARY ASSISTANCE COSTS

SEC. 114. Section 503(a) of the Foreign Assistance Act of 1961 (22 U.S.C. 2311(a)) is amended by adding the following sentence at the end of paragraph (3) thereof: "Sales which are wholly paid from funds so transferred shall be priced to exclude the costs of salaries of members of the Armed Forces of the United States.".

MILITARY ASSISTANCE

SEC. 115. Section 504(a)(1) of the Foreign Assistance Act of 1961 (22 U.S.C. 2312(a)(1)) is amended to read as follows:

"(a)(1) There are authorized to be appropriated to the President to carry out the purposes of this chapter $805,100,000 for the fiscal year 1986, of which amount not less than $15,000,000 shall be available only for Tunisia.".

STOCKPILING OF DEFENSE ARTICLES FOR FOREIGN COUNTRIES

SEC. 116. Section 514(b)(2) of the Foreign Assistance Act of 1961 (22 U.S.C. 2321h(b)(2)) is amended to read as follows:

"(2) The value of such additions to stockpiles in foreign countries shall not exceed $360,000,000 for the fiscal year 1986.".

SECURITY ASSISTANCE ORGANIZATIONS

SEC. 117. Section 515(c)(1) of the Foreign Assistance Act of 1961 (22 U.S.C. 2321i(c)(1) is amended by striking out "For the fiscal year 1982 and the fiscal year 1983" and inserting in lieu thereof "For the fiscal year 1986, Pakistan, Tunisia, Sudan, El Salvador, Honduras".

INTERNATIONAL MILITARY EDUCATION AND TRAINING

SEC. 118. Section 542 of the Foreign Assistance Act of 1961 (22 U.S.C. 2347a) is amended to read as follows:

"SEC. 542. AUTHORIZATION.—There are authorized to be appropriated to the President to carry out the purposes of this chapter $56,221,000 for the fiscal year 1986.".

EXCHANGE TRAINING

SEC. 119. Chapter 5 of part II of the Foreign Assistance Act of 1961 (22 U.S.C. 2347 et seq.) is amended by adding at the end thereof the following new section:

"SEC. 544. EXCHANGE TRAINING.—In carrying out this chapter, the President is authorized to provide for attendance of foreign military personnel at professional military education institutions in the United States (other than Service academies) without charge, and without charge to funds available to carry out this chapter (notwithstanding section 632(d) of this Act), if such attendance is pursuant to an agreement providing for the exchange of students on a one-for-one, reciprocal basis each fiscal year between those United States professional military education institutions and comparable institutions of foreign countries and international organizations.".

TRAINING IN MARITIME SKILLS

SEC. 120. (a) Chapter 5 of part II of the Foreign Assistance Act of 1961 (22 U.S.C. 2347 et seq.), as amended by section 119, is further amended by adding at the end thereof the following new section:

"SEC. 545. TRAINING IN MARITIME SKILLS.—The President is encouraged to allocate a portion of the funds made available each fiscal year to carry out this chapter for use in providing education and maintenance in maritime search and rescue, operation and maintenance of aids to navigation, port security, at-sea law enforcement, international maritime law, and general maritime skills."; and

(b) Section 660(b) of such Act (22 U.S.C. 2420(b)) is amended—

(1) by striking out "or" at the end of clause (1);

(2) by striking out the period at the end of clause (2) and inserting in lieu thereof "; or"; and

(3) by adding the following new clause after clause (2);

"(3) with respect to assistance, including training, in maritime law enforcement.".

AUTHORIZATION FOR PEACEKEEPING OPERATIONS

SEC. 121. Section 552(a) of the Foreign Assistance Act of 1961 (22 U.S.C. 2348a) is amended to read as follows:

"(a) There are authorized to be appropriated to the President to carry out the purposes of this chapter, in addition to amounts otherwise available for such purposes, $37,000,000 for the fiscal year 1986.".

PEACEKEEPING OPERATIONS EMERGENCIES

SEC. 122. (a) Section 552 of the Foreign Assistance Act of 1961 (22 U.S.C. 2348), as amended by section 121, is further amended—

(1) by inserting in subsection (c) "(1)" immediately after "the President may";

(2) by inserting in subsection (c) immediately before the period at the end of the subsection "; and (2) in the event the President also determines that such unforeseen emergency requires the immediate provision of assistance under this chapter, direct the drawdown of commodities and services from the inventory and resources of any agency of the United States Government of an aggregate value not to exceed $25,000,000 in any fiscal year"; and

(3) by inserting at the end thereof the following new subsection:

"(d) There are authorized to be appropriated to the President such sums as may be necessary to reimburse the applicable appropriation, fund, or account for commodities and services provided under subsection (c)(2).".

(b) Section 652 of such Act (22 U.S.C. 2411) is amended by inserting ", 552(c)(2)," immediately after "under section 506(a)".

SECURITY ASSISTANCE FOR TURKEY AND GREECE

SEC. 123. (a) Of the amounts provided to carry out chapter 2 of part II of the Foreign Assistance Act of 1961 (22 U.S.C. 2311 et seq.) for the fiscal year 1986, up to $215,000,000 may be made available for Turkey with the understanding that the United States Government is acting with urgency and determination to oppose any actions aimed at effecting a permanent bifurcation of Cyprus.

(b) Of the amounts provided for credits under section 23 of the Arms Export Control Act (22 U.S.C. 2763) for the fiscal year 1986, up to $500,000,000 may be extended to Turkey, and $500,000,000 shall be available only for Greece.

(c)(1) The amount of credits under the Arms Export Control Act for Greece for the fiscal year 1986 which shall be extended at a rate described in paragraph (2) is the amount which bears the same proportion to the aggregate amount of credits extended under such Act for Greece for such fiscal year as the amount of credits extended under such Act at such a rate for Turkey for such fiscal year bears to the aggregate amount of credits extended under such Act for Turkey for such fiscal year.

(2) The rate described in paragraph (1) is any rate less than the current average interest rate (as of the last day of the month preceding the financing of the procurement) that the United States pays on outstanding marketable obligations of comparable maturity.

PROHIBITION ON THE PROVISION OF FOREIGN MILITARY SALES CREDITS FOR LEBANON

SEC. 124. For the fiscal year 1986, no credits may be extended under section 23 of the Arms Export Control Act (22 U.S.C. 2763) with respect to Lebanon.

EXEMPTION OF CERTAIN SAFETY-RELATED EQUIPMENT FROM PROHIBITION ON MILITARY SALES TO CHILE

SEC. 125. Section 726 of the International Security and Development Cooperation Act of 1981 is amended by adding at the end thereof the following new subsection:

"(c) The prohibition contained in subsection (b) does not prohibit the sale, or the licensing for export, of cartridge-actuated devices, propellant-actuated devices, or technical manuals for aircraft of the F-5E/F or A/T-37 type which were sold to the Chilean Air Force by the United States before January 1, 1976, so long as the devices or manuals are provided only for purposes of enhancing the safety of the aircraft crew.".

LEASING AUTHORITY

SEC. 126. Section 7307(b)(1) of title 10, United States Code, is amended by inserting before the period at the end thereof a comma and the following: "except that any lease or loan of such a vessel under such a law shall be made only in accordance with the provisions of chapter 6 of the Arms Export Control Act or chapter 2 of part II of the Foreign Assistance Act of 1961".

CERTIFICATION CONCERNING AWACS SOLD TO SAUDI ARABIA

SEC. 127. (a)(1) The Congress finds that in his October 28, 1981, communication to the Senate concerning the proposed sale of AWACS aircraft and F-15 enhancement items to Saudi Arabia which was then being reviewed by the Congress (hereafter in this section referred to as the "1981 AWACS communication"), the President stated the following:

"Transfer of the AWACS will take place . . . only after the Congress has received in writing a Presidential certification, containing agreements with Saudi Arabia, that the following conditions have been met:

"1. SECURITY OF TECHNOLOGY

"A. That a detailed plan for the security of equipment, technology, information, and supporting documentation has been agreed to by the United States and Saudi Arabia and is in place; and

"B. The security provisions are no less stringent than measures employed by the United States for protection and control of its equipment of like kind outside the continental United States; and

"C. The United States has the right of continual on-site inspection and surveillance by United States personnel of security arrangements for all operations during the useful life of the AWACS. It is further provided that security arrangements will be supplemented by additional United States personnel if it is deemed necessary by the two parties; and

"D. Saudi Arabia will not permit citizens of third nations either to perform maintenance on the AWACS or to modify any such equipment without prior, explicit mutual consent of the two governments; and

"E. Computer software, as designated by the United States Government, will remain the property of the United States Government.

"2. ACCESS TO INFORMATION

"That Saudi Arabia has agreed to share with the United States continuously and completely the information that it acquires from use of the AWACS.

"3. CONTROL OVER THIRD-COUNTRY PARTICIPATION

"A. That Saudi Arabia has agreed not to share access to AWACS equipment, technology, documentation, or any information developed from such equipment or technology with any nation other than the United States without the prior, explicit mutual consent of both governments; and

"B. There are in place adequate and effective procedures requiring the screening and security clearance of citizens of Saudi Arabia and that only cleared Saudi citizens and cleared United States nationals will have access to AWACS equipment, technology, or documentation, or information derived therefrom, without the prior, explicit mutual consent of the two governments.

"4. AWACS FLIGHT OPERATIONS

"That the Saudi AWACS will be operated solely within the boundaries of Saudi Arabia, except with the prior, explicit mutual consent of the two governments, and solely for defensive purposes as defined by the United States, in order to maintain security and regional stability.

"5. COMMAND STRUCTURE

"That agreements as they concern organizational command and control structure for the operation of AWACS are of such a nature to guarantee that the commitments above will be honored.

"6. REGIONAL PEACE AND SECURITY

"That the sale contributes directly to the stability and security of the area, enhances the atmosphere and prospects for progress toward peace, and that initiates toward the peaceful resolution of disputes in the region have either been successfully completed or that significant progress toward that goal has been accomplished with the substantial assistance of Saudi Arabia.".

(2) The Congress finds that the President also stated in the 1981 AWACS communication that should circumstances arise that might require changes in the arrangements described in that communication "they would be made only with Congressional participation".

(b) As provided in the 1981 AWACS communication, before the E-3A airborne warning and control system (AWACS) aircraft which were the subject of that communication are transferred to Saudi Arabia, the President shall submit to the Congress a written Presidential certification, containtion agreements with Saudi Arabia, that the conditions set forth in that communication have been met.

(c) In order to facilitate the congressional participation provided for in the 1981 AWACS communication, the President shall notify the Congress promptly of any changes being considered by the United States in the arrangements described in that communication.

SENSITIVE TECHNOLOGY

SEC. 128. Section 36(b) of the Arms Export Control Act (22 U.S.C. 2776(b)) is amended—

(1) by inserting before the period at the end of the second sentence of paragraph (1) the following: "and a detailed justification of the reasons necessitating the sale of such articles or services in view of the sensitivity of such technology"; and

(2) by adding at the end thereof the following new paragraphs:

(5)(A) If, before the delivery of any major defense article or major defense equipment, or the furnishing of any defense service or design and construction service, sold pursuant to a letter of offer described in paragraph (1), the sensitivity of technology or the capability of the article, equipment, or service is enhanced or upgraded from the level of sensitivity or capability described in the numbered certification with respect to an offer to sell such article, equipment, or service, then, at least forty-five days before the delivery of such article or equipment or the furnishing of such service, the President shall prepare and transmit to the chairman of the Committee on Foreign Affairs of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report—

"(i) describing the manner in which the technology or capability has been enhanced or upgraded and describing the significance of such enhancement or upgrade; and

"(ii) setting forth a detailed justification for such enhancement or upgrade.

"(B) The provisions of subparagraph (A) apply to an article or equipment delivered, or a service furnished, within ten years of the transmittal to the Congress of a numbered certification with respect to the sale of such article, equipment, or service.

"(C) If the enhancement or upgrade in the sensitivity of technology or the capability of major defense equipment, defense articles, defense services, or design and construction services described in a numbered certification submitted under this subsection costs $14,000,000 or more in the case of any major defense equipment, $50,000,000 or more in the case of defense articles or defense services, or $200,000,000 or more in the case of design or construction services, then the President shall submit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a new numbered certification which relates to such enhancement or upgrade and which shall be considered for purposes of this subsection as if it were a separate letter of offer to sell defense equipment, articles, or services, subject to all of the requirements, restrictions, and conditions set forth in this subsection. For purposes of this subparagraph, references in this subsection to sales shall be deemed to be references to enhancements or upgrades in the sensitivity of technology or the capability of major defense equipment, articles, or services, as the case may be.

"(D) For the purposes of subsection (b)(5)(A), major defense article shall be construed to include electronic devices, which if upgraded, will enhance the mission capability of a weapons system."

TITLE II—ECONOMIC SUPPORT FUND

AUTHORIZATION OF APPROPRIATIONS

SEC. 201. (a) Section 531 of the Foreign Assistance Act of 1961 (22 U.S.C. 2346) is amended to read as follows:

"SEC. 531. AUTHORITY.—(a)(1) the Congress recognizes that under special economic, political, or security conditions the national interests of the United States may require economic support for countries or in amounts which could not be justified solely under chapter 1 of part I. In such cases, the President is authorized to furnish assistance to countries and organizations, on such terms and conditions as he may determine, in order to promote economic or political stability. To the maximum extent feasible, the President shall provide assistance under this chapter consistent with the policy directions, purposes, and programs of part I of this Act.

"(2) To the maximum extent feasible, funds made available pursuant to this chapter for commodity import programs or other program assistance shall be used to generate local currencies, not less than 50 per centum of which shall be available to support activities consistent with the objectives of section is 103 through 106 of this Act, and administered by the agency primarily responsible for administering part I of this Act.

"(3) The Secretary of State shall be responsible for policy decisions and justifications for economic support programs under this chapter, including determinations of whether there will be an economic support program for a country and the amount of the program for each country. The Secretary shall exercise this responsibility in cooperation with the Administrator of the agency primarily responsible for administering part I.

"(4) As part of the annual presentation materials for foreign assistance submitted to the Congress, the agency primarily responsible for administering this chapter shall provide a detailed justification for the uses and the purposes of the funds provided under this chapter. Such material shall include, but not be limited to, information concerning the amounts and kinds of cash grant transfers, the amounts and kinds of budgetary and balance-of-payments support provided, and the amounts and kinds of projectized assistance provided with funds made available under this chapter.

"(b)(1) there are authorized to be appropriated to the President to carry out the purposes of this chapter—

"(A) $2,015,000,000 for the fiscal year 1986 for the following countries signing the Camp David agreement: Israel and Egypt, of which amount $1,200,000,000 shall be available only for Israel and $815,000,000 shall be available only for Egypt; and

"(B) $1,826,000,000 for the fiscal year 1986 for countries other than the countries referred to in clause (A), of which amount—

"(i) $15,000,000 shall be available only for Cyprus;

"(ii) not less than $20,000,000 shall be available only for Tunisia; and

"(iii) $80,000,000 shall be available only for Portugal.".

"(2) Amounts appropriated to carry out this chapter are authorized to remain available until expended.

"(c)(1) All of the funds made available to Israel and to Egypt under this chapter for the fiscal year 1986 shall be provided on a grant basis.

"(2) The total amount of funds allocated for Israel under this chapter for the fiscal year 1986 shall be made available as a cash transfer on an expedited basis within the first thirty days of the fiscal year.

"(3) Of the total amount of funds made available for Egypt under this chapter, up to $200,000,000 of such funds may be obligated, but not less than $165,000,000 shall be obligated, in the form of a cash transfer to help and encourage economic reforms and Egypt's own developmental efforts.

"(d) Amounts appropriated to carry out this chapter shall be available for economic programs only and may not be used for military or paramilitary purposes.

"(e) The President shall use an amount equal to not less than 20 percent of the funds which are appropriated to carry out this chapter and which are made available for commodity import programs for the purchase of agricultural commodities which are of United States origin.".

(b) Section 535(a) of such Act (22 U.S.C. 2346d(a)) is amended—

(1) by striking out "1982" and inserting in lieu thereof "1986"; and

(2) by striking out "and up to $75,000,000 for the fiscal year 1983".

(c) Chapter 4 of part II of such Act (22 U.S.C. 2346 et seq.) is amended—

(1) by striking out sections 532, 533, 534, 536, 537, 538, 539, and 540; and

(2) by redesignating section 535, as amended by subsection (b), as section 532.

(d) Chapter 4 of part II of such Act (22 U.S.C. 2346 et seq.), as amended by this section, is further amended by adding at the end thereof the following new sections:

"SEC. 533. PROHIBITION ON USE OF FUNDS FOR NUCLEAR FACILITIES.—Funds available to carry out this chapter for the fiscal year 1986 may not be used to finance the construction of, the operation or maintenance of, or the supplying of fuel for, any nuclear facility in a foreign country unless the President certifies to the Congress that the country in question is a party to the Non-Proliferation Treaty, cooperates fully with the International Atomic Energy Agency, and pursues nuclear non-proliferation policies consistent with those of the United States.

"SEC. 534. PROHIBITION ON USE OF FUNDS FOR LEBANON.—None of the funds authorized to be appropriated to carry out this chapter for the fiscal year 1986 may be available for Lebanon.".

SUPPLEMENTAL AUTHORIZATION OF APPROPRIATIONS

SEC. 202. (a) In addition to amounts otherwise authorized to be appropriated for the fiscal year 1985 to carry out the provisions of chapter 4 of part II of the Foreign Assistance Act of 1961, there are authorized to be appropriated $2,008,000,000, of which $1,500,000,000 shall be available only for Israel, $500,000,000 shall be available only for Egypt and $8,000,000 shall be available only for the Middle East Regional Program.

(b) Amounts appropriated to carry out this section are authorized to remain available until September 30, 1986.

TITLE III—DEVELOPMENT ASSISTANCE

DEVELOPMENT ASSISTANCE POLICY

SEC. 301. Section 102(b) of the Foreign Assistance Act of 1961 (22 U.S.C. 2151-1(b)) is amended by adding at the end thereof the following new paragraphs:

"(13) United States encouragement of policy reforms is necessary if developing countries are to achieve economic growth and equity.

"(14) Development assistance should, as a fundamental objective, promote private sector activity in open and competitive markets in developing countries, recognizing such activity to be a productive and efficient means of achieving equitable and long-term economic growth.

"(15) United States cooperation in development should recognize as essential the need of developing countries to have access to appropriate technology in order to improve food and water, health and housing, education and employment, and agriculture and industry.

"(16) United States assistance should focus on establishing and upgrading the insitutional capacities of developing countries in order to promote long-term development. An important component of institution building involves training to expand the human resource potential of people in developing countries.".

AGRICULTURE, RURAL DEVELOPMENT, AND NUTRITION

SEC. 302. (a) The first sentence of section 103(a)(2) of the Foreign Assistance Act of 1961 (22 U.S.C. 2151a(a)(2)) is amended to read as follows: "There are authorized to be appropriated to the President for purposes of this section, in addition to funds otherwise available for such purposes, $755,551,000 for the fiscal year 1986, of which the President may use such amounts as he deems appropriate to carry out the provisions of section 316 of the International Security and Development Cooperation Act of 1980.".

(b) Section 103(g) of such Act (22 U.S.C. 2151a(g)) is amended to read as follows:

"(g) It is the sense of the Congress that—

"(1) the President should continue United States participation in the International Fund for Agricultural Development, and that funds for the Second Replenishment for that organization will be authorized to be appropriated upon receipt of a recommendation from the President;

"(2) the United States should provide a special contribution to the International Fund for Agricultural Development for a special fund for Sub-Saharan African Countries affected by drought and decertification, and the United States should take a leadership role in the creation of such a special fund and should make a substantial contribution to this fund; and

"(3) such objectives should be accomplished through a reprogramming of existing appropriations or through some other such procedure designed to guarantee that overall funding levels for programs within the international affairs function of the budget are consistent with targets set by the applicable congressional budget resolution.".

POPULATION AND HEALTH

SEC. 303. (a)(1) Section 104(g) of the Foreign Assistance Act of 1961 (22 U.S.C. 2151b(g)) is amended to read as follows:

"(g) AUTHORIZATION OF APPROPRIATIONS—There are authorized to be appropriated to the President, in addition to funds otherwise available for such purposes—

"(1) $270,017,000 for fiscal year 1986 to carry out subsection (b) of this section; and

"(2) $186,427,000 for fiscal year 1986 to carry out subsection (c) of this section.

Funds appropriated under this subsection are authorized to remain available until expended.".

(2) Section 104(c)(2)(B) of such Act (22 U.S.C. 2151b(c)(2)(B) is amended in the first sentence by inserting "for the fiscal year 1986" after "$25,000,000".

(b) Section 104(b) of such Act (22 U.S.C. 2151b(b)) is amended by adding at the end thereof the following: "In determining eligibility for assistance under this subsection, the Administrator of the agency primarily responsible for administering this part shall not subject any nongovernmental or multilateral organization to any requirement more restrictive than any requirement applicable to a foreign government for such assistance.".

(c) Section 104(f) of such Act (22 U.S.C. 2151b(f) is amended by adding at the end thereof the following:

"(4) None of the funds made available to carry out subsection (b) may be used, directly or indirectly—

"(A) in any country which permits, officially or in practice, infanticide or coerced abortion; or

"(B) by any organization which provides funds, directly or indirectly, with respect to such a country.".

(d) None of the funds made available to carry out part I of the Foreign Assistance Act of 1961 may be available to carry out any program for population planning in the People's Republic of China, including any of those funds provided for such a program through any private and voluntary organization or any international organization.

(e) The President shall instruct each United States representative to an international organization to which the United States makes a financial contribution to oppose the extension of assistance by such organization for any program for population planning in the People's Republic of China.

EDUCATION AND HUMAN RESOURCES DEVELOPMENT

SEC. 304. (a) The second sentence of section 105(a) of the Foreign Assistance Act of 1961 (22 U.S.C. 2151c(a)) is amended to read as follows: "There are authorized to be appropriated to the President for the purposes of this section, in addition to funds otherwise available for such purposes, $177,100,000 for the fiscal year 1986, which are authorized to remain available until expended.".

(b) The third sentence of such section is repealed.

ENERGY, PRIVATE VOLUNTARY ORGANIZATIONS, AND SELECTED DEVELOPMENT ACTIVITIES

SEC. 305. Section 106(e)(1) of the Foreign Assistance Act of 1961 (22 U.S.C. 2151d(e)(1)) is amended to read as follows:

"(e)(1) There are authorized to be appropriated to the President for purposes of this section, in addition to funds otherwise available for such purposes, $200,000,000 for the fiscal year 1986.".

PRIVATE SECTOR REVOLVING FUND

SEC. 306. The first sentence of section 108(b) of the Foreign Assistance Act of 1961 (22 U.S.C. 2151f(b)) is amended by striking out "1984, up to $20,000,000" and inserting in lieu thereof "1986, up to $16,000,000".

SAHEL DEVELOPMENT PROGRAM

SEC. 307. The third sentence of section 121(c) of the Foreign Assistance Act of 1961 (22 U.S.C. 2151s(c)) is amended to read as follows: "In addition to the amounts authorized to be appropriated by the preceding sentences and to funds otherwise available for such purposes, there are authorized to be appropriated to the President for purposes of this section $80,500,000 for the fiscal year 1986.".

AFRICA FAMINE RECOVERY AND DEVELOPMENT FUND

SEC. 308. Chapter 1 of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new section:

"SEC. 129. AFRICA FAMINE RECOVERY AND DEVELOPMENT FUND.—(a) The Congress reaffirms the commitment of the American people to assist the countries of Sub-Saharan Africa in dealing with drought and famine conditions which threaten the lives of millions of its people. The Congress reaffirms the commitment of the United States Government to continue its support, in concert with other nations and in cooperation with the affected nations in Africa, of the international relief, rehabilitation, and recovery program to assist these nations in dealing more effectively with drought and achieving self-sufficiency in agricultural production, eliminating forever the threat of famine.

"(b) The President is authorized to furnish assistance, on such terms and conditions as he may determine, for the long-term agricultural recovery and development of the Sub-Saharan Africa region, particularly for support of policy reform and agricultural support and research for small farmers. Assistance furnished under this section shall be in accordance with a long-term, multidonor development plan which calls for equitable burdensharing with other donors and shall be furnished, whenever appropriate, in cooperation with an international coordinating mechanism or international agency.

"(c)(1) There are authorized to be appropriated to the President up to $100,000,000 which sums shall be derived from any funds authorized by this Act, to carry out the purposes of this section.

"(2) Amounts appropriated under this section are authorized to remain available until expended.".

PRIVATE AND VOLUNTARY ORGANIZATIONS AND COOPERATIVES IN OVERSEAS DEVELOPMENT

SEC. 309. (a) Section 123(e) of the Foreign Assistance Act of 1961 (22 U.S.C. 2151u(e)) is amended—

(1) in the first sentence by inserting "on which it is determined" immediately after "prior to the date"; and

(2) in the third sentence by striking out "such date" wherever it occurs and inserting in lieu thereof "the date on which a decision is made to continue such support".

(b) Section 123 of the Foreign Assistance Act of 1961 (22 U.S.C. 2151u) is amended by amending subsection (f) to read as follows:

"(f) In addition to funds otherwise available for such purposes, not less than 15 percent of the aggregate amount appropriated for any fiscal year to carry out sections 103(a), 104(b), 104(c), 105, 106, 121, and 491 of this Act shall be made available for the activities of private and voluntary organizations. Funds made available under section 531 of this Act for the activities of private and voluntary organizations may be considered in determining compliance with the requirements of the previous sentence.".

PROMOTION OF DEMOCRATIC COOPERATIVES

SEC. 310. Section 123 of the Foreign Assistance Act of 1961 (22 U.S.C. 2151u), as amended by section 308, is further amended by adding at the end thereof the following new subsection:

"(h) The Congress recognizes that, in addition to their role in social and economic development, cooperatives provide an opportunity for people to participate directly in democratic decision-making. Therefore, assistance under this chapter may be provided to rural and urban cooperatives which offer large numbers of low and middle income people in developing countries an opportunity to participate directly in democratic decision-making. Such assistance shall be designed to encourage the adoption of self-help, private sector cooperative techniques and practices which have been successful in the United States.".

DEVELOPMENT AND ILLICIT NARCOTICS PRODUCTION

SEC. 311. Section 126(b) of the Foreign Assistance Act of 1961 (22 U.S.C. 2151x(b)) is amended—

(1) by inserting "and under chapter 4 of part II" immediately after "this chapter"; and

(2) by adding at the end thereof the following:

"The agency primarily responsible for administering this part may utilize resources for activities aimed at increasing awareness of the effects of production and trafficking illicit narcotics on source and transit countries.".

HOUSING GUARANTY PROGRAM

SEC. 312. (a) Section 222(a) of the Foreign Assistance Act of 1961 (22 U.S.C. 2182(a)) is amended—

(1) in the second sentence, by striking out "$1,958,000,000" and inserting in lieu thereof "$2,003,000,000"; and

(2) in the third sentence, by striking out "1986" and inserting in lieu thereof "1987".

(b) Section 223(j) of such Act (22 U.S.C. 2183(j)) is amended in the third sentence by striking out ", and the average face value of guaranties issued in any fiscal year shall not exceed $15,000,000".

TRADE CREDIT INSURANCE PROGRAM

SEC. 313. Section 224(e) of the Foreign Assistance Act of 1961 (22 U.S.C. 2184(e)) is amended by striking out "fiscal year 1985" and inserting in lieu thereof "fiscal years 1985 and 1986".

DISADVANTAGED CHILDREN IN ASIA

SEC. 314. Section 241(b) of the Foreign Assistance Act of 1961 (22 U.S.C. 2201(b)) is amended by striking out "$2,000,000" and inserting in lieu thereof "$3,000,000".

PROMOTION OF IMMUNIZATION AND ORAL REHYDRATION

SEC. 315. (a) Section 104(c) of the Foreign Assistance Act of 1961 (22 U.S.C. 2151b(c)) is amended—

(1) by inserting "(1)" before "In order"; and

(2) by adding at the end thereof the following new paragraph:

"(2) The Congress recognizes that the promotion of primary health care is a major objective of the foreign assistance program. The Congress further recognizes that simple, relatively low cost means already exist to reduce incidence of communicable diseases among children, mothers, and infants. The promotion of vaccines for immunization, and salts for oral rehydration, therefore, is an essential feature of the health assistance program. To this end, the Congress expects the agency primarily responsible for carrying out the provisions of this part to set as a goal the protection of not less than 80 per centum of all children, in those countries in which such agency has established development programs, from immunizable diseases by January 1, 1991.".

(b) Not later than twelve months after the date of enactment of this section, and at intervals of twelve months thereafter, the Administrator of the agency primarily responsible for carrying out part I of the Foreign Assistance Act of 1961 shall prepare and transmit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations a report describing the progress achieved during the preceding twelve months in carrying out section 104(c)(2) of such Act.

TITLE IV—CENTRAL AMERICA DEMOCRACY, PEACE, AND DEVELOPMENT INITIATIVE

SEC. 401. Part I of the Foreign Assistance Act of 1961 is amended by adding after chapter 5 the following new chapter:

CHAPTER 6—CENTRAL AMERICA DEMOCRACY, PEACE, AND DEVELOPMENT INITIATIVE

"SEC. 461. STATEMENT OF POLICY.—(a) The Congress finds that the building of democracy, the restoration of peace, the improvement of living conditions, and the application of equal justice under law in Central America are important to the interests of the United States and the community of American States. The Congress further finds that the interrelated issues of social and human progress, economic growth, political reform, and regional security must be effectively dealt with to assure a democratic and economically and politically secure Central America.

"(b)(1) The achievement of democracy, human rights, peace, and equitable economic growth depends primarily on the cooperation and the human and economic resources of the people and governments of Central America. The Congress recognizes that the United States can make a significant contribution to such peaceful and democratic development through a consistent and coherent policy which includes a long-term commitment of assistance. This policy should be designed to support actively—

"(A) democracy and political reform, including opening the political process to all members of society;

"(B) human rights, including free elections, freedom of the press, freedom of association, and the elimination of the violent abuse of human rights;

"(C) leadership development, including training and educational programs to improve public administration and the administration of justice;

"(D) land reform;

"(E) the establishment of the rule of law and an effective judicial system; and

"(F) the termination of extremist violence by both the left and the right as well as vigorous action to prosecute those guilty of crimes and the prosecution to the extent possible of past offenders.

"(2) The policy referred to in paragraph (1) should also promote equitable economic growth and development, including controlling the flight of capital and the effective use of foreign assistance and adherence to approved programs for economic stabilization and fiscal responsibility. Finally, this policy should foster dialog and negotiations to achieve peace based upon the objectives of democratization, reduction of armament, an end to subversion, and the withdrawal of foreign military forces and advisers; and to provide a security shield against violence and intimidation. It is the purpose of this chapter to establish the statutory framework and to authorize the appropriations and financing necessary to carry out the policy described in this section.

"(c) The Congress finds therefore that the people of the United States are willing to sustain and expand a program of economic and military assistance in Central America if the recipient countries can demonstrate progress toward and a commitment to these goals.

"SEC. 462. CONDITIONS ON FURNISHING ASSISTANCE.—(a) The President shall ensure that assistance authorized by this Act and the Arms Export Control Act to Central American countries is furnished in a manner which fosters demonstrated progress toward and commitment to the objectives set forth in section 461. Where necessary to achieve this purpose, the President shall impose conditions on the furnishing of such assistance. In carrying out this section, the President shall consult with the Congress in regard to progress toward the objectives set forth in section 461, and any conditions imposed on the furnishing of assistance in furtherance of those objectives.

"(b) The reporting requirements with respect to El Salvador contained in—

"(1) the last proviso of the paragraph under the heading 'MILITARY ASSISTANCE' contained in the joint resolution entitled "joint resolution making an urgent supplemental appropriation for the fiscal year ending September 30, 1984, for the Department of Agriculture", approved July 2, 1984 (Public Law 98-332); and

"(2) section 533 of the Foreign Assistance and Related Programs Appropriations Act, 1985, as enacted by the joint resolution entitled "Joint resolution making continuing appropriations for the fiscal year 1985, and for other purposes", approved October 12, 1984 (Public Law 98-473; 98 Stat. 1837),

shall not apply after the date of enactment of this section.

"SEC. 463. PEACE PROCESS IN CENTRAL AMERICA.—The Congress—

"(1) strongly supports the initiatives taken by the Contadora group and the resulting Document of Objectives which has been agreed to by Costa Rica, El Salvador, Guatemala, Honduras, and Nicaragua and which sets forth a framework for negotiating a peaceful settlement to the conflict and turmoil in the region; and

"(2) finds that the United States should provide such assistance and support as may be appropriate in helping to reach comprehensive and verifiable final agreements, based on the Document of Objectives, which will ensure peaceful and enduring solutions to the Central American conflicts.

"SEC. 464. ECONOMIC ASSISTANCE COORDINATION.—(A) The Congress finds that participation by Central American countries in an effective forum for dialog on, and the continuous review and advancement of, Central America's political, economic, and social development would foster cooperation between the United States and Central American countries.

"(b) It is the sense of the Congress that—

"(1) the President should enter into negotiations with the countries of Central America to establish a Central American Development Organization (hereafter in this section referred to as the 'Organization') to help provide a continuous and coherent approach to the development of the Central American region; and

"(2) the establishment of the Central American Development Organization should be based upon the following principles:

"(A) that participation in the Organization be open to the United States, other donors, and those Central American countries that commit themselves to, among other things, progress on human rights, building democracy, and encouraging equitable economic growth through policy reforms;

"(B) that the Organization be structured to include representatives from both the public and private sectors, including representatives from the labor, agriculture, and business communities;

"(C) that the Organization meet periodically to carry out the functions described in subparagraphs (D) and (E) of this paragraph and should be supported by a limited professional secretariat;

"(D) that the Organization make recommendations affecting Central American countries on such matters as—

"(i) political, economic, and social development objectives, including the strengthening of democratic pluralism and the safeguarding of human rights;

"(ii) mobilization of resources and external assistance needs; and

"(iii) reform of economic policies and structures;

"(E) that the Organization have the capacity for monitoring country performance on recommendations issued in accordance with subparagraph (D) of this paragraph and for evaluating progress toward meeting such country objectives;

"(F) that to the maximum extent practicable, the United States follow the recommendations of the Organization in disbursing bilateral economic assistance for any Central American country. No more than 75 per centum of such United States assistance in any fiscal year should be disbursed until the recommendations of the Organization for that fiscal year have been made final and communicated to the donor countries. The limitation on disbursements contained in the preceding sentence should apply only to recommendations made final and communicated to donor countries prior to the fourth quarter of such fiscal year. The United States representative to the Organization should urge other donor countries to similarly implement the recommendations of the Organization; and

"(G) that the administrator of the agency primarily responsible for administering part I of this Act, or his designee, represent the United States Government in the Organization and should carry out his functions in that capacity under the continuous supervision and general direction of the Secretary of State.

"(c) Subject to subsection (d)(2), the President is authorized to participate in the Organization.

"(d)(1) The administrator of the agency primarily responsible for administering part I of this Act, under the supervision and direction of the Secretary of State, shall prepare a detailed proposal to carry out this section and shall keep the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate fully and currently informed concerning the development of this proposal.

"(2) The President shall transmit to the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate a copy of the text of any agreement which he proposes to sign providing for the establishment of and United States participation in the Organization no less than sixty days prior to his signature. During that sixty-day period there shall be full and formal consultations with and review by those committees in accordance with procedures applicable to reprogramming notifications pursuant to section 634A of this Act.

"SEC. 465. AUTHORIZATIONS FOR FISCAL YEARS 1987 THROUGH 1989.—In addition to amounts otherwise available for such purposes, there are authorized to be appropriated to the President, for the purpose of furnishing nonmilitary assistance for Central American countries, $1,200,000,000 for each of the fiscal years 1987 through 1989, to remain available until expended. For the purpose of providing the assistance described in the preceding sentence, funds appropriated under this section are authorized to be transferred by the President for obligation in accordance with the authorities of part I of this Act (including chapter 4 of part II of such Act), the Peace Corps Act, the Migration and Refugee Assistance Act of 1962, the United States Information and Education Exchange Act of 1984, the Mutual Educational and Cultural Exchange Act of 1961, the National Endowment for Democracy Act, and the State Department Basic Authorities Act of 1956.

"SEC. 466. DEFINITIONS.—For the purposes of this chapter, the term 'Central American countries' shall be deemed to include Belize, Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, Panama, and regional programs which benefit such countries.".

ADMINISTRATION OF JUSTICE

SEC. 402. Chapter 4 of part II of the Foreign Assistance Act of 1961 (22 U.S.C. 2346 et seq.), as amended by section 201 of this Act, is further amended by adding at the end thereof the following new section:

"SEC. 535. ADMINISTRATION OF JUSTICE.—(a) The President may furnish assistance to countries and organizations, including national and regional institutions, in order to strengthen the administration of justice in Latin America and the Caribbean. Assistance under this section may include—

"(1) support for specialized professional training, scholarships, and exchanges for continuing legal education;

"(2) programs to enhance judicial, prosecutorial, investigative and enforcement capabilities, and to provide protection for participants in judicial cases;

"(3) strengthening professional organizations to promote services to members and

the role of the bar in judicial selection, enforcement of ethical standards, and legal reform;

"(4) increasing the availability of legal materials and publications;

"(5) seminars, conferences, training and educational programs to improve the administration of justice and to strengthen respect for the rule of law and human rights; and

"(6) revision and modernization of legal codes and procedures.

"(b) The assistance specified in this section may be provided notwithstanding section 660 of this Act. The President shall notify the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate not less than fifteen days in advance of obligating funds pursuant to this section for programs or activities under this section which would otherwise be subject to section 660 of this Act.".

LAND REFORM

SEC. 403. Section 620(g) of the Foreign Assistance Act of 1961 (22 U.S.C. 2370(g)) is amended by adding at the end thereof the following sentence: "The prohibition contained in this subsection shall not apply to monetary assistance made available for use by a government or political subdivision or agency of such government to compensate nationals of that country in accordance with a land reform program, if the President determines that monetary assistance for such land reform program will further the national interests of the United States.".

USE OF EMPLOYEE STOCK OWNERSHIP PLANS IN DEVELOPMENT EFFORTS

SEC. 404. (a) The Congress declares that—

(1) employee stock ownership plans in industrial, farming, banking, and other enterprises in Central America and the Caribbean can be an important component in achieving United States goals in Central America and the Caribbean; and

(2) employee stock ownership plans should be used as an instrument in financing growth and transfers of equity in the region, in reorganizing State-owned enterprises into viable employee-owned businesses, in expanding political and economic pluralism, and in strengthening democratic institutions in the region.

(b) The President is urged to develop a plan for the expanded use of employee stock ownership plans in development efforts of the United States in Central America and the Caribbean, with an emphasis on policy and infrastructural changes needed to encourage voluntary employee stock ownership initiatives by multinational corporations and other private sector enterprises which have investments, are considering making new investments, or are interested in management contracts and joint ventures in the region.

(c)(1) To assist in this effort, there is established a Presidential Task Force on Project Economic Justice (hereafter in this subsection referred to as the "Task Force"), which shall consist of individuals appointed by the President who are distinguished leaders of the private sector of the United States, including significant representation of union representatives of workers in successful companies with employee stock ownership and of nationally recognized experts in all phases of design, implementation, and operation of employee stock ownership plans. The President shall designate one of the members of the Task Force to serve as Chairman. The Chairman of the Task Force shall appoint a volunteer fundraising committee, and all the expenses of the Task Force shall be paid without the use of public funds.

(2) Not later than December 31, 1985, the Task Force shall prepare and transmit to the President and the Congress a report on the expanded use of employee stock ownership plans in the development efforts of the United States in Central America and the Caribbean, including specific recommendations on strategies for using employee stock ownership plans as a means of accelerating the rate of private sector capital formation in Central America and the Caribbean that is systematically likened to expanding ownership and profit-sharing opportunities for all employees.

PROHIBITIONS RELATING TO MILITARY OR PARAMILITARY OPERATIONS IN NICARAGUA

SEC. 405. Notwithstanding any other provision of law, no funds authorized to be appropriated or otherwise made available by this Act, by the Foreign Assistance Act of 1961, as amended, or by the Arms Export Control Act, as amended, shall be used to provide assistance of any kind, either directly or indirectly, to any person or group engaging in an insurgency or other act of rebellion against the government of Nicaragua. The United States shall make no agreement and shall enter into no understanding, either formal or informal, under which a recipient of United States economic or military assistance or a purchaser of United States military equipment shall provide assistance of any kind to persons to groups engaging in an insurgency or other act of rebellion against the government of Nicaragua.

TITLE V—OTHER ASSISTANCE PROGRAMS

AMERICAN SCHOOLS AND HOSPITALS ABROAD

SEC. 501. Section 214(c) of the Foreign Assistance Act of 1961 (22 U.S.C. 2174(c)) is amended to read as follows:

"(c) To carry out the purposes of this section, there are authorized to be appropriated to the President $30,000,000 for the fiscal year 1986 which are authorized to remain available until expended.".

INTERNATIONAL ORGANIZATIONS AND PROGRAMS

SEC. 502. (a) Section 302(a)(1) of the Foreign Assistance Act of 1961 (22 U.S.C. 2222(a)(1)) is amended to read as follows:

"(a)(1) There are authorized to be appropriated to the President for grants to carry out the purposes of this chapter, in addition to funds available under any other Acts for such purposes, $267,675,500 for the fiscal year 1986. Of the funds authorized to be appropriated under this paragraph for the fiscal year 1986—

"(A) $165,000,000 shall be available only for the United Nations Development Program;

"(B) $53,500,000 shall be available only for the United Nation's Children's Fund (UNICEF); and

"(C) $10,000,000 shall be available only for the United Nations Environment Program."

(b) Section 302 of such Act (22 U.S.C. 2222), as amended by subsection (a), is further amended by inserting after subsection (c) the following new subsection:

"(d) Notwithstanding any other provision of law, none of the funds authorized to be appropriated by this section shall be available for the United States proportionate share for any programs for the Palestine Liberation Organization, the Southwest Africa Peoples Organization, Libya, Iran, or Cuba.".

(c)(1) Notwithstanding section 614 of the Foreign Assistance Act of 1961 (22 U.S.C. 2364) or any other provision of law, of the funds appropriated to carry out chapter 3 of part I of the Foreign Assistance Act of 1961 (22 U.S.C. 2221 et seq.) for the fiscal year 1985, $10,000,000 shall be available only for the United Nations Environmental Program.

(2) The provisions of paragraph (1) shall take effect on the date of enactment of this Act.

NARCOTICS REPORTING REQUIREMENT

SEC. 503. Section 481(b) of the Foreign Assistance Act of 1961 (22 U.S.C. 2291(b)) is amended to read as follows:

"(b)(1) Not later than forty-five days after the end of each calendar quarter, the President shall transmit to the Speaker of the House of Representatives, and to the Committee on Foreign Relations of the Senate, a report on the programming and obligation, on a calendar basis, of funds under this chapter prior to the end of that quarter. The last such report for each fiscal year shall include the aggregate obligations and expenditures made, and the types and quantity of equipment provided, on a calendar quarter basis, prior to the end of that fiscal year—

"(A) to carry out the purposes of this chapter with respect to each country and each international organization receiving assistance under this chapter, including the cost of the United States personnel engaged in carrying out such purposes in each such country and with each such international organization;

"(B) to carry out each program conducted under this chapter in each country and by each international organization, including the cost of United States personnel engaged in carrying out each such program; and

"(C) for administrative support services within the United States to carry out the purposes of this chapter, including the cost of United States personnel engaged in carrying out such purposes in the United States.

"(2) Not later than August 1 of each year, the President shall transmit to the Speaker of the House of Representatives, and to the Committee on Foreign Relations of the Senate, a complete and detailed midyear report on the activities and operations carried out under this chapter prior to such date. Such midyear report shall include, but not be limited to, the status of each agreement concluded prior to such date with other countries to carry out the purposes of this chapter.".

INTERNATIONAL NARCOTICS CONTROL

SEC. 504. Section 482(a)(1) of the Foreign Assistance Act of 1961 (22 U.S.C. 2291a(a)(1)) is amended to read as follows:

"(a)(1) To carry out the purposes of section 481, there are authorized to be appropriated to the President $50,217,000 for the fiscal year 1986."

INTERNATIONAL DISASTER ASSISTANCE

SEC. 505. The first sentence of section 492(a) of the Foreign Assistance Act of 1961 (22 U.S.C. 2292a(a)) is amended to read as follows: "There are authorized to be appropriated to the President to carry out section 491, $25,000,000 for the fiscal year 1986.".

ANTI-TERRORISM ASSISTANCE PROGRAM

SEC. 506. (a) The first sentence of section 575 of the Foreign Assistance Act of 1961 (22 U.S.C. 2349aa-4) is amended to read as follows: "There are authorized to be appro-

priated to the President to carry out this chapter $5,000,000 for the fiscal year 1986.".

(b) Section 577 of such Act (22 U.S.C. 2349aa-6) is amended by striking out "1985" and inserting in lieu thereof "1987".

TRADE AND DEVELOPMENT PROGRAM

SEC. 507. The first sentence of section 661(b) of the Foreign Assistance Act of 1961 (22 U.S.C. 2421(b)) is amended to read as follows: "There are authorized to be appropriated to the President for purposes of this section, in addition to funds otherwise available for such purposes, $20,000,000 for the fiscal year 1986.".

OPERATING EXPENSES

SEC. 508. Section 667(a)(1) of the Foreign Assistance Act of 1961 (22 U.S.C. 2427(a)(1)) is amended to read as follows:

"(1) $387,000,000 for the fiscal year 1986 for necessary operating expenses of the agency primarily responsible for administering part I of this Act; and".

PARTICIPATION IN FOREIGN POLICE ARREST ACTION AND INTERROGATION

SEC. 509. Section 481(c)(1) of the Foreign Assistance Act of 1961 (22 U.S.C. (c)(1)) is amended to read as follows:

"(c) The head of any department or agency of the United States employing individuals who are authorized to engage or participate in any direct police arrest action in any foreign country with respect to narcotics control efforts, or any interrogation in connection with such efforts, shall prescribe regulations for the conduct of, and the procedures used by, such individuals.".

RESTRICTION ON ASSISTANCE TO PERU

SEC. 510. United States assistance, as defined by section 481(1)(4), may be provided to Peru for the fiscal year 1985 only if the President certifies to Congress that the Government of Peru has demonstrated substantive progress in developing a plan, in accordance with the Single Convention on Narcotic Drugs of 1961, that will establish its legal coca requirements, license the number of hectares necessary to produce the legal requirements, and eliminate illicit and unlicensed coca production.

TITLE VI—PEACE CORPS

AUTHORIZATION OF APPROPRIATIONS

SEC. 601. Section 3(b) of the Peace Corps Act (22 U.S.C. 1502(b)) is amended by amending the first sentence to read as follows: "There are authorized to be appropriated to carry out the purposes of this Act not to exceed $128,600,000 for the fiscal year 1986.".

PEACE CORPS NATIONAL ADVISORY COUNCIL

SEC. 602. (a) The Peace Corps Act (22 U.S.C. 2501 et seq.) is amended by inserting after section 11 the following new section:

"PEACE CORPS NATIONAL ADVISORY COUNCIL

"SEC. 12. (a) A Peace Corps National Advisory Council (hereinafter in this section referred to as the 'Council') shall be established in accordance with the provisions of this section.

"(b)(1) The Council shall advise and consult with the President and the Director of the Peace Corps with regard to policies and programs designed to further the purposes of this Act and shall periodically report to the Congress.

"(2) Members of the Council shall visit, examine, and inspect the Peace Corps' activities in the United States and in other countries in order to, among other things—

"(A) evaluate the accomplishments of the Peace Corps;

"(B) assess the potential capabilities and the future role of the Peace Corps; and

"(C) make recommendations to the President, the Director of the Peace Corps, and the Congress to guide the future direction of the Peace Corps and to help ensure that the purposes and programs of the Peace Corps are carried out in ways that are economical, efficient, responsive to changing needs in developing countries and to changing relationships among peoples, and in accordance with law.

"(3) The Council may provide for public participation in its activities.

"(c)(1) Persons appointed as members of the Council shall be broadly representative, including representation of educational institutions, private volunteer agencies, private industry, farm organizations, labor unions, different regions of the United States, different educational, economic, racial, and national backgrounds and age groupings, and both sexes.

"(2)(A) Subject to the succeeding sentence, fifteen members of the Council shall be appointed by the President by and with the advice and consent of the Senate. At least seven of such members shall be former Peace Corps volunteers, and no more than eight of such members shall be members of the same political party.

"(B) The first appointments of members of the Council under this paragraph shall be made not more than sixty days after the date of the enactment of this section and, solely for purposes of determining the expiration of their terms, shall be deemed to take effect on the sixtieth day after such enactment date.

"(C) No member appointed under this paragraph shall be an officer or employee of the United States Government.

"(D) Of the members initially appointed under this paragraph, eight shall be appointed to one-year terms and seven to two-year terms. Thereafter, all appointed members shall be appointed to two-year terms.

"(E) A member of the Council appointed to fill a vacancy occurring before the expiration of the term for which the member's predecessor was appointed shall be appointed only for the remainder of that term.

"(F) No member of the Council may serve for more than two consecutive two-year terms.

"(G) Members of the Council shall serve at the pleasure of the President.

"(H) An appointed member of the Council may be removed by a vote of nine members for malfeasance in office, for persistent neglect of or inability to discharge duties, or for offenses involving moral turpitude, and for no other cause.

"(I) Any vacancy in the office of an appointed member of the Council shall be filled by the President within thirty days after such vacancy occurs.

"(3) The Secretary of State shall be a voting member, ex officio, of the Council. The Secretary may designate any officer in the Department of State compensated at level II or III of the Executive Schedule under section 5313 or 5314 of title 5, United States Code, to act for the Secretary under this section.

"(4) The Director and Deputy Director of the Peace Corps shall be non-voting members, ex officio, of the Council.

"(d)(1) Except as provided in paragraph (2), a member of the Council who is not an officer or employee of the United States Government shall be (A) paid compensation out of funds made available for the purposes of this Act at the daily equivalent of the highest rate payable under section 5332 of title 5, United States Code, for each day (including traveltime) during which the member is engaged in the actual performance of duties as a Council member, and (B) while away from his or her home or regular place of business on necessary travel, as determined by the Director of the Peace Corps, for actual performance of such duties, paid per diem, travel, and transportation expenses in the same manner as provided for under subchapter I of chapter 57 of title 5, United States Code.

"(2) A member of the Council may not be paid compensation under paragraph (1)(A) for more than twenty days in any calendar year.

"(e) A majority of the voting members of the Council shall constitute a quorum for the purposes of transacting any business.

"(f) A member of the Council shall disclose to the Council the existence of any direct or indirect financial interest of that member in any particular matter before the Council and shall not vote or otherwise participate as a Council member with respect to that particular matter.

"(g) At its first meeting and at its first regular meeting in each calendar year thereafter, the Council shall elect a Chair and Vice Chair from among its appointed members who are citizens of the United States. The Chair and Vice Chair shall not both be members of the same political party.

"(h)(1) The Council shall hold a regular meeting during each calendar quarter and shall meet at the call of the President, the Director of the Peace Corps, the Council's Chair, or one-fourth of its members.

"(2) The Council shall prescribe such bylaws and regulations as it considers necessary to carry out its functions. Such bylaws and regulations shall include procedures for fixing the time and place of meetings, giving or waiving of notice of meetings, and keeping of minutes of meetings.

"(i) Not later than January 1, 1988, and not later than January 1 of each second year thereafter, the Council shall submit to the President and the Director of the Peace Corps a report of its views on the programs and activities of the Peace Corps. Each report shall contain a summary of the advice and recommendations provided by the Council to the President and the Director during the period covered by the report and such recommendations (including recommendations for administrative or legislative action) as the Council considers appropriate to make to the Congress. Within 90 days after receiving each such report, the President shall submit to the Congress a copy of the report, together with any comments concerning the report that the President or the Director considers appropriate.

"(j) The Director of the Peace Corps shall make available to the Council such personnel, administrative support services, and technical assistance as are necessary to carry out effectively its functions.".

(b) Sixty days after the date of the enactment of this Act, any advisory body carrying out functions similar to those assigned to the Peace Corps National Advisory Council provided for by subsection (a) shall cease to operate and shall become defunct.

"NONPARTISAN APPOINTMENTS

SEC. 603. The Peace Corps Act is amended—

(1) by redesignating sections 25, 26, and 27 as sections 26, 27, and 28, respectively; and

(2) by inserting after section 24 the following new section:

NONPARTISAN APPOINTMENTS

"SEC. 25. In carrying out this Act, there shall be no political test or political qualification used in (1) selecting any person for enrollment as a volunteer or for appointment to a position at, or for assignment to (or for employment for assignment to), a duty station located abroad, or (2) promoting or taking any other action with respect to any volunteer or any person assigned to such a station."; and

(3) in subsection (a) of section 5, by amending the final sentence to read as follows: "In carrying out this subsection, there shall be no discrimination against any person on account of race, sex, creed, or color."

TITLE VII—AFRICAN DEVELOPMENT FOUNDATION

AUTHORIZATION OF APPROPRIATIONS

SEC. 701. Section 510 of the African Development Foundation Act (22 U.S.C. 290h-8) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 510. There are authorized to be apropriated to the President to carry out this title, in addition to funds otherwise available for such purpose, $1,000,000 for the fiscal year 1986. Amounts appropriated under this section are authorized to remain available until expended.".

EXTENSION OF AUTHORITIES

SEC. 702. Section 511 of the African Development Foundation Act (22 U.S.C. 290h-9) is amended by striking out "September 30, 1985" and inserting in lieu thereof "September 30, 1990".

TITLE VIII—INTER-AMERICAN FOUNDATION

AUTHORIZATION OF APPROPRIATIONS

SEC. 801. Section 401(s)(2) of the Foreign Assistance Act of 1969 (22 U.S.C. 290f(s)) is amended by striking out "$16,000,000 for the fiscal year 1984 and $16,000,000 for the fiscal year 1985" and inserting in lieu thereof "$11,969,000 for the fiscal year 1986".

TITLE IX—GENERAL PROVISIONS

PROCUREMENT OF CONSTRUCTION AND ENGINEERING SERVICES

SEC. 901. Section 604(g) of the Foreign Assistance Act of 1961 (22 U.S.C. 2354(g)) is amended by inserting immediately before the period at the end thereof "and which are not receiving any direct assistance under chapter 1 of part I or chapter 4 of part II of this Act".

COMPLETION OF PLANS AND COST ESTIMATES

SEC. 902. (a) Section 611(a) of the Foreign Assistance Act of 1961 (22 U.S.C. 2361(a)) is amended—

(1) by striking out "$100,000" and inserting in lieu thereof "$500,000"; and

(2) by striking out "section 1311 of the Supplemental Appropriation Act, 1955 as amended (31 U.S.C. 200)" and inserting in lieu thereof "section 1501 of title 31, United States Code".

(b) Section 611(b) of such Act (22 U.S.C. 2361(b)) is amended by striking out "the procedures set forth in the Principles and Standards for Planning Water and Related Land Resources, dated October 25, 1973, with respect to such computations" and inserting in lieu thereof "the principles, standards, and procedures established pursuant to the Water Resources Planning Act (42 U.S.C. 1962 et seq.) or Acts amendatory or supplementary thereto".

PROHIBITIONS AGAINST ASSISTANCE

SEC. 903. Section 620(f) of the Foreign Assistance Act of 1961 (22 U.S.C. 2370(f)) is amended—

(1) by inserting "(1)" immediately after "(f)";

(2) by redesignating clauses (1), (2), and (3) as clauses (A), (B), and (C), respectively; and

(3) by adding at the end thereof the following new paragraph:

"(2) Notwithstanding the provisions of paragraph (1) of this subsection, the President may remove a country, for such period as the President determines, from the application of this subsection, and other provisions which reference this subsection, if the President determines and reports to the Congress that such action is important to the national interest of the United States.".

NUCLEAR NON-PROLIFERATION CONDITIONS ON ASSISTANCE FOR PAKISTAN

SEC. 904. Section 620E of the Foreign Assistance Act of 1961 (22 U.S.C. 2375) is amended by adding at the end thereof the following new subsection:

"(e) No assistance shall be furnished to Pakistan and no military equipment or technology shall be sold or transferred to Pakistan pursuant to the authorities contained in this Act or any other Act unless the President shall have certified in writing to the chairman of the Committee on Foreign Relations of the Senate and the Speaker of the House of Representatives, during the fiscal year in which assistance is to be furnished or military equipment or technology is to be sold or transferred, that Pakistan does not possess a nuclear explosive device and that the proposed United States assistance program will reduce significantly the risk that Pakistan will possess a nuclear explosive device.".

STREAMLINING OF REPROGRAMMING REQUIREMENTS

SEC. 905. (a) Section 634A of the Foreign Assistance Act of 1961 (22 U.S.C. 2394-1) is amended—

(1) by inserting "(a)" immediately before "None";

(2) by inserting "or the Arms Export Control Act" after "disaster relief and rehabilitation)" and after "this Act" the second place it appears;

(3) by inserting before the period at the end of the first sentence a comma and the following: "except that such notification shall not be required for funds appropriated to carry out the purposes of chapter 1 of part I if the obligations for an activity, program, or project would be in excess of the amount justified for such activity, program, or project for a fiscal year by not more than 10 per centum"; and

(4) by adding at the end thereof the following new subsection:

"(b) The notification requirement of this section does not apply to the reprogramming of less than $25,000 for use under chapter 8 of part I or for use under chapter 5 of part II, for a country for which a program under that chapter for that fiscal year was justified to the Congress.".

(b) Section 653 of the Foreign Assistance Act of 1961 (22 U.S.C. 2413) is amended—

(1) by inserting in subsection (a) "or the Arms Export Control Act" immediately after "section 451 or 6370";

(2) by striking out subsection (b); and

(3) by redesignating subsection (c) as subsection (b).

(c) Section 36(a) of the Arms Export Control Act (22 U.S.C. 2776(a)) is amended—

(1) in paragraph (5) by striking out "cash sales expected to be made under sections 21 and 22, credits to be extended under section 23, and guaranty agreements to be made under section 24" and inserting in lieu thereof "sales expected to be made under sections 21 and 22"; and

(2) in paragraph (6) by striking out "cash sales expected to be made and credits expected to be extended" and inserting in lieu thereof "sales expected to be made".

TRAINING ASSISTANCE

SEC. 906. Section 638 of the Foreign Assistance Act of 1961 (22 U.S.C. 2398) is amended—

(1) by inserting "(a)" before "No"; and

(2) by adding at the end thereof the following:

"(b) No provision of this Act or any other provision of law shall be construed to prohibit assistance for any training activity which is funded under this Act for Brazil or Argentina as long as such country continues to have a democratically elected government and which is consistent with sections 116, 502B, and 660 of this Act.".

SUSPENSION OF ASSISTANCE TO COUNTRIES VIOLATING UNITED STATES EXPORT LAWS IN ORDER TO MANUFACTURE A NUCLEAR EXPLOSIVE DEVICE

SEC. 907. (a) Subsection (a)(1) of section 670 of the Foreign Assistance Act of 1961 (22 U.S.C. 2429a(a)(1)) is amended—

(1) by inserting "(A)" after "country which";

(2) by inserting immediately before the period at the end thereof ", or (B) is a non-nuclear-weapon state which, on or after the date of enactment of the International Security and Development Cooperation Act of 1985, exports illegally (or attempts to export illegally) from the United States any material, equipment, or technology which would contribute significantly to the ability of such country to manufacture a nuclear explosive device, if the President determines that the material, equipment, or technology was to be used by such country in the manufacture of a nuclear explosive device"; and

(3) by adding at the end thereof the following: "For purposes of clause (B), an export (or attempted export) by a person who is an agent of, or is otherwise acting on behalf of or in the interests of, a country shall be considered to be an export (or attempted export) by that country.".

(b) Such section 670 (22 U.S.C. 2429a) is amended—

(1) in the section caption, by inserting ", ILLEGAL EXPORTS FOR NUCLEAR EXPLOSIVE DEVICES," after "TRANSFERS,";

(2) by redesignating paragraph (5) of subsection (b) as subsection (c); and

(3) by striking out in subsection (c), as redesignated by paragraph (2), "As used in this subsection" and inserting in lieu thereof "For purposes of this section".

ILLEGAL EMIGRATION FROM HAITI

SEC. 908. Notwithstanding the limitations of section 660 of the Foreign Assistance Act of 1961 (22 U.S.C. 2420), funds made available under such Act may be used for programs with Haiti, which shall be consistent with prevailing United States refugee policies, to assist in halting significant illegal emigration from Haiti to the United States.

PARTICIPANT TRAINEE GRANTS

SEC. 909. Section 1441(c) of the Internal Revenue Code of 1954 (26 U.S.C. 1441(c)(6)) is amended by amending paragraph (6) to read as follows:

"(6) SCHOLARSHIPS, PER DIEM, ETC, OF CERTAIN ALIENS.—No education or withholding under subsection (a) shall be required in the case of amounts of scholarships or fellowship grants, or per diem for subsistence paid by the United States Government (directly or by contract) to any nonresident alien individual who is engaged in any program of training in the United States under the Foreign Assistance Act of 1961.".

ASSISTANCE FOR AFGHANISTAN

SEC. 910. (a) Of the funds authorized to be appropriated to carry out the provisions of chapter 4 of part II (relating to the economic support fund) of the Foreign Assistance Act of 1961, not less than $15,000,000 in each fiscal year shall be available only to the President for the provision of food, medicine, or other humanitarian assistance to the Afghan people, notwithstanding any other provision of law.

(b) This section shall take effect on the date of enactment of this Act.

REPEAL OF PROVISIONS; TECHNICAL AMENDMENTS

SEC. 911. (a)(1) The Foreign Assistance Act of 1961 is amended—

(A) in section 106(b)(1), by striking out "(A)" and by striking out subparagraph (B);

(B) in section 110, by striking out "(a)" and by striking out subsection (b); and

(C) in section 306, by striking out "(a)" and by striking out subsection (b).

(2) Chapter 10 of part I of such Act (22 U.S.C. 2293 et seq.) is repealed.

(b) Section 636(a)(14) of the Foreign Assistance Act of 1961 (22 U.S.C. 2396(a)(14)) is amended by striking out "the Foreign Service Act of 1946, as amended (22 U.S.C. 801 et seq.)" and inserting in lieu thereof" the Foreign Service Act of 1980 (22 U.S.C. 3901 et seq.)".

(c) Section 47(6) of the Arms Export Control Act (22 U.S.C. 2794(6)) is amended by striking out "combat" and inserting in lieu thereof "military".

CODIFICATION OF POLICY PROHIBITING NEGOTIATIONS WITH THE PALESTINE LIBERATION ORGANIZATION

SEC. 912. (a) The Congress finds that the United States in 1975 declared in a memorandum of agreement with Israel, and has reaffirmed since, that "The United States will continue to adhere to its present policy with respect to the Palestine Liberation Organization, whereby it will not recognize or negotiate with the Palestine Liberation Organization so long as the Palestine Liberation Organization does not recognize Israel's right to exist and does not accept Security Council Resolutions 242 and 338.".

(b) The United States hereby reaffirms that policy. In accordance with that policy, no officer or employes of the United States Government and no agent or other individual acting on behalf of the United States Government shall negotiate with the Palestine Liberation Organization, except in emergency or humanitarian situations, unless and until the Palestine Liberation Organization recognizes Israel's right to exist, accepts Security Council Resolutions 242 and 338, and renounces the use of terrorism.

LONG-TERM AGRICULTURAL COMMODITY AGREEMENTS WITH FOOD DEFICIT COUNTRIES

SEC. 913. As part of the United States foreign assistance program, the President should explore the possibility of concluding long-term agricultural commodity agreements to help stabilize and increase the flow of concessional and commercial food stuffs with food deficit countries. The President shall prepare and transmit to the Congress a report on his efforts to achieve such long-term agreements by June 1, 1986.

PROHIBITION ON CERTAIN ASSISTANCE TO THE KHMER ROUGE IN KAMPUCHEA

SEC. 914. (a) Notwithstanding any other provision of law, none of the funds authorized to be appropriated by this Act or any other Act may be obligated or expended for the purpose or with the effect of promoting, sustaining, or augmenting, directly or indirectly, the capacity of the Khmer Rouge or any of its members to conduct military or paramilitary operations in Kampuchea or elsewhere in Indochina.

(b) All funds appropriated before the date of enactment of this section which were obligated but not expended for activities having the purpose or effect described in subsection (a) shall be deobligated and shall be deposited in the Treasury of the United States as miscellaneous receipts.

(c) This section shall not be construed as limiting the provision of food, medicine, or other humanitarian assistance to the Kampuchean people.

NEW BUILDING IN GENEVA FOR THE USE OF THE UNITED STATES ARMS CONTROL NEGOTIATING TEAMS

SEC. 915. Since the United States is party to vital talks on arms control in Geneva, Switzerland;

Since these talks include negotiations on strategic nuclear weapons, intermediate range nuclear weapons, space and defense systems, a bilateral United States-Soviet forum, called the Standing Consultative Commission, and a multilateral forum, called the Conference on Disarmament;

Since the United States delegations to these talks occupy buildings and spaces insufficiently secure, modernized or large enough to permit those delegations to conduct their work efficiently;

Since the United States delegations to the strategic, intermediate and space and defense talks in particular occupy space in the Botanic Building that is also occupied by offices of numerous other, non-United States organizations, and shares common walls and parking facilities with these delegations;

Since arms control negotiations require sophisticated security facilities, telecommunications equipment, simultaneous translation capabilities and other specialized services;

Since the Soviet Union, for its part, has made available for its negotiating team a modern, secure, well-equipped building dedicated for the use of its arms control negotiating teams: Now, therefore it is the sense of the Senate that—

(a) In order to facilitate the effective work of the United States arms control negotiating teams, and to provide for them a dedicated structure capable of supporting their vital tasks on a permanent basis, it is the sense of the Senate that the Secretary of State should submit to the Congress a report on the feasibility, cost, location, and requirements of a structure to house the United States arms control negotiating teams in Geneva.

(b) It is further the sense of the Senate that this report should be submitted as soon as possible.

(c) It is further the sense of the Senate that, this matter be included in the consideration of the 1985 supplemental appropriation process.

PURCHASE OF AMERICAN WHEAT BY THE GOVERNMENT OF THE PHILIPPINES

SEC. 916. Since the Government of the Philippines has purchased American wheat for a number of years; and

Since the Government of the Philippines has purchased wheat from no other country for at least seven years; and

Since the Government of the Philippines has agreed to the State Department's suggestion to both mill the wheat and distribute the flour under private enterprise; and

Since the Government of the Philippines has stated that they cannot acquiesce to the suggestion of the State Department that the Government of the Philippines not act as the purchasing entity of American wheat; and

Since most if not all American wheat sales are to government entities of the country purchasing the wheat: therefore

It is the sense of the Senate that the State Department should not prevent United States wheat sales to the Government of the Philippines

DEMOCRACY IN THE PHILIPPINES

SEC. 917. (a) It is the sense of the Senate that Congress should encourage the revitalization of democracy in the Philippines. To that end, the Congress affirms its intention to grant future aid to the Philippines according to the determination of the Congress that United States security interests are enhanced and sufficient progress is made by the Government of the Philippines in—

(1) guaranteeing free, fair and honest elections in 1986 and 1987, or sooner should any such elections occur;

(2) ensuring the full, fair and open prosecution of the murder of Benigno Aquino, including those involved in the coverup;

(3) ensuring freedom of speech and freedom of the press, and unrestricted access to the media on the part of all candidates for public office in the municipal elections of 1986 and the Presidential election of 1987;

(4) establishing the writ of habeas corpus and the termination of the Presidential Detention Action and all other forms of detention without charge or trial;

(5) releasing all individuals detained or imprisoned for peaceful political activities; and

(6) making substantial progress in terminating extrajudicial killings by the Philippine military and security forces and the prosecution of those responsible for such killings in the past.

It is further the Sense of the Senate that Congress finds and declares that the primary purpose of United States assistance to the Philippines should be to maintain and foster friendly relations between the people of the Philippines and the people of the United States, and to encourage the restoration of internal security—both of which goals can be best served by the achievement of an open and stable democracy.

USE OF PRIVATE AND VOLUNTARY ORGANIZATIONS, COOPERATIVES, AND THE PRIVATE SECTOR

SEC. 918. (a) The Administrator of the Agency for International Development is directed to undertake a comprehensive study of additional ways to provide development assistance through non-governmental organizations (including United States and indigenous private and voluntary organizations, cooperatives, and other private entities). Such study shall include—

(1) an analysis of the percentage of development assistance allocated to governmental and nongovernmental programs;

(2) an analysis of structural impediments, within both the United States and foreign governments, to additional use of nongovernmental programs; and

(3) an analysis of the comparative economic benefits of governmental and nongovernmental programs.

(b) The Administrator is directed to conduct the study using available funds and to prepare a final report to the Congress no later than September 30, 1986.

RESTRICTIONS ON ASSISTANCE FOR BOLIVIA

SEC. 919. (a) The Congress finds that—

(1) cocaine has had a severe negative impact on productivity, public health, education, and the quality of life in the United States and on the national security of the United States;

(2) Bolivia is the source of more than 50 per centum of the world's cocaine, and Bolivian production of cocaine continues to rise;

(3) 50 per centum of the population of Bolivia is under 19 years of age, and cocaine production has had a severe, negative impact on the youth of Bolivia;

(4) the production of, and trafficking in, cocaine by Bolivia has contributed significantly to Bolivia's 1,000 per centum rate of inflation;

(5) the failure of the Government of Bolivia to take steps to curb the production of coca in Bolivia during 1984 was cited in the report of the Department of State entitled "International Narcotics Control Strategy Report" as a major disappointment in its review of drug producing countries; and

(6) Bolivia received more than $37,000,000 in United States assistance during the fiscal year 1984 and during such fiscal year did not eradicate a single coca bush.

(b)(1) beginning with the fiscal year 1986 and for each fiscal year thereafter, no United States assistance may be provided Bolivia unless the President certifies to the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate that the amount of coca that was produced in Bolivia during the preceding fiscal year is at least 10 per centum less than the amount produced in Bolivia during the fiscal year which preceded such preceding fiscal year.

(2) Whenever the President certifies under paragraph (1) that the amount of coca that is produced in Bolivia is reduced by more than 10 per centum from one fiscal year to the next, the amount of any such additional reduction shall be carried over and counted as if it had occurred in the fiscal year following the year in which it actually occurred.

(3) The Secretary of the Treasury shall instruct each United States Executive Director of the International Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation, and the Inter-American Development Bank to oppose actively the extension of any loan or the furnishing of any financial assistance or technical assistance during the fiscal year 1986 or any fiscal year thereafter by the respective international financial institution to Bolivia, unless the President certifies under paragraph (1) that the amount of coca that was produced in Bolivia during the preceding fiscal year is at least 10 percent less than the amount produced in Bolivia during the fiscal year which preceded such fiscal year.

(4) In carrying out this section, coca produced solely for pharmaceutical purposes shall not be counted in determining amounts of production.

(5) As used in this section—

(A) the term "coca" means hydrochloride; and

(a) the term "United States assistance" includes any assistance of any kind (other than assistance involving only the provision of food or medicine) which is provided by grant, sale, loan, lease, credit, guaranty, or insurance, or by any other means, by any agency or instrumentality of the United States Government to or for the benefit of any foreign country, including—

(1) assistance under the Foreign Assistance Act of 1961 (including programs under title IV of chapter 2 of part I, relating to the Overseas Private Investment Corporation, but excluding programs under chapter 8 of part I, relating to international narcotic control assistance);

(ii) sales, credits, and guaranties under the Arms Export Control Act;

(iii) sales under title I (including title III) of the Agricultural Trade Development and Assistance Act of 1954 and donations under title II of such Act of nonfood commodities;

(iv) financing programs of the Commodity Credit Corporation for export sales of nonfood commodities;

(v) financing under the Export-Import Bank Act of 1945;

(vi) assistance under the Migration and Refugee Assistance Act of 1962:

(vii) programs under the Peace Corps Act;

(viii) assistance under the Inter-American Foundation Act;

(ix) assistance under the African Development Foundation Act;

(x) financial assistance for foreign persons or groups under the Mutual Educational and Cultural Exchange Act of 1961; and

(xi) assistance of any kind under any other Act.

CONDITIONS ON ESF ASSISTANCE TO JAMAICA

SEC. 920. Of the funds allocated for Jamaica for fiscal year 1987 under chapter 4 of part II of the Foreign Assistance Act of 1961, $5,000,000 shall be withheld from obligation until the President certifies to the Congress that the Government of Jamaica has prepared, presented, and committed itself to a comprehensive plan or strategy for the control and reduction of illicit cultivation, production, processing, transportation, and distribution of marijuana within a specifically stated period of time.

POLICY REGARDING FOREIGN EXCHANGE INTERVENTION

SEC. 921. (a) The Congress finds and declares that—

(1) the trade deficit looms larger than any other threat to the ability of the United States to generate jobs and create economic well-being;

(2) the trade deficit continues to deteriorate even from the 1984 level of $123,000,000,000;

(3) the trade deficit will continue to deteriorate until the value of the dollar declines on foreign exchange markets;

(4) the dollar's rise may slow down but is unlikely to fall sufficiently as a result of Congress' contemplated budget deficit reduction measures;

(5) the dollar would probably fall under a number of tax reform proposals but industries losing market share due to the exchange rate may not be able to wait for a complete tax package;

(6) the only remaining timely option for lowering the dollar is intervention in foreign exchange markets by the Treasury or the Federal Reserve;

(7) any such intervention must be strong enough to achieve the Congress' intent of lowering the dollar's value but sufficiently moderate to prevent a sudden drop in its value;

(8) any such intervention in order to assure a gradual decline and protect against too large a drop in the value of the dollar, will require coordinated action by the central banks of Europe and Japan as well as the United States; and

(9) such coordination is especially important to strengthen economic and political ties with the allies of the United States and to promote consistent macroeconomic policies to the mutual benefit of all.

(b) Therefore, it is the sense of the Congress that—

(1) the Secretary of the Treasury and the Chairman of the Federal Reserve Board, in concert with our allies and coordinated with the central banks of the Group of Five or other major central banks, should take steps as are necessary to lower gradually the value of the dollar;

(2) such steps should not exclude intervention in the foreign exchange markets;

(3) the Secretary of the Treasury and the Chairman of the Federal Reserve Board should work to ensure that the domestic macroeconomic policies of the United States and its allies are forged to reinforce rather than oppose one another.

INTERNATIONAL NARCOTICS CONTROL COMMISSION

SEC. 922. (a) There is established the International Narcotics Control Commission (hereafter in this section referred to as the "Commission").

(b) The Commission is authorized and directed—

(1) to monitor and promote international compliance with narcotics control treaties, including eradication, money laundering, and narco-terrorism; and

(2) to monitor and encourage United States Government and private programs seeking to expand international cooperation against drug abuse and narcotics trafficking.

(c)(1) The Commission shall be composed of twenty-three members as follows:

(A) Seven Members of the House of Representatives appointed by the Speaker of the House of Representatives. Four members shall be selected from the majority party and three shall be selected, after consultation with the minority leader of the House, from the minority party.

(B) Seven Members of the Senate appointed by the President of the Senate. Four members shall be selected from the majority party of the Senate, after consultation with the majority leader, and three shall be selected, after consultation with the minority leader of the Senate, from the minority party.

(C) One member of the Department of State appointed by the President.

(D) One member of the Department of Justice appointed by the President.

(E) One member of the Department of the Treasury appointed by the President.

(F) Five members of the public to be appointed by the President after consultation with the members of the appropriate congressional committees.

(2) There shall be a Chairman and a Cochairman of the Commission.

(3) On the date of enactment of this section and at the beginning of each odd-numbered Congress, the President of the Senate,

on the recommendation of the majority leader, shall designate one of the Senate Members as Chairman of the Commission. At the beginning of each even-numbered Congress, the Speaker of the House of Representatives shall designate one of the House Members as Chairman of the Commission.

(4) At the beginning of each odd-numbered Congress, the Speaker of the House of Representatives shall designate one of the House Members as Cochairman of the Commission. At the beginning of each even-numbered Congress, the President of the Senate, on the recommendation of the majority leader, shall designate one of the Senate Members as Cochairman of the Commission.

(d) In carrying out this section, the Commission may require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memorandums, papers, and documents as it deems necessary. Subpenas may be issued over the signature of the Chairman of the Commission or any member designated by him, and may be served by any person designated by the Chairman or such member. The Chairman of the Commission, or any member designated by him, may administer oaths to any witness.

(e) In order to assist the Commission in carrying out its duties, the President shall submit to the Commission a semiannual report regarding the status of compliance with narcotics control treaties, the first one to be submitted six months after the date of enactment of this section.

(f) The Commission is authorized and directed to report to the House of Representatives and the Senate with respect to the matters covered by this section on a periodic basis and to provide information to Members of the House of Representatives and the Senate as requested. For each fiscal year for which an appropriation is made the Commission shall submit to the Congress a report on its expenditures under such appropriation.

(g)(1) There are authorized to be appropriated to the Commission for each fiscal year and to remain available until expended $550,000 to assist in meeting the expenses of the Commission for the purpose of carrying out the provisions of this section, such appropriation to be disbursed on a voucher to be approved by the Chairman of the Commission.

(2) For purposes of section 502(b) of the Mutual Security Act of 1954, the Commission shall be deemed to be a standing committee of the Congress and shall be entitled to the use of funds in accordance with such sections.

(3) Not to exceed $6,000 of the funds appropriated to the Commission for each fiscal year may be used for official reception and representational expenses.

(h) The Commission may appoint and fix the pay of such staff personnel as it deems desirable, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates.

SUPPORT FOR EL SALVADOR

SEC. 923. The Senate finds that:

A free and democratic El Salvador is in the security interest of the United States; and

Jose Napoleon Duarte was elected President of El Salvador last year in the most democratic election held in El Salvador in many years; and

Political violence in El Salvador has declined dramatically under President Duarte's leadership; and

President Duarte's policies of respect for human rights, political pluralism, dialogue and reconciliation with the Salvadoran guerrilla forces, legal and social reform, and effective defense against the violent overthrow of the Salvadoran government are deserving of praise from all who believe in a democratic form of government; and

The March 31 legislative and municipal elections were successfully carried out, with 64 per centum of the electorate defying guerrilla attacks to vote; and

The victory of President Duarte's Christian Democratic Party reaffirms the support for these policies by his fellow citizens, the essential test of any government or movement; and

In spite of the state of seige technically in effect due to the insurgent threat, observance of free speech, free press, and free assembly are widely enjoyed in El Salvador and permit public airing of opposing political views; and

President Duarte is firmly committed to judicial reform and prosecution of cases involving "death squads";

His leadership and popular support has notably weakened the popular support given the guerrillas, as evidenced by the high levels of voter participation in the free elections held in El Salvador since 1982, the reduction in territory in which the guerrillas can freely operate, their inability to mount frontal military attacks, and their resort to economic sabotage, ambushes, political assassination, and urban terrorism with blatant disregard for basic human rights; and

He has succeeded in reversing the decline in his country's economy which, though still weak, has better prospects than in recent years;

Based upon the above findings, it is the sense of the Senate that:

President Duarte is to be congratulated for his outstanding leadership under difficult circumstances and for his efforts to foster democratic government and institutions in his country, and he is encouraged to continue his efforts to promote political pluralism, democratic institutions, and respect for human rights in his country; and

The armed services of El Salvador are to be congratulated for their improved performance and professionalism in defending Salvadoran citizens and their democratically elected government from attack by armed insurgents, and especially for their role in helping to protect and uphold the electoral process; and

The Senate reaffirms the importance of continued support for democratic principles and institutions and respect for human rights by the various sectors of Salvadoran society, which is a major factor in United States support for El Salvador.

FUNDS TO NONCOMMUNIST RESISTANCE FORCES IN CAMBODIA

SEC. 924. Of the funds authorized to be appropriated in this Act to carry out chapter 2 or chapter 4 of part II of the Foreign Assistance Act of 1961, up to $5,000,000 for Fiscal Year 1986 may be made available to noncommunist resistance forces in Cambodia, provided that the Secretary of State finds that the Association of Southeast Asian Nations has acknowledged that material assistance to the noncommunist resistance is also being supplied by members of that Association.

TRADE PROHIBITION WITH LIBYA AND COUNTRIES ENGAGED IN TERRORISM

SEC. 925. (a) Notwithstanding any other provision of law, the President may prohibit any article grown, produced, extracted, or manufactured in Libya or in any other country determined by joint resolution of Congress to be engaged in terrorism, from being imported into the United States.

(b) Notwithstanding any other provision of law, the President may prohibit any goods or technology, including technical data or other information, subject to the jurisdiction of the United States or exported by any person subject to the jurisdiction of the United States, from being exported to Libya, or to any other country determined by a joint resolution of Congress to be engaged in terrorism.

(c) For purposes of this section, the term "United States" includes territories and possessions of the United States.

(d) In exercising the authorities granted by this section, the President shall adhere to the consultation and reporting requirements contained in section 204 of the International Emergency Economic Powers Act (50 U.S.C. 1703).

POLICY TOWARD SOUTH AFRICAN "HOMELANDS"

SEC. 926. (a) The Congress finds that—

(1) the sanctity of the family, individual liberty, maximum freedom of choice, ownership of private property, and equal treatment of all citizens, regardless of race, are principles which are fully supported by the American people;

(2) the forced relocation of blacks by the Government of the Republic of South Africa to be designated "homelands" divides families, as families are required to remain in the "homelands" while fathers seek work in the so-called "white areas";

(3) the forced removal of persons living in so-called "black spots" in "white" rural areas in South Africa denies them the fundamental right to live and to farm on land they have legally occupied for years, and subjects them to arbitrary arrest and detention when they seek these rights;

(4) compared to "white" South Africa, the designated "homelands," which are meant to accommodate the largest South African population group on a fraction of South African territory and were established without the consent of the vast majority of the governed, are characterized by high rates of infant mortality, unemployment, and malnutrition and by a severe shortage of medical services;

(5) the policy of the Government of the Republic of South Africa denies blacks their rightful claim to full South African citizenship; and

(6) the recent violence in South Africa must be seen as an inevitable result of the denial of the full rights of citizenship.

(b) It is the sense of the Congress that—

(1) the policy of separate development and the forced relocation of the people of the Government of the Republic of South Africa are inconsistent with fundamental American values and internationally recognized principles of human rights;

(2) the Government of the United States should continue to regard as citizens of South Africa all persons born within the internationally recognized boundaries of the Republic of South Africa, and not differentiate among these citizens on the basis of the South African Government's claim to have granted independence to various "homelands";

(3) at such times that any "homeland" official applies for a visa for travel to the United States, no such visa should be granted to such official unless such official holds a passport which is recognized as valid by the Government of the United States; and

(4) the Government of the United States should urge that the forced relocation of South African citizens be discontinued and that policies be adopted for all South Africa's citizens which protect the sanctity of the family, individual liberty, maximum freedom of choice, ownership of private property, and equal treatment of all citizens, regardless of race.

REPORTS ON FOREIGN DEBT IN LATIN AMERICA

SEC. 927. (a) The Congress finds that—

(1) the foreign debt of Latin American countries has soared from $27,000,000,000 in 1970 to over $350,000,000,000 in 1983;

(2) the foreign debt of Latin American countries is a serious obstacle to their economic progress, threatens their stability, and endangers the democratic processes in those nations;

(3) the economic and political futures of many of the Latin American countries hang in the balance and depend upon a successful resolution of the foreign debt crisis; and

(4) the confidence of the American people in the United States system of banking is also involved in a successful resolution of the foreign debt crisis.

(b)(1) Not later than October 1, 1985, the Secretary of State shall prepare and transmit to the Congress a report on—

(A) the magnitude of the foreign debt crisis in this hemisphere;

(B) the impact of the foreign debt crisis on the economies of the nations of Latin America;

(C) the degree to which the national security interests of the United States are implicated in this crisis; and

(D) the steps being taken and the policy being pursued by the United States aimed at dealing with this crisis.

(2) Not later than October 1, 1985, the Secretary of the Treasury shall prepare and transmit to the Congress a report on—

(A) the degree to which the foreign debt crisis affects the system of banking in the United States; and

(B) the steps being taken and the policy being pursued by the Department of the Treasury aimed at dealing with this crisis.

COMMISSION FOR THE PRESERVATION OF AMERICA'S HERITAGE ABROAD

SEC. 928. (a) Because the fabric of a society is strengthened by visible reminders of the historical roots of the society, it is in the national interest of the United States to preserve and protect the cemeteries, monuments, and historic buildings associated with the foreign heritage of United States citizens.

(b) There is established a commission to be known as the Commission for the Preservation of America's Heritage Abroad (hereafter in this section referred to as the "Commission").

(c) The Commission shall—

(1) identify and publish a list of those cemeteries, monuments, and historic buildings located abroad which are associated with the foreign heritage of United States citizens, particularly those cemeteries, monuments, and buildings which are in danger of deterioration or destruction;

(2) encourage the preservation and protection of such cemeteries, monuments, and historic buildings by obtaining, where appropriate and in concurrence with the Department of State, assurances from foreign governments that the cemeteries, monuments, and buildings will be preserved and protected;

(3) sponsor or otherwise support demonstration projects to help preserve and protect such cemeteries, monuments, and historic buildings;

(4) prepare and disseminate reports on the condition of and the progress toward preserving and protecting such cemeteries, monuments, and historic buildings; and

(5) coordinate its efforts with the United States International Council on Monuments and Sites.

(d)(1) The Commission shall consist of five members appointed by the President.

(2) Members shall be appointed for terms of three years except—

(A) of such members first appointed—

(i) two shall be appointed for two years; and

(ii) three shall be appointed for three years;

(B) a member appointed to fill a vacancy on the Commission shall serve for the remainder of the term for which the member's predecessor was appointed; and

(C) a member may retain membership on the Commission until the member's successor has been appointed.

(3) The President shall designate the Chairman of the Commission from among its members.

(4) The Commission shall meet at least once every three months.

(e)(1) Members of the Commission shall receive no pay on account of their service on the Commission.

(2) While away from their homes or regular places of business in the performance of services for the Commission, members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5 of the United States Code.

(f)(1) The Commission may appoint such personnel (subject to the provisions of title 5 of the United States Code which governs appointments in the competitive service) and may fix the pay of such personnel (subject to the provisions of chapter 51 and subchapter III of chapter 53 of such title, relating to classification and General Schedule pay rates) as the Commission deems desirable.

(2) The Commission may procure temporary and intermittent services to the same extent as is authorized by section 3109(b) of title 5 of the United States Code, but at rates for individuals not to exceed the daily equivalent of the maximum annual rate of basic pay then in effect for grade GS-18 of the General Schedule (5 U.S.C. 5332(a)).

(3) Upon request of the Commission, may head of any Federal department or agency, including the Secretary of State, is authorized to detail, on a reimbursable basis, any of the personnel of such department or agency to the Commission to assist it in carrying out its duties under this section.

(g)(1) The Commission may secure directly from any department or agency of the United States, including the Department of State, any information necessary to enable it to carry out this section. Upon the request of the Chairman of the Commission, the head of such department or agency shall furnish such information to the Commission.

(2) The Commission may accept, use, and dispose of gifts or donations of money or property.

(3) The Commission may use the United States mails in the same manner and upon the same conditions as other departments and agencies of the United States.

(4) The Administrator of General Services shall provide to the Commission on a reimbursable basis such administrative support services as the Commission may request.

(h) The Commission shall transmit an annual report to the President and to each House of Congress as soon as practicable after the end of each fiscal year. Each report shall include a detailed statement of the activities and accomplishments of the Commission during the preceding fiscal year and any recommendations by the Commission for legislation and administrative actions.

(i) This section shall take effect on October 1, 1985.

THE CONTROL OF CONVENTIONAL ARMS TRANSFERS

SEC. 929. (a) The Congress recognizes the conventional arms transfer agreements with the Third World by all suppliers from 1981-1984 totaled $153,200,000,000 (in constant 1984 dollars); in which noncommunist suppliers accounted for $94,100,000,000 and communist suppliers accounted for $59,100,000,000. The United States, the Soviet Union and France have been the three predominant arms suppliers to the third World from 1977-1984 and collectively accounted for 83 per centum of all conventional arms transfer agreements with the Third World in 1984. There is grave concern for the effect conventional arms transfers may have on regional stability, arms races and the economic needs of Third World nations, including their development, and ability to meet basic human needs. There is further concern about the effect of conventional arms transfers on regional stability, and ultimately on United States and Soviet security. Conventional arms transfer agreements made by the United States, the Soviet Union and France are at levels closer to rought equivalence than at any time in history. This could be a significant factor in facilitating progress to limit and control arms transfers. Since new arms transfers are unpredictable and since new cycles of arms purchases by the less developed nations could occur at any time, the United States should reevaluate its conventional arms transfer policies and practices and seek to achieve negotiated conventional arms control agreements which enhance the National interest at the earliest possible date.

(b) Therefore—

(1) The President should, at the earliest possible date, in consultation with our allies, initiate discussions with the Soviet Union and France aimed at beginning multilateral negotiation to limit and control the transfer of conventional arms to the less developed world.

(2) Within one year of the date of enactment of this section, the President shall submit to Congress a report to the Speaker of the House of Representatives and the Chairman of the Committee on Foreign Relations which examines and analyzes United States policies concerning the transfer of conventional arms, especially sophisticated weapons, and including a review of measures being take to fulfill the objectives stated above. This report shall also examine and analyze—

(A) the lessons of earlier efforts to negotiate restraints on the export of conventional arms;

(B) the evolution of supplier practices and policies;

(C) the evolution of recipient country attitudes regarding conventional arms transfers;

(D) the effect upon regional stability and security of conventional arms transfers by the United States and its allies and the Soviet Union and its allies in recent years;

(E) the relationship between arms exports by major suppliers and the needs of those countries to support their domestic military procurement programs;

(F) the relationship between arms imports and the external debt of recipient countries, allocation of internal resources, and their economic will-being.

(G) the relationship between arms transfers and regional military stability.

(3) The report provided for in subsection (2) shall be submitted in inclassified form, with an unclassified summary and with classified appendices, as appropriate and necessary.

REPUBLIC OF CHINA (TAIWAN) RETAINING FULL MEMBERSHIP IN THE ASIAN DEVELOPMENT BANK

SEC. 930. Since the People's Republic of China is seeking to apply for admission to the Asian Development Bank, conditioning its application upon administrative changes affecting the status and designation of the Republic of China (Taiwan) within that body;

Since the Republic of China (Taiwan) is a founding member of the Asian Development Bank, actively participating in the Bank's activities and faithfully fulfilling its obligations since the Bank's establishment in December 1966;

Since the Republic of China's (Taiwan's) subscription to the initial capital stock of the Bank was determined on the basis of the area, population, and economic condition of the island of Taiwan;

Since neither the relationship between the Republic of China (Taiwan) and the Bank, nor the circumstances under which these relations were established, have changed since 1966;

Since the Asian Development Bank agreement specifically prohibits the Bank from being influenced in its decision by politics;

Since it was the strong conviction of the founders of the Asian Development Bank that the introduction of political considerations would undermine the ability of the Bank to carry out its mission, namely to further economic growth and cooperation in the region; and

Since the Republic of China (Taiwan) has assisted in carrying out the mission of the Asian Development Bank over the years, moving from borrower to donor: Now, therefore,

It is the sense of the Senate that—

(1) Republic of China (Taiwan) should remain a full member of the Asian Development Bank, and that its status and designation within that body should remain unaltered no matter how the issue of the People's Republic of China's application for membership is disposed of; and

(2) the President and the Secretary of State should express support of the Republic of China (Taiwan), making it clear that the United States will not countenance attempts to make administrative changes affecting the status and designation of another member without that member's full knowledge and consent.

AID TO THE PEOPLE'S REPUBLIC OF MOZAMBIQUE

SEC. 931. (a) None of the funds authorized to be appropriated for fiscal year 1986 under chapter 2 and 5 of part II of the Foreign Assistance Act of 1961 shall be made available to the People's Republic of Mozambique unless the President makes a certification in accordance with subsection (a) within thirty days of the enactment of this section and every one hundred and eighty days thereafter.

(b) The certification required by subsection (a) is a certification by the President to the Speaker of the House of Representatives and to the chairman of the Senate Committee on Foreign Relations that the Government of the People's Republic of Mozambique—

(1) is making a concerted and significant effort to comply with internationally recognized human rights;

(2) is making continued progress in implementing essential economic and political reforms, including the restoration of private property and respect for the right to engage in free enterprise in all sectors of the economy;

(3) has implemented a plan by September 30, 1986, to reduce the number of foreign military personnel to no more than 55.

(4) is committed to holding free elections at a date no later than September 30, 1986, and to that end has demonstrated its good faith efforts to begin discussions with all major political factions in Mozambique which have declared their willingness to find and implement an equitable political solution to the conflict, with such solution to involve a commitment to—

(A) the electoral process with internationally recognized observers; and

(B) the elimination of all restrictions on the formation and activities of opposition political parties.

CANADIAN CATTLE AND HOGS EXPORTS

SEC. 932. Since, livestock prices have been in decline for some time due to excessive supply partially caused by dramatic increases in importation of live cattle and hogs from Canada, which has increased by 1,000 per centum in the last decade in the case of hogs alone; and

Since, American livestock producers are suffering from the same general economic crisis affecting all of agriculture, and many will face liquidation or foreclosure in the near future; and

Since, the disparity between the United States and the Canadian dollar amounts to 32 per centum to 34 per centum and results in even further increases in Canadian hogs and cattle being imported into the United States: Therefore,

It is the sense of the Congress that the President should direct appropriate members of the Administration, including the United States Trade Representative, the Secretary of Agriculture, and the Secretary of Commerce, to aggressively pursue discussions with the Canadian Government directed toward immediate reduction in the Canadian export of cattle and hogs to the United States.

ASSISTANCE FOR THE CAMBODIAN PEOPLE

SEC. 933. The President may make available to the non-communist resistance forces in Cambodia up to $5,000,000 for fiscal year 1986 of the funds authorized to be appropriated to carry out chapter 2 or chapter 4 of part II of the Foreign Assistance Act of 1961, notwithstanding any other provision of law.

JOSEF MENGELE

SEC. 934. (a)(1) The Congress finds that—

(A) Josef Mengele was the selecting physician at the Nazi concentration camp of Auschwitz-Birkenau during the Second World War where he personally sent more than four hundred thousand Jews, including close to two hundred thousand children, to the gas chambers and conducted unspeakable pseudo-scientific experiments on many of the inmates of Auschwitz;

(B) Josef Mengele has lived in freedom since the end of the Second World War, initially, it is thought, in Germany and, thereafter, for the past thirty-five years, in South America;

(C) Josef Mengele became a naturalized citizen of Paraguay in 1959, and is believed still to be living in the region; and

(D) the Minister of the Interior of Paraguay has promised that the Paraguayan Government would undertake a nationwide investigation to locate Josef Mengele and allow foreign observers to participate in such investigation.

(2) It is therefore the sense of Congress that—

(A) the United States Government should undertake all possible efforts to ensure that Josef Mengele is brought to justice;

(B) the Government of Paraguay should, consistent with its previous commitments, carry out an immediate investigation to locate Josef Mengele and, if he is to be found in that country, arrest him and extradite him to a country where a warrant is outstanding for the arrest of Josef Mengele for crimes against humanity;

(C) the United States Government should seek to enlist similar efforts on the part of other regional governments; and

(D) in pursuance of these ends, the United States Government should send representatives to Paraguay and such other regional states as appropriate to participate in these investigations;

(3) Report to Congress on efforts of the Government of Paraguay to apprehend Josef Mengele.

(b) The President shall submit a report to the Speaker of the House of Representatives and the President Pro Tempore of the Senate on the efforts made by the Government of Paraguay to apprehend Josef Mengele. Such report shall be submitted no later than October 1, 1985 and shall include—

(1) a detailing of the efforts made by the Government of Paraguay to locate Josef Mengele;

(2) the degree to which other countries have cooperated with the investigation; and

(3) the results of the Government of Paraguay's efforts to locate and apprehend Josef Mengele.

SOFTWOOD TIMBER

SEC. 935. Since, softwood timber prices have been in decline for some time due to excessive supply partially caused by dramatic increases in importation of processed softwood timber from Canada, which has increased from 18 per centum of the United States market in the last two years to 35 to 40 per centum today;

Since, American timber producers are suffering from this economic crisis, and the difficulty in acquiring timber from the National Forest System;

Since, the disparity between the United States and the Canadian dollar amounts to 32 to 34 per centum and results in even further increases in processed softwood timber being imported into the United States: Therefore,

It is the sense of the Congress that the President should direct appropriate members of the Administration, including the United States Trade Representative, the

Secretary of Agriculture, and the Secretary of Commerce, to aggressively pursue discussions with the Canadian Government directed toward immediate reduction in the Canadian export of softwood timber to the United States.

TITLE X—INTERNATIONAL NARCOTICS CONTROL ACT OF 1985

SHORT TITLE

SEC. 1001. This title may be cited as the "International Narcotics Control Act of 1985".

LATIN AMERICAN REGIONAL NARCOTICS CONTROL ORGANIZATION

SEC. 1002. (a) The Secretary of State, with the assistance of the National Drug Enforcement Policy Board, shall conduct a study of the feasibility of establishing a regional organization in Latin America which would combat narcotics production and trafficking through regional information-sharing and a regional enforcement unit.

(b) No later than six months after the date of enactment of this title, the Chairman of the National Drug Enforcement Policy Board shall report to the Committee on Foreign Affairs and the Committee on the Judiciary of the House of Representatives and the Committee on Foreign Relations and the Committee on the Judiciary of the Senate on the advisability of encouraging the establishment of such an organization.

ANNUAL REPORTS ON INVOLVEMENT OF COMMUNIST COUNTRIES IN ILLICIT DRUG TRAFFIC

SEC. 1003. Section 481(e) of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new paragraph:

"(6) Each report pursuant to this subsection shall describe the involvement, during the preceding fiscal year, of the governments of Communist countries (as defined for purposes of section 620(f) of this Act) in illicit drug trafficking, including—

"(A) the direct or indirect involvement of Communist governments in the production, processing, or shipment of narcotic and psychotropic drugs and other controlled substances, and

"(B) any other activities of Communist governments which have facilitated illicit drug trafficking.".

NARCOTICS CONTROL EFFORTS IN BRAZIL

SEC. 1004. The Secretary of State shall enter into negotiations with the Government of Brazil in order to establish a bilateral narcotics control agreement. Such agreement shall have as a goal of 10 per centum reduction in illicit coca production in Brazil in calendar year 1986.

CONDITIONS ON ASSISTANCE TO BOLIVIA

SEC. 1005. United States assistance (as defined in section 481(i)(4) of the Foreign Assistance Act of 1961) may be provided to Bolivia for fiscal years 1986 and 1987 only under the following conditions.

(1) Of the aggregate amount of assistance allocated for Bolivia for fiscal year 1986—

(A) up to 25 per centum may be provided at any time after the President certifies to the Congress that the Government of Bolivia has enacted legislation which prohibits more than two hectares of coca production per family; and

(B) the remaining 75 per centum may be provided at any time subsequent to a certification pursuant to subparagraph (A) if the President certifies to the Congress that the Government of Bolivia achieved the eradication targets for the calendar year 1985 contained in its August 1983 narcotics control agreements with the United States.

(2) Of the aggregate amount of assistance allocated for Bolivia for fiscal year 1987—

(A) up to 50 per centum may be provided at any time after the President certifies to the Congress that during the first six months of calendar year 1986 the Government of Bolivia achieved at least half of the eradication targets for the calendar year 1986 contained in its August 1983 narcotics control agreements with the United States; and

(B) the remaining 50 per centum may be provided at any time after the President certifies to the Congress that the Government of Bolivia fully achieved the eradication targets for the calendar year 1986 contained in its August 1983 narcotics control agreements with the United States.

UPPER HUALLAGA VALLEY PROJECT IN PERU

SEC. 1006. Funds authorized to be appropriated for fiscal year 1987 to carry out chapter 1 of part I of the Foreign Assistance Act of 1961 for the project of the Agency for International Development in the Upper Huallaga Valley of Peru may be made available for that project only if the Administrator of that Agency, after consultation with the Congress, determines that a comprehensive review of that project has been completed which establishes the effectiveness of that project in reducing and eradicating coca leaf production, distribution, and marketing in the Upper Huallaga Valley.

REALLOCATION OF FUNDS IF CONDITIONS NOT MET

SEC. 1007. If any of the funds described in sections 1005, and 1006, of this title are not used for the country for which they were allocated because the conditions specified in those sections are not met, the President shall reprogram those funds in order to provide additional assistance to countries which have taken significant steps to halt illicit drug production or trafficking.

CONDITIONS ON UNITED STATES CONTRIBUTIONS TO THE UNITED NATIONS FUND FOR DRUG ABUSE CONTROL

SEC. 1008. Section 482(a) of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new paragraph:

"(3) Funds authorized to be appropriated by this section for fiscal year 1986 and for fiscal year 1987 may be used for a contribution to the United Nations Fund for Drug Abuse Control only if that organization includes in its crop substitution projects a plan for cooperation with the law enforcement forces of the host country.".

PROHIBITION ON USE OF FOREIGN ASSISTANCE FOR REIMBURSEMENTS FOR DRUG CROP ERADICATIONS

SEC. 1009. Chapter 8 of part I of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new section:

"SEC. 483. PROHIBITION ON USE OF FOREIGN ASSISTANCE FOR REIMBURSEMENTS FOR DRUG CROP ERADICATIONS.—Funds made available to carry out this Act may not be used to reimburse persons whose illicit drug crops are eradicated.".

REQUIREMENT FOR COST-SHARING IN INTERNATIONAL NARCOTICS CONTROL ASSISTANCE PROGRAMS

SEC. 1010. (a) Section 482 of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new subsection:

"(d) Assistance may be provided under this chapter to a foreign country only if the country provides assurances to the President, and the President is satisfied, that the country will provide at least 25 per centum of the costs of any narcotics control program, project, or activity for which such assistance is to be provided. The costs borne by the country may include 'in-kind' contributions.".

(b) The amendment made by this section shall take effect on October 1, 1985.

EXTRADITION TREATIES

SEC. 1011. The Secretary of State with the assistance of the National Drug Enforcement Policy Board shall increase United States efforts to negotiate updated extradition treaties relating to narcotics offenses with each major drug-producing country, particularly those in Latin America.

EFFECTIVE DATE

SEC. 1012. Except where otherwise stated in this Act or in the amendments made by this Act, this Act and the amendments made by this Act, shall take effect on October 1, 1985.

Mr. LUGAR. I move to reconsider the vote by which the bill was agreed to.

Mr. PELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LUGAR. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized, in the engrossment of the amendments to S. 960, to make any necessary technical and clerical changes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LUGAR. Mr. President, I thank my colleague Mr. PELL the distinguished comanager of this bill, the staffs on the majority and minority side, and all Senators for their extraordinary cooperation in making this event possible.

Mr. PELL. Mr. President, I would like to really compliment the chairman of the committee for doing what many of us thought was impossible—getting this bill through, much less getting it through in 2 days. I think the spirit in which we all worked together and the staffs worked together is most commendable and I hope it will continue not only throughout this Congress but for many more.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, I thank both managers of the bill.

As we complete work on this important bill, I want to offer just a few brief comments.

When I became majority leader, one of my highest priorities was to get the Senate back into a pattern of orderly consideration of major legislation. The history of this bill in the Senate shows the three requirements for that kind of orderly legislative process.

First, it takes hard work. All of those who have been involved in this bill—Members and staff alike—have labored long hours to bring to the floor the legislation we have just passed.

Second, it demands a certain spirit of reasonableness. This does not mean that we abandon our principles or forget all of our policy differences, either as individuals or as Members of our two parties. But it does mean that we always keep in mind that ours is a system of give-and-take and compromise. On both sides of the aisle, both in committee and here on the floor, we have had to give in at times as we moved this bill forward, but out of it we have a compromise that I think all of us can live with.

Finally, it takes leadership. The distinguished chairman of the Foreign Relations Committee, Mr. LUGAR, the principal architect of this bill, has provided just that quality of leadership. He has been tough when necessary, accommodating when possible, and fair always. That is why we have gotten this bill to the floor and passed it, for the first time in several years.

His committee colleague, the distinguished senior Senator from Rhode Island and ranking minority member [Mr. PELL], deserves equal praise for his important contributions to this bill and his willingness to work constructively to develop a product that could be passed.

I do appreciate their leadership. They worked out a very difficult bill. I am advised that we have only been on the bill really about a day and a half. There have been about 14 hours in total, with 7 rollcall votes. We considered 46 amendments; 34 were agreed to, 3 rejected, 1 tabled, and 8 were withdrawn. That takes care of the 46, if someone's arithmetic is correct.

I do believe that the distinguished chairman (Mr. LUGAR), the principal architect of this bill, has obviously provided leadership, along with his distinguished colleague, the senior Senator from Rhode Island [Mr. PELL]. I extend my thanks and appreciation.

I am hopeful now that we can conclude the defense authorization bill between now and next Thursday night, then commence the Memorial Day recess.

Mr. SIMPSON. Mr. President, I commend Senator LUGAR for his superb handling of this measure and extend my commendation to Senator PELL for his cooperation. They make an ideal pair. They have taken one of the most difficult hot potatoes we deal with in this place and, with an exhibition of fairness, they have given us an excellent example of comity and partnership, for which I commend them.

To Senator LUGAR, whom I know so well, I commend him for his outstanding effort. That is certainly the essence of his ability. We have not considered a foreign aid authorization bill since 1981 as the result of the difficulties we have had in balancing these divergent issues. Senator LUGAR indeed and Senator PELL should be recognized for their accomplishment in this area. It is most impressive.

Mr. MURKOWSKI. Mr. President, if the Senator will yield, I also wish to express my enthusiastic support for the manner in which this foreign assistance authorization bill was guided to passage so successfully by Senator LUGAR and Senator PELL. As one who took up a good deal of time on the issue of extended repayment rates, I am delighted that the Foreign Relations Committee will be holding hearings on that problem. I think that is something meaningful. I again compliment those Senators responsible for this legislation.

ORDER FOR CONSIDERATION OF H.R. 1869 AT 11:30 A.M. TOMORROW

Mr. DOLE. Mr. President, I ask unanimous consent that notwithstanding the previous unanimous-consent agreement, the Senate resume the conference report on H.R. 1869, repeal of auto recordkeeping, at 11:30 a.m. tomorrow under the same terms and conditions as previously ordered.

The PRESIDING OFFICER. Without objection, it is so ordered.

The text of the agreement follows:

Ordered, That at 11:30 a.m. on Thursday, May 16, 1985, the Senate turn to the consideration of the conference report on H.R. 1869, repealing contemporaneous recordkeeping requirements, with the time to be limited to 40 minutes, with 30 minutes under the control of the Senator from Ohio [Mr. METZENBAUM] and 10 minutes under the control of the Senator from Oregon [Mr. PACKWOOD], or his designee.

EXECUTIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate go into executive session to consider a number of calendar items.

Mr. BYRD. There is no objection, Mr. President.

Mr. DOLE. Mr. President, I ask unanimous consent that we consider the following items: Calendar Orders No. 100, 129, 145, 146, 147, 148, 149, 150, and 151, through 159, 160, 161, 162, 163, and 165.

Mr. BYRD. Mr. President, I want to see if I accurately heard the distinguished majority leader. On this side, Calendar Orders numbered 100, 120, 121, 129, 145, 146, 147, 148, 149, 150, 151, through 159, 160, 161, 162, 163, 165, and Nominations Placed on the Secretary's Desk on page 10 are cleared.

There being no objection, the Senate proceeded to the consideration of executive business.

Mr. DOLE. Mr. President, I ask unanimous consent that those items, including Calendar 120 and 121 just referred to, be considered en bloc and confirmed en bloc.

The PRESIDING OFFICER (Mr. MURKOWSKI). Without objection, the nominations are considered and confirmed en bloc.

The nominations confirmed en bloc are as follows:

DEPARTMENT OF AGRICULTURE

John R. Norton III, of Arizona, to be Deputy Secretary of Agriculture.

DEPARTMENT OF ENERGY

J. Michael Farrell, of the District of Columbia, to be General Counsel of the Department of Energy.

Joseph F. Salgado, of California, to be Under Secretary of Energy.

DEPARTMENT OF JUSTICE

Herbert M. Rutherford III, of Virginia, to be U.S. Marshal for the District of Columbia.

DEPARTMENT OF COMMERCE

Douglas A. Riggs, of Alaska, to be General Counsel of the Department of Commerce.

DEPARTMENT OF AGRICULTURE

Peter C. Myers, of Missouri, to be an Assistant Secretary of Agriculture.

Robert L. Thompson, of Indiana, to be an Assistant Secretary of Agriculture.

IN THE ARMY

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. John B. Blount, [redacted] (age 56), U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Thomas F. Healy, [redacted], U.S. Army.

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Howard F. Stone, [redacted] (age 53), U.S. Army.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Howard G. Crowell, Jr., [redacted], U.S. Army.

The following-named officer for appointment as a Reserve commissioned officer in the Adjutant General's Corps, Army National Guard of the United States, Reserve of the Army, under the provisions of title 10, United States Code, section 593(a) and 3392:

To be brigadier general

Col. Frank C. Torres, Jr., [redacted].

IN THE MARINE CORPS

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Charles G. Cooper, [redacted] U.S. Marine Corps.

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. William R. Maloney, xxx-xx-xxxx U.S. Marine Corps.

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Bernard E. Trainor, xxx-xx-xxxx U.S. Marine Corps.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Lt. Gen. George B. Crist, xxx-xx-xxxx, U.S. Marine Corps.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Ernest C. Cheatham, Jr., xxx-xx..., U.S. Marine Corps.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Thomas R. Morgan, xxx-xx-..., U.S. Marine Corps.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Joseph J. Went, xxx-xx-xxxx, U.S. Marine Corps.

The following named brigadier general of the Marine Corps Reserve for promotion to the permanent grade of major general, under provisions of title 10, United States Code, sections 5902 and 5912:

Constantine Sangalis.

The following-named colonel of the Marine Corps Reserve for promotion to the permanent grade of brigadier general, under provisions of title 10, United States Code, sections 5902 and and 5912:

George R. Omrod.

IN THE NAVY

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Vice Adm. John M. Poindexter, xxx-xx-x.../1110, U.S. Navy.

DEPARTMENT OF THE TREASURY

John F.W. Rogers, of New York, to be an Assistant Secretary of the Treasury. (New position—Public Law 98-594 of October 30, 1984.)

Margaret DeBardeleben Tutwiler, of Alabama, to be an Assistant Secretary of the Treasury. (New position—Public Law 98-594 of October 30, 1984.)

THE JUDICIARY

Samuel B. Sterrett, of Maryland, to be a judge of the U.S. Tax Court.

DEPARTMENT OF JUSTICE

William H. Opel, of Alaska, to be U.S. Marshal for the District of Alaska.

NOMINATIONS PLACED ON THE SECRETARY'S DESK IN THE AIR FORCE

Air Force nominations beginning Maj. James H. Applegate, Jr., and ending Maj. Michael R. Conners, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of April 29, 1985.

Air Force nominations beginning John H. Barnhart, and ending Jerry W. Brackett, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of April 29, 1985.

NOMINATIONS OF ROBERT L. THOMPSON AND PETER C. MYERS

Mr. HELMS. Mr. President, I am pleased to bring before the Senate the nominations of Mr. Robert L. Thompson and Mr. Peter C. Myers to be Assistant Secretary of Agriculture for Economics and Assistant Secretary of Agriculture for Natural Resources and Environment, respectively.

Both gentlemen are highly qualified for their respective posts. The Committee on Agriculture, Nutrition, and Forestry held hearings on April 22, 1985, and voted unanimously, to favorably report these nominations.

The committee has carefully reviewed all details of their professional qualifications and experience, as well as the appropriate information relating to their personal finances and obligations.

Both gentlemen are of the highest character and integrity. They have the respect of their peers, their colleagues, and their associates. I know each will do an outstanding job, and I commend each to the Senate. I urge the Senate to consent to their nominations and confirm them in their posts.

NOMINATION OF MARGARET TUTWILER

Mr. DENTON. Mr. President, I rise to support the confirmation of Miss Margaret Tutwiler for the position of Assistant Secretary for Public Affairs and Public Liaison in the Department of the Treasury.

Miss Tutwiler's credentials speak for themselves. Recently she has served as Deputy Assistant to the President for Political Affairs in the White House. She was also Special Assistant to the President and Executive Assistant to the Chief of Staff. There is no question as to her professional qualification for the job. During the past years, she has proved herself to be an effective and articulate spokeswoman.

Equally important, she happens to be from the great State of Alabama. Miss Tutwiler hails from the magic city, Birmingham, and graduated from the University of Alabama. As you know, Alabama has nurtured many fine Americans. This in itself should prove her worthiness.

Our Government is in urgent need of qualified men and women whose capabilities are matched by their depth of commitment. Miss Tutwiler is an ideal representative of this type of individual. I urge that her appointment as Assistant Secretary-designate for Public Affairs and Public Liaison be made permanent.

NOMINATION OF JOHN R. NORTON

Mr. HELMS. Mr. President, I am pleased to bring before the Senate the nomination of Mr. John R. Norton of Paradise Valley, AZ for the position of Deputy Secretary of Agriculture.

The Committee on Agriculture, Nutrition, and Forestry held a detailed hearing on Mr. Norton's nomination for this post on March 27, 1985. On April 4, the committee ordered reported, without objection, with one abstention, this nomination.

During this confirmation process I have come to know John Norton, and to respect him immensely. I am impressed with his sound character, his integrity, and his good humor and disposition. He will be a credit to the President, to the Senate, and to the American people whom he will serve.

Mr. President, John Norton is a farmer. He knows the difficulties farmers face from a sometimes hostile environment and from Government policies—and actions that are often capricious. And, he knows the rewards, both material and spiritual, which can accrue to those who are successful in their endeavors. Mr. Norton is one of the outstanding citizens of his State. No nominee has ever come before the Senate as well recommended by his fellow citizens as has John Norton. It gives me genuine pleasure to commend him to the Senate and to the American people. I urge the Senate to consent to his nomination.

NOMINATION OF MARGARET TUTWILER

Mr. HEFLIN. Mr. President, it is a great pleasure for me to rise in support of the nomination of a fellow Alabamian, Margaret DeBardeleben Tutwiler of Birmingham, to serve as Assistant Secretary of the Treasury for Public Affairs and Public Liaison.

I am certain that most of my colleagues have come to know Margaret Tutwiler during the first term of the Reagan administration, when she served first as Special Assistant to the President and Executive Assistant to the Chief of Staff, and most recently as Deputy Assistant to the President for Political Affairs. Since February, she has moved across the street from the White House to serve as Assistant Secretary-designate in the position we are now confirming her. In addition, she recently served as Director of Public Liaison of the Committee for the 50th American Presidential Inaugural.

Mr. President, for someone so young, Margaret Tutwiler already has an unbelievably long record of service. Her involvement with politics began a little

more than 10 years ago, when, after graduating from the University of Alabama, she worked as office manager of the Alabama Republican Party. After moving to Washington in 1975, she worked with the committee working to reelect President Gerald Ford for a year, and was then named executive director of the President Ford Committee for Alabama.

From 1978 until May of 1980, Ms. Tutwiler was director of scheduling for the primary campaign of Ambassador George Bush. After the Republican National Convention, she continued her activity, as director of scheduling for the then Vice-Presidential candidate.

While her party politics are different from mine, nevertheless, I am not blind. She is an individual possessing the highest qualities of intellect, integrity, and industry. Besides, she is a great lady.

Mr. President, Margaret Tutwiler has built an outstanding record of accomplishments, and I am certain that she will do a fine job in her new capacity at the Treasury Department. I commend the President on the quality of this nomination.

Margaret comes from a fine Alabama family, Mr. President. I knew her late parents, Temple and Margaret DeBardeleben Tutwiler, and know that they would be tremendously proud of her accomplishments and this recognition of her abilities by the President. I am also certain that her brother and sister, Temple and Ann, are very proud of Margaret.

Mr. President, I appreciate the opportunity to make these comments relative to this nomination, and urge my colleagues to vote in confirmation.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate now return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORPHAN DRUG ACT AMENDMENTS

MEASURE PLACED ON CALENDAR

Mr. DOLE. Mr. President, I send the enclosed bill to the desk on behalf of Senators HATCH, KENNEDY, and others, and ask unanimous consent it be placed on the Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I ask also unanimous consent that the statements by Senators HATCH, HAWKINS, WEICKER, and KASSEBAUM be made a part of the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. I make the same request with reference to a statement by Mr. KENNEDY.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORPHAN DRUG ACT AMENDMENTS

Mr. HATCH. Mr. President, I am today introducing the Orphan Drug Act Amendments of 1985, which will extend funding authority for research and development of drugs for rare diseases, improve the current situation with respect to research costs and marketing of such drugs, and establish a National Commission on Orphan Diseases.

Largely as a result of the incentive provided by enactment of the Orphan Drug Act in the 97th Congress, there has been very encouraging progress in bringing to market existing drugs and in developing new drugs to alleviate suffering from a number of so-called orphan diseases. The name "orphan" was coined to reflect a perceived lack of concern about diseases which affect relatively small numbers of people; a perception that is being altered in part as a result of the positive impact of the Orphan Drug Act. Continued cooperation between the Government and the private sector, spurred by clear congressional interest, provides hope for individuals who suffer from such rare but devastating conditions as tourette syndrome, Huntington's disease, Friedrich's ataxia, neurofibromatosis, and amyotrophic lateral sclerosis. While the number of individuals suffering from any one of these orphan diseases is small, in the aggregate orphan conditions affect several million Americans. All of us in the Senate are well aware of the efforts of our former colleague, Senator Jacob Javits of New York, on behalf of research in amyotrophic lateral sclerosis, a condition with which he himself is heroically struggling.

The bill I am introducing will extend for 3 years authority for the grant and contract program for research and development of orphan drugs, maintaining the funding authority at the level in current law—$4 million per year. In addition, the bill makes two technical changes in the Federal Food, Drug, and Cosmetic Act, to: First, allow Federal funding of both preclinical and human clinical testing of orphan drugs; and second, remove the current stipulation that exclusive marketing rights may only be granted to an orphan drug if the drug is not patentable. Finally, the bill will establish a National Commission on Orphan Diseases to assess needs and opportunities for rare disease research and to recommend necessary changes. A comparable commission was approved by the Senate last year as part of S. 540, the Biomedical Research Extension Act.

There is broad consensus among the Government, the pharmaceutical industry, and the public that enactment of the Orphan Drug Act was a major reason for the progress that has been made in research and development of orphan drugs. This progress was enhanced by congressional action last year to clarify the definition of "orphan drug," to make clear that a drug could qualify for this designation if it was intended for a patient population of fewer than 200,000 or, if for a larger population, that it was a drug from which a firm could not reasonably expect to profit. This clarification was part of the health promotion and disease prevention amendments passed by the Congress and signed into law in October 1984. The Food and Drug Administration has reported that, as a result of this simple provision defining orphan drugs, there have been 31 requests for designation of a drug as an orphan product in just 4½ months, compared with 22 such requests in the previous year.

Many drugs designated as orphan drugs have a much smaller potential market than even the 200,000 patients referred to in the definition—often they are for conditions that affect fewer than 50,000 persons in the United States. This means that there is simply no possibility that a firm willing to develop and market such a product stands to profit from that decision. The tax credit and exclusive marketing provisions of the Orphan Drug Act have therefore been important incentives for private sector participation in this endeavor. In this regard, I am pleased that the Treasury Department has recently issued its proposed regulations, under which developers or sponsors of orphan drugs may apply for the tax credit for expenses of clinical studies prerequisite to FDA approval of an orphan drug.

It is critical when faced with success that we not succumb to our instinct to rest on our laurels. It is essential that we continue to encourage the development and marketing of drugs on which the basic research is essentially complete, and, perhaps even more critical at this juncture, make a strong effort to urge and support the basic research needed to get new drugs ready for testing and marketing. It is for this reason that I am proposing not only to reauthorize the program of grants and contracts for orphan drug development but also to make two small changes in the Orphan Drug Act that will improve the current situation for researchers and for developers bringing drugs to market.

The first change will authorize Federal funding for the preclinical testing of these drugs, as well as for the human clinical testing. Current law permits the awarding of grants and contracts only for human clinical testing. This change will serve as incentive for earlier, and costly, research on drugs that have not yet reached the stage of readiness for clinical tests.

In addition, the bill will provide that the current 7-year exclusive marketing rights for an orphan drug be available whether the drug is patentable or not. Current law allows an exclusive license to be issued only in cases where a letter of patent cannot be issued.

Finally, the bill will establish a National Commission on Orphan Diseases in the Department of Health and Human Services. This Commission, composed of nongovernment members, will assess the needs and opportunities for research in the cause, prevention, and treatment of orphan diseases, and make recommendations for either legislative or administrative actions that would enhance this research effort. The fine research already underway at the National Institutes of Health will serve as a springboard for this Commission's efforts. The Commission is time-limited, with a termination date shortly after their final report is submitted to the Congress.

Some interest has been expressed in extending the provisions of this act to medical devices. We have decided not to make such a change at this time because we believe that more information is needed to determine the necessity for a change and the best way to approach the orphan device issue. We anticipate receiving information shortly from the Food and Drug Administration, pursuant to an informal study they are conducting. Accordingly, we plan to deal with device matters at some later date.

Mr. President, I want to take this moment to congratulate the Food and Drug Administration, especially the Orphan Products Board and the Office of Orphan Products; the pharmaceutical industry; participating clinical investigators; and voluntary and professional disease organizations for their excellent efforts to help alleviate the suffering of our citizens who just a few years ago despaired of finding an understanding ear and a helping hand.

In particular, I am proud of the studies being conducted in my home State of Utah with regard to autism. The coordinated efforts of the University of California at Los Angeles, the University of Utah, the Utah Society for Autistic Children, and the A.H. Robins Co. hold great promise.

I think the progress that has been made in finding sponsors for orphan drugs, and in getting these products to market, illustrates well what private sector-government cooperation can produce. This progress also illustrates the strength of Americans who join together for a cause that has merit; there surely is strength in numbers in America, and the National Organization for Rare Diseases has shown us that there is also tremendous strength in dedication and commitment.

Another aspect of this bill is a section which would correct a drafting error in the fiscal year 1985 Department of Education Appropriations Act. This act provides $61 million for personnel training through part D of the Education of the Handicapped Act but, inadvertently, does not allow the expenditure of these moneys prior to July 1, 1985. The administration has informed us that over $50 million of this total amount was supposed to be awarded to institutions across the country on June 1 and that they support this technical amendment. Unless this error is corrected immediately, 750 applications will be delayed affecting 10,000 students directly and 5,000 to 10,000 indirectly. The institutions involved expected to receive their money on June 1 and otherwise would have allocated other resources to temporarily bridge the funding gap. I appreciate the efforts of my distinguished colleague, Senator WEICKER, chairman of the Labor-HHS-Education Subcommittee of the Appropriations Committee, in bringing this matter to my attention.

I urge my colleagues in the Senate to join me in sponsoring this legislation, which will further the positive results that have been generated by the Orphan Drug Act.

Mrs. HAWKINS. Mr. President, I would like to join Senator HATCH, the distinguished chairman of the Senate Labor and Human Resources Committee, in cosponsoring this legislation to reauthorize the Orphan Drug Act.

The passage of the original Orphan Drug Act in the 97th Congress has resulted in very encouraging progress in developing new drugs to those suffering from so-called orphan diseases. Individuals who suffer from relatively rare diseases and conditions find themselves fighting another battle within the pharmaceutical industry because the drugs that they need to alleviate their suffering are not profitable and thus are not being pursued by pharmaceutical manufacturers.

The Orphan Drug Act, with its tax credit and exclusive marketing provisions, provides important incentive for research and development of drugs for patient populations under 200,000. The legislation that we are offering today will enhance this progress by extending the authority for the grant and contract program for research and development of orphan drugs, allow Federal funding of both preclinical and human clinical testing of orphan drugs and remove the current stipulation that exclusive marketing rights may only be granted to an orphan drug if the drug is not patentable. The legislation will also establish a Commission on Orphan Diseases to assess the needs and opportunities for rare disease research and recommend necessary changes.

Mr. President, often those of us who are blessed with good health in their families don't realize the desperation of families whose members suffer from a rare illness or condition. I ask unanimous consent that an article from the Playground News Press regarding one Florida family's struggle with their rare "orphan" illness be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NEUROFIBROMATOSIS: OBSCURE DISORDER AFFECTS YOUNG MOTHER, DAUGHTERS

(By Evie Fox)

The disorder happens to one in 3,000 people. Yet few have ever heard of it and even fewer can pronounce it.

Neurofibromatosis. The name itself sounds ominous.

Devra Williams was one of the many who had never heard of the disorder—until last November, when a doctor in Pensacola finally put a name to the lumps and spots appearing on her 18 month old daughter's body. It was the culmination to a long frustrating search for a diagnosis.

Neurofibromatosis is characterized by the presence of many small tumors which appear just under the skin, or larger tumors often along the course of peripheral nerves. It can affect all body systems and can cause disfigurement. No cure is known and the only effective treatment is surgery on the tumors. Often, after surgery, the tumors grow back. Death can occur when the tumors cannot be contained and involve vital organs.

The cause is known. NF is caused by a mutant gene, either inherited from a parent who has the disorder or the result of a new or spontaneous mutation in the developing fetus. Each child of an affected parent has a 50 percent chance of inheriting the gene and developing NF. The disorder was first fully documented in medical literature by Dr. Frederic Von Recklinghausen in 1832 and was known by his name for many years.

Approximately 100,000 people of both sexes and all national origins and races are afflicted with NF in the United States alone, placing neurofibromatosis among the most common hereditary disorders.

Devra was shocked to discover that she herself had the disorder, confirmed by the presense on her body of six or more "cafe-au-lait" spots, and had transmitted it not only to Nicole but to her younger daughter Natasha as well.

The nightmare for Devra and her husband, Billy, started when they first discovered a "little lump" on Nicole, an inquisitive child with bright blue eyes and fine light brown hair that frames her face in soft curls.

Concerned, Devra took her to a doctor, then another and another. "First they said it was a bug bite," Devra explains. When the "bite" didn't go away, it was declared a Vitamin C deficiency. One doctor even told her that all her daughter needed was a good bath—the little girl was simply dirty.

After the diagnosis, surgery was performed on the painful tumors. One doctor told the Williamses that all the abdominal tumors had been removed. Later they found that only some had and others were still growing.

Even after the diagnosis, most doctors were familiar with the disorder in older people but ruled it out in Nicole's case because it usually is not so advanced in such a young child. Nicole's case is rare in its severity—she is not expected to have a long life.

It was at the time of Nicole's surgery that Fort Walton Beach resident Betty Travers entered the picture. Travers' nephew was in the hospital at the same time as Nicole and his mother (Travers' sister-in-law) became acquainted with the Williamses. She learned that they were in desperate need of a babysitter to watch little Tasha while Devra stayed at the hospital with Nicole, and Billy worked as a construction supervisor. She suggested Betty, who started babysitting for the young couple.

But babysitting wasn't enough for Betty. "My problem is that I'm too soft hearted," Betty says. A better description would be "caring." She saw the tremendous strain the family was under and offered her help, and now is like a grandmother to the children and a mother to Devra, whose own mother lives in Arkansas.

"I don't have any grandchildren," Betty explains. "Neither of my sons is married. I didn't intend to get so involved with the Williamses and would never interfere in someone else's life. But when someone is in trouble, I just have to see if I can help."

Since neither she nor Devra knew much about NF, Betty decided to do a little research. The library had only a paragraph in a medical encyclopedia, and there seemed to be little information available elsewhere.

Finally they tried the American Cancer Society. While NF is not a form of cancer, it was listed in the Cancer Society's reference material.

Finding comfort and strength in their new found knowledge, they contacted the National Neurofibromatosis Foundation, which supplied more information.

"I was just amazed at what we were learning about NF," Betty explains. "It really isn't all that rare and yet no one knows about it." From the beginning, Betty says, Devra's greatest hope was that no one else would have to go through what they were going through just to find out about NF and get a proper diagnosis.

Learning about the disorder does not diminish the anguish of living with the knowledge. Even though Devra knows it is irrational, she feels responsible for her children's plight. "Yes, I feel guilty, that I gave my children something like this," she says, carefully controlling the deep well of emotion that would flood forth if given the chance. "I just go from day to day and pray a lot."

Billy is holding his own too. "He tries to be strong for me," Devra says. "Mainly," she says, "he's angry."

The one ray of hope for the Williams family came as a result of Devra's and Betty's call to the American Cancer Society. They were told that the National Institutes of Health in Bethesda, Md. is researching NF.

When they received this information, Betty insisted that Devra call immediately. She did and Devra, Nicole and Natasha were accepted by the institute and the three of them left last Wednesday for Bethesda.

Although they were cautioned not to be hopeful of a treatment, this was good news. Like other young couples they live on a tight budget, and although their own doctor has been very understanding, expensive hospital care is not within their means.

Because the three of them are contributing to the research, there is no charge for the services in Bethesda, and the American Cancer Society has provided transportation.

The hope for the future of the Williams family, and others with NF, lies in research. A bill appropriating federal funds for research was introduced in Congress during the last session, but failed to pass and is currently being reintroduced.

Not much for a young family, but right now, it's all they have.

Mr. WEICKER. Mr. President, I am pleased to cosponsor the Orphan Drug Amendments of 1985, which will extend authority for the research and development of drugs for so-called orphan diseases.

The incentive provided by the Orphan Drug Act first passed by the 97th Congress has already increased the efforts being made in research for, and the bringing to market of, new drugs which will alleviate the suffering of people who are afflicted by relatively rare diseases.

This reauthorization will extend the cooperation between Government and the private sector for 3 years, providing authority for the grant and contract program for the research and development of these drugs. The bill also establishes a National Commission on Orphan Diseases that will assess the needs and opportunities for research on rare diseases.

I also want to voice my particular support for my amendment to this bill which will correct a seemingly minor, but very important, drafting error in the fiscal year 1985 Department of Education Appropriations Act. This correction will require no new money, but will allow money already appropriated to be spent on June 1, 1985, instead of July 1, 1985. Unless this correction is made, 705 applications to train personnel involved in providing services to handicapped children will be unnecessarily delayed.

This delay would disrupt training programs, require additional resources, and ultimately impair the quality of services offered to special education children. I commend my colleague from Utah [Mr. HATCH], chairman of the Labor and Human Resources Committee, for assisting in correcting this error.

Mrs. KASSEBAUM. Mr. President, I am extremely pleased to join the chairman of the Senate Labor and Human Resources Committee, Mr. HATCH, in sponsoring the Orphan Drug Amendments of 1985. This legislation will extend a program which has proven to be of enormous benefit to those Americans who suffer from rare diseases and conditions.

As the Senate sponsor of the original Orphan Drug Act, signed into law during the 97th Congress, I am acutely aware of the many problems experienced by victims of rare diseases. The purpose of the Orphan Drug Act is to encourage the development of drugs for the treatment of rare diseases and conditions. These drugs are commonly known as orphan drugs due to the fact that high development and drug approval costs coupled with a small market for their use give these drugs limited commercial value. In the past, even when a promising treatment had been discovered, it was not always made generally available because of the substantial financial loss which would be incurred by its manufacturer.

Fortunately, the situation has now changed. It is gratifying to be associated with a program that works, and I don't think there is any doubt about the success of this act. Since it was signed into law in January 1983, 50 drugs have been designated as drugs for rare diseases. The law itself, while an important component of the progress that has been made, is only a part of the story. The gains we have made thus far could not have been achieved without the aggressive and dedicated support of individuals in both the private and public sectors. There has been so much activity in this area that it becomes difficult to do justice in describing it all. However, I do want to mention some of the contributions which have been made.

The Office for Orphan Products Development of the Food and Drug Administration has sought sponsors for orphan drugs and has provided grant support for clinical trials of orphan products. The National Institutes of Health have also encouraged the submission of research proposals. In addition, the Orphan Products Board within the Department of Health and Human Services has been working diligently in an effort to coordinate activity in this area and to define future policy directions. A National Information Center for Orphan Drugs and Rare Diseases was recently established as a component of the National Health Information Clearinghouse. Last month, the Internal Revenue Service issued proposed regulations to implement the tax credit provisions of the act.

The pharmaceutical industry has also maintained efforts in this area through the Commission on Rare Diseases of the Pharmaceutical Manufacturers Association and the Foundation of the Generic Pharmaceutical Industry Association. A National Orphan Drugs and Devices Foundation has been established to raise private funds for the support of orphan drug research. In addition, rare disease groups and researchers have combined forces under the aegis of the National Organization for Rare Diseases.

The Orphan Drug Amendments of 1985 will both continue and improve

the exciting work which is underway. It will extend for an additional 3 years the authorization of funds for rare disease research. Moreover, this authorization will be expanded to include research at the preclinical stage. It will also amend the act to permit 7-year exclusive marketing rights for all designated orphan drugs. Currently, such exclusive rights are granted only in cases where a drug is not patentable.

Finally, it will establish a National Commission on Orphan Diseases. Composed of research scientists, consumers, and health professionals familiar with rare diseases, the Commission would review activities of the National Institutes of Health, the Food and Drug Administration, and the Alcohol, Mental Health, and Drug Abuse Administration in this area. The purpose of the Commission is to evaluate current research activities in the area of orphan diseases and the use, application, and dissemination of the information gained from the research. In addition, the Commission will examine current processes for offering research support in the area of rare diseases. Due to small research populations and a general lack of familiarity with many rare conditions, researchers face unique problems in conducting and obtaining support for rare disease work.

Thus far, most activity has focused on the further development of drugs which demonstrate promise as a treatment for specific rare diseases. This is an area which deserves priority attention. At the same time, it must be recognized that it does not reflect the full depth of the problem. For a substantial number of rare diseases and conditions, the incentives offered by the Orphan Drug Act are of no immediate value simply because there are no drugs at all known to hold promise for their treatment. There is a great need for research which will enhance scientific understanding of these conditions, thereby establishing a basis upon which appropriate treatments might be developed.

So, our work is cut out for us, but the momentum on behalf of greater strides is clearly present. I urge the support of my colleagues for this effort and hope that the Senate will act quickly in approving it.

Mr. KENNEDY. Mr. President, today, we are introducing amendments to the orphan drug provisions of the Food, Drug, and Cosmetic Act. Since 1982, when these provisions were added, they have been effective in increasing the number of orphan drugs available for the public. With the availability of these drugs has come new hope to those people who suffer from rare diseases. Though none of these rare diseases affect large numbers of people, some are well-known, disabling illnesses. They include cystic fibrosis, amyotropic lateral sclerosis—Lou Gehrig's disease, Huntington's disease, and neurofibromatosis.

The amendments we are now introducing will broaden the existing orphan drug sections of the Food, Drug, and Cosmetic Act, and will create a new commission to study the status of national research efforts into rare disorders. Broadening these sections will complete the task begun in 1982. Under these provisions, the FDA designates orphan drugs and offers technical assistance to companies who wish to research, develop, and market them.

Before 1982, the availability of these medicines was deficient. Because the market for these therapeutic medications was limited, few companies could make the investment necessary to bring such products to market. These orphan products needed to be adopted by companies which would complete research and development and make them commercially available. Since 1982, the mechanisms established by the Orphan Drug Act to stimulate the availability of such drugs have functioned effectively. More products are available to people who need them. Under current law, however, this assistance is limited to unpatented drugs. Our amendments will broaden this provision so it also extends to patented drugs. Under current law, technical assistance from the FDA is available to companies for clinical testing of these products. This legislation will extend that assistance to the preclinical phase of testing.

The amendments we now introduce will also establish a 20-member National Commission on Orphan Diseases to be selected by the Secretary of the Department of Health and Human Services. This Commission will review and assess the research effort on rare diseases made by public and private agencies including the Food and Drug Administration, the National Institutes of Health, and the Alcohol, Drug Abuse, and Mental Health Agency. The Commission will also review the coordination between these agencies, the appropriateness of research priorities, and the effectiveness of grants and contracts used to fund research relating to rare diseases.

Commissioners will include researchers and health care providers, as well as victims of rare disorders or their representatives. One million dollars will be appropriated from the Department of Health and Human Services budget based on an authorization of $4 million in 1986 for this Commission. The Commission will report in 1987 and will terminate 90 days after the submission of its report.

This legislation should extend the work begun in 1982. It says to those victims of rare diseases and to their families that this country will not abandon its commitment to those who suffer from illness because they are burdened with an uncommon affliction. With these amendments, the coordination which was started between the Food and Drug Administration and American industry to provide treatment for the sufferers, will continue and expand. The National Commission will examine the efforts of our researchers, health providers and educators, and will lead the way to future success in solving the mysteries of these disorders and disseminating that information to our citizens.

REMOVAL OF INJUNCTION OF SECRECY

Mr. DOLE. Mr. President, as in executive session, I ask unanimous consent that the injunction of secrecy be removed from the International Telecommunication Convention (Nairobi, 1982) (Treaty Document No. 99-6), which was transmitted to the Senate today by the President of the United States.

I also ask that the treaty be considered as having been read the first time; that it be referred, with accompanying papers, to the Committee on Foreign Relations and ordered to be printed; and that the President's message be printed in the RECORD.

Mr. BYRD. Mr. President, reserving the right to object——

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, I remove my reservation.

The PRESIDING OFFICER. Without objection, it is so ordered.

The message from the President reads as follows:

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the International Telecommunication Convention, with annexes, and a Final Protocol, signed at Nairobi on November 6, 1982.

I transmit also, for the information of the Senate, the report of the Department of State with respect to the Convention.

The International Telecommunication Convention (Nairobi, 1982) abrogates and replaces, in relations between Contracting Governments, the International Telecommunication Convention (Malaga-Torremolinos, 1973) to which the United States is a party.

The International Telecommunication Convention is the basic instrument of the International Telecommunication Union, which provides the framework for the orderly conduct of international telecommunications. It is in the public and commercial interest of the United States to continue to play an active role within this framework.

The International Telecommunication Convention entered into force on

January 1, 1984, for governments that have deposited their instrument of ratification or accession, by diplomatic channel through the intermediary of the Government of Switzerland, with the Secretary General of the International Telecommunication Union.

I believe that the United States should become a party to the International Telecommunication Convention (Nairobi, 1982), and it is my hope that the Senate will take timely action on this matter and give its advice and consent to ratification.

RONALD REAGAN.

THE WHITE HOUSE, *May 15, 1985.*

REPRESENTATION BY SENATE LEGAL COUNSEL IN CRIMINAL ACTION

Mr. DOLE. Mr. President, I send a resolution to the desk, on behalf of myself and the distinguished minority leader, Mr. BYRD, and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 164) to authorize the representation by the Senate Legal Counsel of former Senate employees in the case of *United States* v. *Joseph Matranga, et al.,* Criminal Action No. 84-0569-E.

Mr. DOLE. Mr. President, this is a resolution relating to subpoenas to two former Senate staff members and representation by the Senate Legal Counsel.

Philip R. Manuel, a former member of the staff of the Permanent Subcommittee on Investigations, has received a subpoena to testify and to provide documents at a motion for a new trial in the case of *United States* v. *Matranga, et al.,* Criminal Action No. 84-0569-E, in the U.S. District Court for the Southern District of California. The Senate Legal Counsel has been advised that a second former staff member of the Permanent Subcommittee on Investigations, William B. Gallinaro, is expected to be served with a subpoena for testimony and documents in the same matter.

The defendant is seeking the testimony of Mr. Manuel and Mr. Gallinaro concerning investigations they conducted for the Permanent Subcommittee on Investigations. Senate Resolution 147 of the 99th Congress, 131 Cong. Rec. S4924 (daily ed. April 26, 1985), authorized the Senate Legal Counsel to represent Mr. Manuel and Mr. Gallinaro in a related proceeding. The resolution authorizes the Senate Legal Counsel to represent Mr. Manuel and Mr. Gallinaro in this additional proceeding.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 164) was agreed to, as follows:

S. RES. 164

Whereas, the case of *United States* v. *Joseph Matranga, et al.,* Criminal Action No. 84-0569-E, is pending in the United States District Court for the Southern District of California;

Whereas, the defendant Joseph Matranga has moved for a new trial in that case and has subpoenaed Philip R. Manuel, a former member of the staff of the Permanent Subcommittee in Investigations, to testify and to produce documents;

Whereas, William B. Gallinaro, another former employee of the Permanent Subcommittee on Investigations, is also expected to be served with a subpoena to testify and to produce documents;

Whereas, by the privileges of the Senate of the United States and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by the judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, pursuant to sections 703(a) and 704(a)(2) of the Ethics in Government Act of 1978, 2 U.S.C. §§ 288b(a) and 288c(a)(2) (1982), the Senate may direct the Senate Legal Counsel to defend former employees of the Senate in any proceeding with respect to any subpoena or order directed to them in their former official capacity; Now, therefore be it

Resolved, That the Senate Legal Counsel is directed to defend Philip R. Manuel and William B. Gallinaro with respect to the subpoenas to them in the case of *United States* v. *Joseph Matranga, et al.,* Criminal Action No. 84-0569-E, in the Southern District of California.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TWENTIETH ANNIVERSARY OF HEAD START

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of House Concurrent Resolution 95, commemorating the 20th anniversary of Head Start, which is now being held at the desk.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 95) commemorating the 20th anniversary of Head Start.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the concurrent resolution.

Mr. CRANSTON. Mr. President, on March 7, 1985, I introduced Senate Concurrent Resolution 28, commemorating May 18 as the 20th anniversary of the establishment of the Head Start Program and reaffirming congressional support for this highly cost-effective and successful program. That resolution has been cosponsored by 28 Members of the Senate: Senators STAFFORD, DODD, HATFIELD, KENNEDY, SPECTER, EAGLETON, DURENBERGER, BENTSEN, HOLLINGS, RIEGLE, WEICKER, INOUYE, ANDREWS, CHILES, SARBANES, DOLE, BRADLEY, KERRY, LUGAR, SASSER, NUNN, COCHRAN, METZENBAUM, GORE, DOMENICI, LEVIN, CHAFEE, and STEVENS.

I am pleased to note that Senate Concurrent Resolution 28 was favorably reported yesterday by the Senate Labor and Human Resources Committee.

A companion measure, House Concurrent Resolution 95, was introduced on March 21 by my good friend and colleague from California, the chairman of the House Education and Labor Committee, Representative AUGUSTUS HAWKINS and passed on Monday of this week by the House of Representatives.

I am delighted that the Senate will now be proceeding to consideration of this resolution.

Mr. President, Head Start is clearly one of the most successful, cost-effective, and popular programs ever established by the Federal Government. I am proud to have been closely associated with this program since I first came to the Senate and have sponsored a number of measures to protect and improve this fine program.

HEAD START, ITS BEGINNINGS IN 1965

Mr. President, the history behind the creation of the Head Start Program is as remarkable as the program itself. The original steering committee began its work in January 1965. In a world where committees take months and even years to formulate plans, the Head Start steering committee produced a report and plan of action in 6 weeks. On May 18, 1965, President Johnson held a press conference in the Rose Garden of the White House to announce the new program. President Johnson said on that day:

I believe that this is one of the most constructive, and one of the most sensible, and also one of the most exciting programs that this Nation has ever undertaken.

We have taken up the age-old challenge of poverty and we don't intend to lose generations of our children to this enemy of the human race.

Mr. President, by the end of the summer of 1965, nearly 560,000 low-income preschoolers had been enrolled at some 13,400 Head Start centers in 2,500 communities throughout the country. The launching of a nationwide program in this span of time took the creative contributions of numerous individuals. A group of congressional wives spent hours on the telephone locating organizations in the 300 poorest counties in the United States to sponsor the initial Head Start Programs. Substitute teachers from the District of Columbia school system were brought in to process the

more than 3,000 grant applications which were submitted and to help select the initial sites. Thousands of volunteers throughout the country worked to make the program a success.

KEY ELEMENTS

Mr. President, what began in the summer of 1965 as a 6- to 8-week Summer Demonstration Program soon was transformed into the Head Start Program that we know today—a comprehensive preschool child development program which has served some 9 million low-income preschool children since its creation. Today, more than 400,000 children are enrolled in Head Start programs throughout the Nation. Head Start has been a resounding success. The program's profound impact on the physical, social, and cognitive development of its participating children has been documented by numerous independent evaluations. Head Start's impact has been demonstrated to continue long after the preschool experience. A report prepared as part of the 15th anniversary of the Head Start Program indicated that when such factors as reduced cost of special education and remedial services were considered, Head Start's benefits outweighed its costs by 236 percent. Head Start students have been found to be less likely to need special education and to be less likely to fail a grade, they score significantly higher on mathematics achievement tests and tend to score higher on reading tests, and they show stronger achievement orientation and have higher levels of self-esteem than non-Head Start children.

Although Head Start has made impressive contributions to educational achievement, it has been equally important as a resource of health care and nutritional services. Head Start has always recognized the interrelationship between the health and physical development of a young child and the child's overall development. Head Start's tremendous success has been based, in large part, upon the comprehensiveness of its approach.

Critical to that success has also been the emphasis in Head Start on parental participation. Head Start programs seek to reinforce the ability and responsibility of parents to foster their children's development and have consistently made parental participation a key element in program operation. This has resulted in program operation. This has resulted in an extraordinarily strong involvement of Head Start parents. For every 15 children enrolled in Head Start, 10 parents provide volunteer services to the program. This parental participation has had both an immediate and long-term impact on parents' behavior and attitudes toward their children.

Studies have found that Head Start parents allow their children to help more with household tasks, read to their preschool children more, and show more interest in the development of their children's reading and writing skills. Head Start participation increases the parents' confidence in their own child-rearing abilities, their verbal communication and praise of their children, and their interest in their children's educational future.

Participation in Head Start also provides important benefits for the parents themselves. More than 12,000 Head Start parents have received college training for credit through the Head Start Program. Over the years that I have worked with Head Start programs in California. I have seen parents grow tremendously as a result of their experience with this program and, in turn, make tremendous contributions to society.

CONGRESSIONAL CELEBRATION ON THURSDAY

Mr. President, I want to note that tomorrow evening there will be a congressional reception honoring the Head Start Program and its 20 years of service. The Honorary Chairperson of this event is Mrs. Lyndon B. Johnson, who played such an important role in getting Head Start established. One of the honored guests will be Ms. Luci Baines Johnson who will be there not only as a representative of the Johnson family, but also as a Head Start volunteer for some 20 years. Luci Johnson began her volunteer work in the Head Start Program in Washington, DC, in 1965, working on vision screening of Head Start children. She continued to work with Head Start programs after she returned to Texas.

Sargent Shriver, the first Director of the Office of Economic Opportunity, and one of the catalysts behind the Head Start Program, is the chairman of the reception. He will be introducing many of the people who helped get the Head Start Program started and those who have worked over the years to strengthen and preserve Head Start. We will also be having six honored guests representing former Head Start students and parents. Each of these individuals exemplifies how Head Start has made a real and lasting difference in the lives it has touched.

I am particularly proud to have one of my own constituents, Clara Godbouldt of south central Los Angeles among these honored guests. Clara is a true Head Start success story. When she became a Head Start volunteer 20 years ago, she was an 8th grade dropout with 10 children. Today, through Head Start's college credit and work assistance program, she has a college diploma, a teaching credential, 2 years work toward a law degree and a career in adult education. She speaks from firsthand experience when she has said, "Head Start helps the family by renewing the parents' sense of responsibility to the children and by showing the parents how much they can achieve." Today she teaches the victims of Alzheimer's disease and stroke how to cope with the cruel changes taking place in their minds and bodies. When asked why she went into such difficult and often depressing work, Clara has said, "I wanted to give back to the community what it had given to me through Head Start. All people need is a little help to make it on their own."

Mr. President, that is what Head Start is all about—providing a little help so that people can make it on their own.

CONCLUSION

Mr. President, Head Start is a program which we all can be proud of. It is a program which has fulfilled its promise. It deserves the continued strong support of the Congress.

Mr. KENNEDY. Mr. President, I am pleased that the Senate is acting swiftly and favorably on this resolution to commemorate the 20th anniversary of the Head Start Program. With adoption of this resolution, Congress reaffirms its commitment and support for Head Start and recognizes its success.

Head Start is a comprehensive child development program for disadvantaged children 3 and 4 years old that involves parents, teachers, and volunteers. It provides these children with the necessary health and supportive services they need to get an even start with other children in school. And, it provides parents the resources they need to insure that their children are healthy, physically and developmentally.

Head Start has a proven track record and is cost effective. A recently released 20-year followup of students who attended a preschool program like Head Start showed the positive results of preschool programs. This study told us that compared to their peers who did not have a similar experience, preschool graduates were much more likely to do better on standardized achievement tests, graduate from high school, and go on to college. These preschool graduates were more likely to be working, to spend more time employed after graduation, and to have better paying jobs.

We know that programs such as Head Start work. We know that investment in our children is an investment in our society, a much less costly investment than the one needed when children grow up with health, social, and educational problems. So as we commemorate the anniversary of this successful program for disadvantaged children and celebrate with the program's graduates their success in life, I would hope at the same time that we think about the almost 2 million more children in this country who need the Head Start Program and who are eligible for its services but cannot benefit from it because funding is limited.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution was agreed to.

The preamble was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NATIONAL DOWN SYNDROME MONTH

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Senate Joint Resolution 40.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 40) to designate the month of October 1985 as "National Down Syndrome Month."

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the joint resolution was considered, ordered to be engrossed for a third reading, read the third time and passed.

The preamble was agreed to.

The joint resolution, and the preamble, are as follows:

S.J. RES. 40

Whereas the past decade has brought a greater and more enlightened attitude in the care and training of the developmentally disabled;

Whereas one such condition which has undergone considerable reevaluation is that of Down syndrome—a problem which, just a short time ago, was often stigmatized as a mentally retarded condition which relegated its victims to lives of passivity in institutions and back rooms;

Whereas, through the efforts of concerned physicians, teachers and parent groups such as the National Down Syndrome Congress, programs are being put in place to educate new parents of babies with Down syndrome; to develop special education classes within mainstreamed programs in schools; the provision for vocational training in preparation for competitive employment in the work force and to prepare young adults with Down syndrome for independent living in the community;

Whereas the cost of such services designed to help individuals with Down syndrome move into their rightful place in our society is but a tiny fraction of the cost of institutionalization;

Whereas along with this improvement in educational opportunities for those with Down syndrome is the advancement in medical science which is adding to a more brightened outlook for individuals born with this chromosomal configuration; and

Whereas public awareness and acceptance of the capabilities of children with Down syndrome can greatly facilitate their being mainstreamed in our society: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That October 1985 is designated "National Down Syndrome Month" and that the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe the designated month with appropriate programs, ceremonies and activities.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

LUPUS AWARENESS WEEK

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Senate Joint Resolution 57.

The PRESIDING OFFICER. The joint resolution will be stated by title.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 57) to designate the week of October 20, 1985, through October 26, 1985, as "Lupus Awareness Week."

The PRESIDING OFFICER. Is there objection to the present consideration of the joint resolution?

There being no objection, the joint resolution was considered, ordered to be engrossed for a third reading, read the third time and passed.

The preamble was agreed to.

The joint resolution, and the preamble, are as follows:

S.J. RES. 57

Whereas Lupus Erythematosus is a disease of unknown cause that affects over five-hundred thousand people in the United States, 90 percent of whom are women in their childbearing years;

Whereas Lupus Erythematosus, though not a rare disease, is unfamiliar even to some physicians which may result in the disease being misdiagnosed or diagnosed too late;

Whereas Lupus Erythematosus in the most severe form can be fatal;

Whereas The Lupus Foundation of America, Inc., its constituent chapters, and other voluntary health organizations are established throughout the United States to serve and support victims of lupus and their families, encourage funding for research, and increase public awareness; and

Whereas the public and the Federal Government are not sufficiently aware of the incidence of Lupus Erythematosus: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of October 20, 1985, through October 26, 1985, is designated as "Lupus Awareness Week" and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe the week with appropriate programs, ceremonies, and activities.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SENATE RESOLUTION 125 INDEFINITELY POSTPONED

Mr. DOLE. Mr. President, I ask unanimous consent that Calendar No. 70, Senate Resolution 125, a resolution authorizing expenditures by the Committee on Rules and Administration, be indefinitely postponed.

Mr. BYRD. There is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

HOUSE CONCURRENT RESOLUTION 130 INDEFINITELY POSTPONED

Mr. DOLE. Mr. President, I ask unanimous consent that Calendar No. 107, House Concurrent Resolution 130, a concurrent resolution expressing the sense of the Congress with respect to the President's visit to the Federal Republic of Germany in May 1985, be indefinitely postponed.

Mr. BYRD. There is no objection, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATE CONCURRENT RESOLUTION 28 INDEFINITELY POSTPONED

Mr. DOLE. Mr. President, I ask unanimous consent that Calendar No. 126, Senate Concurrent Resolution 28, a concurrent resolution expressing the sense of Congress that May 18, 1985, should be commemorated as the 20th anniversary of the establishment of the Head Start Program and reaffirming congressional support for the Head Start Program, be indefinitely postponed.

Mr. BYRD. Mr. President, there is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

(During the day routine morning business was transacted and statements were submitted, as follows:)

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations and a treaty which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 1:21 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bills, without amendment:

S. 484. An act to amend the Saccharin Study and Labeling Act; and

S. 661. An act entitled the "George Milligan Control Tower".

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 1157. An Act to authorize appropriations for fiscal year 1986 for certain maritime programs of the Department of Commerce and the Federal Maritime Commission;

H.R. 1784. An Act to authorize appropriations for fiscal year 1986 for the operation and maintenance of the Panama Canal, and for other purposes; and

H.R. 2005. An Act to amend title II of the Social Security Act and related provisions of law to make minor improvements and necessary technical changes.

The message further announced that pursuant to section 136, Public Law 98-473, the Speaker appoints the following minority Members as members of the Commission on the Ukraine Famine on the part of the House: Mr. BROOMFIELD and Mr. GILMAN.

The message also announced that pursuant to the provisions of section 3 of Public Law 94-304, as amended by section 1 of Public Law 99-7, the Speaker appoints Mr. SMITH of New Jersey as an additional member of the Commission on Security and Cooperation in Europe on the part of the House.

The message further announced that pursuant to the provisions of section 4(a) of Public Law 92-484, the Speaker appoints Mr. SUNDQUIST as an additional member of the Technology Assessment Board on the part of the House.

At 3:54 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following Joint resolution, without amendment:

S.J. Res. 103. Joint resolution to designate the month of May 1985, as "Very Special Arts U.S.A. Month".

The message further announced that the House has passed the following joint resolutions, in which it requests the concurrence of the Senate:

H.J. Res. 64. Joint resolution designating Mother's Day, May 12, 1985, to Father's Day, June 16, 1985, as "Family Reunion Month"; and

H.J. Res. 285. Joint resolution designating the week of May 11, 1985, through May 17, 1985, as "Handicapped Awareness Week".

MEASURES REFERRED

The following bills and joint resolutions were read the first and second times by unanimous consent, and referred as indicated:

H.R. 1157. An act to authorize appropriations for fiscal year 1986 for certain maritime programs of the Department of Commerce and the Federal Maritime Commission; to the Committee on Commerce, Science, and Transportation.

H.R. 1784. An act to authorize appropriations for fiscal year 1986 for the operation and maintenance of the Panama Canal, and for other purposes; to the Committee on Armed Services.

H.R. 2005. An act to amend title II of the Social Security Act and related provisions of law to make minor improvements and necessary technical changes; to the Committee on Finance.

H.J. Res. 64. Joint resolution designating Mother's Day, May 12, 1985, to Father's Day, June 16, 1985, as "Family Reunion Month"; to the Committee on the Judiciary.

H.J. Res. 285. Joint resolution designating the week of May 11, 1985, through May 17, 1985, as "Handicapped Awareness Week"; to the Committee on the Judiciary.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1128. A communication from the Director of the Defense Security Assistance Agency transmitting, pursuant to law, a report on a foreign military assistance sale to Switzerland; to the Committee on Armed Services.

EC-1129. A communication from the General Counsel of the Department of Defense transmitting a draft of proposed legislation to eliminate general or flag grade requirements from certain statutory positions; to the Committee on Armed Services.

EC-1130. A communication from the Secretary of Commerce transmitting, pursuant to law, a report on activities respecting the Emergency Striped Bass Research Study; to the Committee on Environment and Public Works.9

EC-1131. A communication from the president of the Overseas Private Investment Corp. transmitting, pursuant to law, the Development and Audit Report of OPIC for fiscal year 1984; to the Committee on Foreign Relations.

EC-1132. A communication from the Director of the U.S. Information Agency transmitting, pursuant to law, an independent evaluation of Cuba service programming; to the Committee on Foreign Relations.

EC-1133. A communication from the Secretary of the Interior transmitting, pursuant to law, the Department's 1984 Freedom of Information Act report; to the Committee on the Judiciary.

EC-1134. A communication from the Director of ACTION transmitting, pursuant to law, ACTION's 1984 annual report; to the Committee on Labor and Human Resources.

EC-1135. A communication from the General Counsel of the General Accounting Office transmitting, pursuant to law, a report on the status of budget authority proposed for rescission but for which a rescission bill has not been passed; jointly, pursuant to the order of January 30, 1975, to the Committees on Appropriations, Budget, Agriculture, Nutrition, and Forestry, Foreign Relations, Commerce, Science, and Transportation, Armed Services, Labor and Human Resources, Energy and Natural Resources, Small Business, Banking, Housing, and Urban Affairs, the Judiciary, Governmental Affairs, Finance, Environment and Public Works, and Veterans' Affairs.

EC-1136. A communication from the Secretary of Commerce transmitting a draft of proposed legislation to repeal the Salmon Vessel Buy-Back Program; to the Committee on Commerce, Science, and Transportation.

EC-1137. A communication from the Acting U.S. Trade Representative transmitting, pursuant to law, a copy of the Decision of the Committee on Trade in Civil Aircraft; to the Committee on Finance.

EC-1138. A communication from the Secretary of the Navy transmitting, pursuant to law, a report on two of the Navy's programs that exceed their baseline unit cost by more than 15 percent; to the Committee on Armed Services.

EC-1139. A communication from the General Counsel of the Department of Defense transmitting a draft of proposed legislation to authorize the United States to collect health plan benefits for medical and dental care provided to dependents, former members, and their dependents in facilities of the uniformed services; to the Committee on Armed Services.

EC-1140. A communication from the Chairman of the Federal Energy Regulatory Commission transmitting, pursuant to law, the Commission's annual report for 1984 on the Government in the Sunshine Act; to the Committee on Governmental Affairs.

EC-1141. A communication from the Chairman of the District of Columbia Law Revision Commission transmitting, pursuant to law, the Commission's 10th annual report; to the Committee on Governmental Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendment:

S. 1141. An original bill relating to certain telephone services for Senators (Rept. No. 99-52).

By Mr. STAFFORD, from the Committee on Environment and Public Works, without amendment:

S. 710. A bill authorizing appropriations to the Secretary of the Interior for services necessary to the nonperforming arts functions of the John F. Kennedy Center for the Performing Arts (Rept. No. 99-53).

By Mr. SIMPSON, from the Committee on Environment and Public Works, with an amendment in the nature of a substitute:

S. 895. A bill to authorize appropriations to the Nuclear Regulatory Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and section 305 of the Energy Reorganization Act of 1974, as amended, and for other purposes (Rept. No. 99-54).

By Mr. PACKWOOD, from the Committee on Finance.

Report to accompany the bill (S. 1114) to approve a trade agreement with Israel nego-

tiated pursuant to the trade agreements program of the United States, and for other purposes (Rept. No. 99-55).

By Mr. GOLDWATER, from the Committee on Armed Services, without amendment:

S. Res. 162. An original resolution waiving section 303(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1029; referred to the Committee on the Budget.

By Mr. DURENBERGER, from the Committee on Environment and Public Works, with amendments:

S. 124. A bill entitled the "Safe Drinking Water Amendments of 1985" (Rept. No. 99-56).

By Mr. DURENBERGER, from the Committee on Environment and Public Works, without amendment:

S. 1143. An original bill to amend the Toxic Substances Control Act to authorize appropriations for fiscal year 1986 (Rept. 99-57); and

S. 1144. An original bill to authorize appropriations for environmental research, development, and demonstrations for the fiscal year 1986 (Rept. No. 99-58).

By Mr. PACKWOOD, from the Committee on Finance, without amendment:

S. 1146. An original bill to authorize appropriations for the United States International Trade Commission, the U.S. Customs Service, and the Office of the U.S. Trade Representative for fiscal year 1986 (Rept. No. 99-59).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. HATCH, from the Committee on Labor and Human Resources:

The following-named persons to be members of the National Council on the Handicapped for the terms indicated:

For a term expiring September 17, 1986:

Jeremiah Milbank, of Connecticut, vice Carmine R. Lavieri, deceased.

For a term expiring September 17, 1987:

Justin W. Dart, Jr., of Texas. (Reappointment.)

Roxanne S. Vierra, of Colorado, to be a member of the National Council on the Handicapped for a term expiring September 17, 1987.

(The above nominations were reported from the Committee on Labor and Human Resources with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. GOLDWATER. Mr. President, from the Committee on Armed Services, I report favorably the following nominations and ask that they be placed on the Executive Calendar.

ROUTINE MILITARY NOMINATIONS WHICH HAVE BEEN PENDING WITH THE SENATE ARMED SERVICES COMMITTEE THE REQUIRED LENGTH OF TIME AND TO WHICH NO OBJECTIONS HAVE BEEN RAISED

1. Lt. Gen. Alexander M. Weyand, U.S. Army (age 56), to be retired; and

2. Maj. Gen. Charles W. Dyke, U.S. Army, to be lieutenant general. (Ref. #257.)

3. Vice Adm. James A. Sagerholm, U.S. Navy (age 57), to be retired. (Ref. #258.)

4. Rear Adm. Kendall E. Moranville, U.S. Navy, to be vice admiral. (Ref. #259.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. COHEN (for himself, Mr. ROTH, Mr. NUNN, Mr. LEVIN, and Mr. CHILES):

S. 1134. A bill to amend title 5, United States Code, to provide administrative civil penalties for false claims and statements made to the United States by certain recipients of property, services, or money from the United States, by parties to contracts with the United States, or by Federal employees, and for other purposes; to the Committee on Governmental Affairs.

By Mr. COHEN:

S. 1135. A bill to amend section 3729 of title 31, United States Code, to increase the amount of the civil penalty authorized for false claims; to the Committee on the Judiciary.

By Mr. STAFFORD (for himself and Mr. LEAHY):

S. 1136. A bill to authorize the U.S. Army Corps of Engineers to undertake certain activities at dams operated by the Corps of Engineers in the State of Vermont; to the Committee on Environment and Public Works.

By Mr. SPECTER:

S. 1137. A bill entitled the "Conrail Public Offering Act of 1985"; to the Committee on Commerce, Science, and Transportation.

By Mr. GRASSLEY (for himself, Mr. DOMENICI, Mr. METZENBAUM, Mr. HEFLIN, and Mr. DECONCINI):

S. 1138. A bill to reenact and amend former section 504 of title 5, United States Code, and former section 2412(d) of title 28, United States Code, with respect to awards of expenses of certain agency and court proceedings, and for other purposes: to the Committee on the Judiciary.

By Mr. BURDICK (for himself and Mr. ANDREWS):

S. 1139. A bill to authorize construction of a combined Sheyenne and Maple River Flood Control Project; to the Committee on Environment and Public Works.

By Mr. METZENBAUM (for himself, Mr. THURMOND, and Mr. DECONCINI):

S. 1140. A bill to amend the antitrust laws in order to preserve and promote wholesale and retail competition in the retail gasoline market and to protect the motoring safety of the American public; to the Committee on the Judiciary.

By Mr. MATHIAS, from the Committee on Rules and Administration:

S. 1141. An original bill relating to certain telephone services for Senators; placed on the calendar.

By Mr. DOLE (for himself, Mr. BOSCHWITZ, Mr. LEAHY, Mr. DANFORTH, and Mr. ANDREWS):

S. 1142. A bill to improve and extend certain domestic food assistance programs, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. DURENBERGER, from the Committee on Environment and Public Works:

S. 1143. An original bill to amend the Toxic Substances Control Act to authorize appropriations for fiscal year 1986; placed on the calendar.

S. 1144. An original bill to authorize appropriations for environmental research, development, and demonstrations for the fiscal year 1986; placed on the calendar.

By Mr. LEVIN (for himself, Mr. GRASSLEY, Mr. DOLE, Mr. BOREN, Mr. THURMOND, Mr. LAXALT, Mr. HATCH, Mr. SIMPSON, Mr. DENTON, and Mr. DECONCINI):

S. 1145. A bill to increase the accountability of, policy coordination by, and management of priorities by agencies through an improved mechanism for congressional oversight of the rules of agencies; to the Committee on the Judiciary.

By Mr. PACKWOOD, from the Committee on Finance:

S. 1146. An original bill to authorize appropriations for the U.S. International Trade Commission, the U.S. Customs Service, and the Office of the United States Trade Representative for fiscal year 1986; placed on the calendar.

By Mr. DOLE (for Mr. HATCH (for himself, Mr. KENNEDY, Mrs. KASSEBAUM, Mr. QUAYLE, Mr. WEICKER, Mr. STAFFORD, Mr. DENTON, Mr. SARBANES, Mr. WALLOP, Mr. METZENBAUM, Mr. HEINZ, Mr. LEAHY, Mr. INOUYE, Mr. SIMON, Mr. COHEN, Mr. THURMOND, Mr. CRANSTON, Mr. KERRY, Mrs. HAWKINS, Mr. ROTH, Mr. RIEGLE, Mr. NICKLES, Mr. PELL, and Mr. MATSUNAGA)):

S. 1147. A bill to amend the orphan drug provisions of the Federal Food, Drug, and Cosmetic Act and related laws; placed on the calendar.

By Mr. HATFIELD (for himself, Mr. FORD, Mr. DOLE, Mr. JOHNSTON, Mr. MCCLURE, Mr. HOLLINGS, Mr. ABDNOR, Mr. METZENBAUM, Mr. BUMPERS, Mr. MOYNIHAN, Mr. PACKWOOD, Mr. COCHRAN, Mr. THURMOND, Mr. BURDICK, Mr. CRANSTON, Mr. WALLOP, Mr. LAUTENBERG, and Mr. ZORINSKY):

S.J. Res. 136. Joint resolution to authorize and request the President to issue a proclamation designating the calendar week beginning with Sunday, April 13, 1986, as "National Garden Week"; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. GOLDWATER, from the Committee on Armed Services:

S. Res. 162. An original resolution waiving section 303(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1029; to the Committee on the Budget.

By Mr. HUMPHREY:

S. Res. 163. A resolution expressing the sense of the Senate with respect to the protection of the human fetus from organic pain experienced during abortion procedures which do not utilize anesthetics or analgesics; to the Committee on the Judiciary.

By Mr. DOLE (for himself and Mr. BYRD):

S. Res. 164. A resolution to authorize the representation by the Senate Legal Counsel of former Senate employees in the case of *"United States* v. *Joseph Matranga, et al."* Criminal Action No. 84-0569-E; considered and agreed to.

By Mr. HEINZ (for himself, Mr. PRYOR, Mr. SYMMS, and Mr. MATSUNAGA):

S. Res. 165. A resolution to urge the President of the United States and the Secretary of the Treasury to reject any tax reform proposal which would impose a tax on the annual increase in the value of permanent life insurance; to the Committee on Finance.

STATEMENT ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. COHEN (for himself, Mr. ROTH, Mr. NUNN, Mr. LEVIN, and Mr. CHILES):

S. 1134. A bill to amend title 5, United States Code, to provide administrative civil penalties for false claims and statements made to the United States by certain recipients of property services, or money from the United States, by parties to contracts with the United States, or by Federal employees, and for other purposes; to the Committee on Governmental Affairs.

PROGRAM FRAUD CIVIL PENALTIES ACT

● Mr. COHEN. Mr. President, today Senator ROTH, who is a leader in the Senate in the fight against waste and fraud in government, and I are introducing the Program Fraud Civil Penalties Act of 1985. This legislation provides agencies with an administrative remedy for false, fictitious, or fraudulent claims and statements under $100,000 that the Justice Department has declined to prosecute. We are pleased to the have Senators LEVIN, NUNN, AND CHILES as cosponsors.

Present law provides criminal and civil penalties for false claims and criminal penalties for false statements. The imposition of these sanctions, however, requires the Justice Department to initiate and conclude a criminal or civil suit in Federal court. Because the Justice Department focuses its prosecutorial efforts on those false claim and statement cases in which the Government has suffered a substantial and identifiable monetary loss, the Government is often left without an adequate remedy for small-dollar false claims and statements.

In fact, the General Accounting Office found that many such cases fall through the cracks of our judicial system. According to a 1981 GAO report, entitled "Fraud in Government Programs: How Extensive Is It? How Can It Be Controlled?," over 77,000 fraud cases allegedly were committed against the Government during a 3-year period. Of those cases referred to the Justice Department, however, less than 40 percent were prosecuted. GAO further noted that the Justice Department, when it did take action, failed to consider appropriate civil remedies to make the Government whole for the loss suffered.

By failing to prosecute nearly 60 percent of its false claim and statement cases, the Government not only loses money but also public confidence in its programs. Even when no money is actually lost as the result of a false claim or statement, such as when food stamps are used to purchase-prohibited items or a nonveteran obtains a VA guaranteed home loan, the integrity of the program is seriously undermined.

Worse yet, GAO found that fraud is not limited to any one program or agency, but is pervasive Government-wide—ranging from fraud in benefit and assistance programs, such as food stamps, welfare, and student loans, to mortgage insurance programs, corp subsidy programs, disaster relief programs, and the like.

Fraud is also endemic to Government contracting, according to Joseph Sherrick, the Defense Department Inspector General, who recently testified that 45 of the Nation's 100 largest defense contractors are under investigation by the Defense Department. Mr. Sherrick has characterized the industry's attitude as "we stole it fair and square." Last year, Mr. Sherrick estimated that his Department alone loses more than $1 billion a year through fraudulent billing practices, the most common being improper overhead expenses charged against Government contracts.

While the indictment of General Electric and the continuing saga of General Dynamics are visible examples of the problems in Government contracting, the more typical fraud case involves fewer dollars, draws little public attention, and is therefore less likely to be prosecuted.

This failure to prosecute, some believe, is the result of a prosecutorial resource problem; that is, the Justice Department needs more resources to investigate and prosecute these false claim and statement cases under existing laws. But providing more resources to DOJ would not, alone, solve the problem. From a cost-benefit perspective, the cost of litigating a small-dollar fraud case will almost always exceed the benefits of recovery, thus making it economically impractical for the Justice Department to go to court.

An example is the case of the DOD contracting officer who falsified the need to award a sole-source contract and, in collusion with the contractor, wrote the Department's sole-source justification for the award. The Justice Department declined prosecution, primarily because the Defense Department discovered the scheme before the contract was actually awarded, even though a conspiracy to defraud the Government was clearly evident.

In another case, the Naval Investigative Service identified over $600,000 in fraudulent overpayments on a base maintenance contract. The contractor was found to have deliberately overbilled the Navy on numerous items, but because of evidentiary problems, a decision was made to seek criminal prosecution on only $25,000 in false claims. The Justice Department subsequently determined that $25,000 was too small an amount to justify prosecution, and the case was declined for both criminal and civil action.

These are examples of cases that typically fall through the judicial cracks and would be subject to the administrative remedy authorized by the Program Fraud Civil Penalties Act. The purposes of the act are to recompense agencies for losses resulting from false claims and statements that would not otherwise be prosecuted, to penalize those who submit false claims and statements, and to deter such fraudulent behavior in the future.

In my judgment, and in the judgment of the Justice Department, Inspectors General, and the General Accounting Office, such an administrative remedy for small-dollar fraud cases is long overdue.

Under the Program Fraud Civil Penalties Act, a typical case would begin with an investigation conducted by the agency's investigating official (the Inspector General, where statutorily authorized). Any findings would be transmitted to the agency's reviewing official, who would be designated by the agency head to determine whether there is probable cause to conclude that a false, fictitious, or fraudulent claim or statement has been submitted.

If so, the matter would be referred to the Justice Department for consideration. The allegations of liability would then be referred to the agency's hearing examiner (usually an administrative law judge) for a hearing only if the Attorney General or a designated Assistant Attorney General either approves the referral or takes no action to disapprove it. Once the Justice Department in effect declines prosecution, the reviewing official would notify the person alleged to be liable that a hearing will be held. Short of going through with a hearing, however, the reviewing official would be authorized under the bill to compromise or settle any allegations of liability against a person up to the time that the hearing examiner issues a decision.

After the matter has gone through these requisite steps, a hearing would be conducted to determine whether or not the person is liable and the amount of penalty and assessment to be imposed, if any. A person is found liable under the bill if he or she "knows or has reason to know" that the claim or statement submitted is false, fictitious, or fraudulent. The hearing examiner's determination is based on a "preponderance of the evidence," the standard applied in most civil litigation and administrative proceedings. The penalty, if the person is found liable, would be up to $10,000 for each false claim or statement plus double the amount claimed.

The hearing itself will be conducted "on the record," which brings into

play the due process safeguards of the Administrative Procedure Act (APA). A person alleged to be liable under the bill is entitled to written notice of the allegations, as well as an opportunity to be heard. At the hearing, the person has the right to be present, to be represented by counsel, and to present evidence in his or her own behalf. The separation of investigatory and review functions provided for in the bill ensures impartiality.

In addition to the APA protections, persons alleged to be liable under the bill would also be afforded limited discovery rights to the extent that the hearing examiner determines that such discovery is necessary for the expeditious, fair, and reasonable consideration of the issues. Finally, the person would have the right of judicial review by the U.S. Court of Appeals.

The beauty of this administrative mechanism is that we already know it can work—both expeditiously and fairly. Under the Civil Monetary Penalties Law [CMPL], enacted as part of the 1981 Omnibus Budget Reconciliation Act, the Department of Health and Human Services is authorized to impose penalties and assessments against health-care providers who knowingly or with reason to know submit claims for services not provided as claimed.

The HHS inspector general, Richard Kusserow, has testified that, prior to the enactment of the CMPL, there was simply no effective sanction in many Medicare and Medicaid fraud cases, particularly when it appeared that the cost of pursuing these cases through the courts exceeded the amount of damages or the probable recovery by the Government. Since implementation of the CMPL, HHS has been able to recoup over $11 million resulting from 117 settlements. Last month, in the first decided case under CMPL, an administrative law judge imposed a civil penalty and assessment of $156,136 against a person found liable for filing false Medicaid claims.

In past years, major defense contractors and the Public Contract Law Section of the American Bar Association have successfully resisted efforts to establish a governmentwide administrative proceeding for handling small-dollar false claims and statements. In drafting the Program Fraud Civil Penalties Act, we endeavored to accommodate those of their concerns which we felt were legitimate. The most significant revisions include: First, rewriting the liability section to link the knowledge requirement with the falsity of the claims and statements and to exclude legitimate contract disputes; Second, strengthening the due process protections afforded to persons subject to the administrative proceedings by spelling out the specific protections provided by the Administrative Procedure Act and by providing limited discovery rights to the affected party; and Third, including a section to clarify that a determination of probable cause or liability resulting from the administrative proceeding may be grounds for commencing a subsequent administrative action, that is; debarment, suspension, or other disciplinary action, but will not serve as an automatic trigger for taking such an action.

On this last point, major Government contractors and the contract section of the ABA have been particularly concerned with the connection between the Program Fraud Civil Penalties Act proceeding and suspension or debarment proceedings. Since this issue will no doubt be subject to much debate over the coming months, I thought that I would explain how our legislation attempts to deal with this issue.

The first policy question we addressed is whether an agency should be able to commence debarment or suspension proceedings based on a determination of probable cause or liability pursuant to the Program Fraud Civil Penalties Act. I believe so. The second, and more pertinent, question is whether a determination of probable cause or liability should trigger—in effect, be the sole determinant of—a suspension or debarment. Definitely not. As the Federal Acquisition Regulations on debarment state, the existence of a cause for debarment does not necessarily require that the contractor be debarred.

A suspension or debarment proceeding, while also administrative, is separate and distinct from the Program Fraud Civil Penalties Act proceeding. Agencies impose debarments or suspensions to protect the Government's interests, not for the purpose of punishment. In a suspension or debarment proceeding, the contractor's present responsibility, mitigating factors, and the seriousness of the offense are all considered by the debarring official. In other words, the determination of probable cause or liability pursuant to the Program Fraud Civil Penalties Act may be considered in a suspension or debarment proceeding, but by no means would be the only factor considered.

On May 23, the Governmental Affairs Subcommittee on Oversight of Government Management has scheduled a hearing to consider the Program Fraud Civil Penalties Act. We plan to receive testimony from the Justice Department, the Inspectors General of the Department of Defense and the Department of Health and Human Services, the Public Contract Law Section of the American Bar Association, and a defense contracting association. I am hopeful that, given this balanced presentation, we will be able to resolve the issues that have hampered past efforts to establish a much-needed administrative mechanism for handling small-dollar false claims and statements.

On a final note, I believe that it is critical to emphasize that the Program Fraud Civil Penalties Act would not penalize conduct which currently is regarded as proper—only fraudulent conduct which should be penalized but is not. As long as the Government continues to tolerate these "nickel and dime" frauds, the problem will only worsen. And, as we all know, nickels and dimes add up to big dollars, as well as subtract from the integrity of our programs. The Program Fraud Civil Penalties Act represents our effort to halt these small-dollar frauds, and I urge my colleagues to lend their support.

Mr. President, I ask unanimous consent that the bill and a fact sheet on the Program Fraud Civil Penalties Act be included in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1134

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Program Fraud Civil Penalties Act of 1985".

SEC. 2. (a) The Congress finds that—

(1) false, fictitious, and fraudulent claims and statements in Government programs are a serious problem;

(2) false, fictitious, and fraudulent claims and statements in Government programs result in the loss of millions of dollars annually by allowing ineligible persons to receive Federal funds to which they are not entitled;

(3) false, fictitious, and fraudulent claims and statements in Government programs undermine the integrity of such programs by allowing ineligible persons to participate in such programs; and

(4) present civil and criminal remedies for such claims and statements are not sufficiently responsive.

(b) The purposes of this Act are—

(1) to provide Federal agencies which are the victims of false, fictitious, and fraudulent claims and statements with an administrative remedy to recompense such agencies for losses resulting from such claims and statements, to penalize persons who make, present, or submit such claims and statements, and to deter the making, presenting, and submitting of such claims and statements in the future; and

(2) to provide due process protections to all persons who are subject to the adjudication of administrative penalties for false, fictitious, or fraudulent claims or statements.

SEC. 3. (a) Title 5, United States Code, is amended by inserting after chapter 7 the following new chapter:

"CHAPTER 8—ADMINISTRATIVE PENALTIES AND ASSESSMENTS FOR FALSE CLAIMS AND STATEMENTS

"Sec.
"801. Definitions.
"802. False claims and statements; liability.
"803. Hearing and determinations.
"804. Subpoena authority.
"805. Judicial review.

"806. Collection of civil penalties and assessments.
"807. Limitations.
"808. Regulations.
"809. Reports.

"§ 801. Definitions

"(a) For purposes of this chapter—

"(1) 'authority' means—

"(A) an executive department;

"(B) an establishment (as such term is defined in section 11(2) of the Inspector General Act of 1978) which is not an executive department; and

"(C) the United States Postal Service;

"(2) 'authority head' means—

"(A) the head of an authority; or

"(B) an official or employee of the authority designated, in regulations promulgated by the head of the authority, to act on behalf of the head of the authority;

"(3) 'claim' means any request or demand—

"(A) made to an authority for property, services, or money (including money representing grants, loans, insurance, or benefits); or

"(B) made to a recipient of property, services, or money from an authority or to a party to a contract with an authority—

"(i) for property or services if the United States—

"(I) provided such property or services;

"(II) provided any portion of the funds for the purchase of such property or services; or

"(III) will reimburse such recipient or party for the purchase of such property or services; or

"(ii) for the payment of money (including money representing grants, loans, insurance, or benefits) if the United States—

"(I) provided any portion of the money requested or demanded; or

"(II) will reimburse such recipient for any portion of the money paid on such request or demand;

"(4) 'statement' includes any written representation, certification, document, record, or accounting or bookkeeping entry—

"(A) with respect to a claim; or

"(B) with respect to—

"(i) a contract with, or a bid or proposal for a contract with;

"(ii) a grant, loan, or benefit from;

"(iii) an application for insurance from; or

"(iv) an application for employment with,

an authority, or any State, political subdivision of a State, or other party acting on behalf of, or based upon the credit or guarantee of, an authority;

"(5) 'person' means any individual, partnership, corporation, association, or private organization;

"(6) 'investigating official' means—

"(A) in the case of an authority in which an Office of Inspector General is established by the Inspector General Act of 1978 or by any other Federal law, the Inspector General of that authority; or

"(B) in the case of an authority in which an Office of Inspector General is not established by the Inspector General Act of 1978 or by any other Federal law, any officer or employee of the authority designated by the authority head to conduct investigations under section 803(a)(1) of this title;

"(7) 'reviewing official' means any officer or employee of an authority—

"(A) who is designated by the authority head to make the determination required under section 803(a)(2) of this title; and

"(B) who, if a member of the armed forces on active duty, is serving in grade O–7 or above or, if a civilian, is serving in a position for which the rate of basic pay is not less than the minimum rate of basic pay for grade GS-16 or above under the General Schedule; and

"(8) 'hearing examiner' means any officer or employee of an authority—

"(A) who is appointed by the authority head in the same manner as administrative law judges are appointed pursuant to section 3105 of this title; and

"(B) who, if a member of the armed forces on active duty, is serving in grade O–7 or above or, if a civilian, is serving in a position for which the rate of basic pay is not less than the minimum rate of basic pay for grade GS-16 or above under the General Schedule.

"(b) For purposes of paragraph (3) of subsection (a)—

"(1) each voucher, invoice, claim form, or other individual request or demand for property, services, or money constitutes a separate claim whether made, presented, or submitted separately or together with other claims;

"(2) each request or demand for property, services, or money constitutes a claim regardless of whether such property, services, or money is actually delivered or paid; and

"(3) a claim shall be considered made, presented, or submitted to an authority, recipient, or party when such claim is made to an agent, fiscal intermediary, or other entity, including any State or political subdivision thereof, acting for or on behalf of such authority, recipient, or party.

"(c) For purposes of paragraph (4) of subsection (a)—

"(1) each written representation or certification constitutes a separate statement whether made, presented, or submitted separately or together with other statements; and

"(2) a statement shall be considered made, presented, or submitted to an authority although such statement is actually made to an agent, fiscal intermediary, or other entity, including any State or political subdivision thereof, acting for or on behalf of such authority.

"§ 802. False claims and statements; liability

"(a)(1) Any person who, on or after the effective date of this chapter, makes, presents, or submits, or causes to be made, presented, or submitted, a claim that the person knows or has reason to know—

"(A) is false, fictitious, or fraudulent;

"(B) includes or is supported by any statement which violates paragraph (2) of this subsection; or

"(C) is for payment for the provision of property or services which the person has not provided as claimed,

shall be subject to, in addition to any other penalty that may be prescribed by law, a civil penalty of not more than $10,000 for each such claim. Such person shall also be subject to an assessment, in lieu of damages sustained by the United States because of such claim, of not more than twice the amount of such claim.

"(2) Any person who, on or after the effective date of this chapter, makes, presents, or submits, or causes to be made, presented, or submitted, a statement that the person knows or has reason to know—

"(A) asserts a material fact which is false, fictitious, or fraudulent; or

"(B)(i) omits a material fact,

"(ii) as a result of such omission, such statement is false, fictitious, or fraudulent, and

"(iii) the person making, presenting, or submitting such statement has a duty to include such material fact in the statement,

shall be subject to, in addition to any other penalty that may be prescribed by law, a civil penalty of not more than $10,000 for each such statement. In the case of a statement relating to a claim for money, such person shall also be subject to an assessment, in lieu of damages sustained by the United States because of such statement, of not more than twice the amount of such claim.

"(b)(1) Except as provided in paragraph (2) of this subsection, a determination of—

"(A) probable cause that a person is liable under section 803(a)(2) of this title, or

"(B) liability under section 803 of this title,

may provide the authority with grounds for commencing any administrative or contractual action against such person which is authorized by law and which is in addition to any action against such person under this chapter.

"(2) A determination referred to in paragraph (1) of this subsection may be used by the authority, but shall not require such authority, to commence any administrative or contractual action which is authorized by law.

"§ 803. Hearing and determinations

"(a)(1) The investigating official of an authority may investigate allegations that a person is liable under section 802 of this title and shall report the findings and conclusions of such investigation to the reviewing official of the authority.

"(2) If the reviewing official of an authority determines, based upon the report of the investigating official under paragraph (1) of this subsection, that there is probable cause to believe that a person is liable under section 802 of this title, the reviewing official may, in accordance with the provisions of subsections (b) and (c) of this section, refer the allegations of such liability to a hearing examiner of such authority for a hearing.

"(b)(1) Prior to referring allegations of liability to a hearing examiner under paragraph (1) of subsection (a), the reviewing official of an authority shall transmit to the Attorney General a written notice of the intention of such official to refer such allegations and a statement of the reasons for such intention.

"(2) A reviewing official may refer allegations of liability to a hearing examiner under paragraph (1) of subsection (a) if—

"(A) the Attorney General or an Assistant Attorney General designated by the Attorney General approves the referral of such allegations; or

"(B) the Attorney General or an Assistant Attorney General designated by the Attorney General takes no action to disapprove the referral of such allegations within—

"(i) ninety days after the date on which the Attorney General receives the notice required by paragraph (1) of this subsection; or

"(ii) such period as may be provided in a memorandum of understanding entered into by the authority head and the Attorney General with respect to such allegations.

"(3) A reviewing official shall not refer allegations to a hearing examiner under paragraph (1) of subsection (a) if the Attorney General or an Assistant Attorney General designated by the Attorney General transmits a written statement to the reviewing official which specifies that the Attorney General or such Assistant Attorney General disapproves the referral of such allegations and states the reasons for such disapproval.

"(4) If the Attorney General or an Assistant Attorney General designated by the At-

torney General transmits to an authority head a written finding that the continuation of any hearing under section 803 of this title may adversely affect any pending or potential criminal or civil action related to an alleged false, fictitious, or fraudulent claim or statement under consideration in such hearing, such hearing shall be immediately stayed and may be resumed only upon written authorization of the Attorney General.

"(c) No allegations of liability under section 802 of this title with respect to any claim or statement, made, presented, or submitted by any person shall be referred to a hearing examiner under paragraph (1) of subsection (a) if the reviewing official determines that the amount of money or the value of property or services falsely, fictitiously, or fraudulently requested or demanded in such claim or statement exceeds $100,000.

"(d) A reviewing official shall commence a hearing under subsection (e) of this section by mailing by registered or certified mail, or by delivery, of a notice which complies with the provisions of paragraph (2)(A) of subsection (f) to the person alleged to be liable under section 802 of this title.

"(e) The hearing examiner shall conduct a hearing on the record regarding any allegation referred to the hearing examiner by the reviewing official pursuant to subsection (a) of this section to determine—

"(1) the liability of a person under section 802 of this title; and

"(2) the amount of any penalty and assessment to be imposed on such person.

Any such determination shall be based on the preponderance of the evidence.

"(f)(1) Each hearing under subsection (e) of this section shall be conducted in accordance with—

"(A) the provisions of subchapter II of chapter 5 of this title (to the extent that such provisions are not inconsistent with the provisions of this chapter); or

"(B) procedures promulgated by the authority head under paragraph (2) of this subsection.

"(2) An authority head shall by regulation promulgate procedures for the conduct of hearings under this chapter. Such procedures shall include:

"(A) The provision of written notice of the hearing to any person alleged to be liable under section 802 of this title, including written notice of—

"(i) the time, place, and nature of the hearing;

"(ii) the legal authority and jurisdiction under which the hearing is to be held;

"(iii) the matters of facts and law to be asserted; and

"(iv) a description of the procedures for the conduct of hearing established under this paragraph or established under subchapter II of chapter 5 of this title, as the case may be.

"(B) The provision to any person alleged to be liable under section 802 of this title of opportunities for the submission of facts, arguments, offers of settlement, or proposals of adjustment when time, the nature of the hearing, and the public interest permit.

"(C) Procedures to ensure that the hearing examiner shall not, except to the extent required for the disposition of ex parte matters as authorized by law—

"(i) consult a person or party on a fact in issue, unless on notice and opportunity for all parties to the hearing to participate; or

"(ii) be responsible to or subject to the supervision or direction of the investigating official or the reviewing official.

"(D) Procedures to ensure that the investigating official and the reviewing official do not participate or advise in the decision required under subsection (g) of this section or the review of the decision by the authority head under subsection (h) of this section, except as provided in subsection (i) of this section.

"(E) The provision to any person alleged to be liable under section 802 of this title of opportunities to present such person's case through oral or documentary evidence, to submit rebuttal evidence, and to conduct such cross-examination as may be required for a full and true disclosure of the facts.

"(F) Procedures to permit discovery by any person alleged to be liable under section 802 of this title only to the extent that the hearing examiner determines that such discovery is necessary for the expeditious, fair, and reasonable consideration of the issues.

"(G) Procedures to permit any person alleged to be liable under section 802 of this title to be accompanied, represented, and advised by counsel or such other qualified representative as the authority head may specify in such regulations.

"(H) Procedures to ensure that the hearing is conducted in an impartial manner, including procedures to—

"(i) permit the hearing examiner to at any time disqualify himself;

"(ii) permit the filing, in good faith, of a timely and sufficient affidavit of personal bias or other disqualification of a hearing examiner or reviewing official; and

"(iii) provide for the determination by the authority head of a matter filed pursuant to clause (ii) of this subparagraph as a part of the record and decision in the hearing.

"(g) The hearing examiner shall issue a written decision, including findings and determinations, after the conclusion of the hearing. The hearing examiner shall promptly send to each party to the hearing a copy of such decision and a statement describing the right of any person determined to be liable under section 802 of this title to appeal the decision of the hearing examiner to the authority head under paragraph (2) of subsection (h).

"(h)(1) Except as provided in paragraph (2) of this subsection and section 805 of this title, the decision, including the findings and determinations, of the hearing examiner issued under subsection (g) of this section are final.

"(2) Within thirty days after the hearing examiner issues a decision under subsection (g) of this section, any person determined in such decision to be liable under section 802 of this title may appeal such decision to the authority head. The authority head may affirm, reduce, compromise, remand, or settle any penalty and assessment determined by the hearing examiner pursuant to this section. The authority head shall promptly send to each party to the appeal a copy of the decision of the authority head and a statement describing the right of any person determined to be liable under section 802 of this title to judicial review under section 805 of this title.

"(i) The reviewing official has the exclusive authority to compromise or settle any allegations of liability under section 802 of this title against a person without the consent of the hearing examiner at any time prior to the date in which the hearing examiner issues a decision under subsection (g) of this section. Any such compromise or settlement shall be in writing.

"§ 804. Subpoena authority

"(a) For the purposes of an investigation under section 803(a) of this title, an investigating official is authorized—

"(1) to administer oaths or affirmations;

"(2) to require by subpoena the production of all information, documents, reports, answers, records, accounts, papers, and data not otherwise reasonably available to the authority; or

"(3) after notifying the Attorney General, to require by subpena the attendance and testimony of witnesses necessary to the conduct of such investigation.

"(b) For the purposes of conducting a hearing under section 803(e) of this title, a hearing examiner is authorized—

"(1) to administer oaths or affirmations; and

"(2) to require by subpena the attendance and testimony of witnesses and the production of all information, documents, reports, answers, records, accounts, papers, and other data and documentary evidence which the hearing examiner considers relevant and material to the hearing.

"(c) In the case of contumacy or refusal to obey a subpena issued pursuant to subsection (a) or (b) of this section, an investigating official or a hearing examiner, as the case may be, may invoke the aid of any district court of the United States in the district in which such investigation or hearing is being conducted, or where the person receiving the subpena resides or conducts business. The district courts of the United States shall have jurisdiction to issue an appropriate order for the enforcement of any such subpena. Any failure to obey such order of the court is punishable by such court as contempt.

"§ 805. Judicial review

"(a) Unless a petition is filed under this section, a determination of liability under section 803 of this title shall be final and shall not be subject to judicial review.

"(b)(1) Any person for whom a determination of liability under section 802 of this title has been made pursuant to section 803 of this title may obtain review of such determination in the United States Court of Appeals for the circuit in which such person resides or in which the claim or statement upon which the determination of liability is based was made, presented, or submitted, or in the United States Court of Appeals for the District of Columbia Circuit. Such review may be obtained by filing in any such court a written petition that such determination be modified or set aside. Such petition shall be filed—

"(A) only after such person has exhausted all administrative remedies under this chapter; and

"(B) within sixty days after the date on which the authority head sends such person a copy of the decision of such authority head under section 803(h)(2) of this title.

"(2) The clerk of the court shall transmit a copy of a petition filed under paragraph (1) of this subsection to the authority head and to the Attorney General. Upon receipt of the copy of such petition, the authority head shall transmit to the Attorney General the record in the proceeding resulting in the determination of liability under section 802 of this title. Except as otherwise provided in this section, the courts of appeals of the United States shall have jurisdiction to review the decision, findings, and determinations in issue and to affirm, modify, remand for further consideration, or set aside, in whole or in part, the decision, find-

ings, and determinations of the hearing examiner, and to enforce such decision, findings, and determinations to the extent that such decision, findings, and determinations are affirmed or modified.

"(c) The findings of the hearing examiner with respect to questions of fact, if supported by substantial evidence on the record considered as a whole, shall be conclusive.

"(d) Any court of appeals reviewing under this section the decision, findings, and determinations of a hearing examiner shall not consider any objection that was not raised in the hearing conducted pursuant to section 803(e) of this title unless a demonstration is made of extraordinary circumstances causing the failure to raise the objection. If any party demonstrates to the satisfaction of the court that additional evidence not presented at such hearing is material and that there were reasonable grounds for the failure to present such evidence at such hearing, the court shall remand the matter to the hearing examiner for consideration of such additional evidence.

"(e) Upon a final determination by the court of appeals that a person is liable under section 802 of this title, the court shall enter a final judgment for the appropriate amount in favor of the United States, and such judgment may be recorded and enforced by the Attorney General to the same extent and in the same manner as a judgment entered by any United States district court.

"§ 806. Collection of civil penalties and assessments

"(a) The Attorney General shall be responsible for judicial enforcement of any civil penalty or assessment imposed pursuant to the provisions of this chapter.

"(b) Any penalty or assessment imposed in a determination which has become final pursuant to section 803 of this title may be recovered in a civil action brought by the Attorney General. In any such action, no matter that was raised or that could have been raised in a hearing conducted under section 803(e) of this title or pursuant to judicial review under section 805 of this title may be raised as a defense, and the determination of liability and the determination of amounts of penalties and assessments shall not be subject to review.

"(c) The district courts of the United States and of any territory or possession of the United States shall have jurisdiction of any action commenced by the United States under subsection (b) of this section.

"(d) Any action under subsection (b) of this section may, without regard to venue requirements, be joined and consolidated with or asserted as a counterclaim, crossclaim, or setoff by the United States in any other civil action which includes as parties the United States and the person against whom such action may be brought.

"(e)(1) The United States Claims Court shall have jurisdiction of any action under subsection (b) of this section to recover any penalty and assessment if the cause of action is asserted by the United States as a counterclaim in a matter pending in such court. The United States may join as additional parties in such counterclaim all persons who may be jointly and severally liable with the person against whom such counterclaim is asserted.

"(2) No cross-claims or third-party claims not otherwise within the jurisdiction of the United States Claims Court shall be asserted among additional parties joined under paragraph (1) of this subsection.

"(f) The Attorney General shall have exclusive authority to compromise or settle any penalty and assessment the determination of which is the subject of a pending petition pursuant to section 805 of this title or a pending action to recover such penalty or assessment pursuant to this section.

"(g) Any amount of penalty and assessment collected under this chapter shall be deposited as miscellaneous receipts in the Treasury of the United States.

"§ 807. Limitations

"(a) No claim or statement alleged to be a false, fictitious, or fraudulent claim or statement shall be subject to liability under section 802 of this title at any time after six years after the date on which such claim or statement is made, presented, or submitted.

"(b) A civil action to recover a penalty and assessment under section 806 of this title shall be commenced within three years after the date on which the determination of liability for such penalty and assessment becomes final.

"(c) If at any time during the course of proceedings brought pursuant to this chapter the authority head receives or discovers any specific information regarding bribery, gratuities, conflict of interest, or other corruption or similar activity in relation to a false claim or statement, the authority head shall immediately report such information to the Attorney General, and in the case of an authority in which an Office of Inspector General is established by the Inspector General Act of 1978 or by any other Federal law, to the Inspector General of that authority.

"§ 808. Regulations

"(a) Each authority head shall promulgate rules and regulations necessary to implement the provisions of this chapter. Such rules and regulations shall insure that investigating officials are not responsible for conducting the hearing required in section 803(e) of this title, making the determinations required by subsections (e) and (g) of section 803 of this title, or making the collections under section 806 of this title.

"(b) The Attorney General may enter into a memorandum of understanding with the head of any authority to provide expeditious procedures for approving or disapproving the referral of allegations under section 803(b) of this title and for referral of matters for action under sections 805, 806, and 807(d) of this title. Such memorandum of understanding may provide advanced authorization to refer allegations under section 803(b) of this title with respect to any particular type or class of alleged false claims or statements if not otherwise barred by section 807 of this title.

"§ 809. Reports

"(a) Not later than October 31 of each year, each investigating official shall prepare and transmit to the authority head an annual report summarizing actions taken under this chapter during the most recent twelve-month period ending the previous September 30. Such report shall include—

"(1) a summary of matters referred to the reviewing official under section 803(a)(2) of this title during such period;

"(2) a summary of matters transmitted to the Attorney General under section 803(b)(1) of this title during such period;

"(3) a summary of all hearings conducted by hearing examiners under section 803(e) of this title, and the results of such hearings, during such period; and

"(4) a summary of the actions taken during such period to collect any civil penalty or assessment imposed under this chapter.

"(b) The authority head shall transmit each report received under subsection (a) of this section to the appropriate committees and subcommittees of Congress in the same manner as the reports of Inspectors General are transmitted under section 5(b) of the Inspector General Act of 1978 on October 31 of each year.".

(b) The table of chapters for part I of title 5, United States Code, is amended by inserting after the item relating to chapter 7 the following new item:

"8. Administrative Penalties and Assessments for False Claims and Statements ..... 801.".

SEC. 4. (a) Except as provided in subsection (b), this Act and the amendments made by this Act shall take effect 180 days after the date of enactment of this Act.

(b) Section 808(a) of title 5, United States Code (as added by section 3(a) of this Act) shall take effect on the date of enactment of this Act. Regulations required to be promulgated under such section 808(a) shall take effect 180 days after the date of enactment of this Act.

PROGRAM FRAUD CIVIL PENALTIES ACT FACTSHEET

The Program Fraud Civil Penalties Act provides agencies with an administrative remedy for handling false, fictitious, or fraudulent claims and statements under $100,000 that the Justice Department has declined to prosecute.

PROBLEM

While present law provides criminal and civil penalties for false claims and statements, the imposition of these penalties requires the Justice Department to file suit in federal court. Of the cases referred to DoJ, however, a 1981 GAO study found that less than 40 percent were prosecuted.

By failing to prosecute these cases, the government not only loses money but also public confidence in its programs. Even when no money is actually lost as the result of a false claim or statement, the integrity of the program is seriously undermined.

The GAO found that fraud is pervasive government-wide—ranging from fraud in benefit and assistance programs, such as food stamps, welfare, and student loans, to mortgage insurance programs, crop subsidy programs, and disaster relief programs.

Fraud is also endemic to government contracting, according to Joseph Sherrick, DoD IG, who recently testified that 45 of the nation's largest 100 defense contractors are under investigation by the Defense Department. Mr. Sherrick has estimated that his Department loses more than $1 billion a year through fraudulent billing practices.

DoJ's failure to prosecute is not a resource problem as much as it's a cost-benefit problem: the cost of litigating a small-dollar fraud case will almost always exceed the benefits of recovery, thus making it economically impractical for DoJ to go to court.

SOLUTION

The Justice Department, Inspectors General and the General Accounting Office all agree that an administrative remedy for handling false claim and statement cases under $100,000, as provided by the Program Fraud Civil Penalties Act, is long overdue.

The purposes of the Act are to recompense agencies for losses resulting from false claims and statements that would not

otherwise be prosecuted, to penalize those who submit false claims and statements, and to deter such fraudulent behavior in the future.

Under the Act, a typical case would begin with an investigation by the agency's investigatory official (the Inspector General, where statutorily authorized). Any findings would be transmitted to the agency's reviewing official, who is designated by the agency head to determine whether there is probable cause to conclude that a false claim or statement has been submitted.

If so, the matter would be referred to the Justice Department for consideration. The allegations of liability would only then be referred to the agency's hearing examiner (usually an administrative law judge) for a hearing if the Attorney General (or his designee) declines prosecution.

After the matter has gone through these requisite steps, a hearing would be conducted to determine whether or not the person is liable and the amount of the penalty and assessment to be imposed, if any.

A person is found liable under the bill if he or she "knows or has reason to know" that the claim or statement submitted is false. The hearing examiner's determination is based on a "preponderance of the evidence," the standard applied in most civil litigation and administrative proceedings. The penalty, if the person is found liable, would be up to $10,000 for each false claim or statement plus double the amount claimed.

A similar administrative mechanism has already been proven effective. Under the 1981 Civil Monetary Penalties Law, the Department of Health and Human Services is authorized to impose penalties and assessments against health-care providers who knowingly or with reason to know submit claims for services not provided as claimed. Since 1981, HHS has been able to recoup over $11 million resulting from 117 settlements.●

● Mr. ROTH. Mr. President, today Senator COHEN and I are introducing the Program Fraud Civil Penalties Act, a bill I introduced in the 98th Congress, which will provide the tools needed by Federal agencies to crack down on those who attempt to defraud the taxpayers by submitting false claims and false statements to the Government.

As chairman of the Committee on Governmental Affairs and the Permanent Subcommittee on Investigations, I have observed over and over again the extent to which unscrupulous individuals and companies have bilked the U.S. Treasury out of many thousands of dollars at a time through the use of fraudulent claims and statements. But when I have asked what was being done to punish the responsible persons and to deter others from similar actions, I have been told that often the answer is "nothing." I have gotten this response not only from the agencies themselves, but also from the various inspectors general, the General Accounting Office, and even from the Department of Justice.

The problem, Mr. President, is that current Federal efforts to control fraud against the Government are primarily directed toward those cases involving the filing of criminal and civil actions by the Justice Department. Unfortunately, the costs involved in prosecuting such cases are high, and the resources available are limited, so that only those cases which have the greatest potential for recovery are given attention. Most of the false claim and false statement cases involving program benefit and contract fraud, even though collectively adding up to many thousands of dollars, are simply allowed to fall through the cracks because of limited funds and time to pursue them.

Let me cite just two examples of cases investigated by agency inspectors general which would be covered by this legislation:

Recently an employee of the Federal Aviation Administration was accused of submitting false information in connection with a worker's compensation claim which resulted in his receiving some $48,000 more than he was entitled to. He was investigated and charged with violating the Criminal False Claims and False Statements Acts. The responsible U.S. attorney's office, however, declined to prosecute the case because of a lack of case law in the area.

In another case, a Government contractor responsible for providing painting services on a Defense Department installation charged the Government thousands of dollars for work which was not performed. Because the fraud was discovered before the contractor received payment, the Justice Department chose not to prosecute the contractor for submission of false claims to the Government.

The Program Fraud Civil Penalties Act is designed to create an administrative mechanism which provides full due process for the accused but which also enables Federal agencies to impose monetary penalties against those who submit false claims and false statements.

Mr. President, the American public is, quite frankly, fed up with a system which allows Federal beneficiaries and contractors to knowingly cheat and deceive the Government and yet, if caught, escape with no more punishment than having to pay back what they stole from the taxpayers. The people deserve a system that works effectively to deter such fraud and to penalize it when it does occur.

This legislation will create such a system. It will enable agencies to swiftly and justly deal with cases of false claims and false statements. Under this bill, those found guilty of submitting false, fictitious, or fraudulent claims or statements in amounts of less than $100,000 can be fined not more than $10,000 for each claim or statement and, in addition, can be assessed an amount equal to double the amount fraudulently claimed.

Mr. President, this legislation is long overdue. When enacted, it will save the taxpayers countless thousands of dollars, and it will substantially increase the integrity of virtually every program administered by the Federal Government. I urge my colleagues to join with Senator COHEN and myself in supporting the Program Fraud Civil Penalties Act.●

● Mr. LEVIN. Mr. President, I am pleased today to join with Senator COHEN and Senator ROTH as a cosponsor of the Program Fraud Civil Penalties Act.

This legislation is very much needed. As was mentioned by Senators COHEN and ROTH, a GAO study conducted in 1981 revealed that Government program fraud has become a serious problem pervading all areas of Government operation. In addition, we are all too familiar with the fraud problems that sometimes appear to permeate Government contracting.

Although the Justice Department, under current law, can pursue cases of fraud in Federal court, for several reasons, the Justice Department has not been able to pursue a significant number of these cases. As a result many cases valued at less than $100,000 are not prosecuted. Further, the agencies involved in these cases do not have the authority to pursue these cases in Federal court, nor do they have an adequate administrative remedy available to them to address these cases.

The failure to pursue these cases results in a financial loss to the Government and the public. And although many of the cases involve relatively small-dollar amounts, cumulatively these cases account for millions of dollars.

In a time when everyone is looking for ways to reduce the budget deficit and cut the cost of operating the Government, legislation that would save money by reducing and deterring fraud without affecting the quality of service provided to the Government and the public is vitally important and very timely. The Program Fraud Civil Penalties Act is such a piece of legislation. The act would provide agencies with an administrative procedure to pursue fraud cases with a dollar value under $100,000. The agencies would also have the authority to impose a penalty of not more than $10,000, for each false claim or statement, plus double the amount claimed.

While the act provides agencies with a remedy to address fraud cases, it also provides due process protection to any party prosecuted under its provisions.

The Program Fraud Civil Penalties Act, if enacted, will be an effective weapon against not only reducing and deterring fraud in Government programs and contracts, but saving millions of dollars that are needlessly

adding to an enormous budget deficit.●

By Mr. COHEN:

S. 1135. A bill to amend section 3729 of title 31, United States Code, to increase the amount of the civil penalty authorized for false claims; to the Committee on the Judiciary

FALSE CLAIMS ACT AMENDMENTS

● Mr. COHEN. Mr. President, today I am also proposing, as a separate measure, an amendment to the civil False Claims Act that would increase the forfeiture liability under the act from $2,000 to $10,000.

Presently, the False Claims Act authorizes the United States to recover $2,000, plus double damages, from those persons who knowingly submit a false or fraudulent claim for money or property to the United States, or from those who knowingly submit false information in support of a false or fraudulent claim.

The $2,000 forfeiture amount has remained unchanged since it was set by Congress in 1863. According to the Bureau of Labor Statistics, the current value of $2,000 in 1863 dollars is $16,816. I therefore believe that the penalty should be modestly increased to $10,000 to reflect the inflationary impact over the past 120 years.●

By Mr. STAFFORD (for himself and Mr. LEAHY):

S. 1136. A bill to authorize the U.S. Army Corps of Engineers to undertake certain activities at dams operated by the Corps of Engineers in the State of Vermont; to the Committee on Environment and Public Works.

SALMON LADDER LEGISLATION

● Mr. STAFFORD. Mr. President, I am today introducing legislation that will direct the U.S. Army Corps of Engineers to construct certain facilities on the West River in Vermont. These facilities are essential if we are to allow Atlantic salmon to swim up and down the West River, bypassing two large Corps of Engineers dams on that river during a life-cycle that takes the salmon from fresh water to the sea and back.

I am particularly honored that my distinguished colleague [Mr. LEAHY] has agreed to cosponsor this bill.

Mr. President, the history of the Atlantic salmon in the Connecticut River Valley is a most interesting one. Salmon were driven from the Connecticut River almost two centuries ago, when a dam was built across the river at Turners Falls, MA. That occurred in 1798.

An effort was made to reintroduce salmon to the Connecticut River following the Civil War. That effort failed, leaving this great river devoid of this wonderful species of fish.

But as a result of Federal legislation 20 years ago, the Atlantic salmon has been brought back to the Connecticut River. This is good news for the ecology of the Connecticut River; it is good news for sportsmen.

Yet the situation is far more complicated than it was in 1798, or during the 19th century. Many dams have been built on the Connecticut and its tributaries. Without modification, each of these dams blocks the salmon from their natural and historic spawning grounds, then blocks young salmon from swimming back to the sea. Two of these dams—these barriers—are located on the West River in Vermont; both are operated by the Army Corps of Engineers. This bill makes it possible for man to help the salmon get around those man-built barriers.

As I mentioned, the latest effort to return salmon to the Connecticut River began with passage of the Anadromous Fish Act in 1965. By 1967, a fisheries agency was set up for the Connecticut River, consisting of representatives of the four States—Vermont, New Hampshire, Massachusetts, and Connecticut—together with the regional directors of two Federal fisheries agencies. Since last year, their work has been carried on by the 10-member Connecticut River Atlantic Salmon Commission, which was established by Public Law 98-138 to oversee the revival of the salmon, as well as the revival of a shad population.

The commission's goal: Restore the Atlantic salmon to five key Connecticut River tributaries. Two of these are in Connecticut, one is in New Hampshire, and two—the West and the White Rivers—are in Vermont. The commission's second goal is to return the American shad to its historic spawning grounds below Bellows Falls VT.

As a result of several agreements, two private power companies have modified their large hydropower dams on the mainstem of the Connecticut, allowing both species of fish to migrate upstream.

The first dam that required work is located at Holyoke, MA. Two large fish lifts were put into operation there in 1976. A fish lift, incidentally, is just what it sounds like. It is a large hopper, about 6 feet across, with a device to attract the fish. When the fish reach the lift, an operator closes a gate, and the hopper lifts 2,000 gallons of water, plus dozens and dozens of fish, about 50 feet to a sluiceway, where the fish swim over the top of the dam into the reservoir beyond.

At Turners Falls, MA., conventional fish ladders were completed in 1980. New England Power completed a fish ladder at its dam at Vernon, VT, in 1981. The utilities, which have done a fine job, are still working with fisheries officials to improve the efficiency of these projects. By 1984, a new fish ladder had been completed at Bellows Falls, VT.

Thus, by this spring, Atlantic salmon have been able to reach the mouths of both the White and the West Rivers.

The White, which is a somewhat larger and more fertile river, poses no real problem. There are dams on tributaries of the White, but salmon have access to the main stem, as well as several unobstructed tributaries. All of these stretches show promise as spawning grounds.

And the salmon have access to the mouth of the West River. Unfortunately, the salmon cannot reach the shallower stretches of the West and its tributaries that would serve as spawning grounds. The reason is the prescence of Townshend and Ball Mountain Dams.

Following a good deal of study, Federal and State fish and wildlife experts have determined that the best solution is this:

Install a fish trap on the downstream side of Townshend Dam. Remove the migrant fish from the river, then transport them by truck to points above Townshend Dam and above Ball Mountain Dam. Years earlier, fish and game officials will have marked the baby salmon, so the lift operator will know where to place the fish so their instinct will allow them to reach their proper spawning ground.

The design of the dams make construction of conventional fish ladders quite difficult; the fish trap appear to be a far more cost-effective approach. I understand further that the baby salmon can migrate out of the West to the sea without too much danger, although some modifications in the sluiceways at both dams will be necessary, and is authorized in this bill.

In preparation for this work, and the changes already in place downstream, fish and game officials began to stock salmon into parts of the West River in 1981. The salmon fingerlings were able to move downriver to the sea, despite sluiceways that caused some deaths. This population of salmon, now in the Atlantic, is expected to return to the West River within a year or two. Unless something is done quickly, these adult salmon will reach the base of Townshend Dam and confront an impossible barrier to those stretches of the river where instinct draws them to spawn. This bill will, in effect, remove that unnatural barrier.

Fisheries experts calculate that the West River can annually handle about 630 adult salmon, out of 5,570 salmon expected to return to spawn annually throughout the entire Connecticut River system by the year 1992.

While fishing is not permitted now, I should point out that sports fisherman may evantually be allowed to hook up to 25 percent of the year run.

The program I have outlines in this bill takes this cost-effective approach. I am advised that a fish-trap system at

Townshend and downstream facilities, particularly at Ball Mountain, will have a total cost of about $1 million, and that it will cost about $20,000 a year to operate.

My bill authorized construction of the fish trap system, as well as the operation and maintenance of that facility. Such costs are a legitimate Federal responsibility, since the project was constructed originally by the Federal Government.

The State of Vermont is presently discussing the possible development of hydropower facilities at both dams. It would certainly be appropriate if, as a part of the licensing process, the responsibility for operating the salmon transportation program, once it is in place, is transferred to any power licensee. For now, the responsibility for operations and maintenance will be assumed by the corps.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1136

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the comprehenisve plan for the control of floodwaters in the Connecticut River Basin, Vermont, New Hampshire, Massachusetts, and Connecticut, authorized by Section 5 of the Flood Control Act of 1936 (49 Stat. 1570, 1572), as amended, is amended further to authorize and direct the Secretary of the Army, acting through the Chief of Engineers, to design, construct, operate, and maintain facilities at Townshend Dam, West River, Vermont, to enable upstream migrant adult Atlantic salmon to bypass that dam and Ball Mountain Dam, Vermont, and to provide at both Townshend and Ball Mountain Dams facilities as necessary for the downstream passage of juvenile Atlantic salmon.

SEC. 2. Prior to construction of the work authorized by this Act, non-Federal interests shall agree to hold and save the United States harmless for any damages incurred in the construction and operation of such fish-passage facilities, and provide all lands, easements, rights-of-way, and relocations as may be reasonably necessary for the construction and operation of the fish-passage facilities.

SEC. 3. There is authorized to be appropriated to the Secretary of the Army, acting through the Chief of Engineers, in the fiscal year ending September 30, 1986, or thereafter, the sum of $1,000,000 for the construction of facilities authorized by Section 1 of this Act, such sums to remain available until expended.●

By Mr. SPECTER:

S. 1137. A bill entitled the "Conrail Public Offering Act of 1985;" to the Committee on Commerce, Science, and Transportation.

CONRAIL PUBLIC OFFERING ACT

Mr. SPECTER. Mr. President, today I am introducing the Conrail Public Offering Act of 1985. This bill provides that any disposition of the Government's 85-percent interest in the Consolidated Rail Corporation shall proceed by public stock offering in accordance with the proposal presented by Morgan Stanley & Co., Inc., on May 14, 1985.

The Morgan Stanley proposal to return Conrail to broad public ownership—an alternative which I have supported for almost 1 year—provides the most effective assurance for the long-term viability of Conrail's rail system. The proposal avoids the anticompetitive problems contained within the proposed sale/merger of Conrail/Norfolk Southern, ensures a greater return to the Government and taxpayers—who have already invested in excess of $7 billion in the modernization of the Conrail system—and allows all taxpayers the opportunity to invest in Conrail's future, as opposed to giving away the system to Norfolk Southern.

I have been concerned about the sale of Conrail since June 1984 when final proposals were submitted by private bidders. I believed then that these proposals had potentially serious consequences for my State, the Commonwealth of Pennsylvania. Through exhaustive analysis over the last year, I have become convinced that a sale of Conrail to Norfolk Southern will also have harmful consequences for the entire Nation.

I reached my conclusions after a lengthy and detailed investigation. This investigation included extensive consultations with labor and business leaders; numerous discussions with the Secretary of Transportation, Elizabeth Dole; review of voluminous documents; and seven hearings that I have conducted on this subject. These hearings were held in Harrisburg in October, Philadelphia in December and March, Pittsburgh in January and February, and in Washington, DC, with Senator DIXON and the Northeast-Midwest Senate coalition in January and February. I heard the testimony of more than 55 witnesses, including shippers, public officials, competing bidders, investment bankers, union leaders, and Conrail management and financial officers.

I have also visited Conrail car repair shops and shipping facilities throughout Pennsylvania—the hundreds of concerned workers and union officials with whom I spoke on these visits further convinced me that it would be strongly contrary to the national interest, as well as the best interest in Pennsylvania, to proceed with the proposed sale of Conrail to Norfolk Southern.

The proposed purchase price by Norfolk Southern of $1.2 billion for the Government's 85-percent interest in Conrail represents a huge giveaway of taxpayers' money—Norfolk Southern will be able, through tax benefits, to recoup that minor investment in a few short years. Given the taxpayers' expenditure of over $7 billion in Conrail, Conrail's present book value of $4 billion, and the fact that Conrail has in excess of $1 billion in cash and annual profits of over $500 million, the Norfolk Southern sale price is outrageous. The Morgan Stanley proposal guarantees at least the $1.2 billion, which will be to the benefit of the public investors, rather than one private interest group, and further provides that up to $600 million more will be realized by the government, through elimination of the tax losses which would result from the Norfolk Southern offer.

Further, the anticompetitive problems raised by combining Conrail's 15,000 miles of track with Norfolk Southern's 18,000 miles, thereby creating the Nation's largest rail system, are insurmountable. The Senate Judiciary Committee, on which I serve, has conducted several hearings on this topic, and plans to investigate the subject even further. The divestiture plan proposed by the Department of Justice as a remedy to specified antitrust violations is not feasible. It is unrealistic to divert key lines to small carriers such as Guilford Transportation or the Pittsburgh & Lake Erie Railroad, which will be unable to provide effective competition for the combined rail giant of the Conrail/Norfolk Southern system. No such anticompetitive problems exist with the Morgan Stanley public offering proposal.

The Morgan Stanley proposal, involving approximately 25 "blue-chip" investors—such as Citicorp, Columbia, Harvard and Princeton Universities, United States Steel, and Rockefeller & Co.—is a commitment which represents the strongest testimony to the economic viability of Conrail and its future as a major independent rail carrier. The investors have accepted public interest covenants equivalent to those negotiated by the Department of Transportation and Norfolk Southern, including provisions relating to cash balances, dividends, and capital expenditures. One of the major investors, CSX Corp., is a major rail system, but it will place its stock interest in trust to ensure that it will not participate in the management or control of Conrail, and that no antitrust problems will arise.

Over a period of time, not to exceed 5 years following the purchase, the investor group will resell to the public a majority of its interest in Conrail through one or more public stock offerings. The Government will bear no market risk associated with future sales of Conrail stock. At the conclusion of such offerings, the investor group will own no more than 40 percent of an independent, financially secure Conrail, with no single investor owning more than 10 percent. Conrail employees will receive a comprehen-

sive financial package valued at approximately $440 million as compared to $375 million contained in the Norfolk Southern offer, and will also receive two seats on Conrail's board of directors.

This proposal provides taxpayers with a superior return for their investment in Conrail and, at the same time, preserves effective rail competition in the Northeast and Midwest without creating any complex antitrust issues requiring legislative resolution. This proposal will result in a financially strong and independent Conrail, thus ensuring long-term employment opportunities for Conrail workers. This proposal will better meet the interests of taxpayers, Conrail current and former employees, shippers, and consumers. Further, it satisfies the financial and public interest factors identified by the Department of Transportation in establishing a process for the sale of Conrail under the Northeast Rail Service Act of 1981.

For these reasons, I introduce this bill today and ask unanimous consent that the bill be printed in the RECORD. There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1137

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress finds that—

(1) the United States has invested more than $7,000,000,000 in the Consolidated Rail Corporation since April 1, 1976;

(2) the Consolidated Rail Corporation generated over $500,000,000 in profits in 1984;

(3) the Consolidated Rail Corporation has a book value in excess of $4,000,000,000;

(4) the Consolidated Rail Corporation has cash assets in excess of $1,000,000,000; and

(5) the United States Railway Association has determined that the Consolidated Rail Corporation is a profitable carrier as defined in section 403(a)(2) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 763(a)(2)).

SEC. 2. (a) Notwithstanding any provision of law, any disposition of the government's interest in the Consolidated Rail Corporation shall proceed by public stock offering in accordance with the proposal presented by Morgan Stanley & Co., Incorporated on May 14, 1985.

By Mr. GRASSLEY (for himself, Mr. DOMENICI, Mr. METZENBAUM, Mr. HEFLIN, and Mr. DECONCINI):

S. 1138. A bill to reenact and amend former section 504 of title 5, United States Code, and former section 2412(d) of title 28, United States Code, with respect to awards of expenses of certain agency and court proceedings, and for other purposes; to the Committee on the Judiciary.

EQUAL ACCESS TO JUSTICE ACT

Mr. GRASSLEY. Mr. President, it is my pleasure today to introduce a bipartisan bill I am cosponsoring with Senators DOMENICI, METZENBAUM, HEFLIN and DECONCINI, to reauthorize and make permanent the Equal Access to Justice Act [EAJA]. This important regulatory reform measure expired on October 1, 1984 and needs urgent reenactment. As you may recall, efforts to reauthorize this law were unanimously passed in this body near the end of the 98th Congress. However, much to my disappointment, the President vetoed the measure on November 8 after Congress had adjourned.

As you know, the EAJA allows eligible individuals and small businesses to recover attorney fees up to $75 per hour, and other expenses when they prevail in litigation with the Federal Government, unless the Government can prove that its conduct was substantially justified, or that special circumstances make a fee award unjust.

The EAJA has provided a critical avenue of redress for small businesses and individuals with limited assets who are forced to litigate against the vast resources of the Federal Government. Before this landmark legislation was first enacted in 1980, these parties were faced with a "Hobson's" choice—either to fight unjustified Government enforcement or regulatory actions at great personal or financial cost, or to simply capitulate in the face of the meritless action. The law has worked rather well in its 3-year test period, and has done so at minimal cost to the Government. For example, in its first 3-years, the EAJA has allowed about $3 million in fee awards, about 1 percent of the law's original cost estimate. Additionally, there is evidence that the law has had a positive effect on the regulatory and enforcement actions of the Federal bureaucracy.

This particular bill is the product of much thoughtful negotiation between Members of Congress, the administration, and interested parties. The Justice Department has testified in support of a nearly identical bill, H.R. 2223, in the other body. Thus we are assured that this is a bill that the President will sign into law. The EAJA reauthorization also makes a number of important clarifications and improvements in the law. First, the bill clarifies that when deciding whether a prevailing party shall be awarded fees, a court or adjudicative officer shall evaluate both the Government's arguments made in the litigation and the agency action that made it necessary for the private party to seek relief. This clarification resolves a judicial conflict that had developed over the meaning of the term "position of the United States" in the EAJA. Some Federal courts had in effect ruled that the Government could insulate itself from attorney fee liability simply by conceding its error on the merits at the time of trial. An action that is always a justified litigation position. Of course, such a restrictive interpretation of the law removes the very incentive for careful agency action that Congress hoped to create in 1980. At the same time, this bill adequately addresses the administration's stated concerns over unbridled discovery of the agency's deliberative processes. As a safeguard against excessive discovery, the bill directs courts considering fee applications to look only to the record developed on the merits of the case. Second, the bill makes the EAJA applicable to cases litigated before agency boards of contract appeals. Third, the bill makes clear that the U.S. Claims Court is a court with jurisdiction to make a fee award. Fourth, the bill makes EAJA's coverage retroactive to October 1, 1984, thus ensuring that no meritorious claimant is left without redress, simply due to last year's failure at EAJA reauthorization.

The one difference between this EAJA reauthorization and the bill introduced in the other body is purely a technical one. Since the EAJA expired, it is necessary for us to reenact the entire measure rather than to simply make amendments to the 1980 law, as the other bill does. I expect that the other body will make this necessary clarification in its EAJA bill as it moves through the markup process.

Although it is critical that we move quickly to reauthorize and make permanent the EAJA, we should also be mindful of other areas where further reform is necessary, to redress the imbalance of litigation resources between private citizens and the Government. For example, the actions of the Internal Revenue Service are not covered by EAJA, and are not covered by this bill. Instead, the attorney fee provisions of the 1982 Tax Equity and Fiscal Responsibility Act [TEFRA] apply. The TEFRA fees provision differs from the EAJA in three critical ways: TEFRA allows evaluation of only the Government's litigation conduct, rather than the IRS action that led to the lawsuit; it allows the Government to avoid a fee award of its conduct was merely reasonable rather than substantially justified, and it places the burden of proof in the fee case on the prevailing taxpayer to provide that the Government was not only wrong, but also unreasonable. In my view, the TEFRA provisions are too easily applied to deny a meritorious taxpayer of attorney fee award, after he or she has proven the IRS wrong. Making the IRS live up to the standards of conduct that all other Federal agencies must live up to is an issue that I will address in the Finance Committee. The TEFRA fee provision expires at the end of 1985.

Also, I am concerned about the consistently low number of cases at the administrative adjudication level that

result in fee awards. In fiscal year 1984 for example, only 13 awards were made, out of 143 fee applications filed by prevailing parties. In the previous year, there were only 8 awards, out of 88 petitions filed. The chances of a fee recovery at the agency level have been much lower than that in the Federal courts. The reasons for this need to be explored. There has been a further complaint that certain agencies have engaged in a policy of unnecessary litigation tactics, designed solely to force concessions on the fee issue. This is an area in which I plan continued oversight.

In summary, Mr. President, this bill continues, and indeed improves upon, a working initiative first passed in the 96th Congress. I urge its speedy enactment.

Mr. President, I ask that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1138

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subchapter I of chapter 5 of title 5, United States Code, is amended by reenacting section 504, repealed by Public Law 96-481, between section 503 and section 505 and amending such section to read as follows:

"§ 504. Costs and fees of parties

"(a)(1) An agency that conducts an adversary adjudication shall award, to a prevailing party other than the United States, fees and other expenses incurred by that party in connection with that proceeding, unless the adjudicative officer of the agency finds that the position of the agency was substantially justified or that special circumstances make an award unjust. Whether or not the position of the agency was substantially justified shall be determined on the basis of the administrative record, as a whole, which is made in the adversary adjudication for which fees and other expenses are sought.

"(2) A party seeking an award of fees and other expenses shall, within thirty days after a final disposition in the adversary adjudication, submit to the agency an application which shows that the party is a prevailing party and is eligible to receive an award under this section, and the amount sought, including an itemized statement from any attorney, agent, or expert witness representing or appearing in behalf of the party stating the actual time expended and the rate at which fees and other expenses were computed. The party shall also allege that the position of the agency was not substantially justified. When the United States appeals the underlying merits of an adversary adjudication, no decision on an application for fees and other expenses in connection with that adversary adjudication shall be made under this section until a final and unreviewable decision is rendered by the court on the appeal or until the underlying merits of the case have been finally determined pursuant to the appeal.

"(3) The adjudicative officer of the agency may reduce the amount to be awarded, or deny an award, to the extent that the party during the course of the proceedings engaged in conduct which unduly and unreasonably protracted the final resolution of the matter in controversy. The decision of the adjudicative officer of the agency under this section shall be made a part of the record containing the final decision of the agency and shall include written findings and conclusions and the reason or basis therefor. The decision of the agency on the application for fees and other expenses shall be the final administrative decision under this section.

"(b)(1) For the purposes of this section—

"(A) 'fees and other expenses' includes the reasonable expenses of expert witnesses, the reasonable cost of any study, analysis, engineering report, test, or project which is found by the agency to be necessary for the preparation of the party's case, and reasonable attorney or agent fees. The amount of fees awarded under this section shall be based upon prevailing market rates for the kind and quality of the services furnished, except that (1) no expert witness shall be compensated at a rate in excess of the highest rate of compensation for expert witnesses paid by the agency involved, and (ii) attorney or agent fees shall not be awarded in excess of $75 per hour unless the agency determines by regulation that an increase in the cost of living or a special factor, such as the limited availability of qualified attorneys or agents for the proceedings involved, justifies a higher fee;

"(B) 'party' means a party, as defined in section 551(3) of this title, who is (i) an individual whose net worth did not exceed $2,000,000 at the time the adversary adjudication was initiated, or (ii) any owner of an unincorporated business, or any partnership, corporation, association, unit of local government, or organization, the net worth of which did not exceed $7,000,000 at the time the adversary adjudication was initiated, and which had not more than 500 employees at the time the adversary adjudication was initiated; except that an organization described insection 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)(3)) exempt from taxation under section 501(a) of such Code, or a cooperative association as defined in section 15(a) of the Agricultural Marketing Act (12 U.S.C. 1171j(a)), may be a party regardless of the net worth of such organization or cooperative association;

"(C) 'adversary adjudication' means (i) an adjudication under section 554 of this title in which the position of the Untied States is represented by counsel or otherwise, but excludes an adjudication for the purpose of establishing or fixing a rate or for the purpose of granting or renewing a license, and (ii) any appeal of a decision made pursuant to section 6 of the Contract Disputes Act of 1978 (41 U.S.C. 605) before an agency board of contract appeals as provided in section 8 of that Act (41 U.S.C. 607);

"(D) 'adjudicative officer' means the deciding official, without regard to whether the official is designated as an administrative law judge, a hearing officer or examiner, or otherwise, who presided at the adversary adjudication; and

"(E) 'position of the agency' means, in addition to the position taken by the agency in the adversary adjudication, the action or failure to act by the agency upon which the adversary adjudication is based; except that fees and other expenses may not be awarded to a party for any portion of the adversary adjudication in which the party has unreasonably protracted the proceedings.

"(2) Except as otherwise provided in paragraph (1), the definitions provided in section 551 of this title apply to this section.

"(c)(1) After consultation with the Chairman of the Administrative Conference of the United States, each agency shall by rule establish uniform procedures for the submission and consideration of applications for an award of fees and other expenses. If a court reviews the underlying decision of the adversary adjudication, an award for fees and other expenses may be made only pursuant to section 2412(d)(3) of title 28, United States Code.

"(2) If a party other than the United States is dissatisfied with a determination of fees and other expenses made under subsection (a), that party may, within 30 days after the determination is made, appeal the determination to the court of the United States having jurisdiction to review the merits of the underlying decision of the agency adversary adjudication. The court's determination on any appeal heard under this paragraph shall be based solely on the factual record made before the agency. The court may modify the determination of fees and other expenses only if the court finds that the failure to make an award of fees and other expenses, or the calculation of the amount of the award, was unsupported by substantial evidence.

"(d) Fees and other expenses awarded under this subsection shall be paid by any agency over which the party prevails from any funds made available to the agency by appropriation or otherwise.

"(e) The Chairman of the Administrative Conference of the United States, after consultation with the Chief Counsel for Advocacy of the Small Business Administration, shall report annually to the Congress on the amount of fees and other expenses awarded during the preceding fiscal year pursuant to this section. The report shall describe the number, nature, and amount of the awards, the claims involved in the controversy, and any other relevant information which may aid the Congress in evaluating the scope and impact of such awards. Each agency shall provide the Chairman with such information as is necessary for the Chairman to comply with the requirements of this subsection.".

(b) The table of sections for subchapter I of chapter 5, of title 5, United States Code, is amended by adding after the item relating to section 503 the following:

"504. Costs and fees of parties.".

SEC. 2. Section 2412 of title 28, United States Code, is amended—

(1) in subsections (a) and (b) by striking out "or any agency and any official of the United States" each place it appears and inserting in lieu thereof "or any agency or any official of the United States";

(2) by reenacting subsection (d), repealed by section 204(c) of Public Law 96-481, and amending such subsection to read as follows:

"(d)(1)(A) Except as otherwise specifically provided by statute, a court shall award to a prevailing party other than the United States fees and other expenses, in addition to any costs awarded pursuant to subsection (a), incurred by that party in any civil action (other than cases sounding in tort), including proceedings for judicial review of agency action, brought by or against the United States in any court having jurisdiction of that action, unless the court finds that the position of the United States was substantially justified or that special circumstances make an award unjust.

"(B) A party seeking an award of fees and other expenses shall, within thirty days

after final judgment in the action, submit to the court an application for fees and other expenses which shows that the party is a prevailing party and is eligible to receive an award under this subsection, and the amount sought, including an itemized statement from any attorney or expert witness representing or appearing in behalf of the party stating the actual time expended and the rate at which fees and other expenses were computed. The party shall also allege that the position of the United States was not substantially justified. Whether or not the position of the United States was substantially justified shall be determined on the basis of the record (including the record with respect to the action or failure to act by the agency upon which the civil action is based) which is made in the civil action for which fees and other expenses are sought.

"(C) The court, in its discretion, may reduce the amount to be awarded pursuant to this subsection, or deny an award, to the extent that the prevailing party during the course of the proceedings engaged in conduct which unduly and unreasonably protracted the final resolution of the matter in controversy.

"(2) For the purposes of this subsection—

"(A) 'fees and other expenses' includes the reasonable expenses of expert witnesses, the reasonable cost of any study, analysis, engineering report, test, or project which is found by the court to be necessary for the preparation of the party's case, and reasonable attorney fees. The amount of fees awarded under this subsection shall be based upon prevailing market rates for the kind and quality of the services furnished, except that (i) no expert witness shall be compensated at a rate in excess of the highest rate of compensation for expert witnesses paid by the United States; and (ii) attorney fees shall not be awarded in excess of $75 per hour unless the court determines that an increase in the cost of living or a special factor, such as the limited availability of qualified attorneys for the proceedings involved, justifies a higher fee;

"(B) 'party' means (i) an individual whose net worth did not exceed $2,000,000 at the time the civil action was filed, or (ii) any owner of an unincorporated business, or any partnership, corporation, association, unit of local government, or organization, the net worth of which did not exceed $7,000,000 at the time the civil action was filed, and which had not more than 500 employees at the time the civil action was filed; except that an organization described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)(3)) exempt from taxation under section 501(a) of such Code, or a cooperative association as defined in section 15(a) of the Agricultural Marketing Act (12 U.S.C. 1141j(a)), may be party regardless of the net worth of such organization or cooperative association;

"(C) 'United States' includes any agency and any official of the United States acting in his or her official capacity;

"(D) 'position of the United States' means, in addition to the position taken by the United States in the civil action, the action or failure to act by the agency upon which the civil action is based; except that fees and expenses may not be awarded to a party for any portion of the litigation in which the party has unreasonably protracted the proceedings;

"(E) 'civil action brought by or against the United States' includes an appeal by a party, other than the United States, from a decision of a contracting officer rendered pursuant to a disputes clause in a contract with the Government or pursuant to the Contract Disputes Act of 1978;

"(F) 'court' includes the United States Claims Court;

"(G) 'final judgment' means a judgment that is final and not appealable, and includes an order of settlement; and

"(H) 'prevailing party', in the case of eminent domain proceedings, means a party who obtains a final judgment (other than by settlement), exclusive of interest, the amount of which is at least as close to the highest valuation of the property involved that is attested to at trial on behalf of the property owner as it is to the highest valuation of the property involved that is attested to at trial on behalf of the Government.

"(3) In awarding fees and other expenses under this subsection to a prevailing party in any action for judicial review of an adversary adjudication, as defined in subsection (b)(1)(C) of section 504 of title 5, United States Code, or an adversary adjudication subject to the Contract Disputes Act of 1978, the court shall include in that award fees and other expenses to the same extent authorized in subsection (a) of such section, unless the court finds that during such adversary adjudication the position of the United States was substantially justified, or that special circumstances make an award unjust.

"(4) Fees and other expenses awarded under this subsection to a party shall be paid by any agency over which the party prevails from any funds made available to the agency, by appropriation or otherwise.

"(5) The Director of the Administrative Office of the United States Courts shall include in the annual report prepared pursuant to section 604 of this title, the amount of fees and other expenses awarded during the preceding fiscal year pursuant to this subsection. The report shall describe the number, nature, and amount of the awards, the claims involved in the controversy, and any other relevant information which may aid the Congress in evaluating the scope and impact of such awards."; and

(3) by adding at the end thereof the following new subsection:

"(f) If the United States appeals an award of costs or fees and other expenses made against the United States under this section and the award is affirmed in whole or in part, interest shall be paid on the amount of the award as affirmed. Such interest shall be computed at the rate determined under section 1961(a) of this title, and shall run from the date of the award through the day before the date of the mandate of affirmance.".

SEC. 3. Section 206 of the Equal Access to Justice Act is amended to read as follows:

"EFFECT AND OTHER LAWS

"SEC. 206. (a) Except as provided in subsection (b), nothing in section 2412(d) of title 28, United States Code, as reenacted and amended by this Act or by Public Law 96-481, alters, modifies, repeals, invalidates, or supersedes any other provision of Federal law which authorizes an award of such fees and other expenses to any party other than the United States that prevails in any civil action brought by or against the United States.

"(b) Section 206(b) of the Social Security Act (42 U.S.C. 406(b)(1)) shall not prevent an award of fees and other expenses under section 2412(d) of title 28, United States Code. Section 206(b)(2) of the Social Security Act shall not apply with respect to any such award but only if, where the claimant's attorney receives fees for the same work under both section 206(b) of such Act and section 2412(d) of title 28, United States Code, the claimant's attorney refunds to the claimant the amount of the smaller fee.".

SEC. 4. Section 207 of the Equal Access to Justice Act is hereby repealed.

SEC. 5. Section 208 of the Equal Access to Justice Act is amended by adding at the end the following: "Awards may be made for fees and other expenses incurred before October 1, 1981, in any such adversary adjudication or civil action.".

SEC. 6. (a) Except as provided in subsection (b), the amendments made by this Act apply to cases pending on or commenced on or after October 1, 1984, including any case commenced on or after October 1, 1984, and finally disposed of before the date of the enactment of this Act, except that in any such case, the 30-day period referred to in section 504(a)(2) of title 5, United States Code, or section 2412(d)(1)(B) of title 28, United States Code, as the case may be, shall be deemed to commence on the date of the enactment of this Act.

(b) Section 504(b)(1)(C)(ii) of title 5, United States Code, as added by this Act, and section 2412(d)(2)(E) of title 28, United States Code, as added by this Act, shall apply to any adversary adjudication pending on or commenced on or after October 1, 1981, in which applications for fees and other expenses were timely filed and were dismissed for lack of jurisdiction.

By Mr. BURDICK (for himself and Mr. ANDREWS):

S. 1139. A bill to authorize construction of a combined Sheyenne and Maple River flood control project; to the Committee on Environment and Public Works.

SHEYENNE AND MAPLE RIVER FLOOD CONTROL PROJECT

Mr. BURDICK. Mr. President, I rise today to introduce for myself and my colleague, Mr. ANDREWS, a combined Sheyenne and Maple River flood control project.

The Sheyenne and Maple River flood control projects are the result of Federal, State, and local efforts to develop acceptable alternatives to the Kindred Lake project which was authorized in the 1970 Flood Control Act. The Army Corps of Engineers recommends that Congress deauthorize Kindred Lake and authorize the Sheyenne flood control project in its place. The project consists of levees and diversion channels at West Fargo and Riverside; a flood diversion channel from Horace to West Fargo; and raising the Lake Ashtabula reservoir pool level 5 feet behind the existing Baldhill Dam.

The Federal cost is estimated at $26.2 million with $15.1 million for the levees and channels and the remaining $11.1 million for raising the pool reservoir. Non-Federal interests will cover approximately 45 percent of the project which has a 6- to 7-cost benefit ratio.

The public has voiced considerable objection to raising the Lake Ashtabula pool reservoir. The State and the

corps have agreed to separate the pool reservoir portion of the project, and proceed with the levees and channels. According to the corps, project separation will not affect the integrity of the urban flood protection design. A final decision on the pool reservoir is not expected until 1990. The State and the Army corps have agreed to review alternative plans to be developed and presented by the Upper Sheyenne Joint Water Resources District. The district supports authorization of the entire project; however, it reserves the right to object to raising the pool reservoir. As a safeguard to the compromise, I will request appropriate report language which will prohibit the use of corps planning funds for raising the reservoir pool until the State of North Dakota agrees to sponsor that portion of the project.

We intend that the final decision on the reservoir pool should not delay the Chief of Engineers' plan to modify the Baldhill Dam for dam safety considerations. The modifications will address only the current deficiencies of an inadequate spillway capacity, and the stability of the embankment, which has shown distress.

Besides the corps-recommended flood control project on the Sheyenne, this bill includes the Maple River project. The Maple River empties into the Sheyenne River 3 miles north of West Fargo. From this point, the two flow north and east to join the Red River 5 miles northeast of Harwood.

The corps, the State water commission, and local water resource districts have analyzed the Maple River Watershed. It is clear that a dam on the main stream of the Maple River north of Enderlin would be of significant benefit in reducing flood damages on the lower Sheyenne. The corps has not been able to come up with the cost/benefit ratio required to justify Federal participation. A corps project requires each individual component of a plan to stand on its own before it can be included in an overall flood control project.

In the case of the Maple River project, the corps did not consider the economic impact of agricultural losses. This is indeed unfortunate. The Federal Government must consider the major reductions in flood levels or flood damages on agricultural lands. In 1975, the President twice announced disaster declarations for eastern North Dakota. The spring flood was declared on May 24; the summer flood on July 11. Losses to both public and private properties in the eastern part of the State were estimated at $550 million. The greatest losses occurred to crops destroyed in the summer flood.

The 1975 floods had the following impact on Cass County, the primary beneficiary from the proposed Sheyenne and Maple River project.

Agricultural Stabilization and Conservation Service [ASCS] annual report showed a $1.8 million disaster payment for crop damage estimated at $62,029,385 over 426,400 acreas.

North Dakota crop and livestock reporting service statistics showed 169,000 crop acres abandoned due to flooding.

Losses to public property, roads, bridges, and so forth, were estimated at $2.5 million. The State disaster emergency services distributed $1,740,491.45 to Cass County political subdivisions for emergency repair.

Other government funding included an estimated $280,000 by the corps for flood-fighting activities; $40 million in emergency loans through the Farmers Home Administration and Small Business Administration; $250,000 by the U.S. Department of Agriculture for emergency conservation measures; and $200,000 for mosquito spraying through the Federal Emergency Management Agency.

Ring dikes were built following the flood to protect urban property: $75,000 for the historic village of Bonanzaville; $1 million corps project for Argusville City; and $45,000 in Raymond Township to protect 80 acres.

The communities and farmers along the Sheyenne and Maple Rivers are interested in a 100-year flood protection project. It is estimated that a flood in this area could cause $700 million in damages, with the greatest impact in the area where the Sheyenne and Maple Rivers flow together to join the Red River. In light of the potential damage, and the role of the Federal Government in helping communities and States recover from flood disasters, I think that $15 million spent on a dam now would be a sound and wise investment.

I would ask unanimous consent that the bill be printed in full following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1139

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Army, acting through the Chief of Engineers, is authorized and directed to proceed with the planning, designing, engineering, and construction of the plan for flood protection and related purposes on the Sheyenne River, North Dakota, as described and recommended in the Report of the Chief of Engineers dated August 22, 1984, at an estimated federal cost of $26,200,000 (October 1984 price levels), and to proceed with the planning, design and construction, at full federal expense, of a dam and a reservoir of about 35,000 acre-feet of storage in the vicinity of Enderlin, North Dakota, on the Maple River to provide the downstream communities and adjacent environs protection against flooding, at an estimated cost of $15,000,000 (October 1984 price levels).

SEC. 2. Congress finds that the benefits attributable to the flood control measures provided by the Maple River project exceed the cost of such measures and further economic analysis is not required.

SEC. 3. The plan of the Chief of Engineers to modify the Baldhill Dam (authorized by Public Law 78-534) for dam safety considerations shall not preclude implementation of those components of the Sheyenne River, North Dakota, project not dependent on such safety modifications.

Mr. ANDREWS. Mr. President, I am pleased to join my distinguished colleague from North Dakota in introducing legislation to provide for the Sheyenne and Maple River control project. Completion of this long overdue project will protect and reassure residents of both the farms and cities that have been devastated by flooding from both spring runoff from thawing snow and from heavy rains later in the season. The threat of flooding along these rivers is not seasonal or predictable, it can occur at any time, in any season other than the winter.

The Nation's East-West Continental Divide crosses North Dakota. The drainage basin to the east and north of that divide puts water into the Red River of the north, which flows from south to north, into Canada and ultimately into the Hudson Bay. The whole area, once a prehistoric lake called Lake Agassiz, has some of the richest farm land in the world and is the site of the most metropolitan developments in North Dakota. The Sheyenne and Maple River flood control project not only provides long overdue protection to the immediately affected communities, but also provides water management capability for the whole area of the Red River Valley in North Dakota and Minnesota.

For too long the local, State, and Federal response to the threat and reality of flooding in this area has been piecemeal and spot repair. Small dikes, emergency evacuation, and later reseeded crops, with remodeled and redecorated dwellings and businesses assisted by disaster aid have been the last ditch emergency response to and from the flooding of the past. It is time to put that behind us and provide these residents of farm and city the protection and assurance of safety they deserve and desire.

My colleague has set forth the costs of the Sheyenne and Maple River control project. It seems a small price to pay for the benefits and assurances for which our friends and neighbors have waited so long. It is cost effective to implement the cooperative plans of the local and State planning groups and those of the Army Corps of Engineers to solve the problem and resolve the threat once and for all. Every level of involved government, from township, to county, to city to State has given its encouragement and approval

to this Sheyenne and Maple River control project.

I am convinced this provides the best and most effective overall solution to the serious flooding from the Sheyenne and Maple Rivers.

This project has my unqualified support and enthusiastic endorsement.

By Mr. METZENBAUM (for himself, Mr. THURMOND, and Mr. DECONCINI):

S. 1140. A bill to amend the antitrust laws in order to preserve and promote wholesale and retail competition in the retail gasoline market and to protect the motoring safety of the American public; to the Committee on the Judiciary.

MOTOR FUEL SALES COMPETITION IMPROVEMENT ACT

● Mr. METZENBAUM. Mr. President, today I am pleased to introduce, along with Senator THURMOND and Senator DECONCINI, the Motor Fuel Sales Competition Improvement Act of 1985. This bill will dramatically improve competition in the sale of gasoline at the retail and wholesale levels. It will benefit consumers as well as insure independent service station dealers have a fair opportunity to compete in the sale of gasoline.

This bill has two basic components. First, it prohibits refiners from requiring that service stations purchase all or almost all of their supplies of gasoline from a single source. Oil companies could not require independent dealers to purchase more than 70 percent of their supplies from the companies' refineries. Consequently, dealers would be free to go elsewhere to buy gasoline supplies when they could find a better price. The result would be to inject competition into what is now a system that freezes out competition. Under this bill, if an oil company tries to squeeze its dealers by charging prices for supplies that are not competitive, the dealer could respond by looking around for supplies from other refiners or wholesalers.

This provision is consistent with the settlement of recent antitrust litigation between independent dealers and 15 major oil companies. In this case, Bogosion versus Gulf Oil Corp., et al., the independent dealers claimed that the oil companies, among other things, had restricted their ability to buy gasoline from other suppliers. The settlement with almost all the defendants allows dealers to have greater freedom to buy supplies from others if they can get a better deal. This settlement, if the dealers are allowed to put it in practice, will reduce gasoline prices for consumers and allow service station dealers to be more competitive.

The terms of this settlement, however, expire after 5 years. In addition, the provision of each settlement are somewhat different and in some cases oil companies can impose greater restrictions on their dealers than in others. Finally, there is legitimate fear by some dealers that the economic leverage wielded by the oil companies, who in most cases, own the station and lease it to the dealer, will prevent the dealer from taking advantage of the settlement. As one dealer put it when the settlement was announced, the settlement "grants a theoretical right. But it doesn't address the fact that the oil company is landlord, banker, giver of wholesale and retail credit and supplier of maintenance."

The settlement shows that giving dealers greater freedom to purchase supplies from others does not present a serious burden for the major oil companies. This greater flexibility in purchasing supplies will be implemented through conversion of one or more pumps or addition of new pumps to dispense gasoline supplied by someone other than the company whose brand is displayed at the station. The bill requires that the dealer provide notice at the point of sale that gasoline supplied by someone else is being dispensed at a particular pump.

By making the terms of this settlement permanent, and by insuring that dealers can take advantage of the greater freedom to buy supplies, the consumer will save and dealers will have some economic leverage to use against the big oil companies that supply them.

The second part of this bill prohibits large integrated refiners from controlling the operations of gasoline service stations. No company which owns refining capacity over 175,000 barrels per day and which produces more than 30 percent of the crude oil supplied to its own refineries would be allowed to set prices and control the operations of service stations, although they would be permitted to own the station property and lease it to the dealer who runs the station.

This provision would prevent approximately the 20 largest oil companies in this country from controlling retail operations. It would not prevent the scores of other refiners in operation today or any other type of company from operating service stations.

This provision of the bill would allow retail service stations to compete on a fair basis. Large oil companies would not be allowed to extend their dominance any longer into the sale of gasoline at retail.

Mr. President, independent service stations are in trouble. Their numbers are shrinking at an alarming pace. And there seems no end in sight.

It is no accident that these independent businesses are struggling for their existence. They are up against major oil companies that already control the production of domestic crude oil, crude oil pipelines, refining, and marketing. Not only do the major oil companies own most of the assets in each of these levels of production, but their market share understates the degree to which they are able to cooperate to control the market.

Big oil controls pipelines throughout the Nation through joint ownership agreements. Offshore exploration is typically done through joint ventures. Crude oil is traded among the major oil companies through complex exchange agreements.

In addition to this powerful tendency for the oil companies to cooperate rather than compete, in recent years we have witnessed a decline in the independent companies operating in this industry. Over 90 refineries have closed since 1981, almost all of them independents. Big oil companies have tried to buy up their midsize competitors in order to have access to crude oil supplies for less than the cost of drilling for them.

In short, the major oil companies' ability to manipulate prices and control all levels of the industry, already enormous, is expanding. By dominating the retailing level, big oil is able to control the industry from taking it out of the ground to putting it in the consumer's gas tank.

Day by day, the oil companies are using their vast financial power to eliminate competition from independent gasoline dealers. Retailing used to be the area in which we saw the greatest amount of competition, because of the role played by the independent dealers. But increasingly, as the numbers starkly demonstrate, the big oil companies have been driving out the independents. And the tactics that have sometimes been used cannot be described as fair and reasonable.

While some dealers may have failed because of poor management and changing market conditions, many appear to have been the victims of unfair pricing and marketing practices by the major integrated oil companies that continue unabated today. Hearings in past Congresses revealed a vast array of tactics used by the major integrated refiners against these small and independent businesses. Such tactics, according to extensive testimony from present and former dealers, have included excessive rent increases, abrupt changes in credit terms, delays in credit card processing, subsidization by refiners of their own directly operated stations, refusals to provide routine maintenance service to dealers, reduced gasoline allocation to the independents when supplies are short, and unreasonable quotas when the market is flooded.

It is clear that the major integrated refiners have reaped the benefits of such economic eviction techniques. At the same time that independent dealerships have been declining by the tens of thousands, integrated refiners have expanded their sales of gasoline

through stations that they themselves owned and operated.

Ed Rothschild, director of the Citizen/Labor Energy Coalition, an organization representing consumers' interests on energy matters, has advocated divestiture by oil companies of retail operations:

We know that once the dust settles, that once the major oil companies have restructured the gasoline market to their oligopolistic advantage, the competition that now exists will disappear. The majors, with their access to lower-priced crude oil will have a significant economic advantage over non-integrated refiners and will be in a position (particularly in a declining market) to become even more dominant. They will use the power of vertical integration to further restrict the competition at the refining and marketing levels and consumers will be forced to pay monopoly prices for gasoline and other petroleum products.

The legislation we are proposing today will restore the competitiveness of small businesses engaged in gasoline marketing in part by eliminating the incentives that lead to such inequitable practices by the major refiners.

Mr. President, I ask unanimous consent that a more detailed statement of the bill be included in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

MOTOR FUEL SALES COMPETITION IMPROVEMENT ACT OF 1985: SUMMARY OF PROVISIONS

WHOLESALE PURCHASE OF GASOLINE

Section 2(a) prohibits producers or refiners from requiring service station dealers to purchase more than 70 percent of their gasoline supplies from the producer or refiner and allows the dealer to convert existing tanks and dispensers or install new ones to sell gasoline supplies by someone other than company whose brand is displayed.

Section 2(b) prohibits producers or refiners from conspiring to violate Section 2. For example, one oil company could not conspire with another company to refuse to supply a dealer in order to force the dealer to buy all its supplies from one of the oil companies.

Section 2(c) requires branded dealers who sell gasoline supplied by companies other than the company owning the brand to disclose to the public that sales of gasoline from particular pumps are not supplied by the brand-name company. In order to comply with this provision, a dealer could install new pumps and tanks or convert existing facilities, as long as clear notice was made at the point of sale.

OPERATION OF SERVICE STATIONS

Section 3 prohibits large integrated oil refiners from operating service stations. Large integrated refiners are defined as companies with refining capacity exceeding 175,000 barrels per day and which supply 30% or more of their own crude oil to their refineries. This prohibition on operation of stations applies to approximately the 20 largest oil companies.

Section 4 allows large integrated refiners to own the station facilities as long as they do not control the operation through employees or in other ways.

Section 5 provides definitions of terms. Section 6(a) provides for enforcement by the Justice Department and the Federal Trade Commission. Section 6(b) provides for private enforcement. Section 6(c) provides for an effective date one year from enactment.●

By Mr. DOLE (for himself, Mr. BOSCHWITZ, Mr. LEAHY, Mr. DANFORTH, and Mr. ANDREWS):

S. 1142. A bill to improve and extend certain domestic food assistance programs, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

DOMESTIC FOOD ASSISTANCE ACT

Mr. DOLE. Mr. President, today, as chairman of the Nutrition Subcommittee, I am introducing the Domestic Food Assistance Act of 1985, which includes a 4-year reauthorization of the Food Stamp Program, Commodity Supplemental Food Program, and Temporary Emergency Food Assistance Program. I am pleased to be joined in the introduction of this legislation by Senators BOSCHWITZ, LEAHY, DANFORTH, and ANDREWS.

We are committed to fulfilling the nutritional needs of low-income Americans, while maintaining an approach that is consistent with current budget constraints. It is significant that this reauthorization is a bipartisan effort, and I welcome the support of Senator LEAHY, with whom I worked very closely during the last food stamp reauthorization process in 1981, when he was then ranking minority member of the Nutrition Subcommittee. This coalition was also very productive during the budget process the following year.

Mr. President, this week, the Committee on Agriculture, Nutrition, and Forestry will begin markup of the 1985 farm bill, which includes the reauthorization of the Food Stamp Program. There are those who believe that this program should undergo another round of budget cuts to the extent of a billion dollars or more. Then, there are those who believe that increasing spending by that amount will make domestic hunger problems go away.

This legislation achieves $79 million in savings for fiscal year 1986, while the Senate-passed budget resolution requires $78 million in savings, including $40 million in regular Food Stamp Program spending reductions, and $38 million for Puerto Rico. In the outyears, this bill would save significantly more than what is required in the current budget resolution. I ask unanimous consent that a comparison chart showing budget savings be included in the record at this point.

There being no objection, the chart was ordered to be printed as follows:

[Budget savings in millions of dollars]

	Fiscal year—		
	1986	1987	1988
Senate Budget resolution:			
Regular Food Stamp Program	−40	−78	−109
Puerto Rico block grant	−38	−77	−115
Total	−78	−155	−224
Domestic Food Assistance Act:			
Regular Food Assistance Program	−41	−112	−119
Puerto Rico block grant	−38	−77	−115
Total	−79	−189	−234

This Domestic Food Assistance Act will expand accessibility to the Food Stamp Program through various noncost provisions. Benefits to the working poor will be increased by raising the earned income disregard from 18 percent to 20 percent. Further, administrative savings are achieved by some other provisions. Although we may be spending additional Federal funds to increase benefits to food stamp recipients, we are also eliminating a free revenue ride that States have been getting as a result of State sales taxes on food. These taxes erode the purchasing power of food stamp beneficiaries, while the States are able to collect revenues from what should be food dollars. The major savings provision included in this legislation would save over $100 million a year after it is fully implemented—$132 million in fiscal year 1987, and $139 million in fiscal year 1988.

Mr. President, we believe that this Food Assistance Act of 1985 represents a responsible approach to reauthorization of the Food Stamp Program, Commodity Supplemental Food Program, and Temporary Emergency Food Assistance Program. In this legislation, we make many changes in the current Food Stamp Program that will enhance program accessibility to those who meet the eligibility criteria. At the same time, we are able to meet the constraints of the current budget resolution.

These are difficult times for the American people and Members of Congress—we are no longer in a create-a-new-program spending mode. Tough decisions have to be made. We have a great responsibility to the taxpayer, as well as to those in our society who are genuinely in need and require help from the Government. During the budget processes of 1981 and 1982, we were able to reduce Food Stamp Program spending by $7 billion during the 3-year fiscal period 1982–85. Although we can still achieve some further spending cuts, this should not be accomplished at the expense of low-income Americans. Poor people do not have strong voices in the Halls of Congress—they can't hire fancy lobbyists to protect their interests, and they don't attend fundraisers. They have to depend upon Members of Congress themselves to be sensitive to their needs.

Mr. President, it is our hope that the Domestic Food Assistance Act of 1985 will provide a basis for consideration of issues relating to reauthorization of the Food Stamp, Commodity Supplemental and Temporary Emergency Food Assistance Programs.

I ask unanimous consent that a section-by-section summary of this legislation appear in the RECORD immediately following my statement, as well as the bill itself.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1142

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Domestic Food Assistance Act of 1985".

DECLARATION OF POLICY

SEC. 2. (a) The Congress finds that—

(1) existing hunger and malnutrition in the United States are deplorable and without justification; and

(2) hunger and malnutrition are complex, social and human resource problems which require the coordinated efforts of Federal, state, and local government, public and private for profit and nonprofit organizations, and affected families and individuals.

(b) It is the policy of the Congress—

(1) to review periodically all federal domestic food assistance programs;

(2) to make any necessary changes in such programs in a manner which will diminish hunger and malnutrition; and

(3) to provide the maximum amount of assistance under such programs to individuals with particular nutritional needs.

TITLE I—FOOD STAMP PROGRAM

EARNED INCOME DEDUCTION

SEC. 101. The third sentence of section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) is amended by striking out "18 per centum" and inserting in lieu thereof "20 per centum".

INCOME EXCLUSIONS

SEC. 102. Section 5 of the Food Stamp Act of 1977 (7 U.S.C. 2014) is amended—

(1) in subsection (d)—

(A) by inserting "except as provided in subsection (k) of this section," after the comma at the end of clause (1);

(B) by inserting "and no portion of any federal educational grant, to the extent it provides assistance beyond that used for tuition and mandatory school fees," after "expenses," in the proviso of clause (5); and

(C) by inserting "except as otherwise provided in subsection (l) of this section" after the comma at the end of clause (10); and

(2) by adding at the end thereof the following new subsection:

"(k)(1) For purposes of subsection (d)(1), except as provided in paragraph (2), assistance provided to a third party on behalf of a household by a State or local government shall be considered money payable directly to the household if the assistance is provided in lieu of a regular benefit payable to a household for living expenses under part A of title IV of the Social Security Act (42 U.S.C. 601 et seq.) or a State or local general assistance program.

"(2) Paragraph (1) of this subsection shall not apply to—

"(A) medical assistance;

"(B) child care assistance;

"(C) energy assistance; and

"(D) emergency and special assistance, to the extent excluded in regulations prescribed by the Secretary.

"(l) Notwithstanding section 142(b) of the Job Training Partnership Act (29 U.S.C. 1552(b)), income of individuals earned as a result of participation in a program authorized under such Act shall be considered earned income for purposes of the food stamp program.".

DEDUCTION OF ENERGY ASSISTANCE PAYMENTS

SEC. 103. Section 5(e) of the Food Stamp Act of 1977 (7 U.S.C. 2014(e)) is amended—

(1) by inserting ", excluding expenses paid on behalf of the household under the Low-Income Home Energy Assistance Act of 1981 (42 U.S.C. 8621 et seq.)," after "by a household for shelter" each place it appears in clause (2) of the fourth sentence and subclause (C) of the last sentence; and

(2) by inserting after the seventh sentence the following new sentence: "A State agency may use a standard utility allowance for a household on behalf of whom a payment is made under the Low-Income Home Energy Assistance Act of 1981 (42 U.S.C. 8621 et seq.) if such household incurs out-of-pocket heating or cooling expenses.".

MONTHLY REPORTING AND RETROSPECTIVE BUDGETING SIMPLIFICATION

SEC. 104. (a) Section 5(f)(2) of the Food Stamp Act of 1977 (7 U.S.C. 2014(f)(2)) is amended—

(1) by amending subparagraph (A) to read as follows:

"(A) Household income for—

"(i) migrant farmworker households; and

"(ii) households—

"(I) that have no earned income; and

"(II) in which all adult members are elderly or disabled members;

shall be calculated on a prospective basis, as provided in paragraph (3)(A).";

(2) in subparagraph (B)—

(A) in clause (i)—

(i) by inserting "under the first sentence of section 6(c)(1)" after "permitted"; and

(ii) by striking out "under section 6(c)(1) of this Act,";

(B) by striking out clause (ii); and

(C) in clause (iii)—

(i) by striking out "(iii)" and inserting in lieu thereof "(ii)";

(ii) by striking out "other than a migrant household" and inserting in lieu thereof "other than households specified in subparagraph (A)";

(iii) by inserting "under the first sentence of section 6(c)(1)" after "not required"; and

(iv) by striking out "under section 6(c)(1) of this Act"; and

(3) by striking out subparagraph (C) and inserting in lieu thereof the following new subparagraphs:

"(C) Except as provided in subparagraphs (A) and (B), household income for households which have earned income, and for households which include any member who has recent work history, shall be calculated on a retrospective basis, as provided in paragraph (3)(B).

"(D) Household income for all other households may be calculated, at the option of the State agency, on a prospective basis as provided in paragraph (3)(A) or on a retrospective basis as provided in paragraph (3)(B).".

(b) Section 6(c)(1) of such Act (7 U.S.C. 2015(c)(1)) is amended—

(1) in the first sentence, by striking out "certain categories of households" and all that follows through "disabled members," and inserting in lieu thereof "households with respect to which household income is required by section 5(f)(2)(C) to be determined on a retrospective basis"; and

(2) by inserting after the second sentence the following new sentence: "State agencies may require households, other than households with respect to which household income is required by section 5(f)(2)(A) to be calculated on a prospective basis, to file periodic reports of household circumstances in accordance with the standards prescribed under the preceding provisions of this paragraph by the Secretary.".

CATEGORICAL ELIGIBILITY

SEC. 105. (a) Subsection (j) of section 5 of the Food Stamp Act of 1977 (7 U.S.C. 2014(j)) is amended to read as follows:

"(j) Notwithstanding subsections (a) through (i), a State agency shall consider a household in which each member of the household receives either benefits under a State plan approved under part A of title IV of the Social Security Act (42 U.S.C. 601 et seq.) or supplemental security income benefits under title XVI of such Act (42 U.S.C. 1380 et seq.) to have satisfied the income and resource limitations for participation in the food stamp program prescribed under this section.".

(b) Section 11(i) of such Act (7 U.S.C. 2020(i)) is amended by adding at the end thereof the following new sentence: "A State agency may not deny or terminate benefits to a household under the food stamp program solely on the basis of the denial or termination of benefits to such household under the aid to families with dependent children program established under part A of title IV of the Social Security Act (42 U.S.C. 601 et seq.) or the supplemental security income program established under title XVI of such Act (42 U.S.C. 1381 et seq.) without a separate determination by such agency that such household has failed to satisfy the eligibility requirements for participation in the food stamp program.".

JOB SEARCH PROGRAM

SEC. 106. Section 6(d) of the Food Stamp Act of 1977 (7 U.S.C. 2015(d)) is amended—

(1) in paragraph (1)—

(A) by designating the first and second sentences as subparagraphs (A) and (B), respectively;

(B) by amending clause (ii) of subparagraph (A) (as designated by clause (A)) to read as follows: "(ii) refuses without good cause to fulfill the job search requirements prescribed by paragraph (4) and whatever reasonable job search requirements are prescribed by the State agency in accordance with paragraph (4), which may, at the option of the State agency, provide that such requirements apply to applicants at the time of application, except that the period of ineligibility under this clause shall be two months;";

(C) by adding at the end thereof the following new subparagraphs:

"(C) A period of ineligibility of a household for a violation of a requirement of this paragraph shall terminate when the household member who committed the violation complies with such requirement.

"(D) If a household member who commits such violation leaves the household during the period of ineligibility, such household—

"(i) shall not be ineligible for assistance under this Act as a result of such violation; and

"(ii) if it is otherwise eligible, may resume participation in the program.

"(E) A household of which such person thereafter becomes a member shall be ineligible for the balance of the period of ineligibility."; and

(2) by adding at the end thereof the following new paragraph:

"(4)(A) As used in the paragraph, the term 'job search program' means a program that contains—

"(i) terms and conditions comparable to those prescribed for employment search under sections 402(a)(35)(A) and (B) of the Social Security Act (42 U.S.C. 602(a)(35)(A) and (B)), except that a State agency may not be required to incur costs for a program participant in excess of $25 per month and may exercise the option provided in paragraph (1)(ii); and

"(ii) to the extent determined appropriate by the State agency, reasonable job search training and support activities, including jobs skills assessments, job finding clubs, training in techniques of employability, job placement services, or other direct training or support activities determined by the State agency to expand the job search abilities or employability of program participants.

"(B) A State agency shall conduct a job search program in accordance with this paragraph.

"(C) A State agency may provide that participation in the training and support activities referred in in subparagraph (A)(ii) may supplement or supplant other requirements imposed by this Act on program participants.

"(D) A State agency shall exempt from the job search program—

"(i) a category of household members to which the State agency determines that the application of such program is impracticable as the result of the unavailability of work opportunities, the cost effectiveness of job search activities, or other factors; and

"(ii) an individual household member not included in such category to whom the State agency determines that the application of such program is impracticable as the result of personal circumstances of the member such as the lack of job readiness and employability, the remote location of work opportunities, the unavailability of dependent care, or other factors.

"(E) In making a determination under subparagraph (D)(i), a State agency may include in a category all household members residing in a specified area of the State.".

(b) Section 11(e) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)) is amended—

(1) by striking out "and" at the end of paragraph (20);

(2) by striking out the period at the end of paragraph (21) and inserting in lieu thereof a semicolon and "and"; and

(3) by adding at the end thereof the following new paragraph:

"(22) that the State agency shall conduct a job search program in accordance with section 6(d)(4) and describe such program in the State plan of operation.".

(c) Section 16 of the Food Stamp Act of 1977 (7 U.S.C. 2025) is amended by adding at the end thereof the following new subsection:

"(h)(1) In order to pay each State agency the full cost of carrying out the job search program required under section 6(d)(4), except as otherwise provided in this subsection, the Secretary shall allocate from funds appropriated under section 18(a)(1) an amount of $40,000,000 for the fiscal year ending September 30, 1986, and $50,000,000 for the fiscal year ending September 30, 1987 and each fiscal year thereafter.

"(2) If a State agency incurs costs in carrying out such program that exceed the amount payable to the State agency under paragraph (1), the Secretary shall pay such State agency in accordance with subsection (a) an amount equal to 50 per centum of such additional costs.

"(3) The Secretary shall reimburse each State agency, in accordance with subsection (a), in an amount equal to 50 per centum of the total amount of payments made or costs incurred by the State agency in connection with transportation costs and other expenses reasonably incurred in the job search program required by section 6(d)(4), except that the total amount of such payments or costs for a program participant may not exceed $25 per month.

"(4) The Secretary shall monitor the job search programs carried out by State agencies under section 6(d)(4) in order to measure the effectiveness of such programs in increasing the number of household members who obtain and retain employment as the result of participation in such programs.".

(d) No later than April 1, 1988, the Secretary of Agriculture shall submit a report on the effectiveness of the job search programs conducted by State agencies under section 6(d)(4) of the Food Stamp Act of 1977 (7 U.S.C. 2015(d)(4)) to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

ISSUANCE OF COUPONS

SEC. 107. (a) Section 7(a) of the Food Stamp Act of 1977 (7 U.S.C. 2016(a)) is amended by adding at the end thereof the following new sentence: "A coupon issuer may issue coupons to eligible households at various times during a month.".

(b) The first proviso of section 7(b) of such Act is amended by inserting before the colon at the end thereof the following: ", except that a participating retail food store or wholesale food concern which is located in an area in which food stamps are commonly used (as determined by the Secretary) may not increase the price of food at any time during a month if the increase is the result of the issuance of coupons to customers of the store or concern".

ALTERNATIVE MEANS OF COUPON ISSUANCE

SEC. 108. Section 7(g)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2016(g)(1)) is amended by striking out "may" in the matter preceding clause (A) and inserting in lieu thereof "shall".

REDEMPTION OF COUPONS

SEC. 109. Section 10 of the Food Stamp Act of 1977 (7 U.S.C. 2019) is amended by adding at the end thereof the following new sentence: "A financial institution may not impose on, or collect from, a retail food store a fee or other charge for the redemption of coupons that are submitted to the financial institution in order to defray the costs of complying with a requirement, other than a requirement relating to the cancellation of coupons, for the presentation of coupons by the financial institution to a Federal Reserve bank.".

HOURS OF OPERATION

SEC. 110. Section 11(e)(2) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)(2)) is amended—

(1) by striking out the semicolon at the end thereof and inserting in lieu thereof a period; and

(2) by adding at the end thereof the following new sentence: "The State agency shall assess, from time to time, the need for operating food stamp offices within the State during evening and weekend hours.".

ELIGIBILITY OF THE HOMELESS

SEC. 111. Section 11(e)(2) of the Food Stamp Act of 1977 (7 U.S.C. 2020(e)(2)) (as amended by section 110 of this Act) is further amended by adding at the end thereof the following: "The State agency shall provide a method of certifying and issuing coupons to eligible households who do not reside in permanent dwellings or who do not have fixed mailing addresses. In carrying out the preceding sentence, the State agency shall take such steps as are necessary to assure that participation in the food stamp program is limited to eligible households;".

DISQUALIFICATION OF RETAIL FOOD STORES AND CIVIL MONEY PENALTIES

SEC. 112. Section 12 of the Food Stamp Act of 1977 (7 U.S.C. 2021) is amended by adding at the end thereof the following new subsection:

"(e)(1)(A) If a retail food store or wholesale food concern disqualified under subsection (a) is sold or otherwise transferred, the person who sold or transferred such store or concern shall be subject to a civil money penalty.

"(B) The amount of such penalty shall—

"(i) be established by the Secretary through regulations; and

"(ii) reflect that portion of the disqualification period which has not yet expired.

"(C) If such store or concern has been disqualified permanently, the amount of such penalty shall be double the penalty imposed for a ten-year disqualification period, as determined under regulations issued by the Secretary.

"(D) Notwithstanding the imposition of such penalty, the disqualification period imposed under subsection (b) shall continue in effect as to the person who sold or transferred such store or concern.

"(2)(A) After a civil money penalty imposed against a person under paragraph (1) has become final pursuant to section 14(a), the Secretary may request the Attorney General to institute a civil action against such person to collect such penalty in a district court of the United States for any district in which such person is found, resides, or transacts business.

"(B) Such court shall have jurisdiction to hear and decide such action.

"(C) The validity and amount of such penalty shall not be subject to review in such action.".

AUTHORIZATION FOR APPROPRIATIONS

SEC. 113. The first sentence of section 18(a)(1) of the Food Stamp Act of 1977 (7 U.S.C. 2027(a)(1)) is amended—

(1) by striking out "and" after "1984"; and

(2) by inserting before the period at the end thereof the following: "; not in excess of $13,217,000,000 for the fiscal year ending September 30, 1986; not in excess of $14,034,000,000 for the fiscal year ending September 30, 1987; not in excess of $14,841,000,000 for the fiscal year ending September 30, 1988; and not in excess of $15,702,000,000 for the fiscal year ending September 30, 1989".

PROHIBITION AGAINST THE TRANSFER OF FUNDS TO OFFICE OF THE INSPECTOR GENERAL

SEC. 114. Section 18 of the Food Stamp Act of 1977 (7 U.S.C. 2027) is amended by adding at the end thereof the following new subsection:

"(f) No funds appropriated to carry out this Act may be transferred to the Office of

the Inspector General of the Department of Agriculture.".

TRANSFER OF SALES TAX IMPOSED ON FOOD PURCHASED WITH FOOD STAMPS

SEC. 115. Section 18 of the Food Stamp Act of 1977 (7 U.S.C. 2027) (as amended by section 114 of this Act) is amended by adding at the end thereof the following new subsection:

"(g)(1) As used in this subsection, the term 'program period' means the three-month period beginning on April 1, 1986, and each three-month period thereafter.

"(2) If a State participated in the food stamp program in any program period and in such program period the State or any political subdivision thereof imposed a tax on the sale of food purchased with coupons, the State shall transfer to the Secretary of the Treasury as soon as practicable, but not later than sixty days, after the end of such program period, an amount equal to the sum of—

"(A) the product obtained by multiplying—

"(i) the total value of coupons issued by the State agency of the State to all households during such program period; by

"(ii) the rate of tax imposed by such State on the sale of food purchased with coupons during such program period (as determined by the Secretary of Agriculture); and

"(B) the product obtained by multiplying—

"(i) the total value of coupons issued by the State agency of the State to all households within such political subdivision during such program period; by

"(ii) the rate of tax imposed by such political subdivision on the sale of food purchased with coupons during such program period (as determined by the Secretary of Agriculture).

"(3) If a State fails to transfer to the Secretary of the Treasury the amount of funds described in paragraph (2)—

"(A) the Secretary of the Treasury shall notify the Secretary of Agriculture of such failure; and

"(B) the Secretary of Agriculture may withhold, from funds which the State would otherwise be entitled to receive under section 16(a), the amount which the State failed to pay.".

(b) The amendment made by subsection (a) of this section shall become effective on April 1, 1986.

PUERTO RICO BLOCK GRANT

SEC. 116. Section 19 of the Food Stamp Act of 1977 (7 U.S.C. 2026) is amended—

(1) in subsection (a)(1)(A)—

(A) by inserting "through the fiscal year ending September 30, 1989," after "for each fiscal year";

(B) by striking out "noncash"; and

(C) by striking out ", and" and all that follows through the period and inserting in lieu thereof a period;

(2) by striking out "50 per centum of the" in subsection (a)(1)(B); and

(3) by striking out "a single agency which shall be" in subsection (b)(1)(A)(i) and inserting in lieu thereof "the agency or agencies directly".

COMMUNITY WORK AND TRAINING PROGRAM

SEC. 117. (a) The Food Stamp Act of 1977 (7 U.S.C. 2011 et seq.) is amended by adding at the end thereof the following new section:

"COMMUNITY WORK AND TRAINING PROGRAM

"SEC. 21. (a) A State agency may establish a community work experience program in accordance with this section.

"(b)(1) The purpose of a community work experience program shall be to provide experience and training for individuals not otherwise able to obtain employment in order to assist them to become regularly employed.

"(2) Such program shall be designed to improve the employability of participants through actual work experience and training and to enable individuals employed under such program to become employed promptly in the public or private sector.

"(3) Such program shall be limited to projects which serve a useful public purpose in fields such as health, social service, environmental protection, education, urban and rural development and redevelopment, welfare, recreation, public facilities, public safety, and day care.

"(c) In carrying out a community work experience program under this section, a State agency shall—

"(1) utilize, to the extent possible, the prior training, experience, and skills of a participant in making appropriate work experience assignments;

"(2) prescribe appropriate standards for health, safety, and other conditions applicable to the performance of work;

"(3) take such steps as may be necessary to assure that the program does not result in the displacement of employed persons or the filling of established unfilled position vacancies;

"(4) provide reasonable conditions of work, taking into account the geographic region, residence, and proficiency of the participants;

"(5) not require participants, without their consent, to travel an unreasonable distance from their homes or remain away from their homes overnight;

"(6) provide that the maximum number of hours in any month that a participant may be required to work is that number which equals the value of the allotment of the household of which such individual is a member divided by the greater of the Federal or the applicable state minimum wage; and

"(7) provide for the payment of transportation and other costs, not in excess of an amount established by the Secretary, reasonably necessary and directly related to participation in the program.

"(d) The facilities of State public employment offices may be used to find employment opportunities for participants in the community work experience program.

"(e)(1) A State agency may not use funds provided to carry out the community work experience program under section 16(a) to compensate participants for the performance of work.

"(2) A participant in such program shall not be entitled to a salary or to any other work or training expense provided under any other provision of law by reason of participation in such program.

"(3) Nothing in this Act shall prevent a State agency from operating a community work experience program in accordance with this section and in accordance with such other terms and conditions as the State agency may determine to be necessary, whether or not consistent with section 6(d)(1)).

"(f)(1) Each person who is required to comply with section 6(d)(1) or is described in section 6(d)(2)(A) shall participate in a community work experience program, upon referral by the State agency, unless such person is currently employed at least eighty hours a month and is earning an amount not less than the applicable minimum wage for such employment.

"(2) In addition to a person described in paragraph (1), a State agency may also require to participate in such program a person who would be required to comply with section 6(d)(1) but for the exception contained in section 6(d)(2)(B) if the person is caring for a child over three years of age or an incapacitated person and care for such child or incapacitated person is available.

"(g) The State agency shall coordinate a community work experience program operated under this section, the requirements prescribed under section 6(d) (1) and (4), and a pilot program operated under section 17(e) so as to assure that job placement will have priority over participation in the community work experience program.

"(h) Section 6(d)(1) shall apply to any individual referred to a community work experience program who fails to participate in such program in the same manner that such section applies to an individual who is required to comply with section 6(d)(1).

"(i) Funds provided to carry out the community work experience program under section 16(a) may not be used—

"(1) to make or acquire materials or equipment in connection with the work performed under such program;

"(2) to pay the cost of supervision of work under such program; or

"(3) to pay other costs unless such costs are attributable to such program and the payment of such costs is approved by the Secretary.".

(b) Section 16(a) of such Act (7 U.S.C. 2025(a)) is amended—

(1) by striking out "and" at the end of clause (3); and

(2) by inserting ", and (5) a community work experience program" after "(4) fair hearings".

TITLE II—NUTRITION SURVEILLANCE

NUTRITIONAL STATUS MONITORING

SEC. 201. Section 1428 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3178) is amended to read as follows:

"NUTRITIONAL STATUS MONITORING

"SEC. 1428. (a) The Secretary and the Secretary of Health and Human Services shall establish a comprehensive nutritional status monitoring program which shall include the following:

"(1) An assessment system consisting of periodic surveys and continuous monitoring to determine the extent of risk of nutrition-related health problems in the United States, which population groups or areas of the country face the greatest risks of such problems, and the likely causes of risk and changes in such risk factors over time.

"(2) A surveillance system to identify remediable nutrition-related health risks to individuals or for local areas, in such a manner as to tie detection to direct intervention and treatment.

"(3) Program evaluations to determine the adequacy, efficiency, effectiveness, and effects of nutrition-related programs in reducing health risks to individuals and populations.

"(4) Periodic special surveys to determine the health and nutritional status of particularly vulnerable low-income population groups, including low-income mothers; single parent, pregnant mothers; single, elderly person households; and homeless individuals.

"(b) In carrying out the monitoring system required under subsection (a), the Secretary and the Secretary of Health and Human Services shall conduct longitudinal surveys in order to determine the status over time of nutrition-related health problems in the United States.

"(c) In carrying out the surveillance system required under subsection (a)(2), the Secretary and the Secretary of Health and Human Services shall use screening and other information available from other health programs, including programs funded under titles V, XVIII, and XIX of the Social Security Act (42 U.S.C. 701 et seq.) and section 330 of the Public Health Service Act (42 U.S.C. 254c).".

TITLE III—FOOD DISTRIBUTION AND EMERGENCY SHELTERS

TRANSFER OF SECTION 32 COMMODITIES

SEC. 301. Section 32 of the Act entitled "An Act to amend the Agricultural Adjustment Act, and for other purposes", approved August 24, 1935 (7 U.S.C. 612c), is amended by adding at the end thereof the following new sentence: "A public or private nonprofit organization which receives agricultural commodities or products under clause (2) of the second sentence of this section may transfer such commodities or products to another public or private nonprofit organization which agrees to use such commodities or products to provide, without cost or waste, nutrition assistance to individuals in low-income groups.".

COMMODITY SUPPLEMENTAL FOOD PROGRAM

SEC. 302. (a) Section 4(a) of the Agriculture and Consumer Protection Act of 1973 (7 U.S.C. 612c note) is amended by striking out "1982, 1983, 1984, and 1985" and inserting in lieu thereof "1986, 1987, 1988, and 1989".

(b) Section 5(a) of such Act (7 U.S.C. 612c note) is amended—

(1) by amending clause (1) to read as follows:

"(1) shall conduct the pilot projects directed at low-income elderly persons (including, where feasible, distribution of commodities to such persons in their homes) which were in existence on the date of enactment of the Domestic Food Assistance Act of 1985, and"; and

(2) by striking out "1982 through 1985" in clause (2) and inserting in lieu thereof "1986 through 1989".

TEMPORARY EMERGENCY FOOD ASSISTANCE PROGRAM

SEC. 303. (a) Section 202 of the Temporary Emergency Food Assistance Act of 1983 (7 U.S.C. 612c note) is amended by adding at the end thereof the following new subsection:

"(c) In addition to any commodities described in subsections (a) and (b), the Secretary may use to carry out this Act agricultural commodities and products made available under clause (2) of the second sentence of section 32 of the Act entitled 'An Act to amend the Agricultural Adjustment Act, and for other purposes', approved August 24, 1935 (7 U.S.C. 612c).".

(b) Section 204(b) of such Act (7 U.S.C. 612c note) is amended by striking out "September 30, 1984, and September 30, 1985" and inserting in lieu thereof "September 30, 1986, September 30, 1987, September 30, 1988, and September 30, 1989".

(c) Section 212 of such Act (7 U.S.C. 612c note) is amended by striking out "1985" and inserting in lieu thereof "1989".

DONATIONS BY MILITARY COMMISSARIES

SEC. 304. (a) Section 2482 of title 10, United States Code, is amended—

(1) by inserting "(a)" after the section designation; and

(2) by adding at the end thereof the following new subsection:

"(b) A commissary store of the Department of Defense may donate surplus, unmarketable food to a local food bank.".

(b) The caption of section 2482 of such title is amended by striking out ": private operation".

TITLE IV—EFFECTIVE DATES

EFFECTIVE DATES

SEC. 401. (a) Except as provided in subsections (b) and (c) of this section, this Act and the amendments made by this Act shall become effective on such dates as the Secretary of Agriculture shall prescribe, taking into account the need for orderly and expeditious implementation, but in no event later than one year after the date of enactment of this Act.

(b) The amendments made by sections 102, 103, 111, 116, 302, 303, and 304 of this Act shall become effective on October 1, 1985.

(c) The amendments made by sections 101 and 115 of this Act shall become effective on April 1, 1986.

SECTION-BY-SECTION DESCRIPTION OF THE DOMESTIC FOOD ASSISTANCE ACT OF 1985

Section 1 provides that this Act may be cited as the "Domestic Food Assistance Act of 1985."

Section 2 sets forth findings of the Congress that: existing hunger and malnutrition are deplorable and without justification; and hunger and malnutrition are complex social and human resource problems requiring coordinated efforts of Federal, State, and local government, public and private organizations, and affected families and individuals.

It also states that it is the policy of the Congress to: periodically review all Federal domestic food assistance programs; make necessary changes to diminish hunger and malnutrition; and provide maximum assistance through domestic food assistance programs to individuals with particular nutritional needs.

TITLE I—THE FOOD STAMP PROGRAM

Earned income deduction

Section 101 amends section 5(e) of the Food Stamp Act to increase the proportion of earned income disregarded for food stamp eligibility and benefit purposes—from 18 to 20 percent effective April 1, 1986. This repeals a reduction from 20 to 18 percent legislated in 1981.

Income exclusions

Section 102 amends section 5 of the Food Stamp Act to make 3 changes in the rules governing income that must be disregarded for food stamp eligibility and benefit purposes.

It would require that Federal educational grants be counted as income for food stamp purposes, to the extent that they are not used for tuition and mandatory school fees and regardless of whether they may be earmarked as "reimbursements" for expenses. Existing law has been interpreted to allow the portion of some grants to be disregarded as reimbursements. The amendment would retain the existing-law disregard of the portion of any grant that is used for tuition and mandatory school fees.

It would require that payments for living expenses made to third parties ("vendor payments") on behalf of a household by State or local governments be counted as money payable directly to the household—if the aid is provided in place of a regular Aid to Families with Dependent Children [AFDC] benefit or a State or local general assistance benefit. However, medical assistance, child care assistance, energy assistance, and emergency and special assistance would continue not to be counted if made as a vendor payment. Under existing law, vendor payments are, in general, disregarded.

It would require that the earnings of participants in Job Training Partnership Act [JTPA] programs be counted as earned income for food stamp purposes. Under existing law, they are disregarded.

Deduction of energy assistance payments

Section 103 amends section 5(e) of the Food Stamp Act to make clear that energy assistance payments made to energy suppliers under the Low-Income Home Energy Assistance Program [LIHEAP] cannot be counted when determining a household's shelter expense deduction for food stamp purposes. It would also allow States to use a "standard utility allowance" for households for whom a LIHEAP payment has been made to a supplier, but who still have out-of-pocket home energy expenses.

Monthly reporting and retrospective budgeting simplification

Section 104 amends sections 5(f) and 6(c) of the Food Stamp Act to require that States use "monthly reporting and retrospective budgeting" for households having earned income or any recent work history, unless the Secretary waives the requirement and allows less frequent reporting or "prospective budgeting." Elderly or disabled households with no earned income, and migrant households, would be subject to prospective budgeting and a requirement to report changes in household circumstances when they occur (rather than monthly). States would have the option of whether to apply monthly reporting and retrospective budgeting to other types of households. Under existing law, migrant households are exempt from both monthly reporting and retrospective budgeting, and elderly or disabled households are exempt from monthly reporting. In all other instances, a State must obtain a waiver if it feels that monthly reporting and retrospective budgeting are not cost-effective for a given recipient group. The proposed amendment would conform food stamp practice with the monthly reporting and retrospective budgeting rules in the Aid to Families with Dependent Children [AFDC] program. It would also conform food stamp law with the general result of the existing "waiver" system—e.g., waivers limiting application of monthly reporting and retrospective budgeting to households with earned income or recent work history.

Categorical eligibility

Section 105 amends sections 5 and 11 of the Food Stamp Act to grant "categorical" (automatic) food stamp eligibility to households in which all members receive either Aid to Families with Dependent Children [AFDC] or Supplemental Security Income [SSI] benefits. It would also stipulate that eligibility for food stamps may not be denied or terminated solely on the basis of an AFDC or SSI eligibility determination. Under existing law, AFDC recipients must pass all food stamp eligibility tests, except for the assets test; SSI recipients must pass

all food stamp tests. The President's Task Force on Food Assistance recommended categorical eligibility for AFDC and SSI recipients and pilot projects on categorical eligibility are currently authorized.

Job search program

Section 106 amends section 6, 11, and 16 of the Food Stamp Act to require that all States operate a "job search program" for food stamp recipients and to provide additional Federal funds to help finance the programs. It also provides that disqualification for failure to meet any of the food stamp program's work requirements is to be for 2 months, or until the requirement is complied with, and that disqualification of a household ends if the member who failed to comply leaves. Under existing law and regulations, enforcement of job search requirements is a State option, Federal funding is limited to the State's share of a $30-million allocation, the length of work-related disqualifications is not specified in law, and disqualification of a household continues even if the non-complying member leaves.

The job search programs that States would be required to operate would be up to them to design, and job search programs could include required job contacts, training and support activities such as job skills assessments, job finding clubs, and job placement services, and payment of job search related expenses such as transportation (although there would be no obligation to pay more than $25 per participant per month). States would also have the authority to limit the applicability of job search requirements by exempting recipients for whom it feels the requirements would be impracticable. Barring State decisions to limit the coverage of their job search programs, job search would be required of all unemployed or underemployed adult (between ages 18 and 60) able-bodied recipients, unless they are caring for a child under age 6 or a disabled person, are students otherwise eligible (i.e., working or with dependent young children), subject to and complying with another program's work requirement, or residents of a drug addiction or alcohlic treatment program.

Increased Federal funding for job search activities would consist of an increase in the basic allocation (from $30 to $40 million in fiscal year 1986, and to $50 million in later fiscal years), and a requirement that the Federal government share in half the cost of any efforts beyond a State's share of the basic allocation.

Issuance of coupons

Section 107 amends section 7 of the Food Stamp Act to allow "staggered" issuance of food stamps throughout the month, rather than at set times every month. It also would prohibit food-price increases relating to the issuance of food stamps. Existing law does not specifically allow for the staggered issuance of food stamps and the President's Task Force on Food Assistance recommended that specific permission be adopted.

Alternative means of coupon issuance

Section 108 amends section 7 of the Food Stamp Act to require the Secretary to have States use alternative means of issuing food stamps if it is determined, in consultation with the Inspector General, that it would improve program integrity. Alternative methods of issuance include using automatic data processing and information retrieval systems, or issuing, instead of food stamps, reusable documents (similar to credit or bank cards).

Redemption of coupons

Section 109 amends section 10 of the Food Stamp Act to prohibit financial institutions accepting ("redeeming") food stamps from retailers from charging a fee for redemption if the food stamps are submitted in accordance with Federal Reserve Board requirements (other than requirements for cancellation). Existing law contains no such prohibition.

Hours of operation

Section 110 amends section 11(e) of the Food Stamp Act to require that State agencies periodically assess the need for extended hours of operation—during evening and weekend hours. Existing law contains no specific provisions in this regard and the President's Task Force on Food Assistance recommended that States be encouraged to keep food stamp offices open during some non-business hours.

Eligibility of the homeless

Section 111 amends section 11(e) of the Food Stamp Act to require that States provide a method of certifying land issuing food stamps to eligible households not residing in a permanent dwelling or without a fixed mailing address. In carrying out this requirement, States would have to take necessary steps to ensure that food stamp participation is limited to eligible households. Existing law contains no specific provisions in this regard and the President's Task Force on Food Assistance recommended that procedures be put in place to ensure that those not having fixed addresses are served by the food stamp program.

Disqualification of retail food stores and civil money penalties

Section 112 amends section 12 of the Food Stamp Act to convert any disqualification of a retail food store into a civil money penalty when the disqualified store is sold or transferred before the disqualification period is completed. The amount of the payment would be calculated in a manner similar to the manner civil money penalties in lieu of disqualifications are now determined: i.e., multiply 10 percent of monthly food stamp redemptions times the number of months remaining in the disqualification period. Disqualification ends on sale of a store under existing law.

Authorization for appropriations

Section 113 amends section 18(a) of the Food Stamp Act to extend the authorization for appropriations through fiscal year 1989, with the following "caps": $13,217,000,000 for fiscal year 1986; $14,034,000,000 for fiscal year 1987; $14,841,000,000 for fiscal year 1988; and $15,702,000,000 for fiscal year 1989.

Prohibition against transfer of funds to the Office of the Inspector General

Section 114 amends section 18 of the Food Stamp Act to prohibit any funds appropriated under the authority of the Food Stamp Act from being transferred to the Agriculture Department's Office of the Inspector General, thereby requiring a separate appropriation. Under present practice, a portion of each year's food stamp appropriation is transferred to the Inspector General's office for use in food-stamp-related investigative activities. A separate appropriation is not sought or made.

Transfer of sales tax imposed on food purchased with food stamps

Section 115 amends section 18 of the Food Stamp Act to require that States transfer to the Federal government an estimated amount equal to the sales taxes collected on food stamp purchases in the State, if such State or local taxes are charged. The requirement would be effective beginning with the April–June quarter of 1986 and the transfers would be required quarterly (within 60 days of the end of a quarter). If a State fails to transfer the appropriate amount, the Secretary would be authorized to withhold amounts otherwise due the State (i.e., the Federal share of State and local administrative costs).

Puerto Rico block grant

Section 116 amends section 19 of the Food Stamp Act to authorize $825 million annually for the Puerto Rico Block Grant for nutrition assistance through fiscal year 1989. It would also revise 3 existing provisions of law affecting the operations of the block grant: The current noncash assistance requirement, now scheduled to be implement in October 1985, would be repealed, allowing the Commonwealth to continue to determine the form of assistance under its block grant; the current requirement that the Commonwealth pay 50 percent of administrative costs matched under the block grant would be deleted; and the current requirement that the Commonwealth use a single State agency to administer its nutrition assistance program would be deleted.

Community work and training program

Section 117 amends the Food Stamp act to add a new section (21) giving States the option to establish community work experience programs, in addition to other work-related activities. States would be allowed to initiate activities providing work experience and limited training to food stamp recipients, or strengthen similar existing efforts. The authority for and limitations on these optional work experience programs would be similar to the authority granted to states for their Aid to Families with Dependent Children [AFDC] recipients in 1981. However, the food stamp work experience programs could, in addition to work in return for benefits, provide for a broader range of work experience and training activities than provided for under workfare or other authorities, and States could limit participation to specific recipient groups most likely to benefit. Each program would be State-designed and would be aimed at improving the employability of participants through actual work experience and training, in order to enable participants to become employed promptly. As with existing food stamp workfare authority, the number of hours of work experience or training would be limited to the value of the household's food stamp allotment divided by the minimum wage, protection for recipients and against displacement of existing employees would be required, and States would receive a reimbursement of half of their administrative and limited participant support costs.

This amendment would allow States to pursue food stamp employment and training programs that are more flexible than under current law, which limits them to either job search activities (requiring a specific number of job contacts) or workfare. It would also complement the requirement, in this bill (section 106), for a job search program that can include training and support components.

TITLE II—NUTRITION SURVEILLANCE

Nutritional status monitoring

Section 201 amends section 1428 of the National Agricultural Research, Extension,

and Teaching Policy Act of 1977 to require that, as a part of our comprehensive nutritional status monitoring program, periodic special surveys be included to determine the nutritional status of particularly vulnerable low-income groups (including low-income mothers, single parents, pregnant women, single elderly persons, and homeless individuals). It would also require: (1) assessment and monitoring of nutrition-related health problems, who faces the greatest risks, and the likely causes of nutrition-related health risks; (2) development of a surveillance system that can tie detection of nutrition-related health risks to means of direct intervention and treatment; and (3) program evaluations to determine the adequacy, efficiency, effectiveness, and effects of nutrition programs in reducing nutrition-related health risks.

The President's Task Force on Food Assistance recommended that the Federal government devote more effort to developing standards and means to measure nutritional status.

TITLE III—FOOD DISTRIBUTION

Transfer of "section 32" commodities

Section 301 would amend section 32 of the Act of August 24, 1935, to allow public or private nonprofit agencies receiving "section 32" commodities to transfer those commodities to other public or private nonprofit organizations that agree to use the commodities to assist low-income groups without cost or waste.

Commodity Supplemental Food Program

Section 302 would amend section 4(a) of the Agriculture and Consumer Protection Act of 1973 by extending, through fiscal year 1989, the suthority for appropriations to obtain commodities for the commodity supplemental food program and other commodity distribution programs. It would also amend section 5(a) of that Act to extend, through fiscal year 1989, the current-law requirement for the provision of Federal funds for State and local administrative operating costs. Finally, it would require the continuation of pilot commodity supplemental food projects for the elderly in existence at the date of enactment.

Temporary Emergency Food Assistance Program [TEFAP]

Section 303 would amend the Temporary Emergency food Assistance Act of 1983 to extend the Temporary Emergency Food Assistance Program [TEFAP] through fiscal year 1989, and to extend the $50 million annual appropriation authorization for costs associated with the provision of commodities to needy persons served by food banks, charitable institutions, hunger centers, soup kitchens, and similar public or private nonprofit agencies, nonprofit public or private agencies. It would also authorize the Secretary of Agriculture to make "section 32" commodities available to carry out the purposes of the Temporary Emergency Food Assistance Act.

Donations by military commissaries

Section 304 would amend section 2482 of title 10 of the United States Code to allow commissary stores of the Department of Defense to donate surplus, unmarketable food to local food banks.

TITLE IV—EFFECTIVE DATES

Section 401 provides that the effective date of the following sections would be October 1, 1985: sections 102, 103, 111, 116, 302, 303, and 304—dealing with income exclusions, deduction of energy assistance payments, eligibility of the homeless, the Puerto Rico block grant, the commodity supplemental food program, the temporary emergency food assistance program, and donations by military commissaries. It also provides that the effective date of sections 101 and 115—dealing with the earned income deduction and the transfer of sales tax imposed on food purchased with food stamps—would be April 1, 1986. All other amendments would be effective on such dates as the Secretary of Agriculture prescribes, taking into account the need for orderly and expeditious implementation—but in no event later than one year after enactment.

Mr. BOSCHWITZ. Mr. President, I am pleased to join Senator DOLE in introducing the Domestic Food Assistance Act of 1985. The purpose of this legislation is to reauthorize and improve the Food Stamp Program. The Domestic Food Assistance Act of 1985 will be a positive and effective step toward alleviating hunger in the United States while being fiscally responsible. The costs of the Food Stamp Program under this bill, will be within the constraints imposed by the budget resolution.

The improvements we make in the program include raising the earned income deduction from 18 to 20 percent and strengthening the job search and work requirements. Increasing the earned income deduction to 20 percent increases the incentive for food stamp recipients to work. Increasing the States' grants for the job search and work requirements will help States provide incentives to food stamp recipients to return to work.

In this bill we pay for these improvements and get the cost of the program within the budget resolution by freezing the block grant to Puerto Rico for food assistance and by requiring States to repay the sales tax collected on food paid for with food stamps.

Once again, with Senator DOLE's leadership, I think we have come up with a pragmatic, responsible approach to reauthorizing the Food Stamp Program.

By Mr. LEVIN (for himself, Mr. GRASSLEY, Mr. DOLE, Mr. THURMOND, Mr. LAXALT, Mr. HATCH, Mr. SIMPSON, Mr. DENTON, and Mr. DECONCINI):

S. 1145. A bill to increase the accountability of, policy coordination by, and management of priorities by agencies through an improved mechanism for congressional oversight of the rules of agencies; to the Committee on the Judiciary.

RULEMAKING PROCEDURES REFORM ACT

Mr. LEVIN. Mr. President, I am today joining with my colleague Senator GRASSLEY, the current chairman of the Administrative Practices Subcommittee of the Senate Judiciary Committee, in introducing the Agency Accountability Act of 1985. Senators DOLE, BOREN, THURMOND, LAXALT, HATCH, SIMPSON, DENTON, and DECONCINI are also cosponsoring this measure, which we believe is a responsible answer to the Supreme Court's Chadha decision in which one and two House legislative vetoes were so sweepingly overturned.

Although the Supreme Court struck down through the breadth of its opinion the existing legislative vetoes over agency rulemaking, as well as legislative veto mechanisms in other areas such as foreign policy, budget and reorganization, the need for this shared-power mechanism has not diminished. Our attention has been focused on, and this bill addresses the area of, agency rulemaking. The executive branch and independent agencies continue to churn out thousands of regulations, directly and significantly affecting our lives, without the politically accountable involvement of the Congress. The reason and need for the legislative veto over agency rulemaking has not changed, only—because of the Supreme Court's decision—the mechanics of its procedures. The bill we are introducing meets the constitutional tests laid out by the Supreme Court in Chadha and at the same time gives Congress the power over these regulations which it should have to assure agency accountability to the public—without creating an unmanageable workload.

The Levin-Grassley legislative bill is similar in some respects to earlier versions, except that it provides for a prohibition on the appropriation of funds for the implementation of any rule for which a joint resolution of disapproval has been passed by both houses of Congress. It uses the constitutional mechanisms of a joint resolution of disapproval which was contained in the earlier versions of the Levin-Boren legislative veto, which means that both houses of Congress and the President are required to pass and sign, respectively, the disapproval resolution. This meets the essential elements of the Chadha decision, which requires involvement by both houses of Congress and presentment to the President.

The bill categorize rules into two areas—major and nonmajor. These are terms with which the agencies and Congress have been familiar over the past several years. The definition of a major rule is contained in the bill, and is the same definition as that contained in S. 1080, which passed the Senate by a vote of 96 to 0 in the 97th Congress.

The reason for distinguishing between major and nonmajor rules is to avoid any unnecessary delay in the implementation of noncontroversial rules. Major rules require more time for analysis because of their likely complexity, but it would be unfortunate to submit other rules which are simpler and less important to the same timeframe. Thus the bill establishes a

90-day delay period from the time the rule is sent to the Federal Register for publication as final and a 45-day delay period for nonmajor rules. "Days" are defined as legislative days. A rule may take effect during either the 90- or 45-day time periods if either House of Congress defeats a joint resolution of disapproval. Expedited procedures are included for the prompt consideration of a resolution of disapproval.

The bill adds the new and important provision establishing an internal mechanism for controlling the appropriation of funds for the implementation or administration of a controversial rule. If both Houses of Congress have passed a joint resolution of disapproval, but the President has vetoed the resolution and Congress has not overturned the veto, the appropriation of funds for that rule is restricted. In that situation a point of order will lie against final passage of any appropriations bill or resolution involving the agency with responsibility for the rule, unless the appropriations bill or resolution has a specific restriction in it which prohibits the use of any of the appropriated funds for the administration or enforcement of the subject rule. This provision is constitutional because it is a housekeeping measure, internal to the Congress. It is not a legislative act requiring presentment to the President; it is merely a statement of Congress' internal rule of procedures with regard to regulations which have been disapproved by both Houses.

Mr. President, Senator GRASSLEY and our other cosponsors have given a great deal of thought to the subject of an appropriate response to the Chadha decision. In the interests of achieving a governmentwide legislative veto mechanism over agency rulemaking we have engaged in a lot of give and take. We are proud of this final product, because it is effective, constitutional and reasonable. I hope our colleagues will join us in support of this measure.

I ask unanimous consent that a copy of the legislation be printed following my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1145

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Rulemaking Procedures Reform Act of 1985".

SEC. 2. (a) Section 551 of title 5, United States Code, is amended—

(1) by striking out paragraph (4) and inserting in lieu thereof the following:

"(4) 'rule' means the whole or part of an agency statement of general or particular applicability designed to implement, interpret, or prescribe law or policy or to describe the organization, procedure, or practice requirements of an agency and includes—

"(A) the approval or prescription for the future of rates, wages, corporate or financial structures or reorganizations thereof, prices, facilities, appliances, services or allowances therefor, or of valuations, costs, or accounting, or practices bearing on any of the foregoing; and

"(B) any amendment, revision, or repeal of such an agency statement.";

(2) by striking out the word "and" in paragraph (13);

(3) by striking out the period at the end of paragraph (14) and inserting a semicolon and the word "and"; and

(4) by inserting immediately after paragraph (14) the following new paragraph:

"(15) 'emergency rule' means a rule which is temporarily effective prior to the expiration of the otherwise specified periods of time for public notice and comment under this subchapter and which was duly promulgated by an agency pursuant to a finding that delay in the effective date thereof would—

"(A) seriously injure an important public interest,

"(B) substantially frustrate legislative policy and intent, or

"(C) seriously damage a person or class of persons without serving any important public interest.".

(b) Section 553(b) of such title is amended by striking out clause (B) and inserting in lieu thereof the following:

"(B) when the agency for good cause finds that public notice and comment are unnecessary due to the routine nature or matter or insignificant impact of the rule, or that an emergency rule should be promulgated.

An agency which finds that clause (A) or (B) of this subsection applies to a rule shall publish in the Federal Register with the final rule a statement of such finding and a brief description of reasons for such finding. The provisions of clauses (A) and (B) of this subsection shall not preclude an agency from—

"(i) inviting persons representing different points of view to submit comments,

"(ii) creating an advisory committee to report, or

"(iii) using such other devices to obtain suggestions,

regarding the content of proposed rules prior to notice of rule making.".

(c) Section 553 of such title is amended—

(1) by striking out subsection (c) and inserting in lieu thereof the following:

"(c) Except as provided in subsection (e) with respect to an emergency rule, and after notice required by this section, the agency shall give interested persons not less than 60 days to participate in the rule making through submission of written data, views, or arguments with or without opportunity for oral presentation. The agency may extend the 60-day period if the agency determines that such period is insufficient to permit diligent interested persons to prepare comments or that other circumstances justify an extension of such period. After consideration of the relevant matter presented, the agency shall incorporate in the rules adopted a concise general statement of their basis and purpose. When rules are required by statute to be made on the record after opportunity for an agency hearing, sections 556 and 557 of this title apply instead of this subsection.";

(2) by redesignating subsection (e) as subsection (f); and

(3) by inserting after subsection (d) the following new subsection:

"(e) Unless earlier withdrawn by the agency, earlier disapproved by a joint resolution of Congress pursuant to chapter 8 of this title, or earlier set aside by court action, an emergency rule shall terminate 120 days after the date on which it is promulgated.".

SEC. 3. (a) Title 5, United States Code, is amended by inserting after chapter 7 the following new chapter:

"CHAPTER 8—AGENCY ACCOUNTABILITY

"Sec.
"801. Findings and purposes.
"802. Definitions.
"803. Agenda; transmission of rules.
"804. Review of agency rules.
"805. Procedures for consideration of joint resolutions.
"806. Relationship to other law.
"807. Enforcement.

"§ 801. Findings and purposes

"(a) The Congress finds and declares that—

"(1) agencies issue a large number of rules that have a significant impact on the Nation;

"(2) these agencies are staffed by persons who are not elected and who are therefore not directly accountable to the public;

"(3) some of the rules issued by these agencies may conflict with or duplicate other rules or may not conform with legislative intent;

"(4) conflicting or duplicative rules may contribute to governmental inefficiency, and rules which do not conform with legislative intent may frustrate the purposes and implementation of congressionally mandated programs; and

"(5) conflicting or duplicative rules and rules which do not conform with legislative intent may also impose unnecessary burdens on State and local governments.

"(b) Therefore, it is the purpose of this chapter to assure increased agency accountability to the public through their elected officials and through adherence to legislative intent in the issuance of agency rules.

"§ 802. Definitions

"For purposes of this chapter:

"(1) The term 'agency' has the same meaning as in section 551(1) of this title.

"(2) The term 'rule' has the same meaning as in section 551(4) of this title, except that such term does not include—

"(A) a rule or statement described in section 553(b)(A) of this title, unless such rule or statement has general applicability and substantially alters or creates rights or obligations of persons outside the agency;

"(B) a rule of particular applicability that approves or prescribes for the future rates, wages, prices, services, or allowances therefor, corporate or financial structures, reorganizations, mergers, or acquisitions thereof, or accounting practices or disclosures bearing on any of the foregoing; and

"(C) a rule if—

"(i) the agency made a finding with respect to such rule under section 553(b)(B) of this title; and

"(ii) on the date on which the agency promulgates the rule, the head of the agency submits a copy of the statement required to be published in the Federal Register under such section to the chairman and ranking minority member of the appropriate committees.

"(3) The term 'joint resolution' means only an unamendable joint resolution which contains no preamble and the matter after the resolving clause of which is as follows: 'That the Senate and the House of Repre-

sentatives disapprove the recommended final rule issued by dealing with the matter of , which rule was transmitted to the Congress on .', the first blank being filled with the name of the agency issuing the rule, the second blank being filled with the title of the rule and such further description as may be necessary to identify it, and the third blank being filled with the date of transmittal of the rule to the Congress.

"(4) The term 'appropriate committee' means the committee of the House of Representatives and the committee of the Senate which has primary legislative jurisdiction over the statute pursuant to which an agency issues a rule.

"(5) The term 'major rule' means—

"(A) a rule or a group of closely related rules that the agency, the President, or an officer of the Government designated by the President reasonably determines is likely to have an annual effect on the economy of $100,000,000 or more in reasonably quantifiable direct and indirect costs; or

"(B) a rule or a group of closely related rules that is otherwise designated a major rule by the agency proposing the rule, or is so designated by the President or an officer of the Government designated by the President, on the ground that the rule is likely to result in—

"(i) a substantial increase in costs or prices for wage earners, consumers, individual industries, nonprofit organizations, Federal, State, or local government agencies, or geographic regions; or

"(ii) significant adverse effects on competition, employment, investment, productivity, innovation, the environment, public health or safety, or the ability of enterprises whose principal places of business are in the United States to compete in domestic or export markets.

"(6) The term 'emergency rule' has the same meaning as in section 551(15) of this title.

"§ 803. Agenda; transmission of rules

"(a) Each agency shall prepare an agenda listing all areas in which the agency intends to propose rules within the following twelve-month period. The agency shall transmit such agenda or relevant portion thereof to the appropriate committee of the Senate and the appropriate committee of the House of Representatives. Failure to list an area of possible rule making on an agenda shall not preclude an agency from proposing or issuing any rule. The agenda, or relevant portion thereof, shall be transmitted to the appropriate committees within one hundred and eighty days after the effective date of this chapter and semiannually thereafter.

"(b) On the day an agency forwards to the Federal Register for publication a recommended final rule, the agency shall transmit to the Secretary of the Senate and the Clerk of the House of Representatives a copy of such rule and a copy of any other materials transmitted to the Federal Register for publication with respect to such rule. The Secretary of the Senate and the Clerk of the House of Representatives are authorized to receive a recommended final rule under this subsection whether the appropriate House is in session, recess, or adjournment.

"(c) On the day on which the Secretary of the Senate and the Clerk of the House of Representatives receive a recommended final rule, the Secretary and the Clerk shall transmit a copy of such rule and any materials received with respect to such rule to the appropriate committees.

"§ 804. Review of agency rules

"(a) For purposes of this section and section 805 of this title—

"(1) 'days' means only days of continuous session of Congress;

"(2) continuity of session is broken only by an adjournment sine die at the end of a Congress; and

"(3) the days on which either House is not in session for more than three days because of an adjournment or recess to a day certain shall be excluded in the computation of days of continuous session of Congress.

"(b) Notwithstanding any other provision of law, any final rule shall be considered a recommendation of the agency to the Congress and shall have no force and effect as a rule unless such rule has become effective in accordance with this chapter.

"(c)(1) Notwithstanding any other provision of law, a recommended final rule shall become effective in accordance with its terms unless—

"(A) in the case of a recommended final major rule, a joint resolution is enacted into law within 90 days after the first day of continuous session of Congress after the day on which such rule is received by the Secretary of the Senate and the Clerk of the House of Representatives under section 803(b) of this title; or

"(B) in the case of a recommended final nonmajor rule, a joint resolution is enacted into law within 45 days after the first day of continuous session of Congress after the day on which such rule is received by such Secretary and such Clerk under such section.

"(2) Whenever an appropriate committee reports a joint resolution pursuant to this chapter, the joint resolution shall be accompanied by a committee report specifying the reasons for the committee's action.

"(d) Notwithstanding paragraph (1) of subsection (c), a recommended final rule may become effective at any time after the day on which either House of Congress defeats a joint resolution, and, in the case of the Senate, a motion to reconsider such joint resolution is disposed of.

"(e) If Congress adjourns sine die at the end of a Congress prior to the expiration of the period specified in subparagraph (A) of subsection (c)(1) with respect to a recommended final major rule, or prior to the expiration of the period specified in subparagraph (B) of such subsection with respect to a recommended final nonmajor rule, as the case may be, the rule shall not become effective during that Congress. The agency which issued such recommended final rule may transmit such rule at any time after the first day of the following Congress in accordance with section 803(b) of this title, and the period specified in subparagraph (A) or (B) of subsection (c)(1), as the case may be, with respect to such rule shall begin on the day such rule is transmitted to the Congress.

"(f)(1) If a recommended final rule of an agency does not become effective under this chapter, the agency may issue a recommended final rule which relates to the same acts or practices as the rule which did not become effective under this chapter. Such recommended final rule—

"(A) shall be based upon—

"(i) the rule making record of the recommended final rule which did not become effective under this chapter; or

"(ii) such rule making record and the record established in supplemental rule making proceedings conducted by the agency in accordance with section 553 of this title, in any case in which the agency determines that it is necessary to supplement the existing rule making record; and

"(B) may reflect such changes as the agency considers necessary or appropriate including such changes as may be appropriate in light of congressional debate and consideration of the joint resolution with respect to the rule.

"(2) An agency, after issuing a recommended final rule under this subsection, shall transmit such rule to the Secretary of the Senate and the Clerk of the House of Representatives in accordance with section 803(b) of this title, and such rule shall only become effective in accordance with this chapter.

"(g) Congressional inaction on or rejection of a joint resolution with respect to a recommended final rule shall not be deemed an expression of approval of such rule.

"§ 805. Procedures for consideration of joint resolutions

"(a) The provisions of this section and sections 802(3), 803(c), and 804(c)(2) of this title are enacted by Congress—

"(1) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such they are deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of joint resolutions; and they supersede other rules only to the extent that they are inconsistent therewith; and

"(2) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

"(b) Except as provided in subsection (e) of this section, joint resolutions shall, upon introduction or receipt from the other House of Congress, be immediately referred by the presiding officer of the Senate or the House of Representatives to the appropriate committee of the Senate or the House of Representatives, as the case may be.

"(c)(1)(A) Except as provided in subparagraph (B) of this paragraph, if the committee to which a joint resolution has been referred does not report such joint resolution—

"(i) in the case of a joint resolution with respect to a recommended final major rule, within 60 days after the first day of continuous session of Congress after the day on which such rule is received by the Secretary of the Senate and the Clerk of the House of Representatives under section 803(b) of this title;

"(ii) in the case of a joint resolution with respect to a recommended final nonmajor rule, within 30 days after the first day of continuous session of Congress after the day on which such rule is received by such Secretary and such Clerk under such section,

it shall be in order to move to discharge the committee from further consideration of such joint resolution.

"(B) If the committee to which a joint resolution transmitted from the other House has been referred does not report such joint resolution—

"(i) in the case of a joint resolution with respect to a recommended final major rule, within 20 days after the date of transmittal of such joint resolution from the other House; or

"(ii) in the case of a joint resolution with respect to a recommended final nonmajor

rule, within 10 days after the date of transmittal of such joint resolution from the other House,

it shall be in order to move to discharge such committee from further consideration of such joint resolution.

"(2)(A) Any motion to discharge under paragraph (1) of this subsection in the Senate may be made by one Senator and is privileged (except that it may not be made after a joint resolution has been reported with respect to the same rule).

"(B) Any motion to discharge under paragraph (1) of this subsection in the House of Representatives must be supported in writing by one-fifth of the Members of the House of Representatives, duly chosen and sworn, is highly privileged, and may be filed—

"(i) in the case of a joint resolution with respect to a recommended final major rule, 20 days after the first day of continuous session of Congress after the day on which the Secretary of the Senate and the Clerk of the House of Representatives receive such rule under section 803(b) of this title; or

"(ii) in the case of a joint resolution with respect to a recommended final nonmajor rule, 10 days after the first day of continuous session of Congress after the day on which such Secretary and such Clerk receive such rule under such section.

"(C) Debate on any motion to discharge under paragraph (1) of this subsection in the Senate or the House of Representatives shall be limited to not more than one hour, the time to be divided in the Senate equally between, and controlled, by the majority leader and the minority leader or their designees, and to be divided in the House of Representatives equally between those favoring and those opposing the motion to discharge. An amendment to the motion is not in order.

"(d)(1) Except as provided in paragraphs (2) and (3) of this subsection, consideration of a joint resolution shall be in accord with the rules of the Senate and of the House of Representatives, respectively.

"(2) When a committee has reported or has been discharged from further consideration of a joint resolution, or when the companion joint resolution from the other House has been placed on the calendar of the first House, it shall be in order, notwithstanding the provisions of rule XXII of the Standing Rules of the Senate or any other rule of the Senate or the House of Representatives, at any time thereafter (even though a previous motion to the same effect has been disagreed to) to move to proceed to the immediate consideration of either such joint resolution. The motion is highly privileged in the House and privileged in the Senate and is not debatable. An amendment to the motion is not in order.

"(3) Debate on a joint resolution shall be limited to not more than two hours (except that when one House has debated its joint resolution, the companion joint resolution shall not be debatable), which shall be divided in the House of Representatives equally between those favoring and those opposing the joint resolution and which shall be divided in the Senate equally between, and controlled, by the majority leader and the minority leader or their designees. A motion further to limit debate is not in order. An amendment to, or motion to recommit, the joint resolution is not in order. A motion to reconsider shall be in order only on the day on which occurs the vote on adoption of the joint resolution, and shall not be debatable. Any other motions shall be decided without debate.

"(e) If a joint resolution has been ordered reported or discharged from the committee of the House to which it was referred, and that House receives a joint resolution with respect to the same rule from the other House, the joint resolution of the other House shall be placed on the appropriate calendar of the first House. If prior to the disposition of a joint resolution of one House, that House receives the companion joint resolution from the other House, the vote in the first House shall occur on the joint resolution of the other House.

"§ 806. Relationship to other law

"The provisions of this chapter supersede any other provision of law requiring action by one or both Houses of Congress for congressional review or disapproval of agency rules to the extent such other provisions are inconsistent with this chapter.

"§ 807. Enforcement

"(a) This section is adopted as an exercise of the power of each House of Congress to determine the rules of its proceedings. The Congress specifically finds that the provisions of this section are essential to the Congress in exercising its constitutional responsibility to monitor and to review exercises by the Executive of delegated powers of a legislative character.

"(b) Except as provided in subsection (c) of this section, after the Senate and the House of Representatives adopt a joint resolution with respect to a rule pursuant to this chapter, it shall not be in order in the Senate or the House to vote on final passage of any bill or resolution making appropriations for the agency which issued such rule unless such bill or resolution contains provisions which prohibit the use of any funds appropriated by such bill or resolution to issue, promulgate, enforce, or otherwise carry out such rule.

"(c) In any case in which, prior to the effective date of this chapter, Federal law provided that a rule subject to this chapter could not take effect if such rule was disapproved by action of only one House of Congress, the provisions of subsection (b) of this section shall apply to such rule on and after the date on which either the Senate or the House of Representatives passes a joint resolution under this chapter with respect to such rule.

"(d) An appeal of a ruling of the presiding officer sustaining a point of order raised under this section shall require the approval of a majority of members of the Senate or the House of Representatives, as the case may be, present and voting, to overrule the ruling of the Presiding Officer. On all appeals under this section there shall be one hour of debate equally divided.".

(b) The table of chapters for part I of such title is amended by inserting after the item relating to chapter 7 the following new item:

"8. Agency Accountability ..... 801.".

SEC. 4. This Act and the amendments made by this Act shall take effect on the first day of the One Hundredth Congress.

Mr. GRASSLEY. Mr. President, 4 years ago, a new administration and a new Senate majority took office, pledged to reduce the pervasive role of Government in the everyday lives of Americans.

Our targets were a tax system which punished initiative and investment, wasteful Government spending which crowded out private sector activity, and pernicious Federal regulation which increased costs for businesses and consumers alike, while intruding on the prerogatives of families and communities.

In these 4 years, Congress has joined with the administration in reforming that tax system. And while we have yet to face squarely the inevitable consequences of mammoth deficits, we have at least slowed the growth of Federal spending.

Yet as we begin a second Reagan administration, and the third Congress since that shift in the Senate, Congress remains, a seemingly hapless bystander in that third, equally vital, area of limiting Government power: regulatory reform. Though the Senate-passed comprehensive regulatory reform legislation in 1982—by a 94 to 0 vote—Congress has not advanced at all since that high point in our effort.

In fact, Congress has suffered a setback in its participation in the regulatory reform process. That setback revolves around what I consider the centerpiece of the congressional role in the regulatory reform process: the legislative veto.

A large piece of the blame for the growth of the Federal regulatory morass falls on Congress for its willingness to abandon its oversight and legislative function in favor of a mass of faceless bureaucrats.

However, Congress had begun to reassert some of its control over the workings of Government through its use of the legislative veto of agency actions—and seemed prepared to flex its muscles still further by expanding its use of the device to all major agency rules—until the Supreme Court stepped into the breach in Chadha versus Immigration and Naturalization Service.

In Chadha, the Court struck down the use of the legislation veto in more than 120 statutes, ruling that the device upset the constitutional scheme dividing powers between the executive and legislative branches.

Because of the difficulties encountered to date in passing comprehensive regulatory reform legislation—and because I believe that the revival and expansion of the legislative veto is crucial to our efforts to make the operations of Government subject once again to the consent of the governed—I have joined with my distinguished colleague, Senator LEVIN, in fashioning separate legislation creating a congressional veto which comports with the requirements of Chadha.

Our legislation creates a two-step process for halting agency action. First, major agency rules, as defined under the bill, will be considered recommendations only until 90 days after they have been reported to Congress. The waiting period for nonmajor bills is 45 days. During that waiting period,

the appropriate committee may commence a joint resolution of disapproval, and the bill establishes procedures for expedited floor consideration of such a resolution.

After 60 days for major rules, and 30 days for a nonmajor bill, the committee may be discharged from consideration of the legislation by a vote of one-fifth of the Members of that House of Congress. If Congress has not acted by the end of the waiting period, the rule may take effect.

Second, the passage of the joint resolution by both Houses of Congress gives rise to a point of order for any appropriations bill involving the relevant agency which does not bar use of Government funds to implement the rule. For rules previously subject by law to a one-House veto, the passage of a joint resolution by either House of Congress would give rise to this point of order. Therefore, even if the President does not sign the joint resolution of disapproval mandated by Chadha, the agency in question will still be prevented from going forward with the rule by lack of funds.

As Senator LEVIN and I come forward with this legislation, I recognize that the regulatory reform fervor within Congress has waned somewhat. For one thing, the need to act now on reducing the budget deficit has dwarfed all other economic issues. And in fact, administration officials, engaged in an experiment with prior review of agency action under Executive Order 12498, have encouraged Congress to hold off until they have had a chance to review that process.

While I agree that a resolution of our budget crisis is the paramount issue of this Congress, I also believe that we can find time to move forward on an issue which has been a focus of congressional attention now for nearly 10 years. A voluminous hearing record—including 10 days of hearings before the Judiciary Committee and 11 days before the Government Affairs Committee—proceeded Senate passage of our comprehensive regulatory reform proposal in 1982, further hearings followed my reintroduction of that proposal as S. 1080 in the 98th Congress, and specific hearings on the legislative veto question followed the Chadha decision. And let me add that the experiment of the administration in tightening its own internal control of the regulatory process, while welcome, is no substitute for Congress' reestablishing its own prerogative to direct and oversee the operations of the executive branch.

Mr. President, this proposal is a reasonable and workable way for Congress to reassert itself in setting the policies that Americans must abide by at home, in the workplace, and in the community. We cannot afford to let another session go by without taking action on this vital issue involving not just the interrelationship of the coequal branches of Government, but the fundamental right of Americans to control their Government through the actions of their elected leaders.

Mr. President, I ask that a summary of the legislation be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF LEVIN-GRASSLEY LEGISLATIVE VETO BILL

The Levin-Grassley legislative veto bill for the 99th Congress is similar to earlier versions, except that it provides for a prohibition on the appropriation of funds for the implementation of any rule for which a joint resolution of disapproval has passed both houses of Congress. It continues to use the constitutional mechanism of a joint resolution of disapproval, which means that both houses of Congress and the President are required to pass and sign, respectively, the disapproval resolution. This meets the essential elements of the Chadha decision. Two timetables are established by the bill—one for major rules and one for non-major rules. Non-major rules would not take effect for 45 days and major rules would not take effect for 90 days after they are sent to Congress, which is the same day on which they are sent to the Federal Register for publication as final. "Days" are defined as "legislative days." A rule may take effect during either the 45 or 90 day time periods if either house of Congress defeats a joint resolution of disapproval. There are expedited procedures for the consideration of a resolution of disapproval.

A short summary of each section of the bill follows:

SECTION 1. The title of the bill.

SEC. 2. Definition of the term "rule" and extension of the notice and comment period from 30 days to 60 days.

SEC. 3. Other definitions. The veto provisions pertain to most rules of general applicability. Provision is made for the immediate implementation of a rule without the legislative veto procedure where an emergency or other exigent circumstance exists. Such rules, however, can remain effective for no more than 120 days.

PROCEDURES. Each agency is to semiannually prepare a list of the areas in which it intends to propose rules in the following 12 months and transmit that list to the Congress. On the day the agency forwards a rule to the Federal Register for publication in final, the agency shall also send a copy of the rule and accompanying documents to each house of Congress. The rule is then referred immediately to the committee having jurisdiction over the program under which the rule is being promulgated.

THE VETO. Any rule subject to the legislative veto procedure shall be considered a recommended final rule and cannot take effect before the end of a period of 45 legislative days with respect to non-major rules and 90 legislative days with respect to major rules, from the day on which it was submitted, excluding from the count any recess or adjournment of more than three days. However, a rule may take effect, regardless of the 45 or 90 day period, if either House of Congress votes to reject a joint resolution of disapproval. If a recommended final rule is subject to a joint resolution of disapproval enacted into law, the agency may issue another rule relating to the same subject and following the same legislative veto procedure required by this bill. Congressional inaction on or rejection of a joint resolution of disapproval is not to be viewed as an expression of approval of the subject rule.

EXPEDITED PROCEDURES. Expedited procedures are provided for consideration of a resolution of disapproval in both the House and the Senate.

POINT OF ORDER ON APPROPRIATIONS. If the Senate and House have passed a joint resolution of disapproval pursuant to this Act, then a point of order will lie against any appropriations bill, amendment or resolution, providing money for the relevant agency, unless such bill, amendment, or resolution contains an express prohibition on the use of any of the appropriated funds for the implementation of the subject rule. This point of order will lie regardless of whether or not the joint resolution of disapproval has been enacted into law.

SEC. 4. This act will take effect on the first day of the 100th Congress.

Mr. BOREN. Mr. President, I am pleased to again join my colleague from Michigan, Senator LEVIN, in introducing a bill, known as the Agency Accountability Act of 1985, to allow for a legislative veto of Federal agency regulations.

This act would allow both Houses of Congress the opportunity to consider agency recommendations before such regulations would go into effect. In the case of a major rule, one which has an economic impact of $100 million or more, the Congress would have 90 days while in session to consider such a new regulation before it could take effect. This will ensure that our elected Representatives have a final check on major governmental policies set down by bureaucratic officials.

In the case of a rule that does not have as large an impact, Congress would have 45 days to consider a possible veto of the new regulation. In both cases, the House and Senate committees, with primary legislative jurisdiction in that particular area, have a time limit to consider the regulation prior to its effective date. If it is justified by the committee to be in the public's best interest and the intent of Congress, no action would be required. If, however, the regulation is met with opposition, the committee may recommend a joint resolution to veto the rule, requiring a two-thirds vote of each House.

Congress has a constitutional responsibility to monitor and review mandates of our Government agencies. While we delegate a great deal of the implementation of such policy to these agencies, it is our job to see that this is carried out with congressional intent.

Our Government is a government of the people. Laws should not be made by bureaucrats who are not elected by and accountable to the people.

Many of the rules and regulations which agencies issue not only cause redtape, frustration, lengthy delays, and paperwork, but often cause severe economic hardships on individuals and

businesses in this country. It only seems right, that the elected and accountable representation in our Congress should have the responsibility and opportunity to intervene before some of these kinds of rules produced by our appointed agencies come into effect.

Often, intervention after the fact can be too late to prevent the expenditure of large amounts of money by the private sector to comply with the unneeded regulations. The duty of oversight by the Congress is a very important responsibility.

The Code of Federal Regulations at present fills over 111,830 pages contained in 191 volumes which take up a staggering 18 feet in shelf length. This represents a tremendous time and economic burden being placed upon the people, often without advance review by their own elected officials.

Senator LEVIN, whom I greatly admire and appreciate for his untiring efforts in again bringing this proposal before the Senate, has detailed the purpose and workings of the bill. I will not reiterate those points, but rather close with this very basic thought.

The Declaration of Independence sets forth that our rights are secured by, "governments instituted among men, deriving their just powers from the consent of the governed." The power is in the people and the people exercise that power through their elected representatives. That power is not meant to be subdivided by anyone, especially by a nonelected bureaucracy.

By Mr. HATFIELD (for himself, Mr. FORD, Mr. DOLE, Mr. JOHNSTON, Mr. MCCLURE, Mr. HOLLINGS, Mr. ABDNOR, Mr. METZENBAUM, Mr. BUMPERS, Mr. MOYNIHAN, Mr. PACKWOOD, Mr. COCHRAN, Mr. THURMOND, Mr. BURDICK, Mr. ZORINSKY, Mr. CRANSTON, Mr. WALLOP, and Mr. LAUTENBERG):

S.J. Res. 136. Joint resolution to authorize and request the President to issue a proclamation designating the calendar week beginning with Sunday, April 13, 1986, as "National Garden Week"; to the Committee on the Judiciary.

NATIONAL GARDEN WEEK

● Mr. HATFIELD. Mr. President, today I am introducing a joint resolution requesting and authorizing President Reagan to designate the calendar week of April 13, 1986, as "National Garden Week."

The contributions of American gardeners range from the beautification of our environment to the production of fresh fruits and vegetables. Gardening provides a healthy, relaxing hobby for both young and old Americans. I find gardening to be an enjoyable and rewarding pastime.

As I walked across the Capitol Grounds this week, I was greatly impressed by the well-tended flower beds that add so much to the esthetic beauty of our Capitol. In other parts of America, flower gardens and window boxes bring enjoyment and satisfaction to many, beautifying neighborhoods and apartment buildings.

Throughout our Nation's history, gardeners have made invaluable contributions to the quality of life in our country. Many famous Americans have been avid gardeners. Thomas Jefferson, an enthusiastic practitioner of scientific farming and gardening, conducted numerous experiments at Monticello. Contemporaries said that he was always looking for new plants and seed with which to experiment. In a letter to a friend he remarked, "But though an old man, I am but a young gardener."

Henry Mitchell, one of my favorite authors, wrote a book entitled "The Essential Earthman," in which he describes the art of gardening quite succintly:

Leisure, slowness, contemplation: In an age of presumed efficiency and professionalism, these amateur virtues are perhaps despised, but they may underlie the greatest joys of gardening, and of life. There are no green thumbs or black thumbs. There are only gardeners and nongardeners. Gardeners are the ones who ruin after ruin get on with the high defiance of nature herself, creating, in the very face of mere chaos and tornado, the bower of roses and the pride of irises. * * * Patience, and freedom from fretting, are supreme gardening virtues.

Gardening instills in us a greater appreciation and respect for the natural beauty of our country. It inspires us to take greater care in preserving and protecting our precious natural resources, of which trees and plants are vital elements.

Gardening contributes to our Nation's economic health, as well. The production and sale of seeds, plants, and gardening tools provide thousands of jobs across the country, and constitute an active and growing industry.

By designating the third week in April as "National Garden Week," we will provide the stimulus for Federal, State, and local government agencies, as well as private citizens and organizations, to recognize the important contributions that have been made toward preserving traditional American values of individual initiative and caring concern for our environment.●

ADDITIONAL COSPONSORS

S. 54

At the request of Mr. D'AMATO, the name of the Senator from Michigan [Mr. LEVIN] was added as a cosponsor of S. 54, a bill to establish a Federal annuity program to compensate participants in private pension plans which terminated before July 1, 1984, for nonforfeitable pension benefits which were lost by reason of the termination, and for other purposes.

S. 361

At the request of Mr. MOYNIHAN, the name of the Senator from Hawaii [Mr. INOUYE] was added as a cosponsor of S. 361, a bill to amend the Internal Revenue Code of 1954 to make permanent the deduction for charitable contributions by nonitemizers.

S. 408

At the request of Mr. WEICKER, the name of the Senator from Oregon [Mr. HATFIELD] was added as a cosponsor of S. 408, a bill to amend the Small Business Act to provide program levels, salary and expense levels, and authorizations for the Small Business Administration's programs for fiscal years 1986, 1987, and 1988, and for other purposes.

S. 523

At the request of Mr. ARMSTRONG, the names of the Senator from Oklahoma [Mr. BOREN], and the Senator from Florida [Mrs. HAWKINS] were added as cosponsors of S. 523, a bill to prohibit the payment of certain agricultural incentive payments to persons who produce certain agricultural commodities on highly erodible land.

S. 531

At the request of Mr. DECONCINI, the name of the Senator from Texas [Mr. BENTSEN] was added as a cosponsor of S. 531, a bill to authorize the appropriation of funds for the operation and maintenance of a Special Operations Wing of the Air Force Reserve, to authorize the appropriation of funds for the operation and maintenance of the Directorate of the Department of Defense Task Force on Drug Enforcement, and to require certain reports.

S. 538

At the request of Mr. METZENBAUM, the name of the Senator from North Dakota [Mr. ANDREWS] was added as a cosponsor of S. 538, a bill to amend the Federal Food, Drug, and Cosmetic Act to provide for warnings concerning the use by children of drugs containing aspirin, and for other purposes.

S. 680

At the request of Mr. THURMOND, the name of the Senator from Montana [Mr. MELCHER] was added as a cosponsor of S. 680, a bill to achieve the objectives of the multifiber arrangement and to promote the economic recovery of the U.S. textile aand apparel industry and its workers.

S. 729

At the request of Mr. DURENBERGER, the name of the Senator from North Carolina [Mr. HELMS] was added as a cosponsor of S. 729, a bill to amend the Internal Revenue Code of 1954 to make permanent the rules relating to imputed interest and assumption of loans, and for other purposes.

S. 797

At the request of Mr. HATCH, the names of the Senator from Florida [Mrs. HAWKINS] and the Senator from North Carolina [Mr. HELMS] were added as cosponsors of S. 797, a bill to authorize an employer to pay a youth employment opportunity wage to a person under 20 years of age from May through September under the Fair Labor Standards Act of 1938 which shall terminate on September 30, 1987, and for other purposes.

S. 882

At the request of Mr. CRANSTON, the name of the Senator from Tennessee [Mr. SASSER] was added as a cosponsor of S. 882, a bill to amend the Peace Corps Act to establish a Peace Corps National Advisory Council, to establish a policy of providing opportunities for a volunteer corps of at least 10,000, and to provide for nonpartisan appointments.

S. 908

At the request of Mr. MCCONNELL, the name of the Senator from Utah [Mr. HATCH] was added as a cosponsor of S. 908, a bill to provide market expansion and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, and for other purposes.

S. 945

At the request of Mr. THURMOND, the name of the Senator from North Dakota [Mr. ANDREWS] was added as a cosponsor of S. 945, a bill to recognize the organization known as the National Association of State Director of Veterans' Affairs, Inc.

S. 959

At the request of Mr. DANFORTH, the name of the Senator from South Carolina [Mr. THURMOND] was added as a cosponsor of S. 959, a bill to amend the Coastal Zone Management Act of 1972 to provide authorization of appropriations, and for other purposes.

S. 1093

At the request of Mr. MATHIAS, the name of the Senator from Missouri [Mr. DANFORTH] was added as a cosponsor of S. 1093, a bill to amend the patent law to restore the term of the patent grant in the case of certain products for the time of the regulatory review period preventing the marketing of the product claimed in a patent.

SENATE JOINT RESOLUTION 10

At the request of Mr. KENNEDY, the name of the Senator from Pennsylvania [Mr. HEINZ] was added as a cosponsor of Senate Joint Resolution 10, a joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for women and men.

SENATE JOINT RESOLUTION 24

At the request of Mr. BRADLEY, the names of the Senator from California [Mr. CRANSTON] and the Senator from Pennsylvania [Mr. SPECTER] were added as cosponsors of Senate Joint Resolution 24, a joint resolution to designate the month of October 1985 as "National Make-A-Wish Month."

SENATE JOINT RESOLUTION 93

At the request of Mr. METZENBAUM, the names of the Senator from New Mexico [Mr. DOMENICI], the Senator from Delaware [Mr. ROTH], the Senator from Illinois [Mr. SIMON], the Senator from Nebraska [Mr. EXON], the Senator from Vermont [Mr. LEAHY], the Senator from West Virginia [Mr. ROCKEFELLER], and the Senator from Alabama [Mr. HEFLIN] were added as cosponsors of Senate Joint Resolution 93, a joint resolution to designate the month of May 1985 as "Better Hearing and Speech Month."

SENATE JOINT RESOLUTION 122

At the request of Mr. BRADLEY, the names of the Senator from South Carolina [Mr. HOLLINGS], and the Senator from Nevada [Mr. LAXALT] were added as cosponsors of Senate Joint Resolution 122, a joint resolution to authorize the President to proclaim the last Friday of April each year as "National Arbor Day."

SENATE JOINT RESOLUTION 125

At the request of Mr. LEAHY, the names of the Senator from Arkansas [Mr. PRYOR], the Senator from West Virginia [Mr. ROCKEFELLER], the Senator from South Carolina [Mr. THURMOND], and the Senator from South Carolina [Mr. HOLLINGS] were added as cosponsors of Senate Joint Resolution 125, a joint resolution designating the week of June 23, 1985, through June 29, 1985, as "Helen Keller Deaf-Blind Awareness Week."

SENATE CONCURRENT RESOLUTION 41

At the request of Mr. ARMSTRONG, the name of the Senator from Washington [Mr. GORTON] was added as a cosponsor of Senate Concurrent Resolution 41, a concurrent resolution expressing the sense of the Congress that corporate income tax rates should remain graduated.

SENATE CONCURRENT RESOLUTION 47

At the request of Mr. HEINZ, the names of the Senator from Nebraska [Mr. ZORINSKY], the Senator from Virginia [Mr. WARNER], the Senator from Georgia [Mr. NUNN], the Senator from South Carolina [Mr. THURMOND], and the Senator from West Virginia [Mr. ROCKEFELLER] were added as cosponsors of Senate Concurrent Resolution 47, a concurrent resolution observing the 20th anniversary of the enactment of the Older Americans Act of 1965.

SENATE RESOLUTION 82

At the request of Mr. D'AMATO, the name of the Senator from North Dakota [Mr. ANDREWS] was added as a cosponsor of Senate Resolution 82, a resolution to preserve the deduction for State and local taxes.

SENATE RESOLUTION 112

At the request of Mr. COHEN, the name of the Senator from Georgia [Mr. NUNN] was added as a cosponsor of Senate Resolution 112, a resolution relating to bilateral discussions between the United States and the Soviet Union to ban chemical weapons.

SENATE RESOLUTION 148

At the request of Mr. ZORINSKY, the name of the Senator from Arkansas [Mr. BUMPERS] was added as a cosponsor of Senate Resolution 148, a resolution commemorating the 50th anniversary of the Rural Electrification Administration.

SENATE RESOLUTION 162—ORIGINAL RESOLUTION REPORTED WAIVING CONGRESSIONAL BUDGET ACT

Mr. GOLDWATER, from the Committee on Armed Services, reported the following original resolution; which was referred to the Committee on the Budget:

S. RES. 162

Resolved, That pursuant to section 303(c) of the Congressional Budget Act of 1974, the provisions of section 303(a) of such Act was waived with respect to the consideration of S. 1029, a bill to authorize appropriations for the military functions of the Department of Defense and to prescribe personnel levels for the Department of Defense for fiscal year 1986, and for other purposes.

Such a waiver is necessary because section 303(a) of the Congressional Budget Act of 1974 provides that is shall not be in order in either House of Representatives or the Senate to consider any bill or resolution (or amendment thereto) which provides new spending authority described in section 401(c)(2)(C) of such Act to become effective during a fiscal year until the first concurrent resolution on the budget for such year has been agreed to pursuant to section 301 of such Act.

For the foregoing reasons, pursuant to section 303(c) of the Congressional Budget Act of 1974, the provisions of section 303(a) of such Act are waived with respect to S. 1029.

SENATE RESOLUTION 163—EXPRESSING CONCERN OVER FETAL PAIN

Mr. HUMPHREY submitted the following resolution; which was referred to the Committee on the Judiciary:

S. RES. 163

Whereas medical evidence provides convincing proof that the human fetus is capable of sensing organic pain at stages in gestation prior to birth;

Whereas scientific advances have brought about a growing awarness that the human fetus is a distinct and separate human life;

Whereas in standard medical practice, physicians use anesthetics and analgesics to prevent pain when performing operations on a human fetus;

Whereas organic pain, as is suffered by the human fetus during abortion procedures, is cruel and inhuman; and

Whereas the Federal Government and State governments, within their respective

jurisdictions, have a compelling interest in preserving the dignity of all human life and therefore have an interest in protecting the human fetus from organic pain experienced during abortion procedures that do not utilize anesthetics or analgesics: Now, therefore, be it

Resolved, That the Senate encourages the Congress to seek the appropriate methods of giving the human fetus the protection of the Constitution and the laws of the United States from organic pain experienced during abortion procedures that do not utilize anesthetics or analgesics.

SEC. 2. The Senate encourages the States to seek appropriate methods to protect the human fetus from organic pain experienced during such procedures.

Mr. HUMPHREY. Mr. President, scientific advances have brought about a growing awareness that the human fetus is a distinct and separate human life. Medical technology has provided convincing proof that the human fetus is capable of sensing organic pain prior to birth. All of the body parts needed to experience pain are in place as early as 8 weeks, and are already well-developed in a 12-week-old fetus. Scientific evidence also shows that the fetus reacts to pain and moves away from painful stimuli. By the end of the fifth week, a tap on the mouth of the fetus will cause the lips to draw back. By 10 weeks, the palms of the hands are sensitive to touch, and at 11 weeks, the face and extremities respond to tactile stimuli. Just as in an adult, the motions to get away originate at the spinal cord level and not in the cortex of the brain.

In standard medical practice, physicians use analgesics and anesthetics to prevent pain when performing operations on a human fetus.

Mr. President, in cases where anesthetics or analgesics are not administered during abortion procedures, the organic pain suffered by the human fetus is cruel and inhuman. This Congress has the responsibility to preserve the dignity of all human life, and therefore has a compelling interest in protecting the human fetus from organic pain experienced during abortions that do not utilize anesthetics or analgesics.

Mr. President, today I am introducing legislation that declares that Congress should seek the appropriate methods of giving the human fetus the protection of the Constitution and the laws of the United States from organic pain experienced during abortion procedures that do not utilize anesthetics or analgesics. We cannot measure the sum agony of these human beings during abortion procedures. We can only know that it was real. This legislation recognizes that truth, and provides for the unborn human being the same dignity we bestow upon all other human beings.

SENATE RESOLUTION 164—AUTHORIZING REPRESENTATION BY THE SENATE LEGAL COUNSEL IN THE CASE OF UNITED STATES V. JOSEPH MATRANGA

Mr. DOLE (for himself and Mr. BYRD) submitted the following resolution; which was considered and agreed to.

S. RES. 164

Whereas, the case of *United States* v. *Joseph Matranga, et al.,* Criminal Action No. 84-0569-E, is pending in the United States District Court for the Southern District of California;

Whereas, the defendant Joseph Matranga has moved for a new trial in that case and has subpoenaed Philip R. Manuel, a former member of the staff of the Permanent Subcommittee on Investigations, to testify and to produce documents;

Whereas, William B. Gallinaro, another former employee of the Permanent Subcommittee on Investigations, is also expected to be served with a subpoena to testify and to produce documents;

Whereas, by the privileges of the Senate of the United States and Rule XI of the Standing Rules of the Senate, no evidence under the control or in the possession of the Senate can, by the judicial process, be taken from such control or possession but by permission of the Senate;

Whereas, pursuant to sections 703(a) and 704(a)(2) of the Ethics in Government Act of 1978, 2 U.S.C. §§ 288b(a) and 288c (a)(2) (1982), the Senate may direct the Senate Legal Counsel to defend former employees of the Senate in any proceeding with respect to any subpoena or order directed to them in their former official capacity; Now, therefore be it

Resolved, That the Senate Legal Counsel is directed to defend Philip R. Manuel and William B. Gallinaro with respect to the subpoenas to them in the case of *United States* v. *Joseph Matranga, et al.,* Criminal Action No. 84-0569-E, in the Southern District of California.

SENATE RESOLUTION 165—REGARDING TAX INCREASES IN THE VALUE OF LIFE INSURANCE

Mr. HEINZ (for himself, Mr. PRYOR, Mr. SYMMS, and Mr. MATSUNAGA) submitted the following resolution; which was referred to the Committee on Finance.

S. RES. 165

Whereas the President of the United States and the Congress are engaged in an effort to reform the tax code to achieve greater simplicity and fairness along with lower marginal tax rates;

Whereas various proposals would impose a tax on the annual increase in the value of permanent life insurance policies either on a current or prospective basis;

Whereas permanent life insurance policies feature level premium payment plans which allow policyholders to space the cost of their insurance protection evenly over their lifetime and cash values are simply a by-product of this level premium feature;

Whereas a tax on the annual increase in the value of permanent life insurance would violate the basic tax principle that tax should be imposed only on amounts actually or constructively received, because life insurance policy cash values are not realized until the policy is reduced or surrendered;

Whereas a tax on the annual increase in the value of permanent life insurance would substantially undercut the market for permanent life insurance, thereby diminishing the capital provided to the economy by the life insurance industry;

Whereas a tax on the annual increase in the value of permanent life insurance would discourage the purchase of adequate amounts of life insurance, would result in an underinsured population, and would therefore create pressure on the Federal Government to provide more expensive Government funded economic protection;

Whereas a tax on the annual increase in the value of permanent life insurance would have its greatest impact on older policyholders whose income may have been reduced because of retirement, and would therefore be discriminatory against older and retired Americans;

Whereas the Congress and the President of the United States concluded less than one year ago a complete revision of life insurance company and product taxation, with Congress and the President having reached agreement with each other and with the industry on the appropriate tax law applicable to the increase in the value of permanent life insurance policies;

Whereas continued debate on, and scrutiny of, these recently settled issues could chill the American public's ability and desire to purchase adequate life insurance protection: now therefore, be it

Resolved, That it is the sense of the Senate to urge the President and the Secretary of the Treasury to exclude from any tax reform plan any proposal to impose a tax on the annual increase in the value of permanent life insurance.

● Mr. HEINZ. Mr. President, today I am submitting a resolution to express the sense of the Senate that would urge the President of the United States and the Secretary of the Treasury to reject any tax reform proposal which would impose a tax on the annual increase in the value of permanent life insurance.

Most of the tax reform proposals now before Congress, including Bradley-Gephardt (S. 409) and Kemp-Kasten (S. 325) would, either directly or indirectly, include annual increases in the value of ordinary life insurance policies in the taxable interest income of policyholders. The Treasury Department tax reform proposal released last November would not only tax this cash value, which is called inside buildup, but would also treat borrowing against life insurance policies not as loans which must be paid back with interest, but as current income taxable to policyholders.

Taxing life insurance in this manner would be a radical departure from current policy which recognizes taxable income only in the event of actual or constructive receipt. Annual increases in the cash surrender value of whole life insurance are not income to the policyholder because he or she cannot gain access to these moneys without surrendering the contract in whole or in part, thereby sacrificing the death

protection provided. Advocacy of such a tax reflects a misunderstanding of the nature and purpose of whole life insurance. Whole life insurance is not now and was never intended to be a tax loophole. In fact, it predated the income tax by about 200 years. The concept of whole life insurance evolved in 18th-century England because of widespread dissatisfaction with term insurance. Most insureds were forced to let their term policies lapse because they couldn't afford the rapidly escalating premiums as they got older. This is still true today; 99 percent of all term insurance is allowed to lapse before any claim can be made against it.

To remedy this problem, whole life was structured so that the premiums would remain level over the duration of the policy. Companies accomplished this by collecting higher premiums than needed to cover the risk of death in the early years, and investing the difference. Earnings on these investments—inside buildup—funded the eventual death benefit without raising costs to policyholders as they aged. This system enabled people of modest means to provide for the economic security of their families.

Taxing inside buildup would be unsound social and economic policy. Many current and prospective policyholders would be forced either to surrender their contracts or to try to make do with less insurance than they need. The elderly would be hit the hardest of all because the cash value of whole life increases most rapidly in old age so that the premium can stay level. Taxes on this unrealized appreciation would escalate steeply just when people most need the insurance they have paid for over 30 or more years. Ironically, whole life would end up with all of the disadvantages of term insurance.

The U.S. economy is also likely to suffer adverse consequences if inside buildup is taxed. Aside from being a pillar of economic security to many millions of average American families, the assets which buildup in whole life policies to eventually fund death benefits are a major source of capital formation in our economy. In 1983 alone, life insurance contributed $56.6 billion to U.S. capital markets including Government securities, corporate stocks and bonds, public utility railroad bonds, and real properties of all kinds.

Any temptation by wealthy individuals to abuse the system by disguising tax-sheltered investments as life insurance was effectively removed by this Congress just last summer as part of the Deficit Reduction Act of 1984. The comprehensive life insurance tax reform provisions contained in that legislation were the result of over 2 years of intensive study. After careful deliberation, Congress saw no need to change the taxation of life insurance products any further.

In light of these facts, the cosponsors of this resolution seriously question whether any worthwhile tax reform goal would be served by taxing inside buildup. The income of 61 percent of those who own life insurance is less than $25,000 per year. These are the very people who already pay their fair share of taxes and can least afford either the increased costs which would accompany the enactment of such a proposal, or the consequences of inadequate coverage.

Mr. President, I will not dwell at length on the other costs this shortsighted proposal could inflict, such as the long-range hidden costs placed on social service and welfare programs of the Federal Government to provide what individuals have heretofore been able to provide for themselves. It should be obvious that Government programs to replace the individual initiatives which have been recognized and encouraged since the earliest days of the Tax Code would be a far more costly alternative in the long run.

For all these reasons, Mr. President, I urge all our colleagues to join in sponsoring this resolution.●

● Mr. PRYOR. Mr. President, I'm pleased to join my colleague from Pennsylvania, Mr. HEINZ, and others in submitting this sense-of-the-Senate resolution expressing our support for the continuation of the present tax treatment of the inside buildup of life insurance policies. This is an extremely important issue, Mr. President, and I hope other Senators will join in this effort.

Mr. President, since the inception of the Federal income tax, in 1913, the annual increase in the cash surrender value of life insurance products has not been taxed. This tax and social policy has served us well, and people have been encouraged to provide for their families through the purchase of life insurance. The purchase of insurance is not principally an investment, Mr. President, but is instead made for other reassons, primarily the protection of family in the event of the death of the policyholder.

Under current law, the policyholder is not taxed on the annual increase in the cash surrender value, or inside buildup. In its November 1984 tax reform proposal, however, the Department of the Treasury proposed that the inside buildup be taxed annually to the policyholder. This proposal, if enacted, would require that taxpayers include in their income each year the increase in the cash surrender value over the basis in their life insurance contract. The taxation of the inside buildup is unwise for several reasons, Mr. President, and I hope we can adopt this sense-of-the-Senate resolution, and reject this proposal.

First, as I've stated earlier, life insurance is purchased primarily to protect one's family in the event of the death of the insured. It is not thought of as an investment vehicle by most people. When most people think of investing money they usually look to savings accounts, CD's, real estate, IRA's, or other forms of investment where the returns are usually better, and there is much more liquidity.

Second, permanent life insurance coverage is purchased primarily by middle-income taxpayers. It's not something that the very wealthy use to shelter income from taxes. These people use tax-exempt bonds and other investments. In fact, a recent study showed that about two-thirds of all permanent life insurance was purchased by persons with family incomes of $25,000 a year or less.

Third, a life insurance contract is different than other types of investments. The cash surrender value is really an ancillary part of the thing purchased. What you are really purchasing is protection against the risk of death, and much of the cost of the policy goes toward this end, whereas in other types of products the entire interest earned, plus the initial contribution, can be recovered.

Fourth, Mr. President, the Congress made significant changes just last year in the Tax Reform Act of 1984 with respect to insurance. We completely changed the taxation of life insurance companies, and more importantly for purposes of this debate, we put strict definitions in the Tax Code (section 7702) of a life insurance contract. The reason these definitions were put into the code was to ensure that products receiving tax treatment as life insurance policies were indeed life insurance policies, and not some other type of investment disguised as life insurance. These changes will prevent products with a significant investment portion from qualifying as life insurance. Since these changes have only been in effect a few months, it seems we shouldn't legislate in this area again.

Finally, Mr. President, this isn't a simplification proposal. It is complex. If we are serious about simplifying the tax system, and want to make it easier to comply with, we should work in other areas, rather than trying to pass a provision that will only add to the complexity.

For all of these reasons, Mr. President, I would hope that this provision is not included in the final package of the Treasury Department. I urge my colleagues to join in this resolution, and I commend the efforts of my colleague from Pennsylvania.●

AMENDMENTS SUBMITTED

INTERNATIONAL SECURITY AND COOPERATION ACT

HAWKINS AMENDMENT NO. 113

(Ordered to lie on the table.)

Mrs. HAWKINS submitted an amendment intended to be proposed by her to the bill (S. 960) to amend the Foreign Assistance Act of 1961, the Arms Export Control Act, and other acts to authorize appropriations for the fiscal year 1986 for international security and development assistance, the Peace Corps, the Inter-American Foundation, and the African Development Foundation, and for other purposes; as follows:

On page 64, between lines 16 and 17, insert the following:

INTERNATIONAL NARCOTICS CONTROL COMMISSION

SEC. 914. (a) There is established the International Narcotics Control Commission (hereafter in this section referred to as the "Commission").

(b) The Commission is authorized and directed—

(1) to monitor and promote international compliance with narcotics control treaties, including eradication, money laundering, and narco-terrorism; and

(2) to monitor and encourage United States Government and private programs seeking to expand international cooperation against drug abuse and narcotics trafficking.

(c)(1) The Commission shall be composed of fifteen members as follows:

(A) Six Members of the House of Representatives appointed by the Speaker of the House of Representatives. Four members shall be selected from the majority party and two shall be selected, after consultation with the minority leader of the House, from the minority party.

(B) Six Members of the Senate appointed by the President of the Senate. Four members shall be selected from the majority party of the Senate, after consultation with the majority leader, and two shall be selected, after consultation with the minority leader of the Senate, from the minority party.

(C) One member of the Department of State appointed by the President.

(D) One member of the Department of Justice appointed by the President.

(E) One member of the Department of the Treasury appointed by the President.

(2) There shall be a Chairman and a Cochairman of the Commission.

(3) On the date of enactment of this section and at the beginning of each odd-numbered Congress, the President of the Senate, on the recommendation of the majority leader, shall designate one of the Senate Members as Chairman of the Commission. At the beginning of each even-numbered Congress, the Speaker of the House of Representatives shall designate one of the House Members as Chairman of the Commission.

(4) At the beginning of each odd-numbered Congress, the Speaker of the House of Representatives shall designate one of the House Members as Cochairman of the Commission. At the beginning of each even-numbered Congress, the President of the Senate, on the recommendation of the majority leader, shall designate one of the Senate Members as Cochairman of the Commission.

(d) In carrying out this section, the Commission may require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memorandums, papers, and documents as it deems necessary. Subpenas may be issued over the signature of the Chairman of the Commission or any member designated by him, and may be served by any person designated by the Chairman or such member. The Chairman of the Commission, or any member designated by him, may administer oaths to any witness.

(e) In order to assist the Commission in carrying out its duties, the President shall submit to the Commission a semiannual report regarding the status of compliance with narcotics control treaties, the first one to be submitted six months after the date of enactment of this section.

(f) The Commission is authorized and directed to report to the House of Representatives and the Senate with respect to the matters covered by this section on a periodic basis and to provide information to Members of the House of Representatives and the Senate as requested. For each fiscal year for which an appropriation is made the Commission shall submit to the Congress a report on its expenditures under such appropriation.

(g)(1) There are authorized to be appropriated to the Commission for each fiscal year and to remain available until expended $550,000 to assist in meeting the expenses of the Commission for the purpose of carrying out the provisions of this section, such appropriation to be disbursed on a voucher to be approved by the Chairman of the Commission.

(2) For purposes of section 502(b) of the Mutual Security Act of 1954, the Commission shall be deemed to be a standing committee of the Congress and shall be entitled to the use of funds in accordance with such sections.

(3) Not to exceed $6,000 of the funds appropriated to the Commission for each fiscal year may be used for official reception and representational expenses.

(h) The Commission may appoint and fix the pay of such staff personnel as it deems desirable, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and general schedule pay rates.

On page 64, line 18, strike out "Sec. 914." and insert in lieu thereof "SEC. 915.".

● Mrs. HAWKINS. Mr. President, I wish to submit today an amendment to the Foreign Assistance Act to establish the International Narcotics Control Commission.

No threat strikes America as savagely and as frequently as that of illicit narcotics. Its deadly impact is felt in failed education, lowered productivity, impaired national defense, increased violent crime, addiction, and death.

To combat this threat effectively, we must use a three-pronged approach: we must eradicate, we must educate, and we must cut off drugs at the source. In order to achieve the eradication of drug abuse, we must fight the battle against drug abuse simultaneously on all three fronts, and in doing so we must use every weapon at our disposal.

A most useful weapon, using as an example the successful Helsinki Commission, would be an International Narcotics Control Commission, designed to monitor and promote international compliance with narcotics control treaties, including eradication, money laundering, and narcoterrorism. This Commission would also monitor and encourage U.S. Government and private programs seeking to expand international cooperation against drug abuse and narcotics trafficking.

The composition of the Commission would be as follows: six Members of the House of Representatives appointed by the Speaker, four of whom would be from the majority party, and two of whom would be from the minority party; six Members of the Senate appointed by the President of the Senate, with identical majority and minority representation; one member of the Department of State appointed by the President; one member of the Department of Justice similarly appointed by the President; and one member of the Department of the Treasury also appointed by the President. There will be a Chairman and a Cochairman of the Commission.

There will be a rotating system of the designation of Chairman of the International Narcotics Control Commission, with the President of the Senate designating one of the Senate Members as Chairman in even-numbered Congresses, and the Speaker of the House designating one of the House Members as Chairman during odd-numbered Congresses. The Commission would also be provided with subpoena power.

The President of the United States will participate in the activities of the Commission by submitting a semiannual report regarding the status of compliance with narcotics control treaties, the initial report to be submitted 6 months after the date of enactment of this proposal. In turn, the Commission is authorized and directed to report to the Congress on a periodic basis, and at the end of each fiscal year the Commission will submit to the Congress a report on its expenditures.

Mr. President, a well-structured and well-supported entity such as the International Narcotics Control Commission would be of invaluable help in the battle against drug abuse. Enactment of this legislation would provide an international forum for consideration of narcotics control efforts worldwide, and would enable my colleagues in the U.S. Congress to express their concern in this most vital

of issues. Mr. President, as we all work together to achieve the eradication of drug abuse, I wish to take this opportunity to urge speedy adoption of this amendment.●

DECONCINI (AND OTHERS) AMENDMENT NO. 114

Mr. DECONCINI (for himself, Mr. CHILES, Mrs. HAWKINS, and Mr. DENTON) proposed an amendment to the bill S. 960, supra; as follows:

On page 54, between lines 14 and 15, insert the following:

PARTICIPATION IN FOREIGN POLICE ARREST ACTION AND INTERROGATION

SEC. 509. Section 481(c)(1) of the Foreign Assistance Act of 1961 (22 U.S.C. (c)(1)) is amended to read as follows:

"(c) The head of any department or agency of the United States employing individuals who are authorized to engage or participate in any direct police arrest action in any foreign country with respect to narcotics control efforts, or any interrogation in connection with such efforts, shall prescribe regulations for the conduct of, and the procedures used by, such individuals.".

DANFORTH AMENDMENT NO. 115

Mr. LUGAR (for Mr. DANFORTH) proposed an amendment to the bill S. 960, supra; as follows:

At an appropriate point in the bill, insert the following new section:

"SEC. . USE OF PRIVATE AND VOLUNTARY ORGANIZATIONS, COOPERATIVES, AND THE PRIVATE SECTOR.

"(a) The Administrator of the Agency for International Development is directed to undertake a comprehensive study of additional ways to provide development asssitance through nongovernmental organizations (including United States and indigenous private and voluntary organizations, cooperatives, and other private entitites). Such study shall include:

"(1) an analysis of the percentage of development assistance allocated to governmental and non-governmental programs;

"(2) an analysis of structural impediments, within both the United States and foreign governments, to additional use of nongovernmental programs; and

"(3) an analysis of the comparative economic benefits of governmental and nongovernmental programs.

"(b) The Administrator is directed to conduct the study using available funds and to prepare a final report to the Congress no later than September 30, 1986.".

HAWKINS (AND OTHERS) AMENDMENT NO. 116

Mrs. HAWKINS (for herself, Mr. MATTINGLY, Mr. CHAFEE, Mr. FORD, Mr. HOLLINGS, Mr. DECONCINI, Mr. GARN, and Mr. MOYNIHAN) proposed an amendment to the bill S. 960, supra; as follows:

On page 64, between lines 16 and 17, insert the following:

RESTRICTIONS ON ASSISTANCE FOR BOLIVIA

SEC. 914. (a) The Congress finds that—

(1) cocaine has had a severe negative impact on productivity, public health, education, and the quality of life in the United States and on the national security of the United States;

(2) Bolivia is the source of more than 50 percent of the world's cocaine, and Bolivian production of cocaine continues to rise;

(3) 50 percent of the population of Bolivia is under 19 years of age, and cocaine production has had a severe, negative impact on the youth of Bolivia;

(4) the production of, and trafficking in, cocaine by Bolivia has contributed significantly to Bolivia's 1,000 percent rate of inflation;

(5) the failure of the Government of Bolivia to take steps to curb the production of coca in Bolivia during 1984 was cited in the report of the Department of State entitled "International Narcotics Control Strategy Report" as a major disappointment in its review of drug producing countries; and

(6) Bolivia received more than $37,000,000 in United States assistance during the fiscal year 1984 and during such fiscal year did not eradicate a single coca bush.

(b)(1) Beginning with the fiscal year 1986 and for each fiscal year thereafter, no United States assistance may be provided Bolivia unless the President certifies to the Committee on Foreign Affairs of the House of Representatives and the Committee on Foreign Relations of the Senate that the amount of coca that was produced in Bolivia during the preceding fiscal year is at least 10 percent less than the amount produced in Bolivia during the fiscal year which preceded such preceding fiscal year.

(2) Whenever the President certifies under paragraph (1) that the amount of coca that is produced in Bolivia is reduced by more than 10 percent from one fiscal year to the next, the amount of any such additional reduction shall be carried over and counted as if it had occurred in the fiscal year following the year in which it actually occurred.

(3) The Secretary of the Treasury shall instruct each United States Executive Director of the International Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation, and the Inter-American Development Bank to oppose actively the extension of any loan or the furnishing of any financial assistance or technical assistance during the fiscal year 1986 or any fiscal year thereafter by the respective international financial institution to Bolivia, unless the President certifies under paragraph (1) that the amount of coca that was produced in Bolivia during the preceding fiscal year is at least 10 percent less than the amount produced in Bolivia during the fiscal year which preceded such fiscal year.

(4) In carrying out this section, coca produced solely for pharmaceutical purposes shall not be counted in determining amounts of production.

(5) As used in this section—

(A) the term "coca" means cocaine hydrochloride;

(B) the term "United States assistance" includes any assistance of any kind (other than assistance involving only the provision of food or medicine) which is provided by grant, sale, loan, lease, credit, guaranty, or insurance, or by any other means, by any agency or instrumentality of the United States Government to or for the benefit of any foreign country, including—

(i) assistance under the Foreign Assistance Act of 1961 (including programs under title IV of chapter 2 of part I, relating to the Overseas Private Investment Corporation, but excluding programs under chapter 8 of part I, relating to international narcotic control assistance);

(ii) sales, credits, and guaranties under the Arms Export Control Act;

(iii) sales under title I (including title III) of the Agricultural Trade Development and Assistance Act of 1954 and donations under title II of such Act of nonfood commodities;

(iv) financing programs of the Commodity Credit Corporation for export sales of nonfood commodities;

(v) financing under the Export-Import Bank Act of 1945;

(vi) assistance under the Migration and Refugee Assistance Act of 1962;

(vii) programs under the Peace Corps Act;

(viii) assistance under the Inter-American Foundation Act;

(ix) assistance under the African Development Foundation Act;

(x) financial assistance for foreign persons or groups under the Mutual Educational and Cultural Exchange Act of 1961; and

(xi) assistance of any kind under any other Act.

CONDITIONS ON ESF ASSISTANCE TO JAMAICA

SEC. 915. Of the funds allocated for Jamaica for fiscal year 1987 under chapter 4 of part II of the Foreign Assistance Act of 1961, $5,000,000 shall be withheld from obligation until the President certifies to the Congress that the Government of Jamaica has prepared, presented, and committed itself to a comprehensive plan or strategy for the control and reduction of illicit cultivation, production, processing, transportation, and distribution of marijuana within a specifically stated period of time.

On page 64, line 18 strike out "SEC. 914." and insert in lieu thereof "SEC. 916.".

BRADLEY (AND OTHERS) AMENDMENT NO. 117

Mr. BRADLEY (for himself, Mr. BENTSEN, Mr. MELCHER, Mr. MOYNIHAN, Mr. KERRY, Mr. BUMPERS, Mr. BINGAMAN, AND Mr. HARKIN) proposed an amendment to the bill S. 970, supra; as follows:

On page 64, between lines 16 and 17, insert the following:

POLICY REGARDING FOREIGN EXCHANGE INTERVENTION

SEC. 914. (a) The Congress finds and declares that—

(1) the trade deficit looms larger than any other threat to the ability of the United States to generate jobs and create economic well-being;

(2) the trade deficit continues to deteriorate even from the 1984 level of $123 billion;

(3) the trade deficit will continue to deteriorate until the value of the dollar declines on foreign exchange markets;

(4) the dollar's rise may slow down but is unlikely to fall sufficiently as a result of Congress' contemplated budget deficit reduction measures;

(5) the dollar would probably fall under a number of tax reform proposals but industries losing market share due to the exchange rate may not be able to wait for a complete tax package;

(6) the only remaining timely option for lowering the dollar is intervention in foreign exchange markets by the Treasury or the Federal Reserve;

(7) any such intervention must be strong enough to achieve the Congress' intent of lowering the dollar's value but sufficiently moderate to prevent a sudden drop in its value;

(8) any such intervention in order to assure a gradual decline and protect against too large a drop in the value of the dollar, will require coordinated action by the central banks of Europe and Japan as well as the United States; and

(9) such coordination is especially important to strengthen economic and political ties with the allies of the United States and to promote consistent macroeconomic policies to the mutual benefit of all.

(b) Therefore, it is the sense of the Congress that—

(1) the Secretary of the Treasury and the Chairman of the Federal Reserve Board, in concert with our allies and coordinated with the central banks of the Group of Five or other major central banks, should take steps as are necessary to lower gradually the value of the dollar;

(2) such steps should not exclude intervention in the foreign exchange markets;

(3) the Secretary of the Treasury and the Chairman of the Federal Reserve Board should work to ensure that the domestic macroeconomic policies of the United States and its allies are forged to reinforce rather than oppose one another.

HAWKINS (AND PELL) AMENDMENT NO. 118

Mr. LUGAR (for Mrs. HAWKINS, for herself and Mr. PELL) proposed an amendment to the bill S. 960, supra; as follows:

On page 64, between lines 16 and 17, insert the following:

INTERNATIONAL NARCOTICS CONTROL COMMISSION

SEC. 914. (a) There is established the International Narcotics Control Commission (hereafter in this section referred to as the "Commission").

(b) The Commission is authorized and directed—

(1) to monitor and promote international compliance with narcotics control treaties, including eradication, money laundering, and narco-terrorism; and

(2) to monitor and encourage United States Government and private programs seeking to expand international cooperation against drug abuse and narcotics trafficking.

(c)(1) The Commission shall be composed of twenty-two members as follows:

(A) Seven Members of the House of Representatives appointed by the Speaker of the House of Representatives. Four members shall be selected from the majority party and three shall be selected, after consultation with the minority leader of the House, from the minority party.

(B) Seven Members of the Senate appointed by the President of the Senate. Four members shall be selected from the majority party of the Senate, after consultation with the majority leader, and three shall be selected, after consultation with the minority leader of the Senate, from the minority party.

(C) One member of the Department of State appointed by the President.

(D) One member of the Department of Justice appointed by the President.

(E) One member of the Department of the Treasury appointed by the President.

(F) Five members of the public to be appointed by the President after consultation with the members of the appropriate congressional committees.

(2) There shall be a Chairman and a Cochairman of the Commission.

(3) On the date of enactment of this section and at the beginning of each odd-numbered Congress, the President of the Senate, on the recommendation of the majority leader, shall designate one of the Senate Members as Chairman of the Commission. At the beginning of each even-numbered Congress, the Speaker of the House of Representatives shall designate one of the House Members as Chairman of the Commission.

(4) At the beginning of each off-numbered Congress, the Speaker of the House of Representatives shall designate one of the House Members as Cochairman of the Commission. At the beginning of each even-numbered Congress, the President of the Senate, on the recommendation of the majority leader, shall designate one of the Senate Members as Cochairman of the Commission.

(d) In carrying out this section, the Commission may require, by subpena or otherwise, the attendance and testimony of such witnesses and the production of such books, records, correspondence, memorandums, papers, and documents as it deems necessary. Subpenas may be issued over the signature of the Chairman of the Commission or any member designated by him, and may be served by any person designated by the Chairman or such member. The Chairman of the Commission, or any member designated by him, may administer oaths to any witness.

(e) In order to assist the Commission in carrying out its duties, the President shall submit to the Commission a semiannual report regarding the status of compliance with narcotics control treaties, the first one to be submitted six months after the date of enactment of this section.

(f) The Commission is authorized and directed to report to the House of Representatives and the Senate with respect to the matters covered by this section on a periodic basis and to provide information to Members of the House of Representatives and the Senate as requested. For each fiscal year for which an appropriation is made the Commission shall submit to the Congress a report on its expenditures under such appropriation.

(g)(1) There are authorized to be appropriated to the Commission for each fiscal year and to remain available until expended $550,000 to assist in meeting the expenses of the Commission for the purpose of carrying out the provisions of this section, such appropriation to be disbursed on a voucher to be approved by the Chairman of the Commission.

(2) For purposes of section 502(b) of the Mutual Security Act of 1954, the Commission shall be deemed to be a standing committee of the Congress and shall be entitled to the use of funds in accordance with such sections.

(3) Not to exceed $6,000 of the funds appropriated to the Commission for each fiscal year may be used for official reception and representational expenses.

(h) The Commission may appoint and fix the pay of such staff personnel as it deems desirable, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and general schedule pay rates.

On page 64, line 18, strike out "SEC. 914." and insert in lieu thereof "SEC. 915.".

MATTINGLY AMENDMENT NO. 119

Mr. MATTINGLY proposed an amendment to the bill S. 960, supra; as follows:

On page 54, between lines 14 and 15, insert the following:

RESTRICTION ON ASSISTANCE TO PERU

SEC. 509. United States assistance, as defined by section 481(i)(4), may be provided to Peru for the fiscal year 1986 only if the President certifies to Congress that the Government of Peru has demonstrated substantive progress in developing a plan, in accordance with the Single Convention on Narcotic Drugs of 1961, that will establish its legal coca requirements, license the number of hectares necessary to produce the legal requirement, and eliminate illicit and unlicensed coca production.

BINGAMAN (AND OTHERS) AMENDMENT NO. 120

Mr. BINGAMAN (for himself, Mr. HATFIELD, Mr. ROCKEFELLER, Mr. BUMPERS, Mr. PRYOR, Mr. DECONCINI, Mr. BAUCUS, and Mr. SIMON) proposed an amendment to the bill S. 960, supra; as follows:

On page 2, line 12, strike out "5,464,500,000" and insert in lieu thereof "5,364,500,000".

On page 54, between lines 14 and 15, insert the following:

PUBLIC LAW 480 FUNDS

SEC. 509. In addition to funds otherwise available for such purpose, there are authorized to be appropriated $100,000,000 to be used to carry out title II of the Agricultural Trade and Development Act of 1954.

CRANSTON (AND KASSEBAUM) AMENDMENT NO. 121

Mr. CRANSTON (for himself and Mrs. KASSEBAUM) proposed an amendment to the bill S. 960, supra; as follows:

On page 54, below line 21, insert the following new sections:

SEC. 602. (a) The Peace Corps Act (22 U.S.C. 2501 et seq.) is amended by inserting after section 11 the following new section:

"PEACE CORPS NATIONAL ADVISORY COUNCIL

"SEC. 12. (a) A Peace Corps National Advisory Council (hereinafter in this section referred to as the 'Council') shall be established in accordance with the provisions of this section.

"(b)(1) The Council shall advise and consult with the President and the Director of the Peace Corps with regard to policies and programs designed to further the purposes of this Act and shall periodically report to the Congress.

"(2) Members of the Council shall visit, examine, and inspect the Peace Corps' activities in the United States and in other countries in order to, among other things—

"(A) evaluate the accomplishments of the Peace Corps;

"(B) assess the potential capabilities and the future role of the Peace Corps; and

"(C) make recommendations to the President, the Director of the Peace Corps, and the Congress to guide the future direction of the Peace Corps and to help ensure that the purposes and programs of the Peace

Corps are carried out in ways that are economical, efficient, responsive to changing needs in developing countries and to changing relationships among peoples, and in accordance with law.

"(3) The Council may provide for public participation in its activities.

"(c)(1) Persons appointed as members of the Council shall be broadly respresentative, including representation of educational institutions, private volunteer agencies, private industry, farm organizations, labor unions, different regions of the United States, different educational, economic, racial, and national backgrounds and age grouping, and both sexes.

"(2)(A) Subject to the succeeding sentence, fifteen members of the Council shall be appointed by the President by and with the advice and consent of the Senate. At least seven of such members shall be former Peace Corps volunteers, and no more than eight of such members shall be members of the same political party.

"(B) The first appointments of members of the Council under this paragraph shall be made not more than sixty days after the date of the enactment of this section and, solely for purposes of determining the expiration of their terms, shall be deemed to take effect on the sixtieth day after such enactment date.

"(C) No member appointed under this paragraph shall be an officer or employee of the United States Government.

"(D) Of the members initially appointed under this paragraph, eight shall be appointed to one-year terms and seven to two-year terms. There after, all appointed members shall be appointed to two-year terms.

"(E) A member of the Council appointed to fill a vacancy occurring before the expiration of the term for which the member's predecessor was appointed shall be appointed only for the remainder of the term.

"(F) No member of the Council may serve for more than two consecutive two-year terms.

"(G) Members of the Council shall serve at the pleasure of the President.

"(H) An appointed member of the Council may be removed by a vote of nine members for malfeasance in office, for persistent neglect of or inability to discharge duties, or for offenses involving moral turpitude, and for no other cause.

"(I) Any vacancy in the office of an appointed member of the Council shall be filled by the President within thirty days after such vacancy occurs.

"(3) The Secretary of State shall be a voting member, ex officio, of the Council. The Secretary may designate any officer in the Department of State compensated at level II or III of the Executive Schedule under section 5313 or 5314 of title 5, United States Code, to act for the Secretary under this section.

"(4) The Director and Deputy Director of the Peace Corps shall be non-voting members, ex officio, of the Council.

"(d)(1) Except as provided in paragraph (2), a member of the Council who is not officer or employee of the United States Government shall be (A) paid compensation out of funds made available for the purposes of this Act at the daily equivalent of the highest rate payable under section 5332 of title 5, United States Code, for each day (including travel-time) during which the member is engaged in the actual performance of duties as a Council member, and (B) while away0 from his or her home or regular place of business on necessary travel, as determined by the Director of the Peace Corps, for actual performance of such duties, paid per diem, travel, and transportation expenses in the same manner as provided for under subchapter I of chapter 57 of title 5, United States Code.

"(2) A member of the Council may not be paid compensation under paragraph (1)(A) for more than twenty days in any calendar year.

"(e) A majority of the voting members of the Council shall constitute a quorum for the purposes of transacting any business.

"(f) A member of the Council shall disclose to the Council the existence of any direct or indirect financial interest of that member in any particular matter before the Council and shall not vote or otherwise participate as a Council member with respect to that particular matter.

"(g) At its first meeting and at its first regular meeting in each calendar year thereafter, the Council shall elect a Chair and Vice Chair from among its appointed members who are citizens of the United States. The Chair and Vice Chair shall not both be members of the same political party.

"(h)(1) The Council shall hold a regular meeting during each calendar quarter and shall meet at the call of the President, the Director of the Peace Corps, the Council's Chair, or one-fourth of its members.

"(2) The Council shall prescribe such bylaws and regulations as it considers necessary to carry out its functions. Such bylaws and regulations shall include procedures for fixing the time and place of meetings, giving or waiving of notice of meetings, and keeping of minutes of meetings.

"(i) Not later than January 1, 1988, and not later than January 1 of each second year thereafter, the Council shall submit to the President and the Director of the Peace Corps a report of its views on the programs and activities of the Peace Corps. Each report shall contain a summary of the advice and recommendations provided by the Council to the President and the Director during the period covered by the report and such recommendations (including recommendations for administrative or legislative action) as the Council considers appropriate to make to the Congress. Within 90 days after receiving each such report, the President shall submit to the Congress a copy of the report, together with any comments concerning the report that the President or the Director considers appropriate.

(j) The Director of the Peace Corps shall make available to the Council such personnel, administrative support services, and technical assistance as are necessary to carry out effectively its functions.".

(b) Sixty days after the date of the enactment of this Act, any advisory body carrying out functions similar to those assigned to the Peace Corps National Advisory Council provided for by subsection (a) shall cease to operate and shall become defunct.

NONPARTISAN APPOINTMENTS

SEC. 603. The Peace Corps Act is amended—

(1) by redesignating sections 25, 26, and 27 as sections 26, 27, and 28, respectively; and

(2) by inserting after section 24 the following new section:

"NONPARTISAN APPOINTMENTS

"SEC. 25. In carrying out this Act, there shall be no political test or political qualification used in (1) selecting any person for enrollment as a volunteer or for appointment to a position at, or for assignment to (or for employment for assignment to), a duty station located abroad, or (2) promoting or taking any other action with respect to any volunteer or any person assigned to such a station."; and

(3) in subsection (a) of section 5, by amending the final sentence to read as follows: "In carrying out this subsection, there shall be no discrimination against any person on account of race, sex, creed, or color.".

BUMPERS AMENDMENT NO. 122

Mr. BUMPERS proposed an amendment to the bill S. 960, supra; as follows:

At the appropriate place in the bill, add the following:

"SEC. . The Senate finds that:

A free and democratic El Salvador is in the security interest of the United States; and

Jose Napoleon Duarte was elected President of El Salvador last year in the most democratic election held in El Salvador in many years; and

Political violence in El Salvador has declined dramatically under President Duarte's leadership; and

President Duarte's policies of respect for human rights, political pluralism, dialogue and reconciliation with the Salvadoran guerrilla forces, legal and social reform, and effective defense against the violent overthrow of the Salvadoran government are deserving of praise from all who believe in a democratic form of government; and

The March 31 legislative and municipal elections were successfully carried out, with 64 percent of the electorate defying guerrilla attacks to vote; and

The victory of President Duarte's Christian Democratic Party reaffirms the support for these policies by his fellow citizens, the essential test of any government or movement; and

In spite of the state of seige technically in effect due to the insurgent threat, observance of free speech, free press, and free assembly are widely enjoyed in El Salvador and permit public airing of opposing political views; and

President Duarte is firmly committed to judicial reform and prosecution of cases involving "death squads";

His leadership and popular support has notably weakened the popular support given the guerrillas, as evidenced by the high levels of voter participation in the free elections held in El Salvador since 1982, the reduction in territory in which the guerrillas can freely operate, their inability to mount frontal military attacks, and their resort to economic sabotage, ambushes, political assassination, and urban terrorism with blatant disregard for basic human rights; and

He has succeeded in reversing the decline in his country's economy which, though still weak, has better prospects than in recent years;

Based upon the above findings, it is the sense of the Senate that:

President Duarte is to be congratulated for his outstanding leadership under difficult circumstances and for his efforts to foster democratic government and institutions in his country, and he is encouraged to continue his efforts to promote political pluralism, democratic institutions, and respect for human rights in his country; and

The armed services of El Salvador are to be congratulated for their improved per-

formance and professionalism in defending Salvadoran citizens and their democratically elected government from attack by armed insurgents, and especially for their role in helping to protect and uphold the electoral process; and

The Senate reaffirms the importance of contained support for democratic principles and institutions and respect for human rights by the various sectors of Salvadoran society, which is a major factor in U.S. support for El Salvador.

MURKOWSKI AMENDMENT NO. 123

Mr. MURKOWSKI proposed an amendment to the bill S. 960, supra; as follows:

At the appropriate place, insert:

Of the funds authorized to be appropriated in this Act to carry out Chapter 2 or Chapter 4 of Part II of the Foreign Assistance Act of 1961, up to $5 million for FY 1986 may be made available to noncommunist resistance forces in Cambodia, provided that the Secretary of State finds that the Association of Southeast Asian Nations has acknowledged that material assistance to the noncommunist resistance is also being supplied by members of that Association.

HELMS AMENDMENT NO. 124

Mr. HELMS proposed an amendment to the bill S. 960, supra; as follows:

On page 64, between lines 16 and 17, insert the following:

AVAILABILITY OF FUNDS FOR ISRAEL

SEC. 914. (a) Funds authorized to be appropriated by this Act which are made available for the purpose of improving living and employment conditions of the residents in the territories of Gaza, Judea, and Samaria under the control of the Ministry of Defense of Israel shall be allocated for projects which benefit all residents of such territories; provided that those projects which benefit Israeli citizens residing in such territories shall receive funds allocated in the proportion which the number of such Israeli citizens bears to the total number of the residents of such territories.

(b) Funds authorized to be appropriated by this Act which are made available for Israel shall be available for use within any of the territory administered by Israel on the date of enactment of this Act.

On page 64, line 18, strike out "SEC. 914." and insert in lieu thereof "SEC. 915.".

MURKOWSKI AMENDMENT NO. 125

Mr. MURKOWSKI proposed an amendment to the bill S. 960, supra; as follows:

On page 3, beginning on line 9 with (d) strike all through the end of line 19.

SPECTER AMENDMENT NO. 126

Mr. SPECTER proposed an amendment (which was modified and subsequently further modified) to the bill S. 960, supra; as follows:

On page 64 at the end of the bill, add the following new section:

SEC. . (a) Notwithstanding any other provision of law, the President may prohibit any article grown, produced, extracted, or manufactured in Libya or any other country determined by joint resolution to be engaged in terrorism from being imported into the United States.

(b) Notwithstanding any other provision of law, the President may prohibit any goods or technology, including technical data or other information, subject to the jurisdiction of the United States or exported by any person subject to the jurisdiction of the United States, from being exported to Libya or any other country determined by joint resolution to be engaged in terrorism.

(c) For purposes of this Act, the term "United States" includes territories and possessions of the United States.

(d) In exercising the authorities granted by this section, the President shall adhere to the consultation and reporting requirements contained in section 204 of the International Emergency Economic Powers Act (50 U.S.C. App. 17).

MURKOWSKI AMENDMENT NO. 127

Mr. MURKOWSKI proposed an amendment to the bill S. 960, supra; as follows:

On page 6, beginning on line 5 with "Notwithstanding" strike out all through the end of line 7.

On page 2, line 12, strike out "$5,464,500,000" and insert in lieu thereof "$5,269,300,000."

On page 14, line 18, strike out "$805,100,000" and insert in lieu thereof "$1,000,300,000."

GLENN (AND KASSEBAUM) AMENDMENT NO. 128

Mr. GLENN (for himself and Mrs. KASSEBAUM) proposed an amendment to the bill S. 960, supra; as follows:

On page 64, between lines 16 and 17, insert the following:

POLICY TOWARD SOUTH AFRICAN "HOMELANDS"

SEC. 914. (a) The Congress finds that—

(1) the sanctity of the family, individual liberty, maximum freedom of choice, ownership of private property, and equal treatment of all citizens, regardless of race, are principles which are fully supported by the American people;

(2) the forced relocation of blacks by the Government of the Republic of South Africa to designated "homelands" divides families, as families are required to remain in the "homelands" while fathers seek work in the so-called "white areas";

(3) the forced removal of persons living in so-called "black spots" in "white" rural areas in South Africa denies them the fundamental right to live and to farm on land they have legally occupied for years, and subjects them to arbitrary arrest and detention when they seek these rights;

(4) compared to "white" South Africa, the designated "homelands," which are meant to accommodate the largest South African population group on a fraction of South African territory and were established without the consent of the vast majority of the governed, are characterized by high rates of infant mortality, unemployment, and malnutrition and by a severe shortage of medical services;

(5) the policy of the Government of the Republic of South Africa denies blacks their rightful claim to full South African citizenship; and

(6) the recent violence in South Africa must be seen as an inevitable result of the denial of the full rights of citizenship.

(b) It is the sense of the Congress that—

(1) the policy of separate development and the forced relocation of the people of the Government of the Republic of South Africa are inconsistent with fundamental American values and internationally recognized principles of human rights;

(2) the Government of the United States should continue to regard as citizens of South Africa all persons born within the internationally recognized boundaries of the Republic of South Africa, and not differentiate among these citizens on the basis of the South African Government's claim to have granted independence to various "homelands";

(3) at such times that any "homeland" official applies for a visa for travel to the United States, no such visa should be granted to such official unless such official holds a passport which is recognized as valid by the Government of the United States; and

(4) the Government of the United States should urge that the forced relocation of South African citizens be discontinued and that policies be adopted for all South Africa's citizens which protect the sanctity of the family, individual liberty, maximum freedom of choice, ownership of private property, and equal treatment of all citizens, regardless of race.

On page 64, line 18, strike out "SEC. 914." and insert in lieu thereof "SEC. 915.".

GLENN AMENDMENT NO. 129

Mr. GLENN proposed an amendment to the bill S. 960, supra; as follows:

On page 24, between lines 9 and 10, insert the following:

SENSITIVE TECHNOLOGY

SEC. 128. Section 36(b) of the Arms Export Control Act (22 U.S.C. 2776(b)) is amended—

(1) by inserting before the period at the end of the second sentence of paragraph (1) the following: "and a detailed justification of the reasons necessitating the sale of such articles or services in view of the sensitivity of such technology"; and

(2) by adding at the end thereof the following new paragraph:

"(5)(A) If, before the delivery of my major defense article or major defense equipment, or the furnishing of any defense service or design and construction service, sold pursuant to a letter of offer described in paragraph (1), the sensitivity of technology or the capability of the article, equipment, or service is enhanced or upgraded from the level of sensitivity or capability described in the numbered certification with respect to an offer to sell such article, equipment, or service, then, at least forty-five days before the delivery of such article or equipment or the furnishing of such service, the President shall prepare and transmit to the chairman of the Committee on Foreign Affairs of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report—

"(i) describing the manner in which the technology or capability has been enhanced or upgraded and describing the significance of such enhancement or upgrade; and

"(ii) setting forth a detailed justification for such enhancement or upgrade.

"(B) The provisions of subparagraph (A) apply to an article or equipment delivered,

or a service furnished, within ten years of the transmittal to the Congress of a numbered certification with respect to the sale of such article, equipment, or service.

"(C) If the enhancement or upgrade in the sensitivity of technology or the capability of major defense equipment, defense articles, defense services, or design and construction services described in a numbered certification submitted under this subsection costs $14,000,000 or more in the case of any major defense equipment, $50,000,000 or more in the case of defense articles or defense services, or $200,000,000 or more in the case of design or construction services, then the President shall submit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a new numbered certification which relates to such enhancement or upgrade and which shall be considered for purposes of this subsection as if it were a separate letter of offer to sell defense equipment, articles, or services, subject to all of the requirements, restrictions, and conditions set forth in this subsection. For purposes of this subparagraph, references in this subsection to sales shall be deemed to be references to enhancements or upgrades in the sensitivity of technology or the capability of major defense equipment, articles, or services, as the case may be.".

"(D) For the purposes of subsection b(5)(A), major defense article shall be construed to include electronic devices, which if upgraded, will enhance the mission capability of a weapons system.".

PELL (AND CRANSTON) AMENDMENT NO. 130

Mr. PELL (for himself and Mr. CRANSTON) proposed an amendment to the bill S. 960, supra; as follows:

On page 36, add the following at the end:

SEC. 314 (A): The Foreign Assistance Act of 1961, as amended, is amended by adding at the end of section 119 the following new subsections:

"(e) Each Country Development Strategy Statement (country plan) shall include a detailed and specific plan to assist the recipient country in the conservation of biological diversity. Each such plan shall include, as appropriate, assistance to countries in the identification, acquisition, and protection of wildlife habitats, of representative ecosystems, and of significant or unique natural areas. Each Country Development Strategy Statement shall take account of the information derived from the activity undertaken pursuant to subsection (h).

"(f) The Administrator of the Agency for International Development, and the Directors of other appropriate United States agencies, are authorized and directed to enter into long-term agreements with recipient countries to protect wildlife habitats, representative ecosystems, and significant or unique natural areas in the recipient country.

"(g) Of the amount by which funds appropriated to the Agency for International Development for agriculture and forestry exceeds the amounts appropriated for agriculture and forestry in fiscal year 1986, at least fifty percent shall be available only for countries which enter into long-term agreements pursuant to subsection (f). Funds made available by this subsection may be used in support of the long-term agreements.

"(h) The Administrator of the Agency for International Development is authorized and directed to support the creation of biological inventory programs in recipient countries, to support programs to identify critical ecosystems in developing countries, and to make surveys of national parks and proposed protected areas where such surveys will enhance the protection of endangered species or the protection of critical ecosystems."

(B) In subsection (d) of section 119 of the Foreign Assistance Act of 1961, as amended, strike "subsection" and insert in lieu thereof "section".

KENNEDY AMENDMENTS NOS. 131 THROUGH 133

Mr. KENNEDY proposed three amendments to the bill S. 960, supra; as follows:

On page 64, between lines 16 and 17, insert the following:

REPORTS ON FOREIGN DEBT IN LATIN AMERICA

SEC. 914. (a) The Congress finds that—

(1) the foreign debt of Latin American countries has soared from $27 billion in 1970 to over $350 billion in 1983;

(2) the foreign debt of Latin American countries is a serious obstacle to their economic progress, threatens their stability, and endangers the democratic processes in those nations;

(3) the economic and political futures of many of the Latin American countries hang in the balance and depend upon a successful resolution of the foreign debt crisis; and

(4) the confidence of the American people in the United States system of banking is also involved in a successful resolution of the foreign debt crisis.

(b)(1) Not later than October 1, 1985, the Secretary of State shall prepare and transmit to the Congress a report on—

(A) the magnitude of the foreign debt crisis in this hemisphere;

(B) the impact of the foreign debt crisis on the economies of the nations of Latin America;

(C) the degree to which the national security interests of the United States are implicated in this crisis; and

(D) the steps being taken and the policy being pursued by the United States with this crisis.

(2) Not later than October 1, 1985, the Secretary of the Treasury shall prepare and transmit to the Congress a report on—

(A) the degree to which the foreign debt crisis affects the system of banking in the United States; and

(B) the steps being taken and the policy being pursued by the Department of the Treasury aimed at dealing with this crisis.

On page 64, line 18, strike out "SEC. 914." and insert in lieu thereof "SEC. 915."

On page 36, after line 26, add the following:

OCEAN FREIGHT REIMBURSEMENT

SEC. 314. Section 123(b) of the Foreign Assistance Act of 1961 (22 U.S.C. 2151u(b)) is amended—

(1) by inserting "(1)" immediately after "(b)"; and

"(2) In addition to funds otherwise available for such purpose, there are authorized to be appropriated to the President $20,000,000 to pay charges on shipments described in paragraph (1).".

On page 64, between lines 16 and 17, insert the following:

That, because the fabric of a society is strengthened by visible reminders of the historical roots of the society, it is in the national interest of the United States to preserve and protect the cemeteries, monuments, and historic buildings associated with the foreign heritage of United States citizens.

SEC. 2. There is established a commission to be known as the Commission for the Preservation of America's Heritage Abroad (hereafter in this Act referred to as the "Commission").

SEC. 3. The Commission shall—

(1) identify and publish a list of those cemeteries, monuments, and historic buildings located abroad which are associated with the foreign heritage of United States citizens, particularly those cemeteries, monuments, and buildings which are in danger of deterioration or destruction;

(2) encourage the preservation and protection of such cemeteries, monuments, and historic buildings by obtaining, where appropriate and in concurrence with the Department of State, assurances from foreign governments that the cemeteries, monuments, and buildings will be preserved and protected;

(3) sponsor or otherwise support demonstration projects to help preserve and protect such cemeteries, monuments, and historic buildings;

(4) prepare and disseminate reports on the condition of and the progress toward preserving and protecting cemeteries, monuments, and historical buildings; and

(5) coordinate its efforts with the United States International Council on Monuments and Sites.

SEC. 4. (a) The Commission shall consist of five members appointed by the President.

(b) Members shall be appointed for terms of three years except—

(1) of such members first appointed—

(A) two shall be appointed for two years; and

(B) three shall be appointed for three years;

(2) a member appointed to fill a vacancy on the Commission shall serve for the remainder of the term for which the member's predecessor was appointed; and

(3) a member may retain membership on the Commission until the member's successor has been appointed.

(c) The President shall designate the Chairman of the Commission from among its members.

(d) The Commission shall meet at least once every three months.

SEC. 5. (a) Members of the Commission shall receive no pay on account of their service on the Commission.

(b) While away from their homes or regular places of business in the performance of services for the Commission, members of the Commission shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5 of the United States Code.

SEC. 6. (a) The Commission may appoint such personnel (subject to the provisions of title 5 of the United States Code which govern appointments in the competitive service) and may fix the pay of such personnel (subject to the provisions of chapter 51 and subchapter III of chapter 53 of such title, relating to classification and General Schedule pay rates) as the Commission deems desirable.

(b) The Commission may procure temporary and intermittent services to the same extent as is authorized by section 3109(b) of title 5 of the United States Code, but at

rates for individuals not to exceed the daily equivalent of the maximum annual rate of basic pay then in effect for grade GS-18 of the General Schedule (5 U.S.C. 5332(a)).

(c) Upon request of the Commission, the head of any Federal department or agency, including the Secretary of State, is authorized to detail, on a reimbursable basis, any of the personnel of such department or agency to the Commission to assist it in carrying out its duties under this Act.

SEC. 7. (a) The Commission may secure directly from any department or agency of the United States, including the Department of State, any information necessary to enable it to carry out this Act. Upon the request of the Chairman of the Commission, the head of such department or agency shall furnish such information to the Commission.

(b) The Commission may accept, use, and dispose of gifts or donations of money or property.

(c) The Commission may use the United States mails in the same manner and upon the same conditions as other departments and agencies of the United States.

(d) The Administrator of General Services shall provide to the Commission on a reimbursable basis such administrative support services as the Commission may request.

SEC. 8. The Commission shall transmit an annual report to the President and to each House of Congress as soon as practicable after the end of each fiscal year. Each report shall include a detailed statement of the activities and accomplishments of the Commission during the preceding fiscal year and any recommendations by the Commission for legislation and administrative actions.

SEC. 9. This act shall take effect on October 1, 1985.

On page 64, line 18 strike "SEC. 914." in lieu therefore "SEC. 915."

HATFIELD (AND PELL) AMENDMENT NO. 134

Mr. HATFIELD (for himself and Mr. PELL) proposed an amendment to the bill S. 960, supra; as follows:

At the end of the bill, add the following new section:

THE CONTROL OF CONVENTIONAL ARMS TRANSFERS

SEC. . (a) The Congress recognizes that conventional arms transfer agreements with the Third World by all suppliers from 1981-1984 totaled $153.2 billion (in constant 1984 dollars); in which non-communist suppliers accounted for $94.1 billion and communist suppliers accounted for $59.1 billion. The United States, the Soviet Union and France have been the three predominant arms suppliers to the Third World from 1977-1984 and collectively accounted for 83% of all conventional arms transfer agreements with the Third World in 1984.

There is grave concern for the effect Conventional Arms Transfers may have on regional stability, arms races and the economic needs of third world nations, including their development, and ability to meet basic human needs. There is further concern about the effect of conventional arms transfers on regional stability, and ultimately on United States and Soviet security. Conventional arms transfer agreements made by the U.S., the Soviet Union and France are at levels closer to rough equivalence than at any time in history. This could be a significant factor in facilitating progress to limit and control arms transfers. Since new arms transfers are unpredictable, and, since new cycles of arms purchases by the less developed nations could occur at any time, the U.S. should re-evaluate its conventional arms transfer policies and practices and seek to achieve negotiated conventional arms control agreements which enhance the national interest at the earliest possible date.

"(b) Therefore—

"(1) The President should, at the earliest possible date, in consultation with our allies, initiate discussions with the Soviet Union and France aimed at beginning multilateral negotiation to limit and control the transfer of conventional arms to the less developed world.

"(2) Within one year of the date of enactment of this section, the President shall submit to Congress a report to the Speaker of the House of Representatives and the Chairman of the Committee on Foreign Relations which examines and analyzes United States policies concerning the transfer of conventional arms, especially sophisticated weapons, and including a review of measures being taken to fulfill the objectives stated above. This report shall also examine and analyze—

"(A) the lessons of earlier efforts to negotiate restraints on the export of conventional arms;

"(B) the evolution of supplier practices and policies;

"(C) the evolution of recipient country attitudes regarding conventional arms transfers;

"(D) the effect upon regional stability and security of conventional arms transfers by the United States and its allies and the Soviet Union and its allies in recent years;

"(E) the relationship between arms exports by major suppliers and the needs of those countries to support their domestic military procurement programs;

"(F) the relationship between arms imports and the external debt of recipient countries, allocation of internal resources, and their economic well-being; and

"(G) the relationship between arms transfers and regional military stability.

"(3) The report provided for in subsection (2) shall be submitted in unclassified form, with an unclassified summary and with classified appendices, as appropriate and necessary.

KASTEN AMENDMENT NO. 135

Mr. KASTEN proposed an amendment to the bill S. 960, supra; as follows:

At the appropriate place in the bill add the following:

Since the People's Republic of China is seeking to apply for admission to the Asian Development Bank, conditioning its application upon administrative changes affecting the status and designation of the Republic of China (Taiwan) within that body;

Since the Republic of China (Taiwan) is a founding member of the Asian Development Bank, actively participating in the Bank's activities and faithfully fulfilling its obligations since the Bank's establishment in December 1966;

Since the Republic of China's (Taiwan's) subscription to the initial capital stock of the Bank was determined on the basis of the area, population, and economic condition of the island of Taiwan;

Since neither the relationship between the Republic of China (Taiwan) and the Bank, nor the circumstances under which these relations were established, have changed since 1966;

Since the Asian Development Bank agreement specifically prohibits the Bank from being influenced in its decision by politics;

Since it was the strong conviction of the founders of the Asian Development Bank that the introduction of political considerations would undermine the ability of the Bank to carry out its mission, namely to further economic growth and cooperation in the region; and

Since the Republic of China (Taiwan) has assisted in carrying out the mission of the Asian Development Bank over the years, moving from borrower to donor: Now, therefore,

It is the sense of the Senate that—

(1) Republic of China (Taiwan) should remain a full member of the Asian Development Bank, and that its status and designation within that body should remain unaltered no matter how the issue of the People's Republic of China's application for membership is disposed of; and

(2) the President and the Secretary of State should express support of the Republic of China (Taiwan), making it clear that the United States will not countenance attempts to make administrative changes affecting the status and designation of another member without that member's full knowledge and consent.

HELMS AMENDMENT NO. 136

Mr. HELMS proposed an amendment (which was subsequently modified) to the bill S. 960, supra; as follows:

At the appropriate place in the bill, insert the following new section:

SEC. . (a) None of the funds authorized to be appropriated for fiscal year 1986 under chapter 2 and 5 of Part II of the Foreign Assistance Act of 1961 shall be made available to the People's Republic of Mozambique unless the President makes a certification in accordance with subsection (a) within thirty days of the enactment of this section and every one hundred and eighty days thereafter.

(b) The certification required by subsection (a) is a certification by the President to the Speaker of the House of Representatives and to the chairman of the Senate Committee on Foreign Relations that the Government of the People's Republic of Mozambique—

(1) is making a concerted and significant effort to comply with internationally recognized human rights;

(2) is making continued progress in implementing essential economic and political reforms, including the restoration of private property and respect for the right to engage in free enterprise in all sectors of the economy:

(3) has implemented a plan and Sept. 30, 1986 to reduce the number of foreign military personnel to no more than 55.

(i) is committed to holding free elections at a date not later than September 30, 1986, and to that end has demonstrated its good faith efforts to begin discussions with all major political factions in Mozambique which have declared their willingness to find and implement an equitable political solution to the conflict, with such solution to involve a commitment to—

(A) the electoral process with internationally recognized observers; and

(B) the elimination of all restrictions on the formation and activities of opposition political parties.

KASTEN (AND KENNEDY) AMENDMENT NO. 137

Mr. KASTEN (for himself and Mr. KENNEDY) proposed an amendment to the bill S. 960, supra; as follows:

On page 34, between lines 8 and 9, insert the following new section:

AFRICA FAMINE RECOVERY AND DEVELOPMENT FUND

SEC. 308. Chapter 1 of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new section:

"SEC. 129. Africa Famine Recovery and Development Fund.—(a) The Congress reaffirms the commitment of the American people to assist the countries of Sub-Saharan Africa in dealing with drought and famine conditions which threaten the lives of millions of its people. The Congress reaffirms the commitment of the United States Government to continue its support, in concert with other nations and in cooperation with the affected nations in Africa, of the International relief, rehabilitation, and recovery program to assist these nations in dealing more effectively with drought and achieving self-sufficiency in agricultural production, eliminating forever the threat of famine.

"(b) The President is authorized to furnish assistance, on such terms and conditions as he may determine, for the long-term agricultural recovery and development of the Sub-Saharan Africa region, particularly for support of policy reform and agricultural support and research for small farmers. Assistance furnished under this section shall be in accordance with a long-term, multidonor development plan which calls for equitable burdensharing with other donors and shall be furnished, whenever appropriate, in cooperation with an international coordinating mechanism or international agency.

"(c)(1) There are authorized to be appropriated to the President up to $100 million, which sums shall be derived from any funds, authorized by this act to carry out the purposes of this section.

"(2) Amounts appropriated under this section are authorized to remain available until expended.".

KASTEN (AND INOUYE) AMENDMENT NO. 138

Mr. KASTEN (for himself and Mr. INOUYE) proposed an amendment to the bill S. 960, supra; as follows:

On page 50, line 19, after the word funds insert: "authorized to be".

SPECTER (AND KASTEN) AMENDMENT NO. 139

Mr. SPECTER (for himself and Mr. KASTEN) proposed an amendment to the bill S. 960, supra; as follows:

At the end of the bill add the following new sections:

SEC. . (a) The Congress finds that—

(1) Josef Mengele was the selecting physician at the Nazi concentration camp of Auschwitz-Birkenau during the Second World War where he personally sent more than four hundred thousand Jews, including close to two hundred thousand children, to the gas chambers and conducted unspeakable pseudo-scientific experiments on many of the inmates of Auschwitz;

(2) Josef Mengele has lived in freedom since the end of the Second World War, initially, it is thought, in Germany and, thereafter, for the past thirty-five years, in South America;

(3) Josef Mengele became a naturalized citizen of Paraguay in 1959, and is believed still to be living in the region; and

(4) the Minister of the Interior of Paraguay has promised that the Paraguayan Government would undertake a nationwide investigation to locate Josef Mengele and allow foreign observers to participate in such investigation.

(b) It is therefore the sense of Congress that—

(1) the United States Government should undertake all possible efforts to ensure that Josef Mengele is brought to justice;

(2) the Government of Paraguay should, consistent with its previous commitments, carry out an immediate investigation to locate Josef Mengele and, if he is to be found in that country, arrest him and extradite him to a country where a warrant is outstanding for the arrest of Josef Mengele for crimes against humanity;

(3) the United States Government should seek to enlist similar efforts on the part of other regional governments; and

(4) in pursuance of these ends, the United States Government should send representatives to Paraguay and such other regional states as appropriate to participate in these investigations.

(c) Report to Congress on efforts of the Government of Paraguay to apprehend Josef Mengele.

SEC. . The President shall submit a report to the Speaker of the House of Representatives and the President Pro Tempore of the Senate on the efforts made by the Government of Paraguay to apprehend Josef Mengele. Such report shall be submitted no later than October 1, 1985 and shall include—

(1) a detailing of the efforts made by the Government of Paraguay to locate Josef Mengele;

(2) the degree to which other countries have cooperated with the investigation; and

(3) the results of the Government of Paraguay's efforts to locate and apprehend Josef Mengele.

HELMS AMENDMENT NO. 140

Mr. HELMS proposed an amendment to the bill S. 960, supra; as follows:

On page 50, strike line 15 through line 26, inclusive, and insert in lieu thereof the following: "There are authorized to be appropriated to the President for grants to carry out the purposes of this chapter, in addition to funds available under any other Acts for such purposes, $196,211,000 for the fiscal year 1986."

MELCHER (AND PRESSLER) AMENDMENT NO. 141

Mr. MELCHER (for himself and Mr. PRESSLER) proposed an amendment to the bill S. 960, supra; as follows:

At the end of the bill, add the following new section:

SEC. . Since, livestock prices have been in decline for some time due to excessive supply partially caused by dramatic increases in importation of live cattle and hogs from Canada, which has increased by 1,000 percent in the last decade in the case of hogs alone; and

Since, American livestock producers are suffering from the same general economic crisis affecting all of agriculture, and many will face liquidation or foreclosure in the near future; and

Since, the disparity between the U.S. and the Canadian dollar amounts to 32%-34% and results in even further increases in Canadian hogs and cattle being imported into the United States;

Therefore, it is the sense of the Congress that the President should direct appropriate members of the Administration, including the United States Trade Representative, the Secretary of Agriculture, and the Secretary of Commerce, to aggressively pursue discussions with the Canadian Government directed toward immediate reduction in the Canadian export of cattle and hogs to the United States.

KENNEDY (AND DODD) AMENDMENT NO. 142

Mr. KENNEDY (for himself and Mr. DODD) proposed an amendment to the bill S. 960, supra; as follows:

(a) CONDITIONS ON MILITARY ASSISTANCE AND SALES.—For fiscal year 1986, assistance may be provided for Guatemala under chapter 2 (relating to grant military assistance) or chapter 5 (relating to international military education and training) of part II of the Foreign Assistance Act of 1961 and sales may be made and financing may be provided for Guatemala under the Arms Export Control Act (relating to foreign military sales) only if the President makes the following certifications to the Congress:

(1) For fiscal year 1986, an elected civilian government is in power in Guatemala and has submitted a formal written request to the United States for the assistance, sales, or financing to be provided.

(2) For fiscal year 1986, the Government of Guatemala made demonstrated progress during the preceding year (A) in achieving control over its military and security forces, and (B) toward eliminating kidnappings and disappearances, forced recruitment into the civil defense patrols, and other abuses by such forces of internationally recognized human rights.

(b) CONTINUATION OF IMET PROGRAMS UPON ELECTION.—Notwithstanding subsection (a), up to 30 percent of the amount allocated for Guatemala for fiscal year 1986 for assistance under chapter 5 of part II of the Foreign Assistance Act of 1961 may be provided, upon the election of a civilian government in Guatemala, for the continuation of existing programs under that chapter.

(c) CONSTRUCTION EQUIPMENT AND MOBILE MEDICAL FACILITIES AND RELATED TRAINING.—If the conditions specified in subsection (a) are met, Guatemala may be provided with the following for fiscal year 1986 (in addition to such other assistance, sales, or financing as may be provided for Guatemala):

(1) Sales of construction equipment and mobile medical facilities to assist in development programs that will directly assist the poor in Guatemala.

(2) Sales of training, to be provided outside of Guatemala, which is related to the sales described in paragraph (1).

(3) A total for fiscal year 1986 of no more than $5,000,000 in credits under the Arms

Export Control Act for sales described in paragraphs (1) and (2). Such sales and credits shall be provided only to enable the military forces of Guatemala to obtain equipment and training for civilian engineering and construction projects and mobile medical teams, which would not be used in the rural resettlement program.

(d) PROHIBITION ON FURNISHING WEAPONS.—Funds authorized to be appropriated by title I of this Act may not be used for the procurement by Guatemala of any weapons or ammunition.

(e) SUSPENSION OF ASSISTANCE IF A MILITARY COUP OCCURS.—All assistance authorized by this Act which is allocated for Guatemala shall be suspended if the elected civilian government of that country is deposed by military coup or decree.

(f) RURAL RESETTLEMENT PROGRAM.—Assistance provided for Guatemala for the fiscal year 1986 under chapter 1 of part I (relating to development assistance) or under chapter 4 of part II (relating to the economic support fund) of the Foreign Assistance Act of 1961—

(1) may not be provided to the Government of Guatemala for use in its rural resettlement programs; and

(2) shall be provided through private and voluntary organizations to the maximum extent possible.

(g) INVITATION FOR ICRC TO VISIT GUATEMALA.—The Congress calls upon the President to urge the Government of Guatemala to allow the International Committee of the Red Cross—

(1) to conduct an unimpeded visit to Guatemala in order to investigate humanitarian needs in that country, and

(2) to investigate the possibilities of its providing humanitarian services in that country.

(h) RELATIONS BETWEEN BELIZE AND GUATEMALA.—It is the sense of the Congress that the United States should use its good offices and influence to encourage the Government of Guatemala to recognize the independence of Belize and to enter into a mutual nonaggression treaty with Belize.

DOLE AMENDMENT NO. 143

Mr. LUGAR (for Mr. DOLE) proposed an amendment to the bill S. 960, supra; as follows:

On page 64, between lines 16 and 17, insert the following:

ASSISTANCE FOR THE CAMBODIAN PEOPLE

SEC. 914. The President may make available to the non-communist resistance forces in Cambodia up to $5,000,000 for fiscal year 1986 of the funds authorized to be appropriated to carry out chapter 2 or chapter 4 of Part II of the Foreign Assistance Act of 1961, notwithstanding any other provision of law.

On page 64, line 18, strike out "SEC. 914." and insert in lieu thereof "SEC. 915."

DOLE AMENDMENT NO. 144

Mr. DOLE proposed an amendment to the bill S. 960, supra; as follows:

On page 51, lines 8 and 9, strike out "Cuba, or Syria" and insert in lieu thereof "or Cuba".

SYMMS AMENDMENT NO. 145

Mr. SYMMS proposed an amendment to the bill S. 960, supra; as follows:

At the end of the bill, add the following new section:

SEC. . Since, softwood timber prices have been in decline for some time due to excessive supply partially caused by dramatic increases in importation of processed softwood timber from Canada, which has increased from 18 percent of U.S. market in the last 2 years to 35 to 40% today—

Since, American timber producers are suffering from this economic crisis and the difficulty in acquiring timber from the National Forest System;

Since, the disparity between the U.S. and the Canadian dollar amounts to 32%-34% and results in even further increases in processed softwood timber being imported into the United States;

Therefore, it is the sense of the Congress that the President should direct appropriate members of the Administration, including the United States Trade Representative, the Secretary of Agriculture, and the Secretary of Commerce, to aggressively pursue discussions with the Canadian Government directed toward immediate reduction in the Canadian export of softwood timber to the United States.

NOTICES OF HEARINGS

SUBCOMMITTEE ON OVERSIGHT OF GOVERNMENT MANAGEMENT

Mr. COHEN. Mr. President, I wish to announce that the Senate Oversight of Government Management Subcommittee will hold a hearing on the Program Fraud Civil Penalties Act of 1985 (S. 1134) on Thursday, May 23, at 9:30 a.m., in room 342 of the Dirksen Senate Office Building.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ARMED SERVICES

Mr. LUGAR. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Wednesday, May 15, 1985, in order to mark up S. 1029, a bill to authorize appropriations for the military function of the Department of Defense for fiscal year 1986.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. LUGAR. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on Wednesday, May 15, 1985, in closed executive session, to hold a briefing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON INVESTIGATIONS

Mr. LUGAR. Mr. President, I ask unanimous consent that the Permanent Subcommittee on Investigations of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Wednesday, May 15, to hold a hearing on weight reduction products and plans.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. LUGAR. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition and Forestry be authorized to meet during the session of the Senate on Wednesday, May 15, to markup the 1985 farm bill, and that the meeting conclude at the hour of 12:30 today.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. LUGAR. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Wednesday, May 15, to hold a hearing to consider the nomination of D. Lowell Jensen, of Virginia, to be Deputy Attorney General of the United States.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

REA ANNIVERSARY

● Mr. KASTEN. Mr. President, I rise today to take note of an important anniversary. Last Saturday, May 11, marked the 50th anniversary of rural electrification, one of the most forward-looking and successful programs in our Nation's history.

Those of my colleagues who are not familiar with Wisconsin should know that it is a largely rural State. Most of its western half is serviced by rural electric cooperatives who throughout the last half-century have received an invaluable helping hand from the Rural Electrification Administration.

Mr. President, in a very real sense REA helped bring rural Wisconsin—and rural America—into the 20th century. Nowadays we tend to take electricity for granted. But in areas where the population is widely dispersed and the terrain rugged, commercial utilities 50 years ago were unwilling to accept the risk and expense that went along with installing power generating and transmission facilities.

REA, working with the rural electric co-ops, helped save these areas from being left behind. Today, rural electrics are able to offer their customers electricity at reasonable rates. In many cases, this fact makes the difference between families being able to afford life in the country, and on the farm, and being forced to move to already overcrowded cities.

Rural electrification has contributed to a productive and diversified agriculture and to the growth and vitality of thousands of rural communities in Wisconsin and across the Nation. The employees of REA, through their hard work and dedication, have done much to make this contribution possible, and

their efforts should receive the recognition they deserve.

The task of the Rural Electrification Program is not yet complete. Many areas of the country would not have access to electric and telephone service even today were it not for the lending programs and technical assistance available through REA. We must all look together to ensure that rural electrification continues to play its important role in sustaining a prosperous rural America.

Mr. President, I am proud to be a cosponsor of Senate Resolution 148, and urge my colleagues to support this measure honoring the Rural Electrification Program on its 50th anniversary.●

SECURITIES SAFETY AND SOUNDNESS ACT

● Mr. DOMENICI. Mr. President, yesterday, I placed in the RECORD the first episode of the Roaring Eighties. The article was written by Steven Brill and appeared in the May edition of the American Lawyer. The name, Roaring Eighties brings to mind the speculative fervor that was all the rage in the twenties. Many of us are concerned that, unless Congress acts swiftly, this current wave of mergers/liquidations will end just like 1929.

Few of us remember first-hand the speculation that was the capstone of the Roaring Twenties. However, on May 10, 1985, Jacques Coe of Cowen & Co., wrote to the Wall Street Journal about his recollections of the events leading up to the great crash. He draws a parallel between activities in the 1920's and activities taking place now. He writes:

I doubt very much whether you get mail from people [who have been] actively engaged on Wall Street [for] as long as this writer. In my 92 year and still active as a limited partner of Cowen & Co., I have gone through many cycles of ups and downs.

I have read Felix Rohatyn's warning article on "junk bonds" etc. Whether it will have a sobering effect is questionable but, it does bring to mind a similar warning in different phraseology by Paul Warburg when he was a partner in Kuhn Loeb and, I believe, a governor of the Federal Reserve. This took place in March 1929 and was greeted by a temporary short decline followed by another bullish thrust ending in what happened in September 1929.

The old saying that "those who disregard the past are bound to be punished by the future" still is valid.

JACQUES COE,
Wall Street Journal, May 10, 1985.

Given that perspective, let us rejoin our cast of characters. As you recall in the last episode we watched with anxious anticipation the opening bid from the seductive Texan and left our characters right after the rescue squad arrived. Please refer to the RECORD of yesterday's date.

Today I ask that the "Rescue Plan," "Enter Icahn," and "The Group," and "Icahn's Magic Offer" be printed in the RECORD. Tomorrow, the Junkman cometh.

The material follows:

[From Roaring Eighties, II, American Lawyer, May 1985]

THE RESCUE PLAN

It is Sunday, December 23. After more than a week of meetings and negotiations with Pickens (in which Flom acts as an intermediary), Lipton and crew come up with a complicated plan that the Phillips board dutifully approves.

The scheme, called a recapitalization plan, would give shareholders a new package of debentures supposedly worth $60 a share for 38 percent of their stock and allow them to sell $1 billion worth of other shares back to the company for as much as $50 per share, in cash. Moreover, new shares totaling 32 percent of the stock would be issued—in lieu of some future employee wage increases—to an employee stock ownership trust, which presumably would forever vote in favor of management. When combined with other friendly shares, this employee stock trust would give management effective control over the company.

Where's Phillips going to get the money to buy back those shares and support all that new debt? Easy: The company is going to sell $2 billion worth of unspecified assets and cut capital expenditures—this from a company that had attacked Pickens's bid because it would cause Phillips to sell off assets and cut long-term capital expenditures, and a company that had spent more than $3 billion in recent years to make Douce and crew's empire bigger, by buying General American Oil and R.J. Reynolds's Aminoil subsidiary.

Phillips also announces that although it's not interested in a sale to anyone, it will put aside its recapitalization plan and take $62 a share in cash for all shares if anyone is interested.

When Phillips announces the plan, it claims the package is worth $53 a share—which is better than Pickens's $60, they say, because his bid is illusory.

As for Pickens, there's an announcement about him, too: He's agreed to take a $53 deal from Phillips for the stock he's already bought. Only there's one catch: Pickens, despite his repeated protests that he'll never take greenmail or any other deal not offered to all the shareholders, is guaranteed the $53 in cash. Plus he's been given $25 million in "expenses" he's supposedly incurred in mounting his now-aborted effort.

Thus, Pickens has made a quick $89-million profit on his purchase of Phillips stock. Moreover, because he has also bargained for all litigation to be dropped, he has avoided any possible embarrassment from wide disclosure of the depositions suggesting tipping or insider trading.

On the heels of the announcement of the Pickens buyout and the recapitalization plan. Phillips stock plummets from $54.88 to $45.25.

Although Wall Street analysts quickly set a value of $45 to $50 on the recapitalization package and the stock hovers at $45 to $46. Pickens maintains, with a straight face, that his $53 cash sellout is not greenmail but only a different form of the same deal offered all the shareholders. (One of the great features of our soap opera is the ability of so many people to keep straight faces in situations like these.)

Phillips and Pickens are quickly sued in a shareholder class action. Among the complaint's more persuasive points is that the Phillips board had said it would take $62, yet when Pickens offered $60 for some of the shares, the board was not willing even to sit down with him to see if it could get him to offer $60 (or $61 or $62) in cash of its verifiable equivalent for all the shares. In effect, as one arbitrageur later put it, the board had instead said to the shareholders, "We think the stock is worth $62, we won't listen to his $60 to see if it's real; and we want to force you to take what we say is $53 from us in a package that the market says is really worth $45 and that, with the employee trust getting so much stock, forever forecloses the possibility of another bid."

But the suit in Delaware state court is doomed; the law there is that a board of directors can exercise its "business judgment" pretty much as it sees fit as long as it's not grossly negligent.

ENTER ICAHN

In *The Raring Eighties* Carl Icahn's résumé reads like the model career path. He srarted out as a stock trader, graduated to arbitrage, and then decided that rather than take arbitrage risks anticipating other people's raids he'd gamble on a sure thing—that *he* would do a raid. That is, he'd buy stock and watch it jump as he threatened a takeover.

As Icahn enters center stage, the camera flashes back to a confidential memo he wrote in order to recruit prospective partners in 1980 (which was one of the exhibits in a court record recently unsealed at the request of *The American Lawyer).* In the memo Icahn summarizes his *modus operandi:*

It is our opinion that the elements in today's economic environment have combined in a unique was to create large profit-making opportunities with relatively little risk. . . . It is our contention that sizale profits can be earned by taking large positions in "under valued" stocks and then attempting to control the destinies of the companies in question by:

(a) trying to convince management to liquidate or sell the company to a "white knight':

(b) waging a proxy contest, or;

(c) making a tender offer and/or;

(d) selling back our position to the company.

"Icahn & Co., Inc., has already utilized these maneuvers successfully three times during the past two years," the memo continues, pointing out that the returns on capital from these "maneuvers" had so far been 100 to 250 percent.

By now, five years later, the several dozen partners whom Icahn recruited for various forays with memos like this one include a small circle of ever-richer relatives, close friends active in garment-center and other small businesses in New York, and other stock speculators—including Cincinnati-based Marvin Warner. (Warner's Home State Savings Bank set off a near-disastrous chain reaction when it failed in March.) There's also one foundation among Icahn's partners, The Carl C. Icahn Foundation. Drawing on tax-deductible contributions from Icahn and an Icahn-controlled corporation, the foundation—which, according to its publicly available tax filings, has contributed only minor portions of its assets or income to charity—has invested in at least one of its namesake's limited partnerships, a practice that, depending on regulatory interpretations, might violate Internal Reve-

nue Service regulations limiting such self-dealing.

With these partners in tow, Icahn has now gone after 14 different companies. And he has taken option d)—greenmail or some variation of it, such as selling to a third party whose purchase was arranged by the target company—nine times. He has forced the target into the clutches of a white knight three times. In the two cases where he gained control, he quickly achieved partial liquidations.

So in the reception area at Icahn's Sixth Avenue office, we fine 14 neatly framed covers of annual reports—among them those of Marshall Field, Gulf & Western, Dan River Mills, Owens Illinois, and Simplicity Pattern—each trumpeting a quick money triumph.

Icahn could also have another wall full of framed documents: SEC consent decrees he has collected in earlier fights for five of the 14 target companies. And if even a fraction of the additional charges of securities law transgressions made against him in court by his targets before they'd caved were true, he arguably deserved a few more. If the wall were large enough, he could also include a slew of demerits from his earlier days as a stock trader and arbitrageur, a consent order from the New Jersey Bureau of Securities, a censure from the New York Stock Exchange, a consent agreement with the New York Stock Exchange, an Assurance of Discontinuance from the New York state attorney general's office, and four decisions by the Chicago Board Options Exchange fining Icahn's company for options trading irregularities.

By all accounts, including those of his executive quarry, Icahn is relentlessly single-minded once he starts a fight. In many instances, he unabashedly asks for greenmail. He is always willing to bargain through all hours of the day and night down to the last dollar, frequently seeming to go along with one price, and then prolonging things for hours, claiming he has changed his mind. And he prides himself on negotiating without lawyers, thinking he can best any of his target CEOs one on one (which he probably can). In one deposition, Icahn recalled that when Marshall Field's chairman didn't call him back to agree to a negotiating session, he himself called again because he was "beginning in some way to sort of feel that surge of battle a little bit."

Yet there's something appealing about Ichan—perhaps his obvious, sheer intelligence and confidence in himself as a lone player in an arena where everyone has layers of advisers. There's also his candor. If, as enemies and even friends say, he is one of the greediest men on the planet, he is also in his way delightfully greedy, stripped of all pomposity and pretense. In one suit over his fight for Dan River (which bought him out and went private), Icahn testified, when asked about his prior greenmail payoffs, "I'm not a Robin Hood."

On December 27, 1984, two days after the announcement of the Phillips recapitalization plan and the accompanying buyout of Pickens, Icahn and his web of partnerships and corporations began buying Phillips stock. The price is about $45.

"I got into it," Icahan will later explain in an interview, "just because I figured something would happen. I thought there really wasn't much risk because the board's offer was too low. They'd have to raise it, or someone would have to come in and better it," Icahn would soon be that someone.

THE GROUP

The scene shifts to northern Westchester County and the Bedford, New York, estate of Ivan Boesky, the fabled arbitrageur. It's a Saturday in January. We are about to see that arbitrage in The Roaring Eighties may not be as risky as it's cut out to be.

Boesky, like most arbs, has had a horrible Christmas season. Boone Picken's sellout has threatened to cost Boesky millions; he reportedly bought Phillips stock in the $50s in anticipation of Pickens's deal—or a better one—going through, only to watch the stock drop to the mid-$40s when Pickens was bought out.

Boesky has invited Icahn, who has an estate nearby, to discuss the Phillips fight.

According to Icahn's later deposition, Boesky had called him a few days earlier and said, "I hear you are involved in Phillips." At the time, Icahn's stock purchases were supposedly secret and certainly not a matter of public record; and the information would be gold to Boesky, who presumably could be buying back Phillips stock at its now-lowered price in hopes of evening out his position should a new Phillips suitor appear.

"I think I said, 'Yes, I bought some stock.' but I really don't recall," Icahn testified.

Boesky told me in a February interview that he had "never, ever" spoken to Icahn "about any deals or stocks we're involved in." He otherwise declined all comment about his Phillips trading.

Icahn further testified that during their telephone conversation Boesky said he felt the Phillips situation was ripe for a proxy fight. The two then decided to set the Saturday meeting.

At this meeting (attended by three other people—an Icahn aide, a Boesky assistant, and a broker from Shearson Lehman/American Express—according to Icahn's testimony), Boesky shies away from joining Icahn in a Phillips fight, but urges him on. Icahn replies that he doesn't like simple proxy fights, rather, he prefers tender offers combined with proxy fights, because while they may be riskier, they put more pressure on the target.

"Did you discuss at what price a tender offer should be made?" Icahn was asked in the subsequent deposition.

"I don't remember going into that. Maybe, but I don't remember it," he replied.

"Did you discuss how much money would be needed for a successful tender offer for Phillips?" he was asked.

"All of this must have come up," he answered. "I remember generally we talked about all of these things, but I don't remember any more.

"Then later on, Ivan [Boesky] kept calling me," Icahn added.

According to Icahn's deposition, "a few other" arbitrageurs were in contact with him, either before he announced a bid for Phillips or soon thereafter. But the clannishness doesn't stop there. When asked in the deposition about whether the subject of financing a Phillips tender offer came up in his chat with Boesky, Icahn replied, "The name Drexel came up."

Drexel, of course, is Drexel Burnham Lambert Incorporated, America's preeminent junk-bond dealer. (More on that later.) And, according to one Drexel banker and to other deposition testimony, it was Boesky who brought up Drexel's name to Icahn. Indeed, Drexel, according to other deposition testimony, had thought up a leveraged junk-bond scheme for a Phillips tender offer and "was looking for someone to do it," says the Drexel banker.

"One guy we started with was Ivan, because we knew he'd been burned by Pickens and figured he might try to sell it to someone else even if he didn't take it himself, which is just what happened with Icahn."

"Yes, we talked to Boesky before we talked to Icahn about a financial package for a Phillips takeover," confirms David Kay, head of mergers and acquisitions at Drexel. "It was our package, and we were trying to interest someone in it. . . . I probably talk to Ivan everyday," he says.

In short, Boesky, an arbitrageur with a need for inside information (Is there any other word for secret information about a possible tender offer?) was out discussing, perhaps even encouraging, an Icahn tender offer formulated by Drexel. And Drexel, of course, could have been passing that same information on to any of its other stock speculator clients, too—not in the traditional and black-letter sense of tipping someone off with inside information, but in the context of asking people to consider the deal for themselves, while mentioning that Icahn was seriously considering it.

"These arbitrageurs and takeover entrepreneurs, and people from Drexel are a ring, pure and simple," asserts one takeover adviser. "They feed on their own inside information and cooperation, and to believe anything to the contrary is to be ridiculously naive."

According to Icahn's deposition testimony, Boesky sold him 2.74 million shares of Phillips on January 28. But, his testimony continues, 11 days later, on February 9—five days after Icahn announced his bid for Phillips—he and Boesky met again, this time over dinner at Icahn's house. At that meeting they discussed the fact that Boesky had bought another 4 million Phillips shares.

Had Boesky bought the shares before Icahn's bid, but after their January discussions when he had learned that Icahn was contemplating a bid, thereby taking advantage of that information? Had Boesky done any trading *at all* in Phillips stock during the time he was discussing with Icahn and Drexel the plan for a tender offer? Asked these specific question. Boesky again declined all comment on his trading activities, citing longstanding "Boesky company policy," except to say, "I seem to detect an insinuation that such trading would in some way be wrong . . . or improper, which I find kind of unattractive . . . and offensive coming from a responsible publication." Was Icahn's deposition about their discussions accurate? "I really don't think I should comment on that," Boesky replied, "except to say that I wonder whether it is proper or legal for you to publish something like [the deposition], and that it would be foolish and not nice of me to sit here and take potshots at what a friend of mine has said under oath, whether its true or not."

According to Icahn's testimony, after that February 9 meeting at Icahn's house, Boesky "was on the phone with me every day." The arbitrageur, of course, had a big stake in knowing what Icahn was doing and how he was faring.

It is about this time, according to Icahn's deposition, that Icahn gets those mysterious late-night phone calls cheering him on in the Phillips fight. Is it an arbitrageur? Is it someone from Drexel Burnham? Is it someone else?

ICAHN'S MAGIC OFFER

It is now February 4, 1985. A messenger delivers a letter from Icahn to Douce, via

Morgan Stanley. Icahn begins by telling Douce that he owns 7.5 million shares of Phillips—or about 5 percent, purchased for about $350 million—"which makes me one of the company's largest shareholders.

"I have examined the material you have sent me concerning [the recapitalization plan] and find it grossly inadequate." Icahn's letter continues. Icahn then proposes that he acquire all of Phillips for what he calls $55 per share—$27.50 in cash and $27.50 in a subordinated note. Icahn goes on to say that the financing will be provided by Drexel Burnham Lambert Inc., which is, he says, "highly confident" it can raise the money. Icahn also threatens an alternative: If Douce and his board don't withdraw their recapitalization plan in favor of his offer, he intends to begin a proxy fight to defeat the recapitalization scheduled to be voted on at a shareholders' meeting in Bartlesville on February 22, and to begin a tender offer for 51 percent of the share at $55 in cash and what he says will be $55 in debt securities for the remaining 49 percent.

At face value, a $55 bid for the Phillips shares is an $8.1-billion offer for the company. And face value is exactly how the press plays it: Icahn's offer is called a $55 offer.

An attached letter from Drexel Burnham corporate managing director Leon Black repeats the "highly confident" claim and reveals that the financing to be arranged amounts to $4.05 billion, which will cover all of the cash portion of the offer to the shareholders. When all the numbers are added up, this means that if Icahn's plan goes through the company will have just $800 million in stock and about $11 billion in debt. Even considering Icahn's stated plan to sell $3.7 billion in unspecified Phillips assets, this debt-to-equity ratio seems to leave the company hopelessly mired in interest payments, with nothing to invest in research or oil exploration and in grave trouble if cash flow should slow.

After going through the motions of asking Icahn to answer written questions about the offer, Douce and the Phillips board reject it. They also sue Icahn, claiming among other things that his letter to Douce, which he knew the company would have to make public, constituted the sending of proxy material without prior SEC clearance, and that it was false and fraudulent proxy material because of its supposedly unfounded criticism of the board's recapitalization plan.

A few days later, Phillips puts the lie to the bona fides of its first recapitalization offer by sweetening it so that the shareholders get a package the company says is worth $3 more. (The market soon pegs its value at about a dollar more.) More important, the company announces that its board has passed a poison pill.

The dreaded poison pill. It is a Lipton creation of almost diabolical repute. In its various incarnations, it gives shareholders a right to demand all kinds of extra money in the form of debentures, or rights to sell their stock to an acquiring company, or rights to buy an acquiring company's stock if an acquirer buys more than 20 percent (or, in some cases, 30 percent) of a company. Its stated purpose is to prevent partial two-tier takeover bids by allowing the remaining shareholders to make life miserably expensive for the acquirer, a problem eliminated in most of the pills if the acquirer buys out all the shareholders, because then the acquirer owns whatever misery-causing rights that shareholder had been given.

In this incarnation, Lipton's pill allows shareholders to redeem their shares for $62 in debentures the moment anyone buys more than 30 percent of the company. In other words, Icahn would be buying into a company where everyone—except him, because the 30 percent buyer somehow is discriminated against and doesn't get these rights—would have a $62 debt package. Depending on your point of view (or your stock position), Lipton's pill is an ingenious way to make sure the shareholders get what the company is worth, and aren't stampeded into selling out cheap; or it's an outrageous usurpation by management of the shareholders' rights to decide on Icahn's offer for themselves, with management having set an unrealistically high price—$62—and having cleverly come up with a way (this pill) to make all the shareholders stick to it, just so management can't be thrown out in a takeover.

This pill is adopted less than three weeks after a Delaware court has decided that a similarly intended, though differently configured, Lipton pill aimed at saving Household International from a possible raid is perfectly legal.

The camera now shifts to any February morning at the Regency Hotel in New York, where Joe Flom or others from Skadden, Arps can be found arguing, persuasively, that Lipton's pill is a patently illegal usurpation of shareholder rights, and that unless the Delaware appellate court (where Skadden will be arguing against the Household pill) overturns the lower court decision, the takeover game may be frozen by this Rube Goldberg monstrosity.

Indeed, at almost every table at the Regency, lawyers, investment bankers, CEOs, and their clients are talking about the pill: and most seem awed by its ominous impact.

"Marty comes up with a new trick, and it's like someone passed legislation," comments takeover expert Arthur Fleischer, Jr., of Fried, Frank, Harris, Shriver & Jacobson one morning over an omelet. "Don't they realize it's a passing fad that has ten antidotes?"

Fleischer doesn't realize how right he is, and how soon we'll all find out that in The Roaring Eighties fads like the pill pass quickly indeed.

Underlying the pill and other Phillips defenses is the company's attack on Icahn's offer as unreal because the financing has not been lined up and Icahn won't be able to get it.●

IN SUPPORT OF JOB CORPS

● Mr. DECONCINI. Mr. President, early in the morning of May 10, 1985, the Senate adopted by the narrowest of margins a budget package that included a 30-percent cut in the Job Corps Program.

I am a 100-percent supporter of Job Corps, and I have given this fine program my strong support throughout my years in the Senate. Arizona has two excellent Job Corps centers, one in Phoenix and one in Tucson. I have been appalled at the administration's tactics in trying to seek termination of this program. In order to hide Job Corps' fine record of achievement in helping poor and disadvantaged individuals, OMB Director Stockman and others have sunk to the level of using manufactured statistics to over estimate Job Corps costs and to downplay its successes. To the embarrassment of the administration, independent studies conducted at the request of the Department of Labor have been released which truly portray the costs and benefits of Job Corps. Let me briefly review the key facts that these studies and others have revealed:

For every tax dollar spent on Job Corps, $1.46 was repaid to the Treasury in increased tax revenues from the higher earnings of program participants and from the decreased burdens which Job Corps graduates placed on Government programs.

The "slot cost" for participants in the Job Corps is approximately $6,000 per participant, not the $15,000 that the administration estimates.

Considering that Job Corps enrollees come from the most disadvantaged sectors of our economy and that 4 out of 10 new enrollees in Job Corps have prior arrest records, the cost of the Job Corps ia a bargain. It should also be noted that costs to incarcerate an individual range from $22,000 to $30,000 per year.

Mr. President, although I am pleased that the Senate did not bow to the misinformation disseminated by the Reagan administration by terminating Job Corps, let there be no doubt that the 30-percent cut will, if approved by the House of Representatives, severely damage the effectiveness of this program and therefore harm the many, many low-income, hard-core unemployed people who could benefit from the training that Job Corps offers. Even if a freeze were imposed on Job Corps funding, the Department of Labor projects that between one and six centers would close and training slots would be reduced by 4 percent. The hardships that would be caused by a 30-percent cut is unacceptable to this Senator.

In sum, Mr. President, I hope that our colleagues in the House of Representatives have a chance to visit the Job Corps centers in their districts prior to making a decision on the budgetary status of Job Corps. I have no doubt that such a visit will renew their confidence in a program that is not only a good dollar value but has helped so many poor people become working and contributing members of American society.●

TRADE POLICY AND FOREIGN POLICY

● Mr. LEAHY. Mr. President, the balance between U.S. trade promotion and the importance of protecting our vital technology is an issue that continues to be debated within the Reagan administration and in Congress.

In a recent issue of the Washington Quarterly, Dr. Jan Feldman of the University of Vermont has written an article entitled "Trade Policy and For-

eign Policy." It is a sober and thoughtful assessment of the impact of export controls on our national security. I urge my colleagues and members of their staff to study Dr. Feldman's recommendations before we once again turn to the Export Administration Act.

I ask that Dr. Feldman's article be printed in the RECORD.

The article follows:

TRADE POLICY AND FOREIGN POLICY

(By Jan Feldman)

The recent furor over the alleged expansion of KGB industrial espionage activities is creating a tension between the traditional U.S. commitment to trade promotion and the protection of U.S. technology.

The tension between these goals came to a head as the reauthorization of the expired Export Administration Act of 1979 (EAA) was debated. After a full year of haggling, in which the House and Senate could not come to an agreement, the EAA has now expired. But Senate backers of more stringent control on export technology plan to reintroduce their bill with its strong controls intact. They are confident that the House will bend and accept their new, tougher EAA. Regardless of the final form that the bill takes, the tension between export promotion and technology control, as well as the problems inherent in the use of trade as an instrument of foreign policy, promise to be perennial.

This article evaluates the threat to our technological lead and national security and the measures that have been proposed to counter that threat, concluding that any strategy which undermines our export-dependent economy is hardly likely to be a boon for national security.

Little Ruth sits cross-legged on the floor playing with her "Speak-and-Spell." It is a teaching toy, but within its innocuous plastic casing can be found sophisticated components not all that different from the ones housed in the Pentagon's computer. Ruth's parents bought it for her birthday at the local department store but, had they been Soviet diplomats, they could have bought the toy just as easily—maybe for little Vladimir's birthday or maybe for more nefarious purpose.

An amusing hyperbole? Perhaps, but such a scenario seems plausible enough to several members of Congress and the Department of Defense (DOD) to have prompted strong countermeasures. A new protectionism may be emerging. Unlike the traditional brand, it is not intended to protect a declining industry from foreign competition but, instead, to protect our "cutting edge" technologies for reasons of national security.

Behind this impulse toward technological isolationism is the fear that our free and open trade policies have enhanced the military capabilities for our adversaries, especially the Soviet bloc. This perspective has influential supporters who, with the president's backing, have introduced amendments to strengthen the restrictions on technology exports authorized by the Export Administration Act (EAA) of 1979. The Act expired September 30, 1983, and is still in conference a year later, attesting to its controversial nature. An executive order is currently maintaining the EAA's controls in place, as the debate over the Act is likely to drag on at least until the end of this congressional session. In addition to empowering the president and the Department of Defense to restrict the export of U.S. technologies to foe and friend alike, it encourages the use of trade sanctions to bring recalcitrant trading partners around to a more conservative way of thinking. It may soon become harder for U.S. firms to export commodities containing advanced technologies.

In addition, the Department of Defense has recently reconstituted a tough directive limiting the transfer of technology which occurs under the auspices of DOD programs. The DOD's assistant secretary for international security policy, Richard Perle, is calling the "hemorrhage of technology" to hostile nations one of the most serious problems facing the United States, asserting that we are in the midst of a "quiet war" for technological supremacy.

At no previous time in history has one nation [the USSR] been able to prey so deeply and systematically on the fruits of its adversary's genius and labor.[1]

But these knee-jerk responses misperceive the threat and misconceive the solution. A well-considered policy must combine an analysis of the price we pay in national security because of technology leakage, with a realistic assessment of the costs of implementing the proposed solutions.

We must conclude that the proposed solutions will be as ineffectual as they are expensive, and will not heighten U.S. security significantly but, on the contrary, are likely to erode it. By restricting the exchange of scientific know-how and technology between the United States and NATO allies, improvements in the common defense capability will be inhibited, while tensions in an already fragile alliance will be exacerbated.

Failure to draw the distinction between U.S. general foreign policy goals and specific national security interests has contributed to the current tendency to use trade policy in an ad hoc and counterproductive way, reducing U.S. credibility with allies and adversaries alike. This, in combination with the inability to specify which technologies deserve special protection, reduces the likelihood of achieving agreement with allies on the enforcement of multilateral controls. Controls imposed unilaterally by the U.S. government would only serve to burden U.S. exporters, and erode the export-based economy on which our national security is surely also dependent.

Although it has currently reached an all-time critical mass, the concern over the leakage of technology to the enemy is nothing new. Neither is the commingling of trade policy and foreign policy, nor the use of trade as leverage against the behavior of other countries. The Export Control Act of 1949 allowed the president to compile a list of controlled technologies, a power that was reinforced by Congress in 1962.

But by the mid-1960s, the emphasis had shifted from control to promotion as commercial ties began to be seen as a way of lessening Cold War tensions. President Johnson spoke of "building bridges" with the USSR and Nixon talked of "cooperation rather than confrontation." Accordingly, the Export Administration Act of 1969 declared that U.S. policy was to "encourage trade with all countries with which we had diplomatic relations," and directed the secretary of commerce to revise and shorten the list of controlled items.

But Soviet actions in Angola, Afghanistan and Poland gave rise to the perception that détente had backfired and that the United States had been had. All the while, the Soviet Union had been availing itself of Western technology, boosting its own military capability.

Unquestionably, the USSR has acquired or would like to acquire U.S. technology with potential military application, such as high speed computers, microprocessors, semiconductors, inertial navigation systems, fiber optics composite metals and precision machine tools, but the extent to which a hemorrhage is occurring is not completely clear.

Another point more often taken for granted than proved is that the U.S. technological lead is so narrow or fragile that any further erosion will create an immediate threat to national security. Appraisals of the Soviets' ability to reverse engineer and assimilate these technologies to their manufacturing infrastructure are questionable. Yet policies currently proposed to counteract this putative threat have strong backing in the Department of Defense and Congress and could make it tougher to export products which contain advanced technology.

Likely to be especially hard-hit by these policies are aerospace and advanced electronics manufacturers who export sophisticated weapons systems. Ironically, these manufacturers had thought that things were looking up when Reagan took office, signaling a reversal in the adversarial relationship that had existed between weapons exporters and the Carter administration. Reagan immediately rescinded the "leprosy" letter—Carter's prohibition against contact between U.S. weapons salesmen and U.S. embassy personnel, letting it be known that actively promoting the sales of U.S. arms abroad would no longer be frowned upon. In his Arms Transfer Policy Directive of July 8, 1983, Reagan announced that:

The United States views the transfer of conventional arms and other defense articles and services as an essential element of its global defense posture and an indispensable component of its foreign policy. . . . We will deal with the world the way it is, rather than as we would like it to be.[2]

Industry's sigh of relief was to be short-lived. As an international sales representative of a major weapons manufacturer expressed it. "Reagan came on board and things were great . . . except for the technology transfer policy."[3] Much to the consternation of industry, the Reagan administration's encouragement of arms sales is somewhat counteracted by its discouragement of technology transfer. The president sent a letter to House and Senate leaders last Spring strongly backing amendments to stiffen the export control provisions of the Export Administration Act.[4]

As every weapons exporter knows, technology transfer is often an inevitable ingredient of international sales these days. Almost no country can afford to buy a sophisticated item off-the-shelf and, as a condition of purchase, more and more are demanding compensatory benefits or offsets, which frequently take the form of requests for participation in production. Coproduction is fast becoming a necessary modern marketing tool which gives U.S. firms the flexibility to compete internationally. The purchaser desires coproduction arrangements because they provide access to advanced technology and manufacturing know-how, thus strengthening the industrial base and labor skills of the purchasing country. Where weapons are roughly commensurate in price and quality, it is likely to be the offset package offered by the competing firms that will clinch the deal for one

---

Footnotes at end of article.

of them. Firms often end up in offset auctions, committing themselves to coproduce the weapon with the purchaser. A recent Treasury Department survey of the U.S. aerospace industry indicated that 75 percent of sales would not have been made had offsets not been offered.[5]

Willingness to let the purchaser participate in the production of the item almost always necessitates sharing technology. Because technology transfer is an inherent part of collaborative weapons production, these cooperative ventures, whether arranged between private firms or initiated by governments (i.e., in the context of NATO), will be particularly susceptible to proposed new controls.

"A NEW PROTECTIONISM MAY BE EMERGING . . . TO PROTECT OUR 'CUTTING EDGE' TECHNOLOGIES FOR REASONS OF NATIONAL SECURITY"

U.S. firms feel that if comparable controls are not enacted by other countries, those controls imposed unilaterally by the U.S. government will have no significant impact on the availability of technology to the Soviets, but will allow foreign firms to jump in and replace U.S. firms in the sale of sophisticated equipment. This happened in 1979 when the government held up a license for Sperry Univac to sell a computer-driven word processing system to Tass. By the time the U.S. government finally granted the license Tass had signed with a French firm.[6]

U.S. firms are not lobbying for the elimination of export regulations. Regulation has been a fact of life for exporters of technology for a long time. Instead, industry is arguing that a vast network of regulations already exists, complete with red-tape and long delays which will only be compounded by adding another layer of regulations.

In a large number of defense-related transactions, the U.S. government is itself a party, usually as an intermediary between U.S. contractors and foreign governments and, therefore, can regulate the transfer of technology through government-to-government memoranda of understanding (MOUs). But even in private international transactions to which the U.S. government is not a party, all exports of technology must be licensed by the Department of State or Commerce. Statutory export regulations such as the International Traffic in Arms Regulations (ITAR, Title 22, CFR parts 121-128) authorized under the Arms Export Control Act and administered by the Department of State's Office of Munitions Control, and the Commodity Control List (CCL) authorized by the Export Administration Act and administered by the Department of Commerce, already provide labyrinthine licensing procedures for different classes of articles.

Other existing mechanisms for protecting technologies against inadvisable transfer include:

The government system of classifying material and the Department of Defense's strict regulations regarding the industrial security of its private contractors. Additionally, the National Policy and Procedures for the Disclosure of Classified Military Information to Foreign Governments and International Organization (NDP) requires DOD to weigh the costs and benefits of sharing sensitive technologies with allies. Recently, concern is being expressed over unclassified technologies and know-how. Much of this material cannot be classified for a variety of reasons: it may still be in the research of emerging phase, or it may be intended for commercial rather than military use, or it may simply not meet the damage standard that would immunize it against the Freedom of Information Act.

Company protection of properietary expertise, argues industry, provides an internal mechanism for the protection of sensitive material. The self-interest of the firm is a sufficiently strong motive for keeping its advanced technologies out of the hands of its domestic and foreign competitors. But economic sensitivity and strategic sensitivity are not necessarily synonymous, giving rise to some skepticism about leaving the regulation up to industry.

The Coordinating Committee for Multilateral Export Controls (COCOM) agreements provide the only multinational mechanism for regulating the transfer of technology. COCOM was formed in 1949 to combat the flow of sensitive technology to the USSR and is composed of the NATO countries (minus Iceland, plus Japan). COCOM is actually only a loose aggregation of countries with diverse trade and foreign policies. Its list of restricted technologies is much shorter than the United State's own CCL, and additions can only be made by consensus. Similarly, the list can only be enforced by a gentlemen's agreement as there is no provision for punishing violators. The only way to restrict the flow of sensitive military technology to the Soviet Union is through international consensus and voluntary enforcement. The best chance for achieving consensus is to identify a lean list of technologies and manufacturing processes, the transfer of which truly pose immediate national security threats. Europeans have signaled that they are unwilling to have COCOM used by the United States for partisan or nebulous foreign policy goals, as is evidenced by COCOM's recent rejection of the U.S. bid to add several newly-emerged technologies to the list of already restricted ones.

COCOM's most recent meeting, held in Paris in July 1984, was characterized by trench warfare and endless infighting. Against U.S. objectives, COCOM agreed to decontrol eight-bit personal computers and main-frame computers except for those with a data-processing rate of faster than 48 million bits of information per second. The United States, however, managed to add to the list of restricted items electronic-grade silicon, printed circuit boards and other components of computer-making technology. While the July meeting demonstrates that compromise can be achieved, the key concern remains how to keep COCOM from doing more harm to its members and the alliance than to the Soviets.

While there is agreement between government and industry that these existing mechanisms are not perfect and that some level of protection of critical technology is desirable, there is disagreement as to how this protection is to be applied and to which technologies. The complex nature of technology and the fact that sophisticated technologies can be embedded in innocuous end products exacerbates the difficulties of control. The most problematic area for policymakers is the nebulous category of dual-use technologies which have potential military as well as commercial application.

How many Americans would want to have to produce a permit to enter their local Radio Shack and buy a Pac-Man game? Yet many such video and computer games are prime examples of dual-use technology because, just like the lining of coffee pots which can also be used on the nose-cones of aircraft, they embody technology which has potential military application. Is it absurd to treat these technologies as militarily strategic? Not completely, for Krushchev liked to point out, even the buttons on a soldier's trousers are strategic, since without them, he would be forced to hold his trousers up with his hands in battle.

In an effort to sort out this problem, the Export Administration Act of 1979 directed that military critical items be placed on a Militarily Critical Technologies List (MCTL) which, on the recommendation of the respected Defense Science Board Task Force on the Export of U.S. Technology's report to the Department of Defense (the Bucy Report), would have strictly controlled a select group of revolutionary processes (rather than products) while deregulating low-level technological processes and products.[8] Accordingly the resulting MCTL was supposed to simplify the lives of Commerce Department officials, but instead, caught on the conceptual snag of dual-use, it has become a nightmare of complexity. Still classified and not officially published, this unwieldy three-volume document is tantamount to a modern technologies shopping list and defies both incorporation into CCL and application by Commerce and Customs personnel.

Detractors within government claim it is nearly useless in its present form and business complains that in spite of the fact that the MCTL was originally intended to regulate East-West trade, it promises to have a real, though restrictive, impact on West-West trade as well. The MCTL is a potentially useful document and should be formulated in such a way as to make it the cornerstone of technology export regulations—specifying a concise list of truly critical technologies and processes the export of which would directly contribute to Soviet military capability.

Nor have our European trading partners failed to realize the implications of the proposed restrictions for U.S.-European trade. They don't see why we can't be friends even if our friends aren't friends. In spite of recent expulsions of Soviet diplomats by several European nations as part of a drive against illegal acquisition of information, most European nations do not share the magnitude of current U.S. concern, partly because they perceive the Soviet threat differently and partly because they reject in principle linking foreign policy with trade policy.

The European Economic Community (EEC) recently registered a formal complaint with the U.S. government over proposed amendments to the Export Administration Act of 1979 which would give the president authority to terminate imports from countries that failed to comply with U.S. restrictions or embargoes. Such punitive measures are seen as extraterritorial attempts by the United States to define other nation's sales territories and foreign policies. Such threats are viewed as an infringement on national sovereignty and a sign of U.S. distrust of our allies.

The EEC sees these strong-arm policies as self-serving on the part of the United States, especially in light of the willingness of the U.S. government to bend to domestic economic pressures and resume grain sales and initiate the sale of oil and gas exploration equipment to the USSR. During periods of economic recession all countries, the United States not excluded are more likely to take heed of the economic costs of trade restrictions, exercising what the French call "commercial prudence."

Proposed amendments to the Export Administration Act are not the only things ruffling European feathers. A controversial directive governing all mechanisms of technology transfer under the aegis of the Department of Defense threatens to have a serious impact on U.S.-NATO collaborative weapons production programs. This directive, 2040.2, signed by Defense Secretary Caspar Weinberger on January 17, 1984, applies to all mechanisms of technology transfer, including strategic trade licensing, munitions licensing, security assistance and DOD collaborative research and development programs. It firmly expresses the view that technology is a national security asset: It shall be DOD policy to treat defense related technology as a valuable and limited national security resource to be husbanded and invested prudently in the pursuit of national security objectives.[9]

The man whose imprint is clearest on 2040.2 is the assistant secretary of defense for international security policy, Richard Perle. A forceful personality, influential beyond what his official rank would suggest, he has been characterized by his detractors, even within the Pentagon, as everything from a "Cold-Warrior" overreacting to the USSR, to a turf-builder, overzealous in his approach to technology control in the interests of self-aggrandizement.[10]

In addition to militarily critical technologies, sensitive technologies are now being slated for control. This is likely to put a damper on NATO collaborative programs, which just happen to be the rice bowl of another Pentagon office, the undersecretary of defense for research and engineering.

Support for these collaborative programs comes from other quarters as well. Congress gave the green-light to the programs under the banner of NATO rationalization, standardization and interoperability (RSI) in order to eliminate duplicative research and development which resulted in our buckle not fitting their belt. The Culver-Nunn amendment to the 1975, 1976, and 1977 DOD Appropriation Authorization Acts and the Glenn-Roth-Nunn amendment to the 1983 DOD Appropriation Authorization Act affirm Congress' general support for NATO RSI and acceptance of the technology transfer that it entails. Moreover, NATO collaboration has the official endorsement, if not heartfelt support, of Secretary of Defense Weinberger in the "Ninth Report to Congress on the Standardization of Equipment within NATO."[11]

Sponsors of tougher legislation feel that the extraterritorial reach of U.S. policy is necessary and that the threat of sanctions is needed in order "to help the Europeans learn their lesson".[12] But the lesson that our allies and trading partners are learning is that U.S. commitment to alliance defense may not extend to the sharing of the technology that makes this defense possible. Accordingly, European nations are now taking measures to assure their technological independence—a policy which, even if uneconomical, they will eventually achieve through sheer political will. The European reading of the intent of the Export Administration Act and DOD Directive 2040.2 is that the United States would rather close down the shop than give it away.

Before new restrictions on technology transfer are imposed, we should know whether the benefits of these new controls will be commensurate with the costs of enforcement and the loss of trade, and whether stricter controls will succeed where the network of existing controls have apparently failed.

Technology passes through many channels. According to the CIA, the Soviets have a systematic and coordinated approach to the acquisition of Western technology, employing legal and illegal means.[13]

Legal transfers are made possible by the open nature of our society and include open access to trade journals, technical reports, trade fairs, exhibitions and academic exchanges. The National Academy of Sciences recently released a report assessing the technology transfer issue, deemphasizing the danger posed by the leakage of technology that occurs in the process of scientific and academic exchange of information, and advocating instead of more restrictions, a greater emphasis on, and encouragement of, scientific research to protect our technological lead.[14]

Technology also leaves the country through legal purchases under general or validated licenses, or between U.S. corporations and their overseas subsidiaries. An interesting case of such a sale is the now controversial Kama River truck facility which the United States sold to the Soviet Union at the height of détente. Subsequently, it was discovered that in violation of the agreement, the Soviets were deploying these trucks in Afghanistan. While the current administration uses this as an illustration of what it is trying to prevent through stricter export regulations, this case is distinctly not an example of the failure of existing regulations. Rather, it is a case of a well-considered, political decision which at the time seemed appropriate and expedient to an administration which was guided by different principles.

Illegal purchases are also made on behalf of the Soviets by agents and dummy corporations. These purchases often leave the country under legal validated licenses, but once the goods leave the United States they are almost impossible to safeguard from illegal reexport. An example of this sort of illegal transfer is the Bruchausen-Maluta case in which a non-covert purchase of regulated equipment was labeled falsely and exported through normal channels, only to be diverted from its destination (a dummy corporation in a Western European nation) to the Soviet Union.

"NEBULOUS FOREIGN POLICY GOALS . . . PURSUED THROUGH INDIRECT MEASURES, USING TRADE AS A CARROT OR STICK, ARE LIKELY TO BE AS CONTROVERSIAL AND INEFFECTIVE AS THE GRAIN AND PIPELINE EMBARGOES"

Illegal transfers can also be accomplished by smuggling or industrial espionage. A rather notorious example of the latter is the Bell case. William Bell, a radar project engineer for Hughes Aircraft, provided for the sum of $110,000 more than twenty classified reports on future U.S. weapons systems to a bogus Polish businessman.

Soviet efforts may have netted them some valuable savings in research and development (R&D) funds and time, but the best way of short-circuiting this predatory relationship is less obvious. Restricting the free exchange of information is a high price to pay for the protection of technology. While our commitment to an open society allowed Soviets to back a truck up to the National Technology Information Service of the Department of Commerce in 1980, and to legally load more than 80,000 documents detailing many of the latest technological advances, many people would be willing to accept such things as the price we pay for the freedoms we cherish.

Significantly, few of the cases cited by the CIA actually support the contention that existing export regulations are inadequate or that augmenting them in the proposed ways will solve the problem. Generally technology transfers are carried out overtly and do not violate U.S. laws, or they are carried out covertly and would probably continue to evade stricter regulations as well. The FBI estimates that 90 percent of the technology which finds its way into Soviet hands passes through noncommercial channels, meaning that only 10 percent of the leakage, which is the major target of the proposed regulations, can be attributed to the failure of the export control system.

The costs of enforcing these regulations have not been estimated, but a DOD official averred that the cost of such programs as the new "Operation Exodus" is likely to be very high.[15] What will these controls accomplish for national security? The same DOD official admitted that the goal of stopping leaks altogether is unrealistic.[16] The best we can hope to do is to delay the Soviets' acquisition of the technologies they target, and to increase the cost and effort required.

U.S. technology-exporting firms, represented by the Aerospace Industries Association and The Electronics Industries Association, are asking "why us?" They are voicing three major objections to the proposed regulations. First, they maintain that the net contribution of high-technology exports to the U.S. economy far outweighs the risk to national security. Second, the regulations are over-broad and the technologies to be regulated are too vaguely defined. Third, because there are a variety of conduits through which technology reaches the USSR, and multiple international suppliers of most technologies, imposing additional regulatory burdens on U.S. exporters is inappropriate and unfair.

According to the estimates of the United States Trade Representative and the Department of Commerce, trade generates 22 percent of our GNP and every $1 billion worth of exports creates 25,000-40,000 jobs. From 1977-1980, 80 percent of new jobs in manufacturing were export related.[17] One corporation with extensive international experience testified that:

Technology transfer has brought significant monetary income to the United States and has provided many additional jobs for the U.S. workforce. To unreasonably restrain technology transfer when the situation demands it in competition with overseas sources, can often result in the loss of product markets to foreign competitors.[18]

Moreover, a representative of General Electric claimed that transferring technology stimulates sales, the profits of which are plowed back into research, which increases rather than decreases our technological lead.[19]

Both the proposed amendments to the Export Administration Act and DOD directive 2040.2 "contain language which could adversely affect billions of dollars in exports and limit U.S. companies' opportunities to compete for foreign markets or participate in multi-national ventures," according to Karl Harr, Jr., president of the Aerospace Industries Association.[20]

Industry's second objection is that the technologies to be regulated should be specifically defined: "The very knowledge that something can be done is itself a transfer of technology. Scientists and engineers in a great number and countries are quite competent to work out the details," claims Joseph Gavin, president of Grumman Corporation.[21]

Industry's third objection is to being forced to bear the brunt of regulations that would create uncertainties at home and abroad regarding U.S. trade policy and undermine the reputation for reliability of U.S. firms.

Senator Jake Garn (R-Utah), a strong proponent of stiffer export controls, is unmoved by these complaints. He seems to fear that the profit motive may blind U.S. firms to the priority of national security. In last February's hearings on the Export Administration Act, Senator Garn commented:

I have been a friend of the business community . . . but not at the expense of the security of this country. If industry wants to come in and blindly approve the status quo and continue this hemorrhage, solely for the purpose of profits, then you are going to find an adversary.[22]

Neither does Defense Secretary Weinberger find the economic arguments compelling. In his February Report to Congress on the Technology Transfer Control Program he stated that:

It is our assessment that it is more cost effective . . . to control technology that would otherwise contribute to the Soviet military build-up, even counting the "profits" that might accrue to the private sector if exports were not controlled.[23]

In the estimation of Richard Perle: A major effort is needed to persuade the U.S. business community that the potential consequences of these transfers are intolerable. . . . It is possible to control unwarranted legal sales. Here the principle factor is the profit motive, or to put it more precisely, greed.[24]

Lenin's adage that "when the Communists get ready to hang the capitalists, the capitalists will sell them the rope," ironically seems to characterize feelings in quarters where the profit motive has generally been ranked as highly as the American way of life.

The tension between the competing goals of export promotion and technology control is coming to a head in the debates on the reauthorization of the Export Administration Act of 1979, but will provide a persistent dilemma for U.S. policymakers. Although it is undesirable, it is probably inevitable that, in the absence of a coherent foreign industrial trade policy, national security policy will occasionally fill the vacuum in a surrogate fashion. Using trade as an instrument of foreign policy has long been thought a good way of affecting the behavior of other countries. But the danger of linking trade and foreign policy is manifest in Carter's grain embargo and Reagan's West Siberian pipeline policy. Both alienated friends without perceptibly altering Soviet behavior.

The Export Administration Act of 1979 allows the president to restrict exports for reasons of national security and foreign policy. Though at times one can shade into the other, the distinction between foreign policy and national security policy should be maintained as far as possible. Measures taken in the interests of national security which bear a direct relationship to the goal they seek to achieve will be more likely to gain consensus at home and abroad. Nebulous foreign policy goals, however, which are pursued through indirect measures, using trade as a carrot or stick, are likely to be as controversial and ineffective as the grain and pipeline embargoes. As long as the distinction between national security and foreign policy is blurred, trade will be subject to current sentiments about the nature of the Soviet threat, and exporters had better apprise themselves constantly of which way the wind is blowing.

If our technological lead is envisioned as a bucket with holes in the bottom through which technology and know-how leak, we can preserve our edge by plugging the holes, or we can refill the bucket at a faster rate.[25] The former strategy requires that we compile a lean list of only the most critical technologies for control, while the latter calls for greater R&D expenditures. Whichever mix we choose, undermining our export-dependent economy is hardly likely to be a boon for national security.

ST. PATRICK'S DAY SERMON BY ARCHBISHOP O'CONNOR

● Mr. D'AMATO. Mr. President, I rise today to insert in the RECORD the sermon given by my dear friend, Archbishop O'Connor, at St. Patrick's Day Mass.

I am grateful for this opportunity to share with my colleagues the remarks of Archbishop O'Connor.

The sermon follows:

ST. PATRICK'S DAY MASS, MARCH 16, 1985,
ARCHBISHOP JOHN J. O'CONNOR

Once again there are far too many distinguished visitors here to risk singling out any. I want to thank my brother Bishops for being here and my brother priests. I am very happy that the Scriptures today were read by two Christian Brothers since I owe so much of my vocation to the Christian Brothers and we are particularly pleased that our senior Archbishop, Archbishop Maguire, retired Coadjutor of this Archdiocese, is here and Bishop Furlong, one of the most senior and beloved bishops in the United States.

Many a tourist passes him by today without a glance and even the New Yorkers, aware of his presence, are dwindling in numbers. But Father Francis Duffy still stands watch in Times Square, a symbol of the 165th Regiment of New York, the famous Fighting 69th, of whom could well be said what was said of the Marines at Iwo Jima, that among them uncommon valor was a common virtue. The legendary 69th was highly instrumental in bringing the St. Patrick's Day Parade through its years of infancy. They are with us today and we are grateful that they are. We shall be remembering them and particularly their fallen numbers in a very special way in this Mass. The statue of the extraordinarily legendary Father Francis P. Duffy is the only statue dedicated to a priest in the history of New York that stands on public property and well deserved the honor.

We are equally grateful for the presence of the Ancient Order of Hibernians who did so much for the early Church of New York and so very much to launch the St. Patrick's

Day Parade from the outset. I'm wearing today beneath my vestments, the Cross of Archbishop John Hughes of the County of Tyrone, the first Archbishop of New York. And when the old St. Patrick's Cathedral was in danger of being burned and looted during the nativist riots of 1844, Archbishop Hughes called one thousand men of the Ancient Order of Hibernians to protect the Cathedral and so they did. A plaque still stands in the Old St. Patrick's Cathedral that they defended and it reads—"Erected to the memory of members of the Ancient Order of Hibernians of the City of New York who in April 1844, at the call of the Most Reverend John Hughes, rallied to the defense of the Cathedral when it was threatened by the forces of bigotry and intolerance." Many years later the AOH gave a magnificent chalice to Cardinal Farley, Archbishop of New York, and that is the chalice that I will be using in the Mass today.

Now having with us both members of the Fighting 69th, whose heroism symbolizes that of millions of Americans who have served our country so well and of the thousands of Chaplains who have served those who have served—and having here the AOH, symbolic of the tremendous contributions made to our country not only by Irish Catholics and others but by all Catholics and many others, including those in the Military, all this provides and exceptionally appropriate setting for an announcement of historic import that I wish to make on this Saint Patrick's Day of 1985.

On November 24, 1917, because of World War I, Pope Benedict XV appointed another Patrick, Archbishop Patrick Hayes, then Archbishop of New York, as the first Bishop Ordinary, as it was called, for the Roman Catholic Armed Forces of the United States. From that day until today, through Cardinal Spellman, Cardinal Cooke and myself, the Archbishop of New York has had responsibility for all of our Catholic Armed Forces and Veterans Administration all over the world. I formally announce today, with humility, with great pleasure, that our Holy Father, Pope John Paul II, has decreed that His Excellency, here with us today, Archbishop Joseph T. Ryan, has been appointed Military Prelate or Bishop Ordinary of the Armed Forces in my place. For the first time since its birth in 1917, the Military Vicariate will cease to be associated with the Archbishop of New York. This announcement was decreed by the Holy See to be made public today, effective date will be March 25th, one week from Monday and one week and one year after I assumed the Archbishopric of New York. It is obvious that the Holy Father, recognizing my lack of familiarity with the Military, determined that the mantle should pass to another. I warmly congratulate my good friend and loyal comrade, Archbishop Joseph T. Ryan. As I told him before Mass, he is still my subject for one more week.

I have selected today's Gospel reading with deliberation. "Simon, son of John, Simon Peter, do you love me?" "Yes Lord, you know that I love you." "Simon, Simon, son of John, do you love me?" "Yes Lord, you know that I love you." "Simon, John's son, Simon, Simon whom I have called Peter, do you love me?" "Lord, you know everything, you know well that I love you."

There are marvelously profound analyses of these words to be found in the works of our scripture scholars and they give us solid foundation for explaining some of the most important teachings of our faith. But for our purposes today I suggest one very simple explanation of our Lord's questioning Peter three times. He simply wanted Peter to say over and over and then over again, I love you. For Our Lord knew so very well the healing power of words as He knew the destructive power of words. He knew how devastated Peter had been when in bitter words he had three times denied even knowing Our Lord, much less being his friend. Now Our Lord would begin the healing process—let words of love restore what words of bitterness had destroyed. Let words of loyalty begin the process of reconciliation ruptured by words of betrayal.

There has been horrible pain in Ireland for a long, long time. There has been bitter suffering there has been oppression met with violence and violence met with further oppression. Men and women, and whole families, teenagers and little children of all political positions and all religious persuasions have paid dearly for months, for years, for generations. The Holy Father has pleaded passionately for an end to it all—to the injustice, the oppression, the indignity and to the violence and the terrorism and the paralysis of fear. And he has called for the use of the word, the healing word, the reconciling word, the word of reasoned dialogue.

Today the majority of us in the Cathedral of Saint Patrick will receive the Living Word, the Son of God in Holy Communion. Before we do so, after I have held His Body aloft with the words, "Behold the Lamb of God, Behold Him Who Takes Away the Sins of the World", all will say the time-honored words, "Lord, I am not Worthy to receive you but only say the Word and I shall be healed." I know it is said that talk is cheap—it's not cheap when we use words of love for these are reflections of the Divine Word, the Living Word who is Jesus the personification of love itself. Words are not cheap when we use the words of love because they demand of us so much sacrifice, make us so vulnerable.

I know it is argued by each party that other parties won't listen but it is terribly difficult to hear over the sound of guns or tanks. I know that willingness to talk mere words can be perceived as a sign of weakness. Christ was at His strongest, not His weakest, despite all appearances to the contrary, when He cried out from the Cross, "Father forgive them for they know not what they do." And the good thief hanging on the Cross, who had seemed to have been at his strongest when he was pillaging others, now at what appeared to be his weakest, was clearly stronger than ever before in his life when he asked forgiveness of Christ, the Son of God.

I know that sometimes the powerful of the world turn back conciliatory words with public scorn. Then the words must be repeated and repeated until the shallowness of the rebuff defeats itself. The whole world recognizes that the weak are strong in their initiatives for peace and the strong are weak in the rejection of those initiatives.

My words today may please few and displease many. They are spoken from the depths of my being. They are a passionate plea to all. My actions today may please some and displease others. For allowing this Mass, as Archbishop of New York, having carefully and prayerfully conferred with hosts of advisors and listening to an exceptional number of validly concerned parties, I shall review the Parade from the steps in front of the Cathedral in honor of Saint Patrick and of all Irish everywhere of whatever religious persuasion. I will do this with profound respect for my beloved predecessor, His Eminence, Cardinal Cooke, who two years ago made in honor and all integrity, with malice toward none and charity toward all, the judgment which he deemed appropriate for the circumstances of the day. In that same spirit I will do today what I believe should be done. There are those good and sincere people who will be pained by my decision and who believe it implies support for violence and terrorism. Nothing could be farther from the truth. I reiterate and reemphasize publicly what I have said repeatedly before, I cannot accept, I cannot support or encourage support of the violence in Ireland by whomever perpetrated. And that includes both physical violence and moral violence. The violence of those who shed blood and engage in acts of terrorism, the violence of those who rob a people of justice, deprive them of their birthright and inflict on them continuing indignities. I cannot and I will not condemn or indict the legitimate struggle of Ireland for justice and human rights. But I must condemn and I do condemn once again in the strongest terms, all acts of violence by whomever or against whomever they are perpetrated and all acts of terrorism as well.

And finally, it is not for me to determine the political procedures for ending the conflict. I am a bishop, not a politician. But the moral course is clear, the time has come and is long overdue for those great nations of the world, truly dedicated to liberty and justice for all, to raise their voices loudly and clearly and unmistakably in the forums of the world or privately and quietly but persuasively, as they see fit, to demand that the oppression end, the slaughter cease. Which nation should lead the way but our own!

Now let us pray—let us pray this Feast Day of Saint Patrick, that all parties to the conflict and we ourselves, will one day see in one another what Saint Patrick saw wherever he looked—You will recall the legend on his breastplate, "Christ above me, Christ beneath me, Christ beside me, Christ before me, Christ behind me, Christ all around me, Christ in the mouth of friend and stranger." God bless you all.●

RETTA BROWN ELEMENTARY STUDENTS ARE PLAY IT SAFE WINNERS

● Mr. PRYOR. Mr. President, I am pleased to advise my colleagues that a group of students from Retta Brown Elementary School in El Dorado, AR, have been named winners in the Play It Safe Program.

This national competition, jointly sponsored by General Foods Corp. and the National Highway Traffic Safety Administration, is designed to teach elementary children about traffic safety and the media.

The students—Mark Golden, Chris Jennings, Bruce Jernigan, and Eric Moree—along with their teacher, Mrs. Karen Greer, will come to Washington May 18 to 20 to receive a plaque for their efforts.

In winning the competition, the students submitted a 30-second radio spot, a TV public service announce-

ment, and a print ad—all on the subject of seatbelt safety.

To apprise my colleagues of this fine program, I would ask that a news release advertising this program be printedg in the RECORD.

I look forward to meeting these deserving students and their teacher when they are in Washington next week.

PLAY IT SAFE NATIONAL WINNERS ANNOUNCED

WHITE PLAINS, NY, May 6—An important educational tool placed in more than 75,000 classrooms nationwide by Kool-Aid brand soft drink mix ended its competitive portion today with the announcement of twenty elementary school winners of the "Play It Safe" program.

Designed to instill a deeper appreciation of transportation safety issues and an understanding of the use and power of the media, the project affords teachers with a new way to add a significant component to the curriculum in elementary grades.

"Play It Safe" is sponsored by Kool-Aid and the National Highway Traffic Safety Administration. These organizations developed the program and established the competition to provide incentives and challenges for participation and reward learning.

The winning teams and students are from Poquoson Elementary School in Poquoson, Virginia, Retta Brown Elementary School in El Dorado, Arkansas, Brandon Elementary School in Columbus, Mississippi and Mark Twain Elementary School in Albuquerque, New Mexico.

Local student teams of four competed at the state level. State winners were judged by panels of media and traffic safety professionals in final selection rounds in Washington, D.C. and New York City.

General Foods Corporation, maker of Kool-Aid brand soft drink mix, is providing an all-expense paid trip to Washington, D.C. for winning student teams and their teachers May 18-20. The highlight of the three-day visit will be an awards presentation at the Capitol, Monday morning, May 20th at 9:00 a.m., with the winning states' senators and congressmen on hand to confer the awards and congratulate the students and teachers.

The special Master of Ceremonies of the awards breakfast will be Joey Lawrence, young star of NBC-TV's "Gimme A Break." Kool-Aid Man, popular children's media character, will also be present.

The "Play It Safe" program teaches children about traffic safety and the media in the context of a public service media campaign. As part of the competition, each team submitted a print advertisement, copy for a 30-second radio spot and a storyboard for a television public service announcement, the subject of which was t affic safety, with special emphasis on the importance of seat belts.

At the local level, support was provided by advertising clubs and agencies, state broadcasters' associations, state newspaper associations, education associations and state safety councils.

Beside the 3-day all expense trip to Washington, the four winning teachers will win cash awards and the four schools will receive audio-visual equipment and wall plaques.●

THE 20TH ANNIVERSARY OF OAA

● Mr. PRESSLER. Mr. President, I rise today to express my support for the senior citizen programs put into motion by the passage of the Older Americans Act. This year marks the celebration of the 20th anniversary of this important act. I am pleased to join my colleagues on the Senate Aging Committee in cosponsoring the Senate Joint Resolution paying special tribute to the work of the aging network and recognizing the tremendous achievements of the Older Americans Act.

South Dakotans are most grateful for the programs which have been initiated because of this act. Our senior citizens now enjoy their senior citizen centers which provide fellowship and recreation. More importantly, because of this act, thousands of our elderly citizens have nutritional meals at congregate facilities or participate in the Meals on Wheels Program which provides the nutritional meals in their homes.

This act not only provides social and human services but promotes greater independence and allows the elderly to remain in their own homes much longer.

I am proud to be a cosponsor of a resolution recognizing the 20th anniversary of the Older Americans Act and am reaffirming my support for this legislation which provides services to maintain the dignity and promote the independence of our country's senior citizens.●

CONGRESSIONAL DIRECTORY

● Mr. MATHIAS. Mr. President, the Joint Committee on Printing has authorized the printing and distribution of the "Congressional Directory" for the 99th Congress. A letter has been mailed to all congressional offices explaining the details for distribution.

Participants in and followers of activities in and around the Capitol may add this volume to their collection of important reference tools. The current edition provides biographical information about Members of Congress, the President and his cabinet, and the Judiciary. In addition, the Directory contains statistical data about congressional districts, terms of service, subcommittee memberships, and lengths of previous congressional sessions.

The "Congressional Directory" was first printed privately during the 17th Congress, in 1821. After the creation of the Government Printing Office in 1865, the publication was compiled under the direction of the Joint Committee on Printing. For more than 120 years, it has been a reliable resource tool for the Congress, the Federal Government, and the American public.

The current edition offers an additional reminder to the Congress as we approach the bicentennial of our national legislature. On the cover of the paper edition is a facsimile of the Articles of Confederation. The original document, consisting of six leaves of vellum sewn together in a 12-foot-long scroll, is stored in the National Archives. While clearly exhibiting the stamp of its age, the 200-year-old document, bearing the signatures of the delegates to the 1778 Continental Congress, is still quite legible. Although 7 of the 13 States ratified the Articles in 1778, the last delegation, from my own State of Maryland, did not sign until March 1781. Some of the issues that delayed complete support of the Articles included territorial disputes to western lands, the right of government to raise money and to build an army, and the right of individual States to control trade and commerce. But despite those difficulties, the States agreed to ratify the Articles because an instrument of one united government was needed to establish the credibility of a new America among a world of nations.

The unresolved dilemmas of the early years became more and more evident, and as time marched on, it was apparent that the Articles of Confederation were not broad enough to meet the needs of a growing democracy. The struggle for independence had ended and America was free to govern itself and to control her own destiny. Following unsuccessful conferences at Mount Vernon in 1785, and at Annapolis in 1786, the newly elected delegates adjourned to Philadelphia to debate the worthiness of the Articles of Confederation. That session, held in 1787, produced the Constitution of the United States.

Today's historians, unlike some of their predecessors, are more charitable to the document that appears on the cover of the new "Congressional Directory." it is now widely acknowledged as a product of a nation that was searching for legitimacy among other nations; and, although shortsighted on matters of finance and internal administration, the Articles of Confederation are now universally recognized as the instrument that reflected the ideas and aspirations of a young America bent on independence.●

CHARLIE: "THE INDEPENDENT WHITE COLLAR WORKER"

● Mr. PRYOR. Mr. President, recently a young Arkansas man, Mack Keown of Hot Springs, AR, won a trip to the Nation's Capital for an award-winning essay he wrote as part of a program sponsored by the President's Commission on the Employment of the Handicapped.

I want to commend this fine young man who refuses to let prejudice and fear interrupt his efforts as an individ-

ual with a handicap to lead a full and normal life.

I commend Mack's fine essay to my colleagues.

I ask that Mack's essay be printed in the RECORD.

The essay follows:

CHARLIE: "THE INDEPENDENT WHITE COLLAR WORKER"

(By Mack Keown)

Do you know Charlie? I do and am willing to bet there is a Charlie in your town, too. Charlie is my inspiration. He is unique by anyone's standards, yet he laughs and smiles a lot, is sensitive to others, is loving and caring, and in every way a normal human being. Charlie is an attorney, and a great one at that. At this pont you are probably wondering what makes Charlie so special. Aside from the fact that I am an aspiring young man determined to become a "Big Time" criminal lawyer, Charlie's influence is more personal than academic. Charlie had polio as a young man and fought against seemingly unsurmountable odds to become one of the best attorneys a person could ever meet. Charlie is a "Handicapable" person whose wheelchair is his chariot. He is not the only person like this I know, unfortunately they all cannot achieve Charlie's station in life, not because they lack determination, rather because they face prejudice and fear by people who close their eyes to the abilities the Charlies of the world are more than willing to offer the town and community.

Times are changing, but like all other major changes that are accomplished, it takes time and lots of work. Charlie went to school before there were ramps for his chariot or special parking spaces for his car. Recent legislation has required these facilities for access to public buildings, which is a step in the right direction. Even though, it will take more than legislation to open the eyes of the public in general, not to mention the employers of the world.

Our town has one of the largest rehabilitation centers anywhere. People from not only our state, but others fortunate enough to be accepted, come from everywhere to receive training and education to prepare them for their independence and a chance to make their own way in the job market. Give credit where credit is due, the Rehabilitation Center does a marvelous job on a limited budget. The sad part is for all their hard work, the prejudice and fear begin after the training when Charlie goes to apply for a job. Too often those who have good jobs or happen to be in position to hire Charlie turn their heads and close their eyes to his abilities and justify these actions by believing someone else such as Abilities Unlimited or other organizations of this nature are better suited to his needs. These organizations are fine and every town has them, but they also are strapped by limited budgets and too few jobs available.

Mainstreaming Charlie has become common in schools all over the country, yet that in itself has become a source of separation. The classes are different and not an integral part of the educational system. Nobody seems to realize that these students often work harder to achieve their goals than students who are in regular courses of study. The inter-action of students is extremely limited socially. One such person I happen to know can remember the dates, scores, and names of games and players that most people have never heard of. He is also able to recall the words to countless country and western songs and the names of each of the singers who recorded them. He is interesting and eager to work and apply himself to the best of his abilities, but who will hire him to work for their company or business. His attitude is great despite the obstacles placed in the path he must follow.

Another friend was lost in the system and has since found a new lease on life, a new job, and a loving family. The system that lost my friend was the adoption service in our state. Long years of foster care, never a permanent home or family, put this friend on the streets upon reaching his eighteenth birthday. Without proper education and preparation, he was left to sleep on benches, under bridges, and to sell blood or beg for meals the best way he knew how. Determined not to make this his life's destiny, he sought help and found a family that gave him encouragement and support. He now has a job and recently got a promotion and a raise in pay. He is so grateful that he works harder than most people to make his employer proud of him.

Living in our community is a major accomplishment. There are those who have spent much time and energy to provide a housing complex to give independence and pride to my friend Charlie. Everyone thought a complex for the special people in our community would be a great idea until they learned that it would be built in their community and then load cries about decreasing property values, danger to the community, and danger to the children by being exposed to handicapped people. The only handicapped people are those blind to their own prejudice and fear. There are those who could accept the complex, but only if it were surrounded by tall fences with locked gates. Charlie is not a criminal. He is a friend who would love to have a chance in life.

All of my friends are very real people, not a figment of a vivid imagination. Each one has experienced one or all of the above obstacles and has coped with them in his own way, for all of my friends are individuals like no other. Admittedly they are each exceptions to the rule, but one day they will be the rule and the world will be the one to profit. I would love to give the real name of Charlie, my inspiration, and all of my other "Handicapable" friends, but the times have not changed enough to allow them real independence. To be able to work is independence and independence is freedom to become a functioning member of society.

Thanks Charlie, for being my inspiration. You made it and you have given hope to all the Charlies of the world. I will make my mark in time and space too, because if you can do it so can I!●

INTERNATIONAL YOUTH YEAR IN ARKANSAS

● Mr. PRYOR. Mr. President, on March 7 of this year Governor Clinton of Arkansas issued a proclamation declaring the year 1985 as International Youth Year in Arkansas. This coincides with the celebration of youth proclaimed at the same time by the United Nations.

We are all aware, Mr. President, of those occasions when our young people impress us with their work and commitment, and with the magnificent results their actions achieve. I am thinking of the senior class that donates the money for its graduation trip to pay for the funeral of a classmate. I am thinking of the teenager who volunteers in the drug center that keeps her friends alive and well, and of the 12th-grader who supports his family while finishing high school.

I want to encourage my colleagues to recognize the youth of our country, Mr. President. Surely they constitute the chief natural resource of our Nation and our world. I am proud that Arkansas has joined in this recognition and ask that the Governor's proclamation be inserted at this point in the RECORD.

The proclamation follows:

PROCLAMATION

To all to whom these presents shall come—Greetings:

Whereas, The youth between 15 and 24 years of age represents one of Arkansas' most valuable resources; and

Whereas, Their involvement in educational, recreational and spiritual matters is critical to the development of responsible citizens in creating a positive future for Arkansas; and

Whereas, It is our intention to bring to the awareness of Arkansans the contributions that young people make in our society in hopes that parents, educators, business and religious leaders will provide encouragement and support to increase and promote their endeavors; and

Whereas, 1985 has been declared International Youth Year by the United Nations;

Now, therefore, I, Bill Clinton, Governor of the State of Arkansas, do hereby proclaim 1985, as International Youth Year in Arkansas.●

TRIBUTE TO MUHAMMAD ALI

● Mr. FORD. Mr. President, on May 22, the World Boxing Council Sports Medicine Foundation is paying tribute to Muhammad Ali. The proceeds from the dinner will go to the WBC/UCLA Sports Medicine Foundation. The funds will be used to conduct ongoing research for the prevention of injury in sports.

Muhammad Ali was born in the State of Kentucky and has always been a favorite son since his days of growing up in Louisville. He has won the highest honors in the world of boxing from Olympic champion to world heavyweight champion.

The champion in boxing has also been active in his community and across the Nation. His participation in various charitable events has made him famous as a compassionate, caring person. This extraordinary man has sought to touch the lives of people in every walk of life.

I am pleased on behalf of the people of Kentucky to recognize before the Senate of the United States his many achievements and efforts for prevention of injury in sports and take note of the tribute he is to receive on May 22, 1985, in Los Angeles, CA. This man will live forever in the sports annals of the world as "The Greatest."●

REDUCTION OF RISK OF CONFRONTATION

● Mr. D'AMATO. Mr. President, I rise today in support of Senate Joint Resolution 108, introduced by my esteemed colleague, Senator WARNER. I am pleased to cosponsor this legislation to reduce the risk of confrontation or conflict between the United States and the Soviet Union as a result of an accident or miscalculation.

This legislation will expeditiously implement the July 1984 agreement between the United States and the Soviet Union to upgrade the direct communications link for crisis control. This upgrade will provide for a faster, more capable means of communication for our leaders. The increase in speed of communication and the ability to relay graphic materials when seconds count could be especially crucial in some future crisis.

I urge my colleagues to support this vital step in our continuing efforts to secure a more peaceful world. This legislation builds confidence between the leaders of our Nation and the Soviet Union critical to crisis prevention and demonstrates our commitment to strengthen controls over the nuclear weapons we ultimately seek to eliminate.●

TRADE-IN OF WESTWAY FUNDS

● Mr. HUMPHREY. Mr. President, today I would like to discuss the advantages of a trade-in of Westway funds for a combined renovation of New York's mass transit system and west side highway.

Currently, Westway's trade-in value is estimated at $1.71 billion in Federal funds. Not only is this approximately one-third of the cost of Westway but it involves money for renovation of the mass transit system as well as a new highway. Unlike Westway, this alternate project would not use Federal highway funds for real estate development purposes.

Another advantage of a trade-in is that no landfill would be needed in order to renovate the west side highway. In light of this, the striped bass would be able to keep the Hudson River as their main spawning area. Not only would a landfill destroy this aquatic habitat, but it would also destroy piers which could be reused for recreation, housing, ships, and commercial uses. Altogether, the nonlandfill alternative would be more efficient, cheaper, and faster to build because no landfill permit or dredging, filling, tunneling, or tunnel reinforcement would be necessary.

One of the arguments in favor of Westway is that the project would create a large number of jobs through the construction work involved. The alternate project would create just as many construction jobs through the renovations of the transit system and the existing highway. Moreover, it would not destroy the existing jobs on the west side such as jobs in printing, warehousing, garment, and other industries. If Westway is allowed to proceed, these industries will be eliminated through construction disruption and highway ramps.

Mr. President, the exorbitant cost of Westway, the elimination of the mating area of the stiped bass, and the destruction of factories employing hundreds of people are just a few of the reasons why Westway must be stopped. The project is a waste of Federal funds at a time of high budget deficits and cutbacks in important programs. We cannot afford to grant $4 to $6 billion in highway funds to what is mainly a private real estate venture.●

THE SUGAR PROGRAM

● Mr. BOSCHWITZ. Mr. President, the State of Minnesota has an ongoing interest in the continuation of the sugar program. Minnesota produces more sugar beets than any other State in the country.

The provisions relating to sugar in the 1981 farm bill have provided the Nation with a significant amount of domestic production at reasonable prices. Moreover, it has enabled the U.S producer of sugar beets and sugar cane to survive in an otherwise hostile atmosphere.

I use the term hostile atmosphere because the world sugar price has been artificially depressed to less than 4 cents per pound by use of export subsidies. Our domestic industry would have been wiped out without the program.

On December 3 in a speech to the 1985 USDA Agricultural Outlook Conference, Daniel B. Amstutz, Under Secretary for International Affairs and Commodity Programs, stated:

"EC policies that encourage sugar production and export of the surplus by using subsidies contribute to sugar oversupplies and depressed world prices, which are particularly damaging to developing countries that depend on sugar exports to earn much of their foreign exchange.

It is probably realistic to say that for the past three years, the price impact [of the EC's actions] has been . . . 10 to 12 cents. This means that EC sugar policies have cost the sugar exporting developing countries about $2 billion a year in lost export earnings.

A study recently completed by the respected analysts at Economic Perspectives, Inc., of McLean, VA, reveals that in the absence of EC subsidized exports there would not be a need for the current sugar program since market prices would be above current U.S. levels. This report also reveals that had 1984 beginning world stocks been at a normal level, tropical sugar exporters' revenues would have been higher by $6.5 billion. Also, the need for U.S. foreign aid would have been sharply reduced and the economies of the developing countries would be much improved.

I am greatly impressed by the results of the study and commend the following summary to the attention of my colleagues. I ask that it be printed in the RECORD.

The summary follows:

IMPACT OF EEC SWEETENER POLICIES ON U.S. AND WORLD PRODUCERS

SUMMARY

The European Economic Community (EEC) only recently has become a major sugar exporter. From a net importer in 1975, it now is the dominant exporter in the world free market. As a result, EEC policies have vast impacts on sugar prices, and on sweetener producers in the United States and the world.

This study is an analysis of some of the major effects on EEC's sugar policy. It is less a prediction of an outcome than an illustration of the relative importance of EEC policies on world sugar markets and on domestic producers of sugar, HFS, and corn. It recognizes that the market impacts of such a policy have accumulated over many years and are impossible to measure in their totality. Nevertheless, the study examines economic conditions at one point in time, and attempts to measure the impacts of the policy by measuring changes that reasonably could be expected in the absence of EEC exports.

The EEC's current sugar regime reflects a policy of maintaining and protecting high internal sugar prices initially begun to insure self-sufficiency in production. However, that policy has resulted in the EEC's shift from a traditional importer to a large and growing exporter (Chart 1 and Table 1). [Chart 1 not reproducible for RECORD.] Because it has high production costs and no economic advantage in production relative to the major sugar producing regions of the world, its position as a dominant world exporter has been achieved only at great expense.

The EEC policy has three important economic effects. Its extremely high price structure (which must be protected by very high import levies) has led to production far above amounts that otherwise would be forthcoming. At the same time, the high consumer prices have discouraged consumption. These two effects in combination have resulted in production of substantial quantities of sugar in excess of consumption requirements. To avoid holding the large surpluses that are generated, the EEC must provide large export subsidies to move sugar into world markets. By that means, and in spite of the lack of an advantage in production, the EEC has greatly increased its share of the world "free" sugar market from zero in 1975 to more than 27 percent in 1984.

In 1984, the huge world surplus sugar stocks were more than 50 percent of expected consumption, the result of recent policy changes in the EEC and elsewhere. The world price of raw sugar fell below four cents per pound during the year and averaged only 5.4 cents per pound (raw value). However, the EEC exported more than 5.5 mmt during the year. Had they expected no sugar in 1984, the world price would have been substantially higher, perhaps more than 15 cents per pound even with the large world sugar stocks. Such a change could have been expected to allow the United

States to drop the import quotas imposed in 1982 and return to the use of fees and duties to protect the loan program and hold prices at about the actual 1984 levels.

Had world sugar stocks been near trend levels at the beginning of 1984, the absence of EEC exports from the market would have meant world refined sugar prices about 24 cents per pound higher, and U.S. refined sugar prices about 9.43 cents higher than the 1984 average (Table 2). U.S. sweeterner producers' revenues would have been more than $2.1 billion higher and corn sweetener producers' revenues $1.2 billion above the 1984 levels. U.S. quota restrictions would have been unnecessary.

The EEC sugar policy significantly affects HFCS production and corn prices as well. With world sugar stocks at trend, the absence of EEC exports would have been associated with U.S. refined sugar prices 9.43 cents per pound higher than the 1984 average. Over the intermediate term, such an increase would have the potential to facilitate increased HFCS competition. By the end of the decade production likely could be as much as 53.4 million cwt above 1983 output. Such an increase would mean about 160 million bushels more corn used in HFCS production annually and higher corn grower sales of as much as $1.2 billion each year.

A 160 million bushel increase in the commercial use of corn would substantially reduce government program costs. Under FY 1985 crop conditions, it could reduce the cost of CCC loans by $281 million, storage payments by $33 million, and target prices by $200 million, a total of $514 million.

The absence of EEC exports from the world sugar market would have a major impact on traditional sugar exporters, especially the developing nations in Central America and the Caribbean (Table 3). Even with the large 1984 stocks, revenues of traditional sugar exporters would have been $2.6 billion higher had the EEC not been in the market in 1984. Had 1984 beginning world stocks been a normal level, their export revenues would have approached $6.7 billion. For the Central American and Caribbean nations alone, annual revenues could have been $600 million higher, for South America $2.1 billion, and for Africa more than $728 million.

TABLE 1.—NET EXPORTS OF SUGAR TO THE WORLD FREE MARKET

Exporting country	1975	1976	1977	1978	1979	1980	1981	1982	1983	1984	1985

NATIONAL OSTEOPOROSIS AWARENESS WEEK

● Mr. GRASSLEY. Mr. President, I am happy to have sponsored legislation to designate the week of May 20, 1985 through May 26, 1985, as "National Osteoporosis Awareness Week."

My goal in sponsoring this legislation is to promote and support the education of the American population on the preventive measures available to fight this debilitating disease.

Osteoporosis is a condition in which bone mass decreases causing bones to be more susceptible to fracture. Between 2 and 5 million Americans seek medical help each year for some problem linked to osteoporosis. It afflicts approximately 15 million Americans overall, beginning as early as age 35, and is particularly a threat to thinboned, light-skinned women, women who undergo an early menopause and women whose female relatives have osteoporosis. In fact, 88 percent of osteoporosis victims are women. But this is not to say that it is a disease that afflicts only women. As the aging process progresses, the risk of developing osteoporosis increases and, for that reason, our older Americans, male and female, must become aware of this disease.

Every year about 1.3 million persons 45 years and older suffer from fractures attributable to osteoporosis. Fractures of the spine, hip and wrist are most common. The dowager's hump is the result of a spine fracture. It is estimated that 150,000 hip fractures occur each year as a consequence of osteoporosis and about 12 percent of these people will die of related complications. I know from visits with older Iowans that these fractures are debilitating and, for many, incapacitating, resulting in a loss of independence and freedom.

When I look at statistics stating that 19.6 percent of our population consists of women over 40; 11.6 percent of our population is 65 years and older; 13.1 percent of our population will be over

65 by the year 2000, that figure will increase to 21.7 percent by 2050; and a statistic that I have a personal interest in, 13.3 percent of Iowa's population is over 65, I become concerned about the possible increase in the number of Americans suffering from osteoporosis.

In light of the importance of reducing the budget deficit, I am concerned that the short-term direct costs for osteoporosis patient's care are projected to exceed $1 billion annually without considering indirect long-term costs of extended nursing care. These statistics are what have prompted me to sponsor this legislation.

Research is being done to find the cause of osteoporosis, a method of detecting it and a treatment. Presently, however, once osteoporosis has developed, there is no cure.

There are steps that can be taken to prevent osteoporosis. The amount of calcium intake has been noted as a major link in the development of this disease. Bone contains 99 percent of the calcium of the body, the other 1 percent is used for the heart beat, muscles to contract and relax, for blood to clot and for nerves to transmit messages. The body does not make its own calcium, therefore, it is necessary to maintain a rich-in-calcium diet, particularly if you are at high risk of developing osteoporosis. Through the years, when the body does not have enough calcium to put into the blood, it will take it from the bones. If this continues, the bones will become weak and brittle to the point that they will fracture under everyday common stresses. That is osteoporosis.

Milk and other dairy products such as cheese and yogurt are a main source of calcium in our diet. The average calcium intake is 450 to 550 milligrams a day. This is one-half the amount recommended by a special panel, the Consensus Development Conference on Osteoporosis, convened by the National Institutes of Health [NIH] last April.

For women, the decrease in the production of estrogen after menopause increases the risk of developing osteoporosis because estrogen is necessary in preserving bone in women. Oral doses of estrogen, known as estrogen replacement therapy, compensate for the natural decline in estrogen production and has proven an effective means of preventing osteoporosis.

Moderate weight-bearing exercise such as jogging, walking and biking is another preventive measure. This is important because exercise stimulates the formation of new bone. Americans who are at risk should, with the help of their doctors, become aware of and implement the necessary precautions which might decrease their chances of developing osteoporosis.

I would like to conclude by commending the National Dairy Council [NDC] for their efforts in alerting Americans to the effects of osteoporosis and calcium intake. I understand that between January 1 and April 30 of this year, the National Dairy Council held 2,000 1-hour consumer workshops to create awareness of calcium needs, risks, benefits, and sources. The National Institutes of Health also offer many pamphlets on osteoporosis and I would urge everyone to take advantage of these materials and workshops.

Hopefully, this resolution as well as other legislation such as the recently passed Older Americans Act Amendments of 1984, a reauthorization of the 1965 law, will support and promote the education of osteoporosis. I feel that it is particularly appropriate that "National Osteoporosis Awareness Week" will occur during a month of commemoration and celebration of our older Americans. I am happy to be a part of the passage of "National Osteoporosis Awareness Week".●

ORDERS FOR THURSDAY

ORDER FOR RECESS UNTIL 10 A.M.

Mr. DOLE. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 10 a.m. on Thursday, May 16, 1985.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF CERTAIN SENATORS

Mr. DOLE. Mr. President, I ask unanimous consent that after the recognition of the two leaders under the standing order on tomorrow, there be special orders in favor of the following Senators for not to exceed 15 minutes each: Senators PROXMIRE, DIXON, BUMPERS, and PRYOR.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I ask unanimous consent that on tomorrow, following the special orders just identified, there be a period for the transaction of routine morning business, not to extend beyond 11:30 a.m., with statements therein limited to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. DOLE. Mr. President, we have obtained unanimous consent to resume at 11:30 a.m. tomorrow the conference report to accompany H.R. 1869, under a time agreement of 40 minutes, 30 minutes under the control of the distinguished Senator from Ohio [Mr. METZENBAUM] and 10 minutes under the control of the distinguished Senator from Oregon [Mr. PACKWOOD] or his designee.

It is my understanding the Senator from Ohio [Mr. METZENBAUM] would not demand a rollcall vote, but in the event a rollcall vote should be requested, it will follow immediately.

Also, the Senate can turn to Calendar No. 47, S. 408, small business. We are also working on a coinage bill that both Senators MCCLURE and CRANSTON have an interest in, and there is a possibility that we could dispose of the Safe Drinking Water Act some time tomorrow afternoon.

I understand now from both the chairman of the Armed Services Committee and the ranking minority member that they will not be in a position to take up their bill tomorrow. They would like to take it up on Friday, and I will be discussing that with the distinguished minority leader tomorrow.

Mr. President, while we are waiting, I suggest that it is still my hope that we can complete action on the DOD authorization bill by Thursday next on or before 6 p.m. on that day.

I know the distinguished chairman of the committee, Senator GOLDWATER, is very anxious to complete action. I think it is particularly important we do that in view of the preliminary budget figures in the House Budget Committee markup. It might be of some help to Members on both sides of the House if there were some expression from the Senate on that legislation.

But in any event, I can discuss that tomorrow with the distinguished minority leader.

RECESS UNTIL 10 A.M. TOMORROW

Mr. DOLE. Mr. President, there being no further business to come before the Senate, I move that the Senate stand in recess until 10 a.m. tomorrow.

The motion was agreed to; and, at 7:49 p.m., the Senate recessed until Thursday, May 16, 1985, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate May 15, 1985:

DEPARTMENT OF STATE

Lewis Arthur Tambs, of Arizona, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Costa Rica.

Lannon Walker, of Maryland, a career member of the Senior Foreign Service, class of Minister-Counselor, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Republic of Senegal.

THE JUDICIARY

Loren A. Smith, of Virginia, to be a judge of the U.S. Claims Court for a term of 15 years vice Joseph V. Colaianni, resigned.

Robert C. Broomfield, of Arizona, to be U.S. district judge for the district of Arizona vice Valdemar A. Cordova.

Donald E. Walter, of Louisiana, to be U.S. district judge for the western district of

Louisiana, vice a new position created by Public Law 98-353, approved July 10, 1984.

Claude M. Hilton, of Virginia, to be U.S. district judge for the eastern district of Virginia, vice a new position created by Public Law 98-353, approved July 10, 1984.

U.S. INFORMATION AGENCY

Marvin L. Stone, of Virginia, to be Deputy Director of the U.S. Information Agency, vice Leslie Lenkowsky, resigned.

SPECIAL PANEL OF APPEALS

Barbara Jean Mahone, of Ohio, to be chairman of the Special Panel on Appeals for a term of 6 years, new position—Public Law 95-454 of October 13, 1978.

IN THE AIR FORCE

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be general

Lt. Gen. Robert D. Russ, xxx-xx-xxxx FR, U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Merrill A. McPeak, xxx-xx-... FR, U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Lt. Gen. Bernard P. Randolph, xxx-xx-x... FR, U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. William E. Thurman, xxx-xx-... xxx-... FR, U.S. Air Force.

The following-named officer under the provisions of title 10, United States Code, section 601, to be reassigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Lt. Gen. Charles J. Cunningham, Jr., xxx... xxx-xx-... FR, U.S. Air Force.

IN THE NAVY

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370:

To be vice admiral

Vice Adm. Earl B. Fowler, Jr., xxx-xx-... /1440, U.S. Navy.

IN THE AIR FORCE

The following persons for Reserve of the Air Force appointment, in grade indicated, under the provisions of section 593, title 10, United States Code, with a view to designation under the provisions of section 8067, title 10, United States Code, to perform the duties indicated:

MEDICAL CORPS

To be colonel

Christian, Charles B., Jr., xxx-xx-xxxx
Howard, Cleve W., xxx-xx-xxxx

To be lieutenant colonel

Duffy, Adrian D., xxx-xx-xxxx
Wagman, Edward, xxx-xx-xxxx
Holt, Gilbert A., Jr., xxx-xx-xxxx
Maso, Eugene C., xxx-xx-xxxx
McDonald, Edward C., xxx-xx-xxxx
McKiernan, Thomas L., xxx-xx-xxxx
Ross, Gerald W., xxx-xx-xxxx

DENTAL CORPS

To be lieutenant colonel

Peluso, Joseph R., xxx-xx-xxxx
Crichton, David D., III, xxx-xx-xxxx
Matsumoto, Terry S., xxx-xx-xxxx
Saunders, Timothy R., xxx-xx-xxxx
Fairbourn, Dennis R., xxx-xx-xxxx
Withers, James A., xxx-xx-xxxx

The following officers for Reserve of the Air Force (non-EAD) promotion in the grade indicated, under the provisions of section 8366, title 10, United States Code:

LINE

To be lieutenant colonel

Bowen, Kingston, xxx-xx-xxxx
Lewis, Palmer B., xxx-xx-xxxx
Samuels, James D., xxx-xx-xxxx

IN THE ARMY

The following-named officers for promotion in the Reserve of the Army of the United States, under the provisions of title 10, United States Code, section 3383:

ARMY PROMOTION LIST

To be colonel

Chaffin, Richard E., xxx-xx-xxxx
Chitwood, Michael R., xxx-xx-xxxx
Evans, Thomas N., xxx-xx-xxxx
Griffiths, Kenneth, xxx-xx-xxxx
Kho, Franklin Y.C., xxx-xx-xxxx
Lunde, Raymond H., xxx-xx-xxxx
MacDonald, John W., xxx-xx-xxxx
McLennan, Thomas D., xxx-xx-xxxx
Rude, Carl E., Jr., xxx-xx-xxxx

CHAPLAIN

To be colonel

Luljak, Louis P., xxx-xx-xxxx

MEDICAL CORPS

To be colonel

Andres, Dale F., xxx-xx-xxxx
Dilallo, Chester A., xxx-xx-xxxx

ARMY PROMOTION LIST

To be lieutenant colonel

Abel, Daniel W., xxx-xx-xxxx
Allen, Robert E., xxx-xx-xxxx
Altshuler, Herbert, xxx-xx-xxxx
Au, Alvin K.C., xxx-xx-xxxx
Cagley, Thomas R., xxx-xx-xxxx

LIMITED DUTY OFFICER (SUPPLY) (651X)

Curry, Dennis Samuel

IN THE NAVY

The following-named lieutenant commanders of the staff corps of the Navy for promotion to the permanent grade of commander, pursuant to title 10, United States Code, section 628, subject to qualifications therefor as provided by law:

MEDICAL CORPS

Landacre, Jo Ann
Kennedy, Kevin Stewart

CONFIRMATIONS

Executive nominations confirmed by the Senate May 15, 1985:

DEPARTMENT OF AGRICULTURE

John R. Norton III, of Arizona, to be Deputy Secretary of Agriculture.

DEPARTMENT OF ENERGY

J. Michael Farrell, of the District of Columbia, to be General Counsel of the Department of Energy.

Joseph F. Salgado, of California, to be Under Secretary of Energy.

DEPARTMENT OF COMMERCE

Douglas A. Riggs, of Alaska, to be General Counsel of the Department of Commerce.

DEPARTMENT OF AGRICULTURE

Peter C. Myers, of Missouri, to be Assistant Secretary of Agriculture.

Robert L. Thompson, of Indiana, to be an Assistant Secretary of Agriculture.

DEPARTMENT OF THE TREASURY

John F. W. Rogers, of New York, to be an Assistant Secretary of the Treasury.

Margaret DeBardeleban Tutwiler, of Alabama, to be an Assistant Secretary of the Treasury.

THE JUDICIARY

Samuel G. Sterrett, of Maryland, to be a judge of the U.S. Tax Court for a term expiring 15 years after he takes office.

DEPARTMENT OF JUSTICE

William H. Opel, of Alaska, to be U.S. Marshal for the district of Alaska for the term of 4 years.

The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

DEPARTMENT OF JUSTICE

Herbert M. Rutherford III, of Virginia, to be U.S. Marshal for the District of Columbia for the term of 4 years.

IN THE ARMY

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. John B. Blount, xxx-xx-xxxx.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Thomas F. Healy, xxx-xx-xxxx, U.S. Army.

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Howard F. Stone, xxx-xx-xxxx.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Howard G. Crowell, Jr., xxx-xx-xxxx, U.S. Army.

The following-named officer for appointment as a Reserve commissioned officer in the Adjutant General's Corps, Army National Guard of the United States, Reserve of the Army, under the provisions of title 10, United States Code, section 593(a) and 3392:

To be brigadier general

Col. Frank C. Torres, Jr., xxx-xx-xxxx.

IN THE MARINE CORPS

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Charles G. Cooper, xxx-xx-xxxx, U.S. Marine Corps.

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. William R. Maloney, xxx-xx-xxxx, U.S. Marine Corps.

The following-named officer to be placed on the retired list in the grade indicated under the provisions of title 10, United States Code, section 1370:

To be lieutenant general

Lt. Gen. Bernard E. Trainor, xxx-xx-xxxx, U.S. Marine Corps.

The following-named officer under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 610:

To be lieutenant general

Lt. Gen. George B. Crist, xxx-xx-xxxx, U.S. Marine Corps.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Ernest C. Cheatham, Jr., xxx-xx-xxxx, U.S. Marine Corps.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Thomas R. Morgan, xxx-xx-xxxx, U.S. Marine Corps.

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be lieutenant general

Maj. Gen. Joseph J. Went, xxx-xx-xxxx, U.S. Marine Corps.

The following-named brigadier general of the Marine Corps Reserve for promotion to the permanent grade of major general, under provisions of title 10, United States Code, sections 5902 and 5912:

Constantine Sangalis.

The following-named colonel of the Marine Corps Reserve for promotion to the permanent grade of brigadier general, under provisions of title 10, United States Code, sections 5902 and 5912:

George R. Omrod.

IN THE NAVY

The following-named officer, under the provisions of title 10, United States Code, section 601, to be assigned to a position of importance and responsibility designated by the President under title 10, United States Code, section 601:

To be vice admiral

Vice Adm. John M. Poindexter, xxx-xx-xxxx/1110, U.S. Navy.

IN THE AIR FORCE

Air Force nominations beginning Maj. James H. Applegate, Jr., and ending Maj. Michael R. Conners, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of April 29, 1985.

Air Force nominations beginning John H. Barnhart, and ending Jerry W. Brackett, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD of April 29, 1985.

EXTENSIONS OF REMARKS

STUDENT LEADERS CONDUCT NATIONAL SUMMIT IN NEW YORK CITY

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. BIAGGI. Mr. Speaker, yesterday marked a important day in the history of higher education. Student leaders—representing 25 States and 3 million students across the Nation—convened in New York City for 2 days to strategize about the future of student financial aid and the Federal role in education. They released a joint statement—entitled "A Call to Commitment" which is a thoughtful and comprehensive statement which bears our close attention during these days of budget deliberations.

Mr. Speaker, the Postsecondary Education Subcommittee, chaired by my colleague and friend, BILL FORD, came to my home city of New York yesterday to conduct a hearing on issues related to the reauthorization of the Higher Education Act. We received the statement from the student leaders as part of the hearing as well as testimony on these same issues. I was impressed not only with the quality of the presentation—but also with the level of interest and enthusiasm that they brought to this meeting.

For the benefit of my colleagues, I wish to insert this joint statement into the CONGRESSIONAL RECORD so that the collective efforts of the students can be read in its entirety.

A CALL TO COMMITMENT

STATEMENT OF PURPOSE

The student leaders gathered here today represent 3 million college students from both public and independent institutions. This "Summit" meeting is concerned that the federal role in postsecondary education is being adversely affected. The consensus of the student leaders gathered is that postsecondary education should be one of the top national priorities for funding. Programs which have been the gateway to a better life for many Americans have been eroded because of inflation and changing national priorities.

Students have benefited from such federal programs as the G.I. Bill, the National Defense Student Loan (National Direct Student Loan), Supplemental Education Opportunity Grant, the Guaranteed Student Loan (GSL), Pell Grants, College Workstudy, and TRIO. These programs have stood as a landmark of the federal commitment to postsecondary education.

As students we are not blind to our roles as citizens and we are aware of the enormous dangers posed by federal deficit spending. We also would remind our national leadership that a strong and vital system of higher education is fundamental to our development as a people.

RECOMMENDATIONS

General philosophy of postsecondary education—Mission statement

An educated citizenry is the basis of a free and democratic society. Postsecondary education, especially in an era of increased technological complexity, economic and social change, is of great benefit, not only to individuals attempting to enhance their job opportunities but also to the society as a whole.

Given the social and geographic mobility of our society, the federal government is an appropriate vehicle for revenue raising and funding of postsecondary education.

Student aid budget—1985

Since 1980, students have seen a decline of the purchase power of the dollars they receive through student aid for their college educator. Student aid has not kept pace with inflation and increasing college costs. This has adversely affected all students, especially minority and non-traditional students, who continue to face extreme barriers to postsecondary education.

The administration's proposed budget continues the decline in money available for financial aid; if passed, they would devastate postsecondary education. Students and parents in virtually all income levels would be hurt by the budget proposals. We now find not only minority and non-traditional students affected, but also those middle-income families who have relied on Guaranteed Student Loans and institutions which depend on planned giving through state and local deductions.

We therefore submit a summary of specific recommendations as follows:

1. We oppose the arbitrary mega caps such as the proposals for $4,000 and $8,000 caps. Because they fly in the face of the uniform methodology of needs analysis, ignoring differences in costs, tuition, fee levels, and student family size. Furthermore, the mega cap hits low income, non-traditional, and minority students the hardest.

2. We oppose all proposals which use an artificial and arbitrary income cap to limit eligibility. They are insensitive to individual family differences and to families' ability to pay for postsecondary education.

3. We oppose requiring a high school diploma as a prerequisite for federal financial aid. This proposal would adversely affect students in proprietary schools and other technical training programs.

4. We oppose the $800 minimum self help contribution previous to receiving any Pell Grant aid. The rationale that has been used for the inclusion of the $800 in Pell Grant calculation is to make sure that the students don't get a "free ride". The fact is that this student self-help amount would be in addition to the expected family contribution.

5. We oppose tightening the independent student definition. The proposed age cutoffs are arbitrary and make no provisions for exceptional circumstances.

6. We oppose the elimination of funding for NDSL, SEOG, and SSIG programs, since 923,000 students nation-wide would be eliminated from these programs.

Reauthorization of the Higher Education Act of 1965

The single most important piece of legislation affecting postsecondary education in the United States is the Higher Education Act of 1965. This act encompasses the aspirations and dreams of many Americans. It contains programs which demonstrate a commitment on the part of the federal government to access and choice for students seeking higher education.

We therefore propose the following recommendations be considered in continuing current and expanding other federal postsecondary programs.

Non-Traditional Students

With the increase utilization of postsecondary education by non-traditional students, returning students, working students, students with families, women and minorities, attention should be paid to meeting their special needs, especially in the areas of flexible financial aid packages, courses of instruction, and day care.

College Work-Study

Federal funding for work-study and wages paid to work-study students and other student employees who depend upon the income for their share of the cost of education should be tied to tuition increases and inflation. Too often, statutory or regulatory ceilings on hours of their expected contribution without seeking a second job or increasing their loan debt.

All provisions regarding waivers to allow payment of subminimum wages to students by postsecondary institutions should be eliminated.

Debt Burden

We are concerned, yet realistic about the debt load considered bearable by the student borrowers. We call on the federal government, the states that have loan programs, and Sallie Mae to act rationally and decisively after carefully scrutinizing the following student concerns:

More flexible repayment plans.

Write off of loans for authorized public service work commitments.

Loan limits tied to cost of instructions.

Collection of defaulted loans through the Federal tax structure, by earmarking and collecting repayment funds from the overpayment section of the tax form.

Certain loan consolidation plans which provide for realistic and equitable repayment plans.

Pell Grants

Establish the Pell grants as a true entitlement, and do not merge other campus based programs, although some re-allocation of funds among the programs is considered appropriate within overall financial aid scheme adopted by Congress.

Campus Based Program Funding

We stand opposed to the elimination of any of the current campus based programs in their entirety through legislation or zero-funding.

Needs Analysis

Some adjustment is appropriate in the needs test. In far too many cases, the overvaluation of assets without an equally criti-

cal evaluation of liabilities amount to effective discrimination against farm families, unemployed families, non-traditional students, graduate students, and small business owners. We therefore support revisions in the needs analysis that would afford these students a more realistic appraisal of their financial aid eligibility.

Financial Aid Delivery, Inter-State Cooperation and Proposed Study

Congress should also consider the following:

Incentives for banks to assist in the financial aid delivery system, especially in the area of information about options in courses of instruction and financial aid. Once again, computer-based information systems would be an appropriate part of such a delivery system.

Incentives for increased inter-state cooperation and coordination in forms, deadlines, and financial aid delivery.

Setting aside a fixed statutory percentage of financial aid appropriations, or funding a special one-time study, to be controlled by the Congressional Budget Office, to determine the actual effect on student consumers of changes in federal financial aid programs.

Loan Information

Sallie Mae, the state guaranteed loan agencies, and the American Banker's Association should set aside funds to create educational materials (with advice from students) explaining in detail the rights and responsibilities of persons who borrow funds for postsecondary education, as well as provide a variety of views regarding the philosophy of borrowing and its relative usefulness and values as an investment in a career and future earnings.

Independent Students

The following should be included in both state and federal statutes:

Students shall be eligible for independent student status if they meet the following criteria:

Parents did (will) not claim the student as an income tax exemption. Parents did (will) not provide more than $750 in support. Student did (will) not live with the parents more than 42 days a year.

A student must further provide the following information to be eligible for consideration as an independent student:

Declaration of all income sources which the student receives.

Documentation such as income tax returns, rent payments, proof of residence, voter registration or similar documentation that reasonably may be requested by the campus financial aid officer or state financial aid commission to establish that the applicant's parents have severed relations with the applicant and that the applicant has established a pattern of self-supporting behavior.

A signed affidavit from the applicant's parent(s) that they are not providing any financial support, either in kind or monetary, above $750; are not providing lodging for the applicant more than 42 days; and have not claimed the applicant as a tax exemption. Should the parent(s) not provide an affidavit, the applicant may present other information to prove he/she is independent.

Students who are married, wards or orphans of a state, veterans, divorced, separated, and singles with dependents shall automatically be considered independent for financial aid purposes.

Any person who knowingly and willfully makes any false statement, furnishes any false information, or conceals any material information in connection for receiving federal (or state) financial aid awards shall be fined not more than $5,000 or imprisoned for not more than 3 years.

Pell Grant Funding

Attempts should be made by Congress to reverse the trend in Pell Grant awards that has seen a reduction in the number of poor and minority students participating in the program because of a loss of purchasing power.

The federal government should increase funding designed to enhance educational opportunities for black students and other minority groups. The fact that the number of black college students has dropped 5 percent since 1978, while the number of blacks receiving high school diplomas has increased, is demonstrative of severe inequities that must be corrected. Increased support for Title's III and IX are demanded by students.

Unmet Need

The federal government, in cooperation with the states, must develop programs which will fund the "unmet need" of financial aid recipients.

Multiple Disbursements

Multiple disbursements of GSLs should be considered in an attempt to reduce the program's default rate.

Computer Information for Consumers of Postsecondary Education

The states, the federal government, and private institutions should increase their utilization of computerized databases to inform potential and current students about their options regarding careers, postsecondary institutions, and financial aid. An especially appropriate location for terminals with interactive menu-driven programs would be in secondary schools where potential students could "browse" through the information at their own pace, examining the information with different combinations of career goals, institutions, and financial aid packages.

Loan Consolidation

Congress should allow students to consolidate their loans to provide for easier repayments.

GSL Fee

Financial aid offices should not charge students for the processing of the Guaranteed Student Loans. This is contrary to Congressional intent.

Origination Fee

Congress should repeal the 5 percent origination fee for the Guaranteed Student Loan program.

Definition of Default and Delinquency

Default and delinquency definitions in the Guaranteed Student Loan program should be examined. Allowances should be made for students who default on their loans yet wish to enter into repayment. They should be allowed to move from a default category to one of delinquency.

Aid to Part-Time Students

Part-time students are the fastest growing component of postsecondary education. Between 1972 and 1982, part-time student enrollment increased 61 percent until it accounted for 5 million students, 41 percent of postsecondary enrollments.

Facing significant financial and personal obligations, part-time students made great sacrifices in order to attend school. As a matter of simple equity, students who can demonstrate financial need should not be excluded from federal aid because they are in school part-time. Areas to be considered include:

1. Revise child care so it reflects actual costs.

2. Single parents with dependents contribute equally as a dependent in the same income level.

3. Update student living cost allowances for room, board, books, supplies, and transportation.

4. Open Pell Grants, Guaranteed Loans, and National Direct Loans to students attending college less than half-time.

5. Require that institutions with needy part-time students devote a reasonable proportion of their campus based aid to these students.

Graduate Student Aid

Congress should provide for direct assistance other than loans for graduate students.

Insurance Premium

Congress should adopt the recommendations of the National Commission on Student Financial Aid concerning the GSL Insurance Premium.

Lender Responsibility

While lenders have assisted millions of students in garnering an education via the GSL Program, it is time they become full partners in this $3 billion dollar taxpayer-and-student-subsidized loan program. Incentives must be devised to make lending institutions much more responsible and accountable for default prevention and adherence to effective due diligence standards.

Tuition Policy

The recent decline in federal student aid and the budgetary restraints at the state level have placed a bigger burden on students to meet their cost of attending college. Tuition and fee policies have been regressive for students. The best way to ensure access and equity for students is low tuition.

In order to allow for the intelligent planning of financial resources for attendance at a postsecondary institution, any changes in tuition, fees, and financial aid should be: 1. Predictable. 2. Rational. 3. Moderate. 4. Gradual.

Each state should set its tuition and fees based on the philosophy of education and current budget realities in that state rather than rely on a fixed cost ratio. Mechanisms must exist to insure that those students being affected by tuition and fee policies are not disenfranchised from the decisionmaking process.

Department of Education

For postsecondary education, 1980 was a landmark year. That year produced not only a Higher Education Act, but also marked the beginning of a voice for education in the President's cabinet. The passage of legislation in 1979 to create a Department of Education once again showed the federal government's commitment to education.

That one voice for education has often lacked the resonance needed to project the education community's concerns. The student voice has all but been lost within the walls of the department.

We therefore present the following recommendations designed to open the lines of communication between the federal government and the people it serves.

Public Awareness

Increase public education concerning the actual social and financial benefits of post-secondary education.

Student-Secretary Conference

The Student-Secretary Conference where student leaders and U.S. Department of Education officials discuss national administration of financial aid programs should be reinstated by the Department of Education.

Student Liaison Officer

Student leaders resent the increasing politicalization and the ineffectiveness of the Student Liaison Officer position. We recommend a reformation of the selection process as well as a budget adequate to cover travel expenses and be given a greater degree of autonomy in decision-making.

Student Advisory Committee

The U.S. Department of Education (and state education agencies) should establish a student advisory committee composed of student leaders and/or the state student association staff members to provide valuable assistance to the Department in meeting the needs of the people who receive financial aid. Members would be selected for their knowledge of financial aid and policy issues in postsecondary education which the Department is involved.●

REA PROGRAM

HON. HANK BROWN

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. BROWN of Colorado. Mr. Speaker, I rise today to commemorate the 50th anniversary of the Rural Electrification Program.

The Rural Electrification Program has been successful in making a better life for millions of Americans. Not only has it brought electric convenience to our rural areas, it has encouraged people to be more productive, which has strengthened the productivity of America.

On the 50th anniversary of the Rural Electrification Program, we honor those who saw the need for electric systems for rural areas. When Congress established the Rural Electrification Administration [REA] in 1936, only 12 percent of U.S. farms had electricity. By 1982, 99 percent of U.S. farms had electricity. In addition, in 1949, when the telephone program started, only 36 percent of U.S. farms had telephones. By 1982, 95 percent of U.S. farms had telephones. In its half century of existence, REA has provided technical assistance and long-term financing to rural electric and telephone systems throughout the Nation. More importantly, since the program was established, more than $20 billion in loans and guarantees have been made and losses have been less than $50,000.

In Colorado, REA has helped finance distribution and power supply facilities to serve an estimated 276,065 rural consumers. Of the 25,300 farms in the State, approximately 98 percent are receiving electric service. Only 11.2 percent of Colorado farms had electric service when the REA was created in 1935.

As of January 1, 1984, REA had advanced $721,344,795 to borrowers in Colorado. By that same date, REA borrowers had made a total of $348,150,118 in payments on their government loans. Not only has the REA worked with our cooperatives, it has created prosperity and jobs in our rural areas—which brings revenues to the Federal Treasury.

REA has been an important part of Colorado's past, and hopefuly, the program will continue to be an investment in our future. All of those involved can be proud of their contributions to this fine program and its role in making our Nation a better place to live.

It is said that it is better to light a candle than to curse the darkness. The lights kindled by REA have served as a beacon of progress for Colorado and our Nation.●

LET'S SET THE RECORD STRAIGHT: STRONG BIPARTISAN SUPPORT FOR FAMILY PLANNING

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. SOLARZ. Mr. Speaker, soon we will start debating the foreign assistance reauthorization bill for fiscal years 1986 and 1987. One of the priority issues to be discussed will be international population assistance which has enjoyed solid bipartisian support for the last 20 years and the backing of five administrations. Unfortunately, this most constructive and effective aid program has become controversial and confusing due to a number of misstatements by opponents of the measure.

In helping my colleagues better understand the current confusion regarding international family planning, I would like to draw attention to an editorial which ran in the New York Times, April 6, 1985. I hope my colleagues will read the editorial, recognize the vital importance of these programs, and vote in support of population assistance so that these important worldwide family planning programs can be continued. Voluntary family planning programs are an important part of our International Foreign Aid Program, they are in the best interests not only of our allies, but of our own Nation.

The editorial follows:

[From the New York Times, May 8, 1985]

FAMILY PLANNING: STRICT ENOUGH ALREADY

Forty years from now, at current growth rates, the world will hold twice as many people—close to 10 billion. Most will be living in desperately poor countries, countries that have slowly come to accept America's advice that slowing population growth speeds up economic progress.

But at last summer's World Population Conference in Mexico, America's representatives announced that we'd gotten it all wrong: It was economic progress that slowed population growth. So, to make up for that previous bad advice, the Reagan Administration was going to do the world a favor. It would make it harder for family-planning programs abroad to get Federal money.

Congress didn't agree that the advice was bad. It voted the largest one-time increase ever for overseas population assistance programs. But the Administration stayed on the course it had set in Mexico City. Private family-planning groups, which had been required only to sequester American aid from their abortion-related services, were now told that if they continued those services, they would lose Federal funds. Only organizations run by foreign governments would remain exempt from the proposal may be because the Administration doesn't want to be seen manipulating other countries' population policies.

Now the House Foreign Affairs Committee has challenged the Administration's restriction. It has earmarked $320 million in aid to groups like International Planned Parenthood, the United Nations Fund for Population Assistance and the Population Office of the U.S. Agency for International Development. No money could go for programs in countries with coercive abortion policies. That means no Federal funds will go, directly or indirectly, to China, which is reported to have such a program.

Should the House accept the committee's recommendations—a vote on the foreign aid bill is expected this week—it would restore common sense and clarity to a debate that has been thoroughly muddled by anti-abortionists. The 1973 prohition against using Federal funds for abortion services would be retained, but America's long, honorable commitment to family-planning programs all over the world will be affirmed.●

POINT PLEASANT BEACH, NJ, INSTITUTIONS CELEBRATE 100TH ANNIVERSARY

HON. JAMES J. HOWARD

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. HOWARD. Mr. Speaker, I am proud to represent a district in New Jersey that has a rich colonial history and was in many respects the cockpit of the Revolutionary War. Through the 1800's, my district retained its economic vitality as a home to many successful businesses and institutions, while developing into a flourishing summer resort area.

On Sunday, May 19, three institutions located in Point Pleasant Beach, NJ, will be celebrating their 100th anniversary. Johnson's Point Pleasant Hardware, Van Note Lumber Co., and Ocean Fire Co. No. 1 were in business in 1885 and will be honored Sunday with a series of events, including a

parade that is expected to be the best in the borough's history.

All three institutions began when Point Pleasant Beach was a tiny settlement with fewer than 700 inhabitants, not at all like the bustling year-round community it is today. In 1885 most of the town was woods and farmlands. But in the true American spirit, nothing daunted these early businesses of Point Pleasant Beach.

A Philadelphia newspaper advertisement in that year offering a hardware business for sale attracted the attention of two Philadelphians, Joseph W. Johnson and Frank M. Dampman. They took a train to Point Pleasant, were impressed with the possibilities of the business, and bought the stock for $5,200. Thus, Johnson's Hardware had its start in a building at Arnold and Cincinnati Avenues owned by a wealthy Presbyterian minister, the Reverend Knox.

At about the same time, Capt. James Monroe Van Note, who for years had sailed the seven seas, decided it was time to try his land legs—and so, in a small building, he established the Van Note Lumber Co. It is still at the same location on Arnold Avenue, and in the words of its current president, Dennis Rittenhouse, "has grown by leaps and bounds ever since."

Ocean Fire Co., No. 1, which is just across the street from Van Note's, began in the days of the horse-drawn pumper. When the horses didn't arrive on time, the firemen had to pull the pumper. And fire buckets were used until the fire hydrants came into use around 1900.

All three of these institutions have contributed much to Point Pleasant Beach and the surrounding area in Ocean County. They have always been in the forefront of community and charitable activities. The borough, in the words of Mayor Dan Hennessey, is "really proud of them."

Mr. Speaker, I congratulate these three shore institutions on their anniversary and wish them many more years of success.●

CONGRESSIONAL SALUTE TO THE CLERGY AND PARISHIONERS OF ST. JOHN KANTY CHURCH OF CLIFTON, NJ, UPON THE CELEBRATION OF ITS 50TH GOLDEN ANNIVERSARY

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. ROE. Mr. Speaker, on Sunday, May 19, the people of the city of Clifton, my congressional district, and State of New Jersey will join with Rev. Joseph Grzybowski, pastor, and the congregation of St. John Kanty Church of Clifton, NJ, in commemorative services upon the celebration of the 50th anniversary of the founding of this highly esteemed parish. I know that you and our colleagues here in the Congress will want to join with me in extending our heartiest congratulations to the clergy and parishioners of St. John Kanty Church in national recognition of a half-century of total dedication and devotion to the service of God and the cause of brotherhood, goodwill, and understanding among all mankind.

Mr. Speaker, the faith and devotion of our people in a full communion of understanding, ever caring and respecting the individual religious beliefs of his or her fellowman has been the lifeline of our democracy—ever inspiring our people with hope and urging the individual on to great achievements and purpose in pursuing the fulfillment of his or her dreams and ambitions. The exemplary leadership and outstanding efforts of our citizens so important to our quality of life are in the vanguard of the America dream. Today we express our appreciation to the pastor of St. John Kanty Church, Rev. Joseph Grzybowski, and his predecessors whose personal commitment and unselfish devotion in promulgating spiritual guidance, goodwill, fellowship, and brotherhood in service to God have provided a lasting contribution to the quality of life of the people of our community, State, and Nation.

The quality of the leadership of members of the most reverend clergy who settled in the city of Clifton, NJ, and founded St. John Kanty Church is most eloquently intertwined in the history of the church which was provided me by the Golden Anniversary Committee. With your permission, Mr. Speaker, I would like to place this statement on the history of St. John Kanty Parish at this point in our historic journal of Congress, as follows:

ST. JOHN KANTY PARISH

Its faith . . . its peoples . . . its church.

The high golden covered church tower of Saint John Kanty Church in Clifton, New Jersey is a landmark in the Athenia section of Clifton today, visible to people from many different vantage points. Looking back fifty years ago to 1935, it was sort of a beacon for the newly arrived immigrant people who came to America from Europe, helping them to become part of a new land while preserving their original faith. First they met our Lady on Ellis Island who welcomed them to our shores and next they had seen their future church with its majestic steeple as hands folded in prayer heavenward.

St. John Kanty Parish also served the Polish people of Passaic who began to leave the city and spread out into the nearby rolling hills of Athenia, the move from the cities into the suburban areas. These were trying times for this tired and somewhat apprehensive group of immigrants. They came in search of freedom and peace of soul. They needed their own church not only as a place of worship, but also as a home where their culture and customs would be melded with their faith—a place where the social aspect of their human nature would be satisfied. Thus a small group of devout and energetic people petitioned the Bishop of Newark, Most Rev. Thomas J. Walsh, to establish a parish of their own. On October 6, 1935, the parish of St. John Kanty was established and entrusted to the care of the Franciscan Friars who are still tending to the needs of the parishioners.

Father Theodore Kaczmarck, OFM Conv. was appointed the first pastor. Within a year ground was broken for the new church which was blessed on April 25, 1937. The first census in 1936 revealed a membership of 243 families. Now the parish begins to grow . . .! The rectory was built in 1940. In the fifties, the parishioners, now eight hundred families strong, influenced by the exceptional administrative talents and winning personality of Father Adolph Banach, their new pastor, witnessed the opening of their own school for their children who no longer would have to use makeshift classrooms. From its inception the school has been staffed and administrered by the Felician Sisters of Lodi, New Jersey. Father Aloysius Balcerak provided these dedicated teachers with a new residence in 1968.

Throughout the history of the parish, the various church societies which today number seventeen (as compared to the original three) have showed their zeal and interest in fostering a social and family spirit in the parish. Due to the Second Vatican Council, the Church, in general, experienced significant changes. Father Balcerak as well as his successor, Father Martin Dombrowski, patiently guided their flock, who understandably were affected by the many changes and helped them to accept the recommendations of the Council.

At present, Father Joseph Grzybowski's main concern, like that of the pastors before him, was and remains the spiritual life of the parishioners. His material contributions to the parish include remodeling the parish auditorium, the complete renovation of the church interior as well as the refurbishing of the church steeple with gold leaf—the crowning feature in preparation for the Golden Jubilee festivities in 1985.

On May 19, 1985 the bells will gloriously ring out in the golden church steeple calling all the parishioners to this joyous day of Thanksgiving. They will raise their voices in prayer and song to God and to the Blessed Virgin Mary in gratitude for their beautiful House of God, their school and all of the priests and sisters who have served them so piously, devotedly and efficiently throughout the years.

Saint John Kanty parish is young . . . only fifty years old. God will continue to reveal Himself in His Word and the sacraments. He will call us forth into new challenges. He will speak to us in the days to come of things we must yet do, and of mysteries we still cannot fathom. Its future is being developed in the potential of the present movement. Its story will be complete only then when the hearts of all who shared in its history are opened before the Lord in the kingdom that is yet to be revealed in its fullness. Our task as a parish is to unite ourselves in charity and to go forth together as God's people . . . as we read in Ezekhiel (36:28) ". . . you shall be my people and I will be your God."

Mr. Speaker, during the course of the year, the clergy and laity of St. John Kanty Church will be celebrat-

ing this most important golden history of their parish, devoting themselves in an outstanding program dedicated to the remembrance of the blessings of St. John Kanty parish during the past 50 years and strengthening the resolve of all to continue their most noteworthy efforts in service to God and mankind.

I am pleased to have this opportunity to seek national recognition of the distinguished pastors, associate priests, sisters, and congregation of St. John Kanty Church. In their dedication and devotion to our people, they have truly enriched the cultural, educational, and religious endeavors of our community, State, and Nation. In national tribute to the elegance of their faith and good deeds, we do indeed salute the clergy and parishioners of St. John Kanty Church of Clifton, NJ, upon the commemoration and celebration of their 50th golden anniversary.●

BLACK HERITAGE DAY PARADE

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. RODINO. Mr. Speaker, on Sunday, May 26, I will have the honor of once again participating in the Annual Black Heritage Day Parade in Newark, NJ. As in the past 7 years, thousands of people will line the streets to rejoice in the rich contributions Afro-Americans have made to the culture and heritage of our Nation.

The sponsor of this event is the Black Heritage Day Parade Committee, a nonprofit organization that was established in 1978 to educate black people in Newark about the richness of their heritage and to foster cooperation and unity among the diverse groups of people who are all committed to equal rights in our society.

In addition, the committee also helps provide seminars in black history for Newark residents, particularly young people, and in other ways build a sense of community pride and awareness in the achievements of black Americans—on both a local and national level.

I would like to express my appreciation and commendation to the many, many people who have worked so hard to make sure that this celebration will be a success. Specifically, I want to recognize the parade officers—Mr. Kurt A. Culbreath, chairperson; Mr. Michael Cook, first vice chairperson; Mr. Harold Edwards, Sr., second vice chairperson; Ms. Deborah L. Bryant, secretary; and Mr. Shawii Johnson, sergeant at arms.

The marshals of this year's parade represent some of the leading organizations in our community. The grand marshal will be Mr. Keith Jones, executive director of the Newark Chapter of the NAACP; and the deputy grand marshals will be James Blair, executive director of the Urban League of Essex County; James Wallace, executive director of the International Youth Organization; and Mrs. Mary Hill, president of the Newark Chapter of the National Council of Negro Women. All of these individuals—and all of these organizations—have played crucial roles in the fight for equal justice and civil rights. They have given a great deal of themselves for the betterment of our entire society, and I salute them for their outstanding work in our community.

The theme of this year's Black Heritage Day Parade—"Twenty Years Not In Vain"—is most appropriate. Two decades after the passage of landmark civil rights legislation, we must assess where we have come from, what we have achieved, and where we must go from here in the fight for racial equality.

As we reflect on the parade theme, we can certainly conclude that the past 20 years have not been in vain, and we should also rededicate ourselves to ensuring that none of the efforts we have expended in the name of civil rights will ever be in vain. The significant advances we have made are too numerous to be mentioned here, and we all know the names of the laws we worked to pass and the social programs that were implemented as a result. The important thing now is to guard against those who would turn back the clock on civil rights. We cannot afford to let that happen.

While all of these laws and programs may not work perfectly, there can be no doubt that they have made a great improvement in the quality of life of millions of Americans and, more importantly, that they have brought the prospect of opportunities to those to whom the doors were previously closed. But instead of the fine tuning that may be necessary to perfect these programs and laws, we have seen the imperfections being used as an excuse to undercut or abolish them.

And so, while we joyously celebrate 20 years of progress we must be ever vigilant to those who would reverse our successes. We often feel that, instead of moving toward Dr. King's "sunlit path of racial justice," we are merely struggling to mark time.

In the quest for freedom, there will continue to be struggles ahead. Yet I am confident that we shall be on the march again under the banner of equal rights and justice for all of our citizens, and that we shall again prevail.

Mr. Speaker, once again Mayor Kenneth Gibson has proclaimed next Sunday "Black Heritage Day," and I look forward to joining in this important and exciting event. It promises to be a time for celebration and reflection, a time of pride in our accomplishments and of rededication and commitment to the goal of one nation, under God, with liberty, justice and equality for all.●

NICARAGUA UPRISING NOT TO SUPPORT MARXISM

HON. FLOYD SPENCE

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. SPENCE. Mr. Speaker, in a letter to the editor which appeared in the April 26, 1985, edition of the Columbia, SC, State newspaper, Mr. Kenneth J. Dieter points out the error some make in attempting to relate our experiences in Vietnam with the current problem in Nicaragua. He makes a number of significant observations regarding this troubled land and the need to assess our Nicaraguan policy on the basis of the situation there rather than on some fancied comparison with Vietnam. I commend Mr. Dieter's letter to my colleagues and include it as a part of my remarks. The text of the letter follows:

[From the State (Columbia, SC), Apr. 26, 1985]

NICARAGUA UPRISING NOT TO SUPPORT MARXISM

It seems odd to me that so many people attempt to relate Vietnam with the current problem in Nicaragua.

In Nicaragua, there was an overthrow of a dictatorship which the general public apparently supported. The uprising was not to support communism, but to rid itself of an oppressive government. The fact that a Marxist military gained control does not give proof that the people really want this type of government. It is also clear that there are some who oppose it to the death. The general public may, or may not, support the current government in Nicaragua.

The lesson that we should have learned in Vietnam is that the communist government will rapidly devour any militarily weak neighbor. This policy has been used with great success by communist governments since World War II. The current administration in Washington claims that already there are groups of Maxists terrorists operating through Central America. The Russian diplomacy of force and threat of force throughout the world appears to be active in Central America.

The U.S. decision of policy in Central America better be made on the facts on the situation and not on some emotional knee-jerk reaction about Vietnam.

"Peace in our time" claimed the British Prime Minister Chamberlain. This claim was shortly followed by a blood bath that extended over most of the Northern hemisphere. If England and France would have put a foot on Hitler in 1937, World War II would not have occurred. If Central America can supply the cannon fodder, Russia will provide the materials of war.—Kenneth H. Dieter, 3211 Bush River Road, Columbia.●

TRIBUTE TO HISAO INOUYE

HON. SALA BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mrs. BURTON of California. Mr. Speaker, on June 7, Kimochi, Inc., in San Francisco will honor Mr. Hisao Inouye, the immediate past chairman of this outstanding community organization.

I am pleased to be able to bring to the attention of the U.S. Congress the accomplishments of this exemplary gentleman. In a letter to me, Sandy Ouye Mori, director of Kimochi Home, said this about Mr. Inouye:

Mr. Hisao Inouye is being honored for his years of commitment to his community, exemplified by his leadership as a founding member of the Japanese Chamber of Commerce of Northern California, an original organizer of the Cherry Blossom Festival, a leading force in the development of Kimochi Home for seniors, and a leader in the Nikkei Lions Club. His skills in the areas of corporate business, United States-Japan relations, ethnic awareness, human services, and community organizing are admired by all segments of our Japanese American community.

I would also like to include in the RECORD the following personal history of Mr. Inouye:

1942 (May–September): Appointed as Interpreter by Officer-In-Charge, Detention Camp, Bismarck, ND, in hearing proceedings for the Wartime Issei Japanese Detainees.

1945 (fall): Appointed as interpreter by Officer-In-Charge, Internment Camp, Crystal City, TX, in hearing proceedings for the Japanese Internees sent to United States, by the Peruvian Government during the War.

1945–46: Elected as Spokesman for the Japanese Internees, Crystal City Internment Camp, Crystal City, TX.

1950 (June): As member of Ad-Hoc Committee, participated in preliminary meetings to organize and establish Japanese Chamber of Commerce in San Francisco.

1950 (September): Elected President of Japanese Chamber of Commerce of North California,[1] and served to December 1951.

1955 (October): Received Certificate of Appreciation from Parents Association, Troop 12, Boy Scouts of America, San Francisco, in recognition of service to youths.

1957–58: As a partner in import wholesale firm of Modern Food Products Co., San Francisco, participated in merger negotiations with Pacific Trading Co., Inc. Merger completed in October 1958 and became Japan Food Corporation. Present name JFC International, Inc. Served as Secretary/Treasurer and Member of the Board until retirement in 1974.

1961: Helped to organize Japanese-American Lions Club in San Francisco. Club was named the Nikkei Lions Club of San Francisco. Elected as Secretary, 1961–62.

1962–63: Elected President of the Nikkei Lions Club.

1965–66: Appointed District Chairman, Lions' Youth and Community Activities Fund, District 4-C-4, Lions International.

1967: Organized Ad-Hoc Festival Committee composed of representatives of business, cultural, religious organizations and Kenjikais in San Francisco for the purpose of having Annual Festival in Japantown as well as to celebrate coming completion of Japan Center complex. Elected General Chairman of the Festival.●

[1] Northern California instead of San Francisco because members composed of businesses in cities as Sacramento, Stockton, Fresno, East Bay, and South Bay.

IN SUPPORT OF THE ECONOMIC EQUITY ACT OF 1985

HON. CATHY (MRS. GILLIS) LONG

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mrs. LONG. Mr. Speaker, I rise in support as a cosponsor of the Economic Equity Act of 1985, which was introduced yesterday in the House of Representatives.

At a time when women comprise approximately 45 percent of the labor force and support 9.5 million families, legislation which unravels economic discrimination against older women and mothers, working women, and homemakers should be enacted quickly.

The Economic Equity Act is landmark legislation. Once passed, reforms it includes, such as the retirement security and tax reform, will make the difference in the lives of the majority of our citizens.

Roughly 20 years ago, Congress passed the Equal Pay Act to end discrimination against women in the workplace. But today, despite our long-standing concern for equality, women still earn only 69 cents to every dollar a man earns. As a result, our entire economy suffers. When women are denied full participation and equal opportunity, we are squandering a valuable resource.

Passage of the Economic Equity Act is intended to move women farther along the path to social and economic fairness. However, this legislation is not for women alone. It will create a better society for us all—as husbands, sons, and daughters.

Mr. Speaker, I urge the House to pass this instrumental piece of legislation as we continue to face and deal with the problems of discrimination against women. And in closing, I would like to recognize that if we are to totally eliminate discrimination toward women, we must realize that the problems of women are not just women's problems, but America's problems.●

KEEP AMTRAK ROLLING

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. SCHEUER. Mr. Speaker, one of the most important transportation issues before this Congress is President Reagan's ill-advised request to eliminate Federal funding for Amtrak. Without a doubt, adoption of this proposal would result in the demise of our Nation's rail passenger network. I believe this would be a serious mistake with grave consequences for all regions of the country, urban, and rural alike.

Last week, our Senate colleagues derailed President Reagan's proposal by voting 53 to 41 to provide $614 million for Amtrak in fiscal year 1986. While I would have preferred to see funding frozen at the current fiscal year 1985 level of $684 million, I believe that the House can keep Amtrak rolling on the right track by insisting upon a freeze at the fiscal year 1985 level for the next 2 years.

Earlier this year, the New York State Senate adopted a resolution urging Congress to maintain the necessary Federal funding to keep Amtrak operating at current levels. This measure, Senate Resolution 307, recognizes the importance of Amtrak to New York's economy and the serious consequences that would result from elimination of rail passenger service. I would like to bring this resolution to the attention of my colleagues and urge them to heed the sound advice of the New York State Senate.

Whereas, The National Railroad Passenger Corporation, known as Amtrak, serves the citizens of New York State; and

Whereas, Our citizens' use of Amtrak has increased continuously since 1971 until at the present time 7,236,258 persons in 1984 use Amtrak to arrive in and depart from points in our State; and

Whereas, Amtrak directly employs 2,355 citizens of New York State and indirectly supports the employment of 12,000 citizens of this State through the purchase of supplies and equipment from their employers; and

Whereas, Amtrak has invested $90,000,000 in this State in the form of passenger facilities, track rehabilitation and purchase of equipment; and

Whereas, Amtrak has continually improved the quality of its service, its financial position and the number of passengers carried to the point where it transported 22 million people in 1984 and expects to increase that amount by 2% to 3% in 1985; and

Whereas, The Budget presented to the Congress of the United States by the President would, if enacted, deprive Amtrak of the federal funding required for its continued existence; and

Whereas, The effective elimination of Amtrak would result in serious adverse economic consequences to this State and its

citizens in terms of loss of investment, loss of income to equipment and supplies contractors with Amtrak, loss of rail passenger service, loss of jobs and a concomitant strain on the Railroad Retirement System by the loss of many contributors to that System: Now, therefore, be it

Resolved, That this Legislative Body pause in its deliberations to memorialize the United States Congress to see to it that sufficient funds are appropriated to help Amtrak in at least as sound a position operationally in fiscal year 1986 as it has been in fiscal year 1985; and be it further

Resolved, That copies of this Resolution, suitably engrossed, be transmitted to The Honorable Elizabeth H. Dole, Secretary of Transportation, United States Department of Transportation, 400 Seventh Street, S.W., Washington, D.C. 20590 and to each member of the Congressional delegation from the State of New York.●

THE GOVERNMENT SECURITIES MARKET PROTECTION ACT

HON. WALTER E. FAUNTROY

OF THE DISTRICT OF COLUMBIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. FAUNTROY. Mr. Speaker, I am today introducing the Government Securities Market Protection Act. It is designed to enhance the confidence and stability in the Government securities market following the recent failures of several securities firms.

This bill has been developed following a careful examination of the problems which confront the Government securities market, including the growth of the debt, new and innovative forms of financing, and the recent failures of firms in the Government securities market. The failure of these firms has been assessed in terms of the losses to customers and the subsequent loss of confidence in the financial system.

The U.S. Treasury securities market is one of the largest markets in the world. Through this market, the U.S. Treasury raises more than $200 billion in new funds each year to finance the deficit, while refinancing hundreds of billions more of maturing old debt. It is a matter with more than $1.576 trillion of debt currently outstanding. Maintaining the public confidence in Treasury debt securities ensures both a minimal interest cost and the orderly and efficient sale of such instruments.

Two characteristics distinguish the Government securities market from other securities markets. First, there is no risk of default by the U.S. Government on its debt. Second, the primary investors in U.S. Government securities are institutions—financial institutions, businesses, local government bodies, pension funds, securities firms, etc.—rather than individuals.

Given the riskless nature of these securities, losses to customers have resulted when unscrupulous and completely unregulated dealers have taken advantage of the enormous growth of the debt and its attractiveness to new investors. In a number of these instances firms have: First, been over leveraged; second, pledged the securities to more than one party; or third, failed to provide adequate segregation of a customer's securities. While steps were taken as early as last year to assure that holders of a repurchase agreement—repo—could sell the security in the event of a bankruptcy, there still is no effective way to ascertain who is doing business in the Government securities market. Neither is there a consistent method for evaluating the financial position of securities dealers. Nor has there been a method for assuring the proper segregation of securities. Finally, financial institution regulators have been unable to obtain and share information concerning the practices of unregulated securities dealers.

The Government Securities Market Protection Act fills the void. It accomplishes this objective in eight specific ways:

1. The Act requires the Federal Reserve to establish a capital adequacy standard for government securities dealers. Enforcement of these standards will be combined with a system of internal controls to assure continued compliance.

These capital adequacy standards are intended to assure that dealers in government securities will keep the size of their risks consistent with the amount of liquid capital available to absorb losses. It will also enable potential customers to assess whether a dealer is acting in accordance with generally accepted prudential standards.

2. The Act requires both dealers and clearing agents to maintain segregated accounts on securities transactions with customers. In the case of a repurchase agreement, the dealer is required to deliver the securities to the customer, to an independent custodian, or another third party designated by the customer. This delivery may be exempted by the Federal Reserve for appropriately brief periods.

Customers have suffered losses in government securities transactions due to their failure to take effective possession of collateral pledged for the cash borrowed from them by the dealers. By requiring that segregated accounts be maintained and securities delivered to either the customer, an independent custodian, or other approved third party, a dealer is effectively barred from double-pledging a security. Should the dealer fail, a customer who has a perfected security interest in the collateral would then be able to sell the security as contemplated by the amendments to the Bankruptcy Code in 1984.

3. The Act requires the Federal Reserve to maintain and publish on a regular basis a list of all dealers complying with the capital adequacy guidelines, including the system of internal controls. Furthermore, each such dealer must have established a system of segregated accounts. Unless specifically excluded because they are otherwise regulated, no dealer is permitted to engage in government security transactions unless they are so listed by the Federal Reserve.

There is presently no bar to entry into the government securities business. In addition, government regulators have little idea of the number of dealers engaged in the government securities market. This provision authorizes the Federal Reserve to establish a listing of those dealers and to regulate their entry. The failure of any securities firm to comply with the standards established by the Federal Reserve will prohibit them from conducting any government securities business.

4. The Act prohibits primary dealers or depository institutions from conducting government securities transactions with any firm which has not complied with the capital adequacy and clearing requirements established by the Federal Reserve.

Depository institutions and primary dealers are the mechanisms through which all government securities firms must operate to obtain access to the book entry system and larger quantities of securities. By prohibiting business contact with an unlisted dealer, the statute effectively assures that one who fails to meet Federal Reserve standards cannot ply their trade to the detriment of unwitting customers.

5. The Act directs the Federal Financial Institutions Examination Council to develop standardized examination practices with respect to the handling of government securities transactions by any depository institution. The Federal Reserve is required to advise the members of the Examination Council of any dealer whose actions may adversely affect the safety and soundness of a depository institution.

Insofar as depository institutions were among the worst victims of the most recent failures, largely because they had failed to exercise prudent business judgements regarding transactions in government securities, it is felt that consistent standards set by examiners should eliminate practices which expose financial institutions to loss. Additionally, the imposition of such standards should have a salutary impact upon customers of depository institutions since depository institutions are often the agents for smaller transactions undertaken by individuals or small organizations.

6. The Act establishes a Government Securities Advisory Council to the Board of Governors of the Federal Reserve System with responsibility to determine methods to maintain and improve the integrity of the markets and to protect against fraud and other abusive practices.

Hopefully, the Council will assure that the Federal Reserve is kept abreast of changes in the market place. An important aspect of this informational process is the requirement that customers be included as members.

7. The Act also directs the Federal Reserve to report to Congress within six months on ways to expand the business relationships between the Federal Reserve and the government securities market, including:

The establishment of additional business relationships with nonreporting dealers designed to enhance Federal Reserve dealer oversight and surveillance;

Providing primary dealers access to the clearing system for government securities transactions;

Enabling smaller dealers to borrow odd-lot securities on a fully collateralized basis from the Federal Reserve; and

Expanding access to the brokers market including access to the broker screens through which the bulk of government securities transactions are conducted.

These four proposals seek to assure that the market functions efficiently in selling the Federal debt by looking for new ways to add liquidity and opportunities in the government securities market. Some of the suggestions have arisen from the hearings, others emerge from the work which the General Accounting Office has undertaken for the Subcommittee, while a few have come from the dealers themselves.

8. Finally, the Act contains various forms of injunctive relief, and civil and criminal penalties which are substantial enough to assure that violations cannot be considered as the mere cost of doing business. Civil penalties are $100,000 per day for each violation; criminal penalties are $500,000 with possible jail terms for up to five years.

This bill reflects the considered approach of the Subcommittee on Domestic Monetary Policy following extensive oversight hearings beginning in March 1981 on the question of the regulation of Government securities. It is responsive to the heavy borrowing requirements of the Federal Government and of the fact that interest rates on all other debt are based on rates which the Treasury must pay. Most importantly, however, the bill is responsive to the needs of market participants who require that their business practices not suffer unanticipated losses.

There is no safer market for investors than the Government securities market. This bill acknowledges that fact and builds upon it by assuring that unscrupulous dealers will not have the opportunity to take advantage of the riskless nature of securities offered by the United States of America.

I encourage Members to support this approach and hope that they will call the subcommittee if they have questions.●

NEW MODES FOR ST. LOUIS EDUCATOR

HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. CLAY. Mr. Speaker, I would like to take this opportunity to join with my fellow St. Louisans in the celebration honoring an outstanding educator on the occasion of her retirement from the St. Louis public school system. As Mrs. Marjorie Eloise Fay retires from the St. Louis public schools, she can reflect on a career that has been challenging as well as multidimensional. Through two decades she has provided leadership in a variety of assignments. Mrs. Fay has served as area assistant superintendent for alternative schools, secondary curriculum supervisor, evaluator and writer for Federal Relations Division, coordinator of Secondary Title I Reading and Rooms of Twenty, and coordinator of the Secondary English Summer Workshop.

Undergirding Mrs. Fay's success in all of her administrative roles are her expertise and dedication as a teacher. As an English teacher at Beaumont High School, her flexibility and creativity were utilized and exemplified by her ability to involve and motivate students—all kinds of students—including those regarded as slow learners as well as college bound high achievers. As she guided her students through classes in English, journalism and advanced composition and literature her propensity for eloquent clarity in both oral and written language served as a model for students to aspire to emulate. Her proficiency in this area has been ably illustrated by the publication of her work in Bulletin, Missouri Botanical Garden, spring, 1949; The Standard, American Ethical Union; Bulletin, Missouri Association of Teachers of English, spring, 1975; Caduccus, Beaumont High School, May 1976.

Many professional organizations have benefited from Mrs. Fay's commitment to professional development. With an educational background that includes bachelor of arts and master of arts degrees from Washington University as well as advanced course work at that university, she has actively participated in and provided leadership for:

National Council of Teachers of English; Missouri Association of Teachers of English (first vice president, 1976-79); Greater St. Louis Council of Teachers of English (president, 1976-78); Greater St. Louis English Teachers Association (cochair executive committee, 1978); Association for Supervision and Curriculum Development; Missouri Association for Supervision and Curriculum Development; Greater St. Louis Association for Supervision and Curriculum Development; St. Louis Council for the Social Studies; Delta Kappa Gamma; Missouri State Teachers Association; St. Louis Administrators' Association; and St. Louis Association of Women Administrators (vice president, 1975-77).

Mrs. Fay's impact in the field of education has not been limited to St. Louis public schools. She has served as a consultant to other school districts, participated in the North Central Association evaluation of public and parochial secondary schools in the metropolitan area, addressed professional groups, and taught piano lessons to private pupils. At the ethical society of St. Louis Mrs. Fay has served as: director, junior Sunday assembly; member, board of trustees; and teacher, junior Sunday assembly.

The intellectual accomplishments of Mrs. Fay have been recognized by many organizations which have honored her with awards:

First-Ranking Student, Beaumont High School, June 1945; Four-Year Honor Scholarship to Washington University; Phi Betta Kappa, Washington University; Sigma Xi, Washington University; Alpha Lambda Delta, Washington University; Kappa Delta Pi, Washington University; and Distinguished Alumni Award, Beaumont High School.

The competence which Mrs. Fay applies to all of her commitments is enhanced by her versatility in a wide range of interests outside of the field of education. After graduating from Washington University with a major in botany, she was employed at Missouri Botanical Garden as a librarian and herbarium worker. She also served as assistant editor of the popular scientific publications distributed by the garden. Her interest in and knowledge of flora are reflected in the many hours she has spent with her husband, James, maintaining the beauty of the plants in and surrounding their home.

Having mastered the skill of parenting with the guidance and assistance of her son, Bruce, and daughter, Patricia, Mrs. Fay has now moved with ease and grace to the more eminent rank of doting grandmother. In addition to the pleasure she receives from being with her family, she has a broad range of interests which include reading, music, travel, swimming, and cooking. Her skill with crafts—from crocheting baby sweaters to making stained glass windows—is awe-inspiring, and her products are works of art.

With so many outlets available for her vast storehouse of intellect and creativity, Mrs. Fay is moving away from her previous responsibilities with the St. Louis public schools into new modes of living which promise to be exciting, fruitful, and satisfying. I congratulate Mrs. Fay on her exceptional record of achievement. Marjorie Eloise Fay has maintained a standard of excellence and commitment to education which will leave its mark on the St. Louis public schools for many years to come.●

OLDEST EPISCOPAL CHURCH IN DIOCESE OF CHICAGO MARKS 150TH ANNIVERSARY

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. O'BRIEN. Mr. Speaker, this week marks the 150th anniversary of Christ Episcopal Church in Joliet, IL, the oldest Episcopal Church in the Diocese of Chicago.

One hundred and fifty years ago tomorrow, the Rt. Rev. Henry Philander Chase administered communion to eight Joliet citizens at the home of Mr. A.W. Borden at the corner of Chicago and Webster Streets in Joliet. The Borden home is still standing today and is listed in the National Register of Historic Places. In 1835, there were only five other Episcopal parishes in Illinois.

Joliet's Christ Episcopal Church has seen three of its rectors over the years

rise to become bishops of the Episcopal Church. Christ Episcopal's 25th and current rector is Rev. Alexander Seabrook.

Thursday evening, May 16, the bishop of Chicago, the Rt. Rev. James W. Montgomery, will lead services celebrating the 150th anniversary of the first services in Joliet. My longtime dear friend, Mr. George P. Lloyd of Joliet, will be honored as the honorary senior warden for the anniversary services in recognition of his long and valued service to the parish.

It is a pleasure for me, Mr. Speaker, to join the many people of the Joliet and Chicago area to honor the 150th anniversary of Christ Episcopal Church in Joliet.●

IN MEMORY OF CAPT. RONALD B. SCHATZ

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. KOSTMAYER. Mr. Speaker, I rise today to pay tribute to a constituent, Capt. Ronald B. Schatz of Solebury, PA, who lost his life last month while on a mission with the Pennsylvania Air National Guard.

Captain Schatz, and another pilot, Capt. Donald R. Benton of Aberdeen, NJ, were killed when their OA-37 aircraft crashed in the Caribbean while on a training mission off the coast of Honduras.

Captain Schatz had flown with the Pennsylvania Air National Guard for 5 years as a member of the 111th Tactical Air Support Group at Willow Grove Naval Air Station. He was in Honduras as part of a 50-man, 6-aircraft contingent from the 111th group.

The death of Captain Schatz, Mr. Speaker, is a grim reminder of the great sacrifices made by those who serve their country in the National Guard and Reserve units. Ronald Schatz volunteered for this mission, and like so many others at Willow Grove, the time he contributed to his unit and its mission was above and beyond what is required. We owe a tremendous debt to all those brave individuals like Ronald Schatz who give so much and perform so capably.

And Captain Schatz' death is a grim reminder, too, of the contribution of the families of our servicemen. Ronald Schatz leaves a wife, Marlene, an 11-year-old daughter, Christina, a 10-year-old son, Michael, and his father, Chester Schatz of Souderton, PA. In this tragedy we recognize their sacrifice and their loss.

The neighbors and friends of Ronald Schatz in Solebury, PA, will miss him, and on behalf of the House of Representatives, Mr. Speaker, I want to extend our prayers and sympathy to his wife and family.●

ECONOMIC EQUITY FOR WOMEN

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. BONKER. Mr. Speaker, we all know that while progress sometimes comes slowly in this body, good legislation is able to weather the tests of time and procedure and eventually find its way into law. This has been the case with legislation critical to the rights of women.

The introduction today of the Economic Equity Act of 1985 marks the third session that this comprehensive package of legislation aimed at improving the economic well-being of women and families has come before Congress. Over the past 5 years, parts of the package have been enacted into law while others have been improved and refined.

Last year marked passage of key legislation in the House reducing the costs of day care and making it more widely available. With more than 23 million children in the United States requiring day or after-school care, in 1982, and only 500,000 federally supported day-care slots, the problem of meeting the demand for affordable, convenient day care remains one of the most serious problems confronting families today. Unfortunately, this legislation died in the Senate.

Last year, Congress was also able to enact pension reform legislation which enhanced the retirement security of many women by recognizing common work patterns among our Nation's female workers. Still, however, there remains the problem of older women living on median incomes far less than those of older men. In 1983, there were more than 2.6 million older women with incomes below the poverty line.

Both of these measures were part of a larger package of bills, the Economic Equity Act of 1983. While these bills experienced some success, other key measures remain to be enacted.

That's why I'm pleased today to join with my colleagues as an original cosponsor of the Economic Equity Act of 1985, which I believe is an important step toward providing full equity and opportunity to our Nation's women. I hope my colleagues will look closely at this legislative package which includes important reforms in retirement security, dependent care, insurance, employment, and taxation. These measures, which range from pay equity and insurance nondiscrimination to child care in public housing and spousal IRA's affect the quality of life for families from all income groups.

The many authors of these bills deserve high praise for their vision and persistence. So, too, do the co-chairs of the Congressional Caucus on Women's Issues, Representatives SCHROEDER and SNOWE. Slowly, through their efforts, progress has been made toward economic equality. But we still have a long way to go before we can be assured that equal pay and opportunity are available to all, regardless of sex or economic status. I am hopeful that we in Congress can take new steps in that direction and move swiftly on this vital legislation.●

COMMUNITY AND FAMILY LIVING AMENDMENTS OF 1985

HON. JOSEPH M. McDADE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. McDADE. Mr. Speaker, today I am introducing legislation that would restructure Medicaid services for the mentally retarded and severely disabled individuals. This legislation would, over a period of 14 years, shift the priority of the Federal share of Medicaid funds from long-term institutional arrangements to services provided in community based, integrated, family environments. Medicaid coverage for services for severely disabled persons living at home or in community settings would be expanded under this bill.

It is important for my colleagues to recall that the process of "deinstitutionalization" is already occurring throughout the country. Clearly, however, this process has been hampered by the lack of long-term, systematic planning by the States for the transition from institutional based care to a system of family, home, and community service-based care. In addition, there is a lack of resources for the development of these types of services.

This bill is a direct response to these types of problems and mandates that a long-time systematic planning approach by the States be developed, while at the same time maintaining adequate resources for those service levels in the community.

The Association for Retarded Citizens considers this legislation the most important item on its legislative agenda for this entire decade which affects people who are disabled. It has been seen as an opportunity to make adjustments to the Medicaid Program which are in keeping with the current philosophy of care and training for people who have developmental disabilities. In addition to correcting the "institutional bias within the Medicaid Program as it relates to the severely disabled individuals", which legislation will assist the States in establishing those home and community based services which can prevent persons from being institutionalized.

The knowledge and technology to provide community services to even

those with the most complex needs are in place throughout this country. This validates the need of this bill to commit Federal funds to individualized mainstream services in the community.

This legislation, introduced by Senator JOHN CHAFEE, as S. 873, has been strongly supported by the Association for Retarded Citizens and its prompt passage has been urged.

This bill contains many provisions to ensure quality service for persons who are institutionalized and for those living at home in community settings. Client, parental and/or family involvement in the decisions affecting a disabled person are required. The other major provisions contained in this bill are:

(1) Requiring that States include some "community and family support services" in the Medicaid plans beginning 2 years after the effective date of this act. A comprehensive list of services that States may choose from is included with a mandate for provisions of case management services, protective intervention services, and individual family support services (which would include personal assistance and respite care).

(2) Permitting States to include such services with reimbursement beginning at the effective date.

(3) Requiring service provisions to be based on individualized plans developed by an interdisciplinary team including client participation and family participation as appropriate.

(4) Making Federal Medicaid reimbursement to the State conditional upon the completion of an implementation agreement between the State and the Secretary of Health and Human Services. Such agreements must cover a range of issues (quality control, protection of individual rights, employe rights, audits and monitoring arrangements, a plan for increasing community resources and decreasing reliance on large institutions, among others.) Each agreement will be composed by the State in light of circumstances prevailing in that State.

(5) Making gradual reductions in the percentage of Federal Medicaid matches as it applies to the care of certain "severely disabled individuals" in Medicaid certified long-term care facilities accommodating more than 15 residents. The rate will be reduced by 1 percent per quarter over 10 years, (that is, a 50-percent rate would drop to 30 percent; a 75-percent rate to 45 percent) thereby fostering, but not imposing a reduction in its use of institutional beds. The Federal matching percentage for community-based programs would remain at the level of other Medicaid services offered by the State.

(6) Place a limit on State's expenditures of Medicaid funds in institutional settings. In the year 2000, a limit will be placed on Federal Medicaid funds for facilities over 15 beds—the limit would be 15 percent of expenditures in a chosen "base year," adjusted for inflation. It is expected that the "15-percent limit" after 2000 A.D. and the reduced percentage for institutional services will work together to allow a State to maintain up to 20 percent of its current institutional based population in midsized and/or large facilities while fostering the growth of community and family based service situations for the severely disabled individual.

It is my strong belief that the ability to assist the severely disabled individual to either obtain or maintain the maximum potential for independence and their capacity to participate in community and family life is a vital, if not key, provision of any type of disability assistance. While I believe it is our responsibility as citizens to take care of those who cannot care for themselves, we must also strive to provide every means for an individual to develop their own sense of personal dignity and self-reliance.

I commend this legislation to my colleagues and urge your support.

Thank you.●

LEGISLATION DENYING A DEDUCTION FOR AMOUNTS PAID AS RESTITUTION FOR ACTS OF FRAUD

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. STARK. Mr. Speaker, I am today introducing legislation that would deny a business expense deduction for amounts paid as restitution or other damages for violation of the law involving fraud. Mr. Speaker, we have recently seen unconscionable cases of corporate crimes and abuses, the most recent example was the fraudulent scheme by the E.F. Hutton Co. against many banks around this country. All too often the fines are not commensurate with the nature of the violation. Fines are not deductible business expenses; however, restitution payments generally are. The legislation I am introducing today would assure that the Federal Government does not, through the Tax Code, subsidize the restitution payments which companies, such as E.F. Hutton, make as part of a plea to fraud charges.

Mr. Speaker, I share the concerns of those 15 Senators who recently wrote to Ed Meese protesting the absence of any charges against individuals in the E.F. Hutton case. These decisions, however, are matters of prosecutorial discretion. However, we in the Congress can take this small step to assure that these types of acts are discouraged. I urge speedy enactment of my legislation.

The text of the bill follows:

H.R. 2529

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsection (f) of section 162 of the Internal Revenue Code of 1954 (relating to fines and penalties) is amended to read as follows:

"(f) FINES AND PENALTIES, ETC.—

"(1) FINES AND PENALTIES.—No deduction shall be allowed under this chapter for any fine or similar penalty paid to a government for the violation of any law.

"(2) RESTITUTION FOR FRAUD.—If a taxpayer is convicted of a violation of law involving fraud, or the taxpayer's plea of guilty or nolo contendere with respect to such a violation is entered or accepted in any proceeding, no deduction shall be allowed under this chapter for any payment of restitution or other damages to a party injured by such fraud."

(b) The amendment made by subsection (a) shall apply to amounts paid after ——— in taxable years ending after such date.●

NATIONAL POLICE WEEK

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. TRAFICANT. Mr. Speaker, this week is National Police Week, and as a former sheriff, I would like to take this opportunity to pay tribute to the 1,600 law enforcement officers who were killed in the line of duty during the last 10 years. I would also like to pay tribute to all the law enforcement officers across the country who put their lives on the line every single day.

As a former sheriff, I know only too well the fact that law enforcement officers are a special breed—every time they put on the uniform they become a target. Every day at work they put their lives on the line. All too often the public only sees fit to honor the job that they do when a police officer is killed in the line of duty. Mr. Speaker, not only are the 1,600 law enforcement officers killed over the past 10 years heroes, they are a grim reminder that police work requires a special individual. Those officers who have given their lives for the public safety are indeed heroes. But during National Police Week I would like to remind my colleagues and the American people that all law enforcement officers deserve our respect, support, and praise. Routine police work—while many times not glamorous—is a vital part of protecting law-abiding citizens.

Law enforcement officers are an important part of our society and all aspects of their work should be recognized and applauded. All police officers know that at any time they could be called upon to put their lives on the

line. They are a dedicated, hard working, courageous, and honorable group of men and women. I feel that it is proper and fitting that all Americans pause this week and honor the fine work that this Nation's law enforcement officers have done and that this Nation takes pause to honor the sacrifices that they have made over the years.

We here in Congress must continue to support police officers and do all we can to protect then and to assist them in their everyday fight against crime. Mr. Speaker, I am honored to pay tribute to the law enforcement community and I urge all my colleagues to continue to support and assist our police officers.●

ORGAN DONOR PROGRAM

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. COURTER. Mr. Speaker, today I am pleased to bring to your attention the recent outstanding efforts of the American Liver Foundation to increase the national number of organ donors throughout the country.

The American Liver Foundation has just completed a 3-year campaign to invite over 1 million Americans to "Give Love, Give Life—Be a Donor" of body organs for transplant surgery.

Mr. Speaker, my friend, Thelma King Thiel, president of the American Liver Foundation urges all Americans to sign up as organ donors. It is easy, and can be done any time of the year. At this point, I would like to commend to my colleagues' attention, the following news article released by the American Liver Foundation.

SAVING LIVES WITH TRANSPLANT SURGERY IS A MATTER OF MORE ORGAN DONORS, ACCORDING TO AMERICAN LIVER FOUNDATION

CEDAR GROVE, NJ, May 2, 1985—More than one million Americans have been invited by the American Liver Foundation to "Give Love, Give Life—Be a Donor" of body organs for transplant surgery.

Announcing the results of the foundation's three-year drive to increase the number of organ donors at the close of National Organ Donor Awareness Week in April, Thelma King Thiel said that "if only four percent of those who got donor cards from our organization alone would sign up, we would have 10,000 more potential donors than were needed to take care of all the cornea, heart, lung, kidney, liver and pancreas transplantations performed in all of 1984."

Mrs. Thiel is president and chief operating officer of the foundation. Of the 30,000 transplant operations done last year, she says, only 308 were liver transplantations. "As far as transplant surgery is concerned, liver transplantations are 'the new kid on the block,'" Mrs. Thiel says. "Only in the last three years have the technology and techniques been developed that make this procedure the miracle it is. Liver transplantations save lives everyone had given up on before," she observed.

Liver transplants are the only effective therapy that currently exists for end-stage liver disease, Mrs. Thiel added. "People with kidney disease have hemodialysis as a viable alternative. But victims of serious liver disease have no therapy to turn to other than transplantation." The problem is that many die waiting for suitable organs to become available.

Mrs. Thiel, whose son died of liver disease 14 years ago when liver transplants were still a medical dream, urges all Americans who did not sign up as organ donors during the national drive to consider doing so. It can be done any time during the year.

"We won't be here to see the life we've passed on to someone else. But our families have the consolidation of knowing that out of their sorrow joy has been brought to others."

The American Liver Foundation is the first national nonprofit health agency to concern itself with research and treatment for cirrhosis, hepatitis, and the more than 100 genetic, infectious and environmentally-caused liver diseases. Its nationwide network of volunteers and 27 chapters provide support to adults and children afflicted with liver diseases.●

LEGISLATION TO PROTECT SENIOR NUTRITION PROGRAM

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. BIAGGI. Mr. Speaker, today I am introducing legislation that will address the current funding shortfall in section 311 of the Older Americans Act. I am pleased to note that I am joined in this effort by my colleague, DALE KILDEE, who now is chairman of the Human Resources Subcommittee which oversees Older Americans Act programs.

This bill is designed to assure adequate funding for meals served by States under section 311 of the act and also prohibits the Secretary of Agriculture from reducing funding for this program in any year that appropriations are insufficient to meet the anticipated number of meals served by States.

This legislation is needed because under section 311, the current $116 million appropriated in fiscal year 1986 will not provide enough money for States to continue to serve meals at current service levels. Under section 311, the Secretary is authorized to reduce reimbursements per meal, which are established in the statute. For this fiscal year, the rate was originally established at 58.76 cents per meal for those States which choose to receive cash in lieu of commodities. On February 21, 1985, the Department published notice in the Federal Register that it intended to reduce the per meal rate from the original 58.75 cents to 56.76 cents per meal. This reduction was based upon an estimated 212.8 million meals to be served in this year at the $116 million funded level.

Upon receiving notice of reimbursement at the rate of 58.76 cents, States planned their annual projects accordingly. If we do not provide an additional $5 million in this year, these same States will be forced to reduce or eliminate meal programs because they will be receiving reimbursement at the lower rate.

This bill would increase the authorization levels in section 311 to accommodate the increased demand for meals at the following levels: $125.8 million for fiscal year 1985, $135.9 million for fiscal year 1986, and $147 million for fiscal year 1987. It will also delete the authority of the Secretary to reduce reimbursements for this program when projected meals being served will exceed the existing appropriation.

In my opinion, if States are serving meals respective of need for such meals, then the Department should seek a supplemental appropriation to assure the higher level of services. To reduce or eliminate meals is unnecessary and counterproductive.

Mr. Speaker, I would not pursue a legislative remedy to this problem at this time if the meal programs were not directly threatened for reduction. I have received a letter from the Department affirming the fact that they did indeed advise States last year that they would receive 58.75 cents per meal, only to reduce it to 56.76 cents at this time. Adjustments in reimbursements must be made in a manner that will allow States to budget appropriately. To reduce funding in the middle of a budget cycle only guarantees cuts in meal programs.

In addition, passage of this bill will allow the Appropriations Committee to provide the estimated $5 million extra that it needed to assure that States will not lose meal dollars in this fiscal year. This is because the current appropriated level of $116 million is also the fully authorized level. Passage of this bill to increase authorizations and eliminating the Secretary's discretion to reduce reimbursements will be the first step in addressing this problem on a permanent basis.

Mr. Speaker, this bill is a small but important initiative and I hope that my colleagues will join me in supporting its passage.●

THE 100TH BIRTHDAY OF GROTON SCHOOL

HON. JIM COOPER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. COOPER. Mr. Speaker, it is an honor for me to mark the occasion of the 100th birthday of Groton School

in Groton, MA. I believe it is also an honor for the House of Representatives as a whole to recognize this school, so many of whose graduates have contributed so much over the last century to the security and welfare of the United States.

In 1884 Rev. Endicott Peabody established Groton School to prepare students for college and to prepare them for the active work of life. So well did the rector succeed at this preparation that it is almost no surprise to read history books filled with achievements of Grotonians on behalf of U.S. Government.

In the 20th century no President has contributed as much to the security and welfare of the people of the Fourth District of Tennessee as did a Grotonian named Franklin D. Roosevelt. Dean Acheson, Averell Harriman, Douglas Dillon, Sumner Welles, Stanley Resor, Francis Keppel, and McGeorge Bundy are but a few of many graduates of Groton who have also contributed in a noteworthy way to the security and welfare of the people of my district.

The record which these men have compiled in public life is by no means unblemished, but it is a record of which all may be justly proud. Indeed, as is possible for any person or institution possessing a glorious past, both Groton School and the Grotonians who have distinguished themselves in public life could be so proud of this record that they might live in the past and try to repeat the same accomplishments over and over.

But there is a difference between knowing the past and living in it. Always has Groton School been blessed with trustees and teachers who have appreciated this difference and put the past into its proper place. Thus I attended festivities at Groton School last weekend which rejoiced at the past but, even more so, celebrated an anticipation of the next hundred years of education at a special community. It truly is. And the reasons for the special character of Groton School are each of the 55 members of its faculty. To them I take this opportunity to pay a tribute.

In particular, I take this opportunity to pay a special tribute to the 46 years of full-time leadership and service of Paul W. Wright, and to a wise teacher of many public servants, Richard K. Irons. To them I owe a debt for my own career in public life which it is not possible to repay.

But I believe it is in this spirit I speak for graduates of Groton School who serve the public today and say: I look forward to the future confidently, will thrive on better or different solutions to problems in the welfare and security of the American people, and can believe that the U.S. Government will surmount any crisis if it is led by leaders possessing the vision and character which Groton School continues to provide.●

FUTURE OIL SHOCK

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. MURTHA. Mr. Speaker, in recent weeks through a maze of numbers of energy supplies we have seen some dangerous trends that deserve to be highlighted.

Recently, oil imports have risen for the first time in 5 years. Gasoline supplies recently reached a 12-year low. There has been an increasing demand for natural gas at a time when there is a continued reduction of drilling for supplies.

While we certainly are not in an immediate energy crisis, we see the outlines in these developments of energy problems down the road. In addition, we see the partial return of a familiar problem from the seventies—inflation being pushed upward by rising energy prices.

Two recent reports resounded what should be a clear call to us for paying more attention to the energy future: the U.S. Department of Interior announced that there is some 55 percent less oil and 44 percent less gas reserves in our offshore areas than was previously thought; the Congressional Office of Technology Assessment also said our reserves are dwindling, our imports are rising, and our vulnerability to foreign manipulation of the energy markets is increasing.

Clearly, America cannot allow itself to once again fall into the energy trap. Clearly, we cannot allow our economy to again be racked by uncontrolled energy prices. Clearly, the options and alternatives we face are largely the same as we faced during the seventies.

What we need is renewed action, renewed commitment, and a renewed sense of America's energy situation.

As we in the House of Representatives begin our budget debate in detail, I believe it is essential that we remember to balance in these future energy needs. Finding and developing new energy supplies takes a tremendous amount of capital and substantial leadtime.

Right now, we have the time. What we need to make sure is that we continue the commitment, that we continue to look forward and continue to plan for the future.

Many well-meaning Members of the House believe a place to attack in the budget is the money for synthetic fuels development. I disagree strongly. This remains an alternative we desperately need to develop in order to promote our own energy resources for the decades ahead. One of the great strengths of the Synthetic Fuels Program has always been that it will use American energy supplies and produce jobs and sales in America, rather than seeing our energy dollar continue to go to foreign countries. The Synthetic Fuels Programs deserves to go ahead within its present financial framework to help us plan for the future.

Also in this budget debate we will again take up the leasing of promising areas for oil exploration in the Outer Continental Shelf. We worked on the Interior Appropriations Subcommittee last year for the proper balance of exploration with environmental protection and we will be seeking to further these goals again this year.

We will also be looking in this budget debate at funding for research in coal development and other research funds for domestic energy supplies. The Energy Department has proposed severe cuts but I believe we can restore funds in this area to continue vital research and do so within reasonable budget guidelines.

These are among the modest, workable energy goals that we can secure in this budget and that will help to protect our economy and our Nation against a disastrous energy future.

Several years ago, Sheik Yamani, Saudi Arabia's oil minister, told a group of Texas oil executives that it was his plan to work with his brethren in OPEC to hold down the world market price long enough so that this country would be deterred from its development of alternate fuels. He knew back then that if America planned carefully, developed its available oil and natural gas resources, planned for its development of alternate fuels to use coal and oil shale, and combined that with conservation that OPEC would have lost its market position forever.

We cannot fall into that trap. Let us strive to meet these and other energy goals during the budget debate so that the Nation is ready when—and I mean "when" and not "if"—the next real or orchestrated energy shortage comes, we are ready.●

HOUSE JOINT RESOLUTION 192

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. FORD of Michigan. Mr. Speaker, last week the Committee on Post Office and Civil Service reported out House Joint Resolution 192, which designates April 24, 1985 as a "National Day of Rememberance of Man's Inhumanity to Man." It sets aside a day of rememberance for all victims of genocide, and especially the 1.5 million Armenians who were the victims of

systematic destruction in Turkey between 1915 and 1923.

The action of the committee gave me great pleasure since I have long felt that this horrendous chapter in world history has gone little noticed except by the Armenians themselves.

At the full committee meeting I questioned the wisdom of the Department of State in objecting to this resolution because it might damage our sensitive relations with Turkey.

I feel that this is a specious argument. And if you look at the number of Holocaust-type resolutions that we have taken to the floor by unanimous consent, there was a clear danger here of opening ourselves up to accusations of discrimination in deciding what is a problem and what is not.

Just 2 weeks ago, unanimous consent was granted for a resolution condemning the Russians for actions with regard to Jewish immigration from that country.

And here we have a much different case. The genocide resolution does not condemn the Government of Turkey. It talks about people in the past. As a matter of fact, a letter I received from the State Department said:

> These resolutions seek designations of April 24 as a date of rememberance for all victims of genocide, especially Armenians who died in Turkey 70 year ago. Specifically, the events occurred in Eastern Turkey when the Ottoman Empire was in the final days of its decline and before the modern-day Republic of Turkey was established.

So I fail to see the point of the State Department's objection.

Just a few days ago the President addressed several groups in Europe and pointed out repeatedly that it is not our policy to hold the present Republic of West Germany responsible for the activities of their predecessors when Germany was a totalitarian state under the rule of the Nazis.

After receiving the State Department letter I carefully reread the resolution to see if it said anything about the Government of Turkey. It does not. It talks about incidents and circumstances.

I find it very difficult to explain to the people who are survivors of this bloody era and the survivors of families that were wiped out that we in this country recognize the mass murders of some people as genocide, but not the mass murders of others. Do we just want to shrug our shoulders and say it is something that happened a long time ago and we should simply forget it?

While there were fewer Armenians killed in that genocide than Jews in the Holocaust, in terms of total populations the figure is proportionately higher. Virtually the whole Christian population of an entire country was annihilated. Their only crime was that they were Christians in a Moslem country.

We have a chance to speak now and say the things that should have been said long ago: that it is against all that America stands for when people turn against their own in a national orgy of bloodletting just because they don't like the religion they practice or the church they go to.

For my part, I cannot agree with the argument that, because we are dealing with a different government today which is part of NATO, we should do nothing now lest it offend that new government.

I find that thinking especially difficult to accept in light of the President's recent remarks in Europe regarding the Holocaust. There are simply too many parallels. Are we saying that we can openly and strongly condemn the Germans' inhumanity toward the Jews during World War II and still expect our friendship with the West Germans to survive, but we cannot condemn what a previous government in Turkey did to a million and a half Armenians out of fear it will damage our relationship?

What kind of tortured reasoning is this?

What must be kept in mind is that in this resolution we are not attacking the present Turkish Government. We are not condemning the brave Turkish soldiers who fought on our side in Korea. We are only calling attention to a horror of many decades ago in some small hope that this simple remembrance will serve as a reminder for the future.●

NEW LEGISLATION TO CLARIFY VOTING RIGHTS OF PERSONS ACCUSED OF CRIMES

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. CONYERS. Mr. Speaker, the right of qualified persons to register to vote is of fundamental importance to our American system of government. However, for certain categories of offenders, that right is very often ignored because of the erroneous belief that everyone who goes to jail is disenfranchised. The U.S. Supreme Court, in 1974, ruled in O'Brien versus Skinner that:

> Persons who are incarcerated as convicted misdemeanants or pretrial detainees unable to make bail who are under no voting disability under state law are entitled to vote by absentee ballot.

Rarely do these persons exercise their voting rights because, oftentimes, they and corrections officials are unaware of what the law provides. A Washington-based prisoners' rights group recently registered 7,000 pretrail detainees, misdemeanants, and persons appealing their conviction. Still, an estimated 300,000 men and women in custody remain unaware of their right to vote. This is an intolerable situation, the resolution of which is essential to the full enjoyment of voting rights.

Today, I have introduced a House concurrent resolution expressing the sense of the Congress that: First, all State constitutions and county and city charters be clearly amended to reflect the right of all pretrial detainees, convicted misdemeanants, and persons appealing a felony conviction to register and vote; second, the opportunity to register and vote be made available to all qualified offenders in our jails and prisons; and, third, probation and parole officials consider voting participation to be a positive rehabilitative factor when evaluating the offenders under supervision.

I invite my colleagues to join me as cosponsors of this legislation, the complete text of which is as follows:

H. CON. RES. 148

Whereas, the population of pretrial detainees, convicted misdemeanants, and persons appealing their felony convictions should have the right to register and vote; and

Whereas, such population does not exercise this right because they are generally unaware of their rights and because registration and voting is not usually made available to them; and

Whereas, the denial of the right to vote violates the due process and equal protection rights of those who have not been found guilty of felonies and those whose felony convictions are being appealed: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that—

(1) all State constitutions and county and city charters should reflect the right of the population of pretrial detainees, convicted misdemeanants, and persons appealing their felony convictions, to register and to vote;

(2) all Federal, State, county, and city registrars of voters should provide adequate voter registration accessibility to such population during intake processing (booking), while in the general jail or prison population, and during release, discharge, or transfer;

(3) election officials should provide adequate voting accessibility to the such population in the form of voting booths and absentee ballots at each election;

(4) Federal, State, county and city corrections, parole, and probation officials should accept and encourage the positive rehabilitative value of voter registration and voting, and give fair consideration to acceptance of these civic responsibilities in probation and parole determinations; and

(5) prisoners rights, community, voter education, and political organizations should be encouraged to provide voter education to pretrial detainees, convicted misdemeanants, and persons appealing their felony convictions.●

RAILROAD RETIREMENT ACT AMENDMENTS

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. OBERSTAR. Mr. Speaker, the Railroad Retirement Act was once model legislation for this Nation. Many of the retirement income protections of ERISA, enacted in 1974, have been a part of the Railroad Retirement Act since 1937.

Spouses and widows of workers retiring directly from railroad employment have been assured of pensions since the mid-1940's. In this regard, the Railroad Retirement Act is still ahead of other law since the Retirement Equity Act of last year only assured widows they wouldn't be surprised to learn that their pension rights had been signed away.

To finance these provisions, railroad workers contribute an amount identical to FICA taxes paid by everyone who works in employment covered by Social Security. In addition, railroad workers contribute to the railroad retirement trust fund from which the private pension portion of their annuities are paid. Through the financial interchange, FICA taxes paid by railroad workers are credited to Social Security trust funds and then credited back to the railroad's social security equivalent trust fund for payment of tier I railroad retirement benefits.

In spite of the fact that Social Security equivalent benefits for railroad retirees, their dependents and survivors must now be deposited into the equivalent account, limitations in the Railroad Retirement Act, in many instances, prohibit the payment of these benefits. Railroad workers pay for these benefits, they should receive them.

Measures I have introduced in past years have eliminated some of the most serious disparities in the law. As a result, benefits are being paid to separated spouses, dependent parents, divorced spouses and remarried widows of railroad workers. But many more changes need to be made to bring the Railroad Retirement Act into closer conformity with laws protecting other workers in our economy.

I am today introducing the following bills which are being cosponsored in the Senate by Senator JOHN HEINZ and I urge my colleagues to join me in working for their enactment.

SURVIVORS' BENEFIT FOR RETIREES WITHOUT A CURRENT CONNECTION

Under the Railroad Retirement Act, an employee who works in railroad employment for 120 months or more is vested for life. Upon retirement, he is eligible for a tier I benefit computed on the basis of lifetime wages whether in railroad employment or employment covered by the Social Security Act. He is also eligible for a tier II benefit based on years of railroad employment. The worker's retirement-age spouse is eligible for 50 percent of tier I and 45 percent of tier II. Upon the death of the worker who retires directly from railroad employment, the surviving spouse is entitled to 100 percent of a tier I benefit and 50 percent of a tier II benefit. The survivor's tier I benefit is paid from the Social Security equivalent account; the tier II benefit is paid from the railroad retirement account.

If the worker leaves railroad employment after becoming vested but before reaching retirement age and works in nonrailroad employment, he is said to have lost his "current connection" with the railroad. Upon his death, his lifetime wage history is transferred to the Social Security Administration for payment of a Social Security survivor benefit. No tier II survivor's benefit is ever payable.

H.R. 2508 brings the Railroad Retirement Act into line with ERISA and the 1984 Retirement Equity Act by providing:

First, widows of noncurrent connected workers who die before retirement age will be paid both a tier I and a tier II benefit by the Railroad Retirement Board.

Second, all noncurrent connected survivors will be eligible for survivors benefits. This entitlement will be financed by reducing noncurrent connected retiree and spouse benefits in an amount sufficient to finance benefits to survivors.

Third, consent of both the retiree and spouse will be required to waive survivor benefits.

Fourth, the Railroad Retirement Board will retain jurisdiction for payment of all surviving spouse benefits on the wage records of deceased, noncurrent connected workers.

Fifth, amendments will apply to workers and retirees whose deaths occur on or after date of enactment.

LAST PERSON SERVICE

The Railroad Retirement Act provides that neither tier I nor tier II retirement benefits can be paid until a work relationship with a last employer is severed. Individuals who wish to remain in the work force may change employment and receive both tier I and tier II benefits, though tier I entitlement would be reduced by excess earnings in the same manner and same amount as would occur under the Social Security Act. No benefits can be paid, however, if a worker chooses to stay with a current employer even on a part-time basis. This requirement to sever current employment applies not only to workers retiring directly from the railroad, but also to spouses, divorced spouses, and workers who may have left railroad service years earlier. It has its most serious impact on divorced spouses who might not be able to afford to completely leave the labor market.

H.R. 2509 provides that a tier I benefit, subject to the earnings limitations of the Social Security Act, will be payable to any eligible individual without regard to the last person service rule. Since this benefit will be paid from the Social Security equivalent account, it will have no impact on the railroad retirement account.

DIVORCED SPOUSE

The Social Security Act of 1983 provided divorced spouses the option of retiring at age 62 if their former spouses were eligible to retire. Under prior law, benefits could not be paid until the former spouses had actually left the work force. The 1981 Railroad Retirement Act Amendments authorized payment of a benefit to divorced railroad spouses equal to that which would be paid under the Social Security Act. The Railroad Retirement Act, however, still specifies that the railroad worker spouse must have filed an application for retirement benefits before the divorced spouse is eligible.

H.R. 2510 removes the requirement that the railroad worker file for benefits before his former spouse is eligible to file for and receive a tier I benefit.

CURRENT CONNECTION

Legislation I sponsored, enacted in modified form in 1981, provided that a worker who left railroad employment after more than 25 years of service would not lose his "current connection" with the railroad unless he was released for cause, failed to accept a valid offer of reemployment, or left voluntarily. For purposes of this section of the law, acceptance of severance pay was to be interpreted as voluntary separation.

Since 1981, the railroads have suffered a severe recession. Employment dropped precipitously between 1981 and 1983. Many workers with 30 or more years of service accepted severance pay and left railroad service with the understanding that they were entitled to file for unreduced railroad retirement benefits at age 60. The Railroad Retirement Solvency Act of 1983 altered the benefit computation formula by imposing a 20-percent reduction on tier I benefits for workers retiring before age 62. Workers who would otherwise choose to reenter the work force and defer retirement until age 62 are precluded from doing so as accepting nonrailroad employment will cause forfeiture of tier II survivors' benefits to their widows.

H.R. 2511 removes the limitations of present law. Workers with 25 or more years of railroad service would not longer lose a current connection by working for a nonrailroad employer after leaving railroad employment.

DISABLED WORKERS, MONTHLY AND ANNUAL WORK TEST

Railroad workers who are retired on disability, who wish to attempt to return to the work force, are subjected to a monthly earnings limitation of $200. One penny in earnings over that amount causes a forfeiture of all disability retirement benefits in the month of excess earnings. Similarly, annual earnings in excess of $2,400 cause a loss of 1 month's benefits for each $200 over the annual amount. The final increment of excess earnings over $2,400, if greater than $100, will cause a loss of 1 month's benefits.

H.R. 2512 increases the monthly disability earnings limit to $400 after deduction of disability related work expenses and the annual earnings test to $4,800 after deduction of disability related work expenses. One month's benefits will be withheld for each $400 over the earnings limitation. A final increment of $200 or more will cause a loss of 1 month's benefits.

DISABLED WORKERS, TRIAL WORK PERIOD

Under the Social Security Act, disabled workers who have not recovered from their disabilities, but nevertheless attempt to return to some type of gainful employment, are entitled to a trial work period of up to 9 months. Full disability benefits are paid throughout the trial period and for an additional 3 months.

Disabled railroad workers are subject to a loss of benefits from the first month of a return to the work force.

H.R. 2513 provides that a railroad retirement tier I benefit will be payable without regard to the disability earnings limitation during a trial work period if, in identical circumstances, a Social Security benefits would be payable. This benefit would be paid from the Social Security equivalent account.

DISABLED SPOUSES OF ANNUITANTS

Spouses of annuitants are entitled to benefits upon reaching retirement age. Younger spouses, who are not caring for young children, are expected to be able to enter the work force. This expectation is unrealistic if the spouse is so severely disabled as to be unable to engage in any substantial gainful activity.

H.R. 2514 provides an unreduced benefit, regardless of age or child in care, to a disabled spouse of a railroad worker in receipt of retirement or disability benefits. The bill also provides a benefit to the spouse of an annuitant who is so disabled as to require constant aid and attendance. H.R. 560 and H.R. 562, introduced January 22, 1985, would similarly amend the Social Security Act.

YEARS OF CREDIT FOR MILITARY SERVICE

Railroad Retirement credit for military service is limited to workers who are involuntarily inducted or who enlist after war is declared. As a result, railroad workers who enlisted in the Armed Forces between World War II and the Korean conflict and subsequently returned to railroad employment are denied retirement credit, whether or not they actually served in combat. Had they worked for the Federal Government or any other private employer in the Nation, Federal law would have required the crediting of military service. The same disparity in treatment under Federal law applies to all workers who left railroad employment, entered military service after December 31, 1976, and returned to railroad service after discharge. At the same time, there is no limit on the number of years of military service which can be credited toward railroad retirement as long as the worker entered military service and reenlisted during a period recognized as "wartime service."

H.R. 2515 removes the requirement that workers must have been involuntarily inducted or enlisted during wartime in order to receive railroad retirement credit for a period of military service. The bill also limits the period of military service for which retirement credit must be given to the period of time—generally 4 years—which must be credited by any other employer under provisions of veterans' reemployment rights laws. This limitation of creditable service applies only to persons who return from military service to railroad employment after the date of enactment of the bill.

UNEMPLOYMENT INSURANCE AND SICKNESS BENEFITS

The Railroad Unemployment Insurance Act requires that unemployment or sickness benefits be reduced dollar for dollar by any "other social insurance" the railroad worker is receiving. "Social insurance" as defined by the courts includes disability or retirement programs from any level of government. It also includes workers' compensation or veterans' compensation paid on the basis of injuries or disabilities resulting in a loss of wage earning ability. As a result, railroad workers in receipt of "social insurance" payments from nonrailroad employment have little or no unemployment or sickness insurance protection against loss of their railroad wages.

The Railroad Unemployment Insurance Committee, in its 1984 report, supported enactment of legislation to remove this offset and bring the Railroad Unemployment and Sickness Benefits Program into line with the State and Federal unemployment insurance programs protecting other workers in the Nation.

H.R. 2516 amends the Railroad Unemployment Insurance Act to provide that unemployment benefits and sickness benefits of railroad employees will not be reduced by reason of the receipt of unrelated social insurance benefits.●

AMTRAK MYTHS, AMTRAK FACTS

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. KOSTMAYER. Mr. Speaker, one of the major budget battles looming ahead will be over Amtrak. The administration has targeted Amtrak for extinction; many of us in the Congress believe we need rail passenger service in this country.

The administration has been guilty in the case of Amtrak, Mr. Speaker, of hyperbole and exaggeration. The facts are Amtrak is indeed on the right track, and the subsidies it receives are quite modest considering the number of riders, and the number of communities dependent on Amtrak service.

Neil Peirce, the widely respected journalist, recently wrote a column about the Amtrak controversy. Mr. Peirce notes the adverse economic effects which would result from the loss of Amtrak service.

I commend this article to my colleagues, Mr. Speaker, and insert it at this point in the RECORD:

FIGHT TO SAVE AMTRAK PUTS SMALL, BIG CITIES ON SAME TRACK

(By Neal R. Peirce)

If ever there was an issue on which the needs of small and big city people were on the same track, it's this spring's Capitol Hill battle to save Amtrak from the zero funding, and almost sure death, advocated by Ronald Reagan and David Stockman.

All taxpayers should question the fishy math behind the administration argument that $684 million a year could be saved by killing off the nation's railpassenger network. Lengthy layoff wages for railway workers, mandated by Congress years ago, would cost at least $600 million next year and over $2 billion in six years—without a single passenger transported anywhere.

The shutdown costs might be worth it if Amtrak were throwing good money after bad. But the system has won substantial labor concessions. Its shucked off many lightly used routes. Its invested $2 billion in the Northeast corridor highspeed track and over $1 billion in equipment. Fares paid only 43 percent of costs six years ago, but should reach 60 percent next year. The fact that Amtrak requires subsidies is hardly shameful; so do national rail systems across the globe.

Ultimately, the issue is people and communities. Small cities and towns constitute the vast majority of Amtrak's 513 station stops. As many as 160, most in the South and West, would be left devoid of passenger service—rail, bus or air—by Amtrak's demise.

Stockman says Amtrak subsidizes "well-heeled" Americans. Some are. But Amtrak riders outside of big commuter markets have average family incomes of less than $20,000. Many are youths or retirees. Observes travel writer George Bradford: "Nobody who ever walked, at night, through the passenger coaches of the Crescent to New Orleans, the Silver Star to Florida, or Broadway Limited to Chicago could con-

vince me that those were the rich and middle class sprawled across seats, trying to keep the kids quite, and shifting around while attempting to sleep until their luxurious arrivals at 2:20 a.m. in Charlotte, N.C., or 2:51 a.m. in Canton, Ohio."

For subsidy elimination, Stockman is on much sounder ground in urging speedup of the scheduled 1988 ending of the government's "Essential Air Service" program. Some $44 million will be spent this year to underwrite service to 146 towns—such as Great Bend, Kan., Oil City-Franklin, Pa., and Stillwater, Okla. But most air travelers are more affluent (many are on business trips) and could easily drive to bigger air transit hubs in their states.

Where Amtrak does have proportionately more affluent passengers is in its heavily used Boston-to-Washington corridor. It carries 10 million passengers, mostly commuters, into New York, Philadelphia, Boston and Washington, each year. Other heavy commuter markets are Chicago-Milwaukee and Los Angeles-San Diego.

Eliminating Amtrak would have dire effects on highways and airports in the densely used corridors. The 83,000 daily rail commuters from New Jersey into New York would be forced into private cars or buses. With more people training than flying between Washington and New York, already clogged airports would face horrendous traffic increases: 50 flights a day more would be required into Philadelphia alone.

One suggestion has been to preserve Northeast corridor service, and perhaps one or two other heavily used markets, and let the rest of Amtrak die. The solution doesn't wash, says Amtrak President W. Graham Claytor. It would immediately trigger labor-protection liabilities of $1 billion or more: "We don't have money to pay that. We'd be insolvent even then."

Could states and cities shoulder the bill? Only, one guesses, by an interstate compact that it would likely take a decade to negotiate. State legislatures would be caught in endless wrangles between areas benefited and those not. Cities, already facing revenue sharing and mass-transit subsidy loss, wouldn't have the means.

Could Amtrak ever be profitable, or be sold to private owners? Given world experience, probably not. But Congress could help by fashioning labor law to encourage more efficient operations. And if Amtrak's subsidy is to be ended, would Congress also end the billions of federal funds going into air-traffic control and maintenance and revenue bonds for airports? The gravy train doesn't stop at the rail station. For the really big subsidy bucks, go to the airport and ask Delta, Eastern or United how much they'd like to pay the full bill for the facilities they use.

Another point for Amtrak: The national economy would hardly benefit by death of a corporation with 25,000 workers and a $2 billion budget. But the ultimate argument isn't economic. It's that a system its enemies call a nostalgic anachronism is part of the soul of America. Once killed, it would be exceedingly difficult—perhaps impossible—to revive.

The rails carry us over routes by which many of our ancestors first discovered and traveled this land. They are a national treasure, like national parks. Like parks, they require subsidy. To run them inefficiently is intolerable. To extinguish them would be unthinkable.●

H.R. 2528

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. STARK. Mr. Speaker, today, I am introducing H.R. 2528, a bill designed to eliminate the unintended application of the minimum tax to startup high technology companies on their R&D expenditures. Recently, it has come to light that startup high technology companies may face unexpected tax liabilities under the minimum tax due to a tax law change made in 1982.

In TEFRA, research and development expenditures became a tax preference item for individuals, including shareholders of Sub S corporations and members of partnerships. Although corporations were exempted generally, these expenditures were made a tax preference for personal holding companies.

While no one considers active companies to be personal holding companies [PHC's], many high technology companies in the startup and developmental stages of their business technically fit the definition of a PHC during the period before product sales begin. This result can occur when a company is closely held and has largely passive sources of income, such as interest earned on the venture capital that has been raised. In this situation, operating expenses and other deductions, including research and development expenses, produce a net operating loss [NOL] carryforward to future years.

For affected companies, in future years when the NOL is used against operating profits, such companies will also have to pay a minimum tax liability on 90 percent of the R&D expensed under IRC section 174(a) in the year(s) the NOL arose. Ironically, the company would not be subject to the PHC tax in the earlier year since it had no taxable income, and it would not be a PHC in the later year when it had substantial operating income.

It does not appear that the tax writing committees or the Congress understood or anticipated this effect of the 1982 act provision. The personal holding company rules have not been reviewed in many years and their application to high technology companies has only recently come to our attention.

This bill, as a first step, would provide that R&D expenses are not to be considered a tax preference item for personal holding companies. This change would be effective for tax years beginning after December 31, 1982, to ensure that the affected startup companies will not have any unwarranted tax liabilities under the minimum tax to pay out of their first profits.

I am hopeful for a quick resolution of this problem. I expect the bill to be noncontroversial and to have a wide base of congressional support.

The text of the bill follows:

H.R. 2528

A bill to amend the Internal Revenue Code of 1954 to provide that research and experimental expenditures of corporations, including personal holding companies, shall not be treated as items of tax preference for purposes of the mimimum tax

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the last sentence of section 57(a) of the Internal Revenue Code of 1954 (defining items of tax preference) is amended by inserting before the period at the end thereof the following: "and paragraph (6) to the extent it relates to the deduction under section 174(a) also shall not apply to a personal holding company (as so defined)".

(b) The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1982.●

THE 150TH ANNIVERSARY OF THE CITY OF SONOMA, CA

HON. BARBARA BOXER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mrs. BOXER. Mr. Speaker, I am happy to rise today to honor an important occasion in California history. One-hundred-and-fifty years ago this June the Mexican Governor of Alta California directed the establishment of a Presidio and Pueblo in the Valley of Sonoma. This settlement came to be known as the city of Sonoma. This city of rich heritage is celebrating its sesquicentennial in June 21 through June 24, 1985. In honor of this occasion, I ask that the following proclamation, issued by the mayor of Sonoma, be published in full in the CONGRESSIONAL RECORD.

Whereas, Sonoma, in the Valley of the Moon, was originally a mission settlement, the last in the chain of 21 missions beginning in San Diego and going north along the coast of California; and

Whereas, the founding of the Sonoma Mission on July 4, 1823 was the only one established under the Republic of Mexico; and

Whereas, this Mission was flourishing during its first decade of existence; and

Whereas, during this time the Russian settlements at Fort Ross and Bodega were also flourishing; and

Whereas, the Mexican Governor of Alta California had growing concerns of further Russian expansion in this Northern Frontier territory of the Republic of Mexico; and

Whereas, the Mexican Government desired to curb this expansion and demonstrate this by settling the area; and

Whereas, Governor Figueora having confidence and trust in the Commandant of the Presidio of San Francisco, Mariano Guadalupe Vallejo; and

Whereas, on June 24, 1835 the Governor sent a letter to the Commandant directing him to establish a Presidio and Pueblo in the Valley of Sonoma adjacent to the Mission San Francisco Solano.

Now, therefore, be it resolved, that it was 150 years ago that this formal direction was given by the Government of Mexico to Mariano Guadalupe Vallejo; and

Be it further resolved, that the present City of Sonoma as successor to the original Pueblo of Sonoma, desires to appropriately celebrate this 150th Anniversary; and

Be it further resolved, that it is not only fitting and proper but necessary to cherish and perpetuate the history, tradition and heritage that is ours as residents of the City of Sonoma; and

Be is finally resolved, that the Mayor and City Council of the City of Sonoma invites and urges its citizens and friends to participate and celebrate in the festivities honoring our Sesquicentennial.

JEANNE M. MARKSON, *Mayor.*●

THE 4-YEAR TERM: TIME FOR RECONSIDERATION

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. O'BRIEN. Mr. Speaker, it has been 19 years since this body considered a constitutional question which has been around since the founding of our Republic; namely, "should the length of terms of office for Members of the House of Representatives be extended?"

The House Judiciary Committee held hearings on this subject in 1966 and 1967. The other body held hearings on this and related subjects in 1979.

The role of the House of Representatives has changed drastically in the 200 years since the first Congress. In 1787 the relatively primitive stages of communication and travel made a 2-year term necessary in order to keep a Member from becoming too independent from the citizens of his district. However, modern technological advancements have caused this argument to lose its efficacy. A Member can easily and effectively keep in touch with the viewpoints and opinions of his constituents through modern communication, public opinion polls and the media. Additionally, Mr. Speaker, in response to the changing character of the House and the society, our institution has provided means, and effective means, for each Member to stay in touch with his or her constituency.

The modern House of Representatives a continuous and professional work organization and institution which deals with highly complex issues. A 4-year term would allow a reasonably sufficient period of time I which to gain and apply the expertise necessary to deal with problems which can only become more complex.

Most observers agree that the power of the House of Representatives has been eroded over the years and that real power resides in the executive branch and with the courts. We have no one to blame but ourselves for this state of affairs. In an era of million dollar political campaigns, there is a practical reason why members do not relish the assumption of new powers and duties, and that is, simply, that Members must spend an inordinate amount of time on the process of reelection.

In my view, the Nation would be better served if some of the time and attention that goes into campaigning were focused instead on oversight and control of the bureaucracies we have created. I am convinced that if just some of the campaign pressure were lifted from Members, the quality of legislation would improve.

There is an assumption on the part of most Members that they know the arguments, for and against, the proposition to extend the terms of office. However, in order to bring the debate up to date, and to reconsider all the ramifications of making such a change in the Constitution, it is vital that the House Judiciary Committee conduct a thorough hearing and investigation.

It appears that many Members agree with the concept of extending the length of terms, but falter when suggesting a methodology that is comprehensive, fair, and would stand a reasonable chance of approval by two-thirds of the membership of each House of the Congress and three-fourths of the 50 State legislatures.

Thus far in my examination of the various proposals to lengthen the terms of House Members, I have discovered enough complications and variations to keep a platoon of political scientists busy for decades. The process of reforming the system whereby we elect Members of the House must, of necessity, be as uncomplicated as the present system. It it is not, then I fear there is little possibility that this House, or the other body, or the State legislatures, or the people, would ever subscribe to the concept.

The first complication is the decennial census. Somehow or other, we must make provision for the reapportionment of the House based on the census. If one can devise a new and simple system that takes the census into account, then one runs into the variations. Shall we have classes of Members like the Senate? Shall we have two classes or Members, or three, or four classes of Members? How do we provide for an equal distribution of the first apportionment? How do we make sure that all State delegations are provided for equally? These are but some of the questions that face the reformer.

The art of politics is compromise as we learn here every day. Accordingly, I am compromising with the principle of term extension to the extent that my legislation provides for a term of 2 years and two terms of 4 years each in the 10-year cycle.

Assuming this legislation were passed by the Congress and approved by the States within the next 5 years, the term-extension begins with the election of 1990.

The elections of 1990 would be for terms of 2 years each. The calendar years served would be 1991 and 1992. The actual service period would be from January 3, 1991 through January 2, 1993.

The elections of 1992 would be for terms of 4 years each. The calendar years served would be 1993, 1994, 1995, and 1996. The actual service period would be from January 3, 1993 through January 2, 1997.

The elections of 1996 would be for terms of 4 years each. The calendar years served would be 1997, 1998, 1999, and 2000. The actual service period would be from January 3, 1997 through January 2, 2001.

The cycle would begin again with elections of the year 2000. The elections of 2000 would be for terms of 2 years each; the elections of 2002 would be for terms of 4 years each; and the elections of 2006 would be for terms of 4 years each. And, the cycle would began again: The elections of 2010 would be for terms of 2 years each; the elections of 2012 would be for terms of 4 years each; and the elections of 2016 would be for terms of 4 years each.

Mr. Speaker, at this point, I have provided a 60-year chart of the elections under my proposal:

ELECTION YEARS, CALENDAR YEARS, TERMS OF SERVICE

Election year	Calendar years served	Term of service
1990	1991, 1992	1/3/1991–1/2/1993
1992	1993, 1994, 1995, 1996	1/3/1993–1/2/1997
1996	1997, 1998, 1999, 2000	1/3/1997–1/2/2001
2000	2001, 2002	1/3/2001–1/2/2003
2002	2003, 2004, 2005, 2006	1/3/2003–1/2/2007
2006	2007, 2008, 2009, 2010	1/3/2007–1/2/2011
2010	2011, 2012	1/3/2011–1/2/2013
2012	2013, 2014, 2015, 2016	1/3/2013–1/2/2017
2016	2017, 2018, 2019, 2020	1/3/2017–1/2/2021
2020	2021, 2022	1/3/2021–1/2/2023
2022	2023, 2024, 2025, 2026	1/3/2023–1/2/2027
2026	2027, 2028, 2029, 2030	1/3/2027–1/2/2031
2030	2031, 2032	1/3/2031–1/2/2033
2032	2033, 2034, 2035, 2036	1/3/2033–1/2/2037
2036	2037, 2038, 2039, 2040	1/3/2041–1/2/2041
2040	2041, 2042	1/3/2041–1/2/2043
2042	2043, 2044, 2045, 2046	1/3/2043–1/2/2047
2046	2047, 2048, 2049, 2050	1/3/2047–1/2/2051

Mr. Speaker, I believe the proposal meets the critical needs of this institution. I believe that my proposal also meets the test of simplicity and understandability which is absolutely vital if we are to sell this reform to the American people.

I commend this proposal to my colleagues and the members of the House Judiciary Committee and, naturally,

extend an invitation to other Members to join me in cosponsorhip.

A copy of the proposed legislation is appended to these remarks.

"JOINT RESOLUTION

"To propose an amendment to the Constitution of the United States to provide for terms of two and four years for Members of the House of Representatives.

"Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution if ratified by the legislature of three-fourths of the several States with the five-year period following the date of its submission to the States for ratification:

"ARTICLE

"SECTION 1. The terms of Members of the House of Representatives who are elected in any year ending with a zero shall be two years. The terms of Members of the House who are elected in any year ending in a two or a six shall be four years. Terms of Members shall commence at noon on the third day of January of the year following the year in which they were elected to office.

"SEC. 2. No Member of the House of Representatives shall be eligible for election to the Senate for a term which is to begin before the expiration of the House term of such Member unless at least thirty days prior to such election such Member submits a resignation from the House that is effective not later than the beginning of such Senate term.

"SEC. 3. Any person who is a candidate for election to one House of the Congress under the laws of the State where such person resides shall not be eligible for election to the other House of the Congress.

"SEC. 4. This article shall apply to any election held during or after the year 1992."●

OFFICIOUS INTERMEDDLERS

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. EDWARDS of California. Mr. Speaker, the Reagan administration is attempting to reopen over 50 settled public employment discrimination cases to eliminate agreed upon affirmative action plans. This attempt flies in the face of local community sentiment. Officials in Boston, Chicago, Philadelphia, Miami, Los Angeles, San Francisco, Indianapolis, and Birmingham, among others, have told the Justice Department to stop meddling in their local affairs.

Mr. Speaker, I find it a bitter irony that the Reagan administration's usual litany against "interference from Washington" is seldom heard in civil rights matters. Instead, the Justice Department has its own affirmative action plan to roll back our society to a time when racism was accepted and segregation was the law.

The following Washington Post editorial, I believe, will be of interest to our colleagues:

[The Washington Post, May 8, 1985]

THE MEDDLERS

The administration abhors heavyhanded federal intervention in local affairs—except on some issues. In Indianapolis the Justice Department is now intervening in the most delicate of local matters, the racial composition of the police and fire departments. Over the objections of the city's Republican mayor, it is asking a federal court to order the rewriting of a 1978 consent decree in which the city pledged to raise "the black composition" of the two public safety departments until their makeup "more nearly reflects the racial composition of the work force of the city." To accomplish that, the city agreed to reserve for "qualified black applicants" for as long as necessary at least 25 percent of the places in "all future police and fire training classes." A similar consent decree was entered in 1979 affecting women; the Justice Department is also attacking that.

The department is acting on the basis of a Supreme Court decision last year in a Memphis firefighters case. The assistant attorney general for civil rights, William Bradford Reynolds, contends that the court in this case outlawed all affirmative action plans containing explicit numerical goals. His view of the case is sharply disputed. The issue in Memphis was layoffs—whether race could be given more weight than seniority in deciding whom to keep and whom to let go at a time of retrenchment. The court said seniority should govern. But seniority rights have a special place in the law, and civil rights groups say the court did not mean its decision to extend to such other areas of affirmative action as hiring and promotion. Some federal courts have also taken this view since the Supreme Court spoke.

Mr. Reynolds sees a principle at stake. He believes the law should be colorblind. There are good arguments to make on this account in certain cases, and not everything ever undertaken in the name of affirmative action is right. But the Supreme Court itself has said that race can be taken into account in overcoming the effects of past discrimination, and Indianapolis is no great symbol or path breaker in the affirmative-action debate. Its mayor, William H. Hudnut III, says its police and firefighters hiring plan was working peacefully and well, and "if we want a higher standard of hiring than what the Justice Department requires, I don't understand why they can't let us do that." Blacks make up about 18 percent of Indianapolis' work force. When Mayor Hudnut took office in 1976, they made up about 10 and 8 percent of the police and fire departments, respectively. Those figures are now 14 and 13 percent.

Officials in this administration sometimes voice astonishment that their record is viewed as anti-black and anti-civil rights. If they genuinely wonder at this, they should look to Indianapolis. It's not just that the department is on the wrong side—which we think it is. The department under Mr. Reynolds is trying to make law on affirmative action—to force its view of the law on the country in advance of the courts. It is welcome to do that in future cases, to argue for whatever result it pleases. But to reopen settled cases on such a weak basis is to threaten social peace for the sake of ideology. The Justice Department should go home.●

"NEW" SS WREATHS, OLD ANTI-SEMITISM

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. GREEN. Mr. Speaker, I would like to share with my colleagues the following article by Marvin Kalb which appeared in the New York Times on May 14, 1985.

The article's message speaks for itself; the lessons of the Holocaust have not been learned.

The article follows:

[From the New York Times, May 14, 1985]

"NEW" SS WREATHS, OLD ANTI-SEMITISM

(By Marvin Kalb)

WASHINGTON.—The controversy over the Reagan visit to Bitburg is receding, no longer a front-page embarrassment. But do you hear an echo from the past?

I visited the cemetery the morning after President Reagan and Chancellor Helmut Kohl placed wreaths of reconciliation in front of its chapel. For years, the cemetery had been largely ignored; now, it was an instant shrine, a focus of political debate. Small flower pots marked many flat graves, 40 of them honoring Waffen SS troops. By the end of my visit, many hundreds of Germans and occasional Americans from the nearby Air Force base paused before the wreaths. Some took pictures. Mothers hushed children. A religious air seemed to saturate the scene.

But look and listen: all around there were the sights and sounds of the new Germany—and old. Six feet to the left of the President's wreath stood an equally impressive one. Across its banner: "To the Waffen SS who fell at Leningrad." No more than a foot to the right of the Chancellor's was another wreath: "For the fallen comrades of the Waffen SS."

These two wreaths had been placed in the chapel, out of sight, hours before the President arrived. They were restored to their original places of honor only hours after he left. In the ensuing tranquility, the Waffen SS could again be honored in the springtime sun.

A middle-aged visitor from Nuremberg said the Waffen SS were simply soldiers—young conscripts doing their duty. "Let them rest in peace. For us, a dead soldier is a dead soldier, not a hero."

A native of Bitburg, who looked to be in his 20's, expressed a view I was to hear with disturbing regularity. "We Germans and Americans had been cooperating very well"—he lowered his voice—"until the Jews began to make trouble."

Another Bitburger zeroed in on Elie Wiesel. "Imagine the nerve of a Jew lecturing President Reagan. I saw him on television, making trouble the way they all do."

An old woman complained that Mr. Reagan had spent only eight minutes at the cemetery. "You know why the visit had to be cut back? Because of the Jews." She stalked away to join a group of friends nodding in agreement.

A man with a cane stopped and said: "If they don't like it here, the Jews, let them go away. We were better off without them in Germany." There are only 28,000 left, he was reminded. "Too many," he replied.

The people of Bitburg are pleased that Mr. Reagan came to visit, that he didn't yield to pressure. But it's clear they resent their new notoriety—and equally clear whom they consider responsible for the unwelcome change: the Jews and the media. The Jews are seen as a group separate from Germans and Americans—an indigestible lump, a foreign body. The media are seen as intrusive and irresponsible and, somehow, controlled by the Jews.

So it went. A few days later, a Munich newspaper editor explained that anti-Semitism is an "anthropological phenomenon" in Germany. The controversy seems only to have uncorked the venom once again. There is a sad irony. Bitburgers consider themselves remarkably enlightened. In 1933, when Hitler won a critical election, this conservative Catholic town voted overwhelmingly against him.

Is Bitburg an aberration? It is impossible to judge and dangerous to generalize. But a number of leading West German politicians and professors—several close to Mr. Kohl—think anti-Semitism was on the rise even before Bitburg. "The Jews were getting too impertinent," one politician said, citing, among other things, their opposition to West German tank sales to Saudi Arabia. "We've listened to them much too long. It's enough."

The pursuit of reconciliation by way of Bitburg has been a failure. What should have been obvious from the beginning is that reconciliation is a long process—not a single photo opportunity, an event, a moment frozen in time. Bitburg, exposing clumsiness and poor political judgment in Bonn and Washington, in the process lifted the scab on dark corners of recent German history. There is a time to know when to leave well enough alone.

As I entered the cemetery, I noticed a sign: "Please do not disturb the peace and rest of the dead." Too late.●

VETERANS HEALTH CARE BUDGET CANNOT BE REDUCED FURTHER

HON. G.V. (SONNY) MONTGOMERY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. MONTGOMERY. Mr. Speaker, next week the House may be making major decisions on the budget for fiscal year 1986. Many Federal programs will be affected. The decisions we must make will not be easy. We all have different priorities.

A very high priority of mine is veterans health care. I want my colleagues to fully understand the impact of any budget reductions in funds to operate the VA's health care system. Who is better able to relate the problems in the field than the people in the field?

According to the chiefs of staff at VA hospitals nationwide who responded to a recent survey, inadequate budgets are already taking their toll. More cuts in the budget will mean longer waiting lists, the turning away of certain nonservice-connected veterans, and delays in many surgical procedures.

There follows a report from the Chief of Staff at the Harry S. Truman Memorial Veterans Hospital in Columbia, MO:

HARRY S. TRUMAN
MEMORIAL VETERANS HOSPITAL,
Columbia, MO, January 31, 1985.

HOWARD H. GREEN, M.D.,
Chief of Staff (11),
VA Medical Center,
White River Junction, VT.

Subject: National Survey Questionnaire from NAVACOS.

1. We are pleased to answer the questionnaire in your letter of January 2, 1985 as we too are one of the hospitals that have been experiencing ever increasing budget deficits during the past few years. We would appreciate your sharing the comments and solutions you obtain as a result of this survey with us so that we may benefit from them at this hospital.

A. Size of hospital.—Our hospital is a 452 bed facility (54 NHCU beds).

B. Affiliated.—We are affiliated with the University of Missouri Medical Center.

C. Projected dollar deficit as of 1/1/85: (1) Personnel, $115,267; (2) All Other, $1,078,565.

D. Impact of dollar deficit:

(1) Personnel.—The deficit of $115,267 represents 5.5 FTEE based on an average annual salary of $28,1451. Our current lag time in filling selected vacancies is 8 weeks. By increasing lag time in filling selected vacancies, we can control the personnel services shortages.

(2) Supplies—the most significant shortages are in drugs, medical supplies and beneficiary travel. We are anticipating cutting outpatient visits to reduce workload and thus save in drug, medical supplies and beneficiary travel costs. We have a projected $95,000 deficit in beneficiary travel which can be eliminated by cutting 5,000 outpatient visits. However, we are planning to cut from 10,000 to 15,000 visits to bring the drug and medical supplies deficits down to a manageable level. This will be done by strictly enforcing existing law regarding stable patients, and limiting visits for non-service connected veterans.

(3) Equipment.—There are no budget deficits for 1985. FY 1984 end-of-year funding was utilized to buy required equipment. However, we are seriously considering using equipment funds to offset some of our deficit.

(4) Backlog of patient surgery.—At the present time we do not plan a backlog in this area. As stated above, we plan to cut back on outpatient visits. In the past, deficits have caused backlogging of joint prosthesis patients, and I anticipate that this will happen again in the future.

E. Solutions devised: We are in the process of implementing serveral plans aimed at decreasing existing personnel and supply deficits.

(1) Changing the refill policy in Pharmacy from 30-day to 90-day refills. While this will not save in drug and supply costs, it will offset staffing needs in Pharmacy and reduce their overtime requirements.

(2) We are also opening our own Coronary Care Unit. These services have also been provided in the past by the University of Missouri Medical Center through the Sharing Agreement.

(3) The additional funds we received at the end of FY 1984 were used exclusively to replenish inventory for high usage items and to buy required equipment. Use of funds in this manner has also reduced this year's deficit considerably.

F. Other comments:

(1) I am deeply concerned about the present level of our funding, and share Dr. Wolcott's concern about the detrimental impact on our programs. Our medical staff has given me a clear message that they intend to maintain quality of care, and do not consider lowering level of care in order to accommodate increasing numbers an alternative. This means that unless funding is increased, we will not be able to respond to the projected rise in demand.

(2) This concerns me greatly, since it will mean that we will not be able to provide for large numbers of patients who are truly indigent. The private sector does not want these non-paying people, and I am sure that it would be more expensive for society to create a new alternate system. Any physician working in the system can verify that the VA gets a bargain on its dollars.

(3) It will also deprive our training programs of needed teaching material.

(4) I cannot believe that a country with the humanitarian concerns of ours will settle for providing health care only on the basis of ability to pay.

2. The Resource Allocation Model, which bases fund allocation on weighted work units for Diagnostic Related Groups, substantiated our opinion that our budget deficits are directly related to the complexity of our patient care. Full utilizaiton of this model should alleviate some of our monetary problems.

TERRY S. HOYT, M.D.,
Chief of Staff.●

POLIO ERADICATION IN THE AMERICAS BY 1990

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. BARNES. Mr. Speaker, a war has been declared on polio in the Western Hemisphere. Yesterday, the Pan American Health Organization launched a plan to raise the immunization level of children in the hemisphere to a minimum of 80 to 85 percent by 1990, effectively wiping out polio in the Americas. Only a few years ago, such an achievement was thought to be impossible. Today, with the demonstrated effectiveness of mass immunization campaigns in Colombia and El Salvador, this hope for the children of the world can become a reality.

I want to share with my colleagues the following Washington Post account of the PAHO announcement:

HEMISPHERIC WAR ON POLIO DECLARED

With the developers of the polio vaccines looking on, the Pan American Health Organization launched a major effort yesterday to eradicate polio from all nations of the Americas by 1990.

Dr. Carlyle Guerra de Macedo, the organization's director, outlined a five-year, $100 million program to raise the immunization level of children in all countries of the hemisphere to at least 80-85 percent. This,

officials said, should wipe out the disease in the New World.

Guerra de Macedo said one-third of the amount needed to eliminate polio in the hemisphere will come from donations from wealthier nations and institutions, and the remainder from the tropical and subtropical countries at which the effort is mainly aimed.

There were 489 cases of polio reported in 10 countries in the Western Hemisphere last year, but Dr. Albert Sabin, who developed the live-virus polio vaccine, said the actual number of cases may be 10 times as great.

Guerra de Macedo said 4 million children born every year in the Americas still are not vaccinated against polio and other serious childhood diseases.

Polio reached a peak in the United States in 1952 when it left 57,628 people paralyzed. Seven cases were reported in the nation last year.●

UNITED STATES-JAPAN TRADE IMBALANCE

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington report for Wednesday, May 15, 1985, into the CONGRESSIONAL RECORD:

THE UNITED STATES-JAPAN TRADE IMBALANCE

The sudden outpouring of anti-Japanese sentiment in Congress is the result of surging public resentment over the U.S. trade imbalance. Last year our trade deficit rose to $123.3 billion, $50 billion more than the previous record deficit in 1983. $37.6 billion of the deficit was with Japan. By 1990 it could be $87 billion.

For many Americans, the deficit with Japan has become a focal point of U.S. trade problems. Japanese economic success is seen as undermining our economic recovery. Anti-Japanese rhetoric in some circles is more extreme now than at any time since World War II. For 20 years Washington tried everything: mandatory textile quotas, voluntary restraints on automobiles, pressure on Japan to buy American beef and citrus fruits, and pressure to bolster the yen. In Congress, the free-trade consensus is eroding, and restrictions and retaliation are openly discussed. The House and the Senate recently approved by wide margins resolutions calling on the President to retaliate against Japanese imports if Japan does not take major steps to open its markets. Congress has often threatened to act, but has rarely delivered. Now the Japanese wonder if Congress means it.

Although imports from Japan are sensitive issues, access to Japanese markets has become the most important issue for the U.S. Japan is the single largest buyer of our agricultural exports, and, after Canada, is the second largest market for all U.S. exports, buying some $22 billion worth last year. Our economy derives real benefit from trade with Japan. To improve our access, we have negotiated five packages with Japan in the last four years. Yet no real change in trade patterns has taken place, and the trade deficit has only grown larger. Japanese trade barriers are a problem, but even in an open Japanese market the best estimates are that the U.S. would sell no more than $15 billion worth of additional goods, less than half the present deficit.

Perhaps the chief source of our trade deficit is not in Japan: It is here. The high exchange rate of the dollar raises the price of American exports and lowers that of foreign imports. The most important step we can take to correct our trade imbalance is to get control of the federal deficit. That will help reduce interest rates and thereby bring the exchange rate back into line with the dollar's true value.

The Japanese save and invest more than we do. Consumer credit is not easily obtained, and savings in Japan are directed toward investment rather than the purchase of foreign consumer goods. Japanese investors purchased some $20 billion of securities in the United States in 1984 in order to take advantage of high interest rates. Japanese argue that their large U.S. investments counterbalance the trade deficit, since they contribute to American growth and employment.

Trade barriers in Japan are still a problem, but they are of less concern now than "non-tariff barriers", such as Japan's distribution system, protection of strategic industries, buy-Japanese attitudes, and regulatory barriers. Unlike the U.S. and Western Europe, Japan does not permit foreign companies to participate in the drafting of product regulatory standards. Americans often complain that these standards are unfairly drawn along terms of design rather than performance.

Japan also benefits from its close government-private sector relationship. The world is divided into more than free-market economies and centrally-planned economies. Japan is somewhere in between. Japan's Ministry of International Trade and Industry coordinates trade policy and orchestrates which sectors and industries will expand or contract. We historically have spurned such an industrial policy as excessive government intervention.

Finding a solution to our trade problems with Japan will require careful judgments. Japan is a crucial ally of the United States in the Pacific, and its friendship is important to the security of that region. Much more is at stake than correcting the present trade deficit.

Several steps are needed. First, we must get Japan to open more of its markets. Reciprocity must be implemented with flexibility and finesse. We are seeking better access for electronics, timber, pharmaceuticals, and telecommunications, the last area providing a most important test issue. Japan has never fully accepted the rule of an open trading system, even though it is one of the greatest beneficiaries of that system.

Second, we might explore negotiating specific shares of the Japanese market in sectors where we are genuinely competitive. This has the advantage of relative simplicity, and avoids both countries getting bogged down in minute regulations. This could be a temporary way to gain market access.

Third, Americans need to improve our export capabilities. We often fail to match the Japanese skill and determination to work the U.S. market. Hiring Japanese staff and learning Japanese is important, as is finding the right partner in Japanese industry. Private sector efforts to export need to be bolstered by Washington. The ability of U.S. companies to sell in Japan will be determined less by the concessions we extract than by the skill we show in the products we develop and the mastery we show in marketing.

Fourth, the U.S. must encourage its allies to turn up the pressure on Japan. The major Western economic powers, including Japan, recently discussed steps to solve present trade problems, but did not agree on a timetable for a new round of negotiations. Such a round will be important for resolving trade differences. Pressure should also be brought on Japan to encourage consumers, through tax and financial incentives, to buy more goods, including imports, and save a little less.

Finally, and perhaps most importantly, Japan and our other trading partners must see that the United States is putting its own economic house in order. U.S. rhetoric against the Japanese trade barriers will not have much force as long as the U.S. budget deficit grows.●

EARL C. BEHRENS

HON. SALA BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mrs. BURTON of California. Mr. Speaker, this past Monday Earl C. Behrens, the political editor of the San Francisco Chronicle for many years, died at the age of 93.

Known in the national political scene as "Squire" Behrens, he covered California politics, national conventions, and the State capital beat in Sacramento for some 50 years.

Squire Behrens could be courtly and gracious, but he had a legendary impatience for those in government or politics who danced around in response to one of his typically incisive and insightful questions.

Squire Behrens' passing marks the end of a great and colorful chapter in San Francisco political journalism, but those of us who knew him and avidly read his reporting will always have a lingering respect for his memory.●

A TRIBUTE TO FRANCES MARSH SHASKAN

HON. SALA BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mrs. BURTON of California. Mr. Speaker, I would like to bring to my colleagues' attention to a remarkable constituent of mine who, on May 28, will receive the prestigious Eleanor Roosevelt Democratic Woman of the Year Award in San Francisco.

Frances Marsh Shaskan is, in the truest meaning of the term, a "Renaissance Woman." Her career has been rich and diverse and her commitment to her community is consummate.

After her graduation from Radcliffe College in 1927 she taught French in the Scarsdale, NY, school system and, shortly thereafter began study and experiment in brain metabolism, publish-

ing a paper in 1936 entitled "Lactic Acid Content of Blood and Cerebral Spinal Fluid" in the Archives of Neurology and Psychiatry. In 1937 she published "Vitamin C Studies in Alcoholics" in the American Journal of Psychiatry.

In 1930 Frances Shaskan became a member of what was to become the illustrious Democratic Women's Forum, joining Eleanor Roosevelt, Mrs. Louis Brandeis, and Frances Perkins.

In 1947, to the good fortune of our city, Frances and her husband Donald, moved to San Francisco. Since then, her contributions to our city have been many, and legendary. She has been and continues to be a devoted advocate for those in need of a vigorous champion. Among her many achievements she helped organize a consumer group to fight high food prices and established a milk program for school age children.

This led to the founding of the Farmer's Market which has been providing quality, low-cost produce to our area for over 35 years. Her knowledge of foreign affairs and defense issues is formidable as is her zeal for peace and for world unity.

To avoid committing a sin of omission, I will employ the worn cliche that Frances' accomplishments are too numerous to mention. I had the great pleasure of serving with her in the Democratic Women's Forum for many years and I know of her special passion for equality and justice. She holds our Government to the highest possible moral standards, and she therefore provides us with a standard to which we should all aspire.

I am sure my colleagues would join with me in extending congratulations to Frances Shaskan—a truly exceptional individual.●

A TRIBUTE TO FATHER ANTHONY DUDEK

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. LIPINSKI. Mr. Speaker, it is with great pride that I rise before my colleagues today to call attention to Father Anthony Dudek, who recently celebrated the 50th anniversary of his ordination into the priesthood.

Father Dudek has had a long and distinguished career in the priesthood. Following his ordination on April 27, 1935, at St. Mary of the Lake Seminary in Mundelin, IL, Father Dudek was assigned to the St. Salomea Parish in his native city of Chicago. After 5 years at St. Salomea, Father Dudek was asked to join the armed services as a chaplain. He was stationed in both Europe and the Pacific during World War II and, following the war, was made command chaplain of the entire Carribean Zone. He also served at Fort Leavenworth and Brooks General Hospital in San Antonio, TX, while in the military. In 1970, after 28 years, Father Dudek left the service, receiving the Legion of Merit commendation medal at his retirement ceremonies.

Once again a civilian, Father Dudek returned to his home parish in Chicago, St. Barbara, where he offered his services as a full-time resident and assistant for nearly 15 years. He currently resides at St. John of God Parish and will celebrate his 75th birthday this July.

Mr. Speaker, I join with the residents of the Fifth Congressional District in paying tribute to Father Anthony Dudek on the occasion of his 50th anniversary and thank him for his outstanding community work in our behalf.●

FAIRNESS IN ALCOHOL ADVERTISING ACT OF 1985

HON. JOHN F. SEIBERLING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Mr. SEIBERLING. Mr. Speaker, one of the most serious problems afflicting our society today and threatening the health, safety, productivity, and quality of life of many Americans is the misuse of alcohol. Alcohol is a dangerous and addictive drug, but unfortunately, many people do not understand that. As a result, this Nation suffers hundreds of thousands of alcohol-related deaths and serious injuries every year. In addition to drunk-driving accidents, alcohol misuse often plays a role in incidents of child and spouse abuse, suicide, and crime. Alcohol can also have serious adverse health consequences and has been linked to birth defects, liver disease, heart disease, and several forms of cancer, to name only a few. All of this causes immense suffering for millions of people and costs our Nation billions of dollars every year.

One of the saddest aspects of the alcohol problem is that it is reaching epidemic proportions among many young people. Alcohol is the drug of choice for many teenagers. According to the National PTA, of the estimated 13 to 15 million alcoholics and problem drinkers in the United States, more than 3 million are under the age of 18.

There are certainly many factors that are responsible for the alcohol problem in this country—stress, parental behavior and influence, peer pressure, and lack of health information are just some. But whatever the other factors, it is clear that the nature of alcohol itself plays a big role. Unfortunately, you would never know the extent of the problem from viewing the large number of slick advertisements promoting the sale and consumption of alcohol which are saturating the air waves. These give the impression that alcohol is the solution to finding a better, more enjoyable life, not the doorway to trouble and tragedy that it really is.

As a parent concerned about the youth of this country, a someone who observed at first hand the birth of Alcoholics Anonymous 50 years ago, as a preventive health advocate who believes in the importance of fitness, good nutrition and health education, and as a member of Congress who feels we have a responsibility to help create and maintain a healthier and safer society for everyone, I think it is time we took effective action to see that the public is given all sides of the picture about alcohol and the perils of alcohol use and misuse. So today I have introduced the Fairness in Alcohol Advertising Act to require that when any alcoholic beverage is advertised on television, radio, or cable, equivalent time shall be provided for the presentation of messages regarding the various adverse effects that may be attributable to consumption and misuse of alcohol.

Essentially, this bill adopts the Fairness Doctrine approach. Currently, the Fairness Doctrine requires that when a broadcast or cable station presents one side of a controversial issue of public importance, the station must afford a reasonable opportunity for the presentation of contrasting points of view. However, in 1974, the Federal Communications Commission found that standard product commercials do not trigger the Fairness Doctrine right to presentation of a contrasting view. The Fairness in Alcohol Advertising Act does not overturn that decision but simply recognizes that alcoholic beverage advertisements promote a special kind of product which present unique problems thus requiring separate and unique treatment.

The bill amends the Communications Act to specifically provide that in order to air commercial messages promoting alcoholic beverages, a radio or television licensee or a cable operator must ensure that equivalent advertising time for the broadcast of counterbalancing messages is given to responsible spokespersons. Under the bill, those spokespersons would receive only the free air time; they would have to bear their own production and other costs.

I think that broadcasters are currently doing a good job of complying with the Fairness Doctrine in terms of the many controversial issues facing American society today. I know that it is not always an easy task and I commend them for their efforts. This bill is not intended to force broadcasters

now to give their air waves over to outside parties for whatever messages those parties may wish to convey. The bill's language attempts to give broadcasters and cable operators reasonable discretion in meeting their new responsibilities required by the bill. The bill also requires the FCC, in consultation with both the Bureau of Alcohol, Tobacco and Firearms and the Public Health Service, to issue guidelines to help broadcasters carry out their obligations under this bill.

This bill is not intended to allow the disparagement of any particular brands of beer and wine, but to allow the fullest possible discussion of the problems associated with alcohol in general. Nor is it the intent of this bill to detract from the many existing public service announcements dealing with community needs and problems other than those associated with alcohol. Broadcasters are doing a great service to their communities by providing important messages on behalf of many different causes including Red Cross, United Way, hunger and disaster relief, voter education, job training and many others. My bill specifically states that the alternative alcohol messages required by the bill may not be used to discharge the broadcasters' public interest obligations in other areas.

The bill defines alcoholic beverage advertisement as programming which is intended to promote the purchase or consumption of alcoholic beverages and for which air time is purchased from the broadcaster. Excluded from this definition are announcements which are limited simply to sponsor identification of a program, such as the recognition given corporate sponsors of PBS programs. Alcholic beverage is defined in this bill as it was in last year's amendment to the Highway Safety Act establishing a national minimum drinking age.

With regard to the equivalent time requirement, this bill looks to the approach now followed regarding the use of broadcast time by candidates for public office. The Fairness in Alcohol Advertising Act provides that the counterbalancing messages be afforded air time which is of equal duration to that used for the presentation of alcoholic beverage advertisements, and which has an audience size and composition approximately equivalent to that received by the alcoholic beverage advertisements. These requirements ensure that the counterbalancing ads can't be lumped together into one big spot and aired at 2 a.m.

I realize that this equivalent time standard goes beyond the reasonable opportunity standard which is applied to other issues under the Fairness Doctrine. However, I don't think that any other issue receives the same significant amount of time for its promotion as the commercials for alcoholic beverages now do. Thus, I believe that this imbalance justifies the requirement of equal time.

Let me emphasize that I do not believe that beer and wine commercials promote the misuse of alcohol, nor do I think that these ads directly cause such misuse. However, it is undeniable that by portraying happy, successful, healthy people drinking wine and beer, these ads do project the image of a total lifestyle which appears enviable. They are thus influential, especially on impressionable young people. The influence of such commercials may be subtle, but it is real and powerful, nevertheless. As Rose K. Goldsen, Ph.D., a professor of sociology at Cornell University has written:

> Conventional wisdom insists on establishing a measurable connection between exposure to the ads and drinking as 'proof' that they do anything at all. But we miss the culture-shaping power of commercials if we think that's how they do their main work. Not many children are likely to respond to a beer commercial by dashing to the nearest bar for a beer on draft, nor is it our custom to admit kids bars. But since it is our custom to beam the bars into our homes every day, it's hard to grow up in this country without learning the advertisers' glamorized versions of the culture of bars of how delightful are those grownup lifestyles that drinking so enhances.
>
> All children aspire to adulthood and prepare for it by trying out the various behavioral repertoires their environment makes familiar and paints as admirable. That environment is now saturated with repertoires picked up from TV, including the substantial input made by commercials glamorizing drinking.

The Fairness in Alcohol Advertising Act addresses the need to offset these images of glamorous lifestyles and to show that, unfortunately, there is a dark side to alcohol.

I know that the wine and beer industries and the broadcasting industry share the concern about the misuse of alcohol and have responded positively by mounting campaigns in schools and on the air against alcohol abuse. However, most of their efforts have focused on drunk driving and while these efforts have been commendable, I don't think they are reaching a sufficiently wide audience or are covering a sufficiently broad range of the problems associated with alcohol consumption. Let me emphasize here that I am talking about consumption even in relatively modest amounts and not just the grossly excessive consumption usually comprised under the terms "abuse" or "misuse." The public needs to be better educated regarding the many risks associated with alcohol consumption. Alcohol can affect the brain and body in many disruptive ways. There is hardly any organ, tissue or function of the body that is immune to alcohol's damaging effects.

I want to make clear that I am opposed to prohibition. I am not seeking a ban on either the product or on the alcohol ads themselves. And in introducing this bill, I am not saying that people should become teetotalers. But I do think people should know about the risks associated with drinking, even in moderate amounts.

The challenge facing us is to come to grips with the national tragedy of alcohol misuse and the dangers it poses to health, safety, family life, mental acuity and social development. I don't pretend that this one piece of legislation offers the full answer. But it is a step forward. This bill would provide an opportunity for a wider dissemination of responsible information regarding the dangers of alcohol misuse. It seeks to increase the public's knowledge and understanding of the many risks and consequences associated with alcohol misuse and to educate high risk populations, such as pregnant women, alcoholics and adolescents about the special concerns and risks associated with the consumption of alcoholic beverages. Finally, I think that enactment of this bill would not only help deter individuals from becoming problem drinkers, but also help discourage minors from using alcohol and teenagers and young adults from developing lifestyles which include excessive alcohol consumption.

I have, as you might suppose, already received numerous letters and visits from people in the broadcasting industry, as well as the beer and wine industry, opposing any such legislation and raising many questions and objections. All of them are entitled to careful consideration and should be evaluated after a thorough and balanced legislative hearing in which all sides have an opportunity to make their case. I am sure that just such a hearing will be held and that Congress will not act hastily or without all relevant information.

My bill is intended to aid that process, and I believe it will provide a focal point. Surely all points of view can only benefit by a full and frank public discussion of this very real and important issue.

Recently, a broadcasting executive speaking in Cleveland said that the answer to alcohol abuse lies in increased public education about the associated dangers and risks. I agree with him. I believe that the Fairness in Alcohol Advertising Act will, in the end, be seen as providing a reasonable means of achieving this crucial national goal.●

DEPENDENT CARE TAX CREDIT

HON. OLYMPIA J. SNOWE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, May 15, 1985

● Ms. SNOWE. Mr. Speaker, today I am introducing legislation along with

my good friend and colleague, Hon. SILVIO CONTE, to expand the dependent care tax credit and make it refundable for those whose tax liability does not exceed the credit to which they are otherwise entitled. In addition, this legislation would provide for a limited credit for respite care expenses which allow caregivers a brief period of relief from the daily responsibilities of caring for a seriously ill or disabled dependent. These provisions have also been included in the Economic Equity Act of 1985, introduced on May 13 by Congresswoman PAT SCHROEDER.

Dependent care is a vital support service for all working persons, and it is particularly important for women working outside of the home because they are the individuals most likely to be faced with the responsibility of caring for dependent family members. Access to affordable dependent care is a crucial factor in ensuring that women have an equal opportunity to enter and continue in the job market. Many studies suggest that approximately one in every five or six women is unemployed because she is unable to make satisfactory child care arrangements.

There is an equally pressing need for adequate care for elderly dependents. Women's caregiving responsibilities frequently do not cease when her children are grown, but rather change to accommodate an aged parent or sick spouse. One in ten middle-aged women between 45 and 65 has responsibility for older relatives. While many of these women continue to participate in the labor force, countless others retire to assume full-time responsibility for the care of a dependent family member. It is important to encourage the use of respite care by these caregivers as a means of avoiding expensive institutionalizations down the road.

The dependent care tax credit is currently available to taxpayers who incur work-related expenses for the care of a child under age 15, a disabled spouse, or any other dependent who is physically or mentally incapable of caring for him or herself. In 1981, Congress replaced the previous flat rate credit for dependent care with a sliding scale that focused the maximum benefit of the credit on lower income households. The scale currently allows a 30-percent credit for work-related dependent care expenditures up to $2,400 for taxpayers with incomes of $10,000 or less; the credit is reduced by one percentage point for each $2,000 of income between $10,000 and $28,000 to a minimum of 20 percent. Currently, a family earning $10,000 a year would have to pay $2,400 per year, nearly one-fourth of its income, to receive the maximum credit of $720.

In order to provide a more realistic level of support to working families to help them meet dependent care expenses, my legislation would raise the sliding scale to 50 percent of work-related dependent care expenditures for families earning $11,000 or less. The scale would be reduced by one percentage point for each full $1,000 of income, with persons earning $41,000 or more receiving a credit of 20 percent. In addition, the dependent care tax credit would be indexed to the cost of living and made refundable so that those families with incomes too low to have tax liability or whose credit exceeds their tax liability have access to the credit. Currently, 93 percent of all claims are made by families with incomes greater than $10,000 a year. A refundable tax credit that is indexed to the cost of living will ensure that lower income families have the same access to the credit as the middle and higher income families who currently derive considerable benefit from this tax credit.

Finally, my legislation would, for the first time, include respite care expenses under the dependent care tax credit. Respite is a relatively newly defined service area designed to provide care for the dependent person while the caregiver takes a break from their daily responsibilities. In a very real sense, respite means relief, and as such, is vital to the continued well-being and effectiveness of the caregiver.

The legislation I am introducing today provides for a credit on up to $1,200 of expenses for one dependent and $2,400 for two dependent individuals to provide for respite care. A caregiver would be able to either hire someone to come to the home to care for the dependent for a few hours a day or a week, or could bring the dependent to an adult day care center. My legislation would also permit up to a 2-week stay in an institution in order for the caregiver to tend to other personal or family affairs. A credit on expenses incurred for respite care would be available without regard to the caregiver's employment status.

Because the concept of respite care is a relative new one, I would like to take this opportunity to highlight the importance of this section of the bill. Legislation in the area of dependent care. has generally been tied to the needs of the dependent, with less attention paid to the caregiver. The caregiver is a vitally important link in the home care of an individual who is unable to maintain him or herself. This role most often falls to a female family member, such as the mother, daughter, daughter-in-law or wife of the dependent family member.
